VOLUME XXXV, PART VIII.

CONGRESSIONAL RECORD,

FIFTY-SEVENTH CONGRESS, FIRST SESSION.

I am for this proposition, both as a matter of necessity for the Navy and as a matter of economy for the country. We shall spend less than a million dollars for five of these boats. We would spend more than $7,000,000, I am informed, for one battle ship. But I am told that one objection to this appropriation is that it is said these boats have not possibly reached the limit of development yet. I ask the chairman of the committee what arm of the naval or the military service has reached the limit of development? We build great battle ships every year, and yet we all know that in ten or fifteen years from this time the hundreds of millions of dollars that we are spending in that way will be entirely lost, because the battle ships will be out of date. We appropriate money for costly armament and promptly some genius invents a projectile that makes the armament worthless. We can not afford to let improvements in the Navy rest until American ingenuity is exhausted.

Mr. WILLIAM W. KITCHIN. Mr. Speaker, I would ask some gentleman who is to oppose this motion to consume some of the time before I use the remaining four minutes allotted to me. I wish to reserve my four minutes for the present.

Mr. FOSS. I would say to my colleague that the gentleman from New Jersey [Mr. LOUDENSLAGER] has fifteen minutes remaining.

Mr. WILLIAM W. KITCHIN. Mr. Speaker, I understand that the gentleman from New Jersey yielded to me fifteen minutes, of which I have four minutes remaining. Before using that time I wish to hear some one who opposes the motion. That was the request that I made. I hope the gentleman from Illinois [Mr. FOSS] will consume some of his time before I am compelled to use my remaining four minutes.

Mr. FOSS. Mr. Speaker, I will yield five minutes to my colleague upon the committee, the gentleman from Kentucky [Mr. WHEELER].

Mr. WHEELER. I yield the five minutes to the gentleman from Alabama [Mr. CLAYTON].

Mr. CLAYTON. Mr. Speaker, like the gentleman from Missouri [Mr. COWHERD], I am not experienced in the construction of submarine boats. But notwithstanding my lack of technical knowledge, several reasons occur to me why this amendment or proposition to make this appropriation should not pass. I call the attention of the House to the fact that two years ago an appropriation was made authorizing the construction of 8 of these submarine boats.

Under that authorization these 8 submarine boats could have been, and should have been, delivered twelve months ago. It is a fact, Mr. Speaker, that there are in this House some gentlemen who, when that measure was up, voted in favor of it because they desired further experimentation on the subject of submarine navigation. Now, then, that appropriation was made——

Mr. LOUDENSLAGER. Mr. Speaker——

The SPEAKER pro tempore. Does the gentleman yield?

Mr. CLAYTON. I can not yield. I beg the gentleman's pardon.

Mr. LOUDENSLAGER. It was just a question.

Mr. CLAYTON. I can not yield even for a question now. I hope this will not come out of my time.

The SPEAKER pro tempore. It will not.

Mr. CLAYTON. I do not wish to be discourteous to the gentleman.

Now, Mr. Speaker, I have stated one reason which impels me to vote against this proposition—the fact that the 8 boats already authorized have not been delivered, and I am not satisfied that the construction of submarine boats has been so perfected as to make them of practical use in naval warfare.

Besides, Mr. Speaker, I have a suspicion that the object is not to deliver any one of these boats until the job is further increased by further appropriation for more boats of the same kind, and that when the 8 already authorized and the 5 now sought to be authorized are built, they can all be delivered at once. The whole 13 will then be delivered, and a very handsome profit will have been made out of the undertaking, although it may then be demonstrated that the boats are practically worthless.

Again, I put my opinion against that of the gentleman from Missouri, and beg to say that I became convinced when I saw the *Holland* perform at Annapolis that the submarine boat has not yet been perfected. A valuable principle doubtless has been discovered, but I do not believe that the submarine boat now built can meet the practical exigencies required in successful submarine navigation. I do not believe that the boat can be controlled at all times and made useful in actual warfare.

In my judgment, the boat can not always be made to go down and to come up as its navigators may please. Some of us have been told that it takes a trained and experienced crew to manage the one boat that has been operated to some extent. The builders of this submarine boat, so we are informed, have but one experienced crew that can properly manage one of these vessels, and that sometimes even that crew, on a holiday trial, is not successful in its management.

We should not make this appropriation for other boats until those that have already been authorized have been delivered and tried. If these boats had been delivered—if we are to try this case upon suppositious propositions, as suggested by the gentleman from North Carolina [Mr. WILLIAM W. KITCHIN] in his argument—let us suppose that a foreign man-of-war should threaten one of our port cities, of what use would be one of these torpedo boats?

I have never seen one of them perform except near the shore in placid or nearly placid waters. In the case given, if the man-of-war should stand 5 or 6 miles out from the threatened port, how could the submarine boat be successfully operated against it? Who knows whether these submarine boats can live any distance from land in a rough sea? Doubtless the man-of-war could remain out of reach of the submarine boat, and yet with a modern 13-inch gun do most effective and destructive work against one of our port cities.

Of course, if the man-of-war should come near to the shore, and in smooth waters, it is possible that one of these submarine boats could successfully fire a torpedo against it. But to use a homely illustration, the case supposed would be very much like the statement that we sometimes make to a very small boy; that is, that he can always catch a bird if he will put salt on its tail. Mr. Speaker, it has not been demonstrated that these submarine boats can be made practicable. They have not yet been perfected to the point that they can strike terror to a battle ship.

Mr. GAINES of Tennessee. How could they get one of them to the Philippine Islands?

Mr. CLAYTON. I do not know how one of them could be gotten there. Nobody has, so far as I know, ever seen one of these boats any considerable distance from the shore.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. FOSS. I yield five minutes to the gentleman from Kentucky.

Mr. WHEELER. Mr. Speaker, the objection that I have to agreeing to the amendment of the Senate is not based upon my deliberate judgment that the Holland torpedo boat possesses no merit. I am inclined to believe that submarine navigation is capable of successful solution; but I seriously question whether the Holland people have yet solved that problem. That is not, however, my chief objection to agreeing to this amendment. The gentleman from Alabama has forcefully stated the provision in the last naval appropriation bill, and in conjunction with that I desire to read to the House the provision incorporated by the Senate in the present bill in addition to it—an amendment which the champions of the Holland torpedo boat in this House desire to have passed.

Now, these people were to have delivered to the Government eight submarine boats on the 1st day of April, 1901, and they have not yet delivered any of them. We have been informed by the champions of the Holland torpedo-boat people that one of these boats has been completed for some time, the *Adder*, and that it is now at the Washington wharf. Why it has not been delivered I was unable to see until the amendment of the Senate was incorporated in this bill. I desire to read the amendment:

Provided, That no contract shall be made with said company until one of the Holland boats now being built for the Department shall have been accepted by the Secretary of the Navy.

In other words, that when the Holland torpedo people deliver one of their boats and give it a practical or impractical test, the other seven boats, whether they are successfully constructed or not, shall be disregarded by the Secretary, and he shall at once sign a contract for the other five. Now, Mr. Speaker, I believe that this Government ought to wait until at least one or more of the boats now authorized have been delivered to the Government, and it has been practically demonstrated by the officers of the Navy Department that there has at least been a partial solution of the submarine-navigation problem.

I am fortified in that judgment by the opinion of every bureau chief in the Navy Department, by both the present and past Secretaries of the Navy, and by Admiral Dewey, the commanding officer of the Navy, who is an avowed advocate of submarine boats. In a letter addressed to him by the gentleman from New Jersey [Mr. LOUDENSLAGER], asking his opinion on the question, he states that, in his judgment, the House should not authorize any more of these boats until the eight at present contracted for have been completed and delivered to the Government.

There is another equation in considering this matter not insignificant. I challenge the advocates of this measure to show on the floor of the House a statement by any Holland torpedo boat man as to what the cost of one of these little skiffs is. The committee have tried almost with a burglar's jimmy to elicit some

sort of information as to what they pay for these little skiffs. We have not been able to elicit anything from them like an intelligent and coherent statement.

But we do have from Admiral O'Neil, and perhaps from other naval experts, an estimate as to the cost of construction of these boats. Admiral O'Neil testified before a committee of the Fifty-sixth Congress that they could be constructed for $50,000 at a profit, leaving a net profit of $120,000 per boat. Since that time I think the margin of cost has perhaps been raised to $75,000. As an evidence of good faith upon the part of the House committee to successfully solve the question of cost to the Holland people, we asked if they would take a royalty of $20,000 a boat, and they absolutely laughed at that offer.

Now, Mr. Speaker, I can not go into the question as to what effect a torpedo boat would have upon a cruiser or a man-of-war, but they have never yet performed any successful feat of war; but if they are what is claimed for them by their advocates, let us construct the eight and put them to the test, and that will tell the story for all time to come.

[Here the hammer fell.]

Mr. CLAYTON. Will the gentleman from Illinois yield a little further time to the gentleman from Kentucky in order that I may ask a question?

Mr. FOSS. I will yield the gentleman one minute.

Mr. CLAYTON. I desire to know what the carrying power of a 13-inch gun on a modern man-of-war is, what distance it will do effective work. Suppose a war ship is out at sea and should approach one of our ports bombarded, how far off from the port could she be and do effective work with a 13-inch gun?

Mr. WHEELER. Why, Mr. Speaker, I have no doubt a 13-inch gun would be effective, in the sense indicated by the gentleman from Alabama, at a range of 8 or 10 miles. It would not, of course, pierce armor at that distance, but it would be effective for the purpose of exploding shells. In that connection I desire to say that there is no proof that these little boats could live in a heavy sea.

Mr. CLAYTON. That is what I wanted to come at, whether one of these boats could live 6 or 8 miles out at sea.

Mr. FITZGERALD. I would like to ask the gentleman from Kentucky if the committee could ever ascertain from the builders the cost of a battle ship?

Mr. WHEELER. Yes; we can tell the exact cost of that from the Navy Department.

Mr. WILLIAM W. KITCHIN. I now yield four minutes to the gentleman from Missouri [Mr. VANDIVER].

Mr. VANDIVER. Mr. Speaker, I regret very much in the short space of time allotted to me that I shall not be able to state all the reasons for my position on this question. I will ask unanimous consent to extend my remarks briefly in the RECORD, to quote from some of the authorities in the Navy on this subject.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. CLAYTON. Why not let it cover everybody who makes a speech on this subject? I do not want to extend my remarks, but some other gentlemen do.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent——

Mr. VANDIVER (interrupting). Mr. Speaker, I did not make such a request. I can not be interrupted for that purpose. I want to proceed with my remarks. Mr. Speaker, there are a few important reasons, in my judgment, why the amendment of the Senate should be concurred in. In the first place, I believe that in the long run it is a matter of economy to the Government.

ECONOMY.

The war with Spain practically demonstrated that our harbors, cities, and towns along the Atlantic coast and Gulf coast were practically at the mercy of the Spanish fleet. The Navy Department was importuned by members of Congress and Senators of the United States from Maine to Texas, inclusive, for anything in the way of vessels to protect their towns and cities from the Spanish attack, and nine times out of ten they were informed there was nothing available.

This is Admiral Hichborn's testimony before the House Naval Committee.

Admiral Dewey, in his testimony before the House, stated that with two Holland submarine boats in Galveston Harbor all the navies of the world could not blockade that place.

Assuming the Admiral's statement to be correct—and he is the best expert upon that question in the world—and assuming the cost of a battle ship, including her armament, is $6,000,000, the cost of one battle ship ($6,000,000), therefore, put in Holland submarine boats at the price now paid by the Department ($170,000) would give the Government 36 Holland submarine boats.

Now, let us see what places would be protected by placing these boats in the principal ports and harbors of the United States, so that all the navies of the world could not blockade them, according to Admiral Dewey.

Two at Portland, Me.; 2 at Portsmouth, N. H.; 2 at Boston, Mass.; 2 at Newport, R. I.; 2 at entrance to New York by way of the Sound, and 2 at Sandy Hook to protect New York; 2 at Atlantic City; 2 at the Delaware Capes; 2 at the Chesapeake Capes to protect Norfolk, Baltimore, and Washington; 2 at Wilmington, N. C.; 2 at Charleston, S. C.; 1 at Port Royal, S. C.; 2 at Savannah, Ga.; 1 at Fernandina; 1 at Jacksonville, Fla.; 1 at Key West; 2 at Pensacola; 2 at Mobile; 2 at the mouth of the Mississippi to protect New Orleans, and 2 at Galveston, Tex.

It will thus be seen that by the expenditure of the amount of money equal to the cost of one battle ship, that, according to the testimony of Admiral Dewey, every important seacoast city and town from Maine to the Gulf of Mexico can be protected fully from a blockade by all the nations of the world. Is not that economy?

Now, let us see about the endurance of these boats. They are built of steel, and Captain Wainwright, who has had charge of the *Holland* for the last two years, says in his testimony before the House committee May 20, 1902, page 7:

I think if a Holland boat is properly cared for it would last fifty or sixty years.

It will thus be seen that by the expenditure of $6,000,000—the cost of one battle ship—the harbors and coast of the United States on the Atlantic coast side can be fully protected from the invasion or blockading of foreign fleets and with vessels that, with ordinary care, will last for half a century.

Looking at it in another direction, the cost of a 12-inch gun, with its carriage and with its emplacement and with the care necessary for its preservation, will be very nearly if not quite as much as one submarine boat, so that the necessity for so many of these large guns could be dispensed with.

Looking at it from any point of view, it is economical and affords an early, economical, and full protection for our harbors and coasts from the attacks of enemies' fleets.

THE QUESTION OF PRICE.

The Senate amendment provides that the price shall not exceed that now being paid for submarine boats. This price is $5,000 less than the British Government is paying for similar boats where labor and everything is cheaper than in this country. The Senate amendment leaves the question of price to the discretion of the Secretary of the Navy. The Secretary is so well known to Congress that there should be no hesitation in permitting him to decide the reasonableness of the price. Admiral Melville presented his ideas about the cost of these boats to Secretary Long, when the contract for the seven boats was under consideration, and made the same statements about the cost that he has done to the committee.

Secretary Long overruled him and decided that $170,000 was a fair and reasonable compensation. Admiral Melville and Admiral Bowles will undoubtedly be consulted by Secretary Moody about the price of these boats, as they are both members of the Board of Construction, and proper weight will undoubtedly be given to their statements by the Secretary.

Since the Holland Company entered into the contract for these boats the cost of the construction of vessels of this character has increased over 50 per cent. The evidence of this is before the House Naval Committee. The Board of Construction has officially stated to the Secretary that the contractors for torpedo boats and torpedo-boat destroyers have lost over $2,000,000 on their contracts, made about the same time the Holland Company contracted with the Department, and the board has recommended to the Secretary, in view of these losses and the increased cost of the production of the torpedo boats and destroyers, that an appropriation be made of over $1,000,000 by the United States to compensate the builders of these torpedo boats and destroyers for half of their loss.

Lieut. Lawrence Spear, of the Navy, states in his testimony before the House (see p. 30):

If this committee would appropriate for surface boats to-morrow and the Department were to ask for bids they could not get a bid for less than $275,000.

The average contract price for these surface boats was $155,000.

Lieutenant Spear, who has been superintending the construction of the Holland boats for the Navy Department at Elizabeth, N. J., states as his practical knowledge of the cost of these Holland boats that they can not be built, under present conditions, under a cost of $125,000, and that does not include any compensation for the use of patents. The Senate amendment, however, leaves this entire matter to the discretion of the Secretary of the Navy, who was recently a member of the House of Representatives and who

has the entire confidence of the House. He will not contract for an excessive price.

Admiral Bowles and Admiral O'Neil recommend that half a million dollars be appropriated at this session for the purpose of experimenting in submarine boats. That recommendation is sufficient evidence that they consider submarine boats valuable. Instead of squandering half a million dollars in experiments and delays and allowing the harbors and coasts of the country to be unprotected for years and years while these experiments are going on, why not take that half a million dollars and buy with it three Holland submarine boats and put two of them in Galveston and protect that port from any blockade hereafter, as Admiral Dewey has said that two of the Holland boats would keep all the navies of the world out of that port. That is a practical way of expending the money these admirals recommend be spent and of getting some immediate benefits without throwing it away on experiments.

ADMIRAL MELVILLE'S INCOMPETENCY AS AN EXPERT.

Melville is the only admiral in the Navy Department who is absolutely opposed to submarine boats. He opposed the purchase of the *Holland* and opposed the contract for the five boats authorized by Congress two years ago. He has had no practical experience at all in submarine boats. He has never seen one run on the surface or submerged. The *Holland* has been in the possession of the United States Government for over two years and has been used for the instruction of 100 cadets and many naval officers, and yet Melville has never had interest enough to go and see her and examine her, although she is within 30 miles of Washington, at Annapolis, Md. Still he poses as an expert on submarine matters and gives advice to the Committee on Naval Affairs, when his testimony would not be admitted as an expert on that subject by any petty court in the United States. There are 200 members of Congress and Senators who have seen the Holland submarine boat at different times, and many of them have made submerged runs in her. They are more competent to express an opinion than this so-called naval expert Melville.

I admire the old gentleman very much in a social or personal respect. His hirsute adornments, hoary head, and waving beard are very suggestive of the old sea kings whose prowess made the navies of the Old World the object of awe and admiration. He is an exceedingly pleasant and entertaining old gentleman, but he belongs to a past age. He mounts the tripod of a revolving chair and stretches out the trident of Neptune over the billowy waves of a velvet carpet and commands his mahogany desk with great ability. Here he sits and figures out that it is mathematically impossible for a boat to rise to the surface and sink again in ten minutes, while others are actually performing the operation in less than ten seconds. He declares they are not more dangerous than mosquitoes; while Dewey declares that two of them would have kept him out of the harbor of Manila, and Caldwell declares that with one of these little submerged dynamic volcanoes he will agree to defend any American harbor against a blockading squadron and sink a new battle ship every night as long as they stay there.

Remember Dewey and Caldwell fought the battle of Manila, and Melville is the velvet-carpet admiral who is reported recently as visiting the region of the coal strike and declaring the strikers were all wrong in their fight against the coal syndicates, and then supplementing this by indorsing the scientific scheme to establish tubular connection with hell in order to get heat enough for our supply without depending on the coal mines. Verily he is a scientist.

Furthermore, Commander Wainwright, superintendent of the Naval Academy, who has been experimenting with this boat for the last two years, when recently before our committee, testified to its efficiency and declared that it had passed beyond the experimental stage and demonstrated its usefulness as a weapon of war. He very strongly urged us to order more of these boats.

Mr. Speaker, seven of these boats have been ordered by the British Government. One of them has been completed and accepted by that Government, and the secretary of the British admiralty recently stated in a speech before the English Parliament that the Holland torpedo boat was the only one of the submarine type that had demonstrated its practicability, and that the British navy was going to continue to add them to its naval equipment.

Although it is an American invention the English have apparently recognized its value more promptly than our own people have. Furthermore, it is being sold to the English Government at $5,000 higher price than we have to pay. It is not one of those things that costs more at home than abroad.

The London Times of May 26 had this to say:

Of the performances of the submarines at Barrow it must suffice to say, for the present, that they show pretty conclusively that vessels of this type are already, within certain limits, a practicable weapon of naval warfare; that their effective range of action, though still restricted, is by no means contemptible; that even when only partially submerged—in the position known as "awash"—they present a very diminutive and not too vulnerable target, and that from this position they can disappear beneath the surface, leaving only the periscope visible before a 12-pounder quick-firing gun could fire more than two shots at them or three at the outside. What in these conditions their offensive and defensive powers may be, further experience alone can determine.

But whatever they are, they are certain to be largely developed as time goes on just as the powers of the torpedo have been developed almost beyond recognition since it was first introduced. In these circumstances the time has surely come, as our correspondent insists, that the absurd and pedantic secrecy with which the submarine has been enveloped by the admiralty should be abandoned. It confines a knowledge of the vessel and its capacities to a very small number of specialist officers, and it deprives all other officers in the service of invaluable opportunities of estimating its powers, possibly of contributing materially to its further development, and certainly of making themselves acquainted with its use and of acquiring the art of handling it. There is, in our judgment, nothing to be gained by secrecy, and there is a great deal to be lost by it. In any case the time has clearly come when the proper place of the submarine in naval warfare should be studied seriously, dispassionately, and exhaustively.

It has been too commonly assumed, perhaps, that even at its best it is mainly a defensive weapon limited for the most part to the defense of harbors, roadsteads, and very narrow waterways. If that were so its place in the naval equipment of this country would be a very subordinate one. We seek to command the sea; we must either command the sea or perish, and so long as we command the sea our ships at sea are the best defense our harbors and coasts can have, the only defense on which, in the long run, this country can surely rely. On the other hand, so far as the submarine is an offensive weapon—and with a radius of action of 200 miles, certain to be largely increased before long, its offensive capacity is already not to be despised—it becomes, as our correspondent insists, a very formidable weapon in the hands of a belligerent whose fleets command the seas.

Established supremacy at sea means that the fleets of the enemy must seek the shelter of their own fortified ports. There they are inaccessible to any existing form of purely naval attack. But they are not inaccessible to the submarine, nor is a friendly submarine acting defensively any answer to or protection against hostile submarines acting offensively from the outside. There is no possible recognition of friend or foe beneath the surface, and the mere menace of a hostile submarine from the offing would thus go far to neutralize the security conferred on naval ports by submarines operating defensively within them. From this point of view, not to mention others on the present occasion, the advent of the submarine in a practicable working form can hardly fail to open an entirely new chapter in the methods of naval warfare.

The submarine boat is no doubt the most striking and sensational of the new naval developments.

Admiral Endicott, Commander Kimball, and Lieutenant Nixon strongly urge us to make this order. Here is exactly what they say:

Rear-Admiral Mordecai T. Endicott, Chief of the Bureau of Yards and Docks, in the New York Journal, November 26, 1899, said:

"The Holland submarine torpedo boat will revolutionize the world's naval warfare. If this wonderful and invaluable invention be all that is claimed for it, and I have no reason to doubt the claims, the first thought is that it will make the American Navy the most formidable antagonist of the greater navies of the world.

"The Holland boat was a bold conception. Its apparent success is a history-making epoch. It will make the harbors of the United States impregnable. It will be a terror to the greatest ships of the present and the tremendous fighting machines which will be turned out in the future.

"The perfected Holland boat will be able to blow battleships to the bottom; to enter harbors and blow up mines and fortifications. It will, by clearing a harbor of mines, let in its allied fleet to destroy a fleet which had felt itself secure behind a network of harbor defenses.

"It will, so far as one can see at this moment, make the American Navy a prime factor among the nations. The Holland boat, if it prove what it bids fair to be, will make the navies of the world playthings in the grasp of the greatest naval engine in history."

Lieut. Commander W. W. Kimball, the commander of our torpedo-boat flotilla during the late war with Spain, testified before the Senate Committee on Naval Affairs:

"Give me six Holland submarine boats, the officers and crews to be selected by me, and I will pledge my life to stand off the entire British flying squadron 10 miles from Sandy Hook without any aid from our fleet."

Lieutenant Nixon, the designer of the battle ships *Indiana* and *Massachusetts*, made the following statement:

"I strongly urge the adoption of the submarine boat amendment. The value to a nation of a type of boat carrying within it such destructive power, and being of itself invulnerable, if they can be delivered in so short a time, is so great that a fleet of such boats should be added to our Navy without delay, in order that the necessary experience may be had in their handling."

Now, in conclusion, Mr. Speaker, observe that the amendment only provides that these boats are to be ordered after the Secretary has accepted those now under construction—the acceptance of one being practically the acceptance of the others, as they are exact duplicates—and hence all this talk about delay is merely to throw dust in the eyes of the House. Every vessel built for the Government is delayed. Some of the battle ships are nearly two years behind the contract. Besides, if these boats do not come up to the requirements, not a one is to be ordered under this amendment, nor should it be.

Let us not set our feet down on a civilian invention simply because the glory of it does not go to an officer in uniform. Let us remember that the great *Monitor* which destroyed the *Merrimac* was built against the protest of these conservative officers, who could not see any merit in the novel designs of Timby and Ericsson. Lincoln had to order it built and put in commission over the protest of jealous officials who thought that no civilian could possibly know anything about naval construction. Let us remember that the Hotchkiss gun and Gatling gun and the Maxim gun are all civilian inventions, and have had to shoot their way into the Army and the Navy, and it is so with nearly every other great invention.

Mr. Speaker, I am for the amendment and I hope it passes.

The SPEAKER pro tempore (Mr. BOUTELL). Does the gentleman from Missouri [Mr. VANDIVER] renew his request to print additional remarks in the RECORD?

Mr. VANDIVER. I thought that was already granted.

Mr. CLAYTON. I object, unless we extend similar permission to everybody.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. CLAYTON] objects.

Mr. CLAYTON. I proposed to the gentleman from Missouri to accept my proposition as an amendment.

Mr. VANDIVER. The Chair has already submitted my request and it was granted. I make no objection to the request of the gentleman from Alabama.

The SPEAKER pro tempore. The gentleman from Missouri is under a misapprehension as to his request having been granted.

Mr. CLAYTON. Let the proposition be amended in accordance with my suggestion.

Mr. VANDIVER. I do not agree to that.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD.

Mr. CLAYTON. I object.

Mr. VANDIVER. All right.

Mr. FOSS. Mr. Speaker, I yield five minutes to the gentleman from Indiana [Mr. WATSON].

Mr. WATSON. Mr. Speaker, the majority of the Committee on Naval Affairs of the House are unalterably opposed to a further authorization of these boats at this time. And it is not an idle fancy or whimsical notion that compels them to take this position, but we believe that conclusion has been reached through sound reason and sound judgment. In the first place, we are opposed to a further authorization of these boats at this time because of the fact that the entire Navy Department as a unit is against it. The outgoing Secretary of the Navy was against it. The present Secretary of the Navy is against it. There is not the head of a bureau in the Navy Department that favors it to-day. There is not a chief of division in the Department who favors it at this hour, and as the gentleman from Ohio wisely said the other day, this is no time to be voting upon a department things that it does not ask for.

There is not a man connected with the administration of the Naval Bureau, with any authority to speak, who is in favor of a further authorization of these boats at this time, and that consideration alone ought to be sufficient to guide this House in its action.

At this point I want to call attention somewhat to the insidious and cunning nature of the campaign that has been carried on by the lobby that has invested these halls and the hotels of this town, and not only that, but has circulated "literature" and bombarded every member of this House throughout the summer months and the winter months and the spring months without cessation in regard to this very subject under discussion. They circulated a report that Admiral Dewey was in favor of this torpedo boat, but they quoted only half of what that great man had said in regard to this proposition, and failed to give the remainder of his language. Not very long ago the chairman of our committee addressed a letter to Admiral Dewey, who in answer wrote the following:

WASHINGTON, *May 27, 1902.*

DEAR SIR: Acknowledging the receipt of your letter of the 25th instant, requesting my views as to the advisability of authorizing at this time the purchase of more Holland torpedo boats, I have the honor to inclose herewith a copy of a communication addressed by me, under date of May 19, to Hon. H. C. LOUDENSLAGER, in reply to his inquiries on this subject. If my views are not therein set forth in sufficient detail, I shall be most happy to answer any further inquiries which you may wish to make.

Very truly, yours,

GEORGE DEWEY.

Hon. GEORGE E. FOSS,
Chairman Committee on Naval Affairs, House of Representatives.

WASHINGTON, *May 19, 1902.*

Hon. H. C. LOUDENSLAGER,
Committee on Naval Affairs, House of Representatives.

DEAR SIR: I have the honor to acknowledge the receipt of your communication of the 13th instant in reference to the construction of submarine boats of the Holland type.

Replying to your question as to whether, in view of the performances of the *Holland* and the *Fulton*, I adhere to the opinion expressed by me before your committee on April 23, 1900, respecting the value of submarine boats for coast and harbor defense, I have to state that my opinion on this subject has not been changed.

The next two questions which you ask relate to the necessity and advisability of providing now for the construction of additional boats of the Holland type. With regard to this matter, I concur with the Secretary of the Navy in the opinion expressed in his letter of January 9, 1901, to your committee, to the effect that as a number of boats of this type are now under construction, it is wise to await their completion before providing for others.

Your fourth question is as follows:

"Is not the defense of our coasts and harbors, coaling stations, and outlying possessions by submarine boats the cheapest and most effective known at the present time?"

I regret to say that I do not now feel prepared to answer this question either affirmatively or negatively. The number of submarine boats which we have had thus far for experiment and test has been very small. Those now under construction should, when completed, be looked upon as the most improved type of submarine boat, and we shall then have a sufficient number with which to conduct such trials as will demonstrate the effectiveness of the type for further use. Should it then be decided that more are desired, their construction will not require a very long period.

Very truly, yours,

GEORGE DEWEY,
Admiral of the Navy.

And yet the Admiral of the Navy not daring to give an opinion on this, members arise here and claim that we need a dozen of these boats in order to defend the entire length of our coast.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. FOSS. I yield to the gentleman one minute more.

Mr. WATSON. In other words, here is a man who says he believes it is a pretty good thing, but that until those the Government has already authorized have been completed, until they have been turned over to the Government, until they have been thoroughly tested, that sound judgment and discretion and wisdom will not warrant a further authorization of these boats at this time. I want to read, as the opinion of the Navy Department on this proposition, the statement of Admiral O'Neil, whose competency no man will question, and who has charge of the submarine boats and is chief of ordnance.

I know of no reason for changing the opinions expressed by me before this committee on January 15, 1901, with reference to submarine torpedo boats of the Holland type.

I still regard them as experimental craft, whose utility and practicability for efficient service has yet to be demonstrated, and I am fully convinced that the Government would not be justified in contracting for any more boats of this type until those now under contract have been completed, accepted, and thoroughly tested, and until the Navy Department is thoroughly satisfied as to their utility and recommends the building of additional boats of this type.

In my opinion the Holland boat does not fulfill all the necessary requirements of an efficient instrument of warfare. I believe that the science of submarine or subsurface navigation is yet in its infancy, and that considerable further development must take place before it can with propriety be said to have passed beyond the experimental stage. Apparently the so-called Holland boats have about reached the limit of development to which boats of this type are susceptible, and if we are to progress in the art efforts should be made to produce, or to encourage others to produce, submarine or subsurface boats having fewer limitations than the Holland boats, and this can only be done by throwing the door open to other inventors.

I think we do not need to do more at present than to give such encouragement as will awaken an interest in the subject and induce designers and builders to compete with each other in producing the best type of submergible or semisubmerged boat.

The possible value of submarine boats in driving off a blockading fleet is frequently referred to, but it should be remembered that the surface torpedo boat has already altered the character of blockading operations, and the submarine boat, on account of its lack of speed and of its limited scope of action, is less to be feared than a well-handled torpedo boat of ordinary type.

Mr. FOSS. Mr. Speaker, I suggest that my colleague go ahead on his side.

Mr. LOUDENSLAGER. I would ask how much more time I have?

The SPEAKER pro tempore. The gentleman from New Jersey has fifteen minutes remaining.

Mr. LOUDENSLAGER. Mr. Speaker, I yield to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Speaker, it is my opinion that our Navy is the pride of every American citizen. Its glory is all our own. From John Paul Jones to Winfield Scott Schley its every act has shed a sheen of greatness, a luster of grandeur on American arms, American manhood, and American chivalry. In all its history there is no blot on its bright escutcheon. It never did a dishonorable thing. It never did an un-American act. It is the American Navy; and when you say that, you speak of the grandest pages in American history. Every American citizen should and does take a just pride in the greatness and the heroic accomplishments in peace and in war of our gallant naval fleet. It is fitting that this is so.

Mr. Speaker, I am now, always have been, and always expect to be the consistent friend and advocate of the American Navy. I believe in our Navy, and I believe we should have one of the best navies in all the world. In a Republic like ours—where every man is a soldier if need be—we do not need a great, threatening, standing Army, but we do need at all times, in peace as well as in war, a great, a formidable, a magnificent Navy.

With such a Navy we need fear no foe; our seacoast towns will fear no danger; our merchant marine on the high seas will be safe, and our citizens in foreign lands will be amply protected. Such, then, briefly, is my past and present opinion, and I have stated it and reiterated it time and time again on the floor of this House. So much for that.

Now, sir, to the point at issue. The question before the House is the Senate amendment to the naval appropriation bill providing for the construction, in the discretion of the Secretary of the Navy, of five additional submarine torpedo boats. Let me say at once that I am in favor of this amendment. I shall vote for it, and I hope it will ultimately be adopted. If the Senate conferees will tenaciously adhere to their position and the position of the

Senate, I feel confident the amendment can be carried. These submarine torpedo boats are no longer an experiment; they have got beyond that stage.

They have been tried and tested, and not found wanting. They can do, and will do, all that has ever been claimed. To-day they are a demonstrated success in every way, and they are more dangerous to an enemy off the coast or near a harbor than a land battery, more formidable than a gunboat, and more destructive than a dynamite cruiser. We need these submarine torpedo boats in the Navy. We need more of them. And with a couple of these wonderful little engines of destruction—the very quintessence of destructive naval architecture—with a couple of these, I say, in each of our great harbors no fleet of an enemy could possibly enter without destruction.

They can do the work, and they do it, silently and unseen. The knowledge that they are in the harbor would deter the bravest admiral from attempting to enter. Admiral Dewey has said that if the Spaniards at Manila had two of these submarine torpedo boats in Manila Bay he never could have taken and held Manila. And again the Admiral has said that with two of these craft in Galveston Harbor all the navies in the world could not blockade that place. This testimony is conclusive to me.

These submarine torpedo boats are peculiarly constructed. They can dive under water and proceed under water with considerable speed and without being seen. In all their actions they are mysterious to the naval navigator. They strike with deadly effect and without warning. They can destroy in a few moments the greatest battle ship and the grandest cruiser. They are the bete noir of naval commanders, the nightmare of sea fighters.

They are the most dangerous, destructive engines thus far invented in naval warfare. Admiral Endicott said regarding them in the New York Journal, November 26, 1899: "The submarine torpedo boat will revolutionize the world's naval warfare. If this wonderful and invaluable invention be all that is claimed for it, and I have no reason to doubt the claims, the first thought is that it will make the American Navy the most formidable antagonist of the greater navies of the world.

"Its apparent success is a history-making epoch. It will make the harbors of the United States impregnable. It will be a terror to the greatest ships of the present and the tremendous fighting machines which will be turned out in the future. It will be able to blow battle ships to the bottom, to enter harbors and blow up mines and fortifications. It will, by clearing a harbor of mines, let in its allied fleet to destroy a fleet which had felt itself secure behind a network of harbor defenses. It will make the American Navy a prime factor among the nations. It bids fair to make the navies of the world playthings in the grasp of the greatest naval engine in history."

This is strong testimony, gentlemen, but it comes from the highest naval source, and I believe it. Who can doubt it? But there is more testimony along the same lines—abundant and conclusive. Let me for a moment read you what Rear-Admiral Jouett, who was with Farragut at Mobile Bay, said to the Senate Committee on Naval Affairs: "If I commanded a squadron that was blockading a port and the enemy had half a dozen of these submarine boats, I would be compelled to abandon the blockade and put to sea to avoid destruction of my ships from an invisible source and from which I could not defend myself."

And Lieut. Commander W. W. Kimball, the commander of our torpedo-boat flotilla during the late war with Spain, testified before the Senate Committee on Naval Affairs: "Give me six submarine boats, the officers and crews to be selected by me, and I will pledge my life to stand off the entire British flying squadron 10 miles from Sandy Hook without any aid from our fleet." And Lewis Nixon, the designer of the battle ships *Oregon*, *Indiana*, and *Massachusetts*, says: "I strongly urge the adoption of the submarine boat. The value to a nation of a type of boat carrying within it such destructive power and being of itself invulnerable, if they can be delivered in so short a time, is so great that a fleet of such boats should be added to our Navy without delay, in order that the necessary experience may be had in their handling."

I want no higher authority than that of Mr. Nixon. He is a true son of the Navy, and it has no greater friend in all the land. The Navy has every reason to be proud of Mr. Nixon, and Mr. Nixon has every reason to be proud of the Navy.

These boats are being built extensively in every foreign country, and we should not be lagging behind. We can build 50 of these submarine boats for what it costs to construct one battle ship. And this amendment calls for only five boats. Do not forget this. And these wonderful little submarine boats are to cost not more than $170,000 apiece, and must be approved by the Secretary of the Navy before the Government is obliged to accept them.

Listen to what Lord Brassey, the great English naval authority, said in a letter to the London Times, September 21, 1901: "The building of a flotilla of submarine boats by the British Government meets with general approval." And I could cite similar testimony from leading naval authorities in France, Germany, Russia, and Italy, all in accord, all to the same effect. England is now building more than twice as many of these submarine boats as we are. We must be up to the times.

On February 21, 1902, Mr. Arnold Forster, secretary of the British admiralty, used these words in the House of Commons, "In regard to submarine boats, we have made more progress than was anticipated in the construction of those boats. The admiralty has the intention of continuing to add this type of vessel to the fleet."

And we must continue to add the same type to the American fleet. This is a matter of so little cost that to be parsimonious is to be criminal. Let me briefly quote now from the language of former Secretary of the Navy Long, before the House Committee on April 19 last: "I consider the submarine-boat feature of the Navy a very important feature indeed, morally, physically, and in a military sense." And also from that very competent man, Rear-Admiral F. T. Bowles, Chief of the Bureau of Construction and Repair, who recommended at the Senate hearing, May 31, 1902, that Congress appropriate $500,000 for building submarine boats. Admiral Bowles has, since the House hearing, made personally a submerged run in the submarine boat *Adder*, built for the Government, and admits that the boat did all that was claimed for it.

Now, Mr. Speaker, I contend, and defy successful contradiction, that these submarine torpedo boats are no longer experiments, but assured improvements in naval warfare, and the most formidable and destructive engine that has thus far been invented by the ingenuity of man for offensive and defensive naval operations. The weight of experienced authority confirms this conclusion, and practical trial maneuvers demonstrate it beyond peradventure. One submarine torpedo boat at Santiago would have saved the Government more than a million dollars. My time is almost exhausted, and in conclusion I appeal to the House to stand by the Senate amendment for a few more submarine torpedo boats for our own Navy. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. FOSS. Mr. Speaker, I would ask how much time I have remaining on this side?

The SPEAKER pro tempore. The gentleman from Illinois has twelve minutes remaining.

Mr. FOSS. I yield three minutes to the gentleman from Ohio [Mr. TAYLER].

Mr. TAYLER of Ohio. Mr. Speaker, I am one of those entertaining views respecting the increase and development of the Navy which in some quarters have been characterized as extravagant. I believe in a real development of the Navy, and that that development should come promptly, but as earnest as I am in that belief, I am as determined in my opposition to this amendment providing for five more Holland submarine boats. I am opposed to it first, because the military value of the submarine boats is still conjectural and entirely unsettled. I am opposed to it because we already have seven of those boats under contract, not one of which has yet been delivered to the Government, although due twelve months ago. I am opposed to it because I think, after having bought eight submarine boats at a very high price, netting a very large profit to the manufacturers, we ought not now to pay $100,000 more for each boat than those boats cost to construct.

I am opposed to the proposition because the Navy Department, in every essential branch of it charged with the responsibility of answering this question, is opposed to the further construction of these boats until such time as we know what the seven boats still undelivered will do. And I am admonished, Mr. Speaker, that this Congress would do well to move more slowly when it passes judgment against the conviction of our great departments.

A few weeks ago I had occasion on this floor to elaborate upon that proposition, and to develop and demonstrate the fact that in no instance where Congress had made appropriations for military implements against the recommendation and over the protest of the two departments has Congress ever been right, but the fact has been demonstrated that the department in every instance was right and Congress was wrong.

Mr. VANDIVER. Will the gentleman yield for a question?

Mr. TAYLER of Ohio. Yes; with pleasure.

Mr. VANDIVER. Will you please tell us who are the naval officers who are opposed to the further construction of submarine boats? Are they any officers except those who tread the quarter deck of a velvet carpet in the office?

Mr. FOSS. Admiral Dewey.

Mr. TAYLER of Ohio. Mr. Speaker, all these questions must be answered by the men at the head of the great bureaus of the Navy Department. The Secretary of the Navy who has just retired; the present Secretary of the Navy; Admiral Dewey, at the head of the naval board; Admiral O'Neil, at the head of the Bureau of Ordnance; Admiral Bowles, at the head of the Bureau of Construction, and Admiral Melville, at the head of the Bureau of Engineering—those names cover all the heads of the great bureaus of the Navy charged with the duty of answering these questions, and they are opposed to this provision. [Applause.]

Mr. FOSS. I suggest that my colleague go ahead. I have consumed more time than that side has.

Mr. LOUDENSLAGER. Mr. Speaker, how much time have I remaining?

The SPEAKER pro tempore. The gentleman from New Jersey has twelve minutes remaining.

Mr. LOUDENSLAGER. How much time has the gentleman from Illinois?

The SPEAKER pro tempore. The gentleman from Illinois has eight minutes remaining.

Mr. LOUDENSLAGER. I yield three minutes of my time to my colleague from New Jersey [Mr. GARDNER].

Mr. GARDNER of New Jersey. Mr. Speaker, I do not know whether the Holland boat has been so wholly completed and perfected that it can be relied upon—as some gentlemen seem to think it ought to be—to face tempestuous seas like a lifeboat, or whether it can be relied upon to go out and in a little while to sink the navies of the world. I do know, Mr. Speaker, that the last power on earth to be parsimonious at this time about any judicious experiment, if you please, with implements of naval warfare is the United States of America, and I do know that while gentlemen here talk about expenses and contracts, the last place for this Congress to exercise parsimony is toward the Navy and naval experiments, if you please to call them that.

Why, if there be force in the arguments that are advanced here about building Holland boats because they are, perhaps, not absolutely perfected as implements of naval warfare had prevailed in the past, the *Merrimac* would never have gone down the James, the *Monitor* would never have appeared in Hampton Roads, and the modern battle ship would never have been evolved. Among the things we know is that the torpedo is becoming the most dreaded instrument of modern warfare, and whether carried over the water or through the water, or planted under the water, it is now and will more and more become the source of nightmare to every commander of a fleet in a hostile sea. If you want verification of that, only look at the testimony of Admiral Dewey, quoted here, and mark the effect that the known presence of two Holland boats, or two other efficient torpedo boats, in Manila Bay would have had on him.

Why, think of it, Mr. Speaker. If the words of the Admiral import to others what they do to me, the known presence of two such boats in Manila Bay would have saved the fleet of Spain and changed the history of the world. Some gentlemen tell us that we have five Holland boats to protect our coast, on two oceans, scarcely one to a thousand miles. They must have boundless faith in their effectiveness. Now, if there is anything we want, in my judgment, in the way of implements of warfare, anything that we want to construct in time of peace, it is the most thorough and extended system of harbor defenses. No foreign foe can menace us save from the sea. We need to prepare to defend our harbors above all things else.

[Here the hammer fell.]

Mr. FOSS. I suggest to my colleague that he consume more time on his side, inasmuch as we have already consumed more than he.

Mr. LOUDENSLAGER. I suggest to the gentleman from Illinois that he consume more of his time. As we have the affirmative side I think we ought to have the closing argument.

The SPEAKER pro tempore. The Chair will suggest that the gentleman from Illinois has absolute control of the time.

Mr. LOUDENSLAGER. How much time does the gentleman from Illinois control?

The SPEAKER pro tempore. He has nine minutes remaining.

Mr. LOUDENSLAGER. Mr. Speaker, in regard to the increase of the Navy, I have during my membership of the committee given it some little study, and I do not always agree with those upon the floor of this House who are great in debate and oratory and who claim to hold a hand upon our United States Treasury. If I remember distinctly, in the Fifty-third or the beginning of the Fifty-fourth Congress opposition strong and bold was made to our creating an increase of our Navy because it was not needed. I saw those same members later on upon the floor of this House voting for $50,000,000 to be put into the hands of the President, the most of which was paid abroad to pay wages of workmen in foreign shipyards.

I believe we have not to-day one-third of the naval force that we ought to have; and I believe in order to have an efficient Navy we should have one constituted of every type of modern naval weapon that is known to the world. In this matter I am willing to take as the judgment of what is needed not those who sit in the offices at the yonder end of this Capitol, who know nothing about the strategic and tactical strength of a naval vessel, but I am willing to take the testimony of Admiral Dewey, Admiral Farquhar, Commander Wainwright, Captain Sigsbee, and of every naval officer who has visited and seen the operations of these boats.

Mr. LASSITER. Will the gentleman yield to me for a question?

Mr. LOUDENSLAGER. I have not time to yield. These men are the most capable, in my judgment, of deciding what is necessary for the increase of our Navy and the implements that are most destructive. I yield the balance of my time to my colleague on the committee [Mr. ROBERTS].

Mr. ROBERTS. How much time have I, Mr. Speaker?

The SPEAKER pro tempore. The gentleman is recognized for six minutes.

Mr. ROBERTS. Mr. Speaker, the gentleman from Alabama told us a little while ago that he went down to Annapolis to see the *Holland* maneuver, and immediately afterwards he told us what the action of Congress had been heretofore in regard to Holland torpedo boats. He told us that two years ago the construction of eight of these boats was authorized. Well, now, if his observations about the maneuvers of the *Holland* boat were no more accurate than his statement about what Congress did two years ago, I do not think this body will attach much importance to it. Another gentleman, from Kentucky, a member of the committee, got up immediately after and commended the gentleman from Alabama for his knowledge of what had gone on in naval matters, and reiterated that two years ago we authorized eight boats.

Mr. Speaker, I want to put the facts before this House. What was done? First the Holland people sold a boat to the Government. That is the *Holland* down at Annapolis to-day. Then, when the Government had in its possession, with its own commissioned officers, its own enlisted crew aboard, one of these torpedo vessels or submarine boats, it went on and authorized the construction of seven more, not eight, as those gentlemen have stated. But they say, "Stop right here. We have not got these seven delivered yet." Why, Mr. Speaker, these boats are from 92 to 99 per cent completed. One of them is right down here on the Potomac River, and any member of the House can go down and see it.

Mr. HILL. Why do they not deliver it to the Government then?

Mr. ROBERTS. I will tell the gentleman why they do not deliver it. Why does not the builder of every battle ship or other naval vessel that is constructed deliver it to the Government the moment that she strikes the water? The gentleman has too much sense to expect that. Every delicate piece of machinery has got to be tuned up and put in working order before it can be delivered. I sat on the piazza of my summer home last summer and frequently watched the maneuvers of two torpedo boats that the builders were trying to get into shape for their official trial. And they are not in shape now. They can not come up to the Government requirements; and I believe that unless the requirements be abated that they will not come up to them. It is the same as to the construction of other vessels of the Navy as it is with these torpedo boats.

Two years ago a battle ship was ordered to be built, and her keel has not been laid and will not be until the 4th of July. This talk about these boats not being delivered and let us wait until they are delivered and tried is useless talk. We have got one. We know what it will do. Our officers are practicing on it every day. Another is right here in the river, ready to be delivered within the next two or three weeks, as soon as the machinery shall be put in shape for her official trial.

Mr. SULZER. Is it not a fact that if the seven boats which are now under way and will be completed by the 1st of September, sure, are not satisfactory to the Government, the Government does not have to take the other five?

Mr. ROBERTS. Yes; I was coming to that. I want to say another word in regard to delivery. Two are being built in San Francisco at the Union Iron Works. They had a strike out there, and there was not a stroke of work done in that yard for nearly fourteen months on torpedo boats, battle ships, cruisers, or other vessels being built for the Government. That is one of the reasons why the boats have not been delivered. Now, all those who have been engaged in contracts of any sort where iron or steel enters into it, know that in the last year it has been almost impossible, on account of the great demand for iron and steel, to have contracts completed in time.

With regard to the provisions of this particular bill I want to say that if the members of the House will read it carefully they will see that it limits the Secretary of the Navy in the contract he can make with the Holland Company down to this, that not one of these five additional boats can be contracted for until at least one of the seven now under contract has been accepted by the Secretary of the Navy. And what does that word "accepted" mean? It means that she must come to all the requirements that the Navy Department impose upon her, and when she comes up to that it is supposed to be perfect. The boats under contract are superior to the *Holland*. The gentleman from Indiana asked a moment ago from some member on the other side, "Would you go down or want any of your friends to go down in the Holland boat?" I want to say that I have been down several times. I do not neglect an opportunity to study these boats, and I feel safer in a Holland torpedo boat under water than I do in a torpedo-boat destroyer on the surface. The liability to accident is less, in my judgment.

There is one other point I wish to refer to in the brief time at my disposal. The gentleman from Indiana, a member of the Committee on Naval Affairs, made the statement on the floor that the majority of the committee was opposed to this provision. I challenge that statement. There has been no action of any sort in that committee indicating that the committee is opposed to the proposition under consideration.

Mr. WATSON. Does the gentleman deny that we had a vote on the proposition?

Mr. ROBERTS. I deny that we had a vote on the proposition for these five boats.

Mr. WATSON. Did not we vote on the whole subject of submarine boats?

Mr. ROBERTS. We had a little snap game in there one day, and I would like to ventilate that. A certain member of the committee—a certain member who is very hostile to Holland boats—plumped a motion at us one day that we should have no submarine boats in the naval bill this year.

The SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

Mr. FOSS. I now yield two minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, this bill carries $79,000,000, and authorizes $40,000,000 more. We are to have a great Navy, and on account of the change in our condition it will have to be greater. The real wants of the Navy are enough. The submarine boats in the end may be a success, but it is not yet demonstrated. Admiral Dewey, as read by the gentleman from Indiana, says that these contracts at this time are not expedient. I agree with him, without being an expert. We have seven boats under contract now not delivered.

Now, then, I asked the chairman of that committee how long would it take to turn out a submarine boat if you had time, working under stress, by one establishment, and he said three months. There are a dozen navy-yards and 40 or 50 shipbuilding firms or private yards in each of which we could turn out a submarine boat in three months. Now, then, while I am for the Navy, I am not for improvident expenditure. I am not for letting any contractor exploit his interests when it is not to our interest. [Applause.]

Mr. FOSS. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has six minutes remaining.

Mr. FOSS. Mr. Speaker, I desire to say a word upon this subject of the further authorization of more Holland torpedo boats at this time. We have given the Holland Company contracts amounting to $1,400,000, and it has never yet turned over a single boat that was originally designed for the Government. It is months and months behind its contract, and yet these people come here with assurance, and I may say unlimited assurance, to ask Congress to give them contracts for more boats when they have not fullfilled the contracts which have already been given them by the Government.

I believe this Holland torpedo craft is still in the experimental stage, and I believe it why? Because they have come repeatedly to the Government and asked for modifications of their contract.

I have here a list of the alterations, changes, and modifications which have been made in the contract from time to time. I believe this boat is still in an experimental stage—why? Because they have failed to complete their boats and have not yet turned a boat over to the Government. If they have a boat down here at the Washington Navy-Yard, why do they not turn it over to the Government? The Government has been waiting for it for months and months. But what are they doing with it? Exploiting it down here for the purpose of inducing some of you gentlemen to authorize the Secretary of the Navy to contract for more boats before they turn over those which have been already contracted for.

Another reason: This is an experimental craft, as I believe—why? Because under the contract they are obliged to make certain trials and tests before naval officers; and the manufacturer of these boats, Lewis Nixon, wrote a letter on December 2, 1901, to the Navy Department asking for changes in the trials, which, when the Holland Company found out that the Board of Construction had declared that it would hold them to a strict interpretation of the contract, asked to have withdrawn from the files of the Department. In that letter they asked—what? Under the contract they are obliged to make three trials. First, a surface trial, and in that there is an endurance test, by which the Holland boat shall go at the rate of 8 knots an hour on the surface for a minimum of twelve hours. They ask to be relieved from that endurance test. They ask also to be relieved from the second test—i. e., an awash run; and as to the third test, the submerged test, to which, under the contract, they said they would subject every boat, and that it should make for three hours 7 knots an hour, they asked a reduction from 7 knots to 6 knots. But, as I said, after they found out that the Board of Construction would hold them to a strict interpretation of the contract they asked to withdraw their request. I propose to put those letters in the RECORD.

Now, what have we done for the Holland Torpedo Company toward the encouragement of submarine navigation? We have given them a contract to the extent of $1,400,000. What does this boat cost? Our naval constructor and the chief of the Bureau of Steam Engineering say that this boat can be built with a handsome profit for $90,000. In my judgment this company has made upon every boat a profit of $100,000 at least.

Now, what sort of a plant has this company? They have a little manufacturing plant, not for building boats, but simply trimming them up, over here on Long Island, which, on the testimony of the president of their company, is not valued at $50,000. They will make $800,000 clean profit on these boats upon a plant worth only $50,000.

True they have, they say, a capital stock of $10,000,000, but all they have in sight is this little plant of $50,000. Do you not think the Government has done pretty well by them?

I say to you, gentlemen, that it is best for us to go a little slow. What does the Secretary of the Navy say? He says, "Finish those boats which you have started and see how they work." What does Admiral Dewey say? He says, "I concur with the Secretary of the Navy." Let us finish these boats that have been started.

Let us call upon the Holland Torpedo Boat Company to come to time—to turn over the boats already contracted for. Let them turn over those boats to our naval officers, and let them experiment with the boats, and afterwards, if the boats are found to be good for anything, we can give an order for more.

Mr. ROBERTS rose.

Mr. FOSS. I can not yield; I have only a moment left. Admiral O'Neil said, "I would not advocate the building of any more of these boats at this time." Gentlemen, there will be plenty of time to order the construction of these boats after we have found out whether they are good for anything. There are a number of other submarine boats in the market, and if we were going to do anything in this direction, it would be infinitely better for us to appropriate a fund to encourage the whole science of submarine boat construction all along the line, and not appropriate $170,000 for each boat under circumstances like the present.

Why, think of it! Would you appropriate $6,000,000 for a battle ship, and put it in the naval appropriation bill that that money should go to the Cramps, or the Newport News Company, or the Union Iron Works? No; you appropriate money for battle ships, and then you leave the matter open for competition. It is proposed by the adoption of a Senate amendment on the naval appropriation bill to appropriate money into the pockets of the Holland Torpedo Boat Company, and not leave the matter open for competition.

NAVY DEPARTMENT, *Washington, June 21, 1902.*

SIR: Referring to your letter of the 16th instant, I have the honor to inclose herewith a copy of the last contract, bearing date August 25, 1900, with the Holland Torpedo Boat Company for submarine boats, together with statements showing the modifications suggested by the company in the terms of said contract from time to time, and the extensions of time granted and the reasons therefor.

It has been the Department's policy to consent to alterations requested by the contractors, it being provided by the second clause of the contract that the company should bear the cost of and the responsibility for all changes suggested by it, so long as the general requirements of the plans and specifications remain substantially the same, and the changes mentioned in the accompanying memorandum relating thereto have been approved.

Very respectfully,

CHAS. H. DARLING,
Acting Secretary.

Hon. GEORGE EDMUND FOSS,
Chairman Committee on Naval Affairs, House of Representatives.

MEMORANDUM OF CHANGES ON SUBMARINE TORPEDO BOAT ADDER.

Rudders to be fitted with hand-actuated machinery	11,985-E. 1
Conning tower to be made of bronze instead of armor steel (See specifications 10,871-E. 4, original.)	10,871-E. 8
Gasoline tank to have a capacity of 720 gallons instead of 850 gallons	10,995-E. 17
Steering and diving engine to be omitted; hand gear substituted	11,985-E. 1
Bulkhead at frame No. 38 to be omitted	11,062-E. 2
Main ballast tank at sides of ship cut away from frames 16 to 18. Bulkhead on frame 18 continued up to sides of ship, conforming to shape of ballast tank at sides up to diagonal staplings	10,995-E. 15
5-inch ventilating tube omitted; two ventilators to be fitted forward	11,335-E. 4
Change relative to use of water in air compressors for lubrication, change to be made after delivery, 10,974-E. 13	10,975-E. 8, 10,976-E. 8, 10,977-E. 8, 10,978-E. 8, 10,979-E. 8, 11,262
Change in arrangement of flooding auxiliary ballast tank instead of a 3½-inch Kingston valve located in central well discharging into the auxiliary ballast tank; propose to omit this valve and replace it with a 6-inch Kingston valve located in auxiliary ballast tank itself and operated by a lever in the upper part of the vessel. (App.)	10,995-E. 9
Omit the Kingston valve spouts and also the auxiliary motor and bilge pumps	10,995-E. 12
Change in method of operating Kingston valves from air cylinders to hand operating device. (App.)	10,995-E. 11
Omission of hydrometer authorized by Department	10,995-E. 20
Fieldpieces of armatures to be made in two pieces; marble used instead of slate for the instrument bases	11,548-E. 1
Change in cutting manhole in top of gasoline storage tank	12,514

Statement showing extensions of time for completion of submarine torpedo boats, with the reasons for delay in construction upon which such extensions were granted. The date of contract for these boats is August 25, 1900.

NO. 3, ADDER.

Contract date of completion, April 25, 1901; extended to May 2, 1901, on account of strike of workmen; further extended to August 2, 1901, on account of delay in procuring new air tanks as changed, etc.; further extended to September 6, 1901, on account of strike of workmen, and further extended to October 21, 1901, on account of experiments on the *Fulton*.

NO. 4, GRAMPUS.

[At Union Iron Works.]

Contract date of completion, April 25, 1901. Extended to July 25, 1901, on account of delay in procuring new air tanks as changed, etc. Further extended to November 30, 1901, on account of strike of workmen.

NO. 5, MOCCASIN.

Contract date of completion, May 25, 1901. Extended to June 1, 1901, on account of strike of workmen. Further extended to September 1, 1901, on account of delay in procuring new air tanks as changed, etc. Further extended to October 5, 1901, on account of strike of workmen, and further extended to October 21, 1901, on account of experiments on the *Fulton*.

NO. 6, PIKE.

[At Union Iron Works.]

Contract date of completion, May 25, 1901. Extended to August 25, 1901, on account of delay in procuring new air tanks as changed, etc. Further extended to December 14, 1901, on account of strike of workmen.

NO. 7, PORPOISE.

Contract date of completion, June 25, 1901. Extended to July 2, 1901, on account of strike of workmen. Further extended to October 2, 1901, on account of delay in procuring new air tanks as changed, etc. Further extended to November 6, 1901, on account of strike of workmen.

NO. 8, SHARK.

Contract date of completion, July 25, 1901. Extended to August 1, 1901, on account of strike of workmen. Further extended to November 1, 1901, on account of delay in procuring new air tanks as changed, etc. Further extended to December 6, 1901, on account of strike of workmen.

The question presented of a further extension of contract time of completion on the *Adder* and class on account of developments resulting from the experiments with the *Fulton* has been deferred until the result of such experiments can be fully determined.

Grampus and *Pike* building at Union Iron Works, San Francisco, Cal.; others at Nixon's Crescent Shipyard, Elizabeth, N. J.

NAVY DEPARTMENT, *Washington, June 23, 1902.*

SIR: Referring to the Department's letter of the 21st instant and to your request by telephone this morning relative to the submarine torpedo boats, the fulfillment of the contracts for their construction, and the request of the company that the terms of trial be modified, I have the honor to inclose herewith a copy of a communication, dated December 2, 1901, from Mr. Lewis Nixon, who is building for the Holland Company four submarine boats for the Navy, in which he explains the conditions under which the trials of such vessels should be made, and asks that the requirements of the contract for their construction be modified.

Said letter was forwarded to the Department by the Bureau of Steam Engineering by indorsement, as follows:

"In the opinion of this Bureau the trials should include a surface run, with vessel light, of 10 knots at average speed of 8 knots and a submerged run of 2 knots at average speed of 7 knots; the endurance in the first case to be twelve hours and in the second three hours.

"As this is, however, a matter of great importance the Bureau respectfully recommends that it be referred to the Board of Construction for consideration."

As suggested by the Bureau of Steam Engineering, the matter was referred to the Board of Construction and returned with the following recommendations, viz:

"The Board of Construction recommends that in the trial runs of the submarine torpedo boats *Adder*, *Moccasin*, *Shark*, *Porpoise*, *Grampus*, and *Pike* the contractors be held strictly to the terms of the contract for those vessels, and that the question of what can be and what can not be accomplished by them be left to the determination of the trial board provided for in the contract.

"As to the endurance tests, the Board recommends that these be made by an actual run of the vessels."

The company was, in accordance with its request, advised that it would be given a hearing before the Board of Construction, but no hearing was had, as the company subsequently, December 18, requested permission to withdraw Mr. Nixon's letter from the files of the Department, and they were notified that such letter was considered as withdrawn. Copies of the company's request for withdrawal of the matter and the Department's answer are forwarded herewith.

Very respectfully,

W. H. MOODY, *Secretary.*

Hon. GEORGE E. FOSS,
Chairman Committee on Naval Affairs,
House of Representatives.

THE CRESCENT SHIPYARD,
Elizabeth, N. J., December 2, 1901.

SIR: In view of the approaching trials of the U. S. submarine boat *Adder*, we deem it desirable that the conditions of trial be accurately set forth and understood, in order that we may prepare the vessel to meet exactly the Department's wishes in this respect.

We note that the contract, under the captions of "Trials" and "Speeds," reads as follows:

"*Trials.*—Eighth. When said submarine torpedo boats shall be completed in every respect and ready for delivery to the United States as aforesaid each of them shall be subjected to tests and trials to show the capability of making surface runs, awash, and submerged runs, the former of a distance of 10 nautical miles at a speed of 7 knots an hour, and the latter for a distance of 2 nautical miles at a speed of 7 knots an hour. At the end of the submerged run a service torpedo shall be discharged, and shall strike a target 150 feet long by 16 feet deep, the upper edge of said target being awash and placed at right angles to the course. During these submerged runs the vessel shall not come to the surface more than three times from the time of starting until the discharge of the torpedo, the duration of each appearance not to exceed one minute.

"*Speed.*—2. The party of the first part hereby guarantees that the speed developed by said vessels upon trial under conditions prescribed by the Secretary of the Navy shall be not less than an average of 8 knots an hour when in the light condition, 7 knots an hour when in the awash condition, with a minimum endurance of twelve hours at these speeds, using only the gasoline engine, and 7 knots an hour when completely submerged, with a minimum endurance of three hours at this speed."

We assume that the trial tests should simulate actual service conditions as nearly as possible, and the runs with the *Fulton* have demonstrated that the conditions to be laid down in the contract trials should now be determined upon. At the time the contract was drawn there had been so little discussion as to the tactical requirements of vessels of this class that the features necessary for military efficiency were not fully known.

In developing the *Fulton* we have taken every opportunity to consult with naval officers of this and other Governments interested in the subject as to the most desirable combination of qualities in the finished boat, and we find it the universal opinion that somewhat different tests would better demonstrate the value of the vessel to the Government.

Taking up now the contract requirements in detail, seriatim, we desire to discuss briefly the questions of surface, awash, and submerged runs.

First. *Surface runs.*—It is to be noted that the contract requirements under the two captions referred to above, as the runs in this condition appear to be in conflict, one apparently calling for a surface run at a speed of 7 knots an hour for a distance of 10 nautical miles, and the other calling for a speed of 8 knots an hour with a minimum endurance of twelve hours. We have no objection to make in connection with these requirements, but merely ask for an interpretation of the contract, our understanding being that we will make on actual trial a run of 10 nautical miles at the highest speed called for—8 knots—and that our consumption of fuel at this speed will be such as to give with the total fuel allowance a minimum endurance of twelve hours; that we believe that this will cover the 7 knots surface speed.

Second. *Awash runs.*—The contract here requires a speed of 7 knots an hour with a minimum endurance of twelve hours, using only the gasoline engine. In order that this may be quite clear and definite, we recommend that this run be at such trim as will permit the safe use of the gasoline engine. Under this trim all the ventilators must be rigged out, and there must be no danger of an unexpected dive, either from a mistake on the part of the crew or from unforeseen change in exterior circumstances, such as passing over a bar or into a sudden swell.

As soon as we can make preliminary runs with the *Adder* the exact limitations will be determined, and we shall then ask that this draft be fixed as the proper immersion for the awash run. If, however, a run of the *Fulton* can be accepted for this determination, we are prepared to make a run at any time.

Personally, I wish to say that I see no advantage in the awash run at all, and I think it should be eliminated from the trials.

In this condition she makes practically as much disturbance in the water as in the light condition, and she can not dive instantly to avoid attack; so in practice the vessel will run in the light condition to her general field of action, and just outside the danger zone would sink to diving trim and proceed under the motor only.

A decided objection, too, is the fact that this trim not being a diving trim, if the intermediate trim is insisted upon, the total time to pass from light condition to diving trim will be increased, and in order to reduce the time to the lowest limits it is probable that special arrangements for changing the trim would have to be introduced, thus increasing the complexity and weight of the boat, and to a certain extent diminishing its safety.

I strongly recommend that the awash run be done away with as being a test serving no useful purpose.

Third. *Submerged run.*—Under this head the contract requires that the vessel shall have a minimum endurance of three hours at a speed of 7 knots an hour and that she shall make a run of 2 nautical miles at this speed and at the end of the submerged run discharge a service torpedo which will strike a target 150 feet long by 16 feet deep, the upper edge of the target being awash and placed at right angles to the course. The contract further requires that during this submerged run the vessel shall not come to the surface more than three times from the time of starting until the discharge of the torpedo, the duration of each appearance not to exceed one minute. We believe that this requirement does not duplicate the probable service conditions, in that the speed called for is higher than would be used, while the duration of the period of exposure is longer than would be permissible.

The vessel as designed and built carries sufficient power to make this speed when submerged and to carry it for the distance prescribed by the contract. Such a speed, however, requires deep water to develop, and the trim desirable for this speed is undesirable for the lower speed at, say, 6 knots, suitable for water as shallow as found in the majority of harbors. At the higher speed the vessel rising to the surface creates a considerable disturbance in the water, thus attracting attention to herself and in addition shutting off the helmsman's view and so increasing the period of exposure. At the lower speed the vessel will run evenly and steadily even in shallow water; it will rise quietly to the surface and create so little disturbance that the helmsman can take his observations and dive again in a very short period of time.

As a result of our experience with the *Fulton*, we are convinced that the vessel when trimmed for this speed and operated under those conditions, is

much superior for all-around work than under the conditions necessary for the 7-knot speed. This opinion is concurred in by all the experts whom we have been able to consult.

We therefore request that the required speed in this condition be reduced to 6 knots, and if this be granted, we will offer a reduction in the permissible duration of appearance from one minute to thirty seconds. We may add with regard to this latter desirable feature, we have every reason to believe that we will not on trial exceed the period of exposure of fifteen seconds, as a recent trial of the *Fulton*, covering five appearances, showed an average of six and four-fifths seconds duration of exposure, with a maximum duration of eleven seconds.

The same request, for the same reasons, is also preferred in the cases of the *Moccasin*, *Porpoise*, and *Shark*, building at the Crescent Shipyard, and the *Grampus* and *Pike*, building at the Union Iron Works, in San Francisco.

In conclusion, we wish to add that we make these requests in the full confidence that thorough investigation will show that the Government's interests are not affected adversely thereby, but, on the contrary, are served.

Very respectfully,

LEWIS NIXON.

Naval Constructor LAWRENCE SPEAR, U. S. N.,
Superintending Constructor, Elizabeth, N. J.

HOLLAND TORPEDO BOAT COMPANY,
100 Broadway, New York City, December 18, 1901.

HON. JOHN D. LONG,
Secretary of the Navy, Washington, D. C.

SIR: We are in receipt of your letters of December 13 and 14, the letter of December 13 giving us permission to appear before your Board on Construction, and we are indebted for the same.

Since sending you our telegram and letter asking you to postpone approval of the opinion of the Board on Construction of Mr. Nixon's recommendations, we have had a conference with Mr. Nixon, and with his consent we have concluded to ask that Mr. Nixon's letter be withdrawn from the files of the Department.

We desire also to state that we not only expect to comply with all of the requirements of the contract, but, in addition, to exceed them in certain important particulars.

Very respectfully,

HOLLAND TORPEDO BOAT COMPANY,
ELIHU B. FROST, *Secretary.*

NAVY DEPARTMENT,
OFFICE OF THE JUDGE ADVOCATE-GENERAL,
Washington, December 20, 1901.

SIR: Referring to your letter of the 18th instant, with regard to appearing before the Board on Construction in relation to the method of trial of submarine torpedo boats, I have to inform you that your request that the matter be withdrawn from the files of the Department is regarded as complied with by the filing of the communication referred to.

By direction of the Secretary.

Very respectfully,

S. C. LEMLY,
Judge-Advocate-General.

Mr. ELIHU B. FROST,
Secretary Holland Torpedo Boat Company,
100 Broadway, New York, N. Y.

The SPEAKER pro tempore. The time of the gentleman from Illinois [Mr. FOSS] has expired.

Mr. FOSS. I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion of the gentleman from New Jersey [Mr. LOUDENSLAGER], that the House recede from its disagreement to the amendment of the Senate.

The question being taken, there were on a division (called for by Mr. LOUDENSLAGER) ayes 63, noes 95.

Mr. LOUDENSLAGER. I call for tellers.

Tellers were not ordered, only 26 voting in favor thereof.

So the motion of Mr. LOUDENSLAGER was rejected.

Mr. FOSS. I ask unanimous consent that all gentlemen who have spoken on this subject may have an opportunity to extend their remarks in the RECORD.

There was no objection.

Mr. FOSS. Mr. Speaker, I move that the House insist upon its disagreement to amendments 92 and 93.

The SPEAKER. The question is on the motion of the gentleman from Illinois, that the House further insist on its disagreement to amendments 92 and 93.

The question was taken, and the motion agreed to.

Mr. FOSS. I move that the House agree to the further conference asked for by the Senate.

The SPEAKER. The question is on the motion of the gentleman from Illinois that the House agree to a further conference asked for by the Senate.

The motion was agreed to.

The Chair announced the following conferees on the part of the House: Messrs. FOSS, DAYTON, and MEYER of Louisiana.

MEMORIAL TO ABRAHAM LINCOLN.

Mr. McCLEARY. Mr. Speaker, I call up the conference report on the bill (S. 5269) providing a commission to secure plans and designs for a monument or memorial to the memory of Abraham Lincoln, late President of the United States, and ask that the reading of the report be omitted and that the statement be read.

The SPEAKER. The gentleman from Minnesota calls up a conference report and asks unanimous consent that the reading of the report be omitted and that the statement be read. If there is no objection, this course will be pursued.

There was no objection.

The Clerk read the statement, to be found on page 7337.

Mr. McCLEARY. Mr. Speaker, I move that the report be adopted.

The SPEAKER. The question is on the motion of the gentleman from Minnesota, that the report be adopted.

The motion was agreed to.

The SPEAKER. In pursuance of the continuing order of the House, the same will resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2295, the Philippine government bill, and the gentleman from Massachusetts, Mr. GILLETT, will take the chair.

PHILIPPINE GOVERNMENT.

Accordingly the House resolved itself into Committee of the Whole for the further consideration of the bill S. 2295, Mr. GILLETT of Massachusetts in the chair.

The CHAIRMAN. Under the rule of the House the reading of the Senate bill has been waived and the reading of the House amendments will be in order.

The Clerk will report the amendments.

The Clerk read as follows:

THE JUDICIARY—APPEALS TO THE SUPREME COURT OF UNITED STATES.

SEC. 4. That the supreme court, courts of first instance, and municipal courts of said islands shall possess and exercise jurisdiction as heretofore provided by said Commission, subject in all matters to such alteration and amendment as may be hereafter enacted by said Commission or otherwise enacted by law: *Provided*, That admiralty jurisdiction shall be in the supreme court and courts of first instance until otherwise provided by Congress.

Mr. COOPER of Wisconsin. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

In line 25, page 61, beginning with the word "by," strike out all after and including said word "by," in line 25, down to and including the word "law," in line 3, page 62, and insert in lieu thereof the following:

"And such additional jurisdiction as may hereafter be prescribed by the government of said islands, subject to the power of said government to change the practice and mode of procedure."

Mr. SULZER. Mr. Chairman, I would like to have the paragraph read as it would be if the amendment were adopted.

The Clerk reported the paragraph as it would read if the amendment were adopted.

The CHAIRMAN. The question is on the adoption of the amendment.

The amendment was agreed to.

The Clerk read as follows:

SEC. 5. That the chief justice and associate justices of the supreme court shall hereafter be appointed by the President, by and with the advice and consent of the Senate. The judges of the court of first instance shall be appointed by the civil governor, by and with the advice and consent of said Commission.

Mr. COOPER of Wisconsin. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Insert in line 8, page 62, after the word "Senate," the following: "and shall receive the compensation heretofore prescribed by the Philippine Commission until otherwise prescribed by Congress."

The CHAIRMAN. The question is on the adoption of the amendment.

The amendment was agreed to.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. BURLEIGH having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 1456. An act granting a pension to William G. Miller;

H. R. 4170. An act granting an increase of pension to Henry P. Macloon;

H. R. 6009. An act granting a pension to Absolom Maynard;

H. R. 6031. An act authorizing the payment of part of the pension of Ira Steward to Adell Augusta Steward;

H. R. 14042. An act granting an increase of pension to George W. Edgington;

H. R. 14206. An act granting a pension to Mary J. Moore;

H. R. 14208. An act granting an increase of pension to Alexander Murdock;

H. R. 14656. An act granting an increase of pension to Charles A. Scott; and

H. R. 14802. An act for the purchase of real estate, for revenue and customs purposes, at Wilmington, N. C.

The message also announced that the Senate had passed with amendments a bill of the following title; in which the concurrence of the House was requested:

H. R. 14244. An act authorizing the President to reserve public lands and buildings in the island of Porto Rico for public uses and granting other public lands and buildings to the Government of Porto Rico.

The message also announced that the Senate had passed bills of

the following titles; in which the concurrence of the House was requested:

S. 917. An act for the relief of John H. McLaughlin;

S. 1206. An act for the relief of Frank J. Burrows;

S. 3560. An act to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896;

S. 4426. An act to authorize the Secretary of War to loan arms to the institutions having companies of the Boys' Brigade connected therewith;

S. 4815. An act to grant certain lands to the South Platte Canal and Reservoir Company;

S. 5228. An act for the purchase of a national forest reserve in the Southern Appalachian Mountains, to be known as the "National Appalachian Forest Reserve;"

S. 5329. An act authorizing the President to appoint Lieut. Commander William P. Randall, retired, United States Navy, a commander on the retired list;

S. 6016. An act for the suppression of train robbery in the Territories of the United States and elsewhere, and for other purposes:

S. 6034. An act raising the rank of Chief Engineer David Smith on the retired list of the Navy;

S. 6117. An act for the relief of George Lea Febiger;

S. 6119. An act to authorize the Pensacola, Alabama and Tennessee Railway Company to erect, maintain, and operate a railway bridge across the Alabama River in Wilcox County, in the State of Alabama; and

S. 6270. An act to amend an act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902.

The message also announced that the Senate had passed with amendments a bill of the following title; in which the concurrence of the House of Representatives was requested:

H. R. 13172. An act to ratify and confirm an agreement with the Choctaw and Chickasaw tribes of Indians, and for other purposes.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 4284) to amend an act entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," approved January 14, 1889.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13123) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1903, and for other purposes.

The message also announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to furnish to the Senate a duplicate engrossed copy of the amendment to the bill (S. 493) to amend an act entitled "An act to establish a code of laws for the District of Columbia," the same having been lost or mislaid.

JOSEPH M. SIMMS.

Mr. ADAMSON. Mr. Speaker, I present a conference report on the bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service, and ask that the same, together with the statement, be printed in the RECORD.

The SPEAKER pro tempore. The same will be printed under the rules.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same.

WM. P. HEPBURN,
J. S. SHERMAN,
W. C. ADAMSON,
Managers on the part of the House.
WM. P. FRYE,
THOMAS S. MARTIN,
Managers on the part of the Senate.

The statement is as follows:

The act passed by the Senate authorized the advancement of Lieut. Joseph M. Simms, Revenue-Cutter Service, from first lieutenant to that of captain on "permanent waiting orders" list, etc.

The House of Representatives amended the act so that it "shall not increase the pay of said Simms above $1,890, the pay now allowed by law for a first lieutenant on the retired list."

In conference it was agreed to recommend to the respective Houses that the Senate recede from its disagreement to the amendment of the House and agree to the same.

WM. P. HEPBURN,
J. S. SHERMAN,
W. C. ADAMSON,
Managers on the part of the House.

PHILIPPINE GOVERNMENT.

The committee resumed its session.

The Clerk read as follows:

SEC. 6. That appeals may be taken from final judgments and decrees of the supreme court of the Philippine Islands to the Supreme Court of the United States in the following cases:

First. In all cases involving the construction of a treaty or a statute of the United States.

Second. In all cases when the amount in controversy, exclusive of interest and costs, is $25,000 or more.

Third. In all cases between the government of said islands and any church, religious order, or association, or dependency of any church, in respect to the ownership or administration of trust or other property.

Such final judgments or decrees may be reviewed, revised, reversed, modified, or affirmed by the Supreme Court of the United States on appeal or writ of error, in the same manner, under the same regulations, and by the same procedure, as far as applicable, as the final judgments and decrees of the circuit courts of the United States.

This section shall also apply to cases of such character now pending.

Mr. TONGUE. Mr. Chairman, two or three weeks ago the State of Oregon went Republican at the election and gave some an increased Republican majority, in fact, most of the State ticket. Nevertheless, a Democratic governor was elected. Some question has arisen as to how far this might indicate that the people of that State were not in favor of the policy of this bill and the policy of retaining the Philippine Islands. The platforms of the two parties were quite opposite. The platform of the Republican party upon that subject was as follows:

The events of the late war with Spain carried us into the Philippine Islands. We hold it to be consistent with the principles of liberty and of our national life that the sovereignty of the United States should be maintained in the islands under such local self-government as the people may be or may become fitted to participate in. We therefore declare against all proposals looking to the retirement of the United States from the Philippine Islands.

The platform of the Democratic party was equally explicit. It is as follows:

We believe that the true policy is to prepare the people of those islands for self-government as speedily as possible and when so prepared to grant them their independence, retaining such coaling stations and ports as may be necessary to protect those islands from foreign interference and to maintain our trade relations in the Orient.

Now, the election of a Democratic governor on that platform might look like a declaration in favor of the independence of the Philippine Islands. The increased majority, however, in favor of the Congressional candidate who occupied a different attitude would seem to be contradictory to that. I have, however, a statement of the attitude of the Democratic governor on that question. It is taken from the Pendleton East Oregonian, a Democratic paper, one of the leading papers in the State, and it is copied with approval in the Daily Journal, published at Salem, a paper usually independent, but which was a very strong advocate of the election of the Democratic governor. It is published in large capitals, and I will read it as it is contained in that paper:

[Pendleton East Oregonian, Democrat.]

MR. CHAMBERLAIN'S PHILIPPINE VIEWS.

Much has been said regarding the views of George Chamberlain on the subject of the Philippines and expansion. He has explained his position upon fifty platforms of Oregon and has made them explicit. He is an expansionist. He believes in the retention of the Philippines. He recognizes the validity of the title of the United States to the archipelago. He holds that the American nation can not shirk the responsibility of assuring the Filipinos a happy and fortunate future. He believes that those people should be educated as rapidly as possible to the highest possible level of intelligence and civilization. And that if they shall at some time in the future demonstrate their ability so to do, they should be permitted to have such self-government as will be consistent with circumstances existing at the time.

Reading that, Mr. Chairman, I am not able to discover much difference between that and the Republican attitude toward the Philippine Islands. I think it is safe to say that Mr. Chamberlain could not have been elected in the State of Oregon, even by the very narrow plurality of 250 votes, except for some such declaration as that.

Mr. BARTLETT. Is it not a fact that the Republicans in Oregon nominated a renegade Democrat for their candidate for governor, and that that was one reason why he was defeated?

Mr. TONGUE. Mr. Chairman, the Republicans of Oregon nominated a Democrat who stood with the gentleman from Georgia [Mr. BARTLETT] and his associates some six years ago; but when the Democratic party renegaded from every principle it had ever professed during its whole history, he renegaded from that.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Chairman, I do not know what were the principles professed by the gentleman who was defeated for governor of Oregon, but I know that, so far as I am concerned, I and the people whom I represent still adhere and cling to the principles of Democracy that we always have adhered to.

Mr. TONGUE. As exemplified by Grover Cleveland?

Mr. BARTLETT. No, sir; we cling to the principles that we have always clung to. Mr. Cleveland exemplified Republican principles, and that is the reason that we did not stick to him. He deserted us and went over to the Republican party.

Mr. TONGUE. Now, will the gentleman from Georgia yield to me for one question?

Mr. BARTLETT. Oh, yes.

Mr. TONGUE. Did Mr. Cleveland during his Administration as President the last time enforce a single doctrine that he had not publicly and repeatedly advocated prior to his second election as President, and particularly on the financial question?

Mr. BARTLETT. Mr. Cleveland may not have, when he took the Executive chair on the last occasion, changed the opinions on the financial question that he had adhered to and expressed prior to that; but he did desert the platform upon which he was elected and to which he should have adhered in all honesty, as every man elected on a platform should do.

Mr. COOPER of Wisconsin. I desire to give notice that hereafter I shall raise the point of order against any discussion of this character while amendments are pending.

Mr. BARTLETT. The gentleman from Oregon started it.

Mr. COOPER of Wisconsin. Of course I shall not enforce the rule until one gentleman on that side has had an opportunity to speak for five minutes on the same line.

Mr. BARTLETT. The gentleman from Wisconsin will recognize the fact that I did not violate the rule; that it was done by a gentleman on his side.

Mr. COOPER of Wisconsin. I am not charging the gentleman from Georgia with any violation of the rule.

Mr. CLARK. I should like to make a suggestion to my friend from Wisconsin; that is, that he will not gain any time by undertaking to cut everybody off. I want ten minutes here myself after a while, and I think I am entitled to it.

Mr. BARTLETT. I send an amendment to the Clerk's desk and ask to have it read.

The CHAIRMAN. The Clerk will report the amendment proposed by the gentleman from Georgia.

The Clerk read as follows:

Amend, on page 62, by inserting in line 16, after the word "of," the words "the Constitution of the United States."

Mr. BARTLETT. Mr. Chairman, that will make the section read as amended:

SEC. 6. That appeals may be taken from final judgments and decrees of the supreme court of the Philippine Islands to the Supreme Court of the United States in the following cases:

First. In all cases involving the construction of the Constitution of the United States, a treaty, or a statute of the United States.

I would like to ask the gentleman from Wisconsin if he has any objection to this provision, that appeals may be taken from the supreme court in the Philippine Archipelago to the Supreme Court of the United States on all questions involving the construction of the Constitution of the United States, as well as the construction of treaties and statutes of the United States? That is the purport of this amendment. Do I understand the gentleman from Wisconsin to say that that is objectionable?

Mr. COOPER of Wisconsin. I have no objection to that amendment.

The amendment was agreed to.

The Clerk read section 7.

Mr. HILL. I now offer an amendment, Mr. Chairman.

Mr. COOPER of Wisconsin. I have a committee amendment which I desire to offer.

The CHAIRMAN. The committee amendment has precedence.

Mr. COOPER of Wisconsin. The gentleman from Indiana will offer the committee amendment.

The CHAIRMAN. Will the gentleman send the amendment to the desk?

The amendment was read, as follows:

Strike out the words "the" and "other" and the letter "s" from the word "Moros," in line 19, and the word "non-Christian," in line 20 of page 63, and insert at the end of line 19 the word "pagan."

Mr. CRUMPACKER. The amendment is to strike out the word "the," in line 19, and the letter "s" in the word "Moros," and the word "other," in that line, and the word "non-Christian," in line 20, so as to make that provision read: "not inhabited by the Moro or pagan tribes," instead of the "Moros or other non-Christian tribes."

Mr. JONES of Virginia. What page is the gentleman reading?

Mr. CRUMPACKER. Page 63. This is simply a change in the phraseology. It is a more apt and proper designation of the limitations of the bill. It characterizes the territory that is to be excluded as the Moro territory or pagan tribes, instead of Moro and other non-Christian tribes. It simply eliminates the word "non-Christian," which seems to be objectionable to some gentlemen.

Mr. JONES of Virginia. To meet the objection made by the gentleman from New Jersey last evening?

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. ROBINSON of Indiana. Mr. Chairman, I move to strike out the last word of the amendment.

The CHAIRMAN. That motion is not in order.

The question was taken; and the amendment was agreed to.

Mr. CRUMPACKER. I have another amendment that I send up.

The Clerk read as follows:

Strike out the words "the" and "other" and the letter "s" from the word "Moros," in line 19, and the word "non-Christian," in line 20 of page 63, and insert at the end of line 19 the word "pagan."

The CHAIRMAN. It seems that amendment which was reported and agreed to is such an amendment as the gentleman did not intend. The committee has adopted the amendment. The gentleman asks unanimous consent that the action of the committee in adopting the amendment be rescinded. Is there objection? [After a pause.] The Chair hears none.

The Clerk will now report the amendment numbered 2; we have adopted amendment numbered 1.

Mr. CRUMPACKER. We have adopted amendment numbered 2.

The CHAIRMAN. The committee has rescinded that adoption, and no amendment has been adopted.

The Clerk read as follows:

Strike out the words "the" and "other" and the letter "s" from the word "Moros," in line 19, and the word "non-Christian," in line 20 of page 63, and insert at the end of line 19 the word "pagan."

The CHAIRMAN. This is amendment numbered 2. The Chair understands the gentleman desires it to be numbered 1.

Mr. CRUMPACKER. This is the amendment that I propose at this time.

The question was taken; and the amendment was agreed to.

Mr. CLARK. Mr. Chairman, I would like to ask the gentleman from Indiana a question about this section 7 in line 10:

And a condition of general and complete peace shall have been established.

Now, I would like to ask the gentleman this: Suppose a condition of affairs should arise in one of the Philippine Islands like that which is now in the State of Rhode Island, where it is necessary to have troops to squelch a local disturbance, as the authorities think. Would that be considered as being "complete peace" or not?

Mr. CRUMPACKER. The question is left to the discretion of the Philippine Commission, and they are to be the judge of what the condition of affairs down there shall be.

Mr. CLARK. Another question based on that. Do you believe that with 1,500 or 2,000 islands over there and 6,000,000 people, a great many of them half civilized, there will ever come a time of general and complete peace unless they are all killed?

Mr. CRUMPACKER. I hope there will; I think there is substantial peace there now. Now, I ask for action on the other amendment, Mr. Chairman.

The Clerk read as follows:

Strike out the word "Moros," in line 4, page 64, and "or other non-Christian," in line 5, same page, and insert in place thereof the words "Moro or Pagan."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. CRUMPACKER. I offer another amendment.

The Clerk read as follows:

Strike out all after the word "shall," in line 24, page 63, and all of line 25 of said page and all of line 1 of page 64 and the word "Christian," in line 2, page 64, and insert "cause a census of the population of such other subjects as he may deem desirable to be taken, under the supervision of the Director of the Census, of the several political subdivisions."

So that it will read:

Shall cause a census of the population and such other subjects as he may deem advisable to be taken of the several political subdivisions of said islands under the supervision of the Director of the Census.

The committee amendment was agreed to.

Mr. HILL. Mr. Chairman, I now send up the following amendment, which I ask the Clerk to read.

The Clerk read as follows:

Amend by inserting on page 64, at the end of line 21, "*Provided*, That the election of the Philippine assembly shall not be ordered until the census as herein specified has first been taken and shall have shown a total number of qualified electors of the said provinces to be at least 5 per cent of the total population thereof."

Mr. HILL. Mr. Chairman, I am unqualifiedly opposed to a general assembly being chosen under the terms of this bill in the Philippine Islands, but if I am to vote for it upon the recommendation of the committee, it does seem to me that there should be some stipulation as to the conditions under which the general assembly shall be called. I have offered this amendment, that before that general assembly shall be called a census shall be taken, as provided in the bill, and shall show a qualified electorate in the islands of at least 5 per cent of the total population.

My reason for doing that is this. I know that in certain districts the civil government has already been instituted which must in the very nature of things, be a farce either from their standpoint, or from ours. I know of one community in a popu-

lation of 5,000 people in which one of the military governors was called upon to introduce civil government. Under any and all of the qualifications for voters in that community, only 28 people could be found who could qualify as voters, and yet civil government was instituted. It seems to me that the percentage I have fixed is right, but if the rate fixed is too large, it can be cut down to some point, but it should be fixed before the civil government is instituted and a crime against civilization perpetrated by putting a civil government on a people who are incapable of exercising it or administering it.

Mr. Chairman, the people in the Philippine Islands are just what three hundred years of tyranny and despotic government have made them. The duty rests upon us to educate, to train, and to fit these people for self-government; and it seems to me—and I speak in all good conscience to the committee—from personal observation, that the wisest thing we could do would be to maintain the insular commission as we have it to-day, and give self-government to municipalities only.

Mr. TAWNEY. I want to ask the gentleman a question. Does he not think that one of the best ways to educate these people in the matter of civil government is to give them an opportunity to participate in the governmental affairs of the island?

Mr. HILL. I will answer his question by asking him another, Yankee fashion. Do you not think it wise that there should be a foundation on which to work, and that there should be somebody who could apply the rule?

Mr. TAWNEY. I do, and this bill expressly provides for the foundation. It also throws around the legislative assembly and their authority such limitations as make it absolutely impossible for them to abuse the privilege given them in this bill.

Mr. HILL. I am in favor of making the limit for two or three reasons. In the first place, I want a Philippine bill. The Senate of the United States has passed a bill providing for no civil government. I believe if some stipulation is made here which they can accept, which we can compromise on, we can have a bill with some form of civil government. I do not believe they will absolutely recede from the position of their bill and come to a civil government at the discretion of Governor Taft. He urged it as strongly before the Senate committee as he did before the committee of the House, and it seems to me that here is a proposition upon which the two bodies can unite. If the percentage is too large, reduce it. You can cut it down to 3 per cent or 2 per cent or 1 per cent if you want to. What is the ratio in this country? Probably 20 or 25 per cent of the population. We do not want a civil government established there with only a few voters from Manila in it. It seems to me that anything less than 5 per cent would be too small. It seems to me that to force a civil government upon them with anything less than that would be worse than to govern them wholly without it.

Mr. COOPER of Wisconsin. In reply to what the gentleman from Connecticut [Mr. HILL] has said, I desire to call attention to the contradiction in his argument and also to the contradiction contained in the arguments of others who have objected to this proposition. They one and all assert that they are in favor of civil government in the islands; but they propose to continue absolute military power. We are talking about civil government for the archipelago; and they propose, not to have civil government, but to continue arbitrary military government. Asserting their love for a civil government, they fight against it and endeavor to defeat the attempt to establish it, notwithstanding the fact that the initial suggestion in this direction was that of President McKinley in his dispatch, which I read the other day, to the Philippine Commission, dated May 5, 1899:

You are authorized to propose that under the military power of the President, pending action of Congress, government of the Philippine Islands shall consist of a governor-general appointed by the President; cabinet appointed by the governor-general; a general advisory council elected by the people. The qualifications of electors to be carefully considered and determined, and the governor-general to have absolute veto, etc.

Notwithstanding the other fact also, that the Schurman Civil Commission recommended an elective lower house for the Philippines, and the still further fact, that after due examination and consideration of the circumstances and conditions in the Philippines, the Taft Commission earnestly made the same recommendation. The Schurman Commission, evidently anticipating such objections as the gentleman from Connecticut urges, say in their report:

The educated Filipinos—

The gentleman, by the way, has just intimated that there are only a few such and all of them in Manila—

The educated Filipinos, though constituting a minority, are far more numerous than is generally supposed and are scattered all over the archipelago; and the Commission desires to bear the strongest testimony to the high range of their intelligence, and not only to their intellectual training, but also to their social refinement, as well as to the grace and charm of their personal character. These educated Filipinos, in a word, are the equals of the men one meets in similar vocations—law, medicine, business, etc.—in Europe or America. It is scarcely an exaggeration to say that these picked Filipinos will be of infinite value to the United States in the work of establishing and maintaining civil government throughout the archipelago.

As leaders of the people they must be the chief agents in securing their people's loyal obedience to the new government, to which, therefore, the dictates of policy, as well as plain common sense and justice, require us to secure their own cordial attachment. And it has been a leading motive with the Commission in devising a form of government for the Philippines to frame one which, to the utmost extent possible, shall satisfy the views and aspirations of educated Filipinos. They believe that the territorial system herein set forth will accomplish that object, and this is a fifth and most important reason for their conviction that the administration of the government will, in the proper hands, not be attended with insuperable or even extraordinary difficulties.

We have the opinion of President McKinley; we have the opinion of the Schurman Commission, not a tentative opinion, but one earnestly set forth in their report and subsequently indorsed in vigorous language in the report of the Taft Commission, and indorsed also by the individual members of the Taft Commission, who have repeatedly written within the last six months urging that that recommendation be adopted by Congress. Moreover, Governor Taft, an eminent lawyer, an eminent judge, a man of tact and sound judgment, says that it would be a calamity to send him back without this provision enacted into law.

Yet, in the opinion of the gentleman from Connecticut [Mr. HILL], because in some places in that archipelago there are not as many educated people as he would like to see there, or as he thinks ought to be there, therefore the recommendation of President McKinley, the recommendation of the Schurman Commission, the recommendation of the Taft Commission, and the personal recommendation of the president of the Commission over and over again made are to be disregarded, and we are not only to refuse to give them (the Filipinos) any participation in the central government, but, more than that, to adopt the Senate bill, which does not hold out even so much as a promise, or hint, or suggestion that the Filipinos shall ever be allowed a voice in their central government.

[Here the hammer fell.]

Mr. COCHRAN. Mr. Chairman, I rise to debate the pending amendment.

The CHAIRMAN. Debate is exhausted under the rules.

Mr. COCHRAN. I move to strike out the last word.

The CHAIRMAN. The motion is not permissible under the rule.

Mr. COCHRAN. I call attention to the fact that up to this time no member on this side has spoken on this proposition.

The CHAIRMAN. A gentleman on the right of the Chair proposed an amendment in opposition to the committee. The Chair thought it was then fair to recognize the chairman of the committee to oppose that amendment under the rule. Debate is now exhausted except by unanimous consent.

Mr. WILLIAMS of Illinois. I ask unanimous consent that the gentleman from Missouri [Mr. COCHRAN] be allowed the ten minutes for debate.

There was no objection.

Mr. COCHRAN. Mr. Chairman, this section of the bill raises the whole question that has been under discussion here for the past four or five days—what shall be the ultimate fate of the Philippines? What is to be the future of the people for whom we are providing a form of government, and whose lands we are about to hand over to the speculators and corporations?

In the course of this discussion much that is relevant to this question and a great deal more that is wholly irrelevant has found a place in the CONGRESSIONAL RECORD.

It has been said that the Army has been abused. This is not true; but were it admitted, what has that to do with the question concerning which political parties in this country are not in accord? How could it affect the merits of a measure for the government of the 10,000,000 people with whose fate we are dealing? What light does this silly accusation against members of this body throw upon the great problem we are about to settle?

It has been said that political parties forty years ago adopted platforms distasteful to the chairman of the Committee on Insular Affairs. What has that to do with the question before the House? The platforms cited were adopted by political parties when he and I were minors—when I was 16 years of age and I presume he was no older.

When he concluded to make these 40-year-old party platforms a part of his speech in defense of this measure, did he think he would thereby enlighten this body or his countrymen as to its merits? By stirring the embers of a conflict of forty years ago and endeavoring to excite the rancor of a period of civil war between which and us a generation lies, did he expect to help the unfortunate Filipino? It discredits the advocates of a measure when they must thus resort to recrimination, appeal to the passions of the civil-war period, and seek to stir up contentions over issues long since dead and forgotten.

It is said that certain implied obligations were imposed upon us by the Paris treaty. For the purposes of this discussion, suppose this to be true. Suppose all the great commercial interests

at stake in the city of Manila were remanded to our custody and protection and that we could not at the end of the war leave the islands to their fate and were bound to stay there, as we have, this has nothing to do with the question which comes back to us again and again. Certainly no implied obligation to remain forever the sovereign power in the Philippines arose merely because Dewey's fleet vanquished the Spanish squadron in Manila Bay. What is to be the ultimate fate of the Philippine islanders?

Are the people of the Philippine Islands to be held forever in vassalage by the United States, or are they to be allowed to govern their own country? This is the question at issue.

One extraordinary performance characterized the discussion of this bill. A speech of an hour's duration was made by the distinguished gentleman from Indiana [Mr. LANDIS] which, from beginning to end, was vociferously applauded by the gentlemen on the other side of this Chamber. Read that speeech and find in it, if you can, a word that refers to this question:

What are you going to do with the Philippine Islanders? Are you going to assert American sovereignty perpetually over their country?

The argument of the gentleman from Connecticut [Mr. HILL] against giving them even the poor right to choose their own lawmakers is that they are just what you would expect to find a people at the end of three hundred years of oppression. This is declaring that the fact that Spain oppressed them with alien control for three hundred years is a fair pretext for depriving them perpetually of liberty and independence. Is this to be accepted as a statement of the Republican position?

Accusations, recriminations, ultra professions of loyalty—these will not be accepted as a defense of the policy of imperialism. Tribute to the flag, praise of the patriotism of the Army, recitations of the glory of the victories won by Dewey and Schley—not all the oratory in the repertoire of the Republican spellbinders will ever convince the American people that we are justifiable in drawing a dead line against the hopes and aspirations of 10,000,000 of people whose only crime is a desire for the independence of their country.

In order to defend the policy adopted by the McKinley Administration and persevered in down to this time, it has been found necessary for almost every Republican who has addressed either House of Congress to deliberately misstate and falsify the facts of history and slander and malign the country and people against whose rights our hands have been raised.

It has been repeatedly and repeatedly said on this floor that the Philippine Islanders are absolutely incapable of self-government. And yet the truth is that during the period of the Spanish occupation in the interior of the islands domestic and municipal control was in the hands of the natives, and was never undertaken by Spain.

Furthermore, domestic and municipal control in the Philippine Islands was essentially democratic, and all books of travel dealing with the Philippines, written prior to our occupation, bear testimony to the fact that the Filipino is a law-abiding, orderly, good citizen, and that peace and order and domestic felicity characterized their daily life, even during the turbulent periods of insurrection against Spain.

What higher testimonial could be borne to the character and capacity of a people, although illiterate, than that borne by Dean Worcester to the personal peculiarities of the people of the Philippine Islands?

Mr. TAWNEY. If the gentleman will allow me, is he talking for or against this amendment? Is he in favor of or against the legislative provision in this bill?

Mr. COCHRAN. Is that your question?

Mr. TAWNEY. Yes.

Mr. COCHRAN. I will treat it with that silence which its insignificance deserves.

Mr. TAWNEY. It is not as insignificant as the remarks of the gentleman.

Mr. COCHRAN. I do not expect to descend to the level of the gentleman's comprehension. Dean Worcester says of the Philippine Islander that he is the most self-contained, patient, law-abiding creature under oppression in the world; but that when he does react and revolt he is the bravest of the brave. And every line of literature printed prior to the beginning of the crusade of the United States in the Philippine Islands, I care not by whom written, whether by American, Englishman, Spaniard, or Frenchman, bears testimony to the same effect.

Under this bill the Filipinos are to have a legislature of their own choosing, but it provides that the Moros or pagans or non-Christians, as you term them, shall be excluded. What does that teach you?

Mr. TAWNEY. If the gentleman will permit me, they are not excluded from the provisions of this bill. The gentleman has not read the bill, that is all.

Mr. COCHRAN. From the electorate.

Mr. TAWNEY. From the electorate, yes; but not from the provisions of the bill.

Mr. COCHRAN. I am thankful to the gentleman. He has finally placed me under obligations by correcting a verbal inaccuracy. They are excluded from the electorate. Well, we may seek to evade it, but in the long run we will be compelled to follow the example of all successful colonizing powers. We must finally adopt the only policy by which colonizing powers have ever succeeded. We must recognize the domestic institutions, and must even recognize the domestic vices that are ingrained. We can not go on turning up our noses at the Moros.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COCHRAN. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. LACEY. Mr. Chairman, I should like to ask the gentleman a question before he proceeds. On last night——

Mr. COCHRAN. I decline to yield. I have no time to devote to last night's debate.

Mr. LACEY. I do not wonder that the gentleman declines to yield.

Mr. COCHRAN. When I have concluded my five minutes I will ask an extension of time so that you can ask any question you please, and if that extension is granted I will yield.

Mr. LACEY. I do not wonder that the gentleman declines. I give notice that I will insert in the RECORD the things which the gentleman denied last night. I will prove them from the records. I was going to read them to him now.

Mr. COCHRAN. In Russia, a country that has felt at liberty within thirty years to take up the sword in what was called strictly Christian warfare—warfare for the sake of Christianity—the Czar recognizes Mohammedanism, a plurality of wives, and everything incidental to Mohammedan civilization. In India no domestic or traditional institution of the ancient Empire has been interfered with. Among the most obedient of all the Indian subjects of Great Britain in India are classes whose institutions would not be tolerated for a moment inside the boundaries of Great Britain or in her English-speaking colonies.

Get rid of the notion that you can Americanize the Philippine Islands. You speak of establishing there a good government. Would your government be a good government for France? No. Could you establish it in Italy? No. Would they receive it in Spain? No. According to the creed of the Republicans in this Chamber, therefore, every one of those countries must forever forego any attempt to establish a republican government.

Must institutions sounding in your beliefs, reflecting the peculiar features of your Government, or no republican institutions whatever, be adopted by all countries that essay the establishment of republics? Your Government is an evolution. Your republican federative system is the result of the law of necessity which, in the formative period of the colonies, remanded all local concerns to neighborhood control.

The town meeting was not thought out in a philosophical way, and yet it is the integer in a system which minimizes the interference of central power and remands to neighborhoods control of their own domestic affairs. A careful study of the demands of the Philippine Islands will satisfy any man, I care not who he may be, that the system of municipal government in the Philippine Islands was evolved from similar conditions, and, from the dawn of civilization there, has worked in much the same manner in that archipelago.

This is evidenced by the fact that after three years' war between the insurgent forces and the Spaniards, after the surrender of the Spaniards, who, meantime, had been driven from all parts of Luzon, when peace was declared in the Philippine Islands, what happened? Good order was immediately established all over Luzon.

If these people are such as you describe this could not have occurred. Instead of peace you would have found chaos. The demoralization of war was calculated to produce anarchy and chaos, and yet a few days after the surrender of Manila, a lieutenant of the Army or a cadet of the Navy traversed the island of Luzon from one end to the other, and in an official report to the Government, which has become a Government document, reported that all through Luzon peace and good order prevailed; that everywhere municipal law was being enforced; that the people were happy and at work, and persons and property were safe.

Why was it? Because the democratic municipal tribunals resumed their places, just as it would be done in this country today if an invading army of occupation took its departure from one of the American States. Then sheriffs, judges, town councils, and mayors would resume their official functions, and peace and good order would ensue.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COCHRAN. Now, I ask unanimous consent to proceed for five minutes to give my distinguished friend from Iowa an inning.

The CHAIRMAN. The gentleman asks unanimous consent that he may proceed for five minutes more. Is there objection?

A MEMBER. I object.

The CHAIRMAN. Objection is made.

Mr. COCHRAN. I hope the gentleman will get a chance and I hope that he will get it some time when I am in the Hall.

Mr. HILL. Mr. Chairman, I would like two or three minutes to call attention to some few words in this section.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HILL. I want the committee to overlook the fact that we are a partisan body making partisan legislation, and consider the proposition before it as patriotic citizens of the United States of America. On page 63 I want you to consider that language. There is pending now an amendment that prior to the calling of the general assembly a census shall be taken, and at least 5 per cent of the population shall be found to be qualified voters, qualified under all the restrictions which the committee themselves prescribe. Now, then, if that is not done, I want you to see just what you are doing. On page 63 the language is that the condition precedent to the calling of a general election or assembly is "peace," regardless of condition.

Mr. TAWNEY. I beg the gentleman's pardon. We have adopted an amendment expressly providing that the President shall first be satisfied of the fact, and a census must be had.

Mr. HILL. About what fact? Only the fact of peace. That is all.

Mr. TAWNEY (continuing). And then he must direct the taking of a census——

Mr. HILL. I object to my time being taken by the gentleman. He took half of it before.

Mr. TAWNEY. I object to the gentleman misrepresenting the provisions of the bill.

The CHAIRMAN. The gentleman declines to yield.

Mr. TAWNEY. The language of the bill is this——

The CHAIRMAN. The gentleman from Minnesota is out of order.

Mr. HILL. The minority have few enough rights as it is without having those that they have taken away from them by members of the committee. I want, however, to call attention to the language of this bill, which is as follows:

That whenever the existing insurrection in the Philippine Islands shall have ceased and a condition of general and complete peace shall have been established therein and the fact shall have been certified to the President by the Commission, the President, upon being satisfied thereof—

Not of anything else; not of the conditions which obtain; not whether there are enough there to form an excuse for self-government; not whether there is enough to have self-government at all, but simply that peace has been established, and then on that fact being certified to the President, he shall authorize the Commission to call, and the Commission shall call, a general election. Now, gentlemen——

Mr. HAMILTON. Does the gentleman take into consideration the fact that this territory covered by the taking of the census has already been organized into municipalities?

Mr. HILL. I understand that, and went through them.

Mr. HAMILTON. And the people at those places are now voting?

Mr. HILL. Certainly. Then why do you oppose 5 per cent—that an electorate of 5 per cent shall be qualified electors before you call the general assembly?

Mr. HAMILTON. We think the bill is in good form as it is.

Mr. COOPER of Wisconsin. It does not make any difference, under the theory in which this provision is proposed to be enacted, whether there are fifty or a thousand voters in the province. These 50 ought to be educated and the people ought to be educated up to the duty of electing a man to go to the government in Manila and learn civil administration.

Mr. HILL. I want the members to vote clearly understanding what they are voting for. Here is a provision providing for a general assembly and the election of two Delegates to this Congress, possibly from a population which can not furnish 1 per cent of qualified electors under the terms which the committee themselves have prescribed, and the amendment which I have offered simply asks that you shall have 5 per cent of your population qualified to vote before you do this thing. Now, if you wish to vote for that kind of a proposition, here is your opportunity.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Connecticut.

The question was taken; and the amendment was rejected.

Mr. PARKER. Mr. Chairman, I offer the following amendment:

The Clerk read as follows:

Strike out the word "now" in line 14, page 64, and insert the words "or may be;" so it will read "the qualification of electors in such election shall be the same as is or may be provided by law."

Mr. TAWNEY. We have already provided, if the gentleman will read the section. The qualification of electors in such election shall be the same as is now provided by law in case of municipal elections.

Mr. PARKER. Yes; but I strike out the word "now" and insert the words "or may be," so as to provide for future towns or special cases.

Mr. TAWNEY. "As may be." That leaves it to the legislature of the Philippine Islands hereafter to determine the qualification of voters. We expressly provide what the qualification of voters shall be, and that is for Congress to determine.

Mr. PARKER. Mr. Chairman, the object of this amendment is perfectly plain. This bill has been very carefully drawn, and we may thank the gentlemen who have drawn it, for it has been drawn so as to be elastic. It does not tie things up in most particulars that we do not understand. But at present there is an electoral provision made by the Commission for municipalities. We may find, however, that there are some provinces, tribes, and places differing from others that may have different institutions, and may need different provisions for the electorate, as we do in the different States. The present provision may turn out unworkable, and may have to be changed before the census. My idea was that experience will be the best guide, and that the qualifications of the electors should be those which may be established at the time this census was taken, after care has been taken in finding out what is needed and what is right.

Mr. TAWNEY. Mr. Chairman, this bill now provides that the qualifications of electors at such elections shall be the same as now provided by law in case of electors in municipal elections. That provision in this bill received the most careful consideration on the part of the committee at the time of its preparation, and I wish to state to the Committee of the Whole what the provision of the law now is respecting the qualification of electors.

On the 31st of January, 1901, the Philippine Commission enacted a general law for the election of municipal officers in the several municipalities in the Philippine Islands. In that act (chapter 2, section 6) we find that the electors charged with the duty of choosing elective municipal officers shall be male persons 23 years of age or over, who have had legal residence in the municipality in which they exercise the right of suffrage for a period of six months preceding the election, and are not citizens subject to any foreign power, and who are comprised in one of three classes.

Now, Mr. Chairman, the purpose of this is to fix definitely and permanently the qualifications of those who are to choose elective officers of the islands. The proposed amendment offered by the gentleman from New Jersey is to leave the question of the future qualification of electors to the people of the legislative assembly in the Philippine Islands.

Mr. PARKER. No; to leave it to the Commission. There is no legislative assembly until one is established, and this will leave it to the Commission.

Mr. TAWNEY. The Commission might change it and the legislative assembly hereafter might change it; and this is something that, in my judgment and in the judgment of the committee, is absolutely essential that it should be permanent and fixed by a law of Congress not subject to change by a legislative assembly or by the officers of the Government itself.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey.

The question was taken; and the amendment was rejected.

The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 8. That at the same time with the first election of members of the Philippine assembly, and biennially thereafter, there shall be chosen by the qualified voters of that part of the Philippine Islands not inhabited by Moros or other non-Christian tribes two resident commissioners to the United States, who shall be entitled to an official recognition as such by all departments upon presentation to the President of a certificate of election by the civil governor of said islands, and the privilege of the floor of each House of Congress, and each of whom shall be entitled to a salary payable monthly by the United States at the rate of $5,000 per annum, and $2,000 additional to cover all expenses: *Provided*, That no person shall be eligible to such election who is not a qualified elector of said islands, owing allegiance to the United States, and who is not 30 years of age. At the time of dividing the territory of said islands not inhabited by Moros or other non-Christian tribes into assembly districts the Philippine Commission shall divide the said territory into two grand districts for the election of commissioners to the United States, making the population of the said two grand districts equal so far as a due regard for the convenience of the people and the divisions of the territory among the different islands, provinces, and tribes permits. One of the said two resident commissioners shall be elected by the voters of each of said grand districts. Within ninety days after the passage of this act the Philippine Commission shall appoint two temporary commissioners who shall have the same qualifications, duties, and powers as those commissioners for whose election provision is hereinbefore made and who and whose successors shall serve until the election, qualification, and presentation of the proper certificate to the President of commissioners duly elected

Mr. CRUMPACKER. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Strike out the words "Moros or other non-Christians," in lines 4 and 5, on page 64, and wherever it appears in the section, and insert "Moros or pagans."

Mr. TAWNEY. Mr. Chairman, I would suggest that this is a mere change in phraseology, and the Clerk be authorized to make the same change wherever it appears in the bill.

Mr. CRUMPACKER. I think this is the only section in which it appears that has not been amended, and this amendment covers it all.

The question was considered; and the amendment was agreed to.

Mr. HAMILTON. Mr. Chairman, I only wish (perhaps I ought to ask unanimous consent for the purpose) to supplement what the chairman of the committee has said with reference to the necessity for a Philippine assembly by reading from an article by Governor Taft in a late number of the Outlook. He says:

We of the Commission are very earnest and sincere in our hope that at least the provision for the election of the legislative assembly and of the two delegates contained in the House bill shall be embodied in legislation. We think that the Filipino people would accept this provision as the most indubitable evidence of the desire of the United States that self-government should be given to the people in as large a measure as they are capable of carrying it on.

He says, further:

A provision of this kind would detroy at once the suspicions of American good faith, and would largely satisfy the desire for self-government of all but the comparatively few irreconcilables. A popular assembly would be a great educational school for the better class of Filipinos in actual government. The weakness of the educated Filipinos to-day is in their lack of practical knowledge as to how a popular government ought to be run. They always resort to absolutism in practical problems of government.

Further, he says:

Should the legislative assembly feature, which the Federal party has petitioned for—

Referring to the Federal party of the Philippine Islands—

which the Commission has recommended, and which the committee of the House has recommended, be eliminated, it will cause very serious disappointment to the Filipino people.

Mr. GIBSON. Mr. Chairman, I offer the amendment which I send to the desk.

The Clerk read as follows:

Insert in line 3, page 67, after the word "powers," the words "and shall receive the same salary and allowance for expenses."

Mr. GIBSON. I offer this amendment because I do not discover in this bill any provision for the payment of the salary and allowances of these temporary commissioners.

Mr. CRUMPACKER. There is such provision. If the gentleman will turn to lines 10, 11, and 12 on page 66 he will find this language:

Each of whom shall be entitled to a salary payable monthly by the United States at the rate of $5,000 per annum, and $2,000 additional to cover all expenses.

Mr. GIBSON. That refers to the regular commissioners, not the temporary commissioners; nothing is said about those. My amendment puts the temporary commissioners on the same basis, so far as salary and allowances are concerned, as the regular commissioners.

Mr. CRUMPACKER. We supposed that language applied to both commissions.

Mr. COOPER of Wisconsin. I accept the amendment.

The question being taken, the amendment was agreed to.

Mr. POU. Mr. Chairman, I shall trespass upon the time of the House for a few moments only. The charge has been made that the party to which I belong and the section from which I come have in this debate attacked the Army of the United States. We who have heard this great debate know how utterly unfounded this charge is; and I believe that the people of the country know that the charge is without foundation. Mr. Chairman, I am a Southern man, proud of my section and proud of its people, but I declare to you and to the world that the people of the South are, first of all, Americans. We contemplate the part our ancestors took in achieving the independence of this Republic with great pride. We are proud of our record in every war this country has ever waged. We are hopeful of our country's future. We are as loyal to the Army, as loyal to the flag, as loyal to the Union as any people can be.

The United States Army, Mr. Chairman, is not a Republican army; it is not a Democratic army. It is the American Army. Our flag is not a Democratic flag, nor a Republican flag. It is the American flag, and the South stands ready at any moment to offer up the flower of its young manhood whenever the flag or the honor of the Republic is assailed. Now, let us see for a moment what has been our record in the past.

In the Revolutionary war there were enlisted, from first to last, 394,302 men. The South furnished 142,095 of the soldiers of that immortal army—more than 35 per cent.

In the war of 1812 there were enlisted 471,622 men, of whom 246,663 (more than 50 per cent) were furnished by the South.

But, Mr. Chairman, listen at these figures: In the Mexican war the volunteer army numbered 73,776, of whom 47,649 were furnished by the Southern States, together with the State of Missouri. What a record! The Southern States—Democratic States—furnished more than 64 per cent of the army which fought the battles of our country in that war.

In the Spanish-American war lately ended the total enlistment was 230,881. The South was ready to furnish every man it was allowed to furnish, and several States offered troops which the Government could not accept. Our men numbered 60,479, more than 25 per cent of the entire enlistment. I know in my own town a young captain who raised a company of brave men and tendered them to his country, but owing to the fact that my State had furnished its full allotment the company this young man raised could not find a place in the ranks of the Army.

The war for independence could not have been won but for the men of the South. You men of the North should not forget this. You owe your independence, you owe the liberty you enjoy to-day as much to the soldiers of the South as you do and as we do to the heroes of Concord and Lexington. When Republicans charge us with attacking the Army, you simply charge that we are attacking ourselves. We can not attack the Army, if we were so mean, without attacking our own flesh and blood. The charge is a vain, impotent defense. The Army does not stand for cruelty, treachery, and dishonor. We defend the brave, the true, the humane soldiers who refuse to do these things. You put yourselves in the position of defending the men who disgrace the Army. We are willing to appeal to the country on the issue thus raised.

Mr. Chairman, there are few names which spring unhidden as the history of the Spanish-American war passes through the mind.

Victor Blue, a North Carolina boy, was the soldier who, at the peril of his life, climbed the hills around Santiago and located the Spanish fleet. Richmond Hobson, an Alabama boy, faced Spanish bullets and sunk the *Merrimac*. Gen. Joseph Wheeler, a Confederate general, stubbornly refused to yield the ridge at San Juan Hill, and probably saved the day for American arms; and another Southern man, the hero of much suffering and persecution, struck the final blow which sunk the Spanish fleet and ended the war. We pour out our gratitude upon every man, whether from the North or the South, who fought for the honor of the flag. Palsied be the hand which would write one line, cloven be the tongue which would speak one word of injustice or abuse against the boys in blue who fight under the Stars and Stripes. [Applause.]

Mr. Chairman, just one word more. Go with me to the *Winslow's* shattered deck; go with me to San Juan's burning heights. What beautiful boy lies here? What fine proportioned officer in the uniform of a lieutenant of the American Army lies here? Speak, silent lips, and tell us which one of the sister States did yield thee up a sacrifice for thy country's honor. The silence of death has sealed thy lips, but the world shall know that the great State which in part I represent, in offering up Bagley and Shipp, was first at Santiago and first in the charge up San Juan Hill. [Prolonged applause.]

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment agreed to.

The Clerk read as follows:

SEC. 9. That the legislative power of the government of the Philippine Islands shall extend to all rightful subjects of legislation not inconsistent with the provisions of this act.

Mr. ROBINSON of Indiana. Mr. Chairman, I move to strike out the last word. I take the floor for the purpose of making some inquiries with reference to a few clauses and sections immediately following the one just read and including it. I would like to ask the chairman of the Committee on Insular Affairs whether this legislation, either in its operation at once or in any future contingency, deals with the question of the Sultan of Jolo and his datos and people?

Mr. COOPER of Wisconsin. Mr. Chairman, it does not in specific terms, but it does by necessary implication.

Mr. ROBINSON of Indiana. Then I find in section 10 the following:

SEC. 10. That no law shall be enacted in said islands which shall deprive any person of life, liberty, or property without due process of law, or deny to any person therein the equal protection of the laws.

That no money shall be paid out of the treasury except in pursuance of an appropriation by law.

Does this bill that you are seeking to pass provide for the payment of the $10,000 of money that we pay to these people?

Mr. COOPER of Wisconsin. I will not be specific in my reply, but this does not provide for the payment of anything that we have already paid.

Mr. ROBINSON of Indiana. There are annual payments to be made under the agreement made by General Bates with the Sultan

of Jolo and his datos, and in connection with that I desire to read the third clause of that agreement, which is as follows:

The rights and dignities of His Highness the Sultan and his datos shall be fully respected; the Moros shall not be interfered with on account of their religion; all their religious customs shall be respected, and no one shall be persecuted on account of his religion.

Mr. COOPER of Wisconsin. I will say in reply to the gentleman from Indiana that I do not understand that General Bates, an officer of the American Army, has any power to draw a warrant on the treasury of the insular government.

Mr. ROBINSON of Indiana. But in the provisions of the bill you provide that certain laws shall be upheld by the powers that you clothe this legislature with, and one of the laws now existing in the Philippine Islands, and which is recognized and enforced by the agreement of General Bates, is that which I have just read. Now, section 10 of that agreement provides as follows:

Any slave in the archipelago of Jolo shall have the right to purchase freedom by paying to the master the usual market value.

Therefore, when we come to these sections of the bill that I have read, and then on page 69, lines 13 to 15, that neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist in said islands, and then further down at the foot of the page—

That no law shall be made respecting an establishment of religion or prohibiting the free exercise thereof, and that the free exercise and enjoyment of religious profession and worship, without discrimination of preference, shall forever be allowed—

I think it most pertinent to ask the chairman of the committee to answer as to whether the legislature under these powers granted shall have the right to abolish slavery in the Philippine Islands.

Mr. COOPER of Wisconsin. The agreement entered into by General Bates with the Sultan of Jolo is not a law of the insular government of the Philippines. President McKinley, moreover, as Commander in Chief of the Army and Navy, ratified that treaty substantially with the exception of the clause relating to slavery, and he expressly disapproved that. However, the Constitution of the United States in the thirteenth article is expressly prohibitory of slavery in any of the Territories of the United States or in any place subject to its jurisdiction. This provision in the bill was not at all necessary, but we have put it in to make assurance doubly sure, so to speak, or rather to make the bill of rights on its face a little more full; that is all. Article XIII of the Constitution of the United States abolishes slavery there, so far as the law can abolish it.

Mr. ROBINSON of Indiana. What is the operation of the gentleman's bill, then, clothing the Philippine legislature with these powers, and providing these general provisions for the rule of these people—what is the operation of the gentleman's bill with reference to polygamy, which confessedly exists there? Religious institutions are preserved; and is it provided that they shall remain intact under the Bates agreement?

Mr. COOPER of Wisconsin. Why, Mr. Chairman, we propose to exercise ordinary common sense in enacting legislation. We know that polygamy is an institution hundreds of years old there, and that it can not be abolished in a few days by statutory enactment any more than it could be among the Indians on our plains. That is to be a work of evolution. It must be a work of time and education and of influence to be brought to bear upon those people.

Mr. ROBINSON of Indiana. I thank the gentleman for his information that this bill does not deal with the question of polygamy or the question of slavery.

Mr. COOPER of Wisconsin. The gentleman's own quotation a moment ago contradicts his last assertion. He says the bill does not propose to deal with slavery. There is an express provision abolishing slavery, and the gentleman read it. That provision, however, is unnecessary, because the Constitution of the United States, Article XIII, abolishes it.

Mr. ROBINSON of Indiana. Then I understand the gentleman that after the passage of his bill it will be unlawful to have either polygamy or slavery in the Philippine Islands.

Mr. COOPER of Wisconsin. So far as slavery is concerned, it is unlawful now under the Constitution of the United States.

[Here the hammer fell.]

The Clerk read section 10.

Mr. PERKINS. I offer an amendment to section 10.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 69, lines 5 and 6, strike out "Congress of the United States," and insert "Philippine assembly."

Mr. PERKINS. Mr. Chairman, I have no desire to interfere with the committee, but I hope this amendment may be adopted. Under the provisions of the Constitution, it is necessary where any Government employee receives a present or decoration, however small, from a foreign government, that he must obtain the permission of Congress before he can accept it.

Now, this bill invests in the Philippine legislature the control over matters of the greatest importance, and properly so. The Philippine legislature touches upon the most important questions of legislation and finance. Yet if some clerk in some office in the Philippines receives the red ribbon of the Legion of Honor from the Government of France he must come 10,000 miles to the Congress of the United States to say whether in its wisdom that shall be allowed. It seems to me, Mr. Chairman, that this must have been left in the bill by the committee inadvertently, and certainly they can not regard these tuppenny bills with which we are disturbed, even in our own country, of such importance that this and this alone should be taken from the jurisdiction of the Philippine legislature and sent to the Congress of the United States at Washington to be passed upon. I hope this amendment will be adopted by the committee.

Mr. COOPER of Wisconsin. Mr. Chairman, the committee can not accept that. I know, and so do the other members of the Insular Committee, that the Philippine Commission do not want any such authority vested in them. They want it to come 10,000 miles, and they would be glad if it could come more miles than that.

Mr. PAYNE. Congress never delegated that power to a Territorial legislature.

Mr. COOPER of Wisconsin. No; Congress never delegated that power to a Territorial legislature.

Mr. PAYNE. And a State can not authorize it under the Constitution.

Mr. COOPER of Wisconsin. No; nor a Territory either.

Mr. PERKINS. But this is neither a State nor a Territory.

The amendment was rejected.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. CAPRON having taken the chair as Speaker pro tempore, a message from the Senate announced that the Senate had passed without amendment a bill of the following title:

H. R. 12205. An act to provide for circuit and district courts of the United States at Valdosta, Ga.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8327) to amend an act entitled "An act for the protection of the lives of miners in the Territories."

The message also announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 3560) to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896.

PHILIPPINE GOVERNMENT.

The committee resumed its session.

The Clerk read as follows:

CITIZENSHIP.

SEC. 11. That all inhabitants continuing to reside in the Philippine Islands who were Spanish subjects on the 11th day of April, in the year 1899, and then resided therein, and their children born subsequent thereto, shall be deemed and held to be citizens of said islands except such as shall have elected to preserve their allegiance to the Crown of Spain, in accordance with the provisions of the treaty of peace concluded between the United States and Spain on the 11th day of April, in the year 1899; and they, together with citizens of the United States who reside in said islands, shall constitute a body politic under the name of "The people of the Philippine Islands."

Mr. SMITH of Kentucky. Mr. Chairman, I think this is a somewhat remarkable provision relative to citizenship in the Philippine Islands. It will be observed that it makes all persons who were Spanish subjects in the islands at a certain time, and their children, citizens of those islands. It does not say whether they shall be citizens of the United States or not.

Mr. TAWNEY. A parliamentary inquiry. Is there an amendment pending?

The CHAIRMAN. The gentleman is speaking by unanimous consent.

Mr. SMITH of Kentucky. Mr. Chairman, I am going to ask unanimous consent to talk a little while. I have not had one word to say about this measure until now.

Mr. TAWNEY. I simply wanted to know whether there was an amendment pending.

Mr. SMITH of Kentucky. I desire to ask unanimous consent, and if anybody wants to object I shall not insist.

Mr. PAYNE. Will the gentleman say how much time?

Mr. SMITH of Kentucky. About ten minutes, I think.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent that he may proceed for ten minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SMITH of Kentucky. Now, Mr. Chairman, I take it that there were a great many people in the Philippine Islands on the

11th day of April, 1899, who were not Spanish subjects; and if so, neither they or their children will, under this provision, be held to be citizens of those islands. Another phase of this section is that it makes citizens of the United States residing in the Philippine Islands citizens of those islands. Now, this question, Mr. Chairman, of citizenship has been one of the troublesome phases about this entire Philippine question. Our Constitution provides that all "persons born or naturalized within the United States" shall be citizens of the United States.

Now, evidently, these people in the Philippine Islands were not born within the United States, and hence are not citizens under that clause of the Constitution. But that other clause, that says that all persons naturalized within the United States shall be citizens of the United States, makes this a very troublesome question with which the American people have to deal. The question of naturalization arises. Are the Filipinos citizens of the United States by naturalization? This is not only an intensely interesting but to us a vitally important inquiry, and one that must be answered in the near future.

This leads naturally to the inquiry as to what naturalization is and how it may be effected. The authorities touching these points are so thoroughly in accord that there is but little if anything to be gained by comment. Hence I shall be content with reading a few extracts. Vattel, on the Law of Nations, page 101, says:

> A nation or the sovereign who represents it may grant to a foreigner the quality of citizen by admitting him into the body of the political society. This is called naturalization.

Cooley, in his Principles of Constitutional Law, on page 79, states:

> Naturalization is the act by which the rights, privileges, and immunities of citizenship are conferred upon a person born alien.

It is also said by Mr. Rawle:

> Naturalization is but a mode of acquiring the right subject to the duties of a citizen; it is the factitious substitution of legal form for actual birth, etc. (Rawle, on the Constitution, 91.)

The next point in the orderly investigation of the matter is to ascertain how this change from alien to citizen may be accomplished. While it is true that there is a general uniform mode of naturalization provided in the statute of the United States, this system was manifestly enacted with reference to individual and not collective naturalization. It could not in the nature of things be held applicable to the incorporation into our citizenship of large bodies of aliens residing in territory acquired by conquest or treaty. It has without doubt been the general practice in negotiating treaties of cession with other nations for this Government to permit some definite provision in the articles for the adoption into the family of this nation the inhabitants of the country ceded by the treaty, but there can be no grave doubt but that such custom has been indulged as a courtesy with a view to quieting the apprehension of the masses of such population with respect to the legal effect of a transfer of sovereignty rather than for any substantial purpose to be accomplished by it.

It would seem to be a just and reasonable doctrine that holds that the transfer of the sovereignty of a country to the United States operates to make the citizens of such country citizens of the United States, unless they elect to avoid it by removal. There is, at least, very good authority for believing that such is the prevalent rule.

In the case of the American Insurance Company *v.* Canter (1 Pet., 511) Chief Justice Marshall used this language:

> The treaty is the law of the land, and admits the inhabitants of Florida to the enjoyments of the privileges, rights, and immunities of the citizens of the United States. It is unnecessary to inquire whether this is not their condition independent of the stipulations. They do not, however, participate in political power; they do not share in the Government until Florida becomes a State.

Judge Cooley states the proposition in this way, to wit:

> Naturalization may be effected, first, by special law which confers this privilege upon individuals named: second, by proceedings under general laws, whereby individuals severally renounce any foreign allegiance and take upon themselves the obligations of citizenship; third, by the acquisition by the United States of foreign territory with its people, who thereby become citizens of the United States. (Cooley's Prin. Const. Law, p. 254.)

Vattel, in the Law of Nations, page 388, speaking of the effect of conquest upon the right and status of the citizens of the conquered territory, says:

> But at present war is less dreadful in its consequences to the subject; matters are conducted with more humanity; one sovereign makes war against another sovereign and not against the unarmed citizens. * * * They suffer but indirectly by the war; and the conquest only subjects them to a new master.

The principle so distinctly stated in these excerpts has in explicit terms been sanctioned by the Supreme Court of the United States in the case of Boyd *v.* Thayer (143 U. S., p. 162), where it is said:

> Manifestly the nationality of the inhabitants of territory acquired by conquest or cession becomes that of the government under whose dominion they pass, subject to the right of election on their part to retain their own nationality by removal or otherwise, as may be provided.

These methods are also recognized in the case of the United States *v.* Wong Kim Ark (169 U. S., pp. 702 and 703), where it is said:

> A person born out of the jurisdiction of the United States can only become a citizen by being naturalized, either by treaties, as in case of the annexation of foreign territory, or by authority of Congress exercised either by declaring certain classes of persons to be citizens in the enactments conferring citizenship upon foreign-born children of citizens or by enabling foreigners individually to become citizens by proceedings in the judicial tribunals, as in the ordinary provision of the naturalization acts.

Not only this, but in the recent case known as the Fourteen Diamond Rings case the Supreme Court of the United States has at least very broadly intimated that such would be its holding when the question arises, if ever, before that court. In this case, referring to De Lima *v.* Bidwell, they say:

> The theory that a country remains foreign with respect to the tariff laws until Congress has acted by embracing it within the customs union presupposes that a country may be domestic for one purpose and foreign for another. It may undoubtedly become necessary for the adequate administration of a domestic territory to pass a special act providing the proper machinery and officers, as the President would have no authority, except under the war power, to administer it himself; but no act is necessary to make it domestic territory if once it has been ceded to the United States. * * * This theory also presupposes that territory may be held indefinitely by the United States; that it may be treated in every particular, except for tariff purposes, as domestic territory; that laws may be enacted and enforced by officers of the United States sent there for that purpose; that insurrections may be suppressed, wars carried on, revenues collected, taxes imposed; in short, that everything may be done which a government can do within its own boundaries, and yet that the territory may still remain a foreign country.
>
> That this state of things may continue for years, for a century even, but that until Congress enacts otherwise it still remains a foreign country. To hold that this can be done as a matter of law we deem to be pure judicial legislation. We find no warrant for it in the Constitution or in the powers conferred upon this court. It is true that the nonaction of Congress may occasion a temporary inconvenience; but it does not follow that courts of justice are authorized to remedy it by inverting the ordinary meaning of the word.
>
> No reason is perceived for any different ruling as to the Philippines. By the third article of the treaty, Spain ceded to the United States "the archipelago known as the Philippine Islands," and the United States agreed to pay Spain the sum of $20,000,000 within three months.
>
> The treaty was ratified; Congress appropriated the money; the ratification was proclaimed. The treaty-making power, the executive power, the legislative power concurred in the completion of the transaction.
>
> The Philippines thereby ceased, in the language of the treaty, "to be Spanish." Ceasing to be Spanish, they ceased to be foreign country. They came under the complete and absolute sovereignty and dominion of the United States, and so became territory of the United States over which civil government could be established. The result was the same, although there was no stipulation that the native inhabitants should be incorporated into the body politic and none securing to them the right to choose their nationality. Their allegiance became due to the United States, and they became entitled to its protection.
>
> It is further contended that a distinction exists in that while complete possession of Porto Rico was taken by the United States, this was not so as to the Philippines, because of the armed resistance of the native inhabitants to a greater or less extent.
>
> We must decline to assume that the Government wishes thus to disparage the title of the United States or to place itself in the position of waging a war of conquest.
>
> The sovereignty of Spain over the Philippines and possession under claim of title had existed for a long series of years prior to the war with the United States. The fact that there were insurrections against her or that uncivilized tribes may have defied her will not affect the validity of her title. She granted the islands to the United States, and the grantee in accepting them took nothing less than the whole grant.
>
> If those in insurrection against Spain continued in insurrection against the United States, the legal title and possession of the latter remained unaffected.
>
> We do not understand that it is claimed that in carrying on the pending hostilities the Government is seeking to subjugate the people of a foreign country, but, on the contrary, that it is preserving order and suppressing insurrection in territory of the United States. It follows that the possession of the United States is adequate possession under legal title, and this can not be asserted for one purpose and denied for another. We dismiss the suggested distinction as untenable.

That is the doctrine laid down by the Supreme Court of the United States—that the allegiance of the Filipinos became due to the United States and they were entitled to the protection of the United States Government. Mr. Chairman, it seems to me the merest absurdity to assert that any people anywhere can owe permanent and unqualified allegiance to the Government of the United States without being, in the full and complete sense of the term, citizens of the United States. If, then, the effect of the acquisition of the islands has been to bring their inhabitants into the body of American citizenship, those who were so enthusiastically for the scheme will no doubt live to see its disastrous results to the country. [Applause.]

The Clerk, proceeding with the reading of the bill, read as follows:

FRANCHISES.

SEC. 13. That the government of the Philippine Islands may grant franchises, privileges, and concessions, including the authority to exercise the right of eminent domain, for the construction and operation of works of public utility and service, including railroads, telephone and telegraph lines, and electric-light lines, and may authorize said works to be constructed and maintained over and across the public property of the United States, including streets, highways, squares, and reservations, and over similar property of the government of said islands, and may adopt rules and regulations under which the provincial and municipal governments of said islands may grant the right to use and occupy such public property belonging to said provinces or municipalities: *Provided, however*, That such authority to take and occupy land shall not authorize the taking, use, or occupation of any land except such as is required for the actual necessary purposes for which the franchise

is granted, and that no such franchise, privilege, or concession shall be granted to any corporation except under the conditions that it shall be subject to amendment, alteration, or repeal by the Congress of the United States, and that lands or rights of use and occupation of lands thus granted shall revert to the governments by which they were respectively granted upon the termination of the franchises and concessions under which they were granted, or upon their revocation or repeal. That all franchises, privileges, or concessions granted under this act shall forbid the issue of stock or bonds, except in exchange for actual cash or for property at a fair valuation equal to the par value of the stock or bonds so issued; shall forbid the declaring of stock or bond dividends, and, in the case of public-service corporations, shall provide for the effective regulation of the charges thereof and for the official inspection and regulation of the books and accounts of such corporations, and for the payment of a reasonable percentage of gross earnings or of net profits into the treasury of said islands or of the province or the municipality within which such franchises are granted and exercised.

Mr. COCHRAN. Mr. Chairman, I move to strike out the last word. This section of the bill brings attention to the only incentive that could possibly actuate an intelligent government in this country to annex and permanently exercise control over the Philippine Islands. There is no pretense that any considerable number of Americans will ever attempt to establish themselves in the Philippine Islands, as they have in other territory acquired by this Government. There is not a farmer probably in all this broad land who contemplates that he or his children will at any time go to the Philippine Islands to build a home or that other Americans will go there and establish a community.

Mr. CRUMPACKER. Mr. Chairman, I raise the point of order that the gentleman is not discussing the amendment, or any amendment. I think the committee owes it to the House to insist on the observance of the rules to a reasonable extent, at least.

Mr. COCHRAN. I am going to discuss the proposition contained in this bill of granting franchises for the exploitation of the agricultural lands of these Filipinos.

Mr. CRUMPACKER. I understood the gentleman to move to strike out the last word.

Mr. COCHRAN. Is it understood that the pro forma amendments usually made as the basis of debate under the five-minute rule are prohibited during the consideration of this bill?

Mr. CRUMPACKER. Notwithstanding that, Mr. Chairman, I insist on the point of order.

Mr. COCHRAN. Then I move to strike out the section.

The CHAIRMAN. The gentleman from Missouri withdraws his pro forma amendment and moves to strike out the section. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. COCHRAN. Nowhere in the world are the great powers devouring weak nations for any purpose except robbery. All the bloody wars of the past ten years have had their origin in avarice. If we seek the cause of the destruction of the Boer Republics, we find it in the gold mines and the diamond fields of South Africa. If we seek the cause of the destruction of Madagascar by France, we find it in the rubber forests which abound on that beautiful island. If we seek the cause of the recent bloody affrays in China, we find it in the desire of the foreign stockjobbers and speculators to invade that great Empire and exploit its resources.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. COCHRAN. If my time can be extended. I have only five minutes and I want to occupy that myself.

Mr. COOPER of Wisconsin. I will get the gentleman's time extended if he needs it. Does not the gentleman know that he assumes the whole case when he says that this provision provides for the exploitation, when as matter of fact it is as strictly drawn if not more strictly drawn than the franchise law of Missouri, and your legislation allows you to exploit your State? How in the world can the Philippine Islands be exploited under the strictest franchise law ever enacted in the United States?

Mr. COCHRAN. The more pity it is that under the loosely drawn corporation laws of the State of Missouri the natural deposits and resources of that State are to be made the means of building up the fortunes of men remote from the boundaries of the State. Our coal mines and the zinc and lead deposits of southwest Missouri are to be overcapitalized, as railroads once owned by the State have been. Innumerable corporations own and have overcapitalized our municipal utilities. Thus what ought to enrich our Commonwealth and people is to become a drain upon the resources of the State.

I admit that loosely drawn and poorly enforced corporation laws have made it possible for speculators, stock jobbers, and promoters to do violence to the best interests of the people of my State.

This bill authorizes corporations to acquire agricultural lands in the Philippine Islands. What will be the fate of the Philippine Islands if great sugar-planting corporations shall acquire there for a song, as they can, vast holdings which hitherto have been cultivated by the natives? As the result of the demoralization of prices and the collapse of values caused by three years of insurrection against Spain and a war of conquest carried on for four years by the United States, necessarily property values have suffered, and the islands will be easy prey for any hands that may choose to seize them. In this statute is the basis by which corporations already formed for the purpose of seizing the forests may also seize the agricultural lands.

Unhappy is the country whose development and progress depend upon the class of men who have stood at the elbow of the American Administration during the period of this controversy. In 1896, for the first time, the initiative in everything in this country was placed in the hands of men who regard the exploitation of property through the medium of corporations as everything, and the general prosperity and felicity of the masses as nothing. There is not a line in this statute limiting land grabbing by corporations.

Mr. TAWNEY. Has the gentleman read the section?

Mr. COCHRAN. Yes.

Mr. TAWNEY. And you make that statement after reading it?

Mr. COCHRAN. I make the statement after reading it that there is not a limitation here that can not be found in statutes of American States; and I defy you to point me to a line in the statutes of those States that has been executed or enforced in any degree to prevent it.

Mr. TAWNEY. Will the gentleman kindly print those two sections in connection with his speech? They will speak for themselves.

Mr. COCHRAN. I am getting right to them now.

Mr. COOPER of Wisconsin. The gentleman said that we could not point out the provision in this bill which could not be found in some of the statutes of some of the States.

Mr. COCHRAN. I say so, substantially.

Mr. COOPER of Wisconsin. Will the gentleman kindly indicate in what statute of what State the clause is found which I read from page 72 of this bill, beginning at line 14?

And this provision shall be held to prevent any member of a corporation engaged in agriculture from being in any wise interested in any other corporation engaged in agriculture.

That is not found in any other statute in the United States. The subcommittee, consisting of Mr. Moody, now Secretary of the Navy, the gentleman from Indiana [Mr. CRUMPACKER], and myself, were the authors of it.

Mr. COCHRAN. The preceding line provides that no corporation may acquire over 5,000 acres of land.

Mr. COOPER of Wisconsin. But will the gentleman acknowledge that he was mistaken?

Mr. COCHRAN. Do you call a tract of 5,000 acres a "farm?"

Mr. COOPER of Wisconsin. Will the gentleman acknowledge that he was mistaken a moment ago when he challenged us to point out a clause in this franchise law which could not be found in some statute of some State of this Union? Was the gentleman mistaken or not?

[Here the hammer fell.]

Mr. COCHRAN. I ask unanimous consent that my time be extended to ten minutes.

Mr. PAYNE. I object to ten minutes; I will not object to five.

The CHAIRMAN. Is there objection to extending the gentleman's time for five minutes?

There was no objection.

Mr. COCHRAN. Now, let us see what some of the restrictive features of State legislation are and how far they have been enforced. I tell you the only way to prevent the exploitation of these lands is to prohibit corporations from owning agricultural lands. I lay it down as a proposition confirmed by the observation of every American citizen who has thought the matter over that no corporation ought to be allowed to own land in excess of that needed for its corporate purposes, its offices, its factories, and the like; and no corporation on this earth ought to be allowed to own agricultural land and operate it for a profit. I say that this bill authorizes corporations to own agricultural lands and imposes substantially no limitations upon their acquisitions.

I said I would call attention to some State laws and show how they have been enforced. Rigid laws to prohibit injurious corporation ownership of natural resources exist in several of the States in the form of statutes prohibiting railroad companies from owning coal mines. They have one in Kansas. It was intended to prevent the Santa Fe Railroad Company from monopolizing the mines of that State. Did it do it?

Inside corporations and cliques were formed which bought up all the coal mines on the line, not only in Kansas, but in Colorado and New Mexico, and established an absolute, iron-clad monopoly of the fuel supply of a vast area of country. And in what respect is the coal-mining corporation separate from the railroad company? At the capital of that State, within the very shadow of the dome of the capitol, is a great building ostensibly occupied as the general offices of the Santa Fe Railroad Company, but the

floor space occupied by the coal-mining company is as great as that occupied by the railroad company. The ownership of the mines and of the railroad is in fact the same.

You can not find on the statute books of any State a more stringent law than this Kansas law. I have never looked at it, but I understand that Pennsylvania has a statute equally stringent, and yet a railroad company in that State monopolizes the only anthracite coal fields in the United States, and there is no pretense but that it absolutely controls and dictates the price of that commodity from one end of the country to the other.

This statute is objectionable in many respects, but the fact that it authorizes corporations to acquire the lands of the Philippine Islands renders it infamous. The natives can look forward to success in no calling except agriculture for years and years to come. The land is their only hope.

The elaborate provisions for the welfare of corporations contained in this measure are sufficient to expose to the country the shallowness of the pretense that we are laboring solely for the welfare of the Philippines. Why not drop all disguises and admit that we are doing what Russia is doing in Manchuria, what England has done in Egypt and South Africa, what France is doing in Madagascar, preferring to turn over to corporations the natural resources of a country to which we have only the bloody title of a conqueror?

Is there an American citizen who does not know that if there were nothing in South Africa worth stealing, the two republics that have just been strangled, instead of being vassal states would to-day be independent governments? Do you doubt that it was the belief that China has vast resources and mineral deposits which may be profitably exploited that led the German Emperor and later Russia and France to seize Chinese seaports and excite an insurrection which culminated in the horrors which recently shocked the world?

At every step in the programme of conquest to which the Republican party has committed the country the American people are called upon to say whether we, like the land-grabbing nations of the Old World, are henceforth to act upon the theory that commerce, plunder, and booty are everything and the rights of humanity as nothing.

The Clerk read as follows:

SEC. 14. That no corporation shall be authorized to conduct the business of buying and selling real estate or be permitted to hold or own real estate except such as may be reasonably necessary to enable it to carry out the purposes for which it is created, and every corporation authorized to engage in agriculture shall by its charter be restricted to the ownership and control of not to exceed 2,000 hectares (a) of land; and this provision shall be held to prevent any member of a corporation engaged in agriculture from being in any wise interested in any other corporation engaged in agriculture. Corporations, however, may loan funds upon real-estate security and purchase real estate when necessary for the collection of loans, but they shall dispose of real estate so obtained within five years after receiving the title. Corporations not organized in the Philippine Islands, and doing business therein, shall be bound by the provisions of this section so far as they are applicable.

Mr. LITTLEFIELD. Mr. Chairman, I submit the following amendment.

The Clerk read as follows:

Insert, in line 22, page 72, after the word "this," the following: "And the preceding."

Mr. LITTLEFIELD. Mr. Chairman, I understand this amendment is agreeable to the committee. It merely subjects the corporation to the provisions of both sections so far as applicable, and it was an inadvertence, undoubtedly, in leaving out the language.

The CHAIRMAN. The question is on the adoption of the amendment.

The amendment was agreed to.

Mr. HULL. Mr. Chairman, I would like to have the committee explain why it is that the corporations who loan money on real estate should be required to sell their real estate within five years, if it is taken on execution.

Mr. COOPER of Wisconsin. Mr. Chairman, this is the same provision found in the national-bank laws in the United States, which provides that in the event of foreclosure the real estate of such corporation shall be disposed of. It is to prevent the accumulation of real estate in the hands of corporations.

Mr. HULL. I think that national banks are not permitted to loan money on real estate, to begin with. They take it on execution for debt, but the chairman of the Commission, Governor Taft, and the members of the Commission have urged strongly that one of the needs of the Philippine Islands is what we call in this country loan companies or land companies, that loan money on real estate. Such companies are needed in the Philippine Islands to loan money at reasonable rates, and assist in the development of the country. To-day rates of interest are almost prohibitive, and the planters are robbed of their honest profits. Now such a provision as this, affecting one of these companies in the United States, would prohibit the loaning of money on real estate.

Mr. SIBLEY. Oh, no.

Mr. HULL. Because they might not be able to sell it without a large loss, if compelled to sell within a specified time. A period of depression would result disastrously.

Mr. MANN. Will the gentleman yield for a suggestion?

Mr. HULL. Yes.

Mr. MANN. No one can raise that question except the State.

Mr. HULL. Oh, yes.

Mr. MANN. If they do not sell the land within the time, they still own it.

Mr. HULL. They still own it, but such a provision will debar capital.

Mr. MANN. No one can raise the question except the State by quo warranto proceedings.

Mr. TAWNEY. The land does not escheat to the State.

Mr. MANN. There are many banks which own real estate, and have owned it for twenty years.

Mr. HULL. The Commission itself are honestly desirous that loan companies shall be established there to loan money on real estate. At present the rate of interest is almost prohibitive—18, 20, and 25 per cent—and they are desirous to have a lower rate of interest. It seems to me that this is a dangerous provision. I do not propose to strike it out, because the committee ought to know better than I do. There is not one of these loan companies in this country that has ever had to sell its real estate within five years.

Mr. JONES of Virginia. Mr. Chairman, I desire on page 72, line 13, to move to strike out the word "thousand" and substitute for it the word "hundred," so that it will read "control not exceeding two hundred hectares."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 72, line 13, strike out the word "thousand" and insert the word "hundred."

Mr. JONES of Virginia. Mr. Chairman, all I want to say in this connection is that the fundamental law of Porto Rico provides that corporations engaged in agriculture in that island shall not hold exceeding 500 acres of land. If my amendment is adopted, it will make this section correspond very nearly to the Porto Rican law, 200 hectares being very nearly 500 acres.

Mr. TAWNEY. I ask that the amendment be again reported, so that the committee may know what it is. I do not think anyone over here understood the reading of it.

The CHAIRMAN. Without objection, the amendment will be again reported.

The amendment was again read.

Mr. GAINES of Tennessee. Mr. Chairman, I should like to ask what standard this is that we are going by? This speaks of "hectares." What does that mean? How many acres in a hectare?

Mr. JONES of Virginia. The hectare is nearly 2½ acres. I think that 200 hectares would be about 495 acres.

Mr. GAINES of Tennessee. Why do you want it changed? Why even that much? I want to get at the merits of the question.

Mr. JONES of Virginia. I stated that I wanted it changed, because in the first place I think no corporation ought to be allowed to hold as much as 5,000 acres of land for agricultural purposes, and because the Porto Rican act limits the holding of a corporation to 500 acres. I think that is sufficient.

Mr. GAINES of Tennessee. I agree with the gentleman; that is plenty. Mr. Chairman, while I am on the floor I will call the attention of the committee to a typographical error in line 10. We are evidently trying to say "that to enable," but we do not say that.

The CHAIRMAN. The Clerk has made the correction.

Mr. GAINES of Tennessee. I rose to have that error corrected, and to ask the gentleman who reported this bill, or anyone else present, if there is anything in this bill to prohibit what are commonly known as trusts, combinations, and monopolies in the Philippine Islands? We are permitting a great many corporations to be created there, in addition to the thousands that I presume will be created in the United States to operate there, for this is a graft game all around.

Mr. SULZER. Some corporations are there now.

Mr. GAINES of Tennessee. Governor Taft called them "beach combers." They are squatting there like frogs, some legally and others illegally, awaiting their opportunity. Now, I believe, largely through the instrumentality of my friend from Georgia [Mr. BARTLETT], we passed an anti-trust law for that little ice box or refrigerator up here, commonly called Alaska. Why should we not have a similar law in the Philippine Islands? Why should we not have a provision prohibiting the combination of corporations over there—the trusts that will, as here, deny the people the chance to have cheap beef, bread, and meat? Those people are practically dependent upon us for legislation, and we are legislating for them. We fix the boundaries within which they must legislate.

Mr. TAWNEY. Will the gentleman allow me to interrupt him?

Mr. GAINES of Tennessee. Yes.

Mr. TAWNEY. I should like to ask the gentleman if he does not think that when we have provided, as we do in this bill, that no person owning stock in one company shall own stock in another company, and that no member of a corporation can be a member of any other corporation, that we have gone a great way against consolidation?

Mr. GAINES of Tennessee. That is almost all the way, but just leaves enough room I think for the corporations, like a bad dog, to slip through the crack. These corporations put up the price of all necessaries so that they are very dear. I came nearer being robbed every day in the ordinary transactions of life there than any place I ever was in in my life. [Laughter.] But the gentleman must know there is a difference between being a "member" of a corporation and making a contract with or between corporations to put up or down prices.

Mr. PADGETT. I would suggest to my colleague the limitation applies only to corporations engaged in agriculture and not to any other corporation.

Mr. GAINES of Tennessee. I am glad that my colleague, who is very watchful about such things, has noticed that. He says that this applies to agriculturists only. I want to appeal in this matter to the patriotism of gentlemen on the other side. We have plenty of the love of human rights on this side. I have not had a chance to read all of this bill as I have been very much diverted to-day, hence I make these inquiries for information and to cure the omission if an antitrust provision is not in the bill.

Mr. LITTLEFIELD. If the gentleman from Tennessee will permit me, I want to suggest this amendment, which will take care of the difficulties suggested by the gentleman. Insert after the word "agriculture," in line 15 of page 72, the words "or any corporation organized for any purpose."

Mr. GAINES of Tennessee. That is all right as far as it goes. I am glad to join hands with my friend from Maine in straightening this matter out.

Mr. Chairman, I want to say that I created somewhat of a ripple a short while ago when I said that I came very nearly being robbed in nearly every transaction, and particularly in Manila. I did not mean by downright stealing. I meant that the prices were so exorbitant that but very few of our party made any purchases in Manila.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GAINES of Tennessee. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman asks unanimous consent that his time may be extended for five minutes. Is there objection?

Mr. CRUMPACKER. I think, as we have had a few extensions of the rule, I am compelled to object.

The CHAIRMAN. Objection is made.

Mr. GAINES of Tennessee. I will vote for the amendment proposed by the gentleman from Maine.

The CHAIRMAN. An amendment is offered by the gentleman from Virginia, to strike out the word "thousands" and insert the word "hundreds."

Mr. TAWNEY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. Debate is exhausted.

Mr. TAWNEY. I move to strike out the last word.

The CHAIRMAN. That is not in order.

Mr. HILL. I move to strike out the section.

The CHAIRMAN. That is not in order. The question is on the amendment of the gentleman from Virginia.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. JONES of Virginia. Division.

The committee divided, and there were—ayes 35, noes 70. So the amendment was rejected.

Mr. LITTLEFIELD. I insist on the amendment I offered.

The Clerk read as follows:

On page 72, line 15, after "agriculture," insert "or any corporation organized for any purpose;" so as to read: "And this provision shall be held to prevent any member of a corporation engaged in agriculture or any corporation organized for any purpose from being in any way interested in any other corporation engaged in agriculture."

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. HILL. I am opposed to this amendment, and my opposition is based on this——

Mr. SULZER. Just a moment.

Mr. HILL. I am opposed to the amendment, and I believe the gentleman from Maine will be opposed to the amendment if he thinks of its effect. It will absolutely prevent any corporation which owns sugar or rice lands up to the prescribed limit in the valleys from acquiring mountain areas not tillable or valuable for any other purpose except for collecting and storing water for irrigation, and in that country this is very necessary, and if done to advantage must be by corporations, in other words, by combinations of those who are carrying on agricultural operations.

Mr. LITTLEFIELD. I will say to the gentleman from Connecticut, so far as I am concerned, I am opposed to any corporation undertaking to own stock in other companies, for that is the familiar method of forming trusts, and I am opposed to that as a general proposition.

Mr. HILL. Mr. Chairman, I think that this is carrying the matter a little too far. Gentlemen, here is one of the troubles when we are legislating for people 10,000 miles away. We do not understand the conditions which exist there. I visited a sugar plantation in the Hawaiian Islands and found that the planters have been embarrassed in precisely this same way in those islands. I saw one plantation with 5,000 acres of cane planted, and by reason of your law and their consequent inability to acquire additional mountain land which was not tillable, but could be used for reservoir purposes, they were obliged to spend great sums for artesian wells and pumping apparatus to irrigate their fields. These mountain lands are bare rock in many cases and of absolutely no use for any other purpose. Why should they not utilize them in this way?

Now, you have got precisely that condition in the Philippine Islands. You have got sugar and rice plantations in that country and they need the storage reservoirs and the water from the mountains where the land is absolutely worthless, and nothing but rock and not fit for agricultural purposes, but it is exactly what is required for reservoir purposes, and if you put in this amendment of the gentleman from Maine, you simply say to these men, You can hold so much land for rice and sugar and cultivate it, but you can not be interested in or own one single acre more, or you can not be interested in a company which does own land, which owns nothing but barren and rocky land, which is used for the purpose of gathering together and storing water for irrigation.

Now, the land has to be irrigated for your sugar and rice and everything of that kind, and you are going to compel those people to spend hundreds of thousands of dollars for pumping machinery in order to successfully cultivate the land which they already own. Gentlemen who have visited that country know that what I am saying is absolutely true, and the amendment of the gentleman from Maine will compel the useless expenditure of hundreds of thousands of dollars to secure irrigation, or the planters living near these barren mountains in the Philippine Islands, owning land in the valleys, will be greatly embarrassed, for the amendment makes no distinction as to the kind or character of land or the purposes for which it is used. The amendment of the gentleman from Maine ought not to pass.

Mr. GAINES of Tennessee. Does the gentleman from Connecticut mean to say that the Philippine Islands need irrigation?

Mr. HILL. I do mean to say that there is little rice or sugar land there that is cultivated except by irrigation. I am astonished that the gentleman from Tennessee, who went to those islands, should ask such a question. Did he go through them with his eyes shut?

Mr. GAINES of Tennessee. I did not go through with my eyes shut, but I did not see any great need of water.

Mr. LITTLEFIELD. What is the view of the gentleman from Connecticut as to the scope of the amendment?

Mr. HILL. It would prevent the owners of these sugar plantations from owning any barren rock or any part of these hills or mountains for a place to store water if they wished to do so.

Mr. LITTLEFIELD. It is for agricultural purposes. If the limit is not large enough, why, increase the limit. The gentleman is beginning at the wrong end.

Mr. HILL. You fix a limit and you stop right there. You refuse to allow them any more land for the purposes of storing water.

Mr. LITTLEFIELD. We are trying to prevent combinations. If you need a larger limit, make it larger.

Mr. HILL. The limit is dependent upon circumstances. Suppose here is a tillable valley, and the owner buys this land to use for sugar purposes. You can not decrease the quantity of land there is in that valley.

Mr. HAMILTON. Why may we not take into consideration the irrigation that it needs, etc., and let them buy enough land to use for irrigation in connection with the sugar plantations?

Mr. HILL. Because it requires a large space for drainage surface. Now, let us look at the thing from a business point of view. We are offering amendments helter-skelter according to our ideas here, and if we could see things as they are there, we would see that they are vastly different. Put the proposition right there. You say these people can own no lands for agricultural purposes exceeding 2,000 hectares. You mean tillable, cultivated land, land that is possible of cultivation, do you not, Mr. Chairman of

the committee? Now, then, when you do that, why do you shut them off from owning the rocky hills adjacent to it, impossible of cultivation, and yet absolutely essential to the storage and gathering of water for the irrigation of the land which they own? The amendment of the gentleman from Maine would do that.

Mr. SULZER. Mr. Chairman, I desire at this time to call the attention of the House, and especially of the gentleman from Maine, to the purport of his amendment in connection with the language of this section. If we should strike out the words, on line 15, "engaged in agriculture" and amend the section so that it would read like this, "this provision shall be held to prevent any corporation or stockholder in the same from being in any wise interested in any other corporation doing business in the Philippines," that will accomplish, I think, the purpose that the gentleman from Maine desires to accomplish, and will not in any way complicate or confuse this provision of the bill.

In fact, I believe it will then be so explicit that no layman can misunderstand it. As his amendment reads at the present time it would complicate this section of the bill so that a Philadelphia lawyer could not possibly understand it. I want to make it clear and simple. I want to make it impossible to organize a trust in the Philippines.

Mr. LITTLEFIELD. But that would radically change the purport of the whole section. I am only endeavoring to help the committee perfect the section, confining it to corporations engaged in agriculture.

Mr. SULZER. I beg the gentleman's pardon. I thought he was opposed as a matter of principle to one corporation owning stock in another corporation in order to form a combination in the nature of a monopoly. I thought he was opposed to trusts.

Mr. LITTLEFIELD. I did not say one stockholder being a stockholder in another corporation. I am opposed to one corporation owning stock in another corporation.

Mr. SULZER. That is just the point. That is what I want to do now. I think the gentleman is sincere, and if he is he will accept my proposed amendment. I want to keep the trusts out of the Philippines, and my amendment will, I believe, to some extent do it. This is the only way it can be done.

In my opinion the real object of this proposed legislation is to turn the resources of the Philippine Islands over to the tender mercies of the trusts and a few favorite looters. The honest men of this House should perfect this bill to prevent that. Let us say in the bill that no corporation shall own stock in another corporation doing business in the Philippine Islands.

Mr. LITTLEFIELD. I agree that the gentleman's proposition would be sound as to corporations in general. But my amendment has been framed simply with reference to agricultural corporations.

Mr. GAINES of Tennessee. Your idea is to prevent any combination among agricultural corporations?

Mr. LITTLEFIELD. Precisely; and that is as far as it goes.

Mr. GAINES of Tennessee. That is all right.

Mr. SULZER. But, Mr. Chairman, that is only all right so far as it goes. I want to go further than that. I want to prevent combinations between corporations doing business in the Philippines—not only agricultural corporations, but all corporations. If the restriction is fair in regard to agricultural corporations, why is it not fair in regard to lumbering corporations? Why is it not fair in regard to all other corporations? That is the question here.

That is my position regarding this matter. At the present time, as I understand it, there are no agricultural corporations in the Philippine Islands. This provision as it now stands is a mere subterfuge to throw dust in the eyes of the members of this House. As this section now reads you can establish any kind of a combination, any kind of a trust, any kind of a monopoly in the Philippine Islands—even an agricultural monopoly. If you adopt my amendment it can not be done.

The very purpose of this bill, the very object of this legislation, from its inception down to the present time, as I have frequently said and now repeat, is to give a few trusts and a few men in this country the right to go into the Philippine Islands and loot them, rob them, steal from those poor people the little they have left. Stripped of its hypocrisy, that is the whole object and the true purpose of this bill. You can not deny it. There is not a lawyer in this House that has examined this bill and read between the lines that does not know and believe its real object is to rob the poor Filipinos. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SULZER. I ask that my time be extended for five minutes.

Mr. CRUMPACKER. I object.

Mr. OLMSTED. I wish to make a suggestion to the gentleman from Maine.

The CHAIRMAN. Debate is exhausted except by unanimous consent.

Mr. OLMSTED. I ask unanimous consent to make a suggestion to the gentleman from Maine.

There was no objection.

Mr. OLMSTED. If the amendment of the gentleman from Maine prevails, a man owning one share of stock in a railway company could not own any stock in an agricultural corporation or in a bank. If that is not the object, the gentleman ought to strike out the words "or any member."

Mr. LITTLEFIELD. That would not have the effect intended. The word "member" applies to members of agricultural corporations—not to members of any other corporation.

Mr. OLMSTED. The gentleman's amendment would make the language read "any member of any corporation engaged in any other business."

Mr. LITTLEFIELD. No; there is a vast distinction between a member of a corporation and a corporation. By unanimous consent, I would like to meet the suggestion of the gentleman from Connecticut by making the language of the amendment read "or any corporation organized for any purpose except irrigation."

Mr. SULZER. I ask to have the provision read as it would be if amended.

The Clerk read as follows:

And this provision shall be held to prevent any member of a corporation engaged in agriculture or any corporation organized for any purpose except irrigation from being in any wise interested in any other corporation engaged in agriculture.

Mr. SULZER. I move to strike out "agriculture."

Mr. GAINES of Tennessee. I reserve a point of order.

The CHAIRMAN. The gentleman from Maine asks unanimous consent to modify his amendment in the manner read. Is there objection?

Mr. GAINES of Tennessee. I do not object, but I would like to have the gentleman explain why he wants the distinction made.

The CHAIRMAN. The gentleman has no time except by unanimous consent.

Mr. GAINES of Tennessee. Well, I ask unanimous consent for him to tell the committee why he wants to make irrigation an exception.

Mr. HILL. If I had my choice in the matter I would not have the clause in there at all. I do not think it a crime for a man to be engaged in agriculture and at the same time to be a stockholder in a bank or a modest stockholder in a street-railway company. But I do think it would be exceedingly unwise to prevent the new landholders whom we expect to have owning these friars' lands and cultivating the sugar and rice lands from utilizing the rocks and barren sides of the mountains by using them for irrigation purposes in order to till their lands successfully. The exception which the gentleman from Maine desires to put in will remove the restriction in this respect so that the small land proprietors, if they please, can combine together and construct great storage reservoirs so that the rains, falling in the mountain regions there, may be utilized for the irrigation of the lands in that dry and tropical climate. That is all there is of it.

The CHAIRMAN. In the absence of objection, the amendment of the gentleman from Maine will be modified as he proproposes.

There was no objection.

The CHAIRMAN. The question is now on the adoption of the amendment of the gentleman from Maine as modified.

Mr. MANN. I rise to ask whether an amendment to the amendment is in order?

The CHAIRMAN. It is not.

Mr. MANN. Then I ask unanimous consent to occupy three minutes in the way of general debate.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to address the Committee of the Whole for three minutes. Is there objection? The Chair hears none.

Mr. MANN. Mr. Chairman, I do not understand exactly what is meant by a "member" of a corporation. If any member of the committee can tell me in a word, I would be very much obliged.

Mr. CRUMPACKER. A stockholder in a corporation in the sense of the law is supposed to be a member of that corporation.

Mr. MANN. The term has never come under my observation. I have often heard of members of associations and stockholders of corporations. I think the word is used erroneously and inadvertently here. However, if that is the intention, if there is any reason for permitting a corporation to own agricultural lands, then there is a sufficient reason why a stockholder in that corporation should not be debarred from being a stockholder in another corporation.

It is perfect folly to suppose that people in the Philippine Islands will engage in corporations for agricultural purposes or otherwise if such persons can not be stockholders in another corporation. If the purpose of the gentleman from Maine had been

simply to provide that one corporation may not own stock in another corporation, there might be a sufficient excuse for that provision, but there can be no excuse for saying that a corporation may exist and may do business and may own agricultural lands and then that a person owning stock in another corporation can not be a stockholder in that corporation. I never have seen yet in a respectable body of men such fear of trusts. The fear of attack of the other side of the House on this side, to which we are not supposed to pay any attention on this side of the House, because it is never reasonable——

Mr. CRUMPACKER. Will the gentleman permit me?

Mr. MANN. Yes.

Mr. CRUMPACKER. The bill undertakes to limit the holdings of a corporation, but if it allowed a corporation to hold 5,000 acres of land and then permitted the members of the same corporation to reincorporate and hold another 5,000 acres, it would absolutely destroy the virtue of any limitation upon the corporation.

Mr. MANN. The gentleman from Indiana is talking about something that I was not talking about.

Mr. LITTLEFIELD. He is talking about the bill.

Mr. MANN. I am talking about the amendment offered by the gentleman from Maine [Mr. LITTLEFIELD]. The original purpose of the bill I understand, that one person shall not, through owning two corporations, own 10,000 acres of land; but the proposition of the gentleman from Maine is that no person can own stock in an agricultural corporation and then own stock in any other corporation.

Mr. LITTLEFIELD. Oh, no.

Mr. MANN. Either in the Philippine Islands or anywhere else. It is absurd.

Mr. LITTLEFIELD. That is not my proposition at all.

Mr. MANN. That is the proposition the gentleman made in his amendment.

Mr. LITTLEFIELD. No, no.

Mr. MANN. If he is a stockholder in an agricultural corporation he can not be a stockholder in any other corporation.

Mr. LITTLEFIELD. That is the position of the committee itself.

Mr. MANN. No; that is not the position of the committee, but the committee accept your amendment.

Mr. TAWNEY. It does not accept the amendment.

Mr. HILL. Mr. Chairman, I ask unanimous consent that the amendment be read again.

Without objection, the Clerk again reported the amendment.

The CHAIRMAN. The question is on the adoption of the amendment.

The question was taken, and on a division (called for by Mr. GAINES of Tennessee and other members) there were—ayes 71, noes 28.

So the amendment was adopted.

Mr. COCHRAN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 72 strike out all of section 14 down to the word "corporation" in line 17, and insert the following:

SEC. 14. No corporation shall own permanently and cultivate for profit any agricultural lands in the Philippine Islands.

Mr. COCHRAN. Mr. Chairman, I suppose that now that the gentlemen on the other side of the Chamber have taken upon themselves the task of establishing civil government in the Philippine Islands it may be possible to induce them to consider some of the causes which hitherto, for at least a century, have caused recurring revolutions and continual turmoil. When in the course of my remarks I refer to the Philippine Islands I want to be understood as referring to the Christian islands.

The island of Luzon is more densely populated than most of the American States, more densely populated than Ohio, almost as densely populated as Massachusetts or Rhode Island. It contains probably over 4,000,000 civilized people—certainly over 3,000,000—and is only two-thirds the size of the State of Missouri.

In early times the ecclesiastical bodies obtained possession of vast areas of the richest land in the island, and have held it from that time until this, adding continually to their possessions throughout three or four centuries. We have a representative now in Rome negotiating for the purchase of this land, and it has been suggested by the gentleman from Connecticut [Mr. HILL] that inasmuch as this land will soon be thrown on the market, they, as well as other lands, are available and ought to be available for sugar plantations and the like under this law.

The frequent revolts of the Filipinos against the Spanish Government resulted from excessive taxation and dissatisfaction with the Spanish friar priests. The ownership of such landed estates by these Spanish friars has long been the cause of friction. Now, are you going to transfer these friar lands, for the possession of which the Filipinos have so often contended with arms in their hands, to corporations, and thus permanently retire them from within reach of the people?

Are you going to say to a people, nearly all of whom live by cultivating the soil, "The very best of your lands is to be placed forever beyond your reach? You must look to great land-owning corporations for employment and not expect a proprietary interest in the soil." Will that pacify them?

The moment you authorize the establishment of large plantations for the cultivation of sugar in the islands, the problem of where to get the labor to cultivate them will arise. You will never, during this generation or the next, at least, get these natives to work as plantation hands for corporations engaged in agriculture over there.

Go down to British Guiana and see there what you may expect to follow the adoption of the policy foreshadowed in this measure. The possessions of Great Britain in South America are owned bodily by corporations such as this bill provides for. The British bosses, Chinese coolies, and enslaved natives who work on the plantation form the population. Do you ever hear of British Guiana in a commercial way? It is one vast plantation owned by British corporations and exploited for their profit.

In no civilized country on earth where agriculture is the chief pursuit can the ownership of an acre of agricultural land by a corporation be justified upon any principle of fairness to the great body of the people. The time is coming when Americans must face this problem. Everywhere you find a disposition to make all forms of productive property the basis of an industry carried on by corporations for profit.

Under the conditions I contend for agriculture neither seeks nor expects large profits. It is a way of earning a livelihood by appealing to mother earth for her blessings. It is a calling which exempts those who follow it from the supervision of a taskmaster. Whatever you may do in the Philippine Islands, you may not expect peace there if you are going to bar the people out of a proprietary interest in the lands or empower corporations to buy, hold, and cultivate the land for profit.

It should be borne in mind that while the Philippine Islanders live in towns or villages very largely, nearly the entire population outside of Manila and one or two other large places live by cultivating the soil. It is their only industry. The land is all they have left. It has nourished them and given them a livelihood when the hand of oppression has been hard to bear.

Now, do you propose to import the modern industrial system there, to take possession of the agricultural lands and exploit them as Great Britain is exploiting the lands of British Guiana?

I offer this amendment in all seriousness and good faith. You can not believe that to reject it will be in the interest of the Philippine Islanders.

Mr. CRUMPACKER. I move that all debate on the pending section and all amendments thereto be now closed.

The question being taken on the motion of Mr. CRUMPACKER, Mr. COCHRAN demanded a division.

Mr. GAINES of Tennessee. You are trying to shut off the anti-trust law, gentlemen, and you are not going to profit much by it. You know we are trying to kill the trusts.

The CHAIRMAN. The gentleman from Tennessee is out of order. A division is demanded.

The committee divided; and there were—ayes 63, noes 36.

Mr. SULZER demanded tellers.

Tellers were ordered; and the Chairman appointed Mr. CRUMPACKER and Mr. SULZER.

The committee again divided; and the tellers reported—ayes 74, noes 43.

Accordingly the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri.

The question being taken, on a division (demanded by Mr. COCHRAN) there were—ayes 35, noes 65.

Accordingly the amendment was rejected.

Mr. CANDLER. Mr. Chairman, I offer an amendment.

Mr. CRUMPACKER. All debate has been closed.

The CHAIRMAN. The amendment is admissible, but there can be no debate upon it. The Clerk will report the amendment offered by the gentleman from Mississippi.

The Clerk read as follows:

After the word "agriculture," in line 16, page 72, insert "or other business."

The question being taken on Mr. CANDLER'S amendment, on a division (demanded by Mr. CANDLER) there were—ayes 36, noes 71.

Mr. CANDLER demanded tellers.

Tellers were refused, 17 members, not a sufficient number, seconding the demand therefor.

Accordingly, the amendment was rejected.

Mr. PADGETT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

In line 16, page 72, strike out the words "engaged in agriculture."

The question was taken, and the amendment was rejected.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. MOODY of Oregon having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 621. An act for the relief of Daniel Cherry;

H. R. 8108. An act for the relief of John Hornick;

H. R. 8769. An act for the relief of S. J. Schindel;

H. R. 10279. An act to pay the claim of Stephen Halsey;

H. R. 12097. An act to amend the internal-revenue laws in regard to storekeepers and gaugers;

H. R. 14247. To authorize the Charleston, Suburban and Summerville Railway Company to construct and maintain two bridges across Ashley River, in the State of South Carolina; and

H. J. Res. 103. Joint resolution relative to the disposition of patent specifications and drawings in the western district of Pennsylvania.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 5269) to provide a commission to secure plans and a design for a monument or a memorial to the memory of Abraham Lincoln, late President of the United States.

The message also announced that the Senate had agreed to the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6570) to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to Senate amendment No. 14, and had receded from its disagreement to the amendment of the House to the amendment of the Senate No. 15, to the bill (H. R. 12804) making appropriations for the support of the Army for the fiscal year ending June 30, 1903, and had agreed to the same.

PHILIPPINE GOVERNMENT.

The committee resumed its session.

The Clerk read as follows:

AUTHORITY TO PURCHASE LANDS OF RELIGIOUS ORDERS AND OTHERS AND ISSUE BONDS FOR PURCHASE PRICE.

SEC. 15. That the government of the Philippine Islands is hereby authorized to acquire, receive, hold, maintain, and convey title to real and personal property, and may acquire real estate, together with appurtenances and hereditaments thereunto belonging, for public uses, by the exercise of the right of eminent domain. The powers hereinbefore in this section conferred may be exercised in respect of any lands which, on the 13th of August, 1898, were owned or held by associations, corporations, communities, religious orders, or private individuals in such large tracts or parcels and in such manner as, in the opinion of the Commission, injuriously to affect the peace and welfare of the people of said islands; and for the purpose of providing funds to acquire the lands mentioned in this section the government of said islands is hereby empowered to incur indebtedness, to borrow money, and to issue and to sell at not less than par value, upon such terms and conditions as it may deem best, registered or coupon bonds of the government of said islands for such amount as may be necessary, said bonds to be in denominations of $50 or any multiple thereof, bearing interest at a rate not exceeding 5 per cent per annum, payable quarterly, and to be payable at the pleasure of the government of said islands, after dates named in said bonds, not less than five nor more than thirty years from the date of their issue, together with interest thereon, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands; and said bonds shall be exempt from the payment of all taxes or duties of the government of said islands or any local authority therein or of the Government of the United States. The moneys which may be realized or received from the issue and sale of said bonds shall be applied by the government of said islands to the acquisition of the property authorized by this section, and to no other purposes.

Mr. PERKINS. Mr. Chairman, I move to strike out the last word for the purpose of asking some questions in regard to this section, which is one of very great importance. If I understand it rightly, this section was intended to give power to acquire a large amount of land owned by the friars, as well as for other purposes. Is that so?

Mr. COOPER of Wisconsin. That is the purpose, Mr. Chairman.

Mr. PERKINS. Now, Mr. Chairman, I do not find in this bill any provision regulating the way in which the right of eminent domain shall be exercised, nor the value of the land so to be taken shall be ascertained.

Mr. COOPER of Wisconsin. Mr. Chairman, in view of the condition of public business, if the gentleman will permit me, I will move that the committee rise.

Mr. PERKINS. I do not yield the floor.

Mr. COOPER of Wisconsin. The gentleman from New York does not yield the floor; but I have just received a communication from the Speaker that it is necessary that important public business may be transacted. I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. GILLETT of Massachusetts, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2295 and had come to no resolution thereon.

SPEAKER PRO TEMPORE FOR EVENING SESSION.

The SPEAKER. The Chair designates as Speaker pro tempore for this evening's session the gentleman from Illinois, Mr. BOUTELL.

RETURN OF BILL TO SENATE.

The SPEAKER laid before the House the following Senate resolution; which was read, considered, and agreed to:

IN THE SENATE OF THE UNITED STATES, *June 25, 1902.*

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 3580) to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars into automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 917. An act for the relief of John H. McLaughlin—to the Committee on Claims.

S. 1206. An act for the relief of Frank J. Burrows—to the Committee on Military Affairs.

S. 4426. An act to authorize the Secretary of War to loan arms to the institutions having companies of the Boys' Brigade connected therewith—to the Committee on Military Affairs.

S. 4815. An act to grant certain lands to the South Platte Canal and Reservoir Company—to the Committee on the Public Lands.

S. 5228. An act for the purchase of a national forest reserve in the Southern Appalachian Mountains, to be known as the "National Appalachian Forest Reserve"—to the Committee on Agriculture.

S. 5329. An act authorizing the President to appoint Lieut. Commander William P. Randall, retired, United States Navy, a commander on the retired list—to the Committee on Naval Affairs.

S. 6016. An act for the suppression of train robbery in the Territories of the United States and elsewhere, and for other purposes—to the Committee on the Judiciary.

S. 6034. An act raising the rank of Chief Engineer David Smith on the retired list of the Navy—to the Committee on Naval Affairs.

S. 6117. An act for the relief of George Lea Febiger—to the Committee on War Claims.

S. 6119. An act to authorize the Pensacola, Alabama and Tennessee Railway Company to erect, maintain, and operate a railway bridge across the Alabama River in Wilcox County, in the State of Alabama—to the Committee on Interstate and Foreign Commerce.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message from the President of the United States was communicated to the House by Mr. B. F. BARNES, one of his secretaries, who announced that the President did, on the following dates, approve and sign bills and joint resolution of the following titles:

On June 23, 1902:

H. R. 5550. An act for the relief of W. C. Taylor.

On June 24, 1902:

H. J. Res. 200. Joint resolution amending "An act to increase the limit of cost of certain public buildings, to authorize the purchase of sites for public buildings, to authorize the erection and completion of public buildings, and for other purposes," approved June 6, 1902; and

H. R. 11725. An act to amend section 4139 and section 4314 of the Revised Statutes.

DISTRICT CODE.

The SPEAKER also laid before the House the following resolution of the Senate; which was read, considered, and agreed to:

IN THE SENATE OF THE UNITED STATES, *June 25, 1902.*

Resolved, That the Secretary be directed to request the House of Representatives to furnish to the Senate a duplicate engrossed copy of the amendment to the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia," the same having been lost or mislaid.

AGREEMENT WITH CHOCTAW AND CHICKASAW INDIANS.

The SPEAKER laid before the House the bill (H. R. 13172) to ratify and confirm an agreement with the Choctaw and Chickasaw

tribes of Indians, and for other purposes, with Senate amendments, which were read.

Mr. CURTIS. Mr. Speaker, I ask unanimous consent that the House disagree to the Senate amendments, and agree to the conference asked.

The SPEAKER. The gentleman does not need to ask unanimous consent, as this is a House bill with Senate amendments, which do not require consideration in Committee of the Whole House on the state of the Union.

Mr. CURTIS. Then I move that the House disagree to the Senate amendments, and agree to the conference asked.

The SPEAKER. The gentleman moves to disagree to the Senate amendments, and agree to the conference asked by that body.

The question was taken, and the motion was agreed to.

The SPEAKER. The Chair announces the following conferees: Mr. CURTIS, Mr. LACEY, and Mr. LITTLE.

ISTHMIAN CANAL.

Mr. HEPBURN. Mr. Speaker, I desire to present the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to House bill 3110, to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans, and also the statement.

The SPEAKER. The report and the statement both will be printed in the RECORD under the rule.

The report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 3110) to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same.

W. P. HEPBURN,
L. FLETCHER,
R. C. DAVEY,
Managers on the part of the House.

JOHN T. MORGAN,
M. A. HANNA,
A. B. KITTREDGE,
Managers on the part of the Senate.

The statement is as follows:

The effect of the action of the conferees, if approved by the House, will be to eliminate all of the provisions of the bill as passed by the House and enact into legislation all of the provisions of the Senate amendment.

TO REDEEM AND MAKE ALLOWANCE FOR INTERNAL-REVENUE STAMPS.

Mr. PAYNE. Mr. Speaker, I desire to present the conference report on the act to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps. I present the conference report and statement.

The SPEAKER. The report and statement will be printed in the RECORD, under the rule.

The report of the committee of conference is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6570) an act to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the Senate amendments Nos. 1, 2, 3, and 4, and agree to the same with an amendment as follows:

Strike out said Senate amendments and all of said bill (H. R. 6570) after line 6, page 1, and insert in lieu thereof the following:

"Excepting documentary and proprietary stamps issued under the act of June 13, 1898, which stamps may be redeemed as hereinbefore authorized, upon presentation prior to the 1st day of July, 1904;" so that said proviso shall read as follows: "*Provided further* That no claim for the redemption of or allowance for stamps shall be allowed unless presented within two years after the purchase of said stamps from the Government, excepting documentary and proprietary stamps issued under the act of June 13, 1898, which stamps may be redeemed as hereinbefore authorized, upon the presentation prior to the 1st day of July, 1904."

SERENO E. PAYNE,
JOHN DALZELL,
JAMES D. RICHARDSON,
Managers on the part of the House.

NELSON W. ALDRICH,
O. H. PLATT,
H. M. TELLER,
Managers on the part of the Senate.

The statement is as follows:

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6570) to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report:

The House managers recede from the disagreement to the Senate amendments and agree to the same with an amendment striking out all after line 6, page 1, of the House bill, and inserting new language, which is simpler in form and carries out exactly the provision and intention of the House in the original act.

SERENO E. PAYNE,
JOHN DALZELL,
JAMES D. RICHARDSON,
Managers on the part of the House.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

H. R. 13650. An act to correct the military record of James M. Olmstead;

H. R. 3323. An act granting a pension to Daniel L. Mallicoat;

H. R. 12299. An act granting a pension to William C. Roberts;

H. R. 10933. An act to provide for the erection, at Fredericksburg, Va., of the monument to the memory of Gen. Hugh Mercer, which was ordered by Congress on the 8th day of April, 1777, should be erected;

H. R. 3500. An act granting an increase of pension to Kate O. Phillips;

H. R. 14691. An act to authorize the construction of a pontoon bridge across the Missouri River in the county of Cass, in the State of Nebraska, and in the county of Mills, in the State of Iowa;

H. R. 12284. An act granting an increase of pension to George W. Shaw;

H. R. 10178. An act granting an increase of pension to Daniel Thomas;

H. R. 12648. An act to establish a regular term of United States district court in Roanoke City, Va., and for other purposes;

H. R. 6871. An act granting an increase of pension to Harman Scramlin;

H. R. 4556. An act to amend act entitled "An act to supplement existing laws relating to the disposition of lands, etc.," approved March 3, 1901;

H. R. 12800. An act granting an increase of pension to Horatio N. Whitbeck;

H. R. 14221. An act granting an increase of pension to Nancy J. McArthur;

H. R. 14111. An act to authorize the construction of a bridge across the Tennessee River, in the State of Tennessee, by the Harriman Southern Railroad Company;

H. R. 5315. An act granting an increase of pension to Orrin J. Wells; and

H. R. 12507. An act granting an increase of pension to Ebenezer W. Oakley.

RESERVING SPACE IN MEMBERS' GALLERY.

Mr. PAYNE. Mr. Speaker, I ask unanimous consent that seats may be reserved in the Members' gallery on Sunday morning next during the eulogies on our late colleague, the Hon. Amos J. Cummings, for a committee representing Typographical Union No. 6, of New York.

The SPEAKER. The gentleman from New York asks unanimous consent that the Doorkeeper be instructed to reserve seats in the members' gallery for the accommodation of members representing Typographical Union No. 6, of New York, who desire to attend the services on our late colleague, Mr. Cummings. Is there objection?

Mr. JONES of Virginia. I would like to suggest that the gentleman amend that request, so that it does not exclude members of the families of Mr. Cummings or Mr. Otey.

Mr. PAYNE. That is always done.

The SPEAKER. The Chair has assigned his private row to Mrs. Cummings.

Mr. JONES of Virginia. I understand some members of Major Otey's family will be here. I do not know how many there will be.

The SPEAKER. The Chair will be glad to make the same provision as is customary for members of the families of those interested in the services. Is there objection to the request of the gentleman from New York? The Chair hears none, and it is so ordered.

PROTECTION OF LIVES OF MINERS.

Mr. MOODY of Oregon. Mr. Speaker, I present the conference report and statement on the bill (H. R. 8327) to amend an act entitled "An act for the protection of the lives of miners in the Territories," for the purpose of having it printed in the RECORD under the rule.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 8327) entitled "An act to amend an act entitled 'An act for the protection of the lives of miners in the Territories,'" having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to same with amendment as follows: On page 1, line 8, of the bill, strike out "at a depth of 100 feet or more;" and the Senate agree to the same; and on page 2, line 19, after the word "currents," insert: "*Provided*, That all owners, lessees, operators of, or any other person having the control or management of any coal shaft, drift, slope, or pit in the Indian Territory, employing twenty or more miners to work in the same, shall employ shot firers to fire the shots therein. Said shots shall not be fired to exceed one per day, at 12 o'clock noon in cases where the miners work but half a day, and at 5 o'clock in the evening when the mine is working three-quarters or full time, and they shall not be fired until after all miners and other

employees working in said shafts, drifts, slopes, or pits shall be out of same;" and the Senate agree to the same.

MALCOLM A. MOODY,
CHARLES F. SCOTT,
Managers on the part of the House.
W. A. CLARK,
C. D. CLARK,
Managers on the part of the Senate.

The statement is as follows:

The effect of the agreement of the conferees will be:

First. To strike out the limitation as to "depth of 100 feet or more," thus making the law applicable to mines of any depth.

Second. The Senate amendments providing for sprinkling the mines or removing the dust is accepted by the House conferees.

Third. As to shot firing, the conferees agree to make that feature of the bill applicable to the Indian Territory only, in mines employing 20 men or more. The necessity for this provision exists chiefly in that Territory, and your conferees have deemed it best to accept this limitation.

MALCOLM A. MOODY.
CHAS. F. SCOTT.

CHANGE OF REFERENCE.

By unanimous consent, reference of the bill (S. 255) for the improvement of Mount Rainier National Park, in the State of Washington, was changed from the Committee on the Public Lands to the Committee on Appropriations.

LEAVE TO WITHDRAW PAPERS.

By unanimous consent, Mr. MICKEY was given leave to withdraw from the files of the House, without leaving copies, papers in the case of Robert G. Scroggs, Fifty-seventh Congress, no adverse report having been made thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. LEVER for ten days, on account of important business.

And then, the hour of 5 o'clock having arrived, the House, in pursuance of its previous order, took a recess until 8 o'clock in the evening.

EVENING SESSION.

The recess having expired, the House (at 8 o'clock p. m.) was called to order by Mr. BOUTELL as Speaker pro tempore.

The SPEAKER pro tempore. In pursuance of the order previously made, the House will now resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2295.

The House accordingly resolved itself into the Committee of the Whole House on the state of the Union, with Mr. MANN in the chair.

Mr. JONES of Virginia. Mr. Chairman, I move that the committee do now rise.

Mr. BOUTELL. Mr. Chairman, I would suggest that as there is no one here representing the chairman of the committee, it might be well for the Chair to ask if there is any member present who desires to speak.

Mr. JONES of Virginia. Mr. Chairman, I withdraw my motion for that purpose.

The CHAIRMAN. The Chair will ask if there is any gentleman present who desires to address the committee. If there is, the Chair will recognize him.

Mr. JONES of Virginia. Mr. Chairman, there seems to be no response. I renew my motion that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker pro tempore having resumed the chair, Mr. MANN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2295, and had come to no resolution thereon.

And then, on motion of Mr. JONES of Virginia (at 8 o'clock and 5 minutes p. m.), the House adjourned until 11 o'clock a. m. tomorrow.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. MARTIN, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 6138) to set apart certain lands in the State of South Dakota as a public park, to be known as the Wind Cave National Park, reported the same without amendment, accompanied by a report (No. 2676); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. LACEY, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 4616) to grant title to the town of Juneau, Alaska, of lands occupied for school purposes, and for other purposes, reported the same with amendment, accompanied by a report (No. 2677); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MONDELL, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 4617) to authorize a resurvey of certain lands in the State of Wyoming, and for other purposes, reported the same without amendment, accompanied by a report (No. 2678); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURKE of South Dakota, from the Committee on Indian Affairs, to which was referred the bill of the Senate (S. 2513) to ratify an agreement with the Lower Brule band of the Sioux tribe of Indians in South Dakota, and making appropriation to carry the same into effect, reported the same with amendment, accompanied by a report (No. 2679); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON, from the Committee on Rivers and Harbors, reported the bill of the House (H. R. 15258) authorizing Anton Brucken to construct locks and dams in Pond River, in the State of Kentucky, and to give the consent of Congress thereto, in lieu of the bill of the House H. R. 10521, accompanied by a report (No. 2680); which said bill and report were referred to the House Calendar.

Mr. MOODY of Oregon, from the Committee on Indian Affairs, reported the bill of the House (H. R. 15259) to authorize the Absentee Wyandotte Indians to select certain lands, and for other purposes, as a substitute in lieu of the bill of the House H. R. 10695, accompanied by a report (No. 2681); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. NEEDHAM, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 6148) providing for the resurvey of certain townships in San Diego County, Cal., reported the same without amendment, accompanied by a report (No. 2683); which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, Mr. DICK, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 2670) granting an honorable discharge to Eugene H. Ely, reported the same with amendment, accompanied by a report (No. 2682); which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 6756) granting a pension to James R. Keary, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. JENKINS: A bill (H. R. 15256) to appropriate $2,500 to mark battle sites—to the Committee on Appropriations.

By Mr. NEVIN: A bill (H. R. 15257) to cede jurisdiction over place on which the National Home for Disabled Volunteer Soldiers is located to the State of Ohio—to the Committee on Military Affairs.

By Mr. BURTON, from the Committee on Rivers and Harbors: A bill (H. R. 15258) authorizing Anton Brucken to construct locks and dams in Pond River, in the State of Kentucky, and to give the consent of Congress thereto, as a substitute in lieu of H. R. 10521—to the House Calendar.

By Mr. MOODY of Oregon, from the Committee on Indian Affairs: A bill (H. R. 15259) to authorize the Absentee Wyandotte Indians to select certain lands, and for other purposes, as a substitute in lieu of H. R. 10695—to the Union Calendar.

By Mr. STEVENS of Minnesota: A joint resolution (H. J. Res. 209) to authorize Charles Zueblin to remove from the Library of Congress plans prepared in connection with park system of District of Columbia—to the Committee on the Library.

By Mr. SULZER: A concurrent resolution (H. C. Res. 58) for a Congressional investigation of the transport system—to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mr. KEHOE: A bill (H. R. 15260) granting a pension to William Foster—to the Committee on Invalid Pensions.

By Mr. MERCER: A bill (H. R. 15261) granting an increase of pension to Louis Lowry—to the Committee on Invalid Pensions.

By Mr. NEVIN: A bill (H. R. 15262) to correct the military record of Christopher J. Sweetman—to the Committee on Military Affairs.

By Mr. RICHARDSON of Tennessee: A bill (H. R. 15263) granting an increase of pension to Sarah Waller—to the Committee on Pensions.

Also, a bill (H. R. 15264) to correct the military record of Dobson Johnson—to the Committee on Military Affairs.

By Mr. RIXEY (by request): A bill (H. R. 15265) for the relief of Priscilla J. Shipman, administratrix of the estate of John J. Shipman, deceased, for work done for and materials furnished to the District of Columbia—to the Committee on Claims.

By Mr. ROBB: A bill (H. R. 15266) for the relief of Anderson Coleman—to the Committee on War Claims.

By Mr. HENRY C. SMITH: A bill (H. R. 15267) granting a pension to Hattie Cutcher—to the Committee on Invalid Pensions.

By Mr. HAMILTON: A bill (H. R. 15268) for the relief of Elias Minnich—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALZELL: Petitions of Woman's Christian Temperance Union of Hoboken, and Sheet Metal Workers' Union No. 111, of Trenton, N. J., for increase of pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. FITZGERALD: Petition of American Association of Nurserymen, advocating the passage of House bill 10999, in favor of national quarantine of diseased and infected trees and plants—to the Committee on Agriculture.

By Mr. FOERDERER: Resolutions of the Commercial Exchange of Philadelphia, urging the passage of House bill 14022, to prevent interstate telegraph and telephone lines being used to promote gambling—to the Committee on the Judiciary.

Also, resolutions of the Trades' League of Philadelphia, Pa., favoring a bill to increase the efficiency of the foreign service of the United States, and to provide for the reorganization of the consular service—to the Committee on Foreign Affairs.

By Mr. GRAHAM: Petition of George W. Payne, of Philadelphia, Pa., urging the passage of Senate bill 1890, the per diem pension bill—to the Committee on Invalid Pensions.

Also, petition of Andrew Carnegie, Charles F. Adams, Carl Schurz, Edwin Burritt Smith, and Herbert Welsh, urging the appointment of a special committee to investigate the condition of affairs in the Philippine Archipelago—to the Committee on Insular Affairs.

By Mr. HILL: Petition of H. E. Northrop and others, of Danbury, Conn., in favor of House bill 178, for the reduction of the tax on alcohol—to the Committee on Ways and Means.

By Mr. HOWELL: Petition of Tin and Sheet Metal Workers' Union of Trenton, N. J., for increase of pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. KEHOE: Petitions of retail druggists of Ashland, Louisa, Maysville, and Catlettsburg, Ky., urging the reduction of the tax on alcohol—to the Committee on Ways and Means.

By Mr. KETCHAM: Resolution of Steam Engineers Union No. 105, of Poughkeepsie, N. Y., favoring the passage of the Grosvenor anti-injunction bill—to the Committee on the Judiciary.

By Mr. KNOX: Petition of the Second Corps of Cadets of the Massachusetts Volunteer Militia, of Salem, Mass., against the passage of House bill 11654—to the Committee on the Militia.

By Mr. LACEY: Petition of O. R. Corey and others, of Monroe County, Iowa, in favor of House bill 178, for the reduction of the tax on alcohol—to the Committee on Ways and Means.

Also, petition of T. M. Overlees and others, of Bartlesville, Ind. T., asking for the passage of the Cherokee treaty bill—to the Committee on Indian Affairs.

By Mr. MAYNARD: Petition of American Association of Nurserymen, advocating the passage of House bill 10999—to the Committee on Agriculture.

By Mr. NAPHEN: Resolutions of the city council of Fitchburg, Mass., indorsing House bill 6279, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. RICHARDSON of Tennessee: Papers to accompany House bill granting an increase of pension to Sarah Waller—to the Committee on Invalid Pensions.

By Mr. ROBB: Papers to accompany bill for the relief of Anderson Coleman—to the Committee on War Claims.

By Mr. RYAN: Resolutions of Buffalo Business Men's Central Council, and petitions of W. H. Barnhart and 100 other citizens of Buffalo, N. Y., favoring a bill to authorize the Mather Power Company to construct experimental span in Niagara River at Buffalo, N. Y.—to the Committee on Interstate and Foreign Commerce.

Also, petition of Roderick Smith, of Buffalo, N. Y., presenting a substitute for the Philippine bill now pending—to the Committee on Insular Affairs.

Also, petition of The American Association of Nurserymen, of Rochester, N. Y., asking for the passage of House bill 10999—to the Committee on Agriculture.

By Mr. STEVENS of Minnesota: Petition of many citizens of St. Paul, Minn., in favor of free beef, veal, pork, and mutton—to the Committee on Ways and Means.

SENATE.

THURSDAY, *June 26, 1902.*

Prayer by Rev. F. J. PRETTYMAN, of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. GALLINGER, and by unanimous consent, the further reading was dispensed with.

The PRESIDENT pro tempore. If there be no objecion, the Journal will stand approved.

LIST OF JUDGMENTS.

The PRESIDENT pro tempore laid before the Senate a communication from the Attorney-General, transmitting, in response to a resolution of the 23d instant, a list of judgments rendered against the Government by the circuit and district courts of the United States under the act of March 3, 1887, etc.; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

CLAIM OF THE STATE OF VERMONT.

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, the claim of the State of Vermont, amounting to $280,453.56, allowed by the Auditor for the War Department under appropriations, the balances of which have been exhausted or carried to the surplus fund, the certification being in lieu of the amount transmitted to the Senate on the 25th instant; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills:

A bill (S. 4776) to authorize the construction of a bridge across the Emory River, in the State of Tennessee, by the Tennessee Railway or its successors;

A bill (S. 5434) to authorize the city of Little Falls, Minn., to construct a wagon and foot bridge across the Mississippi River within the limits of said city; and

A bill (S. 6270) to amend an act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 13172) to ratify and confirm an agreement with the Choctaw and Chickasaw tribes of Indians, and for other purposes, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CURTIS, Mr. LACEY, and Mr. LITTLE managers at the conference on the part of the House.

The message also returned to the Senate in compliance with its request the bill (S. 3560) to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes, and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896.

The message further announced that the House had furnished to the Senate, in compliance with its request, a duplicate engrossed copy of the amendment of the Senate to the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia."

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the President pro tempore:

A bill (H. R. 3323) granting a pension to Daniel L. Mallicoat;

A bill (H. R. 3500) granting an increase of pension to Kate O. Phillips;

A bill (H. R. 4556) to amend act entitled "An act to supplement existing laws relating to the disposition of lands, etc., approved March 3, 1901;

A bill (H. R. 5315) granting an increase of pension to Orrin J. Wells;

A bill (H. R. 6871) granting an increase of pension to Harman Scramlin;

A bill (H. R. 10178) granting an increase of pension to Daniel Thomas;

A bill (H. R. 10933) to provide for the erection at Fredericksburg, Va., of the monument to the memory of Gen. Hugh Mercer, which was ordered by Congress, on the 8th day of April, 1777, should be erected;

A bill (H. R. 12284) granting an increase of pension to George W. Shaw;

A bill (H. R, 12299) granting a pension to William C. Roberts;

A bill (H. R. 12507) granting an increase of pension to Ebenezer W. Oakley;

A bill (H. R. 12648) to establish a regular term of United States district court in Roanoke city, Va., and for other purposes;

A bill (H. R. 12800) granting an increase of pension to Horatio N. Whitbeck;

A bill (H. R. 13650) to correct the military record of James M. Olmstead;

A bill (H. R. 14111) to authorize the construction of a bridge across the Tennessee River, in the State of Tennessee, by the Harriman Southern Railroad Company;

A bill (H. R. 14221) granting an increase of pension to Nancy J. McArthur; and

A bill (H. R. 14691) to authorize the construction of a pontoon bridge across the Missouri River, in the county of Cass, in the State of Nebraska, and in the county of Mills, in the State of Iowa.

PETITIONS AND MEMORIALS.

Mr. FOSTER of Washington presented a petition of the Chamber of Commerce of Seattle, Wash., praying for the enactment of certain legislation in behalf of the Territory of Alaska; which was referred to the Committee on Territories.

He also presented a petition of the Chamber of Commerce of Seattle, Wash., praying for the enactment of legislation providing for the election of a Delegate to Congress from the Territory of Alaska; which was referred to the Committee on Territories.

Mr. PLATT of New York presented a petition of sundry members of the Audubon Society of the State of New York of Poplar Ridge, Auburn, Orange, Belvedere, and Sherwood, all in the State of New York, praying for the enactment of legislation providing for the protection of game in Alaska, etc.; which was ordered to lie on the table.

Mr. HANSBROUGH presented a petition of sundry druggists of Fargo, N. Dak., praying for a reduction of the tax on alcohol; which was referred to the Committee on Finance.

Mr. FAIRBANKS presented a petition of the Grocers' Chemical Works, of Evansville, Ind., praying for the passage of the so-called pure-food bill; which was ordered to lie on the table.

He also presented a memorial of Cigar Makers' Local Union No. 54, of Evansville, Ind., remonstrating against the enactment of legislation providing for a reduction of 20 per cent on raw leaf tobacco; which was referred to the Committee on Finance.

He also presented a petition of the St. Joseph Valley Grange, No. 584, of South Bend, Ind., praying for the enactment of legislation providing for uniform mail boxes; which was referred to the Committee on Post-Offices and Post-Roads.

BOWERS HYDRAULIC DREDGE PATENTS.

Mr. McCUMBER. I present the statements of Clarence W. De Knight and Lysander Hill, made before the Committee on Patents, United States Senate, Friday, June 20, 1902, on the application for extension of the Bowers hydraulic dredge patents. I move that the statements be printed as a document.

The motion was agreed to.

REPORTS OF COMMITTEES.

Mr. BERRY, from the Committee on Commerce, to whom was referred the bill (S. 6281) to provide for the leasing of water power created by public works, reported it with an amendment, and submitted a report thereon.

Mr. QUARLES, from the Committee on the Census, to whom was referred the joint resolution (H. J. Res. 182) authorizing the Director of the Census to compile statistics relating to irrigation, reported it without amendment, and submitted a report thereon.

Mr. MASON, from the Committee on Commerce, to whom was referred the bill (H. R. 11987) relating to transportation of dutiable merchandise at subports of Tacoma and Seattle, State of Washington, reported it without amendment.

He also, from the same committee, reported an amendment proposing to appropriate $25,000 for the improvement of the Ohio River between Cairo and Mound City, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations.

Mr. WARREN. I report from the Committee on Claims sixteen bills, one amendment, and three joint resolutions, and ask that they be postponed indefinitely, as they have been provided for otherwise.

The bills, amendment, and joint resolutions were postponed indefinitely, as follows:

A bill (S. 3198) for the relief of the firm of Zeno Secor or its legal representatives;

A bill (S. 4058) for the relief of Sarah K. T. Baker;

A bill (S. 1710) for the relief of J. V. Davis;

A bill (S. 1213) to grant jurisdiction and authority to the Court of Claims in the case of Southern Railway Lighter No. 10, her cargoes, etc.;

A bill (S. 3088) for the relief of Julia A. Thomas, administratrix of the estate of I. S. O. G. Greer, deceased;

A bill (S. 572) for the relief of R. M. Probstfield;

A bill (S. 871) for the relief of the New Orleans and Bayou Sara Mail Company, of New Orleans, La.;

A bill (S. 3197) for the relief of Secor & Co., Perine, Secor & Co., and the firm of Zeno Secor or its legal representatives;

A bill (S. 105) for the relief of the heirs of C. C. Moore, deceased;

A bill (S. 1746) for the relief of the Globe Works, of Boston, Mass.;

A bill (S. 2956) for the relief of Francis King;

A bill (S. 3070) to pay the findings of the Court of Claims in certain French spoliation claims;

A bill (S. 5190) for the relief of J. B. Roberson, administrator of the estate of J. P. Roberson, deceased;

A bill (S. 1884) for the relief of the legal representatives of Tomlinson & Hartupee & Co.;

A bill (S. 1240) for the relief of John K. Nutt, administrator of Haller Nutt, deceased;

A bill (S. 355) for the relief of Henry R. Walton, administrator of John Walton, deceased;

A joint resolution (S. R. 29) authorizing the Secretary of the Treasury to ascertain, allow, and pay the claims of the several States for all moneys by them actually paid to aid the General Government in maintaining the national defense when carrying on the war of the rebellion;

A joint resolution (S. R. 14) in relation to the claims of the States of Ohio, Michigan, Illinois, and Indiana against the Government of the United States;

A joint resolution (S. R. 10) authorizing and directing the Secretary of the Treasury to pay certain claims of the State of Indiana; and

An amendment submitted by Mr. TURNER, relative to the claim of the heirs or legal representatives of Charles P. Culver, intended to be proposed to the sundry civil appropriation bill.

Mr. BEVERIDGE. from the Committee on Territories, to whom was referred the bill (S. 5422) authorizing the county of Maricopa, Territory of Arizona, to issue bonds for the construction of reservoirs and dams for water storage, and for other purposes, reported it with amendments.

SHOAL IN NORTH RIVER, NEW YORK HARBOR.

Mr. PERKINS. I am directed by the Committee on Commerce, to whom was referred the joint resolution (S. R. 120) providing for the removal of shoal in North River of New York Harbor, to report it favorably without amendment and to ask unanimous consent for its immediate consideration.

The Secretary read the joint resolution, and, by unanimous consent, the Senate, as in Committee of the Whole, proceeded to its consideration.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DAVID H. JARVIS, ELLSWORTH P. BERTHOLF, AND SAMUEL J. CALL.

Mr. HANNA. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 11019) directing the Secretary of the Treasury to bestow medals upon First Lieut. David H. Jarvis, Second Lieut. Ellsworth P. Bertholf, and Samuel J. Call, surgeon, all of the Revenue-Cutter Service, to report it favorably without amendment and to ask for its immediate consideration.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration. It directs the Secretary of the Treasury to bestow a gold

medal of honor, of such design as he may approve, upon First Lieut. David H. Jarvis, Second Lieut. Ellsworth P. Bertholf, and Dr. Samuel J. Call, surgeon, all of the Revenue-Cutter Service and members of the overland expedition of 1897 and 1898 for the relief of the whaling fleet in the arctic regions, in recognition of the heroic service rendered by them in connection with that expedition, and appropriates $1,000 for the purchase or manufacture of the medals.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FORT STEVENS NATIONAL MILITARY PARK.

Mr. PLATT of New York, from the Committee on Printing, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That 500 copies of the letter, June 2, 1902, from the Fort Stevens Lincoln National Military Park Association, with the appendices A, B, C, and D, all in explanation of the object of the association as contemplated by Senate bill No. 4476, Fifty-seventh Congress, first session, to establish a national military park at the battlefield of Fort Stevens, in the District of Columbia, be printed for the use of the Senate.

JOHN MARBLE.

Mr. GALLINGER. The bill (H. R. 3519) granting an increase of pension to John Marble was mislaid in the committee room. It is a bill in behalf of a blind soldier, and is the last report that will be made from the Committee on Pensions at this session. I report the bill back favorably without amendment, and ask that it may be considered.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to place on the pension roll the name of John Marble, late of the United States steamships *Ohio*, *Cohasset*, and *Ceres*, United States Navy, and to pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTION INTRODUCED.

Mr. PLATT of New York introduced a bill (S. 6287) for the relief of Theodore R. Timby; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Patents.

Mr. BLACKBURN introduced a bill (S. 6288) for the relief of Alex. Kennedy; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. MARTIN introduced a bill (S. 6289) for the relief of Harrison Capp; which was read twice by its title, and, with the accompany papers, referred to the Committee on Claims.

Mr. GAMBLE introduced a bill (S. 6290) to extend the provisions of section 2455 of the Revised Statutes of the United States as amended by act of February 26, 1895, relating to public lands; which was read twice by its title, and referred to the Committee on Public Lands.

Mr. MCENERY introduced the following bills; which were each read twice by their titles, and referred to the Committee on Claims:

A bill (S. 6291) for the relief of the estate of George C. Pearce, deceased; and

A bill (S. 6292) for the relief of the estate of John Norwood, deceased.

Mr. FORAKER introduced a joint resolution (S. R. 123) for the relief of Naval Cadet William Victor Tomb, United States Navy; which was read twice by its title, and referred to the Committee on Naval Affairs.

AMENDMENT TO THE DEFICIENCY APPROPRIATION BILL.

Mr. CLAY submitted an amendment proposing to appropriate $6,014.60 for payment of final judgment, including cost of suit, of Georgia Venable Construction Company *v.* The United States, rendered in the United States circuit court, northern district of Georgia, etc., intended to be proposed by him to the general deficiency appropriation bill; which was ordered to lie on the table.

CLAIMS OF MAIL CARRIERS.

Mr. BERRY submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved by the Senate, That the Postmaster-General be directed to send to the Senate the number of items and the total amount due to individuals for carrying the mails prior to May 1, 1861, in cases where the Confederate records on file in the Department fail to show payment by the Confederate Government.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I move that the Senate proceed to the consideration of the deficiency appropriation bill.

Mr. PENROSE. I ask unanimous consent that a bridge bill may be taken up and passed. It will take but a moment. It is to provide for a bridge over the Monongahela River, and I want to have it pass the House to-morrow. I hope the Senator from Maine will let the bill be called up.

Mr. HALE. Let me get up the deficiency appropriation bill.

Mr. PENROSE. All right. I will then renew the request.

The PRESIDENT pro tempore. The Senator from Maine moves that the Senate proceed to the consideration of the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

Mr. HALE. I ask that the formal reading be dispensed with, and that the amendments of the committee be acted upon as they are reached.

The PRESIDENT pro tempore. The Senator from Maine asks unanimous consent that the formal reading of the bill be dispensed with, that it be read for amendment, and that the committee amendments shall first receive consideration. Is there objection? The Chair hears none, and it is so ordered.

Mr. PENROSE. I ask the Senator from Maine to yield to me to have a bridge bill passed. It will take only a minute, and I want to get it through the House to-morrow.

Mr. HALE. If it takes no time I will yield.

Mr. PENROSE. It will not take any time.

Mr. HALE. Very well.

MONONGAHELA RIVER BRIDGE.

Mr. PENROSE. I ask the Senate to proceed to the consideration of the bill (S. 4611) to authorize the West Elizabeth and Dravosburg Bridge Company to construct and maintain a bridge across the Monongahela River, in the State of Pennsylvania.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported from the Committee on Commerce with an amendment, in section 5, page 4, line 18, after the word "purposes," to insert:

And equal privileges in the use of said bridge shall be granted to all telegraph and telephone companies.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DEFICIENCY APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes.

The Secretary proceeded to read the bill. The first amendment of the Committee on Appropriations was, under the head of "Department of State," on page 2, after line 9, to insert:

To pay certain claims of British and German subjects growing out of the seizure of the British schooners E. R. Nickerson and Wary during the late war with Spain, as set forth in Senate Document No. 396 of the present session, $6,605.

The amendment was agreed to.

The next amendment was, on page 2, after line 15, to insert:

To meet the pro rata part of the United States, under the agreement at the Second International American Conference, held in the city of Mexico during the year 1901, for the purpose of purchasing the complete edition of 1,200 copies of the Dictionary of Construction and Rules of the Spanish Language, fiscal year 1903, $4,246.

The amendment was agreed to.

The next amendment was, under the subhead "Foreign intercourse," on page 4, after line 7, to insert:

For additional amount for the salary of the United States consul at Odessa, Russia, for the fiscal year 1903, $500.

The amendment was agreed to.

The next amendment was, on page 4, after line 10, to insert:

That the appropriations made in the act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1903, approved March 22, 1902, for the pay of the envoy extraordinary and minister plenipotentiary to Austria, and the secretaries of the legations to Austria, are hereby made applicable and payable to the ambassador extraordinary and minister plenipotentiary and secretaries for said embassy for Austria, and may be used for the pay of the ambassador of Austria and the secretaries of said embassy.

The amendment was agreed to.

The next amendment was, on page 4, after line 21, to insert:

To pay John C. White for services rendered as chargé d'affaires ad interim of the United States at Rio de Janeiro, Brazil, from December 23, 1878, to March 27, 1879, inclusive, and from April 11, 1880, to June 30, 1880, inclusive, $2,030.63.

The amendment was agreed to.

The next amendment was, under the head of "Treasury Department," on page 9, after line 2, to insert:

For construction of a steel ferryboat to run between Ellis Island and the Battery, New York, to be paid out of the immigrant fund, $80,000.

The amendment was agreed to.

The next amendment was, on page 9, after line 16, to insert:

Enforcement of the Chinese-exclusion act: To prevent unlawful entry of Chinese into the United States by the appointment of suitable officers to enforce the laws in relation thereto, and for expenses of returning to China all Chinese persons found to be unlawfully in the United States, including the cost of imprisonment and actual expense of conveyance of Chinese persons to the frontier or seaboard for deportation, $15,000.

The amendment was agreed to.

The next amendment was, on page 11, after line 2, to insert:

Pan-American Exposition: To John G. Milburn, of Buffalo, N. Y., as trustee, for the payment of certain creditors of the Pan-American Exposition Company, $500,000; the claims against said company to be paid pro rata by said Milburn as trustee aforesaid being for labor, material, services, and other expenses incident thereto and attending the work of said exposition. None of this money shall be paid to any stockholder of said corporation as a dividend upon such stock, nor to pay any claim against said company secured by mortgage, nor to any holder of bonds or securities of said company on account of said bonds or securities, nor shall any payment be made for rents of said grounds or for the restoration of the same. The said Milburn as trustee shall file with the Secretary of the Treasury a report giving the names of the creditors so paid and the respective amounts and on what account, accompanied with a voucher, under oath, showing the furnishing of such labor, material, services, and other expenses as aforesaid, and the payment therefor by said trustee. The unexpended balance, if any, shall be returned by said trustee to the Treasury with said report, which shall be filed within one year after said appropriation shall be paid to said trustee. In case of the death, resignation, or removal of said trustee, the circuit court of the United States for the western district of New York shall, upon application of any interested party, appoint a successor who shall discharge said trust.

The said trustee or his successor may be required by the Secretary of the Treasury to give a bond to be approved by him for the faithful discharge of said trust hereby created.

Mr. BAILEY. Mr. President, is it in order to move an amendment? Is the bill being read for amendment now?

The PRESIDENT pro tempore. It is not. Unanimous consent was given that the committee amendments should first receive consideration.

Mr. HALE. There will be an opportunity when we get through with the committee amendments.

Mr. BAILEY. I simply want to protest against that kind of a provision.

The PRESIDENT pro tempore. If an amendment was to be proposed to an amendment——

Mr. HALE. That of course is in order.

The PRESIDENT pro tempore. It would be in order.

Mr. HALE. If the Senator wants to move to amend the amendment, of course he can do so.

Mr. BAILEY. Probably, if there is any place in the United States which under all the circumstances would be entitled to this kind of a provision by Congress it would be Buffalo. Not only did her enterprising citizens provide a great exposition there at a loss, but the overwhelming calamity that came upon the entire Republic in the assassination of President McKinley fell with peculiar effect upon this exposition. But my judgment is when cities or individuals engage in an undertaking of this kind they ought to take the chances of loss and of profit. Nobody believes that if they had realized a handsome profit upon their investment they would have been tendering any portion of it to the Government of the United States. Neither does anybody believe that having incurred a loss the Congress of the United States ought to make it good.

For ten years in the other House of Congress I have been protesting against appropriations for purposes like this. I declared, I remember, in the first contest over it, that we would reach a time when there would scarcely be two years without an exposition in some part of the country. We reached it earlier than I expected. We have reached it, and I simply want to record my prediction now, that if Congress pays the deficiency provided for in this bill in the case of the Buffalo Exposition and the Charleston Exposition, it will be called upon to meet a very much greater deficiency in the great exposition which is to be held at the city of St. Louis.

If it is to be the policy of the Government that everybody who wants to hold an exposition can get Congressional appropriations for that purpose, and if, when they fail to meet their expenses, they can then return to Congress and procure appropriations to cover the deficiencies, let the country understand it.

I am exceedingly loath to make this point against the Buffalo Exposition. I know the men who were identified with it; I know they have borne their part as well as men could have done under the circumstances; but it is a principle with me. I believe this is a gross misapplication of public funds, and it can not pass without, at least, a protest on my part and a vote against it.

Mr. HALE. Mr. President, I am very glad the Senator has said what he has so well. This is undoubtedly a great departure from what in the olden days anybody thought would be done. My consolation in all that I have done in this matter is that I think the fate of this exposition and the fate of the Charleston Exposition has been such that it will dissuade the cities of the country from the mad pursuit they have been engaged in for expositions. They start with the theory that it would be of great advantage to the towns where they are to be held, and then they ask Congress to give them a kind of national and international character by inviting foreign powers to participate, and when in compliance with that importunity we do that, the next step is that they claim we are committed to it as a Government exposition.

Now, the Committee on Appropriations has gone through all this so many times that it is worn out with the whole subject-matter. In the first place, we ought not again in a generation to take any part whatever in any of these expositions. As I have said, I hope the fate of these two will deter subsequent enterprises of this kind.

The committee put in this provision for two reasons. It does not make any difference in the amount of money whether you appropriate originally as a gift or appropriate afterwards as a deficiency. The Senate last year provided for $500,000 additional to this exposition in the spirit of liberality that had led it to be very liberal to the St. Louis Exposition, but the House struck it out and we could not get it in conference. If we had done as the Senate had then decided unanimously to give it to them they would have had the money and would not have been here now. Therefore in reckoning up amounts the Committee on Appropriations saw that it was no more than the Senate had already committed itself to.

Then, of course, there was the other patent reason—the tragic event in Buffalo, which overshadowed not only the country, but the world, and prostrated this exposition. It was not the fault of the Government; it did not make a legal claim upon the Treasury; but, in connection with the fact that we had already provided for $500,000, as I have said, beforehand as a gift, it appealed to the Senate committee very strongly that we should put it on.

We have guarded it and have left the expenditure of the money in the hands of a very eminent man in Buffalo, Mr. Milburn, who was the president, and who, I will say, after we had drafted the amendment and put it into his hands, telegraphed down that he preferred that we should add to the provision one making him accountable to the Treasury and submit vouchers and returns, and also asking that we put him under bonds, as is usual in such cases. The committee did not propose to do that, having so much confidence in him, but we complied with his request, and have provided that he shall account to the Treasury, make his returns there for this money, show how it has been expended, and if there is any balance pay it back; and that he shall also give bonds, as disbursing officers do who are intrusted with Government money.

So we have in the details guarded it as well as we can, and we have been influenced by this consideration. My opinions are in entire accord with those of the Senator from Texas. There is no real claim here in law, perhaps not in equity, but rather in sympathy, and, as I have said, there is the hope that this will be the end of this kind of business. I think it will.

Mr. SPOONER. Is there any language in the amendment, I ask the Senator, which would distinguish it from the ordinary deficit, so as to take it out from being a precedent which is to be followed hereafter? The assassination of the President at Buffalo undoubtedly, as the Senator says, had a very detrimental effect upon the exposition. That was an event which it is to be hoped and expected is absolutely unique and will not occur again. I should like to suggest to the Senator whether, if it be possible to put it in a law upon this peculiar ground, it would not be wise to do it?

Mr. HALE. The committee considered that, and we thought we would not embody anything of that kind in the bill, but let it be seen, as it will be, and remembered of all men hereafter, that that is one great reason. The other reason is a pretty strong one.

Mr. SPOONER. What will be remembered hereafter will be the appropriation to make up the deficit. I think the Senator from Texas is quite right. But I shall vote for this proposition. One reason why I shall vote for it is because I suppose it will be taken as a sort of understanding that hereafter the Government will not assume the ultimate expense and deficit, and that may be a satisfactory argument against embarking in any more of these expositions.

Mr. HALE. That is what I hope.

Mr. TELLER. Mr. President, I agree with the Senator from Texas as to these appropriations, and it was with great reluctance that I assented as a member of the committee to this item. But this is an exceptional case. If it has ever been justifiable for the Government to assist in these expositions, it is certainly justifiable that the Government should assist now in paying some of the expenses that will fall heavily and cruelly upon a certain portion of the community where this fair was held.

I am not a special friend of expositions. I think the experience in Buffalo will be beneficial, because I think it will retard other communities from trying them. The fair at Buffalo would undoubtedly have been a success but for the unfortunate occurrence

of the assassination of the President. Up to that time the fair was a promising one, but immediately upon the assassination the people of the United States were so horror-stricken with that terrible catastrophe that nobody wanted to go there. It is a fact that not only did the attendance immediately fall off—that is, people did not go—but people who had gone there intending to remain for some considerable time immediately departed from the city.

I have some acquaintances at Buffalo. I was brought up in the neighborhood of that city and I know a great many people there. The universal testimony is that the boarding houses and hotels which had been full of people and trains that were loaded with people coming in were in three or four days entirely emptied. It entailed a tremendous loss on the community, and the men who had taken hold of this enterprise with a zeal and courage that are commendable when they attempt such a thing have suffered an immense loss. They have not paid all of the debts, and the committee felt that there were certain classes of debts that ought to be paid by the Government. As we made an appropriation of $500,000 which they did not get, we felt that under the circumstances we ought to put this provision in the bill. I believe it is one of those things which we ought to do, and then we ought to quit this kind of business.

Mr. BAILEY. Mr. President, if I could be sure that the hope of the Senator from Maine and of the Senator from Colorado is a well-founded one, that cities hereafter would be deterred by the failure of this and other expositions from attempting to hold more, I should be reconciled to the appropriation carried by this bill. I am afraid, however, if we advise these ambitious citizens that when they undertake an exposition and fail we will provide for their deficiencies we rather encourage than discourage them.

There is now only one more exposition recognized and provided for by the law of Congress. It is to celebrate a great event in the history of this country, and, as I believe, in the progress of the world. I sincerely hope that, inasmuch as that exposition has been undertaken, it will be a great success, and then I as sincerely hope that Congress will not again in fifty years authorize another enterprise of this kind.

Mr. HALE. I shall be glad to join with the Senator, and I know the Senator from Wisconsin [Mr. SPOONER] will join with us if he is here, as I hope he will be, in meeting these cases at the threshold, in limine, and in some way disconnect the Government from any exposition whatever. We have had enough of them. Our fault has been in encouraging them in the beginning, in taking the first step. That is the dangerous step.

Mr. SPOONER. Somebody prophesied here once that the holding of these expositions would get to be an industry.

Mr. HALE. Yes.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Appropriations was, on page 12, after line 6, to insert:

South Carolina Interstate and West Indian Exposition: For the payment of legal claims against the South Carolina Interstate and West Indian Exposition Company for labor, articles, and services rendered to said company for the work of said exposition, or for the reimbursement of any officer of said company who has advanced money or paid such claims, $160,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 13, after line 10, to insert:

Payment to Chamberlain, Delany & Scott: To enable the Secretary of the Treasury to pay Chamberlain, Delany & Scott, of the city of Richmond, State of Virginia, the sum of $1,704.46, the amount provided for by the act approved June 3, 1902, it now appearing that all appropriations for the Marblehead light-house have been exhausted.

The amendment was agreed to.

The next amendment was, on page 14, line 8, after the word "cents," to insert "Maj. Dan C. Kingman, $10.30; Capt. Charles L. Potter, $79.65," and in line 9, before the word "cents," to strike out "five hundred and fourteen dollars and eighty-two" and insert "six hundred and four dollars and seventy-seven;" so as to make the clause read:

Credit in accounts of certain officers, Corps of Engineers: Authority is hereby granted to the accounting officers of the Treasury to allow and credit in the accounts of certain officers of the Corps of Engineers, United States Army, amounts standing against them on the books of the Treasury, as follows: Lieut. Col. W. H. H. Benyaurd, $29.70; Maj. F. A. Mahan, $15; Capt. C. H. McKinstry, $9.22; Lieut. Col. O. H. Ernst, $435.04; Maj. Dan C. Kingman, $10.30; Capt. Charles L. Potter, $79.65, and Capt. Henry S. Taber, $1,025.86; in all, $1,604.77.

The amendment was agreed to.

The next amendment was, on page 14, after line 20, to insert:

Relief of estate of George Lea Febiger: The estate of George Lea Febiger, late first lieutenant, Thirty-third United States Infantry Volunteers, is hereby relieved from accountability for subsistence funds in the sum of $129.38, that being the amount of such funds with which he was charged and for which he was accountable on October 24, 1900, on which date he was killed in action.

The amendment was agreed to.

The next amendment was, on page 15, line 21, after the word "to," to insert "and loss of time of;" in line 24, before the word "dollars," to strike out "six hundred and twenty-four" and insert "one thousand three hundred and forty-four;" so as to make the clause read:

Reimbursement to the Independent Line Steamers, of Tampa, Fla.: To pay to the Independent Line Steamers, of Tampa, Fla., in full settlement of all claims said steamer line may have against the United States for damages to and loss of time of the steamer Manatee, due to a collision with the U. S. S. Hillsboro, in Tampa Bay, Florida, on the night of November 18, 1901, $1,344.18.

The amendment was agreed to.

The next amendment was, on page 16, after line 2, to insert:

Reimbursement to John and David West: To pay to John and David West, of Cathlamet, Wash., as reimbursement in full of all damages to their dock in the Columbia River at said Cathlamet by the U. S. dredge W. S. Ladd, as set forth in House Document No. 437 of the present session, $88.50.

The amendment was agreed to.

The next amendment was, on page 16, after line 9, to insert:

Reimbursement to owners of Belgian steamer Ragner: To reimburse the owners of the Belgian steamer Ragner for damages sustained in consequence of a collision of the Army transport Sumner in Manila Bay, as found by United States Consul-General John Goodnow at Shanghai, China, arbitrator, $8,524.10.

The amendment was agreed to.

The next amendment was, on page 16, line 21, to increase the appropriation "to defray the expenses of collecting the revenue from customs," on account of the fiscal year 1902, from $50,000 to $150,000.

The amendment was agreed to.

The next amendment was, on page 17, after line 10, to insert:

PUBLIC BUILDINGS.

For rental of temporary quarters for the accommodation of certain Government officials at Springfield, Ill., during the fiscal year 1903, $2,500.

The amendment was agreed to.

The next amendment was, on page 17, after line 15, to insert:

To pay Rand, McNally & Co., for repairs and improvements to the quarters in Chicago, Ill., occupied as subtreasury and internal-revenue offices, $1,145.

The amendment was agreed to.

The next amendment was, on page 17, after line 19, to insert:

ENGRAVING AND PRINTING.

The Secretary of of the Treasury is hereby authorized and directed to transfer the sum of $56,670 of the unexpended balance to the credit of each of the following appropriations, namely: Compensation of employees, Bureau of Engraving and Printing, 1902, and plate printing, Bureau of Engraving and Printing, 1902, to the appropriation for materials and miscellaneous expenses, Bureau of Engraving and Printing, 1902, and to use the sum so transferred as though it had been originally appropriated for the purposes of said appropriation for materials and miscellaneous expenses, Bureau of Engraving and Printing, 1902.

The amendment was agreed to.

The next amendment was, under the subhead "Revenue Cutter Service," on page 19, after line 9, to insert:

To pay Guy N. Stockslager for services performed for the months of August, September, and October, 1900, at the request of Lieut. D. H. Jarvis, Revenue-Cutter Service, acting special agent of the Treasury Department, in assisting him in investigating the condition and taking care of the Eskimos who were sick and dying along the coast near Cape Nome, Alaska, at a salary of $200 per month, $600.

The amendment was agreed to.

The next amendment was, under the subhead "Government in the Territories," on page 22, after line 5, to insert:

Territory of Hawaii: To pay in part the awards rendered under an act of the legislative assembly of the Territory of Hawaii by the fire claims commission of that Territory for property destroyed in the suppression of the bubonic plague in said Territory in the years 1899 and 1900, $1,000,000. And the governor and secretary of said Territory are hereby authorized to issue the bonds of that Territory in such sum, not exceeding $500,000, as, together with the money hereby appropriated, may be sufficient to pay all of said awards. Said bonds shall be payable in gold coin of the United States of America of the present standard weight and fineness, shall bear interest at the rate of 4 per cent per annum, payable semiannually, and be redeemable in not less than five years and payable in not more than fifteen years from the date of issuance. The principal and interest of all bonds shall be exempt from any and all taxes, and the payment thereof shall constitute a charge on the revenues of the Territory of Hawaii. Said bonds shall be sold at not less than their face value, and the proceeds thereof shall be applied to the payment of the awards aforesaid and to no other purpose, and they shall be of such form and denominations and be issued and sold under such rules and regulations as the Secretary of the Interior shall prescribe. Under no circumstances shall any claimant, or anyone claiming through him, be required to pay, nor shall any attorney or agent be entitled to charge, demand, or receive, directly or indirectly, more than 10 per cent upon the amount recovered as compensation for services or labor of any kind or character in the prosecution or establishment of the claim, and in cases of contracts or agreements providing for payment of less than 10 per cent the payment shall not be increased above the percentage so agreed upon. Before any such award shall be paid hereunder, the governor of said Territory must certify that the same is genuine and was duly rendered in pursuance of the act of the legislative assembly of the Territory; and the payment of said awards shall be in full satisfaction and discharge of any and all claims or demands against said Territory or the United States on account of any property destroyed in the said suppression of the bubonic plague.

The amendment was agreed to.

The next amendment was, under the head of "District of Columbia," on page 25, after line 3, to insert:

For contingent expenses, being an additional amount required for the office of the superintendent of insurance, including rent, furniture, stationery, printing, books, law books, books of reference, and periodicals, and other general necessary expenses of his office, $300.

The amendment was agreed to.

The next amendment was, on page 27, line 21, to increase the appropriation for the electrical department of the District of Columbia from $2,000 to $2,644.46.

The amendment was agreed to.

The next amendment was, on page 28, after line 22, to insert:

Indexing code of the District: To pay Edwin C. Brandenburg for indexing the code of laws for the District of Columbia, $500.

The amendment was agreed to.

The next amendment was, on page 29, line 15, after the word "payment," to strike out:

Also the sum of $7,246.81 interest allowed by the court, on the claim of the Camden Iron Works, from February 27, 1888, to the date when judgment was rendered.

So as to make the clause read:

Judgments: For payment of the judgments, including costs, against the District of Columbia, set forth in House Documents Nos. 586 and 613, of this session, $24,763.11, together with a further sum to pay the interest, at not exceeding 4 per cent, on said judgments, as provided by law, from the date the same became due until the date of payment.

The amendment was agreed to.

The next amendment was, under the head of "War Department," on page 32, after line 21, to insert:

Statement of receipts and expenditures in Cuba and the Philippine Islands: To enable the Secretary of War to employ temporary force and to pay all necessary expenses, including rent of rooms not to exceed $1,500, in compiling for the information of Congress a detailed statement of the receipts and expenditures by the military government of Cuba since May 1, 1900, in continuation and completion of the statement heretofore furnished of such receipts and expenditures covering the period from the beginning of American occupation to and including April 30, 1900; and to enable the Secretary of War to pay all necessary expenses in compiling for the information of Congress a similar statement relating to the Philippine Islands of all receipts and expenditures from the date of American occupation, $30,000, or so much thereof as may be necessary, to be available until expended.

The amendment was agreed to.

The next amendment was, on page 33, after line 13, to insert:

Deposit of certain military stores funds: All funds received as the value of military stores transferred by the several staff departments of the Army to the insular government of the Philippines shall be deposited in the Treasury of the United States and remain available during the fiscal year 1903.

The amendment was agreed to.

The next amendment was, on page 33, after line 22, to insert:

Reimbursement of the Illinois Central Railroad Company: For reimbursing the Illinois Central Railroad Company for damages to the roof of the Union Depot and train shed at Seventh and River streets, Louisville, Ky., by blasting operations conducted by the Government in connection with the improvement of the Ohio River, $60.82.

The amendment was agreed to.

The next amendment was, on page 37, after line 4, to insert:

Governors Island, N. Y.: For continuing the enlargement of Governors Island by construction of wharf, dredging, bulkhead, and filling, $200,000; and for the erection of storehouses and other necessary buildings, in accordance with the plan reported by a board composed of Maj. Gen. John R. Brooke, Col. George L. Gillespie, and Col. Amos S. Kimball, dated July 21, 1900, $60,000; in all, $260,000, to be available during the fiscal year 1903.

The amendment was agreed to.

The next amendment was, on page 37, after line 14, to insert:

Payment to the North American Transportation and Trading Company: For payment to the North American Transportation and Trading Company, Seattle, Wash., for Barge No. 3 and eight warehouse trucks wrecked October 17, 1900, while in service of the United States under impressment at St. Michael, Alaska, receiving supplies from Government transports, $4,564.80.

The amendment was agreed to.

The next amendment was, on page 37, after line 23, to insert:

For payment to the North American Transportation and Trading Company, Seattle, Wash., of actual cost of damage sustained by their sailing vessel Mary Ann in collision with the U. S. S. Jeff. C. Davis, formerly the Du Chesnay, at Fort St. Michael, Alaska, July 21, 1900, $405.

The amendment was agreed to.

The next amendment was, on page 38, after line 4, to insert:

For payment to the North American Transportation and Trading Company, Seattle, Wash., for supplies purchased from said company by Capt. W. P. Richardson, Eighth United States Infantry, for the relief of destitute Indians at Fort Yukon, Alaska, in March, April, and May, 1899, as detailed in House Document No. 341, Fifth-sixth Congress, second session, $189.

The amendment was agreed to.

The next amendment was, on page 38, after line 13, to insert:

Payment to the Alaska Commercial Company: For payment to the Alaska Commercial Company, San Francisco, Cal., for 1 model barge, wrecked October 22, 1900, while in the service of the United States by authority of the commanding general, Department of Alaska, by whom pressed into service for the purpose of bringing ashore the main winter supply of coal for Fort St. Michael, Alaska, $5,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 21, to insert:

To pay E. A. McIlhenny in full compensation for rescuing, housing, feeding, clothing, and caring for shipwrecked sailors in the Arctic Ocean, in the years 1897 and 1898, $4,785.55.

The amendment was agreed to.

The next amendment was, on page 40, after line 12, to insert:

NAVAL ESTABLISHMENT.

GENERAL ACCOUNT OF ADVANCES.

To reimburse "General account of advances," created by the act of June 19, 1878, for amounts advanced therefrom and expended on account of the several appropriations named in excess of the sums appropriated therefor, for the fiscal year given, found to be due the "general account" on adjustment by the accounting officers, there is appropriated as follows:

For emergency fund, Navy Department, 1899, $135.19.
For emergency fund, Navy Department, January 1, 1899, $918.54.
For pay of the Navy, 1897, $84.65.
For pay of the Navy, 1896, $7.60.
For contingent, Navy, 1901, $1,022.12.
For contingent, Navy, 1898 and 1899, $240.08.
For fuel, Marine Corps, 1901, $2,063.20.
For transportation and recruiting, Marine Corps, 1900, $2,867.44.
For contingent, Marine Corps, 1901, $3,924.23;
For contingent, Marine Corps, 1898 and 1899, $4.16;
For transportation, recruiting, and contingent, Bureau of Navigation, 1901, $2,410.42;
For transportation, recruiting, and contingent, Bureau of Navigation, 1900, $2,001.03;
For transportation, recruiting, and contingent, Bureau of Navigation, 1898 and 1899, $58.53;
For repairs, Bureau of Ordnance, 1901, $8,199.48.
For equipment of vessels, Bureau of Equipment, 1900, $17,460.66.
For equipment of vessels, Bureau of Equipment, 1898 and 1899, $138.10.
For contingent, Bureau of Equipment, 1898 and 1899, $24.
For maintenance, Bureau of Yards and Docks, 1901, $15,248.68.
For Medical Department, Bureau of Medicine and Surgery, 1898 and 1899, $20.95.
For Medical Department, Bureau of Medicine and Surgery, January 1, 1899, $10;
For contingent, Bureau of Medicine and Surgery, 1901, $3,462.45;
For contingent, Bureau of Medicine and Surgery, 1900, $855.27;
For contingent, Bureau of Medicine and Surgery, 1898–99, $83.95;
For provisions, Navy, Bureau of Supplies and Accounts, 1898–99, $107.55;
For provisions, Navy, Bureau of Supplies and Accounts, 1898, $27;
For contingent, Bureau of Supplies and Accounts, 1898–99, $13.90;
For steam machinery, Bureau of Steam Engineering, 1898–99, $4,197.61;
For steam machinery, Bureau of Steam Engineering, 1898, $8;
For repairs and preservation, Bureau of Yards and Docks, 1901, $34,046.22; in all, $99,641.01.

The amendment was agreed to.

The next amendment was, on page 48, after line 21, to insert:

Bureau of Supplies and Accounts: That the sum of $1,000,000 of the unexpended balance of the appropriation of $3,000,000 under "Provisions, Navy," made by the act approved March 3, 1899, for the fiscal year 1900, is hereby reappropriated, and the accounting officers of the Treasury are hereby authorized and directed to transfer said amount to the naval supply fund.

The amendment was agreed to.

The next amendment was, on page 49, after line 4, to insert:

Bureau of Steam Engineering: Steam machinery, 1900: To pay balance due under contract for boilers for the United States steamer *Raleigh*, $6,000.

The amendment was agreed to.

The next amendment was, on page 49, after line 8, to insert:

Naval Academy: For building and furnishing additional temporary quarters and recitation rooms for cadets, to be available for the fiscal year 1903, $20,000.

The amendment was agreed to.

The next amendment was, on page 50, after line 5, to insert:

For payment of per diem to enlisted men detailed on extra duty as clerks, messengers, etc., in the offices at headquarters, United States Marine Corps, Washington, D. C., and the office of the assistant quartermaster, United States Marine Corps, Philadelphia, Pa., less the 20 per centum war increase already paid, from April 26, 1898, to May 25, 1900, inclusive, $2,702.96.

The amendment was agreed to.

The next amendment was, on page 51, after line 5, to insert:

The Auditor for the Navy Department is hereby authorized and directed to credit on voucher No. 780, second quarter, 1900, in favor of the New York and Cuba Mail Steamship Company, for the transportation of 1 officer and 37 enlisted men of the Marine Corps, from Habana, Cuba, to New York in August, 1899, amounting to $1,098, the sum of $278 for quarantine fees.

The amendment was agreed to.

The next amendment was, on page 51, after line 15, to insert:

To reimburse Passed Assistant Paymaster Webb V. H. Rose amount paid for injuries inflicted by the United States steamship Monterey and checked against his accounts by the accounting officers of the Treasury, $45.58.

The amendment was agreed to.

The next amendment was, on page 51, after line 20, to insert:

To reimburse Paymaster Livingston Hunt amount paid for an injury to a gondola car, No. 8144, belonging to the Philadelphia, Wilmington and Baltimore Railroad Company, damaged by sinking while on board a Government barge near the wharf at Indian Head, $98.73.

The amendment was agreed to.

The next amendment was, on page 52, after line 2, to insert:

To reimburse Pay Inspector James A. Ring amount paid for repairs of the mainsail of schooner Solano checked against his accounts by the accounting officers of the Treasury, $23.64.

The amendment was agreed to.

The next amendment was, on page 52, after line 6, to insert:

To reimburse W. G. Drees and W. J. Hansford for clothing lost, namely:
W. G. Drees, $22.45.
W. J. Hansford, $19.01.

The amendment was agreed to.

The next amendment was, on page 53, after line 23, to insert:

Maps prepared in the General Land Office: That the $14,840 appropriated by the act approved April 17, 1900, for the connected and separate United States and other maps prepared in the General Land Office of the United States, which appropriation was made available for expenditure during the fiscal year 1902 by the act approved March 3, 1901, be, and the same is hereby, made available for expenditure during the fiscal year 1903; and that the $14,840 appropriated by act of Congress approved March 3, 1901, for the connected and separate United States and other maps prepared in the General Land Office be, and the same is hereby, made available for expenditure during the fiscal year 1903.

The amendment was agreed to.

The next amendment was, on page 55, after line 13, to insert:

To reimburse Dallas Jones, Edward Minor, and Edward Poindexter for expenses and loss incurred in consequence of injuries received by the fall of a temporary roof over the Supreme Court chamber, Capitol, at $250 each, $750.

The amendment was agreed to.

The next amendment was, on page 57, line 3, after the word "on," to insert "or after;" so as to make the proviso read:

And provided further, That the disbursing clerk of the Census Office may pay out of the census fund on or after June 30, 1902, to employees of the office who are not to be reappointed on July 1, for whatever leave of absence the Director of the Census may, in his discretion, allow them, not to exceed, however, the annual leave authorized by existing law.

The amendment was agreed to.

The next amendment was, on page 57, after line 21, to insert:

Improvement of Mount Rainier National Park, Washington: For protection and improvement of the park and repairing and extension of roads, to be expended under the supervision of the Secretary of the Interior, to continue available during the fiscal year 1903, $2,000.

The amendment was agreed to.

The next amendment was, on page 58, line 6, after the word "park," to strike out "construction of fences and trails;" and in line 24, before the word "thousand," to strike out "three" and insert "two;" so as to make the clause read:

Improvement of the Crater Lake National Park, Oregon: For protection and improvement of the park and repairing and extension of roads, to be expended under the supervision of the Secretary of the Interior, to continue available during the fiscal year 1903, $2,000.

The amendment was agreed to.

The next amendment was, on page 58, after line 17, to insert:

Payment to Roland C. Nichols: For payment to Roland C. Nichols, late receiver of public moneys and special disbursing agent at the land office at Peavey, Alaska, the difference between the amount of salary at the rate of $1,500 per annum, certified by the Commissioner of the General Land Office as due to him from July 1, 1900, to May 31, 1901, and the amount allowed and paid him in the settlement of his account for said period by the Auditor for the Interior Department, $1,339.72.

Tha amendment was agreed to.

The next amendment was, on page 59, after line 3, to insert:

Payment to Albert E. Rose: For payment to Albert E. Rose, late register of the land office at Peavey, Alaska, the difference between the amount of salary at the rate of $1,500 per annum, certified by the Commissioner of the General Land Office as due him from July 1, 1900, to May 31, 1901, and the amount allowed and paid him in the settlement of his account for said period by the Auditor for the Interior Department, $1,339.72.

The amendment was agreed to.

The next amendment was, on page 64, after line 2, to insert:

To pay R. F. Pettigrew, administrator of the estate of Frederick W. Pettigrew, deceased, balance due on surveying contract No. 136, dated August 1, 1898, $320.45.

The amendment was agreed to.

The next amendment was, on page 67, after line 11, to insert:

Yellowstone National Park: For the purchase of buffalo for the Yellowstone National Park, construction of a wire fence, and other suitable inclosure therefor, and the purchase of necessary feed for the herd for one year, $20,000, to be expended under the supervision of the Secretary of the Interior, and to continue available during the fiscal year 1903.

The amendment was agreed to.

The next amendment was, on page 67, after line 19, to insert:

Surveys of Indian reservations: For survey of the Walker River Reservation, Nev., $17,500; for survey of the Uintah Reservation, Utah, $128,000; for survey of the Spokane Reservation, Wash., $11,500; for allotment of lands to Indians on the Walker River Reservation, Nev., $4,000; for allotment of land to Indians on the Uintah Reservation, Utah, $12,000; for allotment of land to Indians on the Spokane Reservation, Wash., $2,000; in all, $175,000, to continue available during the fiscal year 1903.

The amendment was agreed to.

The next amendment was, on page 70, after line 11, to insert:

To reimburse Horace M. Rebok, formerly Indian agent for the Sac and Fox tribe in Iowa, and W. G. Malin, Indian agent for said tribe, for costs and expenses of defending suits brought in the United States circuit court at Cedar Rapids, Iowa, on behalf of Y. Ta Tah Wah, a tribal Indian, against said Rebok and Malin, respectively, for damages for false imprisonment, $725.24.

The amendment was agreed to.

The next amendment was, under the head of "Post-Office Department," on page 71, after line 4, to insert:

To enable the Postmaster-General to pay Katie A. Nolan balance of salary due her as a stamp clerk in the post-office at San Antonio, Tex., from July 1, 1889, to July 1, 1893, $800.

The amendment was agreed to.

The next amendment was, under the head of "Department of Justice," on page 73, after line 10, to insert:

For miscellaneous expenditures, including telegraphing, fuel, lights, foreign postage, labor, repairs of building and care of grounds, books of reference, periodicals, and other necessaries, directly ordered by the Attorney-General, fiscal year 1901, $346.09.

The amendment was agreed to.

The next amendment was, on page 75, after line 13, to insert:

For the payment of W. N. Landers for clerical services rendered in the office of the United States district attorney for the district of Alaska, second division, from July 24, 1900, to April 15, 1901, inclusive, at the rate of $2,400 per annum, $1,748.87.

The amendment was agreed to.

The next amendment was, on page 75, after line 20, to insert:

For the payment of Herman D. Crow for legal services rendered the United States from October 5 to October 10, inclusive, 1901, during the illness of the United States district attorney for the district of Washington, $100.

The amendment was agreed to.

The next amendment was, under the head of "Legislative," on page 81, after line 13, to insert:

For the purchase from Prof. Francis N. Thorpe of manuscript for a new edition of charters, constitutions, and organic laws of all the States, Territories, and colonies now or heretofore forming the United States, and any acts of Congress relating thereto, prepared by him, $10,000: *Provided*, That he shall prepare a complete index of the work, and do all proof reading in connection with the preparation, printing, and publication thereof; and the Public Printer shall print and bind 6,000 copies of the work, of which 2,000 copies shall be for the use of the Senate and 4,000 copies for the use of the House of Representatives.

The amendment was agreed to.

The next amendment was, at the top of page 82, to insert:

For the purchase of the manuscript index of discussions of the United States Congress, 1789 to 1902, in three parts, by William A. Peffer, now in preparation, $5,000: *Provided*, That $1,000 of this amount shall be immediately available, and hereafter proportional payments may be made for the several parts of the index when completed to the satisfaction of the Librarian of Congress, and upon his certificate thereof.

The amendment was agreed to.

The next amendment was, on page 82, after line 9, to insert:

SENATE.

For compensation of the officers, clerks, messengers, and others in the service of the Senate, namely: Sixteen pages for the Senate Chamber, at the rate of $2.50 per day each during the session, $1,240, for the fiscal year 1903.

The amendment was agreed to.

The next amendment was, on page 82, after line 16, to insert.

To reimburse the official reporters of the proceedings and debates of the Senate for expenses incurred from March 4, 1901, to March 4, 1902, for clerk hire and other extra clerical services, $3,990.

The amendment was agreed to.

The next amendment was, on page 82, after line 22, to insert:

To pay Paul Cockerille for services as a laborer in the Senate folding room in November, 1899, $17.61.

The amendment was agreed to.

The next amendment was, at the top of page 83, to insert:

To pay R. G. Proctor for indexing and for extra services as clerk to the Committee on the Philippines, $500.

The amendment was agreed to.

The next amendment was, on page 83, after line 3, to insert:

To pay J. H. Jones for extra services in the care of the Senate chronometer and for the work in connection therewith, $100 for the first session of the Fifty-seventh Congress.

The amendment was agreed to.

The next amendment was, on page 83, after line 7, to insert:

To enable the Secretary of the Senate to pay the persons who performed the work of arranging and preparing the copy for and indexing the Executive Journals of the Senate from March 4, 1869, to March 3, 1891, $4,800, which sum may be expended as additional pay or compensation to any officer or employee of the United States.

The amendment was agreed to.

The next amendment was, on page 83, after line 15, to insert:

To pay to A. H. Howe, for expenses incurred and for services in compiling and indexing the records, briefs, and arguments of counsel in the insular cases in the October term of the Supreme Court of the United States, 1900, including appendixes, provided for in House concurrent resolution of February 15, 1901, Fifty-sixth Congress, second session, the sum of $1,000.

The amendment was agreed to.

The next amendment was, on page 83, after line 23, to insert:

To pay Dennis M. Kerr, for services as assistant clerk, by detail, to the Committee on Pensions, $750.

The amendment was agreed to.

The next amendment was, on page 84, after line 2, to insert:

To pay John H. Walker, for extra services as clerk to the Committee on Pensions, $500.

The amendment was agreed to.

The next amendment was, on page 84, after line 4, to insert:

To enable the Committee on Claims to prepare a record and index of private claims introduced in the Senate during the Fifty-sixth and Fifty-seventh Congresses, with a view of reporting the same to the Senate at the beginning of the next session of Congress, $1,200, to be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee; and said sum, or any part thereof, in the discretion of the chairman, may be paid as additional compensation to any officer or employee of the United States.

The amendment was agreed to.

The next amendment was, under the subhead "House of Representatives," on page 87, after line 4, to insert:

To C. E. Wilson, $2,000.

The amendment was agreed to.

The next amendment was, on page 87, after line 5, to insert:

To F. R. Lassiter, $2,000.

The amendment was agreed to.

The next amendment was, on page 87, line 7, to increase the total appropriation for allowance to contestants and contestees for expenses incurred by them in contested election cases, as

audited and recommended by the Committee on Elections of the House of Representatives, from $35,223.05 to $39,223.05.

The amendment was agreed to.

The next amendment was, on page 90, after line 7, to insert:

To enable the Clerk of the House of Representatives to pay to George W. Nichols, father of Charles C. Nichols, deceased, the expenses of the last illness and burial of the said Charles C. Nichols in a sum not exceeding $250, and the further sum of $360, being six months' pay at the rate of compensation received by him at the time of his death as a laborer under the Doorkeeper; in all, $610.

The amendment was agreed to.

The next amendment was, on page 90, after line 15, to strike out:

For compiling, under the direction of the House Committee on the Judiciary, of the constitutions with all amendments thereto, and of the organic acts and enabling acts of the several States and Territories of the United States, $1,000.

The amendment was agreed to.

The next amendment was, under the head of "Judgments, Court of Claims," on page 91, line 24, after the word "ninety-two," to insert "and Senate Document No. —;" and on page 92, line 3, before the word "*Provided*," to strike out "$71,474.53" and insert "$236,578.87;" and in line 5, after the word "expired," to insert:

And provided further, That settlement of the judgment in the case of the State of Pennsylvania shall be made by the Auditor for War Department.

So as to make the clause read:

For the payment of the judgments rendered by the Court of Claims, reported to Congress at its present session in House Document No. 592, and Senate Document No. —, $236,578.87: *Provided*, That none of the judgments herein provided for shall be paid until the right of appeal shall have expired: *And provided further*, That settlement of the judgment in the case of the State of Pennsylvania shall be made by the Auditor for War Department.

The amendment was agreed to.

The next amendment was, under the head of "Judgments, United States courts," on page 93, line 14, after the word "sixty," to insert "and Senate Document No.—;" so as to make the clause read:

For payment of the final judgments and decrees, including costs of suit, which have been rendered under the provisions of the act of March 3, 1887, entitled "An act to provide for the bringing of suits against the Government of the United States, certified to Congress at its present session by the Attorney-General, in House Documents Nos. 593 and 660 and Senate Document No. — of this session, and which have not been appealed, $922.60, together with such additional sum as may be necessary to pay interest on the respective judgments at the rate of 4 per cent per annum from the date thereof until the time this appropriation is made: *Provided*, That none of the judgments herein provided for shall be paid until the right of appeal shall have expired.

Mr. HALE. On page 93, lines 16 and 17, strike out the words "nine hundred and twenty-two dollars and sixty cents" and insert "seventeen thousand and sixty-two dollars."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 94, after line 2, to insert:

JUDGMENTS IN INDIAN DEPREDATION CLAIMS.

For payment of judgments rendered by the Court of Claims in Indian depredation cases, certified to Congress at its present session in Senate Document No. —, $449,416; said judgments to be paid after the deductions required to be made under the provisions of section 6 of the act approved March 3, 1891, entitled "An act to provide for the adjustment and payment of claims arising from Indian depredations," shall have been ascertained and duly certified by the Secretary of the Interior to the Secretary of the Treasury, which certification shall be made as soon as practicable after the passage of this act, and such deductions shall be made according to the discretion of the Secretary of the Interior, having due regard to the educational and other necessary requirements of the tribe or tribes affected, and the amounts paid shall be reimbursed to the United States at such times and in such proportions as the Secretary of the Interior may decide to be for the interests of the Indian Service: *Provided*, That no one of said judgments provided in this paragraph shall be paid until the Attorney-General shall have certified to the Secretary of the Treasury that there exists no grounds sufficient, in his opinion, to support a motion for a new trial or an appeal of said cause.

Mr. HALE. On page 94, line 6, fill in the number by inserting "423."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 95, line 15, after the word "fifty-nine," to insert "and Senate documents Nos. —;" so as to make the section read:

SEC. 2. That for the payment of the following claims, certified to be due by the several accounting officers of the Treasury Department under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1899 and prior years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in House documents Nos. 589, 654, and 659, and Senate documents Nos. —, reported to Congress at its present session, there is appropriated as follows:

Mr. HALE. In section 2, page 95, line 16, strike out "Documents" and insert "Document," and fill the blank by inserting "425."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading was continued to line 22 on page 98.

Mr. BERRY. There are a number of State claims provided for, some put in by the House and some added by the Senate Committee on Appropriations, for repayment to States for expenses incurred during the war. I wish to ask the Senator from Maine whether in making up those accounts these States were allowed the difference between the value of gold and greenbacks at that time, or whether there are any items either for interest or principal in which allowance is made for that difference.

I will state to the Senator from Maine that I asked the chairman of the Committee on Appropriations, the Senator from Iowa, the question, and he stated that he was not sure, but that he would ascertain from the Secretary of the Treasury whether any such sum was included in the amounts that are to be paid to these States. If the Senator from Maine can give me the information, I should like to have it.

Mr. HALE. I have examined all the papers as far as I can and I have no doubt whatever that there is nothing of that kind included. In fact if there had been the amount would be four times what it is. We never have provided for that difference in any case where a claim has been allowed, and we ought not to do it.

Mr. BERRY. I am glad to hear the Senator say so. The reason why I asked the question was that at the last Congress when the matter was discussed in the Committee on Appropriations it was alleged that these States gave bonds of the State payable in gold and the Government in reimbursing them ought to pay them the difference between the premium on gold and the value of greenbacks at that time. As I stated before, the Senator from Iowa said he was not sure, but upon the assurance of the Senator from Maine of course I have nothing more to say in regard to it.

Mr. FAIRBANKS. The Senator from Maine is quite right. I am familiar with these claims. None of these items, so far as I am advised, embrace the difference between paper currency and gold.

The reading was resumed. The next amendment was under the subhead "Claims allowed by the Auditor for the War Department," on page 99, after line 2, to insert:

To the State of Vermont, $291,408.56.

Mr. HALE. There is a correction to be made in the amendment. There is a mistake in the amount. I move to strike out "$291,408.56" and to insert "$280,453.56."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 99, after line 4, to insert:

The accounting officers of the Treasury are authorized to reopen and adjust the claims of Pennsylvania, Maine, New Hampshire, and Rhode Island on the basis of like claims of other States herein provided for.

The amendment was agreed to.

The reading of the bill was concluded.

Mr. HALE. I move as additional matter, which has come in from the Department, to insert what I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 103, after line 22, insert as an additional section the following:

SEC. 3. That for the payment of the following claims, certified to be due by the several accounting officers of the Treasury Department, under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1899 and prior years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in Senate Document No. —, reported to Congress at its present session, there is appropriated as follows:

CLAIMS ALLOWED BY THE AUDITOR FOR THE TREASURY DEPARTMENT.

For contingent expenses, Treasury Department, freight, telegrams, etc., 97 cents.
For pay of assistant custodians and janitors, $4.89.

CLAIMS ALLOWED BY THE AUDITOR FOR THE NAVY DEPARTMENT.

For emergency fund, Navy Department, $27.
For pay of the Navy, $670.80.

For pay, Marine Corps, $222.52.
For provisions, Navy, Bureau of Supplies and Accounts, $4.50.
For destruction of clothing and bedding for sanitary reasons, $5.80.
For indemnity for lost property, naval service, act March 2, 1895, $566.48.
For indemnity for lost clothing, $356.54.
For enlistment bounties to seamen, $646.66.

CLAIMS ALLOWED BY THE AUDITOR FOR THE INTERIOR DEPARTMENT.

For investigation of pension cases, Pension Office, $159.30.
For protecting public lands, timber, etc., $37.86.
For surveying public lands, $1,855.39.
For support of Sioux, Medawakanton band, $5.28.
For payment to Edward Leader, a Chickasaw Indian, for stock stolen from him by Comanche Indians in 1886, $2,153.34.
For Army pensions, $97.

CLAIMS ALLOWED BY THE AUDITOR FOR THE STATE AND OTHER DEPARTMENTS.

STATE DEPARTMENT.

For salaries, consular service, $3,783.52.
For contingent expenses, United States consulates, $1.83.
For relief and protection of American seamen, $22.60.

DEPARTMENT OF AGRICULTURE.

For general expenses, Weather Bureau, $9.63.

DEPARTMENT OF JUSTICE.

For fees of clerks, United States courts, $510.95.
For fees of witnesses, United States courts, $100.
For fees of commissioners, United States courts, $1,893.30.
For fees of jurors, United States courts, $32.
For support of prisoners, United States courts, $86.
For pay of bailiffs, etc., United States courts, $145.
For miscellaneous expenses, United States courts, $399.

CLAIMS ALLOWED BY THE AUDITOR FOR THE POST-OFFICE DEPARTMENT.

For rent, light, and fuel, $10.
For free-delivery service, $13.33.
For inland mail transportation (star), $25.44.
For advertising, $54.30.
For limited indemnity for lost registered mail, $16.25.

The amendment was agreed to.

Mr. HALE. From the committee I offer the following amendment. On page 16, after line 16, I move to insert:

Payment to the Mobile and Ohio River Railroad Company: To pay the Mobile and Ohio River Railroad Company balance for transportation, as ascertained by the findings of the Court of Claims rendered on the 19th day of February, 1901, $14,443.93.

The amendment was agreed to.

Mr. HALE. To correct a mistake, on page 17, after line 19, I move to insert:

For the continuation of post-office building at Muncie, Ind., under the present limit, $10,000, in addition to the amount heretofore appropriated.

The amendment was agreed to.

Mr. HALE. On page 34, after line 5, I move to insert:

Rivers and harbors: For the improvement of the Ohio River between Cairo and Mound City, $25,000, to continue available during the fiscal year 1903, and to be expended only if, in the opinion of the Secretary of War, an emergency exists making such an expenditure necessary.

The amendment was agreed to.

Mr. HALE. On page 55, after line 18, I move to insert:

To reimburse Joshua W. Barkley for expenses and loss incurred in consequence of injuries received during the work of remodeling the old Congressional Library and changing same to committee rooms, $250.

The amendment was agreed to.

Mr. HALE. On page 81, after line 12, I move to insert:

To enable the Secretary of the Treasury to pay the unpaid expenses incurred on account of the last illness and death of President McKinley, including compensation of physicians, $45,000, or so much thereof as may be necessary: *Provided*, That the Secretary shall pay only such expenses and services as he shall determine are just and reasonable and were necessary. All accounts shall be presented to him within two months from the date of the approval of this act, and no payment shall be made to any officer or employee of the Government for personal or professional services.

The amendment was agreed to.

Mr. HALE. On page 84, line 10, after the word "paid," I move to strike out in the amendment already agreed to the words "from the contingent fund of the Senate."

The amendment was agreed to.

Mr. HALE. In line 14, page 84, after the words "United States," I move to add the words "and to be available during the fiscal year 1903."

The amendment was agreed to.

The PRESIDENT pro tempore. The bill is still open to amendment as in Committee of the Whole.

Mr. JONES of Arkansas. I offer an amendment, to come in after line 7, on page 81.

The SECRETARY. On page 81, after line 7, insert:

That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay to Mary E. Parker the sum of $5,000, out of any money in the Treasury not otherwise appropriated, in full compensation for extra services rendered to the United States by her husband, I. C. Parker, deceased, late judge of the United States district court for the western district of Arkansas.

The amendment was agreed to.

Mr. GALLINGER. I offer an amendment to come in under the head of "District of Columbia." I will simply say that it passed the Senate at the present session in the shape of a bill, and I hope the Senator from Maine will allow it to go in.

Mr. HALE. Let the amendment be read.

The SECRETARY. On page 32, after line 15, insert:

To pay to Elizabeth L. W. Bailey, of Washington, D. C., administratrix of the estate of Davis W. Bailey, deceased, the sum of $10,519.20, and the lawful interest thereon from the 18th day of July, 1892, the day on which the award for that sum was made in favor of said administratrix and against said District and filed in the supreme court of the District of Columbia by J. J. Johnson, the arbitrator, to whom had been mutually submitted for arbitration by him, by the said Commissioners and the said administratrix, the case then pending and untried in said court between said administratrix as plaintiff and the District of Columbia as defendant, known and designated upon the calendar of said court as No. 24279, instituted therein for the recovery of damages by the plaintiff from the said defendant for alleged breach of contract by the said defendant for laying asphalt pavements in said District, and being the amount afterwards found and returned by the verdict of the jury upon a trial in said court involving the validity of said award, and upon which verdict judgment was duly entered in said court for said sum of $10,519.20, besides costs, and which said judgment was in all things afterwards by the court of appeals of the District of Columbia affirmed, upon an appeal taken thereto by the said District, and which said judgment was afterwards reversed by the Supreme Court of the United States, upon appeal taken thereto by said District, solely upon a question of law in no way involving or affecting the merits of said judgment or said case. That one-half of said sum so awarded and the interest as aforesaid shall be paid out of the revenues of the said District of Columbia and one-half from the Treasury of the United States; and a sum sufficient to pay the same is hereby appropriated, out of any money in the Treasury not otherwise appropriated.

Mr. HALE. That is a claim. I must make the point of order on it.

The PRESIDENT pro tempore. The Chair sustains the point of order.

Mr. PRITCHARD. I offer an amendment, which I send to the desk.

The SECRETARY. On page 21, after line 16, insert:

To pay Calvin J. Cowles, late assayer in charge of the United States assay office at Charlotte, N. C., the sum of $1,500 per annum for services as such from July 1, 1875, to October 16, 1876.

Mr. HALE. That is subject to a point of order.

Mr. PRITCHARD. I think not, because it is to pay an unpaid balance due as a salary. It seems to me that it properly belongs to this bill and ought to go in.

Mr. HALE. No; it is a claim. The committee considered it and rejected it on account of being a claim for salary when the salary did not by law apply.

The PRESIDENT pro tempore. The Chair is obliged to sustain the point of order.

Mr. HALE. I am obliged to make these points, Mr. President.

Mr. CLAY. I offered an amendment to the bill to come in on page 29. I have just conferred with the Senator in charge of the bill, and he informs me that the item of $6,014 in favor of the Georgia Venable Construction Company has already been inserted in the bill this morning. If that be true, I desire to withdraw the amendment. I think that is correct. I ask the Senator from Maine if it is not.

Mr. GALLINGER. In this connection, if that has been done, I should like to ask the Senator in charge of the bill if it was not a private claim.

Mr. CLAY. It was not a private claim. It was a judgment rendered in the circuit court for the northern district of Georgia after trial. A judgment was rendered in favor of the Georgia Venable Construction Company for six thousand and fourteen dollars and some cents besides costs. The case was reported to the Department of Justice, and after thorough investigation the Department of Justice declined to recommend an appeal, and the Attorney-General has recommended that the claim be paid.

Mr. HALE. The case was not put in the bill by the committee, because we had not received the document at the time the bill was reported. It came in afterwards, and was included in the bill, being a judgment.

Mr. CLAY. I am informed that several other judgments of a similar nature were inserted in the bill.

Mr. MORGAN. I desire to offer an amendment. I am trying to find the right place. I will offer the amendment and locate the place afterwards.

Mr. HALE. Let us hear what the amendment is.

Mr. MORGAN. It is an amendment to pay Mrs. C. A. Darling $5,683. It was reported by the Committee on War Claims of the House. It has been very often reported to the Senate, and has passed both Houses at different times.

Mr. HALE. I am very sorry, but I shall have to make the same point of order with that that I have made on the others. It is undoubtedly a good claim; but it is a claim, and therefore can not go on this bill.

Mr. MORGAN. I hope the Senator will waive the point of order, because if we do not pay the poor old woman, who is now dying really of starvation, we shall have to pay the sum to her administrator after she is dead and gone. I want her to get the benefit of it.

Mr. HALE. Other Senators about me, against whom I have just made the point of order, appeal to me, and as I have made the point against their amendments I must make it in this case. There is no discretion on my part in the matter.

Mr. MORGAN. I do not know what latitude the Senator gives.

The PRESIDENT pro tempore. The Chair sustains the point of order.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ACCOUNTS OF ARMY OFFICERS.

Mr. ALDRICH. I desire to enter a motion to reconsider the vote by which the bill (S. 2341) to authorize the readjustment of the accounts of Army officers in certain cases, and for other purposes, was passed yesterday. I move that the House of Representatives be requested to return the bill to the Senate. It is a bill relating to longevity pay for officers of the Army, involving several million dollars. I did not know the character of the bill when it was passed.

The PRESIDENT pro tempore. The motion to reconsider will be entered. The Senator from Rhode Island moves that the House be requested to return the bill to the Senate.

The motion was agreed to.

ABANDONED PROPERTY IN INSURRECTIONARY DISTRICTS.

Mr. MONEY. I move to take up for consideration Senate bill 362.

Mr. ALDRICH. What is the nature of the bill?

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The title will be read.

The SECRETARY. A bill (S. 362) to revive and amend an act to provide for the collection of abandoned property and the prevention of frauds in the insurrectionary districts within the United States, and acts amendatory thereof.

The PRESIDING OFFICER. The question is on the motion of the Senator from Mississippi to proceed to the consideration of the bill the title of which has just been read.

Mr. ALDRICH. Let the bill be read for information.

The PRESIDING OFFICER. The bill will be read for the information of the Senate.

The Secretary read the bill.

Mr. ALDRICH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Rhode Island suggests the absence of a quorum, and the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Deboe,	Lodge,	Pettus,
Bacon,	Dillingham,	McCumber,	Platt, Conn.
Bailey,	Dryden,	McEnery,	Platt, N. Y.
Bard,	Fairbanks,	McLaurin, Miss.	Quarles,
Bate,	Foraker,	McMillan,	Quay,
Berry,	Foster, Wash.	Mason,	Spooner,
Beveridge,	Gallinger,	Millard,	Taliaferro,
Blackburn,	Gamble,	Money,	Teller,
Burnham,	Heitfeld,	Morgan,	Tillman,
Burton,	Jones, Ark.	Nelson,	Warren,
Clapp,	Kean,	Patterson,	Wellington,
Clay,	Kittredge,	Perkins,	Wetmore.

The PRESIDING OFFICER. Forty-eight Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from Mississippi [Mr. MONEY].

Mr. SPOONER. Mr. President, I am quite aware that debate is not in order upon this motion, but I want to ask the Senator from Mississippi whether he wishes this bill taken up in order to have it voted upon or only in order to submit remarks upon it.

Mr. MONEY. I wish to have the bill taken up for consideration, Mr. President. It has been on the Calendar for three years, with six or eight favorable reports, with no adverse report, and no minority report——

Mr. ALDRICH. Debate is out of order, Mr. President. I ask that the vote be taken by yeas and nays on the motion to take up the bill.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. PLATT of Connecticut (when Mr. HAWLEY'S name was called). I wish to state that my colleague [Mr. HAWLEY] is absent on account of indisposition, and will be absent for the remainder of the session. By an arrangement between the Senator from Utah [Mr. RAWLINS] and the Senator from Ohio [Mr. HANNA], my colleague will stand paired with the Senator from Utah, and the Senator from Ohio will be at liberty to vote.

Mr. MCCUMBER (when his name was called). I have a pair with the junior Senator from Louisiana [Mr. FOSTER], and therefore refrain from voting.

Mr. TALIAFERRO (when Mr. MALLORY'S name was called). My colleague [Mr. MALLORY] is absent from the city. He has a general pair with the senior Senator from Vermont [Mr. PROCTOR].

Mr. NELSON (when his name was called). I have a general pair with the junior Senator from Missouri [Mr. VEST], and withhold my vote on that account.

Mr. PETTUS (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. HOAR], but an exchange of pairs has been arranged by the Senator from North Dakota [Mr. HARSBROUGH].

Mr. HANSBROUGH. I suggested to the Senator from Alabama that we transfer pairs, I being paired with the senior Senator from Virginia [Mr. DANIEL], so that the Senator from Virginia will stand paired with the senior Senator from Massachusetts [Mr. HOAR], allowing the Senator from Alabama [Mr. PETTUS] and myself to vote. I vote "nay."

Mr. PETTUS. I vote "yea" on that understanding.

Mr. DILLINGHAM (when Mr. PROCTOR'S name was called). I desire to announce that my colleague [Mr. PROCTOR] is unavoidably absent. As has already been stated, my colleague is paired with the Senator from Florida [Mr. MALLORY].

Mr. QUARLES (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. He being absent, I withhold my vote.

Mr. SPOONER (when his name was called). I have a general pair with the Senator from Tennessee [Mr. CARMACK], who does not seem to be in the Chamber. I do not know how that Senator would vote if present, and therefore I am not at liberty to vote. If I were at liberty to vote, I should vote "nay."

Mr. BERRY. I suggest to the Senator from Wisconsin to transfer his pair to the Senator from Maryland [Mr. MCCOMAS], who will then stand paired with the Senator from Tennessee [Mr. CARMACK]. I have already voted in the affirmative.

Mr. SPOONER. That is entirely agreeable to me, and I vote "nay."

Mr. TALIAFERRO (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. SCOTT]. I suggest to the Senator from Wisconsin [Mr. QUARLES] that we transfer pairs, so that both of us will be at liberty to vote.

Mr. QUARLES. That is entirely agreeable to me, and that will relieve the Senator from Florida [Mr. TALIAFERRO] and myself of our pairs, so that we can both vote. I vote "nay."

Mr. TALIAFERRO. I vote "yea."

The roll call was concluded.

Mr. BAILEY. I desire to announce that my colleague [Mr. CULBERSON] is unavoidably detained from the Senate. If he were here, he would vote "yea."

Mr. MARTIN. I have a general pair with the senior Senator from Illinois [Mr. CULLOM] and withhold my vote for that reason. If he were present, I should vote "yea."

Mr. CLAPP (after having voted in the negative). I have a general pair with the junior Senator from North Carolina [Mr. SIMMONS]. Observing his absence, I ask to recall my vote.

The PRESIDING OFFICER. The Senator from Minnesota [Mr. CLAPP] withdraws his vote.

Mr. PRITCHARD. I am paired with the junior Senator from South Carolina [Mr. MCLAURIN]. If he were present, I should vote "yea."

Mr. NELSON. As I have already announced, I have a general pair with the junior Senator from Missouri [Mr. VEST]; but, in order to make a quorum, I will transfer that pair to the Senator from New York [Mr. DEPEW], who is absent, and vote "nay."

Mr. MONEY. Has the vote been concluded?

The PRESIDING OFFICER. It has not been.

Mr. CARMACK. I desire to have my vote recorded in the affirmative.

Mr. ALDRICH. A pair was announced with the Senator.

Mr. CARMACK. I was not aware of that, and withdraw my vote.

Mr. MONEY. I desire to ask a question for information. I notice from the statements of pairs being made that this seems to be regarded on the other side as a political question——

The PRESIDING OFFICER. Debate is not in order.

The result was announced—yeas 18, nays 30; as follows:

YEAS—18.

Bacon,	Clay,	McLaurin, Miss.	Taliaferro,
Bailey,	Cockrell,	Money,	Teller,
Bate,	Heitfeld,	Morgan,	Tillman.
Berry,	Jones, Ark.	Patterson,	
Blackburn,	McEnery,	Pettus,	

NAYS—30.

Aldrich,	Dillingham,	Hansbrough,	Platt, Conn.
Allison,	Dolliver,	Kean,	Platt, N. Y.
Bard,	Dryden,	Kittredge,	Quarles,
Beveridge,	Fairbanks,	Lodge,	Spooner,
Burnham,	Foraker,	McMillan,	Wellington,
Burrows,	Gallinger,	Millard,	Wetmore.
Burton,	Hale,	Nelson,	
Deboe,	Hanna,	Perkins,	

NOT VOTING—40.

Carmack,	Elkins,	Kearns,	Proctor,
Clapp,	Foster, La.	McComas,	Quay,
Clark, Mont.	Foster, Wash.	McCumber,	Rawlins,
Clark, Wyo.	Frye,	McLaurin, S. C.	Scott,
Culberson,	Gamble,	Mallory,	Simmons,
Cullom,	Gibson,	Martin,	Simon,
Daniel,	Harris,	Mason,	Stewart,
Depew,	Hawley,	Mitchell,	Turner,
Dietrich,	Hoar,	Penrose,	Vest,
Dubois,	Jones, Nev.	Pritchard,	Warren.

So Mr. MONEY's motion was rejected.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following joint resolutions:

A joint resolution (S. R. 103) providing for the binding and distribution of public documents held in the custody of the Superintendent of Documents unbound, upon order of Senators, Representatives, Delegates, and officers of Congress, when such documents are not called for within two years after printing; and

A joint resolution (S. R. 111) limiting the gratuitous distribution of the Woodsman's Handbook to the Senate, the House of Representatives, and the Department of Agriculture.

The message also announced that the House had agreed to the report of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the following bills:

A bill (H. R. 3110) to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans;

A bill (H. R. 6570) to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps; and

A bill (H. R. 8327) to amend an act entitled "An act for the protection of the lives of miners in the Territories."

The message further announced that the House insists upon its amendment to the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia," disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. JENKINS, Mr. SAMUEL W. SMITH, and Mr. COWHERD managers at the conference on the part of the House.

The message also announced that the House had agreed to the concurrent resolution of the Senate to print and bind 15,000 copies of the memorial addresses delivered before the two Houses of Congress on the life and character of Abraham Lincoln, James G. Blaine, and James A. Garfield.

The message further announced that the House had passed a concurrent resolution to print and bind, in cloth, 3,000 copies of a Congressional Directory embracing the biographies of all members of Congress from the Continental Congress to the Fifty-seventh Congress, inclusive, etc.; in which it requested the concurrence of the Senate.

The message also returned to the Senate the enrolled bill (S. 5718) providing for the sale of sites for manufacturing and industrial plants in the Indian Territory, with the information that the House had considered the request of the Senate that the House vacate the action of the Speaker in signing the enrolled bill, and that the unanimous consent necessary to enable such action to be taken was refused.

ISTHMIAN CANAL.

Mr. MORGAN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 3110) to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same.

JOHN T. MORGAN,
M. A. HANNA,
A. B. KITTREDGE,
Managers on the part of the Senate.

W. P. HEPBURN,
L. FLETCHER,
R. C. DAVEY,
Managers on the part of the House.

The report was agreed to.

APPEALS FROM DECISIONS OF SPANISH CLAIMS COMMISSION.

Mr. PETTUS. I move that the Senate proceed to the consideration of House bill 12764.

The PRESIDING OFFICER. The Senator from Alabama moves that the Senate proceed to the consideration of a bill, the title of which will be stated.

The SECRETARY. A bill (H. R. 12764) amending the act of March 2, 1901, entitled "An act to carry into effect the stipulations of article 7 of the treaty between the United States and Spain," etc.

The PRESIDING OFFICER. The question is on the motion of the Senator from Alabama [Mr. PETTUS] to proceed to the consideration of the bill. [Putting the question.] The "ayes" have it.

Mr. NELSON. I object, and suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The Senator from Minnesota suggests the absence of a quorum. The roll will be called.

Mr. NELSON. I do that only to get a vote on the motion to take up that bill.

The PRESIDING OFFICER. The roll call will proceed.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Cockrell,	Jones, Ark.	Pettus,
Allison,	Deboe,	Kean,	Platt, Conn.
Bailey.	Dillingham,	Kittredge,	Platt, N. Y.
Bard,	Dryden,	Lodge,	Quarles,
Bate,	Fairbanks,	McCumber,	Spooner,
Berry,	Foraker,	McEnery,	Taliaferro,
Beveridge,	Foster, Wash.	McLaurin, Miss.	Teller,
Blackburn,	Frye,	Money,	Tillman,
Burnham,	Gallinger,	Morgan,	Wellington,
Burrows,	Hanna,	Nelson,	Wetmore.
Carmack,	Hansbrough,	Patterson,	
Clapp,	Heitfeld,	Perkins,	

The PRESIDING OFFICER. Forty-six Senators have answered to their names. A quorum of the Senate is present. The bill is in the Senate, as in Committee of the Whole, and open to amendment.

Mr. NELSON. What bill is that, Mr. President?

The PRESIDING OFFICER. The bill will again be stated by title.

The SECRETARY. A bill (H. R. 12764) amending the act of March 2, 1901, entitled "An act to carry into effect the stipulations of article 7 of the treaty between the United States and Spain," etc.

Mr. NELSON. There was an absence of a quorum, and I wanted to call for the yeas and nays on the question of the consideration of that bill.

Mr. PETTUS. I thought that question was decided.

Mr. GALLINGER. I will state the parliamentary situation, Mr. President. The Senator from Alabama [Mr. PETTUS] moved to take up the bill. The question was put, and it was declared that the "ayes" had it. Then the suggestion of the absence of a quorum was made, and the roll was called. Before leaving the chair the temporary occupant declared that the bill was before the Senate as in Committee of the Whole.

Mr. NELSON. I suggested the absence of a quorum in the Senate, and intended to follow that with a request for the yeas and nays upon the motion to consider.

The PRESIDENT pro tempore. The Chair will recognize the right of the Senator to make the demand for the yeas and nays now on the motion.

Mr. NELSON. I ask for the yeas and nays on the motion to proceed to the consideration of the bill.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BERRY (when his name was called). I am paired with the Senator from Maryland [Mr. MCCOMAS], and therefore withhold my vote.

Mr. BEVERIDGE (when his name was called). I am paired with the Senator from Montana [Mr. CLARK], and therefore withhold my vote.

Mr. CLAPP (when his name was called). I am paired with the Senator from North Carolina [Mr. SIMMONS], and therefore withhold my vote.

Mr. MCCUMBER (when his name was called). I have a pair with the Senator from Louisiana [Mr. FOSTER], but I transfer that pair to the Senator from Maryland [Mr. MCCOMAS], and vote "nay."

Mr. NELSON (when his name was called). I have a general pair with the junior Senator from Missouri [Mr. VEST], but I transfer that pair to the senior Senator from Oregon [Mr. SIMON], and vote "nay."

Mr. PETTUS (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. HOAR]; but the senior Senator from Massachusetts being in favor of this bill, I feel at liberty to vote, and I vote "yea."

Mr. TALIAFERRO (when his name was called). I have a general pair with the Senator from West Virginia [Mr. SCOTT], who is absent, and I therefore withhold my vote.

The roll call having been concluded, the result was announced—yeas 20, nays 16; as follows:

YEAS—20.

Bate,	Fairbanks,	McLaurin, Miss.	Platt, Conn.
Blackburn,	Foraker,	Millard,	Platt, N. Y.
Burnham,	Heitfeld,	Money,	Spooner,
Carmack,	Jones, Ark.	Patterson,	Teller,
Dryden,	Kean,	Pettus,	Tillman.

NAYS—16.

Allison,	Frye,	Kittredge,	Perkins,
Bard,	Gallinger,	McCumber,	Quarles,
Deboe,	Hale,	McMillan,	Wellington,
Foster, Wash.	Hanna,	Nelson,	Wetmore.

NOT VOTING—52.

Aldrich,	Cullom,	Hawley,	Penrose,
Bacon,	Daniel,	Hoar,	Pritchard,
Bailey,	Depew,	Jones, Nev.	Proctor,
Berry,	Dietrich,	Kearns,	Quay,
Beveridge,	Dillingham,	Lodge,	Rawlins,
Burrows,	Dolliver,	McComas,	Scott,
Burton,	Dubois,	McEnery,	Simmons,
Clapp,	Elkins,	McLaurin, S. C.	Simon,
Clark, Mont.	Foster, La.	Mallory,	Stewart,
Clark, Wyo.	Gamble,	Martin,	Taliaferro,
Clay,	Gibson,	Mason,	Turner,
Cockrell,	Hansbrough,	Mitchell,	Vest,
Culberson,	Harris,	Morgan,	Warren.

The PRESIDENT pro tempore. No quorum has voted.

Mr. ALDRICH. I move that the Senate adjourn.

Mr. KEAN. I hope the Senator will withhold that motion.

Mr. ALDRICH. No business can be done.

Mr. GALLINGER. There is no quorum.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Rhode Island that the Senate adjourn.

The motion was agreed to; and (at 2 o'clock and 47 minutes p. m.) the Senate adjourned until to-morrow, Friday, June 27, 1902, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 26, 1902.*

The House met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. HENRY N. COUDEN, D. D.

The Journal of yesterday's proceedings was read and approved.

FOOT BRIDGE ACROSS MISSISSIPPI RIVER AT LITTLE FALLS, MINN.

Mr. MORRIS. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 5434) to authorize the city of Little Falls, Minn., to construct a wagon and foot bridge across the Mississippi River within the limits of said city.

The Clerk read the bill, as follows:

Be it enacted, etc., That the city of Little Falls, in the State of Minnesota, through its corporate authorities, is hereby authorized and empowered to construct and maintain a wagon and foot bridge, with necessary approaches, across the Mississippi River, for the purpose of connecting Broadway street east with Broadway street west, in said city. Said bridge shall be constructed to provide for the passage of wagons and vehicles of all kinds, animals, foot passengers, and for all road travel.

SEC. 2. That the said bridge authorized to be constructed under this act shall be built and constructed upon plans to be approved by the Secretary of War, and shall be subject to the free use of the public under such rules and regulations as may be prescribed by the city of Little Falls.

SEC. 3. That said bridge shall be a lawful structure, and shall be recognized and known as a post route, and shall enjoy the rights and privileges of other post roads in the United States; and no higher charge shall be made for the transmission over the same of the mails, troops, and munitions of war of the United States than the rate per mile paid for the transportation over the road or roads leading to said bridge. Equal privileges in the use of said bridge shall be granted to all telegraph companies, and the United States shall have the right of way across said bridge and its approaches for postal-telegraph purposes, and all changes in said bridge required by the Secretary of War at any time, or its entire removal, shall be at the expense of the comporation owning or operating said bridge.

SEC. 4. That the right to alter, amend, or repeal this act is hereby expressly reserved.

SEC. 5. That this act shall be null and void unless the bridge authorized is commenced within one year and completed within three years from the date of approval thereof.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SULZER. Mr. Speaker, I would like to ask the gentleman from Minnesota if this bill has been unanimously reported from the committee.

Mr. MORRIS. It has; it is a unanimous report from the Committee on Interstate and Foreign Commerce.

Mr. SULZER. If I understand it, it simply gives the Government consent to building this bridge across the river.

Mr. MORRIS. That is all.

Mr. SULZER. It takes no public money out of the Treasury?

Mr. MORRIS. No.

Mr. SULZER. Then I have no objection.

The bill was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. MORRIS, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 2641. An act for the relief of Albion M. Christie;

H. R. 2978. An act for the relief of Joseph H. Penny, John W. Penny, Thomas Penny, and Harvey Penny, surviving partners of Penny & Sons;

H. R. 14182. An act granting an increase of pension to Susan B. Lynch;

H. R. 13598. An act granting a pension to John J. Southerland;

H. R. 12056. An act granting an increase of pension to Warren C. Plummer;

H. R. 10964. An act granting an increase of pension to Francis M. Beebe;

H. R. 10856. An act granting a pension to Jacob Findley;

H. R. 9308. An act granting an increase of pension to Edwin P. Johnson;

H. R. 9187. An act granting an increase of pension to Caroline A. Hammond; and

H. R. 6005. An act granting a pension to James A. Chalfant.

PORT OF WILMINGTON, N. C.

Mr. SWANSON. Mr. Speaker, at the request of Mr. BELLAMY, I ask unanimous consent for the present consideration of the bill (H. R. 14801) to make Wilmington, N. C., a port through which merchandise may be imported for transportation without appraisement, which I will send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the privileges of the first section of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, be, and the same are hereby, extended to the port of Wilmington, N. C.

The SPEAKER. The gentleman from Virginia asks unanimous consent for the present consideration of the bill which the Clerk has read. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. SWANSON, a motion to reconsider the last vote was laid on the table.

INTERNAL-REVENUE TAX ON FERMENTED LIQUORS.

Mr. TAWNEY. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 13674) amendatory of sections 3339 and 3341 of the Revised Statutes of the United States, relative to internal-revenue tax on fermented liquors, which I will send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That section 3339 of the Revised Statutes of the United States be, and the same is hereby, amended by striking out of said section the following:

"In estimating and computing such tax, the fractional parts of a barrel shall be halves, thirds, quarters, sixths, and eighths; and any fractional part of a barrel containing less than one-eighth shall be accounted one-eighth; more than one-eighth and not more than one-sixth shall be accounted one-sixth; more than one-sixth and not more than one-fourth shall be accounted one-fourth; more than one-fourth and not more than one-third shall be accounted one-third; more than one-third and not more than one-half shall be accounted one-half; more than one-half and not more than 1 barrel shall be accounted 1 barrel; and more than 1 barrel and not more than 63 gallons shall be accounted 2 barrels, or a hogshead. The said tax shall be paid by the owner, agent, or superintendent of the brewery or premises in which such fermented liquors are made, and in the manner and at the time hereafter specified."

And by inserting in lieu thereof the following:

"In estimating and computing the tax imposed by law, the fractional part of a barrel shall be halves, thirds, quarters, and sixths; and any fractional part of a barrel containing less than one-sixth shall be accounted one-sixth; more than one-sixth and not more than one-fourth shall be accounted one-fourth; more than one-fourth and not more than one-third shall be accounted one-third; more than one-third and not more than one-half shall be accounted one-half; more than one-half and not more than 1 barrel shall be accounted 1 barrel; and more than 1 barrel and not more than 63 gallons shall be accounted 2 barrels, or a hogshead. The said tax shall be paid by the owner, agent, or superintendent of the brewery or premises in which such fermented liquors are made, and in the manner and at the time hereinafter specified."

SEC. 2. That section 9 of the act entitled "An act to provide revenue for the Government and to encourage the industries of the United States," approved July 24, 1897, be, and the same is hereby, amended so as to read as follows:

SEC. 9. That section 3341 of the Revised Statutes of the United States be, and hereby is, amended to read as follows:

SEC. 2. That section 3341 of the Revised Statutes of the United States as amended by section 9 of an act approved July 24, 1897, be, and the same is hereby, further amended so as to read as follows:

"SEC. 3341. The Commissioner of Internal Revenue shall cause to be prepared, for the payment of such tax, suitable stamps denoting the amount of tax required to be paid on the hogsheads, barrels, and halves, thirds, quarters, and sixths of a barrel of such fermented liquors (and shall also cause to be prepared suitable permits for the purpose hereinafter mentioned), and shall furnish the same to the collectors of internal revenue, who shall each be required to keep on hand at all times a sufficient supply of permits and a supply of stamps equal in amount to two months' sales thereof, if there be any brewery or brewery warehouse in his district; and such stamps shall be sold and permits granted and delivered by such collectors only to the brewers of their districts, respectively. Such collectors shall keep an account of the number of permits delivered and of the number and value of the stamps sold by them to each brewer:" *Provided*, That this act shall not take effect until July 1, 1904.

The following committee amendments were read by the Clerk:

On page 1, line 8, strike out the word "eights" and insert in lieu thereof the word "eighths."

On page 2, line 14, after the words "sixth and not more than one-fourth," insert the words "shall be accounted."

On page 2 strike out lines numbered 24 and 25, and on page 3 strike out lines 1 to 6, both inclusive, and insert in lieu thereof the following:

"SEC. 2. That section 3341 of the Revised Statutes of the United States as amended by section 9 of an act approved July 24, 1897, be, and the same is hereby, further amended so as to read as follows:"

The SPEAKER. The gentleman from Minnesota asks unanimous consent for the present consideration of the bill which the Clerk has read. Is there objection?

Mr. WANGER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman what the main effect of this proposed legislation is.

Mr. TAWNEY. This bill is reported unanimously from the Ways and Means Committee. It is the same bill that passed the House in the Fifty-sixth Congress by unanimous consent. The only effect of the bill is to eliminate the eighth package from the classification of various parts of a barrel, which classification was adopted in 1866, and also to eliminate the stamp that has heretofore and is now being used for the purpose of paying the revenue that is put on an eighth package of beer. That is the only effect of it, but it was necessary to reenact the remainder of the section in order to get that elimination out of the section.

Mr. SULZER. Mr. Speaker, just a word. I understand this bill has the approval of the American Brewers' Association?

Mr. TAWNEY. National and State; and the small brewers in the United States have indicated also their desire for the passage of this bill.

Mr. WANGER. Do I understand that the bill which was passed in the last Congress was identical with this?

Mr. TAWNEY. Identical, so far as the elimination of eighths is concerned. This bill, however, I should have said, does not eliminate the one-sixth package. The bill passed in the last Congress also eliminated that.

Mr. WANGER. That bill was decidedly objectionable to the small brewers. I do not know that this would be.

Mr. TAWNEY. This is not.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. TAWNEY, a motion to reconsider the last vote was laid on the table.

LOCK AND DAM AT HARPETH SHOALS, TENNESSEE.

Mr. SNODGRASS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table for immediate consideration the bill (S. 6270) to amend an act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902, which I will ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902, be, and the same is hereby, amended so that the two paragraphs thereof providing for the improvement of the Cumberland River, Tennessee, below Nashville, and of the Cumberland River, Tennessee, above Nashville, shall read as follows:

"Improving Cumberland River, Tennessee, below Nashville: For the completion of the lock and dam at Harpeth Shoals and for maintenance, $180,000.

"Improving Cumberland River, Tennessee, above Nashville: Continuing improvement, and for maintenance, $200,000, of which so much as may be necessary shall be used for the completion of Lock and Dam No. 1. And the Secretary of War is hereby authorized, in his discretion, to grant leases or licenses to the highest responsible bidder for the use of water power created by said dam, at such a rate and on such conditions and for such periods of time as may seem to him expedient; and he is also authorized, in his discretion, to issue permits for the construction, maintenance, and operation of inlet and outlet canals and other structures, on such plans as he may approve, for the diversion of the water aforesaid: *Provided*, That any lease or license so granted shall be limited to the use of the surplus water not required for navigation, and no structures shall be built and no operations be conducted which shall in any manner injure navigation, interfere with the operations of the Government, or impair the usefulness of any improvement made by the Government for the benefit of navigation; and the right of Congress to alter, amend, or repeal the provisions of this paragraph is hereby expressly reserved: *Provided further*, That before leasing or licensing such water privileges, or issuing permits for the construction and operation of such canals, or otherwise disposing of any water power or privilege, the Secretary of War shall first advertise the same in one or more daily papers at Nashville, for sixty days immediately preceding, stating specifically the right or privilege proposed to be leased or conveyed, with its exact limitations, inviting bids for the same, and he may, in his discretion, then lease the same for a specific term of years at so much per year, to be paid semi-annually in cash into the Treasury, and the Secretary of War shall reserve the right to reject any or all bids."

The SPEAKER. The gentleman from Tennessee asks unanimous consent to take from the Speaker's table for immediate consideration the bill which has just been read. Is there objection? [After a pause.] The Chair hears none. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, read the third time, and passed.

On motion of Mr. SNODGRASS, a motion to reconsider the last vote was laid on the table.

SISSETON MILITARY RESERVATION, S. DAK.

Mr. MARTIN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 4450) confirming in the State of South Dakota the title to a section of land heretofore granted to said State, which I will ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the title of the State of South Dakota to the section of land described in section 3 of chapter 1257 of the act of Congress approved October 1, A. D. 1890, be, and is hereby, confirmed and made absolute in the said State freed from the conditions therein imposed; the proceeds thereof, if sold, to be used in aid of the militia of the State of South Dakota.

The SPEAKER. The gentleman from South Dakota asks unanimous consent for the present consideration of the bill which the Clerk has just read. Is there objection?

Mr. SULZER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from South Dakota if there are any Indians on these lands at the present time.

Mr. MARTIN. None whatever, and there never have been. This is a part of an old military reservation which was granted by Congress to the State of South Dakota some ten or twelve years ago for the purpose of the militia of the State. It is now desired to make the parade grounds of the militia more central, this being in the northeast corner of the State. This confirms the title to the land.

Mr. SULZER. I just wanted to know if it was or had been an Indian reservation, and if there were any Indians on it now. If so, I did not want their rights jeopardized.

Mr. MARTIN. No.

Mr. RICHARDSON of Tennessee. Will the gentleman state how much is involved?

Mr. MARTIN. Six hundred and forty acres. It simply confirms the title heretofore granted.

The SPEAKER. Is there objection?

There was no objection.

The amendments were agreed to.

The bill as amended was ordered to a third reading; and was accordingly read the third time, and passed.

On motion of Mr. MARTIN, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia," had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PRITCHARD, Mr. DILLINGHAM, and Mr. MARTIN as the conferees on the part of the Senate.

BRIDGE ACROSS EMORY RIVER, HARRIMAN, TENN.

Mr. RICHARDSON of Alabama. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 4776) to authorize the construction of a bridge across the Emory River, in the State of Tennessee, by the Tennessee Central Railway or its successors.

The bill was read. It provides that the Tennessee Central Railway, a corporation created and organized under the laws of the State of Tennessee, and its successors be, and it and they are hereby, authorized to construct and maintain a bridge and approaches thereto over the Emory River, in the State of Tennessee, at such point at or near the city of Harriman as said company or its successors may deem suitable for the passage of its or their railroad over said river.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to a third reading; and was accordingly read the third time, and passed.

On motion of Mr. RICHARDSON of Alabama, a motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS CALUMET RIVER, HAMMOND, IND.

Mr. MANN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill which I send to the Clerk's desk.

The bill (H. R. 15003) to authorize the construction of a bridge by the New York, Chicago and St. Louis Railroad Company and the Chicago and Erie Railroad Company across the Calumet River at or near the city of Hammond, Ind., at a point about 1,200 feet east of the Indiana and Illinois State line and about 100 feet east of the location of the present bridge of the New York, Chicago and St. Louis Railroad Company across said river; also to authorize the construction of a bridge by the Chicago and State

Line Railroad Company across said river at the point where said company's railroad crosses said river in Hyde Park Township, Chicago, Ill., being at the location of the present bridge of said company across said river in said township, was read.

The SPEAKER. Is there objection?

Mr. SULZER. I should like to ask the gentleman from Illinois if this bill has been unanimously reported from the Committee.

Mr. MANN. Mr. Speaker, this bill has the unanimous report of the Committee on Interstate and Foreign Commerce, and also of the War Department.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time, and passed.

On motion of Mr. MANN, a motion to reconsider the last vote was laid on the table.

COURT OF APPEALS, FORT WORTH, TEX.

Mr. LANHAM. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 15140) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Fort Worth, in the State of Texas, on the first Monday in November in each year.

The bill was read, as follows:

Be it enacted, etc., That the circuit court of appeals of the fifth judicial circuit of the United States is hereby authorized and required to hold one term of said court in the city of Fort Worth, in the State of Texas, on the first Monday in November in each year.

SEC. 2. That all appeals, writs of error, and other appellate proceedings which may, after the date of this act, be taken or prosecuted from the circuit or district courts of the United States in the State of Texas to the court of appeals of the fifth circuit shall be heard and disposed of by the said court of appeals at the terms of the court held in Fort Worth in pursuance of this act.

SEC. 3. That this act shall not operate to prevent the said court from holding other terms in the city of Fort Worth or in such other places in the said fifth judicial district as said court may from time to time designate.

SEC. 4. That chapter 517 of 26 United States Statutes at Large is hereby amended in accordance with the provisions of this act.

The following committee amendments were read:

Amend by adding to section 2 the following:

"*Provided*, That nothing herein contained shall prevent the court from hearing appeals or writs of error whenever the said courts shall sit, in cases of injunctions and in all other cases which under the statutes and the rules, or in the opinion of the court, are entitled to be brought to a speedy hearing."

Amend by adding the following:

"SEC. 5. That the clerk of said court is authorized and permitted to pay out of the fees and emoluments of his office (1) the expenses incurred by him in transporting from his office in New Orleans, La., to Atlanta, Ga., and in transporting from Atlanta, Ga., to New Orleans, La., the records, books, papers, files, dockets, and supplies necessary for the use of the court at its terms to be held in Atlanta, Ga.; (2) an allowance for actual expenses not exceeding $10 per day to cover travel and subsistence for each day he may be required to be present at Atlanta, Ga., on business connected with his said office, such expenses and allowance to be approved and allowed by the senior circuit judge of the fifth judicial circuit."

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. LANHAM. Mr. Speaker, I wish to move an amendment to the second committee amendment.

The amendment was read, as follows:

Strike out the words "Atlanta, Ga.," where they appear in lines 19, 20, and 23, on page 2, and in line 1, on page 3, and insert in lieu thereof the words "Fort Worth, Tex."

The amendment to the amendment was agreed to.

The committee amendments as amended were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time, and passed.

On motion of Mr. LANHAM, a motion to reconsider the last vote was laid on the table.

EULOGIES ON PRESIDENTS LINCOLN, GARFIELD, AND M'KINLEY.

Mr. HEATWOLE. Mr. Speaker, I am directed by the Committee on Printing to ask consideration for the following privileged resolution.

The SPEAKER. The gentleman from Minnesota, chairman of the Committee on Printing, by direction of that committee, calls up the following resolution.

The resolution was read, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound in one volume, in cloth, 15,000 copies of the three separate memorial addresses delivered before the two Houses of Congress, as follows: On February 12, 1866, by Hon. George Bancroft, on the life and character of Abraham Lincoln, late President of the United States; on February 27, 1882, by Hon. James G. Blaine, on the life and character of James A. Garfield, late President of the United States; on February 27, 1902, by Hon. John Hay, on the life and character of William McKinley, late President of the United States, 10,000 copies of which shall be for the use of the House of Representatives and 5,000 copies for the use of the Senate. The Joint Committee on Printing are hereby authorized to have the copy prepared for the Public Printer, who shall procure suitable portrait etchings to be bound in with these memorials, and shall use such paper and bindings as will make the volumes worthy of a place in the libraries of the land.

Mr. RICHARDSON of Tennessee. I desire to ask if this has been reported by the Committee on Printing?

Mr. HEATWOLE. It has.

Mr. RICHARDSON of Tennessee. I should like to have the report printed with the resolution, in order that we may see the cost of the printing.

Mr. HEATWOLE. There is no objection to that.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the report be printed in the RECORD. Is there objection?

There was no objection.

Mr. RICHARDSON of Tennessee. The report ought to show the cost. Does it show the cost of the printing?

Mr. HEATWOLE. I will say that I have repeatedly told the gentleman from Tennessee that the cost in every instance where it is obtainable is in the report.

Mr. RICHARDSON of Tennessee. The rule requires it.

The SPEAKER. It is in the report, which will be printed, if there be no objection. There was no objection.

The question was taken, and the resolution was agreed to.

The report is as follows:

Your Committee on Printing, having had under consideration Senate concurrent resolution No. 42, providing for the publication of one volume of the three separate memorial addresses delivered before the two Houses of Congress, as follows: By Hon. George Bancroft, on the life and character of Abraham Lincoln; by Hon. James G. Blaine, on the life and character of James A. Garfield; and by Hon. John Hay, on the life and character of William McKinley; it is recommended that the resolution be agreed to.

The Public Printer estimates the cost of the publication at $6,475.

CONGRESSIONAL BIOGRAPHIES FROM THE CONTINENTAL CONGRESS TO THE FIFTY-SEVENTH CONGRESS.

Mr. HEATWOLE. Mr. Speaker, I also present the following privileged report.

The Clerk read as follows:

House concurrent resolution No. 57.

Resolved, etc., That there be printed, and bound in cloth, 3,000 copies of a Congressional Directory which embraces the biographies of all members of Congress from the Continental Congress to the Fifty-seventh Congress, inclusive, compiled by O. M. Enyart, 2,000 copies for the use of the House of Representatives and 1,000 copies for the use of the Senate.

The resolution was agreed to.

BINDING AND DISTRIBUTION OF PUBLIC DOCUMENTS.

Mr. HEATWOLE. Mr. Speaker, I am also directed by the Committee on Printing to ask unanimous consent for the consideration of the following resolution.

The Clerk read as follows:

Senate joint resolution 103, providing for the binding and distribution of public documents held in the custody of the Superintendent of Documents, unbound, upon orders of Senators, Representatives, Delegates, and officers of Congress, when such documents are not called for within two years after printing.

Resolved, etc., That hereafter the documents reserved for binding upon orders of Senators, Representatives, Delegates, and officers of Congress, as provided in paragraph 6, section 54, of an act approved January 12, 1895, providing for the public printing and binding and the distribution of public documents, if not called for and delivered within two years after printing, shall be bound in first grades of cloth and delivered to the Superintendent of Documents for distribution to libraries; and the Public Printer is hereby authorized and directed to bind in cloth all such documents heretofore delivered to the Superintendent of Documents for like distribution.

The SPEAKER. Is there objection?

Mr. ADAMS. Reserving the right to object, I would like to ask the gentleman if this applies to the quota of members?

Mr. HEATWOLE. Members' quotas in the folding room will not be disturbed.

Mr. ADAMS. If they do not take them within the two years.

Mr. HEATWOLE. This relates to members' binding list, so called, in the printing law. There are a number of members who have failed to have their quota bound. There are at present 175,000 volumes of these documents in loose sheets and put up in bundles that should be bound and distributed. Another thing, the room should be available for other purposes. It has been very strongly urged by the Public Printer.

Mr. PAYNE. The joint resolution allows the two years for the members to get them?

Mr. HEATWOLE. Certainly.

Mr. WANGER. And this has nothing to do with the members' quota in the folding room?

Mr. HEATWOLE. Not in the least.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Senate joint resolution was ordered to a third reading; and it was accordingly read the third time, and passed.

WOODSMAN'S HANDBOOK.

Mr. HEATWOLE. Mr. Speaker, I am further directed by the Committee on Printing to ask unanimous consent for the present consideration of the following resolution.

The Clerk read as follows:

Senate joint resolution No. 111, limiting the gratuitous distribution of the Woodsman's Handbook to the Senate, the House of Representatives, and the Department of Agriculture.

Whereas the proprietors of certain copyrighted log scales and other copyrighted matter have consented to the use of such copyrighted matter in the

Woodsman's Handbook, a publication prepared in the Bureau of Forestry of the United States Department of Agriculture, under the restriction that no copies whatsoever be sold by any Government office, and, furthermore, that no copies be furnished to any dealer for the purpose of sale; and

Whereas sufficient authority to publish and pay for the printing of said Woodsman's Handbook is given in the bill making appropriations for the Department of Agriculture:

Resolved, etc., That, in consideration of such consent given by said proprietors, no copies of said Woodsman's Handbook shall be printed or distributed otherwise than by the Senate, the House of Representatives, and the United States Department of Agriculture, and none shall be sold or distributed by the Superintendent of Documents, or furnished to others for sale, anything in the act of January 12, 1895, entitled "An act providing for the public printing and binding and the distribution of public documents," to the contrary notwithstanding.

SEC. 2. That said copyrighted matter, wherever it appears in said Woodsman's Handbook, shall be plainly marked as copyrighted matter, and shall be as fully protected under the copyright laws as though published by the proprietors themselves; and the permission for the use of said matter shall be deemed to be limited to the purposes of this resolution.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. UNDERWOOD. Mr. Speaker, I would like to ask the gentleman from Minnesota for an explanation of this resolution.

Mr. HEATWOLE. I send a letter of the Secretary of Agriculture to the Clerk's desk to be read.

The SPEAKER. In reply to the gentleman from Alabama, the gentleman from Minnesota submits the following to be read:

The Clerk read as follows:

PROTECTION OF COPYRIGHTED MATTER IN THE WOODSMAN'S HANDBOOK.

DEPARTMENT OF AGRICULTURE, OFFICE OF THE SECRETARY,
Washington, D. C., June 21, 1902.

Hon. J. P. HEATWOLE,
Chairman Committee on Printing,
House of Representatives, Washington, D. C.

SIR: I have the honor to recommend the adoption of the concurrent resolution which was passed by the United States Senate providing for the protection of certain copyrighted matter which it is very desirable to publish in the Woodsman's Handbook, a bulletin prepared in the Bureau of Forestry. In order to give this publication its greatest value, it is necessary to embody certain copyrighted tables of log scales. Permission has been obtained from the proprietors of such copyrighted material to use the data, with the provision that no copies whatsoever be sold by any Government office, and that no copies be furnished to any dealer for the purpose of sale. Existing law does not permit such restrictions. Should this resolution fail of passage, it would be necessary to issue the publication without these log scales, and thus greatly reduce the value of the bulletin.

Very respectfully,

JAMES WILSON, *Secretary.*

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Senate joint resolution was ordered to a third reading and; it was accordingly read the third time, and passed.

On motion of Mr. HEATWOLE, a motion to reconsider the several votes by which the foregoing resolutions were adopted was laid on the table.

REQUEST OF SENATE.

The SPEAKER. The Chair lays before the House the following request of the Senate, which was read:

IN THE SENATE OF THE UNITED STATES, *June 23, 1902.*

Resolved, That the Secretary be directed to return to the House of Representatives the enrolled copy of the bill (S. 5718) providing for the sale of sites for manufacturing or industrial plants in the Indian Territory, and request the House of Representatives to vacate the action of the Speaker in signing said enrolled bill and the message of the Senate agreeing to the amendment of the House of Representatives to said bill to the Senate.

The SPEAKER. This being a request for the erasing of name of the Speaker from a bill, and there being no allegation that the request is for the purpose of correcting an error, the Chair feels that this should be done by unanimous consent.

Mr. STEPHENS of Texas. I object, Mr. Speaker.

The SPEAKER. Objection is made by the gentleman from Texas.

Mr. DALZELL. Mr. Speaker, I offer the following resolution in regard to the matter just before the House.

The SPEAKER. The gentleman from Pennsylvania offers the following resolution in regard to the request just read.

The Clerk read as follows:

Ordered, That the Clerk be directed to return to the Senate the enrolled bill (S. 5718) providing for the sale of sites for manufacturing or industrial plants in the Indian Territory, with the information that the House has considered the request of the Senate that the House vacate the action of the Speaker in signing said enrolled bill, and that the unanimous consent necessary to enable such action to be taken was refused.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. STEPHENS of Texas. I object.

The SPEAKER. Objection is made.

Mr. DALZELL. One moment. I would like to have the attention of the gentleman from Texas who made the objection.

Mr. STEPHENS of Texas. Certainly.

Mr. DALZELL. The purpose of the resolution is to inform the Senate of the action of the House in answer to its request.

Mr. STEPHENS of Texas. I withdraw the objection.

Mr. DALZELL. It is absolutely necessary as a matter of comity.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The question was taken, and the resolution was agreed to.

CODE OF LAW FOR THE DISTRICT OF COLUMBIA.

The SPEAKER laid before the House the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia," with House amendments disagreed to by the Senate.

The Senate amendments were read.

Mr. JENKINS. Mr. Speaker, I move that the House insist on its amendments, and agree to the conference asked for by the Senate.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. JENKINS, Mr. SAMUEL W. SMITH, and Mr. COWHERD.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. HAUGEN, one week, on account of sickness.

To Mr. WHEELER, for the balance of the session, on account of important business.

PROTECTION OF LIVES OF MINERS.

Mr. MOODY of Oregon. Mr. Speaker, I call up the conference report on the bill (H. R. 8327) to amend an act entitled "An act for the protection of the lives of miners in the Territories," and I ask that the reading of the report be omitted and the statement only be read.

The SPEAKER. Have the report and statement been printed in the RECORD?

Mr. MOODY of Oregon. They have.

The SPEAKER. The gentleman from Oregon asks unanimous consent that the reading of the report be omitted, and that the statement only be read. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the statement, as follows:

The effect of the agreement of the conferees will be:

First. To strike out the limitation as to "depth of 100 feet or more," thus making the law applicable to mines of any depth.

Second. The Senate amendments providing for sprinkling the mines or removing the dust is accepted by the House conferees.

Third. As to shot firing, the conferees agree to make that feature of the bill applicable to the Indian Territory only, in mines employing 20 men or more. The necessity for this provision exists chiefly in that Territory, and your conferees have deemed it best to accept this limitation.

MALCOLM A. MOODY,
CHAS. F. SCOTT.

[For conference report see page 7416.]

The conference report was agreed to.

On motion of Mr. MOODY of Oregon, a motion to reconsider the last vote was laid on the table.

REDEMPTION OF CERTAIN INTERNAL-REVENUE STAMPS.

Mr. PAYNE. Mr. Speaker, I call up the conference report on the bill (H. R. 6570) to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps. I ask that the reading of the report be omitted and that the statement only be read.

The SPEAKER. The gentleman from New York asks that the reading of the report be omitted, and that the statement only be read. Without objection, that course will be pursued.

There was no objection.

The Clerk read the statement, as follows:

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6570) to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report:

The House managers recede from the disagreement to the Senate amendments and agree to the same with an amendment striking out all after line 6, page 1, of the House bill, and inserting new language, which is simpler in form and carries out exactly the provision and intention of the House in the original act.

SERENO E. PAYNE,
JOHN DALZELL,
JAMES D. RICHARDSON,
Managers on the part of the House.

[For conference report see page 7416.]

Mr. UNDERWOOD. Mr. Speaker, I would like to ask the gentleman from New York to explain this report.

Mr. PAYNE. The original bill extended the limit for the redemption of unused stamps, document stamps, and other stamps issued under the war-revenue act for the term of two years. The amendment, if adopted, extends the time to the 1st of July, 1904, and provides for the redemption under the original act passed in May, 1900.

The conference report was agreed to.

On motion of Mr. PAYNE, a motion to reconsider the last vote was laid on the table.

ISTHMIAN CANAL.

Mr. HEPBURN. Mr. Speaker, I desire to call up the conference report upon House bill 3110, to provide for the construction of a canal connecting the Atlantic and Pacific oceans.

The SPEAKER. The gentleman from Illinois calls up the conference report on the canal bill.

Mr. HEPBURN. I ask, Mr. Speaker, that the report and statement be read.

The Clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 3110) to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same.

W. P. HEPBURN,
L. FLETCHER,
R. C. DAVEY,
Managers on the part of the House.
JOHN T. MORGAN,
M. A. HANNA,
A. B. KITTREDGE,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

The effect of the action of the conferees, if approved by the House, will be to eliminate all of the provisions of the bill as passed by the House and enact into legislation all of the provisions of the Senate amendment.

Mr. HEPBURN. Mr. Speaker, in making the motion that I shall make to adopt the report of the conference committee, I desire to say that I have not changed in the slightest degree the opinion that I have had of the wisdom of the House of Representatives when, on the 9th day of last January, it adopted a measure looking to the construction of this great enterprise.

The SPEAKER. The Chair desires to state to the gentleman that the papers are not in the possession of the House.

Mr. HEPBURN. The papers have never been in the hands of the conference committee. I presumed they were in the hands of the Clerk.

The SPEAKER. They were delivered to the committee, as the Chair is informed.

Mr. HEPBURN. They were not delivered to the committee.

Mr. PAYNE. I suppose they should be in the hands of the Senate. This was a House bill with Senate amendments.

The SPEAKER. It is impossible to consider this matter unless the papers are before the House, and they do not seem to be in the possession of the House.

Mr. HEPBURN. They must be in the possession of the House.

The SPEAKER. The records show that the papers were messaged over to the Senate and we have no evidence of their being returned.

Mr. SULZER. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. Mr. Speaker, as I understand it, the conference report and statement of the conferees have been printed in the RECORD and are officially now before the House. What other papers are now necessary to consider this matter?

The SPEAKER. The report and statement of the conferees are in our possession, but the House is not in possession of the papers; and it has been repeatedly held, and long ago thrashed out, that business can not be done by this body unless the papers are in its possession.

Mr. SULZER. Mr. Speaker, a parliamentary inquiry. I would like to know what papers are necessary.

The SPEAKER. The bill itself and the substitute bill and all of the original papers in the case. The Chair will state that nothing can be done until these original papers are found.

Mr. HEPBURN. Then, Mr. Speaker, at a later time I will call this up.

Mr. RICHARDSON of Tennessee. Mr. Speaker, I desire to ask the gentleman from Iowa whether the papers are in the possession of the Senate.

Mr. HEPBURN. I do not know, sir, whether they are or not.

Mr. RICHARDSON of Tennessee. Who asked for the conference—which body?

Mr. HEPBURN. The Senate asked for the conference.

Mr. LOUD. The papers ought to be here.

Mr. RICHARDSON of Tennessee. Then the House, granting the conference, ought to have the papers.

Mr. HEPBURN. The papers were not delivered. It is one of those peculiar cases, as I learned on slight investigation of the case, where those who are familiar with those matters, or at least many gentlemen, thought that the rule would not apply—that it might be that this case could be taken up in either House, as they asked for a conference on a disagreement on the part of the House—and the situation is of that peculiar nature.

Mr. RICHARDSON of Tennessee. Has the Senate itself acted upon the conference report?

Mr. HEPBURN. That I can not tell. I do not know.

The SPEAKER. The Chair has stated to the House that there is no use of taking up unnecessarily the time of the House. The papers are not in our possession and we can not proceed.

Mr. RICHARDSON of Tennessee. Mr. Speaker, I was not seeking delay, but to learn where the papers are.

The SPEAKER. The Chair was not referring to the gentleman's inquiries.

Mr. HEPBURN. Mr. Speaker, a parliamentary inquiry. Is it competent for the House, by unanimous consent, to proceed with this business at this time?

The SPEAKER. Not without the original papers. The matter will have to go over until they are found.

JOSEPH M. SIMMS.

Mr. ADAMSON. Mr. Speaker, I call up a conference report on the bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service, submitted yesterday.

The SPEAKER. The gentleman from Georgia calls up a conference report. Does the gentleman desire to have both the report and the statement read?

Mr. ADAMSON. I ask unanimous consent that the reading of the report be omitted and that the statement only be read.

The SPEAKER. The gentleman from Georgia asks unanimous consent to dispense with the reading of the report and that the statement only be read. If there is no objection this course will be pursued.

There was no objection.

The Clerk read the statement, to be found in the proceedings of June 25, 1902.

Mr. ADAMSON. Mr. Speaker, I move that the House concur in the conference report.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the report was agreed to.

On motion of Mr. ADAMSON, a motion to reconsider the last vote was laid on the table.

PHILIPPINE GOVERNMENT.

The SPEAKER. In pursuance of the continuing order of the House, it will resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2295, the Philippine government bill, and the gentleman from Massachusetts [Mr. GILLETT] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2295, with Mr. GILLETT of Massachusetts in the chair.

Mr. PERKINS. Mr. Chairman, my recollection is that when we adjourned last night I had the floor on a motion to amend section 15 of this act, the act authorizing the taking of land belonging to the friars.

The CHAIRMAN. Does the gentleman submit an amendment?

Mr. PERKINS. Yes; I submit an amendment.

The CHAIRMAN. The gentleman from New York submits an amendment to section 15, which the Clerk will report.

The Clerk read as follows:

Insert in line 13, page 74, after the word "purposes," the following: "An appeal may be taken to the Supreme Court of the United States, in the manner provided by the sixth section, from any final judgment or decree or order authorizing the taking of the lands of any association, corporation, community, or religious order, or fixing the compensation to be paid therefor."

Mr. COCHRAN. Mr. Chairman, I make the point of order that the debate was closed on that section.

The CHAIRMAN. The recollection of the Chair is that the gentleman was on the floor at the time of adjournment. The Chair will consult the RECORD. That is the Chair's recollection. The gentleman from New York is recognized.

Mr. PERKINS. Mr. Chairman, this section is one giving very extraordinary powers. It provides, in the first place, that the lands of any religious association may be taken by eminent domain under what circumstances? I ask the attention alike of the committee and of the Committee of the Whole. It says that where it is thought that the ownership of the land by communities or religious orders shall injuriously affect the peace and welfare of the people of the islands, then this power may be exercised.

Now, let me suggest the question whether we have the power to pass such a law. It is hoped by all that it may be possible, by agreement between Governor Taft and the religious authorities, to avoid the necessity, but it may be necessary to resort to those legal proceedings. Does anyone think that this Congress would have the power to say that because some individual or religious association owned land in these United States to such a large extent that it might be deemed injurious to the welfare of the community, that for that reason we should have the power by eminent domain to condemn the title to the land?

Certainly, Mr. Chairman, this is a very serious question. But I do not care to discuss here the constitutionality of the provision.

Let me make another suggestion, which I feel confident will appeal to all members of the committee. Certainly we all desire that if the lands of the friars in the Philippines, or if any other land in the Philippines or out of the Philippines, is to be taken by eminent domain, fair compensation shall be given therefor.

Now, I think, Mr. Chairman, that the committee, inadvertently no doubt, have failed to secure for these associations the full protection of the law to which they are entitled. We all know that there is in those islands a strong feeling against the friars. We all know that there is a strong desire that the land of the friars shall be taken for public purposes.

I am not here, Mr. Chairman, in any way to question the wisdom or the propriety of such a course; but I do say that we owe it to ourselves to see that if this land is taken it shall only be taken upon payment of full and fair compensation. Now, we have many illustrations of what may be done when the land of a religious association is taken, and there is strong feeling in the community in reference to it. The lands of the religious associations in France were taken a century ago, and while there was a pretense of compensation, every one knows that the result was confiscation. We do not want to have anyone say that the land of any religious association in the Philippines, taken under the guise of compensation, shall finally be taken by a process that amounts to confiscation.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. PERKINS. I ask unanimous consent that I may have five minutes additional only.

The CHAIRMAN. Unanimous consent is asked that the time of the gentleman from New York be extended five minutes. Is there objection?

Mr. SULZER. I do not want to object to the request of my colleague from New York; but yesterday when I asked unanimous consent for five minutes' additional time the gentleman from Indiana [Mr. CRUMPACKER] objected. Now, I will be more liberal than the gentleman from Indiana, and I do not object. [Applause.]

The CHAIRMAN. The Chair hears no objection.

Mr. PERKINS. Mr. Chairman, under the proceedings by eminent domain, authorized by this bill, the value of the land to be taken from these religious associations, which is stated to amount not only to hundreds of thousands but to millions of dollars, would be finally determined by the judges of the Philippine Islands, without any right of appeal. Now, the committee, in the act which they have prepared, have said in section 6 that in any case involving the amount of $25,000 the right of appeal shall be given to the Supreme Court of the United States. Yet here, in a case where popular feeling may be strongly excited and where the amount involved may be so large, no appeal is given to the Supreme Court.

Mr. GAINES of Tennessee. Will the gentleman yield for a question?

Mr. PERKINS. Certainly.

Mr. GAINES of Tennessee. Is the gentleman familiar with the fact that Governor Taft and the Taft Commission agreed with the friars in charge of these lands to submit a request to Congress that an appeal from the judgment of the Philippine Islands supreme court in the proposed litigation on this subject may be taken to the Supreme Court of the United States?

Mr. PERKINS. I was not aware of that.

Mr. GAINES of Tennessee. That was their opinion, and it is stated in one of the reports that they made. It is in the line of the suggestion that the gentleman is now making.

Mr. PERKINS. Then it seems to me all the more necessary, as we provide in this act a method by which these lands may be condemned, that such an appeal should lie.

Mr. Chairman, I have only to say, in conclusion, that it is our boast that we allow full and fair legal rights to every man in this land, no matter what may be his race, his creed, or his color. I do not want it to be said that in an act passing Congress at this session the rights which we secure to all other men, of full and final justice, was denied to the Philippine friar.

Mr. CRUMPACKER. Mr. Chairman, the bill contains adequate protection for the rights of all parties that may be affected under this particular section. The section authorizes the Government to secure the control of the friar lands, and its purposes are in a large measure political—for the purpose of pacification. Authority is given the insular government to buy and hold and dispose of lands owned and held by individuals, associations, or otherwise, where the holdings are in such large tracts or in such manner as to seriously affect the peace and welfare of the archipelago. The gentleman who offered the amendment suggests that there is a serious doubt about the power of the Government to take the lands under those circumstances, under the power of eminent domain. If he is right about that, then of course his amendment ought to fail. The amendment, as I understand it, provides for appeals in all this class of cases, without regard to the amount of property involved, from the courts of final resort in the archipelago to the Supreme Court of the United States, doubtless on the theory that the appeal is on the part of the landowner alone.

Mr. PERKINS. I am entirely willing that the gentleman should modify the amendment in any respect he thinks fit.

Mr. CRUMPACKER. I do not believe that any appeals ought to be provided in addition to those that section 6 contemplates. In the first place, appeal from the supreme court of the archipelago to the Supreme Court of the United States is a most vexatious, tedious, and expensive process; and that was the reason why the limitation was fixed in this bill at $25,000 in amount. Then the third clause of section 6 provides that in any and all controversies between the Government and religious associations involving the title to or ownership or the administration of trust land of a pious or religious character appeals will lie from the final judgments of the supreme court of the archipelago to the Supreme Court of the United States.

Mr. PERKINS. You do not claim that this allows an appeal in a proceeding to condemn the title of land and fix its value, because clearly it would not.

Mr. CRUMPACKER. Perhaps not. Some members of the committee believed that the provision is broad enough to cover it, and we all believe that questions arising out of ordinary condemnation proceedings may safely be vested in the supreme court of the archipelago. The members of that court are appointed by the President and confirmed by the United States Senate. It is composed of a majority of Americans, and probably will be long after these questions are settled.

Mr. PERKINS. Then, if that is the opinion of the gentleman from Indiana, why does he allow an appeal in case of a judgment exceeding $25,000?

Mr. COCHRAN. I make the point of order that the committee is not in order.

The CHAIRMAN. The gentleman will suspend until the committee is in order.

Mr. CRUMPACKER. It was the opinion of the committee that in cases involving such a large amount as $25,000 the ends of justice would be promoted by allowing appeals in that class of cases from the judgment of the court below. It was further thought that the right of appeal might be abused by corporations and those who had the means and facilities to protract litigation and wear out the poor man or the man of small means, and therefore a large limitation was fixed.

Mr. PERKINS. One more question, if the gentleman will yield to me.

Mr. CRUMPACKER. I will.

Mr. PERKINS. Does not the gentleman from Indiana know that the question of the title and condemnation of the lands of the friars involves vastly more than $25,000?

Mr. CRUMPACKER. Let me say to the gentleman, in answer to that, that if it involves more than $25,000, there is a right of appeal under section 6, because under that section in all cases involving $25,000 or more an appeal will lie from the final judgment of the supreme court of the islands to the Supreme Court of the United States, and that embraces the proceedings under this section the same as all other kinds of litigation.

Mr. GAINES of Tennessee. I move to strike out the last word.

The CHAIRMAN. That is not in order.

Mr. GAINES of Tennessee. Then I move to strike out the word "gold."

The CHAIRMAN. That is not in order. No amendment is in order.

Mr. GAINES of Tennessee. Then I move to strike out the paragraph.

The CHAIRMAN. That is not in order.

Mr. GAINES of Tennessee. I wish to oppose the amendment.

The CHAIRMAN. It has already been opposed.

Mr. GAINES of Tennessee. Not on this side.

The CHAIRMAN. The time for debate on this amendment is exhausted.

Mr. GAINES of Tennessee. Then I ask unanimous consent to address the committee for five minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to address the committee for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. GAINES of Tennessee. Mr. Chairman, it was suggested by the Taft Commissioners that a lawsuit or an agreed statement of facts should be made up and was made up and published in one of their reports. The supreme court in the Philippine Islands was to decide the ownership or title to these friar lands, with a right of appeal to the Supreme Court of the United States. That was recommended by Governor Taft, who said to me that that question should be finally adjudged by the Supreme Court of the United

States. The supreme court in the Philippine Islands is composed of three Americans and three Filipinos, and yet the distinguished gentleman from Indiana wants three Americans and three Filipinos to settle a question between the friars and the Filipinos. These agricultural lands alone, this report shows, page 62 in S. Paya's evidence, were worth $4,000,000 to $5,000,000 before the revolution of 1896. They are more valuable now I have no doubt.

The issue is, who owns these lands, whether Spain owned them and ceded them to the United States, or whether friars as friars or as individuals own them, or whether the Catholic Church owns them, or whether some one else owns them. As a matter of fact, the friars have sold all their land, as gentlemen can read in Senate Document No. 190, pages 54 and 61. They sold the lands to a man named Andrews, who represented a corporation. He got up this corporation to make this purchase and paid off the friars in stock, of which they own a majority. So you see that the friars, by their own testimony, and here it is in print, sold these lands. I will read a word or two, with the indulgence of the House.

Q. You were paid in shares, so that you own a majority of the shares in the corporation now?
A. Yes.

This is on page 54, Senate Document No. 190.

Then, over on another page (61) you will find the matter discussed at length. Governor Taft, of the Commission, inquired into the whole thing. He states:

You have sold all to a corporation, but, of course, you control the corporation, because you hold a majority of the stock. Therefore you could, for that corporation, sell this property to the Government?
A. All we have now, of course, is shares of stock.
Q. Yes; but that majority is in your control. You control the corporation and you would be willing to sell that to the Government?
A. We have the obligation which we have complied with to sell to Andrews; the sale was made to Andrews, and he afterwards got up the company.
Q. But with the understanding that he was to get up the company?
A. That was one of the clauses in the contract—that he would form an association and that we would take a part of the stock.
Q. Of course you know that the Government could take the property if it chooses—that is, for school purposes—that is, as they say in the Spanish law, "expropriate;" as we say in America "condemn" it, paying its value. But it is a great deal better if we conclude that we need it to settle the matter out of the courts, for court proceedings involve expenses, and it leaves a better feeling to settle the matter by contract, and I would like to know if you are in a situation to arrive at an agreement if we want the property?
A. Besides the understanding we have with Andrews, we would have to consult the Holy See.
Q. The Holy See has the good sense to trust to the discretion of the able head of the order who is here. It has been suggested—a Senator of the United States suggested it to me—that one of the means of avoiding the trouble which seemed to exist here was to purchase the property of the religious orders, and that if that evidence of their ownership was removed and the lands made Government property by the payment of money, a large part of the feeling against the orders would be removed. I only ask it with a view to bringing before the Commission the exact state of the case, so that we may judge of that suggestion.
A. The real reason why we conveyed our property to another party was to have nothing further to do with the administration of these agricultural lands, and to remove that complaint which was made against us that the friars owned all the lands and were making all the money.

So that, Mr. Chairman, it is very important to deal fairly with whoever owns this property, to deal with it with clean hands, and demand that those who deal with us shall have clean hands. If the friars own it, or anyone, high or low, they have the right under the law, a right regardless of the Constitution; they have it under the practice of this country, they have it under the Constitution of the United States, to be paid a just compensation; but the question is, Who owns it? That is the question, as Governor Taft states here in his report, and of course is one of law.

There is not a more gifted lawyer in the United States than Governor Taft, and not a better anywhere than Gen. Luke Wright.

Now, they say it is a question of law; and shall we submit that question to three Filipino judges and three American judges, or shall we submit it to the whole six and stop it there? Again, there may be some one who has title to these friar lands that is not worth $25,000. Why say $25,000? A man's property that is worth a thousand dollars or less is enough to give him an unimpeachable title, and he ought to have the same rights in a court of justice as the man who has $25,000. Give everybody a chance to appeal in this matter.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

The question was taken on the amendment; and on a division (demanded by Mr. CRUMPACKER) there were 37 yeas and 67 noes.

Mr. GAINES of Tennessee. Tellers, Mr. Chairman.

The question was taken, and tellers were refused.

Mr. JONES of Virginia. Mr. Chairman, on page 73, line 24, I move to strike out the word "five," the last word in line 24, and insert "four."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 73, line 24, strike out the word "five," and insert the word "four;" so as to read "not exceeding 4 per cent per annum."

Mr. JONES of Virginia. Mr. Chairman, the bonds which are provided for here are gold bonds. The principal and interest is to be payable in gold. It is expressly provided that they are to be exempt from all taxes by the Philippine government, by any local authority in the Philippine Islands, and by the Government of the United States. They are practically, and will so be regarded, as obligations of the United States Government. There is no question in my mind—and I do not believe any gentleman in this House doubts it—that these bonds can be sold and disposed of if made to bear 3 per cent interest, certainly at 3½, and it seems to me the maximum limit ought not to be more than 4 per cent. The Senate bill contains a provision providing for the purchase of these very lands and the bonds there provided are to bear not exceeding 4½ per cent interest.

Mr. LOUD. Does not the Government guarantee in that instance?

Mr. JONES of Virginia. The Government does not expressly guarantee, but it practically guarantees the payment of these bonds. It will be claimed by the purchasers that the United States is morally bound to see them paid.

Mr. COOPER of Wisconsin. Does not the gentleman from Virginia recall the fact that while the bill proposes to exempt these bonds from the payment of taxes or duties to the government of the islands, or any local authority in the islands, or the Government of the United States, it nevertheless does leave them open to taxation by States or municipalities in this country? They are only five-year bonds, and the committee thought there were enough there to increase the risk, so that 5 per cent was not out of the way.

Mr. JONES of Virginia. There is nothing in this bill which limits the sale of these bonds to citizens of the United States.

Mr. COOPER of Wisconsin. And I will say to the gentleman that there is nothing that prevents them from being sold here.

Mr. JONES of Virginia. Nothing in the world. They probably will be sold here, every one of them. When the gentleman says that the bonds provided for in this bill need not run for more than five years, he must know that the maximum limit is thirty years, and that the probability is that those who will control the issue and sale of these bonds will provide that they shall run for thirty years.

Now, the amount as I understand which it will require to purchase these lands will be somewhere between seven and eight millions of dollars. It has been stated upon the floor of this House, and it is true, that the Philippine treasury to-day has over seven millions of money in it. Now, I do not think that there is any necessity for giving the Commission such a wide latitude as this. There is no question that these bonds can be disposed of if the interest is fixed at 3 per cent. Certainly, 4 per cent bonds can be sold, and I hope that the House will not give this latitude to the Commission, when there is no earthly reason or necessity for it. They are gold bonds, they are to be exempt from taxation in the Philippine Islands and the Government of the United States can not tax them, the interest is payable in gold, and they can be sold upon the markets of the United States if made to bear 3½ per cent interest, or even less. Will anybody deny this?

Mr. GAINES of Tennessee. Mr. Chairman, I rise to a parliamentary inquiry. I made a motion just now to strike out the word "gold." The Chair ruled that that was out of order.

The CHAIRMAN. It was.

Mr. GAINES of Tennessee. Is it now in order?

The CHAIRMAN. No. The question is on the adoption of the amendment offered by the gentleman from Virginia.

Mr. LOUD. Mr. Chairman, I hope the amendment of the gentleman from Virginia will not prevail. This is not a political question, permit me to say, but a question of expediency. There is no doubt in the world but what if the Government of the United States would guarantee these bonds, they might be sold for 3 per cent. Taking into consideration all of the contingencies, all of the liability to taxation by municipalities and counties in the United States, the committee thought that it was wise to place the limitation of 5 per cent upon these bonds. I have no doubt in the world but what the Commission would issue these bonds at the best terms which they can secure.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Virginia.

The question was taken; and the amendment was rejected.

Mr. COOPER of Wisconsin. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GILLETT of Massachusetts, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2295, the Philippine government bill, and had come to no resolution thereon.

ISTHMIAN CANAL.

Mr. HEPBURN. Mr. Speaker, I now call up the conference report on the bill (H. R. 3110) for the construction of a canal connecting the waters of the Atlantic and the Pacific oceans.

The SPEAKER. The gentleman from Iowa calls up the conference report on the canal bill. The papers are now in the possession of the House, having been found in the Senate. The report and the statement have both been read. If there is no objection, they need not be again read.

There was no objection.

Mr. HEPBURN. Mr. Speaker, I move the adoption of the report by the House.

The SPEAKER. The gentleman from Iowa moves the adoption of the conference report.

Mr. HEPBURN. Mr. Speaker, in making this motion, I desire to say that I have not in any manner modified the opinions that I have heretofore had as to the wisdom of the action of the House on the 9th day of last January, when it adopted a bill authorizing the construction of this great waterway. I still believe that that measure was the wiser one that has received at any time the attention of the House. It was short, compact, and yet contained every provision, in my judgment, necessary to accomplish that work. It was drawn with this as the central idea, that in the construction of that great canal, many miles away from this capital and from this country, removed from that critical espionage that attends every work of that kind by reason of the press, it was essentially necessary, in order to avoid scandals and corruption, that there should be centralized in one person all power and all responsibility, that there should be one charged by the American people with this work, and that there should be no one with whom the responsibility should be divided or behind whom any man might hide.

The bill that the House passed accomplished that purpose. It contained all the provisions conferring authority—authority for negotiation, authority for purchase of the zone of the canal. It contained provisions with reference to appropriations. So that all power needed for the accomplishment of the work was fully contemplated in that bill and freely given. It also selected a route—a route approved by more than half a score of those commissions that had been charged with the duty of selection. It adopted a route that had been approved after fifty years of careful, patient investigation. It approved a route that the legislatures of the States in great majority, conventions of the people all over the country, and three great national conventions had specifically and by name approved. The press of the country was almost a unit upon this subject; and when any man spoke of this great enterprise and its accomplishment he had in his mind the Nicaragua route as determined upon by every medium that could voice public opinion.

The measure that is now reported is primarily for another route, although conditions are in the act adopted by the other branch of Congress which, in my belief, may still look to and possibly still accomplish the construction of the Nicaragua Canal. But the whole theory of construction is changed. Instead of having one directing mind, there are to be seven. Instead of having one whose interest would be for speedy completion, the present act suggests delay and makes it the interest of a commission of seven persons to prolong the labor, for they are to hold office until the completion of the canal unless the President should see fit at an earlier day to dispense with their services. It is a commission that is to cost thousands and tens of thousands of dollars a year, with a provision for a great staff, unlimited in number, and the expense of which at this day no man can compute; nor can he do so until he searches the minds of all those who will have influence and power to bring to bear upon the commission for places for their friends.

But, after all, Mr. Speaker, the conference committee concluded that with all these defects it was better to start; it was better to do something. Under the terms of this bill, before a pick can be struck upon the Isthmus in furtherance of the general design of the bill months and months, if not years, must elapse; so that if mistakes have been made there will be opportunity for correction before great evil other than delay can result. And so we have made this report, recommending the adoption of the Senate legislation and the beginning of some work in the direction of the accomplishment of the enterprise.

Mr. Speaker, I desire to reserve my time.

Mr. RICHARDSON of Tennessee rose.

Mr. HEPBURN. I yield to the gentleman from Tennessee.

The SPEAKER. How much time?

Mr. RICHARDSON of Tennessee. I do not want any time; I just want to ask the gentleman from Iowa a question or two. As to the exercise by the President of the option to acquire the Panama Canal and to continue the work upon that route, how much time is given him in the bill?

Mr. HEPBURN. A reasonable time.

Mr. RICHARDSON of Tennessee. Has the gentleman any idea what that means as to the length of time? Because I think that is a matter which would operate largely with many members in regard to the casting of their votes upon this proposition. If it can be understood that the meaning is not too long a time, it seems to me that would be an inducement to support the measure.

Mr. HEPBURN. Mr. Speaker, I am not able with any accuracy to enlighten the gentleman. But I may say this: A proposition was made in another branch of Congress for a limitation—in fact, there were three such propositions, one a limitation for six months, which was not agreed to; another for twelve months, which was not agreed to; and another for eighteen months, with a like result.

Mr. RICHARDSON of Tennessee. Does the gentleman understand that any action taken elsewhere is to be regarded as an indication that such delay is desired upon the part of Congress? For one I would not want to vote for the measure—I do intend for this report, but I would not wish to do so if I thought that it meant that such delay was intended by Congress. I think that quite a large number of gentlemen on this side of the House, and perhaps on the other side, too (for I have heard expressions to that effect), would not vote for this proposition if it was understood that the intention on the part of Congress was that there should be delay even for six months.

Mr. HEPBURN. Mr. Speaker, I think it proper for me to say that the House conferees sought an amendment which would limit that discretion to six months, stating that in their opinion the action of the other body might be regarded as a legislative construction of what a "reasonable time" would mean—as something in excess of eighteen months. It was stated on the other hand that there was nothing of that sort implied in the action taken; that the voting down of those motions meant nothing of that kind. As was stated, those matters were regarded as simply in opposition to the general bill which was under consideration, and could not possibly have any such legislative construction. I think it proper that I should say that.

Mr. RICHARDSON of Tennessee. Mr. Speaker, may I ask the gentleman further, on account of his great familiarity with this question and his experience as a legislator, is it, in the opinion of the gentleman, possible for us to get any other canal route secured at this session of Congress or during this Congress if this report is rejected?

Mr. HEPBURN. Mr. Speaker, if I had thought it was possible to secure other legislation than this I would not have consented to the action I now recommend. I consent to it because I believe that at this time it is this or nothing.

Mr. WILLIAMS of Mississippi. I will ask the gentleman if it would be too late now for the House itself to put a time limit upon the exercise of this discretion by the President?

Mr. HEPBURN. I think it is.

Mr. WILLIAMS of Mississippi. Does the gentleman think that an attempt of that kind on the part of the House would defeat the bill?

Mr. HEPBURN. I think so. I will say in justification of that opinion that all of the amendments that were suggested by your conferees were rejected; that there was no semblance of disposition manifested to yield anything in the way of change or amendment; that we ran up against an adamant wall.

Mr. WILLIAMS of Mississippi. Does not the gentleman think that perhaps if we reenforced the opinion of our conferees by action of the House fixing a period for the exercise of this discretion we might be able to get over that wall?

Mr. HEPBURN. Well, with all of my hopefulness for securing the passage of the House bill, with all of the firm belief I have that we were right, I say to the gentleman, in all sincerity, that I would never have consented to this adjustment if I had believed that there was any better possible——

Mr. WILLIAMS of Mississippi. I hope the gentleman understands me. I am in most hearty sympathy with the gentleman upon this question. We always have been perfectly at one about it. My idea now is to help him as far as I can; but the idea just struck me that perhaps if the House were to agree with an amendment fixing a period within which this discretion should be exercised that the Senate might possibly accept that amendment. If the gentleman from his knowledge of the actual condition—and his knowledge is so much greater than mine that mine is not worth being mentioned in the same breath—thinks that is impossible or impracticable, why, I think his opinion is worth more upon the subject than mine; but if there is a chance to do it at all, I should think it is worth trying.

Mr. HEPBURN. Mr. Speaker, it is my belief that it is this legislation or no legislation by this Congress.

Mr. RICHARDSON of Alabama. Will the gentleman allow me?

Mr. HEPBURN. Certainly.

Mr. RICHARDSON of Alabama. I should like to call the gentleman's attention to the first section of the bill, in which the amount of $40,000,000 is provided, and particularly to call the gentleman's attention to the use of the word "own" in referring to the New Panama Canal Company. What is the gentleman's opinion as to the limitation of that word "own" as used in that section? Does it not mean that the $40,000,000 will have to be paid to the New Panama Company whether it owns these things or not?

Mr. HEPBURN. Mr. Speaker, I have no doubt that the language of that law would authorize the payment of $40,000,000 to the New Panama Canal Company for whatever it may have, much or little, but I have no belief that the President of the United States would pay that amount of money until he was satisfied that he was securing a title to all the property that may be owned by the New Panama Canal Company or by its predecessor company, including franchises, visible property, and everything.

Mr. RICHARDSON of Tennessee. But as a lawyer, does not the gentleman admit that that paragraph and the use of that language is mandatory upon the President of the United States?

Mr. HEPBURN. No, sir; I do not think that it is mandatory, in the sense that the President would pay $40,000,000 for that property, as the gentleman from Alabama and myself believe it to be vested in the New Panama Canal Company; for I am free to say that, in my judgment, the New Panama Canal Company own nothing that we care to buy.

Mr. RICHARDSON of Alabama. Is it not a fact, further, if the gentleman will allow me, that the New Panama Canal Company stands simply in a fiduciary capacity, that it is a trustee for the old company, and really, as the gentleman has stated, owns nothing?

Mr. HEPBURN. Mr. Speaker, as I understand this subject the New Panama Canal Company became, as a trustee, in 1893 or 1894, in possession of all the property owned by the old company. They were invested with that property for certain and specific purposes. They were to undertake the enterprise of the completion of the canal. They were to finance that enterprise. They were to construct the canal, to maintain it, to operate it. Then there was a provision for the disposition of the revenues, and among the provisions was this: That 40 per cent of a certain residue was to be given to the new company and 60 per cent was to be the property of the old company. They were to construct it, they were to operate, they were to finance, they were to be the custodians of the revenues, and they were to apportion them in the well-defined proportion that I have suggested.

Mr. BURTON. Will the gentleman give me ten minutes?

Mr. HEPBURN. I will yield to you later on. I yield to the gentleman from Ohio.

Mr. GROSVENOR. I do not ask the gentleman to yield to me. I want to ask him a question.

Mr. HEPBURN. I have not finished this inquiry, I will say to the gentleman.

Mr. GROSVENOR. Very well.

Mr. HEPBURN. Now, that condition existed until the 23d day of last December, and here dates throw some light upon this subject. On the 21st day of last December the House, by unanimous consent, agreed to consider a bill then pending before it authorizing the construction of the Nicaragua Canal on the 7th of the next month. On the 23d day of December there was another arrangement made between the new company and the liquidator of the old company—an arrangement by which the New Panama Canal Company were to have control of the negotiations of sale to the United States, a clear and a distinct recognition of property rights still remaining in the old company.

An agreement further was made for the adjustment and the disposition of the property which, in my judgment, simply gave to the New Panama Canal Company a new power, the right as attorney in fact of the old company to negotiate the sale to the United States. Now, then, if there was in the provision of this bill authority in the President of the United States to pay $40,000,000 for the property of the New Panama Canal Company and for the property of its predecessor company, I think there would have been no trouble; but the conferees on the other side disagreed with us, thinking it unnecessary, and would not consent to the insertion of the words "and predecessor company."

Mr. GROSVENOR. What I desire to ask the chairman of the committee is this question. Suppose that a limit of time be put into the bill by the House, and an acceptance or an agreement by the Senate, would not that one provision operate to put into the hands of contesting or competing interests the power to delay the negotiations, so that in the end it would be an element fraught with danger of defeat, rather than an incentive to early and practical conclusion of the negotiations between the Presidents, under the powers given in this bill? In other words, might not a condition exist in Colombia or some other States down there to prevent, under various ways known to diplomacy and intrigue, an arrangement, so as to let the time limit expire, and then the President would be powerless to carry into execution the authority to build either one of these canals?

Mr. HEPBURN. Of course, Mr. Speaker, there are contingencies of that kind that might arise, but the one suggested by the gentleman is the least probable, to my mind, to arise. There are no interests, I take it, on either of these routes that are going to interfere with this project. The possibilities of the future for either one of these countries are dependent upon this question. It is to one of them at least what our entire internal system of transportation is to the United States; to the other one it is that if it loses the canal that loss means the loss of all possibility of progress to Colombia. So that I do not think there is difficulty there. But there may be a difficulty elsewhere, and the very suggestion that there are other interests, made by the gentleman, that interfere is one of the things that we ought to have been apprehensive about and ought to have looked to in this bill.

Mr. BALL of Texas. Will the gentleman allow me to ask a question?

Mr. HEPBURN. I will.

Mr. BALL of Texas. If this conference report is agreed to and the bill becomes law, will it be possible to begin work upon the construction of this canal until that treaty has been submitted to the Senate and ratified by that body?

Mr. HEPBURN. I think not; and that is one of the objections that your conferees, Mr. Speaker, have to this bill, because, after we have paid our money, after we have secured our treaty, it would then be possible for the other branch of Congress to hold up the entire enterprise if less than two-thirds were in favor of this canal. I was unwilling to put that power into the hands of that body.

Mr. COOPER of Wisconsin. Will the gentleman allow me to ask him a question?

Mr. HEPBURN. Certainly.

Mr. COOPER of Wisconsin. In view of the statement of facts just made by the gentleman from Iowa, is the statement which we have so frequently heard, that this would inevitably result in some canal, true?

Mr. HEPBURN. I think it is, because the President may fail in this negotiation. I think that he will fail, under the terms of this bill, in getting the property of the Panama Canal, and then the alternative proposition will operate, and he is authorized to construct a canal on the other route.

I now yield to the gentleman from Ohio, reserving the remainder of my time, Mr. Speaker.

Mr. BURTON. Mr. Speaker, I am sure the country will give full credit to the gentleman from Iowa [Mr. HEPBURN] and his associates on the conference committee because they have yielded their convictions relating to a route, and their convictions relating to a bill, because of their anxiety for a canal. But I favor the adoption of this conference report for entirely different reasons from those which they allege. I believe in the first place that the Panama route is altogether the better route, and I believe in the next place the Senate bill is the best obtainable bill.

The growth of opinion on behalf of the Panama route has been slow. For twenty-five years this proposed canal was controlled by foreign companies, one of which, in the prosecution of the work, unfortunately incurred serious scandal. The demand of the American people was and is for a canal owned and controlled by the United States. Hence for twenty-five years the Panama route was entirely excluded from consideration. A national canal became not merely a matter of sentiment, but of deliberate choice.

The Panama route was out of the question, and the word "Nicaragua" became the name for a canal under the control of this Government. In that name there is nothing more than a purpose for a canal which shall be ours. Political planks and platforms, national or State, go for naught when it appears that there is a better route along another way, where the same conditions can be fulfilled, namely, ownership by this country.

Now, if there is anything in expert opinion, the Panama route is the better. There is hardly an engineer of prominence in this country who does not prefer it. There is hardly a scientific journal of any authority which does not advocate it. I am violating no confidence when I say that our commission, a commission made up of leading engineers of this country, went there with a predilection—aye, I may say with a bias—for the Nicaragua route, and yet, when they had finished their work, they gave an unanimous opinion in favor of the Panama route.

Gentlemen, that means more than the resolutions of a political convention gathered together to consider a multitude of political and other questions and hastily adopting what they regard as the sentiment of the people. It furnishes more than party platforms; it gives the basis for a wise choice.

Now, in view of the offer of last January and the report upon it the Panama route can be a national route as well as the Nicaragua.

It has not been before us until this time. I find no fault with the House for its action of May, 1900, although with 35 others I voted against the bill pending at that time. I voted myself for the Nicaragua route in January of this year, but there was no other route before us. Now there is another, and by reports and investigations a flood of light has been thrown upon the situation. If the Nicaragua route should be selected, I firmly believe a national blunder would be committed. The Panama route is the shorter, with less curvature, along a pathway of traffic for four hundred years and with a railway already constructed, with conditions more intelligently understood and less danger of unforeseen obstacles.

They say there is pestilence there. Gentlemen, I have confidence, not alone in Yankee ingenuity, not alone in Yankee push, but also in Yankee doctors and sanitary regulations which we may enforce. We went to Cuba with some fears because a portion of the island had been a charnel house from yellow fever, but under American regulations, with American sanitary arrangements, for nine months there has not been a single case of yellow fever in that island. I believe that we can do the same thing at Panama. I believe in the Senate provisions. With a time limit it would be possible to defeat any canal at all. If we have a treaty it must pass the Senate by a two-thirds vote. Suppose there is a policy of obstruction, how easy it would be to postpone it beyond six, twelve, or eighteen months? The treaty must be made with Colombia, with the play of selfish interests on behalf of both canals. How easy it would be to postpone that treaty. Bogota, the capital of Colombia, is one of the most remote portions of the earth, as regards mail communication. It is more remote than Pekin. What we are doing to-day, I take it, has some character. It is not an academic opinion as to the better route, but is a deliberate choice of routes. Shall we say that the Panama route is the best route until 12 o'clock noon, at the expiration of six months, but that when the clock then strikes some other route is better?

The full responsibility of this enterprise is lodged just where it belongs—with the President of the United States. With the great responsibility of his office, and with his own anxiety that this great national work should be commenced, and commenced promptly, it can be safely left to him.

In regard to the argument against this proposed commission, I do not exactly see how the Secretary of War can control this work in any better way. It is not expected that the President or the Secretary of War shall go to Panama or Nicaragua and take charge. Either would have to leave the work to subordinates; and if this commission should dally and delay or try to do so, it will be in the power of this Congress to abolish the commission and put some officer or organization in its place that will go on promptly with the work, in pursuance of the demands of the American people. Gentlemen, I do not believe that lengthy discussion is necessary.

Just one word about this new company. As I interpret the law in regard to it—and I gave this question considerable examination three years ago—if ever all the property of one company was turned over to another, it was done in the transfer from the old Panama Company to the new, which now has exclusive right on the Isthmus and has for years been prosecuting this work. Do we want the few rights left over—perhaps the furniture of the old Panama Company in Paris——

Mr. HEPBURN. Will the gentleman allow me to ask him a question?

Mr. BURTON. Yes, sir.

Mr. HEPBURN. Do you believe that under the contract under which this property was turned over by the liquidator to the New Panama Canal Company, say three years ago, they had the power to convey a good title for the property to the United States?

Mr. BURTON. I do, most decidedly, and in pursuance not only of the action of the court, but of a law passed by the Chamber of Deputies; and all that is left of this old company is a right to issue lottery bonds and some few odds and ends. Do we need, for the prosecution of this enterprise, to put in a provision that the property of the old Panama Company shall be transferred over to us? Do we have any anxiety for the right to issue lottery bonds?

Mr. HEPBURN. Will the gentleman permit another question?

Mr. BURTON. Yes, sir.

Mr. HEPBURN. Of course, the gentleman knows that there is nothing in that answer but flippancy. I want to ask him this question: Has not the old company a right even at this day to 60 per cent of the earnings of the new company?

Mr. BURTON. Not under the present decrees of the court. The original condition was as I stated.

Mr. HEPBURN. That decree of the court was made on the 28th day of last December, was it not?

Mr. BURTON. I believe so.

Mr. HEPBURN. And up to that date this company had this interest in the earnings of the canal that the other company was bound to construct and operate?

Mr. BURTON. Nevertheless that would not have stood in the way of their right to dispose of it.

And I want to say that this is not "flippancy." I am unable to find in the record anything of importance except a few odds and ends and that very valuable right—the right to issue lottery bonds.

Now, Mr. Speaker, I hope no member of this House will vote against the adoption of this report. For seventy-five years—since 1826—this project has been talked of and agitated in this country. For four hundred years it has been the talk of men of many nations. There has been necessary delay, for time has been required for examination. But now we have come to a time when we can make a sensible choice and take a sensible vote. Preliminary steps have been taken and examinations made, and this day—this 26th day of June, 1902—it is in the power of Congress to declare that we will have a canal between the two oceans, and I say, Way for the canal! Make way! [Applause.]

Mr. HEPBURN. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, the people whom I represent, and I believe the people of the whole Mississippi Valley, are in favor of the Nicaragua route, because it is to their interest to be in favor of it. The great Mississippi River carries their commerce to the Gulf; and that route which would bring the vessels passing through an isthmian canal nearer to the mouth of the Mississippi River would, as a matter of commerce, be vastly to the interest of the people of the Mississippi Valley.

But whether a canal is built at Nicaragua or at Panama, the whole people of the United States will be benefited by the building of that canal. Freight rates and the cost of transportation are the key to all commerce. If the people of the United States, if the Congress of the United States are right in believing that water transportation across the Isthmus will reduce freight rates, then it will build commerce; it will open markets; it will clear the way to the ports of the world for our commerce in the future. I believe the hour has come to-day when we can build a canal. We may not be able to build the canal that some of us believe to be the best canal, but I believe that it is manifestly to the interest of the whole people of the United States that an isthmian canal should be built.

Believing that if we can not have the legislation which I believe to be the best, I am willing that legislation—although I do not believe this to be the best, yet which I know is to the interest of my country—should be passed, and for that reason I intend to yield the fight that I have made heretofore for a canal on the Nicaragua route and vote for this bill. More than that, it may be in doubt—it is a doubtful question—as to whether a title can be delivered to the Panama route.

If the advocates of that route fail to satisfy the President of the United States that they can give a good title, then we have the opportunity of getting the Nicaraguan Canal, the canal that we want, and it may be our only opportunity; so that I say now, the way being clear, I can see no reason why any man who is in favor of a canal, or any man who wanted the Nicaraguan route, should not be willing to accept this bill as the best compromise that we can get, for there can be no doubt about the fact that if we reject this conference report we will get no legislation at this session of Congress and we may never get legislation in the future. I believe the President of the United States is earnestly in favor of the canal. I believe the President of the United States wishes to carry out the will of the people on this question, and I believe that when this bill passes and the power is put in his hands to act, he will use that power toward building a canal, either at Panama or Nicaragua, and whichever we get will result in great benefit to the masses of the people of our country.

Mr. HEPBURN. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. RICHARDSON].

Mr. RICHARDSON of Alabama. Mr. Speaker, I have, as I indicated in the question I propounded to the distinguished gentleman from Iowa, the chairman of the Interstate and Foreign Commerce Committee, grave doubts about the use of the word "owned" in the first section of this bill. I believe the language used in that section is mandatory on the President and he would have to pay the $40,000,000 to the New Panama Company, whether that company "owned" valuable properties or not. It promises, at least, complications and probable litigation. I would not undertake unnecessarily to make a quibble upon the words of this section. The section, it seems, leaves loopholes for delay and trouble and this, I fear, would mean no canal. I do not concede to anyone on this floor a greater interest and solicitude for the construction of an isthmian canal than I entertain. The future prosperity, the wealth of the South, and especially that of Alabama, depends upon an isthmian canal.

I am aware, Mr. Speaker, of the great and heroic struggle that the distinguished chairman of the Interstate and Foreign Commerce Committee [Mr. HEPBURN] has had to yield his views and his convictions in favor of a Nicaraguan canal. I have watched and applauded his unremitting labors on the Interstate and Foreign Commerce Committee in behalf of the Nicaragua Canal. I know that this project has been near to his heart, for in season and out of season he has stood unfalteringly for the Nicaragua route. I have gladly followed his leadership. I can not, Mr. Speaker, forget here now the keen disappointment that the substitution of the Panama for the Nicaragua route carries to the brave, trusting heart of one of the most distinguished citizens of the South—the great statesman and Senator from Alabama, JOHN T. MORGAN—who has devoted more than twenty years of labor and toil of his useful life and his great intellect to the construction of a Nicaraguan canal. He, too, I am told, has yielded his convictions to the inevitable. I know, Mr. Speaker, that it was a great, great effort for these two distinguished gentlemen to yield their convictions and partiality for the Nicaragua route. It speaks louder than any words I can use for their patriotism and statesmanship. Their example has made it easy for me to abide the results of the conference committee of the two Houses. I am willing, and will to-day in the vote I make, surrender my own individual convictions and vote for the conference report. I do this, Mr. Speaker, without yielding one jot or tittle of my belief that the Nicaraguan route is preeminently the best.

I believe that the conference committee on the part of the House have made an honest, earnest, and noble effort to impress their convictions on the conferees of the Senate; but, as the gentleman from Ohio [Mr. BURTON] has said, the time has come with us now, and we have been considering it in this country for fifty years, to accept a plan that proposes to give us the construction of this great isthmian canal, and I believe that it is my duty to my people—while I know with what great unanimity the people of that section of the South are wedded to the Nicaraguan route—to vote for the conference report—the Panama route—and I believe in the exercise of their good judgment, their patriotism, and their common sense they will ratify the vote that I will cast here to-day.

Mr. HEPBURN. Mr. Speaker, I yield to the gentleman from Illinois [Mr. MANN].

Mr. MANN Mr. Speaker, I think that we are one step nearer to a canal, and I wish to remind the House that for that step we are indebted to the courage, statesmanship, and persistency of two men, a courage which at times has been subjected to severe criticism, but which has never quailed. One of these men is JOHN T. MORGAN, of the Senate of the United States [applause], and the other, the gentleman from Iowa, Mr. WILLIAM P. HEPBURN. [Prolonged applause.]

Mr. Speaker, in January last this House passed the bill for the Nicaragua Canal. That bill went to the Senate and the Senate struck out all of the provisions of the bill after the enacting clause, and substituted in place thereof a bill for the Panama Canal. This House as a matter of form disagreed to the Senate amendment or substitute and asked for a conference. The managers of the conference on the part of the House and the Senate have made and have finally reported in favor of the adoption of the Senate substitute, which provides for the construction of the canal at the Panama route.

Mr. Speaker, I am in favor of adopting the conference report. Many of our people prefer the Nicaragua Canal route; many prefer the Panama Canal route; some prefer the San Blas or tunnel route. But, after all, the principal object in view is the construction of an actual canal. We want to make our contribution to progress and civilization by constructing a waterway between the Atlantic and Pacific oceans. I doubt very much whether it will ever be profitable financially. I question the advisability of it so far as aiding in our naval defense. But the people of our country wish to construct a canal and they are willing to pay for it. When finished it will be the realization of the dream of centuries.

But, Mr. Speaker, my object at this time is not to discuss the desirability of the canal, but to point out very briefly some facts in connection with the history of this legislation. When I was elected as a member of the Fifty-fifth Congress in 1896, and was assigned as a member of the Committee on Interstate and Foreign Commerce, I found that proposed legislation in regard an isthmian canal was then an old story.

The proposition then before that committee was to aid the Maritime Canal Company in the construction of a canal on the Nicaragua route. That was a private corporation and it had been seeking for years to obtain financial aid from the Government to build the canal. I found that the chairman of our committee, the gentleman from Iowa [Mr. HEPBURN], was not looked upon as a friend of canal legislation. It was openly insinuated that he was opposed to the construction of a canal at all. We had extensive hearings before our committee in that Congress, both in regard to the Nicaragua Canal route and the Maritime Canal route, and in regard to claims both on the part of the Maritime Canal Company and other companies claiming concessions over various proposed canal routes. It was not long until it came to me that our chairman was not opposed to canal legislation, but that he was opposed to have the Government furnish the funds for the construction of a small and cheap canal for the benefit of a private corporation which would reap all the profits.

Up to that time there had been no serious proposition urged in Congress that the Government itself should build the isthmian canal. The Clayton-Bulwer treaty with England stood in the way of a Government canal. It seemed quite certain that Congress would not furnish its financial support to the Maritime Canal Company or any other private corporation for the construction of the canal. The great Senator from Alabama [Mr. MORGAN] was giving his attention in the Senate to proposed canal legislation, and was urging that aid be given to the Maritime Canal Company. Apparently all paths toward the construction of a canal seemed to have insurmountable obstacles in front.

I rise to my feet here to-day mainly for the purpose of performing a plain duty to the members of this House and to the country by calling attention to the stroke of genius shown in the leadership of the chairman of our committee [Mr. HEPBURN]. While others were bewildered and in doubt, the sagacity, the courage, and the leadership of Colonel HEPBURN looked down a straight road ahead. He prepared and submitted to our committee a bill proposing that the Government itself should construct, own, operate, and defend an isthmian canal.

The route proposed, it is true, was the Nicaragua route; no other route could then have been proposed. The Panama people at that time were standing to one side with lofty haughtiness in the vain expectation that it could hold up this country and compel us to pay a couple of hundred millions of dollars for the Panama route. The members of our committee studied the subject with great care and consideration, and we finally reported to the House the Hepburn bill in the Fifty-fifth Congress. At that time the Maritime Canal Company was claiming an exclusive right to the Nicaragua Canal route. The Cragin Syndicate was also claiming an exclusive right to the Nicaragua route. The Panama Company was announcing with bold directness that it proposed to finish the Panama Canal, and that the Panama Canal was not for sale under any circumstances. That company announced that it had the funds in sight with which to finish the canal. The Clayton-Bulwer treaty was in force forbidding the construction of a canal by this Government, or the ownership or defense of it by our country. The Gordian knot of an isthmian canal had bothered statesmen for years. Many had attempted to untie it. Colonel HEPBURN proposed to solve the difficulty by boldly cutting the knot in two. This was the proper solution. The result of the Hepburn bill in the Fifty-fifth Congress was that the new Isthmian Canal Commission was appointed by a provision in the river and harbor act of 1899. That Commission is the one which has just recently reported.

Another result came from the Hepburn bill. Plain notice was served upon our own State Department and upon England as well that the committee of this House having jurisdiction of the subject was in favor of passing a bill directing the President in behalf of this nation to construct the canal, notwithstanding the provisions of the Clayton-Bulwer treaty. It is divulging no secret now to say that it was the expectation of members of our committee that this bold and firm attitude on our part would lead our State Department to enter into negotiations which would result in the abrogation of the Clayton-Bulwer treaty. That result has also been finally accomplished. We are now freed from any treaty obligations which would prevent us as a nation from owning and operating the canal.

Another result came from the Hepburn bill. The Republic of Nicaragua had granted various concessions to private individuals and companies affecting the constructing of a canal over the Nicaragua route. The Hepburn bill, as reported by our committee, was a notice to that Republic that this country would not deal with these private interests, but would only deal with the Republic of Nicaragua itself in regard to the construction of the proposed canal. Under the sunlight of the Hepburn bill the miasma of difficulties affecting the construction of the canal were rapidly dissipated and disappeared.

In the Fifty-sixth Congress the Hepburn bill was again reported favorably by our committee and was passed by the House with an overwhelming vote. Consideration of it was defeated in the Senate in that Congress by those who were disposed to be the enemies of any canal legislation.

At the first meeting of our Commerce Committee of the Fifty-seventh Congress in December last the Hepburn bill was ordered reported favorably. Our committee had determined to force the fighting. We proposed to begin the campaign early. The Hepburn bill provided for the Nicaragua route, but the question

of a route was not the all-important question. We could not have reported in favor of any other route. The Panama route was not available. Many of the members of that committee, including myself, had been very favorably impressed with the advantages of the Panama route in the hearings which had been had before our committee. But the Panama people were holding back. They had refused to make a proposition to the Isthmian Canal Commission; they had refused to make any figures at which they would sell the Panama Canal assets; in other words, they thought that this Government would in the end be compelled to buy them out and would have to pay their price. The only way to force even a proposition out of the Panama people was to proceed with the bill in regard to the Nicaragua route. The enemies of any canal legislation were shouting for the Panama route.

Let me not be misunderstood. Many of those favoring the Panama route favored it from motives of pure sincerity. All who favored the Panama route were not against canal legislation, but I think all who were against any canal legislation were then favoring the Panama route. They believed the obstacles there could not be overcome. The Panama people could not be persuaded to make any proposition to sell until after the Hepburn bill had been reported out by our committee in December last, and had been made a special order for consideration in the House. Then the Panama people discovered that they were trying a "bluff" game which might not work. The results which followed are too well known to spend time upon. The House passed the Nicaragua route. The Panama people made its proposition to sell to the Government for $40,000,000. They sent here their attorneys and their agents, and commenced a propaganda to persuade Congress to favor the route and to buy their canal. They have succeeded. I confess I do not know whether their success is due to the fact that they have the better route or to the fact that they had a skilled lobby and made some powerful friends in this country with wide influence.

As I stated in my remarks in this House in January last, I do not think anyone can tell which is the better route. I would not give a fig for the opinion of the Isthmian Canal Commission upon this subject. A commission which reports one day in favor of the expenditure of nearly $200,000,000 on one route as the better place, and the next day reports in favor of another route as the better place, is evidently so nearly even balanced in mind upon the subject that its conclusion in favor of one or the other is of little importance.

I do not share with some of our friends the opinion that the New Panama Canal Company will be unable to make a perfect title in selling the Panama route to this Government. Under the bill which is now to become a law the Panana Canal route is worth $40,000,000 to sell to this country. It is possible that if it were not sold to this country it might be worth as much as $4,000,000 to entice some money out of gullible people in France, but it is quite certain that except for these two purposes it is not worth 40 cents. The rights and plant of the New Panama Canal Company to-day on the Isthmus of Panama are not an asset; they are a liability. They are not a source of income; they are a source of expense. The only value they have is to be sold to this country or to use in swindling people in France. There is no possibility of the Panama Canal Company ever being able to finish the canal. I take it, then, that there will be no loss of time on the part of the New Panama Canal Company obtaining, if it does not now have it, a perfect title, which it can sell and deliver to the United States. They will not miss this opportunity. If necessary, the courts of France and the Government of France itself will be brought into play.

If we adopt the Panama route, it is probable that the work which has already been done there may be worth as much as $20,000,000. It is not worth the $40,000,000 which we propose to pay, and if the Isthmian Canal Commission had not put the figure at $40,000,000 we would probably buy the rights of the Panama Company at a figure somewhat near their real value or about $20,000,000.

Mr. Speaker, under the leadership of Colonel HEPBURN this House has forced the fighting in regard to canal legislation. The enemy has consented to surrender upon terms. We might have said nothing but unconditional surrender and carried the fight into the next Congress and have won it. But it seemed better to offer terms to the enemy, and where there was no particular choice on our part between the Nicaragua route and the Panama route, to accept the Panama route if that would be more pleasing to the pride of those who were opposed to us. Under the bill which this conference report proposes the President will be authorized to commence the actual construction of a canal within a reasonable time.

It is true that a treaty must yet be negotiated with the country through which the canal runs, and that treaty must be ratified by the Senate, but this bill when enacted into law creates a distinct obligation on the part of our Government to proceed with the work of constructing the canal. We plight our faith; we will not betray our promise. I have devoted myself to the subject of canal legislation during three terms of Congress. I have stood with my best endeavors by the side of my leader, the chairman of our committee.

Mr. Speaker, I say again, in closing, that when a canal shall have been finally constructed that over the entrance to it from the Atlantic side should be inscribed on a monument of marble the following words: "This great work is due to the persistency and statesmanship of Senator JOHN T. MORGAN of Alabama and to the sagacity and genius of Representative WILLIAM P. HEPBURN of Iowa." [Loud and continued applause.]

Mr. HEPBURN. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Speaker, I am now, always have been, and always will be in favor of an isthmian canal connecting the Atlantic with the Pacific Ocean. It will be for the lasting benefit and to the great advantage of this Government in a larger degree than any other national improvement that can at present be undertaken. Heretofore, during all the time I have been in Congress, I have consistently voted for and advocated, time and time again, the building of the Nicaragua Canal, to be owned and constructed by the United States Government.

At the present time, Mr. Speaker, we are confronted with this situation: We must accept the Senate amendment for the Panama Canal, or have no canal at all perhaps for years to come. Under all the circumstances therefore, I am willing to vote for the Panama route. In other words, I am now in favor of the Panama route rather than have no canal. Under the terms of the Senate amendment to the House bill if the Government of the United States can not get a good, legal, and valid title to the Panama route, then the Nicaraguan route will and must be selected. I believe now, and have always believed, the Nicaragua route is much preferable to and has many advantages over the Panama route, and that ultimately the Nicaragua route will be selected, because I do not believe at the present time, from all I can learn, that a good and valid title can be acquired to the Panama route.

Now, Mr. Speaker, when such distinguished and able statesmen as Senator MORGAN, of Alabama, and the gentleman from Iowa [Mr. HEPBURN] are willing to subordinate their judgment on this matter and accept the Senate amendment I am willing to follow and vote with them. And I say great commendation is due the distinguished gentleman from Iowa for his efforts and his indefatigable work in favor of an isthmian canal, and I hope his motion to concur in the Senate amendment in accordance with the agreement of the conferees will be unanimously adopted. When the Senate passed the Panama amendment, in my opinion, it did not believe the House would ever accept it, and that the consequence would be no canal legislation during this Congress. I think the House should rise to the occasion now and disappoint the expectations of those who do not want a canal at all. Let us call the bluff of the enemies of an isthmian canal. [Applause.]

Mr. HEPBURN. I yield one minute to the gentleman from Minnesota [Mr. FLETCHER].

Mr. FLETCHER. Mr. Speaker, it is well known to the members of the Committee on Interstate and Foreign Commerce that I have at no time agreed with them on the project of the Nicaragua Canal; but to my mind the solution of this question must now be acted upon. I wish they had taken a little more pains in looking over what is known as the Darien route. What I contend is that a sea-level canal is more to be sought, if we are to have a canal, than any other. For that reason I have not seen fit to cooperate with the committee in recommending the Nicaragua route. But as it has come down to this point, and there is a universal sentiment throughout the land for a canal of some kind, and as this seems to be the only opportunity that we will have of getting a canal, I yield my judgment to that of greater and abler men who have given the matter more thought and consideration than I have, and I shall vote for and support the proposition for the Panama Canal.

Mr. HEPBURN. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has twelve minutes remaining.

Mr. HEPBURN. I yield three minutes to my colleague on the committee [Mr. ADAMSON].

Mr. ADAMSON. Mr. Speaker, under the leadership of our great and noble chairman, the distinguished gentleman from Iowa [Mr. HEPBURN] [applause], our Committee on Interstate and Foreign Commerce has labored long and faithfully in the interest of legislation to secure an interoceanic canal. After conscientious investigation, including the examination of the officials of the Panama Company on oath, we reached the conclusion that the Nicaragua route offered the best opportunities for our country and presented the most feasible and advantageous proposition.

We also recognized that as more desirable because it would be nearer our border and make a closer connection between the Atlantic and Gulf ports and our Pacific coast cities, giving us a domestic canal.

However, I am not dogmatic enough, even when sustained and supported by the cooperation of my colleagues on the committee, to set up my judgment in opposition to that of all the great and good men in the country who profess to desire canal legislation and prefer the Panama route. I hope we may have been mistaken. I hope that if the title be found good, the Panama route may prove desirable and feasible. If there are those who expect that the enactment of the Spooner amendment will result in defeating all canal legislation, and compassed its adoption in hope of creating confusion and preventing legislation, I believe they will be disappointed. In fact, they expected that we would reject the amendment and make ourselves chargeable with preventing legislation. It was a monumental bluff, and they are much more discomfited by our acceptance of the amendment than we are in its compulsory adoption. If they hope to succeed in this game by haggling and delaying the President by quibbles and complications tending to confuse, delay, and finally defeat action, they will be doomed to failure. I do not believe the President will allow them to trifle with him at all, but in such a case he would cut the Gordian knot and order the Nicaragua Canal commenced at once. I expect such tactics to be undertaken, and I rely upon the President to frustrate them.

In voting for this conference report I yield my judgment to that of my colleagues as honest as myself and more able than I can ever hope to be. But in so doing I do not surrender as one who has no hope. I not only expect a canal, but I prophesy that we will get the Nicaragua Canal. [Applause.]

Mr. HEPBURN. I yield three minutes to the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS of Mississippi. Mr. Speaker, it is hope deferred that maketh the heart sick. I do not believe that the action of the House to-day is going to result in the construction of a canal at Panama. I do believe, however, that the action of the House to-day will result finally in getting rid of the Panama entanglement.

I had not thought to say a word upon this subject, but I would not like the country to understand that the gentleman from Ohio [Mr. BURTON] is right when he takes it for granted that the House will vote for this conference because they believe the Panama route to be the best. I believe two-thirds of it think the Nicaragua route preferable, even though we shall vote for the conference report.

Mr. Speaker, if I had my way I would give $500,000,000 to put an interoceanic canal at Nicaragua rather than to put one at Panama for $25,000. Every reason—geographical, military, and commercial—leads me to that belief. A ship leaving New Orleans and going to San Francisco will require three days more time by Panama than by Nicaragua. To what absolute insignificance then does the first cost sink, when we consider the commercial expenses, the increased freights required by increased distance, running not for awhile, but for all time, if we put this canal at the wrong place. I would rather have a canal at Nicaragua for half a billion dollars—speaking for the people of the Mississippi Valley and the Gulf coast—than to have one at Panama for $25,000; and yet I would rather have a canal at Panama than to have no canal at all. And as this entanglement has been brought about, and as I believe that if this action will not result in the construction of a canal before the election and assemblage of the Fifty-eighth Congress, the Fifty-eighth Congress will become disgusted with the delay and further postponement, and will take up the matter and rush through a Nicaragua Canal bill, and that the people will require the Senate to see that it is carried through, I am willing to vote for this action to-day.

I would, of course, rather have the Panama Canal than to have none. It is of a great deal more importance to get rid of the immense distance around Cape Horn than to get rid of the difference of distance between the routes by Panama and by Nicaragua. But when you consider that three days in a trip from New Orleans to San Francisco means six days' loss in the round trip, and that means not only a difference of distance and of cost for each voyage, but a difference in the number of trips that can be had each year, interfering not only with the cheapness of transportation, but with the rapidity of the transportation, and with the volume of trade in the number of trips, it seems that the original cost involved in the two schemes makes no difference.

I think that there is but one possibility under which the Panama Canal ought to be a rival of the Nicaragua Canal in the estimation of the American people, and that is upon the supposition that the canal at Panama were a dead sea-level canal, as De Lesseps originally intended. Now, a dead sea-level canal can be built at Panama, but it will require a vast amount of money, perhaps a billion of dollars, to do it. It will require a great deal of money. It is an engineering possibility, as De Lesseps said. That was the sort of canal for that place. If we are to have a dead sea-level canal, then the saving in time and expense in ready passage through such a canal there would do much to make up for the loss of distance and time and money on the shore voyage.

Mr. HEPBURN. I yield two minutes to the gentleman from Arkansas.

Mr. McRAE. Mr. Speaker, I have a very strong conviction that the Nicaragua route is the proper one for this country. I have always favored it and still favor it. It seems to me that all of the arguments are in favor of that route except perhaps it is a little more expensive, and that should not control in a great public work like this. I regret with all my heart that the question now presented to us concedes at least the temporary, if not permanent—and I fear the permanent—loss of the proper route for an American canal connecting the Atlantic and Pacific oceans.

I deeply regret that this proposition comes in a way that we can not insist and, if necessary, adhere to the original position taken by the House. I would gladly join in voting down this report if the friends of Nicaragua on the conference would make further fight or could offer any hope that the Senate would agree to that route.

I wish that my friend the gentleman from Iowa, who has so ably led in this contest for that route and who has charge of this report, had at least given the House, under his leadership, an opportunity to again declare its belief in the route we want and the route he says he wants. Yet I must accord to him honesty of purpose when he says that this report is the best that can be had at this time, and that he thinks it ought to be adopted by this House.

Yet I believe it is the monumental blunder for this Republican Congress to substitute the Panama for the Nicaragua route. So far as I am concerned, I want it distinctly understood that I do not vote for this report because I prefer the Panama route to the Nicaragua route. I vote for it under protest and because I am assured by our conferees that nothing else can be secured by this Congress, in their judgment, for I prefer a canal by the Panama route to no canal. I will therefore follow the distinguished gentlemen from Alabama and from Iowa and vote for the report, believing that it is the Panama route or nothing as the matter is now presented. The country understands why and how in this contest over routes the Panama has triumphed, and the people will fix the responsibility where it belongs. They will understand why we have lost this fight and why we have to negotiate for a questionable title to an inferior route when we can now get a perfect title to a route that our people have demanded for years.

The SPEAKER. The time of the gentleman has expired.

Mr. HEPBURN. I now ask for the previous question on agreeing to the conference report.

The SPEAKER. The gentleman from Iowa demands the previous question on his motion.

The question was taken; and the previous question was ordered.

The SPEAKER. The question is on agreeing to the report.

Mr. BURTON. On that I call for the yeas and nays. [Cries of "No."]

The SPEAKER. The gentleman from Ohio asks for the yeas and nays.

Mr. BURTON. I think we ought to have a record vote on this.

The yeas and nays were ordered.

The question was taken; and there were—yeas 260, nays 8, answered "present" 3, not voting 80; as follows:

YEAS—260.

So the conference report was agreed to.

The following pairs were announced:

For the session:

Mr. DAYTON with Mr. MEYER of Louisiana.

Mr. YOUNG with Mr. BENTON.

Mr. BULL with Mr. CROWLEY.

Mr. WRIGHT with Mr. HALL.

Mr. BOREING with Mr. TRIMBLE.

Mr. IRWIN with Mr. GOOCH.

Until further notice:

Mr. SHELDEN with Mr. REID.

Mr. BARTHOLDT with Mr. SHACKLEFORD.

Mr. HAUGEN with Mr. LEVER.

Mr. CORLISS with Mr. DE GRAFFENREID.

Mr. FOSTER of Vermont with Mr. POU.

Mr. SKILES with Mr. TALBERT.

Mr. FORDNEY with Mr. BURGESS.

Mr. DRISCOLL with Mr. ROBINSON of Nebraska.

Mr. MORRIS with Mr. JACKSON of Kansas.

Mr. EMERSON with Mr. GILBERT.

For this day:

Mr. SULLOWAY with Mr. SELBY.

Mr. ROBERTS with Mr. MAHONEY.

Mr. THOMAS of Iowa with Mr. SPARKMAN.

Mr. WACHTER with Mr. WHITE.

Mr. PERKINS with Mr. MCLAIN.

Mr. MILLER with Mr. MCCULLOCH.

Mr. LITTAUER with Mr. LATIMER.

Mr. LAWRENCE with Mr. LASSITER.

Mr. HULL with Mr. HENRY of Texas.

Mr. GILL with Mr. MAYNARD.

Mr. GARDNER of New Jersey with Mr. ELLIOTT.

Mr. CROMER with Mr. EDWARDS.

Mr. BRISTOW with Mr. COONEY.

Mr. DAHLE with Mr. BUTLER of Missouri.

Mr. ALLEN of Maine with Mr. BROUSSARD.

Mr. ACHESON with Mr. BELLAMY.

Mr. HENRY C. SMITH with Mr. MCANDREWS.

Mr. CONNELL with Mr. HENRY of Mississippi.

On this vote:

Mr. COOPER of Wisconsin with Mr. SCARBOROUGH.

Mr. JOY with Mr. RUCKER.

Mr. RUSSELL with Mr. ROBERTSON of Louisiana.

Mr. WM. ALDEN SMITH with Mr. JETT.

Mr. SHERMAN with Mr. BELMONT.

Mr. BLAKENEY with Mr. GREEN of Pennsylvania.

Mr. BURKETT with Mr. SHALLENBERGER, for ten days.

Mr. WEEKS with Mr. SHEPPARD, for two weeks.

CONFERENCE REPORTS ON PENSION BILLS.

Mr. BROMWELL submitted reports of committees of conference in the following cases; which, in accordance with the rule, were ordered to be printed in the RECORD, with the accompanying statements of the House conferees:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 5856, "An act granting an increase of pension to Elizabeth A. Turner," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same.

H. C. LOUDENSLAGER,
WILLIAM RICHARDSON,
J. H. BROMWELL,
Managers on the part of the House.

J. H. GALLINGER,
J. C. PRITCHARD,
Managers on the part of the Senate.

The statement is as follows:

Statement to accompany conference report on disagreeing votes of the House and Senate on Senate bill 5856, granting an increase of pension to Elizabeth A. Turner.

This bill originally passed the Senate at $16 per month, but was amended in the House to $12 per month. The result of the conference is that the Senate recedes from its disagreement to the amendment of the House and agrees to the same, and your conferees recommend that the bill pass at $12 per month, as it originally passed the House.

H. C. LOUDENSLAGER.
WILLIAM RICHARDSON.
J. H. BROMWELL.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3320), granting an increase of pension to Adelaide G. Hatch, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

H. C. LOUDENSLAGER,
WILLIAM RICHARDSON,
J. H. BROMWELL,
Managers on the part of the House.

WM. J. DEBOE,
J. R. BURTON,
Managers on the part of the Senate.

The statement is as follows:

Statement to accompany conference report on disagreeing votes of the House and Senate on Senate bill 3320, granting an increase of pension to Adelaide G. Hatch.

This bill originally passed the Senate at $30 per month, but was amended in the House to $20 per month. The result of the conference is that the House recedes from its amendment, and your conferees recommend that the bill pass at $30 per month, as it originally passed the Senate.

H. C. LOUDENSLAGER.
WILLIAM RICHARDSON.
J. H. BROMWELL.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1225) granting an increase of pension to Clara W. McNair, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

H. C. LOUDENSLAGER,
WILLIAM RICHARDSON,
J. H. BROMWELL,
Managers on the part of the House.

J. H. GALLINGER,
WM. J. DEBOE,
Managers on the part of the Senate.

The statement is as follows:

Statement to accompany conference report on disagreeing votes of the House and Senate on Senate bill 1225, granting an increase of pension to Clara W. McNair.

This bill originally passed the Senate at $50 per month, but was amended in the House to $40 per month. The result of the conference is that the House recedes from its amendment, and your conferees recommend that the bill pass at $50 per month, as it originally passed the Senate.

H. C. LOUDENSLAGER,
J. H. BROMWELL,
WILLIAM RICHARDSON.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5506) granting an increase of pension to Clayton P. Van Houten, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment and agree to an amendment as follows: After the word "receiving," in line 9, add the following: "*Provided*, That at the expiration of two years after the passage of this act,

if the said Clayton P. Van Houten be then living, a medical examination shall be ordered, and the rate of pension allowed by this act shall be subject to change to accord with the degree of disability then existing;" and the Senate agree to the same.

H. C. LOUDENSLAGER,
J. H. BROMWELL,
WILLIAM RICHARDSON,
Managers on the part of the House.
P. J. McCUMBER,
N. B. SCOTT,
Managers on the part of the Senate.

The statement is as follows;

Statement to accompany conference report on disagreeing votes of the House and Senate on Senate bill 5506, granting an increase of pension to Clayton P. Van Houten.

This bill originally passed the Senate at $50 per month, but was amended in the House to $30 per month. The result of the conference is that the House recedes from its amendment, and the conferees agree to an amendment as follows:

After the word "receiving," in line 9, add the following: "*Provided*, That at the expiration of two years after the passage of this act, if the said Clayton P. Van Houten be then living, a medical examination shall be ordered, and the rate of pension allowed by this act shall be subject to change to accord with the degree of disability then existing."

And your conferees recommend that the bill pass as so amended.

H. C. LOUDENSLAGER.
J. H. BROMWELL.
WILLIAM RICHARDSON.

CIVIL GOVERNMENT OF PHILIPPINE ISLANDS.

The House, in accordance with its standing order, again resolved itself into Committee of the Whole on the state of the Union (Mr. GILLETT of Massachusetts in the chair), and resumed the consideration of Senate bill No. 2295.

The Clerk read as follows:

SEC. 16. That all lands acquired under authority of section 15 of this act shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, granted, sold, and conveyed by the government of said islands on such terms and conditions as it may prescribe: *Provided*, That actual settlers and occupants at the time said lands are acquired by the government shall have the preference over all others to purchase or otherwise acquire their holdings within such reasonable time as may be determined by said government.

Mr. JONES of Virginia. Mr. Chairman, I move to amend by striking out all after the word "islands," line 17, down to and including the word "government," in line 23, and inserting in lieu thereof the following:

And shall only be granted, sold, and conveyed to actual settlers and occupants at the time said lands are acquired by the government, not exceeding 40 hectares to any one person, and on such terms and conditions as it may prescribe.

The amendment of Mr. JONES of Virginia was read by the Clerk.

Mr. JONES of Virginia. The section to which this amendment is offered provides that the friar lands shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, granted, sold, and conveyed by the government of said islands on such terms and conditions as it may prescribe, provided that actual settlers and occupants at the time said lands are acquired by the government shall have the preference over all others to purchase or otherwise acquire their holdings within such reasonable time as may be determined by said government.

Now, this section as it stands will enable corporations, the organization of which is provided for in this bill, to acquire these friars' lands. Just what proportion of these friars' lands are now occupied and in the possession of individuals I do not know. I presume that a large portion of this land is so held. Some of it is timber and grazing land—just how much I do not know.

The preference given to actual occupants and settlers really amounts to little or nothing. Everybody knows that many of the occupants of this land are to-day in impoverished circumstances. It is a fact that many of the tenants have not been able for a long time to pay any rent for these lands. Now, what avail to them will it be to give them the opportunity to purchase this land in preference to anybody else within a certain time if they have not the means with which to purchase it? If the section is adopted as it stands, it will result in these occupants being dispossessed of their holdings; it will result in this land, which has already created so much trouble in the islands by reason of the fact that it is held by religious orders, going into the hands of large corporations; and instead of removing the friction and dissatisfaction and trouble that exist in the islands to-day on account of this land being held by religious orders, it will simply aggravate this bad feeling. The corporations which it is intended shall acquire these lands will not be in better favor with the inhabitants than are the friars.

Now, as I have said, the present occupants are not able to buy these lands. And why give them the option to buy if it be conceded—as it must be—that they are not able to buy? The result will be that the lands will become a part of the public lands of the islands, and will be disposed of as this bill proposes that those public lands shall be disposed of. By far the greater part of these lands are agricultural lands, and as such may, under the provisions of this most unjust bill, be purchased and held in 5,000-acre tracts by corporations.

My proposition is that this land shall be sold only to actual occupants and settlers, and that no person shall be permitted to obtain more than 40 hectares, or about 100 acres, the terms and conditions of such sale to be prescribed by the Commission. I hope the amendment may be adopted.

[Here the hammer fell.]

Mr. COCHRAN, Mr. SULZER, and Mr. CRUMPACKER rose.

The CHAIRMAN. The Chair feels obliged to recognize the gentleman from Indiana [Mr. CRUMPACKER], representing the committee.

Mr. COCHRAN. I give notice that I desire to offer a substitute.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. CAPRON having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 3110) to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 3519. An act granting an increase of pension to John Marble; and

H. R. 11019. An act directing the Secretary of the Treasury to bestow medals upon First Lieut. David H. Jarvis, Second Lieut. Ellsworth P. Bertholf, and Samuel J. Call, surgeon, all of the Revenue-Cutter Service.

The message also announced that the Senate had passed bills of the following titles; in which the concurrence of the House was requested:

S. 1468. An act for the relief of Henry Bash;

S. 1156. An act for the relief of John C. Ray, assignee of John Gafford, of Arkansas;

S. 251. An act regulating the duties and fixing the compensation of customs inspectors at the port of New York;

S. 4083. An act for the relief of Surg. John F. Bransford, United States Navy;

S. 6250. An act to regulate the use by the public of reservoir sites located upon the public lands of the United States;

S. 6232. An act for the relief of I. I. Barber;

S. 6123. An act granting an increase of pension to Thomas L. Collins;

S. 6023. An act for the relief of John Scott;

S. 5531. An act for the relief of James F. McIndoe;

S. 4986. An act to amend an act entitled "An act to receive arrearages of taxes due the District of Columbia to July 1, 1900, at 6 per cent per annum, in lieu of penalties and costs," approved February 15, 1902;

S. 4722. An act for the erection of a building for the use and accommodation of the Department of Agriculture:

S. 3248. An act to establish a fish hatchery and fish station in the State of Maryland;

S. 2865. An act for the protection of fish and game in the Indian Territory;

S. 2644. An act to promote the circulation of reading matter among the blind;

S. 2342. An act for the relief of the legal representatives of George W. Curtis, deceased;

S. 1668. An act for the relief of Custis Parke Upshur;

S. R. 97. Joint resolution to authorize certain officers of the Treasury Department to audit and certify claims of certain counties in Arizona;

S. 4611. An act to authorize the West Elizabeth and Dravosburg Bridge Company to construct and maintain a bridge across the Monongahela River in the State of Pennsylvania; and

S. R. 120. Joint resolution providing for the removal of shoal in North River, New York Harbor.

PHILIPPINE GOVERNMENT.

The committee resumed its session.

Mr. CRUMPACKER. I ask unanimous consent that the pending amendment be again reported in order that we may understand it.

The amendment of Mr. JONES of Virginia was again read.

Mr. CRUMPACKER. Mr. Chairman, it seems to me a few words will easily overthrow the argument of the gentleman who proposes this amendment. There are now over 400,000 acres of what are known as the friar lands, and the arable portion of those lands, the agricultural lands, are occupied in a large degree by tenants who have paid rent for several years. Perhaps some of them may assert an equitable right in the property which they occupy.

Now, if the sale and disposition of these lands shall be limited to the actual occupants of the lands at the present time and the

quantity shall be confined to 40 hectares each, not one-tenth part of the friar lands can be disposed of, because there are not enough occupants on the land at 40 hectares each to occupy one-tenth part of the lands in the controversy.

Mr. JONES of Virginia. Mr. Chairman, I would like to ask the gentleman a question. I do not know how that is, as to what part is occupied and what part is not occupied, but is not my friend aware of the fact that the Senate bill, which the bill of the committee seeks to amend, does not provide for the disposition of this land at all?

Mr. CRUMPACKER. The Senate bill does not provide for the disposition of any public lands. They are held in abeyance and that is one material weakness about the Senate bill which we believe——

Mr. COCHRAN. Mr. Chairman, I would like to ask the gentleman a question.

The CHAIRMAN. Does the gentleman yield?

Mr. CRUMPACKER. I prefer not to yield now. We believe that the public domain ought to be utilized at once for the benefit of settlers in order to permit a proper development of the islands. Now, the friar lands constitute something over 400,000 acres. A considerable portion of that, perhaps three-fourths of it, is farm lands, and we have vested the power in the Philippine Commission, giving the preference to actual occupants and settlers, to dispose of it upon such terms as they may provide, and if there shall be any occupant who is in a condition of poverty, who has any equitable claim to any portion of the land, the Commission may provide that he may buy it and pay for it in one, two, three, four, five, or ten years.

Mr. GOLDFOGLE. Mr. Chairman, I would like to ask the gentleman a question. Where does the gentleman find that exception or limitation to which he refers, the restriction on the Commission?

Mr. CRUMPACKER. There is no restriction upon the Commission, excepting the proviso in the section that gives the preference to actual occupants and settlers, and which authorizes the Commission to sell these lands upon such terms as they may deem just and equitable; so that the Commission has the power to protect the equitable and legal rights of every single occupant or settler. No man need suffer on account of the administration of this law, and it was deemed safer and wiser to vest this discretion in the Commission, who are on the ground, who may know the real conditions, than for Congress to undertake to make a law with hard and fast lines, absolutely providing for the method of disposing of these lands.

Mr. HAMILTON. I would suggest to the gentleman that, as I understand it, in the island of Mindoro, there are 60,000 acres of land unoccupied and undeveloped at this time, recently acquired, and in the Cagayan Valley 60,000 more.

Mr. CRUMPACKER. Yes; as the gentleman from Michigan suggests, there is considerable land in some of the islands practically undeveloped and occupied now for grazing lands, and under the amendment there will be absolutely no power to dispose of those lands.

Mr. SULZER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman is not in order.

Mr. COCHRAN. Mr. Chairman, I offer the following amendment as a substitute for the pending amendment.

Mr. CLARK. Mr. Chairman, a parliamentary inquiry. I would like to know how the Chairman comes to make that ruling time after time. Why can one not move to strike out the last word in this as in the sections of any other bill.

The CHAIRMAN. Because of the reading of the rule. There is, of course, always permitted an amendment to an amendment, but we are now considering this whole bill, which is an amendment, and only one amendment to that is in order. If a person moves to strike out the last word when no amendment is pending, it will be in order. When an amendment is pending it is not in order. Just now an amendment is pending.

Mr. CRUMPACKER. Mr. Chairman, I desire to make a point of order against the amendment submitted by the gentleman from Missouri. The substitute of the House is an amendment, and the gentleman from Virginia has properly offered an amendment to an amendment. Now, the gentleman from Missouri offers what is in effect an amendment to an amendment to an amendment.

The CHAIRMAN. The gentleman from Missouri offers this as a substitute to the amendment, not as an amendment to the amendment. There is some question whether that is permissible or not, but the Chair is inclined to rule that a substitute is admissible.

Mr. COCHRAN. Mr. Chairman, I call for the reading of the substitute.

The Clerk read as follows:

On page 74, line 17, after the word "convey," insert the following: "to actual settlers only;" and after the word "*Provided*," in line 19, insert the following: "that not more than 60 hectares of said land shall be acquired by any one person;" and after the word "holding," in line 22, insert the following: "not exceeding 60 hectares in area."

Mr. COCHRAN. Mr. Chairman, the section as amended by this proposed substitute would read as follows:

That all lands acquired under the authority of section 15 of this act shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, granted, sold, and conveyed to actual settlers only, by the government of said islands, on such terms and conditions as it may prescribe: *Provided*, That not more than 60 hectares of said land shall be acquired by any one purchaser and that the actual settlers and occupants at the time said lands are acquired by the government shall have the preference over all others to purchase, or otherwise acquire their holdings, not exceeding 60 hectares in area, within such reasonable time as may be determined by said government.

The gentleman from Indiana [Mr. CRUMPACKER] says that it would be impossible to find purchasers for this land, subdivided in this manner. He says there are not enough people in Luzon to occupy the agricultural islands of the country. And yet, at the beginning, when this Government was founded, when we had a public domain which we then thought would last for centuries, we saw fit to throw about it the protection of land laws, which from that day to this have limited to 160 acres, the amount that could be acquired by any one person at one time, by purchase or homestead entry. And I believe that the greatest misfortune that ever befell this people was when an acre or a rod of that land was diverted from the purposes to which it was consecrated by this early enactment of the Republic. The gentleman says there are not enough people in Luzon to occupy the land. Luzon is as populous as Rhode Island. Every inch of arable land in the island of Luzon is under cultivation, or has been at some time.

Mr. CRUMPACKER. Will the gentleman allow me?

Mr. COCHRAN. I will not. I have not time. When we were providing for our own people we limited acquisitions under entry, homestead or otherwise, to 160 acres.

Mr. CRUMPACKER. Why does the gentleman——

Mr. COCHRAN. I decline to yield. You thought it necessary, when this continent afforded land sufficient to accommodate a population of 400,000,000 people, to limit the entry to 160 acres. Now, you say you are trying to protect the Filipino. The amendment I propose gives him a standing in his own country in reference to the land in his own islands precisely such as you have given to our own citizens with reference to our public lands.

Mr. HAMILTON. Will the gentleman permit a question?

Mr. COCHRAN. Are you going to throw open the gates to speculators there when you would not throw open the gates to speculators here? Are you going to allow men who desire to establish large plantations and great bonanza farms an opportunity in the Philippine Islands which you never have dared to give them here? Are you going to reject this amendment and then go home to your constituents and pretend that you sought to protect the Philippine lands which the Government is about to buy from the friars from the encroachment of speculators and bonanza farmers? When we buy an Indian reservation and throw it open to settlement, do we consider the fact that in this country there are vast unsettled areas and say to the speculators and bonanza farmers that they may buy the Indian lands without limit? When we took the measures lately to open up certain Indian lands in Oklahoma, did we not limit the amount that any one could acquire to 160 acres?

This amendment seeks to impose the same limitation in the Philippine Islands. This amendment seeks to prevent land monopoly there. It seeks to prevent the rich corporation and individual from taking possession of areas of land sufficient to support hundreds of families engaged in agriculture; and if you refuse it you do it with knowledge of the fact that the proportion of the urban population of the Philippine Islands to the whole population is many times greater than the urban population of the United States. You do it with notice that nearly every man, woman, and child in the Philippines, outside of some of the large cities like Manila, is actually engaged in agriculture, and in no other business, and has no other means of subsistence.

Mr. HAMILTON. Mr. Chairman——

Mr. COCHRAN. I say to the gentleman from Michigan that with five minutes at my disposal I will not yield. Furthermore, I want the gentleman to understand that the deliberate violation of the rules of parliamentary proceeding so complacently tolerated by the Chair when it proceeds from that side of the House and so summarily rebuked when it is attempted over here is an evidence of the unfairness and indecency of the proceedings of this body which has disgusted the country.

[Here the hammer fell.]

Mr. LACEY. Mr. Chairman, there are about 400,000 acres of these so-called friars' lands. As to the public lands, there is a provision further on in the bill limiting homesteads to 16 hectares, or about 40 acres, the idea being that in that tropical climate, with that rich soil, much of the land requiring irrigation, a 40-acre homestead is ample. But when the problem of handling the 400,000 acres of the friars' lands arose this bill I think has dealt

wisely with the question by leaving the whole matter of the purchase on the one hand and the disposition on the other with the Philippine government. There are no two of these localities that are situated alike. Some of the land is grazing land, some of it land that ought to be sold in very small tracts; and by giving to the government of the islands a free hand to deal with and dispose of the friars' lands on such terms as will meet the conditions there, I believe the committee have acted much more safely than if Congress had at this long range attempted to bind the local government hard and fast with fixed rules.

Mr. PADGETT. Will the gentleman please explain why this bill limiting the grant to 40 acres only to an individual allows a grant of 5,000 acres to a corporation?

Mr. LACEY. That will come further along, and, I presume, will be fully explained by the committee. In the limited time I will not have an opportunity to explain it now, but when the question as to the sugar lands or great coffee plantations is reached, then of necessity large plantations will be fully discussed. The question is whether we shall give the local government the power of disposition of the lands. First, they are authorized to buy and then to sell, and the purpose of sale is to get the money to pay the bonds. They will be bought and transferred from the hands of the friars and left in the hands of the actual settlers. The best plan is to leave such matters with the local government, who are familiar with all the peculiar circumstances surrounding each individual locality.

The CHAIRMAN. Debate has expired.

Mr. COOPER of Wisconsin. I ask unanimous consent that I have three minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that he may address the committee for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER of Wisconsin. I call the attention of gentlemen of the House to section 20, which provides for the general disposition of the public lands in the islands:

That the government of the Philippine Islands, subject to the provisions of this act and except as herein provided, shall make rules and regulations for the sale or other disposition of the public lands of the United States in said islands, but such rules and regulations shall not go into effect or have the force of law until they have received the approval of the President, and they shall also be submitted to Congress, and, unless disapproved or amended by Congress at the next ensuing session after their submission, they shall at the close of such session have the force and effect of law in said islands, when they shall have received the approval of the President, as hereinbefore provided.

Now, this is a provision to dispose of the public lands generally distinct from the friar lands. The friar lands are to-day practically all occupied, and a great portion of it by settlers. We give those settlers the right of first choice to the lands. Their claims shall first be adjusted, and they shall have the first right to purchase. There is the distinction between the two bodies of land. Of course some of the friar lands are grazing lands, but there is that distinction between the general public-land provision and the friar lands, and that is already there is a great deal of the friar lands occupied by settlers, and we give them the first right to purchase.

Mr. WILLIAMS of Illinois. Just one minute in that connection.

The CHAIRMAN. The gentleman from Illinois asks that he may be allowed to address the committee for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. WILLIAMS of Illinois. I want to say, Mr. Chairman, that I would very much like to see that section referred to amended so as to require not only that the rules and regulations should be submitted to Congress for disapproval, but I think that it ought to require their approval by Congress. It is quite a different thing from submitting the rules and regulations to Congress and its failure to approve them during that session and requiring Congress to act affirmatively and approve these regulations.

Mr. JONES of Virginia. Will my friend allow me to make one suggestion?

Mr. WILLIAMS of Illinois. Yes, sir.

Mr. JONES of Virginia. While there is that section in the bill providing for these rules and regulations to be submitted to Congress, the bill does provide a means by which the Commission may dispose of every single acre—about 68,000,000—before the rules are made.

Mr. WILLIAMS of Illinois. Before the rules are ever made?

Mr. JONES of Virginia. Yes.

Mr. WILLIAMS of Illinois. I was not on the subcommittee that prepared the bill; but it is the same provision as in the Senate bill, and it simply allows these rules to take effect, unless Congress shall act affirmatively and disapprove them. If Congress takes no action at all, and by the Committee on Rules, or the Speaker, or a few members of the Senate action may be delayed for one session, then these rules and regulations become valid without the approval of Congress. I think they should be approved by Congress before they are valid.

Mr. COOPER of Wisconsin. But the gentleman will notice that the law requires that it shall also require the approval of the President.

Mr. WILLIAMS of Illinois. I understand that.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Missouri.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. CLARK. Division.

The committee divided, and there were—ayes 28; noes 48.

Mr. CLARK. I make the point of no quorum present.

The CHAIRMAN. The gentleman from Missouri raises the point of no quorum. The Chair will count the members present. [After counting.] One hundred and eleven members present; a quorum is present, and the substitute is lost. The question is on the adoption of the amendment offered by the gentleman from Virginia.

Mr. SULZER. Mr. Chairman, is an amendment to that amendment in order?

The CHAIRMAN. An amendment to the amendment is not admissible.

The question was taken on the adoption of the amendment of Mr. JONES of Virginia, and the chairman announced that the noes appeared to have it,

Mr. JONES of Virginia. Division.

The committee divided; and there were—ayes 32, noes 63.

So the amendment was rejected.

Mr. SULZER. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amend by striking out all after the word "island," in line 17, and insert "public lands, or the so-called lands of the friars purchased by the United States, shall be held in trust by the Philippine government for homesteads and for native actual settlers.

Mr. SULZER. Mr. Chairman, in my opinion, and I doubt not in the opinion of a great many thinking people of this country, this provision will be looked on as one of the most important in this bill.

Mr. TAWNEY. Will the gentleman allow me an interruption?

Mr. SULZER. I have only a few minutes.

Mr. TAWNEY. I want to know if the gentleman understands that under the provisions of this bill it is not proposed that the Government of the United States shall purchase the friars' land?

Mr. SULZER. Oh, yes; I understand the matter perhaps better than the gentleman from Minnesota. The Government of the United States has sent a commission to Rome to get consent that this Government may buy or settle the title to these lands.

Mr. TAWNEY. The government of the Philippine Islands.

Mr. SULZER. No; this Government. There is no other government in the Philippines at present. I understand the provisions of section 16, and it is one of the most important sections in this bill. If you pass this section as it is now in this bill, and it becomes a law, a few men, a few favorites, a few corporations, can go into the Philippine Islands and get control of all of these friar lands after they become a part of the public domain of the Philippine Islands or the Philippine government. My information is that there are over 500,000 acres of these lands. Let us be honest about this matter. I want the Republicans to be fair. You say that you are friendly to the Filipinos; you want them to lay down their arms; you want them to make terms of peace; you want to put down the insurrection. I want you to be fair and say to the Filipinos: "This is your land; God gave it to you, and the Government of the United States will not take it from you." That is the way we should act; that is the way this House of Representatives ought to legislate. By this provision in the bill you can take the lands away from the natives and bestow them upon favorites and corporations, and these are the most valuable lands in the Philippines.

Mr. COOPER of Wisconsin. Will the gentleman yield to me for a moment?

Mr. SULZER. I have only a few moments more. I would be glad to yield to any member if my time is extended. I have only a few minutes in all and it seems at the present stage of this discussion it is difficult for a member on this side of the House even to get a few minutes.

Mr. Chairman, I want this House to distinctly go on record in favor of giving the Filipinos their own lands, or in favor of taking their lands from them. If you vote for this provision as it now is in the bill, you take the Filipinos' lands from them. If the House votes for the amendment I offer, the Filipino government can distribute these lands to the actual native settlers for homesteads. I believe we ought to give the Filipinos their own lands. These lands were taken from them by the strong arm of power and force over one hundred and fifty years ago. How

magnanimous it would be on the part of the American Congress if, in passing this law, it will say to the Filipinos: "We do not intend to rob you; we are going to give you back your lands which were taken from you years and years ago."

Gentlemen on the Republican side, if you are honest, if you are sincere, and mean what you say in your speeches here day in and day out, you will vote in favor of this amendment I have offered, giving the Filipinos their own land for them to live on, for them to till and make a living from; give them their own land which God put there and intended they should have, and which they occupied long before the Spaniards ever went there, and which they are entitled to own to-day. Mr. Chairman, I trust this House will permit them to do so by adopting this amendment. Most of the troubles that have arisen in the history of the world have arisen by reason of a few men getting control of the land and keeping those who ought to have and own the land out of their rightful possession. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SULZER. Mr. Chairman, I ask for a few moments more to say just a few words.

The CHAIRMAN. Is there objection?

Objection was made.

Mr. GROSVENOR. Mr. Chairman, there was one remark made by the gentleman from New York [Mr. SULZER] which I should like to have more fully explained. I understood him to say that the Commission had been sent by the President of the United States to consult with the Pope of Rome and get his consent to some arrangement proposed to be made about these lands, and that there was some instruction being given that would result in depriving the Filipinos of their rights. If the gentleman has any information that is more definite than that of the public on this subject, I should be glad to have the opportunity to avail myself of that information. We know that the Commission, made up of the distinguished governor-general of the Philippines and the gentlemen associated with him, was authorized to call upon the Pope to inquire of him, as I understand, what the claim of the Catholic Church is, what the claim of the oligarchy of that church is to the title of these so-called friar lands, and the view of that body as to the future disposition of said lands.

Now, we all know that the Catholic Church, in pursuance of a policy of its own—and which I think is a most admirable policy and one which has certainly worked well in the United States—vests in the authorities of the church the lands and other property that belong to the church for ecclesiastical purposes, whether that property be in the form of churches proper, or parsonages, or parochial school buildings, or whatever else it may be. But I do not understand that the title of these lands which are called the friars' lands is in any way on all fours with the title held by the Church of Rome in the United States to real estate which it occupies.

Some testimony was given before the Committee on Ways and Means tending to show, not that there was any purpose on the part of this Government through the Philippine organization to seize, as the gentleman said, and take away from the Filipinos their lands. The term "their lands" is a very indefinite sort of a term. It might mean lands located in the Philippine Islands. It might mean lands belonging to some government in the Philippine Islands. But a large, and, as I understand, a very large, proportion of what was public land owned by Spain in the Philippine Islands passed by the treaty of Paris to the ownership of the United States, and, as I understand—and I am ready to be instructed on that point—the actual title—that is, the best title—to these so-called friar lands is a matter of some uncertainty. They are claimed by the body known as the friars, but their title is a problem which I think my friend from New York will hardly be able to solve. I have tried to look into this question and to understand it; and if there is any valid title to that land vested in the friars and that they can sell or dispose of, I am not able to ascertain that fact; yet for a long period of time they have insisted upon that title, and nobody has been found to dispute it.

Mr. COOPER of Wisconsin. Is the gentleman aware that Governor Taft in his testimony said that the title of the friars was good in law, and that they could, in his opinion, defend it successfully in court?

Mr. GROSVENOR. No; I did not know that. I depended upon the statement made by Mr. Root before the Committee on Ways and Means, in which he said there was at least enough in their title to justify us in expending money to get rid of it. It seemed to me, therefore, that according to the statement of the Secretary of War we must either deprive the friars of their title by force, in order to constitute the land the property of the Filipinos, and cut the land up for distribution under some homestead arrangement, or else we must by some negotiation get rid of the title of the friars and leave it to subsequent events to decide what shall be done with the lands, and I think gentlemen will not claim that there is any public title in the Filipinos to any of that land.

[Here the hammer fell.]

Mr. GAINES of Tennessee rose.

The CHAIRMAN. Debate is exhausted on the amendment.

Mr. GAINES of Tennessee. I move to strike out the last word.

The CHAIRMAN. That is not permissible.

Mr. GAINES of Tennessee. I think the Chair has made some very mysterious rulings to-day on questions of parliamentary law.

The CHAIRMAN. The gentleman——

Mr. GAINES of Tennessee. I rise to a question of personal privilege.

The CHAIRMAN. The gentleman will state it.

Mr. GAINES of Tennessee. The Chair, it seems to me, has decided all sorts of ways as to when was the right time to discuss this bill, and particularly when gentlemen on this side were concerned.

The CHAIRMAN. The gentleman is out of order.

Mr. GOLDFOGLE. I move to strike out the last word.

The CHAIRMAN. The motion is not in order.

Mr. GOLDFOGLE. I rise to a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GOLDFOGLE. Does the Chair mean that the amendment before the House must first be disposed of and then that my amendment will be in order?

The CHAIRMAN. That is what the Chair means. The Chair stated early in the day, when probably the gentleman from New York and the gentleman from Tennessee were absent, and therefore it may be well to state it again, that under the rules of the House this whole House bill is an amendment, and as parliamentary law allows only one amendment to an amendment, therefore there can be but one amendment pending to the House bill. Hence the proposition which the gentleman from Tennessee just made, and has made before, to amend an amendment to the House bill is clearly out of order.

Mr. GAINES of Tennessee. The question is not so much as to my making an amendment, as I wanted to do several times to-day, but as to the right to discuss such an amendment when it is up. The discussion has all been on the other side of the House.

The CHAIRMAN. The gentleman will suspend——

Mr. GAINES of Tennessee. And we have some rights on this side—particularly the right of free speech and debate.

The CHAIRMAN. The gentleman is out of order. The Chair will state that on an amendment there is of course allowed five minutes' debate on each side, and no more, except by unanimous consent. The Chair has followed this rule—that when an amendment is offered, no matter on which side, it is of course an attack upon the bill which is being defended by the committee; and the Chair, therefore, has held that it is always but fair—and the Chair thinks the committee will agree with him—that when the bill is attacked, no matter upon which side, a member of the committee should be next recognized to defend the bill.

Mr. GAINES of Tennessee. And they have taken about all the time to-day over there on that side.

The CHAIRMAN. That makes no difference upon which side the time is occupied.

Mr. GAINES of Tennessee. Well, it does on this side, Mr. Chairman, with all due respect to the Chair's honorable rulings. We think we are half the House.

The CHAIRMAN. The gentleman is out of order, and has been repeatedly.

Mr. OLMSTED. Mr. Chairman, I desire to inquire whether one argument having been made in favor of the amendment a member of the committee may not be heard against it?

The CHAIRMAN. There has been an argument in favor of it and one against it.

Mr. OLMSTED. I did not hear the argument against it.

The CHAIRMAN. It was by the gentleman from Ohio [Mr. GROSVENOR].

Mr. OLMSTED. I did not understand him to be speaking to the amendment at all.

The CHAIRMAN. He occupied the time. Nobody raised the point of order that he was not speaking to the amendment.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask unanimous consent for one-half minute to reply to a suggestion made by the gentleman from Ohio.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to have one-half minute in which to reply to the suggestion made by the gentleman from Ohio. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. I called the gentleman's attention to the testimony of Governor Taft at page 65:

The CHAIRMAN. Is it your opinion as a lawyer that their property rights are fully protected by the terms of the Paris treaty?

Governor TAFT. Yes, sir.

The CHAIRMAN. And that they can defend them in the courts?

Governor TAFT. Yes, sir.

Mr. GROSVENOR. I did not say anything to the contrary.

Mr. GOLDFOGLE. Mr. Chairman, I ask unanimous consent that I may address the committee for five minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent that he may address the committee for five minutes. Is there objection?

There was no objection.

Mr. GOLDFOGLE. Mr. Chairman, I do not rise now for the purpose of discussing the Philippine question. The views on this side of the Chamber have been fully and elaborately stated, and I shall not detain this committee at the present time with any extended remarks upon the policy of the Republican Administration in respect to the Philippines, but, while the pending amendment is under discussion, I desire to say that I agree fully with the gentleman from New York in respect to what he said concerning the land scheme incorporated in the bill. Under section 16 it is provided:

That all lands acquired under authority of section 15 of this act shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, granted, sold, and conveyed by the government of said islands on such terms and conditions as it may prescribe: *Provided*, That actual settlers and occupants at the time said lands are acquired by the Government shall have the preference over all others to purchase, or otherwise acquire their holdings within such reasonable time as may be determined by said Government.

If ever there was devised a scheme, under which it is possible for a few individuals or wealthy corporations to buy up and dominate over an entire territory, and drive out the occupants of the land, who by nature and nature's laws are entitled to it, this is the scheme.

The bill does not provide how the land shall be parceled out. It does not provide in what quantities of land the disposition shall be made. It gives general and unlimited power to sell the lands on any terms and conditions that may be prescribed by the government of the Philippine Islands, and the proviso that "actual settlers and occupants at the time said lands are acquired by the Government shall have the preference over all others to purchase" is meaningless; at any rate it is vague and uncertain.

In what manner or mode the preference shall be ascertained or exercised is not stated. It is within the power of the government of the Philippines to put up the property either at private or public sale in such large tracts as to make it impossible for actual settlers and the poor inhabitants of the islands to compete for the lands with the wealthy speculators, who stand ready to buy up the valuable lands of the Filipino. When these speculators, these land grabbers, these corporations, who are exploiting the islands and their rich possessions, shall under the scheme devised by this bill acquire title, they will drive the settlers or occupants from their homes, from the land which is their heritage, the land which God gave them, the land upon which they have the right to live, the land that has become sacred to them, and which ought to be their privilege and their right to retain under fair terms to be made by the government.

Mr. GAINES of Tennessee. The corporations have already bought all this land.

Mr. GOLDFOGLE. The gentleman from Tennessee is no doubt right in that statement. Corporations of great magnitude have already purchased the land, or rather the greater portion of it, and backed up by enormous capital they are ready to go over to the Philippine Islands and turn the unfortunate Filipino out of house and home in order to satisfy their greed and rapacity.

But it was suggested on the floor to-day that under section 20, rules and regulations are to be made for the sale or disposition of the public land of the United States in the islands and that such rules and regulations shall not go into effect or have the force of law until they have received the approval of the President of the United States, and they shall also be submitted to Congress, and unless disapproved or amended by Congress at the next ensuing session after their submission they shall at the close of such session have the force and effect of law in said islands when they shall have received the approval of the President.

This section is cunningly devised. It means nothing of a practical character that will protect the Filipino against the power of the land grabber and the land schemer, whose purpose it is to acquire valuable territory and dominate over it as only the lord can dominate over the vassal. If section 20 had provided that before any sale of land could be made the rules and regulations for such sale or disposition should be prescribed or approved by the President and also by the Congress of the United States then there would be no reason to complain, but such is not the purpose of those who in this House are willing to permit the Filipino to be deprived of his land for the benefit of the exploiter and the land schemer.

Section 20 provides that unless the rules and regulations are disapproved or amended by the Congress at the next session, then they are at the end of the session to have the force and effect of law in the islands. Why, of course, when Congress assembles at the next session, nothing will be done by those in control of this House to disapprove or amend the rules and regulations for the sale or disposition of the public land in the Philippines. Rules and regulations will be made, they will be approved by the President, and under section 20 of the bill they will go into force and effect without any action on the part of Congress, because it is not now, and will not be then, the purpose of the Republican party in control of the Congress to disapprove or amend the rules and regulations that may have been made.

Why not be honest about this matter? Why not provide that the rules and regulations shall not go into effect until they are approved by both the President of the United States and the Congress of this nation? Then we will have the opportunity, when Congress again assembles, to discuss the reasonableness of the rules and the propriety of the regulations that may have been made to dispose of the land of the Filipinos. It should not be within the power of the Philippine Commission or the Philippine government to put up these lands in large tracts, to put them up upon such terms and conditions that the man who desires to compete can not do it because he has not got the means to enter into competition. Let the Filipino have a fair opportunity, let him have an honest chance to remain upon these lands, and buy them at fair prices and in tracts and plots small enough to enable him to make the purchase. Do not drive him from his land. Do not open these lands up to the greedy speculator, who is without heart and without sympathy, and whose only purpose it is to increase his wealth at the expense of the unfortunate Filipino, who, under the provisions of the pending bill, is unable to protect himself. Give Congress the absolute right now to approve or disapprove the regulations to be made. That is fair legislation.

Does any gentleman in this Chamber doubt the purpose of the framers of the bill to have the rules and regulations approved by the President go into effect without Congress having anything to say about them at the next session? Under section 20 Congress will simply do nothing. It is within the power of the majority, who are now passing this bill, to prevent the rules and regulations coming before us for approval or disapproval, and then, action being stifled upon the rules and regulations made by the Philippine government for the distribution of the land, these rules and regulations will take effect without Congress having approved them. In other words, the President is to approve the rules and regulations, and they take effect unless disapproved by the Congress. Congress will not have a chance to express its disapproval, because the rules and regulations will never be before us at the next session for such disapproval. It is within the power of this House, now passing this bill, to prevent, under the rules of the House, the regulations of the Philippine government from ever reaching us for our vote expressive of disapproval. So it is, however oppressive, however unreasonable, however unwise the rules and regulations may be, we shall be powerless to prevent injustice to the Filipino in the disposition of his lands, in the taking of his home.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

The CHAIRMAN. Does the gentleman from New York yield?

Mr. GOLDFOGLE. As I have only five minutes to debate the amendment, I do not wish to give up any portion of my time.

The CHAIRMAN. The gentleman declines to yield.

Mr. GOLDFOGLE. Now is the time to perfect the bill. Now is the time to provide for the manner in which the Filipino may enter into competition with others when the lands come to be sold and disposed of. Unless you make provisions in such a way that the land sharks and speculators will not have it in their power to acquire immense tracts of land against the wishes and desires of the Filipinos, who, if given a fair and honest opportunity, would enter into reasonable competition, you will produce a condition in the Philippines worse than that which, under the grievous landlord system, prevails in Ireland. If you pass this measure in the form in which the bill is presented, if you reject the amendments offered in good faith on this side of the Chamber for no other purpose than that of acting fairly and reasonably and honestly and justly with the Filipinos, if you persist in leaving the Filipino at the mercy of the land sharks and the schemer and the exploiter, the time will come when the Filipino will say, "There is eternal warfare between you and me." [Applause.]

Mr. OLMSTED. Mr. Chairman, I ask unanimous consent for five minutes to speak in opposition to the amendment.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. OLMSTED. Mr. Chairman, it seems to me a little extraordinary, to say the least, to hear gentlemen upon that side of the Chamber declaim against the provisions of this bill on the ground that its provisions against trusts are not repeated over and over again with all the details that they think we ought to include, when the Democratic substitute which they themselves are supporting—the bill reported by the minority of the Insular Committee—contains no limit whatever to the amount of land that

may be held by corporations, trusts, or combinations of any kind, and no restrictions upon trusts of any kind.

Just one word as to the amendment offered by the gentleman from New York. This bill does not propose to drive people from their homes or from their homesteads. The amendment is not only unnecessary, but, to put it mildly, it is absurd when you consider its character. It is to the effect that lands in the Philippines purchased by the United States shall be held as homesteads for actual settlers. First, it is unnecessary, because not contemplated by this bill that the United States shall buy any lands there at all. They are to be bought by the Philippine government. Secondly, it is unnecessary, because the act itself expressly provides that occupants and actual settlers shall have preference not only over corporations, but over all other individuals as well. Therefore I trust the amendment will not prevail. There is no great danger from trusts, as the section to which the amendment is offered in express terms limits the amount of a single entry to 16 hectares, or about 40 acres.

Mr. TAWNEY. It is not only for 40-acre tracts for corporations, but for all tracts.

Mr. OLMSTED. Yes.

The CHAIRMAN. The question is upon the adoption of the amendment offered by the gentleman from New York.

The question being taken, on a division, demanded by Mr. SULZER, there were—ayes 39, noes 59.

Mr. SULZER. Tellers, Mr. Chairman.

Tellers were refused, 18 members, not a sufficient number, seconding the demand therefor.

Accordingly, the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. GAINES of Tennnessee. I wanted to offer an amendment to the section we are about to leave.

The CHAIRMAN. The Chair will recognize the gentleman for an amendment.

Mr. GAINES of Tennessee. I move to strike out the word "gold" in line 5, page 74.

Mr. CRUMPACKER. Mr. Chairman, a parliamentary inquiry. To what section is the gentleman's amendment directed?

Mr. GAINES of Tennessee. Page 74, section 15.

The CHAIRMAN. That section has already been passed. The Clerk has completed the reading of section 16, which has been under consideration, and the Clerk is now about to begin the reading of section 17.

Mr. GAINES of Tennessee. All right. You passed it when I was at lunch. I wanted to have that word stricken out, but I am satisfied I would fail anyway. I have already registered my protest against this. These people—Filipinos—have no "gold" nor silver, nothing with which to pay five or ten millions in even "money," "coin and money," much greater to pay in "gold." England gave up Philippine Islands when she owned them, which is much proof that there is no "gold" or gold mines in the Philippine Islands. Hence the wrong to make them pay in "gold" for these or any such burden.

The Clerk read as follows:

SEC. 18. That the government of the Philippine Islands is hereby authorized to provide for the needs of commerce by improving the harbors and navigable waters of said islands, and to construct and maintain in said navigable water and upon the shore adjacent thereto wharves, piers, lighthouses, signal stations, buoys, and like instruments of commerce, and to adopt and enforce regulations in regard thereto, and regulations in regard to articles not intended to be imported into said islands nor mingled with the property therein, but brought into a port of the said islands for reshipment to another country, which articles may be deposited in bond and reshipped to another country without the payment of customs duties or charges.

Mr. STEWART of New Jersey. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

Amend, page 75, in line 10, after the word "signal," by inserting the word "life-saving."

Mr. STEWART of New Jersey. Mr. Chairman, that simply makes life-saving stations an adjunct of the work in the Philippine Islands. These life-saving stations have proved of immense benefit on our own seacoasts, and I see no reason why they should not be made an adjunct of the work relating to navigation in the Philippine Islands.

The amendment was agreed to.

The Clerk read as follows:

SEC. 20. That the government of the Philippine Islands, subject to the provisions of this act and except as herein provided, shall make rules and regulations for the sale or other disposition of the public lands of the United States in said islands, but such rules and regulations shall not go into effect or have the force of law until they have received the approval of the President, and they shall also be submitted to Congress, and, unless disapproved or amended by Congress at the next ensuing session after their submission, they shall at the close of such session have the force and effect of law in said islands, when they shall have received the approval of the President, as hereinbefore provided: *Provided*, That the government of said islands shall cause to be made, in cooperation with the Director of the United States Geological Survey, topographic, subdivisional, and geological surveys and maps of the islands, including a classification of the lands: *Provided further*, That a single homestead entry shall not exceed 16 hectares in extent.

Mr. GAINES of Tennessee. I should like to know from the gentleman who reports this bill why it is that we are in such a great hurry here to dispose of the public lands that the United States acquired by virtue of the treaty? Why it is that we rush in here before the war in the Philippine Islands is ended, before the natives have come home to claim their lands as against the claims of Spain? Why this rush pell-mell to skin these people, a great many of them, before they have a chance to assert their own rights?

Mr. OLMSTED. Mr. Chairman, a parliamentary inquiry—whether there is any amendment pending, or what is before the committee?

The CHAIRMAN. The gentleman has offered no amendment.

Mr. GAINES of Tennessee. I move to strike out the whole section, if that is necessary, for the purpose of making this inquiry.

The CHAIRMAN. The gentleman moves to strike out the section. The gentleman will proceed.

Mr. GAINES of Tennessee. Now, I hope the gentleman who has just interrupted the gentleman from Tennessee will answer and tell me why it is that he, so noble and generous and just, wants the Government of the United States to rush into the market and sell the public lands that we ought to hold in trust for the benefit of the government of the Philippine Islands and for the benefit of the natives of the Philippine Islands—those who may come in after they have laid down their swords as well as those who are already in?

Now, you ask whether there is anything before the House or not. Now, my amendment is before it, and my question is to you. Why are you rushing on the market to put these lands up for sale when war is on, when peace has not come, and you know it; when the natives are scattered in the jungles and in the mountains, and when a man who owns a piece of this land that Spain might have claimed at the time she made the treaty may be absent and unable to get up and insist on his rights? Why, Mr. Chairman, I say, should we do that?

Mr. GOLDFOGLE. Because it is a money-making scheme.

Mr. GAINES of Tennessee. The whole thing is a money-making scheme. There is a great deal of talk about the sale of the friar lands, when you know they are sold out to a combination under Mr. Andrews, who got up a corporation for the purpose of getting those lands, and here it is in an official document; and now you are putting on the market the public lands held in trust under the law of those islands and under the spirit of our institutions for the people who live in that territory. Before the cloud of war has passed by, before our soldiers have come home, indeed, before we have acquired the land, in all probability, under a peaceful title, you are fixing to put these lands on the market; and for whom? Have the Filipinos any money? Will anybody say they are rich as a nation or as individuals? They are penniless and almost homeless. Who is this for? Who is the nigger in the wood pile? I believe it is a white man that is in the wood pile in this case.

If you want to deal fairly, if you want to be just, if you want to do like our fathers have done, you will hold this land until peace and enterprise have come and then dispose of it like we did in this irrigation matter a few days ago. We held to all the public lands of this country and kept them until they were worth something to the country. We are selling these lands and taking the proceeds and turning them over to the States. We are not giving them to the skinners, the legislative robbers, but to the States who want to improve the Saharas in their borders. Yet here, before we get a law made for this place, before we get a law to control the Philippine Islands, before peace, you are arranging to sell the public lands that ought to be held in trust for the government of the Philippine Islands, and for the natives of the Philippine Islands, and wait to sell the lands until peace has come. In the meantime the people can accumulate some money and be able to buy these lands cheap and not from the white speculator you are now legislating for.

Mr. OLMSTED. Mr. Chairman, I have but a word to say in reply to my genial friend from Tennessee. I do not think there is great danger of trusts acquiring these lands very rapidly, as the last two lines of the section which he moves to strike out distinctly provide that a single entry shall not exceed 40 acres, or 16 hectares. A trust that is confined in its operations to a 40-acre tract of land will not endanger our liberties nor the rights of the Filipinos.

Mr. SULZER. Mr. Chairman, I move to amend section 20, line 16, after the word "approval," by inserting the words "of Congress and the President."

The Clerk read as follows:

In line 16 insert the words "of Congress and the President."

Mr. SULZER. And then strike out all down to the word "*Provided*," in line 21.

The Clerk read as follows:

Strike out all down to the word "*Provided*," in line 21.

Mr. SULZER. Mr. Chairman, all that this amendment does is just this: This section 20 of the Philippine bill, at line 16, provides that the government of the Philippine Islands—whatever that may be or whatever that may mean—shall make rules and regulations for the sale and disposition of the public lands, and further provides that they shall have no force or effect unless approved by the President and not specifically disapproved by Congress at the next regular session. My amendment simply provides that the rules and regulations for the sale and disposition of these public lands shall be approved by Congress and the President. I think it will be safer and better this way. It is the usual form heretofore adopted by the Government regarding any other territory of the United States.

Why should we depart from it now unless there is some ulterior or sinister motive in doing it or behind it? We may have the greatest confidence in the so-called government of the Philippine Islands, or in the Commission which is running the government out there; but it seems to me that in a matter so important as the sale and disposition of all these public lands the rules and regulations adopted for that purpose ought to be approved by Congress, as well as the President. Under the present proposition, if Congress did not disapprove them at the next regular session, they would become laws by virtue of the fact that Congress had not disapproved. In my opinion, it is much better, it is much stronger, I think it is more in accordance with the history of the legislation of this country, to have these rules and regulations approved by Congress and the President.

If the purpose of the Republicans is honest in this matter, the majority in this House will accept this amendment. No harm can come if we do, and great harm may come if my amendment is not adopted. I am opposed to looting the Filipinos and robbing them of their lands, and for this reason I think it would be much better, more consistent, more in line with the past policy of the Government, if these rules and regulations are required to be approved by Congress and the President. You can never make the people of the Philippine Islands friendly to the United States by mercilessly murdering them or by willfully stealing their lands. These lands belong to the people, and they must not be taken away from the people. We are responsible to this generation and to future generations. Congress ought to have something to say—in fact, the final say—in regard to the adoption of these rules and regulations, and instead of allowing the provision to remain as it is, it seems to me it would be much better if the rules and regulations were approved by Congress, as suggested by my amendment. I hope the amendment will be adopted.

Mr. Chairman, in this connection I wish to print as part of my remarks two articles recently published in the Ithaca Democrat.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The articles are as follows:

[The Ithaca Democrat, Ithaca, N. Y., Thursday, May 29, 1902.]

"What, I ask, do you want in the Philippines? More particularly, why in any part of Luzon and the Visayan Islands are you making a howling wilderness and killing children over 10 years of age? It will be said that these are the unhappy incidents of war, which is always a stern affair, very different from the holiday making into which civilians would turn it. Be it so. Why, then, are we making war? Here are 6,500,000 fellow-Christians of ours—the only Christian nation in Asia—as highly civilized as most of the people of Central and South America. What do we want of them? We have never told them.

"Thank God, there is a more excellent way. Drop coercion and try conciliation. Give the Filipinos what they want, not what you think is good for them. Regard them not as Sioux or Apache Indians, but as Christianized and civilized brown men, ranking with the Japanese." (Jacob Gould Schurman.)

Mr. SULZER. That, sir, is an extract from an address of Professor Schurman, the president of the first Commission sent to the Philippines. It speaks for itself.

The second article is from a prominent citizen of Ithaca, N. Y., Mr. De Witt C. Bouton, and is as follows:

[The Ithaca Democrat, Thursday, February 27, 1902.]

WASHINGTON'S FAME IS UNSULLIED.

To the Editor of the Democrat.

SIR: On the anniversary date of the birth of George Washington the minds of all lovers of their kind are naturally drawn to the contemplation of the character and life of that most illustrious specimen of their species that ever appeared upon the earth. Until quite recently the study of the life and work of "the father of our liberties," as Henry Clay was wont to style him, afforded only the most pleasurable emotions. If pride, reverence, and gratitude were the predominant feelings called forth, as the mind pictured this perfect character and his immortal work, and in some degree comprehended the vast extent of the beneficent influence which they had already exerted, bright anticipations, which a reasonable hope seemed to justify, were hardly less potent as provocatives of all those sentiments which please and uplift a generous mind.

As illustrative of this present pride and joy, and of confident hope for the future, which in the past have animated all intelligent and thoughtful students of this majestic character, take the following extracts from an able and appreciative article, written on the anniversary of Washington's birthday in the year that witnessed the beginning of our glorious war for the liberation of Cuba. "One hundred and sixty-six years ago to-day," says the writer in his opening paragraph, "one of the marvelous flowering periods of the human intellect culminated in the production of the greatest man in recorded history." The writer then proceeds in an attempt to vindicate this high estimate of Washington, and succeeds most admirably.

One of the standards by which he tries the subject of his article is success—complete, enduring success in the ultimate object for which he wrought. Tried by this criterion, this writer finds that Pericles, Alexander, Hannibal, Cæsar, Cromwell, and many other famous characters whom he mentions, failed. Then, returning to his subject, he thus proceeds: "Washington succeeded. His work was not only successful at the time, but its success was permanent. His policy made no enemies, involved no bloated armaments, hampered his country with no unnecessary burdens, exposed it to no future attacks. His example inspired all the nations of the world, and looking at him all mankind thought better of the people that produced him. There is more strength for America in the name of Washington than in a million armed men. Find another man whose name meant so much a hundred years after his death, and you may challenge the assertion that George Washington was history's greatest figure."

While I most heartily agree with the conclusion which this writer reaches, to wit, that Washington is the preeminent character in history, I do not admit the justness of the standard by which he tries the founders of states. The important factor, how, when, and why the failure, is wholly overlooked. But for full indorsement of its reasoning was not my purpose in introducing this article. It was quite other than that, as will appear from what follows.

Did the recurrence of the 22d day of February this year tend, as in the past, to quicken in the hearts of lovers of liberty the world through all those sentiments to which I have referred, unmixed with doubts or forebodings? Would my author himself to-day write of Washington's great work that it "was not only successful at the time, but its success was permanent?" Could he, could any true lover of his country, as he views in imagination the "ship of state" which Washington had the chief part in launching, now, as in the past, say with Longfellow, in accents broken by excess of unalloyed pride and joy—

> "Sail forth into the sea, O ship!
> Through wind and wave right onward steer!
> The moistened eye, the trembling lip,
> Are not the signs of doubt or fear."

Is there no doubt or fear? Are there no grounds for either, or both? Each thoughtful citizen will answer for himself or herself. To my apprehension there are abundant grounds for both.

This Republic of Washington's, this "asylum for the oppressed of all nations," is to-day, and for more than three years now has been, engaged in carrying on a bloody and merciless conflict with a people 8,000 miles distant; a people who never did us an injury or a wrong; a people whose leader, just after Dewey's victory, and after having made with that gallant officer some arrangement for cooperation against the Spanish ("it was not in writing" exultingly sneers the imperialist as he chuckles over the "cuteness" by which this confiding people were overreached), issued the following manifesto:

"Filipinos: The great nation, North America, cradle of true liberty, and friendly on that account to the liberty of our people oppressed and subjugated by the tyranny and despotism of those who have governed us, has come to manifest even here a protection which is decisive as well as disinterested toward us, considering us endowed with sufficient civilization to govern by ourselves this our unhappy land. To maintain this so lofty idea, which we deserve from the now very powerful nation, North America, it is our duty to detest all those acts which belie such an idea, such as pillage, robbery, and every class of injury to persons as well as to things."

And just prior to this, and before setting out from Hongkong to join Dewey, at the latter's request, this leader again voiced the true sentiments of his heart by sending a proclamation to his fellow citizens, from which I can not forbear quoting the following:

"Compatriots: Divine Providence is about to place independence within our reach. The Americans, not from mercenary motives, but for the sake of humanity and the lamentations of so many persecuted people, have considered it opportune to extend their protecting mantle to our beloved country. * * * At the present moment an American squadron is preparing to sail for the Philippines. We, your brothers, are very much afraid that you may be induced to fire on the Americans. No, brothers, never make this mistake. Rather blow your own brains out than fire a shot or treat as enemies those who are your liberators. * * * Where you see the American flag flying assemble in numbers. They are our redeemers."

The sentiments and purposes evinced by this touching tribute to the starry flag of this Republic and its holy mission in the world bear internal, irrefragible evidence of the sincerity, of the high spirit, of the keen sense of gratitude—a sentiment found only in lofty minds—which animated these little brown people; and, considering the time and circumstances of their expression, the Administration and its creatures bite against a file in now trying to poison the minds of the American people against these helpless and perishing ones. "Nor florid prose, nor honeyed lies of rhyme" can longer conceal this most flagitious crime, by which, in a day, implicit confidence was changed to ineradicable distrust; sincerest friendship, into immitigable hate. What was this crime? It was the distribution throughout the archipelago of a proclamation dictated and transmitted by the President of the United States, without the knowledge of the American people or of their representatives in Congress. What was this proclamation, so full of fate for both peoples? Why, it was a declaration that this Republic claimed and would immediately assert exclusive jurisdiction and dominion over the whole Philippine Archipelago and all the inhabitants thereof. As must have been intended, assuming that the President was sane, this insulting act soon produced a pretext for the horrid work of "benevolent assimilation," and when a shudder went through the nation as glimpses of the bloody work were caught by the people we were soothed by the assurance that this "duty" was put upon this Republic by the Almighty. But as I am not treating of blasphemy in this letter, this phase of the question does not come within its scope.

If anything be wanting to the blackness of this act of seizing the Philippines, it is supplied by this fact, which will astound many an honest man who hitherto has acquiesced in the "duty" which Providence laid upon the Administration. When that proclamation was promulgated this nation had no more right in the Philippines, outside the city of Manila and its environs, than had England or Russia. Indeed, there were objections to our assertion of such right that could not apply to any other nation. The honor of this nation, and therefore the honor of every citizen of this nation, was pledged not to occupy or to assert any authority over that territory beyond the limits named. This special obligation was laid on us by our voluntarily entering into an agreement with Spain to that effect. This agreement is known in diplomatic terminology as a "protocol." This document, which is always the preliminary of negotiations for peace between belligerents,

and specifically defines what each may and may not do while the attempt to agree on terms of permanent peace is being made, by the same diplomatic language is termed establishing the status quo. The limitations of our rights, so far as the point I am raising is concerned, are thus defined by the protocol: "The United States will occupy and hold the city, bay, and harbor of Manila, pending the conclusion of a treaty of peace which shall determine the control, disposition, and government of the Philippines." This was our utmost right until a treaty was made and duly ratified by both parties, which was not done until many weeks after the perfidious act of issuing the proclamation.

In view of all this, I think that the imperialists are unduly disturbed by the fact that our liberty-loving people are so "backward in coming forward" with their subscriptions for a monument to the author of "benevolent assimilation." There is absolutely no ground for their apparent discouragement. The monument will be erected. This is as certain as that this day will be succeeded by night; or, to use a more appropriate simile, as surely as in the moral world the expiation follows the crime. The monument will be the fearless and conscientious work of the impartial historian of our era. And it will be more durable than—and fully as significant as—were the monuments formed of the skulls of his enemies which Tamerlane was wont to rear—another famous Asian benevolent assimilator, the blood of whose victims drenched to a mire the soil of their fatherland. But I must return from this lengthy digression.

Up to date, to say nothing of the American homes desolated by the death, insanity, or permanently disabling of their loved ones, we have slaughtered outright more than 20,000 of this devoted people. Of the victims of starvation and disease we have no account. Of the details of this butchery very little escapes the Government censors. A few ghastly incidents have, however, transpired, such as the surrounding of 60 Filipinos at a bend of the Pasig River and the shooting of them to death in spite of their piteous prayers to their brother Christians (?) for mercy. Such as the surrounding of a native house where a wedding ceremony was being celebrated and the setting of the house on fire, and then the slaughtering of the guests of both sexes as they attempted to escape from the equally pitiless flames.

Not to speak of the poor, betrayed, helpless Cubans, we have negotiated a treaty with Denmark, by which three thickly-populated islands are purchased, the inhabitants of which may elect to go with the land or remain citizens of the parent country! The very grotesqueness of this, I fear, will prevent due seriousness on the part of the people as they contemplate it.

The residents of those islands, a thrifty, refined, and highly civilized people, petitioned and prayed that they might be spared this unspeakable humiliation. But the chuckle-headed man over in Denmark who makes, if that were possible, the idea of "the divine right of kings" more ridiculous if not more odious to all genuine Americans, was deaf to their entreaties; and the sordid promoters of the Philippine infamy were, of course, unmoved by the prayers of the helpless.

On this day when the glorious spirit of Washington seems peculiarly to lift the mind of the thoughtful citizen above the consideration of what Hawthorne truly terms "the big, heavy, solid unrealities, such as gold, landed estate, offices of trust and emolument," it were little less than profanation to call his attention to the incomputable millions of the people's money which the crime of imperialism has already worse than squandered. But as a stimulous to the faculty of forecasting the future, which all men worthy to be citizens of this Republic should possess in some degree, I will venture to remind your readers that the same dispatch that announces the signing of this treaty informs us that immediately the Government will proceed to expend millions of dollars in erecting a vast system of fortifications. How the mouths of the favored contractors must water as they eagerly wait for this rich chance at the people's money.

But I must close. After this, to speak of Washington's work as "a permanent success," to quote Longfellow's noble lines, or to repeat the grand peans to this Republic's glory, whether in prose or verse, whether expressed literally or allegorically—and these constitute the richest gems of our literature—would be as incongruous, and almost as pathetic, as were the grandiose declamations of Rienzi, the would-be restorer of the Roman Republic.

But does this hideous distortion of Washington's system of government, by which, to use his own words, he raised "a standard to which the wise and the honest can repair," detract in the least from his just frame? No; a thousand times no. The shame and the stigma of it go no higher than this degenerate generation—the first generation of the descendents of "the immortal men of '76" that was at once "infamous and contented."

Yours, for the Republic of the fathers,

DE WITT C. BOUTON.

ITHACA, N. Y., *February 22, 1902.*

The question was taken; and on a division, demanded by Mr. SULZER, there were 41 ayes and 58 noes.

So the amendment was rejected.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee to strike out the section.

The question was taken, and the motion was rejected.

Mr. COOPER of Texas. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I invite the attention of the gentleman from Wisconsin and the committee to what I am going to read. From the discussion of this bill I take it that the bill concedes title in fee to the lands of the Philippine Islands in the church or friars. I have not carefully read the bill, but from the discussion it appears that fee-simple title to the lands in the church or friars is conceded by the bill. I call attention of the gentlemen of the House to the decree of the King and Cortes of Spain in 1820. In the fourteenth article of the decree will be found the following provision:

By a decree of the King and Cortes of Spain in 1820, churches are prohibited from holding any real or immovable property. In the fifteenth article of the decree will be found the following provision, i. e.: "The churches, monasteries, convents, and all other ecclesiastical communities, as well secular as regular, charity houses, hospitals, poorhouses, schools, confraternities, brotherhoods, commandancies, and every other establishment, whether ecclesiastical or lay, known by the name of mortmains, can not, from this time in future, acquire any real or immovable property in any province of the monarchy, by testament, donation, purchase, rent charges, infeudation, adjudication of rents, in payment of rents due, nor by any title whatsoever, either lucrative or onerous."

That was a decree of the King and Cortes in 1820, when the Philippine Islands, of course, belonged to Spain. In a well-considered case from Texas (and I read from the 3d Texas Supreme Court Report), in a contention where the church had acquired property in Texas similar to the acquisition of real estate in the Philippine Islands, the church undertook to hold this real property against a grant from the State to a citizen, and as the gist and substance of the decision after carefully reviewing all the facts and acts of the King and Cortes, the court says this:

The result of our examination, so far as our very limited means afforded us the opportunity, is that the church, at the period of our revolution, held no real estate by perfect title; that it only enjoyed and held the usufruct interest in such land as it possessed. There can be no doubt, it is believed, that by the successful revolution the Republic of Texas became possessed of the right and title to all the land or public domain that belonged to the Government of Mexico at the date of the revolution, by as full and perfect title as was vested in that Government, or in the government of Coahuila and Texas.

The title in dispute was one granted by Spain like titles now held by the churches in the Philippines. Therefore I take it, if this decision be law, all that property now claimed by the churches and friars in the Philippines belongs to the Government. If this decision is the law, would it be right and proper in this bill to concede that the title was in the friars or churches?

Mr. WILLIAMS of Mississippi. I want to suggest that there is a case in the 17th Howard, United States Reports, which assumes the point decided in the case cited by the gentleman from Texas to be the law or to be the fact. Spain secularized the title of all ecclesiastical property, and this case is decided upon Spanish mortmain law, that secularization law that applies to Mexico and the Philippines both. The 17th Howard case considered, while it does not directly decide this point, takes it for granted that that is decided.

Mr. COOPER of Texas. I have not examined the case referred to by the gentleman from Mississippi, but I call the attention of the gentleman in charge of this bill to that fact, so that we may make no cession that will be injurious to the Government or the citizen desiring a homestead.

Mr. COOPER of Wisconsin. Mr. Chairman, the bill does not concede the title to anybody. The bill provides, in line 9, page 73:

The powers hereinbefore in this section conferred may be exercised in respect of any lands which, on the 13th of August, 1898, were owned or held by associations, corporations, communities, religious orders, or private individuals in such large tracts or parcels and in such manner as, in the opinion of the Commission, injuriously to affect the peace and welfare of the people of said islands.

It does not single out any corporation as owning any land; but if they did own or hold it under the laws of Spain, we are bound, under the treaty of Paris, to recognize that right.

Mr. COOPER of Texas. You only recognize such rights as they had at the time of the treaty of Paris.

Mr. COOPER of Wisconsin. The decree the gentleman alluded to is 1820.

Mr. COOPER of Texas. Yes; and the court held that they could not take title to church property, because the church was merged into the Crown.

Mr. COOPER of Wisconsin. They had exercised enough of title and jurisdiction and absolute proprietorship, so that under the treaty of Paris we did not feel justified in going any further in contesting their case in court. Judge Taft, an eminent lawyer and judge, says that under the treaty of Paris—and the Commission has made a very full investigation of this subject—they have titles that are good; and in response to a question he said specifically that they could defend those titles in the courts. That being so, we thought it would be best to pay, say, $5,000,000 and remove this whole trouble from the Philippine Islands, for it has been a source of very considerable trouble in the archipelago during the last century and a half.

Mr. COOPER of Texas. Then the gentleman from Wisconsin admits, or there is an implied admission in the bill of the committee, that the title vests in the church or in the friars——

Mr. COOPER of Wisconsin. There is no such admission in the bill. If there is any church organization that has title, the exercise of the right of eminent domain is given by this bill. But the bill does not say, "whereas certain religious organizations in the islands are owners in fee of certain lands;" not at all.

Mr. COOPER of Texas. But you do use the word "owned." Suppose you strike that out and retain only the word "held?"

Mr. COOPER of Wisconsin. We say "owned or held." It is in the disjunctive. It covers everything held, not only by religious organizations, but by corporations or communities.

Mr. WILLIAMS of Mississippi. The gentleman says that "it covers everything." That is just the difficulty. It covers everything and covers too much. If only the word "owned" were there, that would be all right; but it says "owned or held." It seems to me that if you would strike out the words "or held," leaving the claimants to prove their ownership, then you would not concede anything in the way of ownership.

Mr. COOPER of Wisconsin. Some witnesses before our committee testified that there had been what purported to be a transfer of certain of these lands from certain orders to certain private individuals. Really and essentially, as a matter of law, those

grantees do not own that land; they hold it under color of title, and this language would permit an attack to be made on this quasi-ownership or holding. It is to meet that situation that the language is employed.

The CHAIRMAN. As the Chair understands, the amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

SEC. 22. That the government of the Philippine Islands is hereby authorized and empowered, on such terms as it may prescribe, by general legislation, to provide for the granting or sale and conveyance to actual occupants and settlers and other citizens of said islands such parts and portions of the public domain, other than timber and mineral lands, of the United States in said islands as it may deem wise, not exceeding 16 hectares to any one person nor more than 2,000 hectares to any corporation or association of persons: *Provided*, That the grant or sale of such lands, whether the purchase price be paid at once or in partial payments, shall be conditioned upon actual and continued occupancy, improvement, and cultivation of the premises sold for a period of not less than five years, during which time the purchaser or grantee can not alienate or encumber said land or the title thereto; but such restriction shall not apply to transfers of rights and title of inheritance under the laws for the distribution of the estates of decedents.

Mr. JONES of Virginia. I move to amend by striking out all after the word "person," in line 2, page 78, down to and including the word "persons," in line 4, and to insert after the word "person" the words "or corporation;" so as to read, "not exceeding 16 hectares to any one person or corporation."

Mr. Chairman, the purpose of this amendment, I will state frankly, is to restrict the Commission in the sale and disposition of the public lands in the Philippine Islands so that not exceeding 16 hectares may be sold to any one person or corporation.

The twentieth section of the bill provides that the commissioners shall prepare certain rules and regulations regulating the disposition of these public lands; but notwithstanding that provision, this section provides that the Commission may proceed at once to dispose of lands even before these rules and regulations are adopted and receive the approval of the President and are submitted to Congress. The Commission under this section is given authority to dispose of every single acre of the 68,000,000 acres of public land in the Philippine Islands. The effect of my amendment, if adopted, will be to prevent the Commission from disposing of anything except homesteads until the rules and regulations provided for herein have been made by the Commission and approved by the President.

The question being taken on the adoption of the amendment of Mr. JONES of Virginia, there were on a division (called for by Mr. JONES of Virginia)—ayes 59, noes 67.

So the amendment was rejected.

The Clerk read as follows:

SEC. 25. That the forest laws and regulations now in force in the Philippine Islands, with such modifications and amendments as may be made by the government of said islands, are hereby continued in force, and no timber lands forming part of the public domain shall be sold, leased, or entered until the government of said islands, upon the certification of the forestry bureau that said lands are more valuable for agriculture than for forest uses, shall declare such lands so certified to be agricultural in character, and the timber on such agricultural lands so declared shall be disposed of in such manner as the government of said islands shall prescribe: *Provided*, That the said government shall have the right and is hereby empowered to issue licenses to cut, harvest, or collect timber or other forest products on reserved or unreserved public lands in said islands in accordance with the forest laws and regulations hereinbefore mentioned and the provisions of this act, and the said government may lease land to any person or persons holding such licenses, sufficient for a mill site, and may grant rights of way to enable such person or persons to get access to the lands to which such licenses apply.

Mr. JONES of Virginia. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 79, line 13, after the word "force," strike out all of lines 13, 14, 15, 16, 17, 18, 19, and 20, down to and including the word "prescribed," in line 21.

Mr. JONES of Virginia. Mr. Chairman, this section goes a step further than those we have been considering. The sections just prior to this provide for the sale of agricultural lands. This section provides for the sale of timber lands—forest lands. It gives to the Commission the power to say whether or not the timber lands are more valuable for agricultural purposes than they are for timber purposes; and if in the opinion of the Commission these lands are more valuable for agricultural purposes than they are for timber purposes, then the Commission can even sell these timber lands, and thus dispose of land that the purchaser really would never cultivate, but would simply buy for the purpose of cutting every stick of timber off the land. I am opposed to reposing in the Commission any such power as this, and therefore I hope that my amendment striking out this language will be adopted.

Mr. LACEY. Mr. Chairman, I hope the amendment will not prevail, because if it did it would retard the settlement of a considerable portion of the islands. There is some timber in these islands, such as mahogany and woods of that character, that is of very great value. The logs are so heavy that they can not be floated and have to be taken to market in boats. It is the most valuable of timbers. On the other hand, there are some localities where the timber is comparatively worthless, but the land is valuable for agricultural purposes. Now, if we absolutely reserve from sale all of the forest land, leaving no power to settle this part that is more valuable for agricultural purposes, we would retard the settlement of the country, and the object of this provision, as I understand it, is to allow the Government there to permit the settlement of some portions of this land that is now covered by timber, but which is much more valuable for cultivation than for forestry.

I would suggest to my friend in this connection that his own experience and observation in this country makes it perfectly evident that there are localities where the land is in fact covered by timber, but the timber is a burden to the land rather than an advantage. It has to be sold as brush land, land that has the burden of timber, which has to be removed, and the timber is of no actual value in itself.

Mr. JONES of Virginia. Be that as it may, Mr. Chairman, the fact remains that this section confers an immense power upon the Philippine government, a power which may be greatly abused.

Mr. LACEY. A very necessary power, however.

Mr. JONES of Virginia. A very large proportion of these public lands is forest land. This section of this bill places in the hands of the Commission the power to dispose of every acre of this forest land if it will only say that in its judgment the land is more valuable for agricultural purposes than for the purposes of timber.

Mr. TAWNEY. Does the gentleman mean the Commission, or the government, or the legislature?

Mr. LACEY. That is not an unusual provision. We have in this country the provision that you can sell land for agricultural purposes if it is more valuable for agricultural than for mining purposes. If it is more valuable for mineral, the agricultural holder can not take the land for homestead purposes. That is a power that must be vested somewhere, and it is unfair to assume that these gentlemen will abuse that power.

Mr. JONES of Virginia. I do not know how that is. The gentleman is more familiar with public-land laws in this country than I am; but we are dealing now with lands that are 10,000 miles away from here, and if possible I do not want to place in the hands of a Commission a power to dispose of all of those lands.

Mr. TAWNEY. Will the gentleman permit a question?

Mr. JONES of Virginia. Now, while there is a great deal of public land in this country—probably one-third of the entire area of the United States to-day is public land—nearly the whole of the land in the Philippine Islands is public land, and the larger part of it is covered by timber.

Mr. TAWNEY. Will the gentleman permit a question? The power that the gentleman criticises is proposed to be vested in the Philippine government, is it not?

Mr. JONES of Virginia. Yes.

Mr. TAWNEY. Does the gentleman think that power would be greater than the power he proposes to vest in that government by his substitute bill?

Mr. JONES of Virginia. We propose in our substitute bill to give to a government to be organized by the inhabitants of the Philippine Islands the power to dispose of all their property in any way they choose. The gentleman's proposition, on the contrary, is to give to a government made for the people of the Philippine Islands by the United States, and in the making of which they are not permitted to have any part, the power to dispose of their lands. We propose to give those people such full and complete independence as will enable them to enjoy an independent national existence.

Mr. TAWNEY. I beg the gentleman's pardon. That is not the provision of this bill.

[Here the hammer fell.]

Mr. CLARK. I ask for fifteen minutes in which to address the committee.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that he may address the committee for fifteen minutes. Is there objection?

There was no objection.

Mr. CLARK. Mr. Chairman, I had no idea of projecting myself into this Philippine debate at all until the very remarkable performance of the gentleman from Indiana [Mr. LANDIS] the other day. I was entirely content to leave this question in the hands of the very able Democratic minority of the committee. Barring his exordium about a young soldier who died in his town and his eulogy on General Funston, I had heard most of the gentleman's speech twenty-odd times before. It was an old acquaintance, a familiar creature, and I expect to hear it several times more this summer. The rest of you can enjoy that great luxury by paying the price of admittance; for, whatever the gentleman from Indiana thinks about the blessings of a tariff for revenue only, he has no sort of doubt about the personal benefits of lecturing for revenue only. And it is due to the truth of history to say that the applause he receives from miscellaneous audiences over the country is not half as tumultuous or unanimous

as the applause he received from the Republican members of this House.

Upon his eulogy on General Funston I desire to make two comments: First. If General Funston is as great a hero as he made him out—and I am not denying it; I do not profess to be a judge of heroes—then the next Republican Presidential ticket ought to be "Freddy and Teddy," instead of "Teddy and Freddy." [Laughter and applause on the Democratic side.]

The second suggestion is that a great many people have been deviling their heads to know why the President of the United States so unceremoniously and emphatically squelched General Funston not long ago. I take it, after listening to the eulogy of the gentleman from Indiana, that the reason is that the President of the United States is suffering from the green-eyed monster of jealousy preying upon his "innards," for, according to the gentleman from Indiana, Hero Funston stands brandishing the North Pole in one hand and the Equator in the other, while the President, as everybody knows, has never invaded the Arctic regions, at least in a military capacity. [Laughter and applause on the Democratic side.]

I hope I may make another suggestion without giving offense to anybody, and that is that while the gentleman from Indiana is erecting monuments to Republican heroes in the city of Habana he will not forget to build one to that eminent Republican financier, Mr. Neely, late of Indiana. [Laughter on the Democratic side.] Nor ought he to neglect to raise a monument to Major Rathbone, the eminent financier and protégé of MARCUS A. HANNA. [Applause on the Democratic side.]

The gentleman from Indiana [Mr. LANDIS] said that "when the war came with its responsibilities and problems and consequences, we turned our backs and ran away," and every Republican member applauded that statememt; and you would have applauded if he had declared that every man in the United States who is not a Republican ought to be drawn and quartered. With the gentleman shouting that he would not yield, with the Republicans applauding to drown me out, with the Chairman of the committee hammering his desk to the same end, I answered then that there was not a syllable of truth in that statement, and I repeat it now; and I answered it then, although the Chairman said I was out of order, because—

> I'd right the wrong where it is given,
> Though 'twere in the very court of Heaven.

The statement that the Democrats turned their backs and ran away is a foul and malicious slander, I do not care who utters it. There were as many Democrats fought in the Spanish war as there were Republicans.

Mr. VANDIVER. More, too.

Mr. CLARK. More, too, and they fought as bravely and as well. Admiral Dewey [applause], Winfield Scott Schley [applause], old "Joe" Wheeler [applause], Richmond Pearson Hobson, all wrote their names high on the scroll of fame, to say nothing of the obscurer Democratic heroes in the ranks by land and sea.

Mr. WILLIAMS of Mississippi. Bagley was the first man killed.

Mr. CLARK. Bagley was the first to die in battle, and he was a North Carolina Democrat. Gen. Fitzhugh Lee rendered invaluable services to the country, and he is a Virginia Democrat, worthy of the love, admiration, and gratitude of the whole American people.

The Spanish war was an American war. It was not a Democratic or Republican war either. There was no politics in its inception. There were no politics during its progress. It was only at the close of the war, when Republicans entered upon an ignoble, unjust, and unpatriotic attempt to try to make politics out of it. And though Schley distinguished himself in battle and won a famous victory, the Republicans have tried to rob him of his glory by the meanest conspiracy in all the hoary registers of time. [Applause on the Democratic side.] But the American people are just, and they have written Schley's name along with those of John Paul Jones, Horatio Nelson, David Farragut, Admiral Perry, Admiral Dewey, and the other great sea kings. The Democrats turned their backs and ran away! The gentleman from Indiana does not deserve the poor credit of the paternity of that infamous statement. He stole it bodily from the gentleman from Ohio [General GROSVENOR], who is the father of all political fables. [Laughter.] It was not true when the gentleman from Ohio said it. It is not true when the gentleman from Indiana reiterates it.

My judgment is and always has been that had either Mr. Cleveland or Mr. McKinley granted belligerent rights to the Cubans at any time prior to 1898 the Cubans, assisted by Americans fighting on their own hook, would have achieved their own independence and we would never have had any war with Spain and would never have had this portentous Philippine problem on our hands. But they did not do it. I am not criticising them for it. It is only just to suppose that they acted honestly according to their lights. It is no discredit to them to say that, like other folks, "their hindsight was better than their foresight." When, however, De Lome wrote his idiotic and malicious letter about President McKinley, and when the *Maine* was blown up, killing six hundred and odd of our sailors, Democrats and all other patriotic Americans demanded war. The war came and was fought to a successful conclusion, Democrats and Republicans alike bearing themselves as heroes, whether as soldiers or as sailors. Since it closed the Republicans, with gall that is astounding, have tried to hog all the honor and turn the achievments of American valor to partisan advantage.

The gentleman from Indiana endeavored to make it appear that the Philippine and Cuban wars are the same. They had no connection with each other, except one came after the other. The Cuban war was an American war to make Cuba free, to give liberty to a down-trodden people, to extend the area of republican institutions on the face of the earth. The Philippine war is a Republican war to "benevolently assimilate" a people 7,000 miles away.

The gentleman from Indiana undertakes to shove this whole Philippine business off on destiny. That has been the plea of every robber and freebooter since the world began. He says, with a great deal of unction, that he believes in God. It would be very interesting to know whether God believes in him. [Laughter and applause on the Democratic side.] He says he believes in God. I am glad to hear it, because nobody would have thought that Republicans believe in God from the way they perform. [Renewed applause.] When he asserted that he believed in God, he intended to imply that all those who differ with him are without God in the world. It is very cruel of the gentleman to act that way. Shakespeare says:

> Oh, it is excellent
> To have a giant's strength; but it is tyrannous
> To use it like a giant.

And I submit to him that it is unfair to shut the gates of mercy on mankind. I have believed in God myself, in an humble way, ever since I can recollect; but I decline to accept the gentleman from Indiana either as His prophet or His interpreter to us feebler mortals. I challenge his credentials when he undertakes to pose as the mouth piece of God on this floor. [Laughter and applause.] I would rather take Jesus Christ as the exponent of God; and he enunciated the Golden Rule, "Do unto others as you would have others do unto you," which we most assuredly are not doing to the Filipinos. It is written, "Thou shalt not bear false witness against thy neighbor."

Any man who asserts that the Democrats have attacked the American Army is either uncandid or misinformed. That is as strong as I can draw it here and keep within parliamentary lines. [Laughter and applause.] Elsewhere I would make it decidedly more emphatic and take the consequences. It is astonishing what men will do when they are in a hole and trying to fight out. For instance, the other day when the gentleman from Alabama [Mr. CLAYTON] and some others were opposing the proposition to give the President some more cadets to appoint, the distinguished gentleman from Pittsburg [Mr. DALZELL] shouted "Down with the Army!" and the gentleman from Indiana [Mr. STEELE], like a great poll parrot, repeated, "Down with the Army!" [Laughter.] I have no doubt if the other member of the Siamese triplets on the Ways and Means Committee [Mr. PAYNE of New York] had been in his place that he would have yelled "Down with the Army!" [Laughter and applause.]

It would not be surprising for a tough, a hoodlum, or a sansculotte to do a thing like that; but the gentleman from Pennsylvania [Mr. DALZELL] degrades his great intellect and imperils his high standing by so doing.

I have not said anything about the Army, good, bad, or indifferent. As it happens, I have not talked about it, and therefore I can say freely, and without trying to shield myself, that no man, I do not care how ingenious he is, can bring evidence to show that the Democrats have attacked the Army; and to say they attack the Army because certain Democrats criticise certain sporadic cases of the conduct of certain soldiers which seem improper—and some of them have been court-martialed—and to say that thereby they are criticising the Army, would be just as truthful as to say that the grand jury which indicts, that the petit jury which tries, the prosecuting attorney who prosecutes, and the judge who presides at the trial are making war on organized society because they at some time prosecuted persons who infracted the law. [Applause.]

But this false cry about abusing the Army reached the reductio ad absurdum here the other day, the extreme of the preposterous, when the chairman of the Committee on Military Affairs of this House [Mr. HULL], the president of the Philippine Hard Wood Company, with the venom of a toad and the cheek of a Hindoo god [laughter and applause], said that because some members were opposing an amendment which the Senate had tacked on an

appropriation bill they were fighting the Army, when the truth is that we simply followed the lead of the chairman of the Committee on Appropriations, the Hon. JOSEPH G. CANNON, of Illinois, one of the ablest Republicans in the land.

Mr. FLEMING. Who was once a Democrat.

Mr. CLARK. A long time ago. [Laughter.]

Mr. OLMSTED. But has reformed.

Mr. CLARK. Because we can not get the economy that we desire so much on this side of the House the Democrats being in the minority frequently follow the lead of Mr. CANNON. Sometimes "Uncle Joe's" white plume leads to victory, as did the white plume of Henry of Navarre; sometimes to defeat, and sometimes to a dog fall, as it did in the contest with the chairman of the Committee on Military Affairs.

Now, Mr. Chairman, I would like to have made this speech, or one like it, the other day, dum opus fervet, when the thing was hot [laughter], but the gentleman from Indiana dragged my name in, made statements that were not true, and then, when I wanted to reply, said. "Get time on your own side," when he knew full well that all the time on the Democratic side of the House had been already parceled out and allotted to other Democrats. He has perhaps learned by this time that he made nothing by his discourtesy. I couldn't get at him then, but I have got at him now. He laughs best who laughs last. Evidently the Republicans think, or they would not keep at it, that this talk about the Democrats being opposed to the AmericanArmy will win some votes. It may do it, for all the fools are not dead yet. It may be "a good enough Morgan" until after the election; but the cry is villainously false, and it is founded on Voltaire's dictum "Keep on lying and some of it will stick." [Prolonged applause on the Democratic side.]

By the courtesy of the House I hereby reproduce an article which I wrote for the New York American and Journal on invitation of the editor, and which in condensed form expresses my opinion on this whole Philippine problem, and which is as follows:

The Philippines, like the Rajah's diamond, have proved an unmitigated curse to all who have possessed them. The English had sense enough to abandon them. They were a heavy load about the neck of Spain for three hundred years. With unparalleled good fortune for themselves the Spaniards sold them to us for twenty millions in cold cash, and we are left with the bag to hold.

The vital issue before the American people is this: "What shall be our permanent policy in the Philippines?"

It goes to the root of our institutions.

A greater question was never debated among men, for upon its proper determination depends the perpetuity of the Republic.

The tariff, trusts, finance, building of the isthmian canal, and economy in the public expenses are all important questions pressing for solution, but farreaching and urgent as they are, they in no wise involve the existence of free government.

Jingo jugglers vociferously and vehemently insist that the overshadowing question as to our policy in the Orient was settled definitely and irrevocably by the last election. Not so, however.

A multiplicity of issues contributed to the result of the campaign of 1900. William McKinley's wonderous personal popularity was a large—perhaps the decisive—factor therein.

Mr. McKinley was many thousands of votes stronger than his party.

Many men who doubt the wisdom of our becoming an Asiatic power supported Mr. McKinley by reason of his unfailing amiability and his blameless private life. While believing him wrong, they had implicit faith that at last he would come around all right. They knew that he had changed his mind on that question radically once, swinging from the American doctrine that "forcible annexation is criminal aggression" to the un-American theory of "benevolent assimilation."

They hoped that he would experience another change of heart and return to his original position.

So far as his influence upon our destiny is concerned, it would have been far preferable for Mr. McKinley to have been a bad man with good policies rather than a good man with bad policies, for it is as true to-day as when Shakespeare wrote it that "The evil that men do lives after them."

No love for him, however intense; no admiration for his virtues, however sincere; no regret for his tragic death, however profound; no eulogium upon his character, however fervid, can alter or palliate the fact that by recanting his first opinion and by throwing the weight of his great name in favor of the Philippine propaganda he involved the country in dire difficulties and placed our institutions in imminent deadly peril.

For one hundred and twenty-six years we have vaunted ourselves as the propagandists of the idea of government of the people, by the people, and for the people. Now we are engaged in crushing a people 7,000 miles away whose only offense is that they desire to practice the theory which we have preached from the housetops.

Nor have we preached in vain, for, following our example and hearkening to our voice, a score of nations have shaken off the yolk of their royal masters, broken their shackles, and established for themselves governments modeled upon ours.

For three years the Boers of South Africa, inspired by the words of Jefferson and the deeds of Washington, made the most heroic fight for freedom recorded in the entire annuals of the human race. To our ineffable shame be it said that while England was murdering those brave little republics we stood by consenting like Saul at the stoning of Stephen.

Wherefore? Because we are engaged in the same sort of bloody business in the Philippines. We appear to have entered into a sort of tacit agreement with John Bull that if he will not interefere with our foreign conquests we will not raise our voice against his foreign coquests.

On the one issue of permanently retaining the Philippines and ruling them by the sword, Democrats would have swept the land from sea to sea, for let it not be forgotten that in 1900 it was in the East that we made substantial gains, and it was in the East that imperialism was most exploited as the dominant issue.

The same per cent of gains spread all over the Union would have given us the victory. If we hope to win, we must ex necessitate rei secure recruits from the Republican ranks. That's plain as the nose on one's face.

Are Republicans a unit on this question?

By no manner of means. True that not long since "Uncle JOE" CANNON, chairman of the Committee on Appropriations, in the heat of debate, with frantic gesture, yelled at the top of his voice, "We intend to keep the Philippines forever and a day!" but it must be remembered that on that occasion "Uncle JOE" was in a hole and fighting to get out.

Republics are constitutionally unfit to successfully or economically administer colonial affairs.

Proconsular government has been notoriously corrupt, unjust, and tyrannical since the world began, and will continue so till the end of time. All history, sacred and profane, demonstrates the truth of that proposition. It matters nothing whether the proconsuls are Romans, Britains, Spaniards, or Americans. The corruption, injustice, and tyranny grow inevitably out of the proconsular system.

It is written that "evil inventions return to plague the inventors," and the corruption, injustice, and tyranny which we inflict upon the Filipinos by our proconsular government will at last be practiced upon ourselves. We are progressing after the manner of the crab—backward.

Already one of our military satraps in the Philippines has said: "The Constitution is played out; there is no use to discuss it." Another has declared that men have been sent to prison in the Philippines for such utterances as those of Professor Schurman in his Boston speech.

Yet another has pronounced the Declaration of Independence to be a "damned incendiary document," which is precisely the opinion of it entertained by George III and Lord North.

Considered for military purposes, the Philippines would be a source of weakness, just as they were to Spain. Were we engaged in a war with a great power—as we at any time may be—the Philippines would be the place of attack, and we would be compelled to do our fighting 7,000 miles from our base of supplies, which would place us at a great disadvantage, doubling the cost and quadrupling the chances of defeat.

Why should we run such desperate risks when we have all to lose and absolutely nothing to gain?

The basic principle of republics—"governments derive their just powers from the consent of the governed"—is true or we as a nation have no raison d'être.

If that proposition is not true, Washington and the other Revolutionary heroes were rank traitors. If it is not true, John Hancock, old John Adams, Patrick Henry, Thomas Jefferson, and their compeers were pestilent disturbers of the peace of George III.

If it is not true, Theodore Roosevelt is exercising powers usurped from King Edward VII, and the Congress of the United States consists of 451 rebellious brawlers.

This miserable Philippine business familiarizes the American people with the idea of a large standing army.

General Chaffee says that we will need 50,000 soldiers in the Philippines alone for five years. Judging the future by the past, we will need that many there till the judgment day.

We are told that, waiving the quantum of the sin of subjugating a distant people, we must hold on to the Philippines because we want their trade. It is not denied that trade with the Filipinos and every other people is desirable.

Democrats are as anxious for trade as are the jingoes, but they place liberty and good conscience above money.

Democrats do not believe that we must own a man in order to trade with him.

The dollar argument is the most sordid of all, but let us take it on that low basis and see how the matter stands.

The Philippines, to say nothing of the loss of life and the huge pension load we are fastening on our children and children's children, have up to date cost us nearly $600,000,000, according to the arithmetic of Senator HOAR.

During the fiscal year ending June 30, 1901, we expended in the Philippines $60,000,000.

During the same period our profits from trade with the Philippines, allowing for ourselves 20 per cent profit on all we exported to and imported from those islands, were only the beggarly sum of $1,085,541.

Expending $90 a year to get $1 profit may be solarwalk statesmanship, but to a plain man who understands mathematics it appears to be stark idiocy.

The only reason such an insane policy does not bankrupt the United States is because the United States is so rich. No other nation on earth could stand it, and we can't stand it long without disastrous results.

Our institutions were indeed bought with a great price. Shall we now recklessly jeopardize them through greed or by reason of a vainglorious ambition for foreign conquest? I do not believe that the American people will so decide.

It surely can not be that the spirit of 1876 is entirely dead in the American heart. To that spirit and that heart Democrats confidently appeal in this crisis of our country's fate.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Virginia.

The question was taken; and on a division (demanded by Mr. JONES of Virginia) there were—81 ayes and 108 noes.

So the amendment was rejected.

Mr. LITTLEFIELD. Mr. Chairman, I ask unanimous consent for about ten minutes to contribute a few views.

The CHAIRMAN. The gentleman from Maine asks unanimous consent for ten minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. LITTLEFIELD. Mr. Chairman, although I am feeling somewhat indisposed, I thought I would improve this opportunity to congratulate the distinguished gentleman from Missouri [Mr. CLARK] for having recovered from his intellectual paralysis into which he was jolted by the gentleman from Indiana the other day. [Laughter.]

Now, I have no part in the controversy, if controversy there be, between the gentleman from Indiana and the gentleman from Missouri, although it does appear, if the gentleman from Missouri is correct, that it has simply been transferred from the rostrum where people contribute the coin of the realm at the rate of fifty cents, seventy-five cents, or a dollar to hear the debates between these two distinguished gentlemen to this arena [laughter]; but I wish to contribute to the truth of history. I do not think that the gentleman from Missouri succeeded in sustaining his suggestion which he made emphatically on the floor two or three days ago, and that is that the gentleman from Indiana had not stated the facts in connection with our friends the Democracy, because I

understood the gentleman from Indiana to suggest that since the ratification of the treaty of Paris, which desirable work was contributed to in a large and successful degree by distinguished Democrats, our Democratic friends had succeeded in running from every problem connected with the Philippine question.

I submit to my distinguished friend from Missouri that it is no answer to say that there are Democrats in the Army who have achieved glory in connection with the Spanish war, because the gentleman from Indiana, although enthusiastic and eloquent, had no reference whatever to men in the Army. He was simply referring to our Democratic friends from the standpoint of so-called statesmanship, and the suggestion that men. in the Army fought is no answer to a suggestion that our Democratic statesmen have continued to run. [Laughter.] But it does appear, while my friend says they have not run, while he may be sincere in what he says, it only demonstrates that he does not know when he is running from a proposition of that kind. [Laughter.]

But, Mr. Chairman, historical facts should not be distorted by debate, although interesting and exciting upon either side. I feel bound to say that the gentleman from Indiana was not entirely correct in his statement of facts, because our Democratic friends did not start to run immediately after the ratification of the treaty of Paris. I wish to call attention to the public fact which demonstrates that, and they are entitled to the benefit of it. There was a fact connected with the Philippine question, an instance in which some of them stayed with the proposition. The treaty of Paris provided for the payment of $20,000,000. Now, in the exuberant imagination of our Democratic and anti-imperialistic friends this $20,000,000 has been referred to in times past as payment for 10,000,000 men at $2 a head. Now, however that may be, the facts deserve to be called to the attention of the committee and the American people.

Mr. SHACKLEFORD. May I ask the gentleman a question?

Mr. LITTLEFIELD. Oh, yes; the more the merrier.

Mr. SHACKLEFORD. I believe it was Mr. Reed, of Maine, who started that expression.

Mr. LITTLEFIELD. It does not make any difference who "started" it. If you were not sharp enough to invent it, you adopted the proposition and howled it all around. [Laughter.] I know that Mr. Reed is ingenious in epigrams, and you are to be congratulated that you have been amused now and then by the distinguished gentleman from Maine in connection with your propaganda. The gentleman from Texas, by the way, spoke of following the "gentleman from Maine," but did not in fact, though in the excitement of the occasion he thought he did, which is practically the same thing, for "as a man thinketh so is he," assuming that he does think.

Now, as to this appropriation of $20,000,000—assuming, now, that it was a purchase of men per head, at $2 a head—that is a thing that some of our Democratic friends are entitled to credit for. A bill appropriating $20,000,000 in discharge of one of the obligations of the treaty of Paris was pending in this House on the 20th day of February, 1899, only about eleven days, if I remember correctly, after the treaty was ratified in the Senate through the assistance of our distinguished Democratic friends. The ratifications of the treaty were not exchanged until April 11, 1899.

Now, every man here knows—I will not say that every man knows; but every man ought to know, and I have no doubt will know, when he comes to think of it—that a treaty can not appropriate money out of the Treasury, and in order for that provision of the treaty to become effective, and to insure the payment of the money to carry out this great international contract, it was necessary for the House and the Senate to appropriate $20,000,000 to buy, as our friends say, 10,000,000 people. Now, I want to say that our Democratic friends assisted in that interesting performance. It was pending, I say, on the 20th day of February, under a motion to suspend the rules and pass that appropriation; and when that vote was taken there were 219 yeas and 33 nays, an aggregate of 252, the required two-thirds being 168, and the Republicans had on that roll call only 155.

Now, the same thing happened in connection with this transaction that happened in the Senate of the United States when the treaty was pending for ratification. It was not possible to pass the bill through this House without the aid of Democratic votes, and 64 patriotic, distinguished Democratic and Populistic statesmen voted for the proposition to do—what? Pay $20,000,000 to buy 10,000,000 people, upon the theory which has been stated. Well, now, there are two points I would like to suggest.

Mr. COOPER of Texas and Mr. DE ARMOND rose.

Mr. LITTLEFIELD. I will cheerfully yield to either gentleman. I am gradually getting over my indisposition.

Mr. DE ARMOND. I should like to ask the gentleman from Maine whether it took a two-thirds vote of this House to pass a measure appropriating $20,000,000—whether the gentleman contends that it did?

Mr. LITTLEFIELD. It did as this appropriation was pending, and the RECORD shows it.

Mr. DE ARMOND. I am asking whether it required a two-thirds vote to make that appropriation?

Mr. LITTLEFIELD. As that question was pending before the House, it did, because the RECORD so shows.

Mr. DE ARMOND. The gentleman from Maine evidently does not understand the question I am asking him, because if he did, I know he would not avoid answering it.

Mr. LITTLEFIELD. What is the question?

Mr. DE ARMOND. I am asking whether the gentleman's conception is that it requires a two-thirds vote of this House or the other House to pass a bill to appropriate $20,000,000 or any other number of dollars for that purpose or for any other?

Mr. LITTLEFIELD. The contention of "the gentleman from Maine" is that he stated the facts exactly as they occurred, and the RECORD bears out "the gentleman from Maine." I stated that when that appropriation was pending, as it was pending, it required a two-thirds vote to suspend the rules to pass it. That is what I said. Here is the RECORD:

So (two-thirds having voted in the affirmative) the rules were suspended and the bill was passed.

That is the bill I was talking about.

Mr. COOPER of Texas rose.

Mr. LITTLEFIELD. Let me answer first the gentleman from Missouri. Do not be too much in a hurry. What I am saying is in the interest of correcting some historical data, so that we may know where we are. Now, this was a bill that was pending on a motion to suspend the rules, which requires a two-thirds vote, and does the gentleman from Missouri undertake to tell the gentleman from Maine that it does not require a two-thirds vote to suspend the rules?

Mr. DE ARMOND. Oh, no.

Mr. LITTLEFIELD. Very well, then.

Mr. DE ARMOND. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. LITTLEFIELD. Yes.

Mr. DE ARMOND. I am very glad that the gentleman from Maine has made the statement he did, because it is a credit to his information and does not leave him under the confusing impression one would gather from his former statement he may have entertained in regard to appropriations.

Mr. LITTLEFIELD. I am very greatly obliged to the gentleman from Missouri for thus rehabilitating the gentleman from Maine. [Laughter.]

Mr. COOPER of Texas. Mr. Chairman, will the gentleman yield to a question?

Mr. LITTLEFIELD. Let us get this in consecutive order, so that even the rest of you can understand it. [Laughter on the Republican side.] As I say, a bill was pending upon which a motion was made to suspend the rules, and, by the way, I may say here that the gentleman from Illinois [Mr. CANNON] undertook to move this same bill as an amendment to an appropriation bill, but one of our distinguished Democratic friends raised the point of order, on which it went out, and afterwards the gentleman from Illinois brought in a bill under circumstances where it required a two-thirds vote to suspend the rules.

This is the bill (H. R. 12125) appropriating $20,000,000 "for the purpose of carrying out the obligations of the treaty between the United States and Spain concluded at Paris on the 10th day of December, 1898, to become immediately available upon the exchange of the ratifications of said treaty."

Now, that was the proposition, to carry out the provisions of the treaty of Paris.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LITTLEFIELD. Is that so? I shall have to ask for a few moments longer.

Mr. COOPER of Texas. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended one minute in order that I may ask him a question.

Mr. LITTLEFIELD. Oh, I can not get half through this in a minute. I would ask that my time be extended ten minutes.

The CHAIRMAN. The gentleman from Maine asks that his time be extended ten minutes. Is there objection?

There was no objection.

Mr. COOPER of Texas. Mr. Chairman, will the gentleman yield for a question?

Mr. LITTLEFIELD. Certainly.

Mr. COOPER of Texas. I understand the gentleman from Maine complains that the Democratic side of the House voted for the appropriation of $20,000,000 to pay the debt incurred by the ratification of the treaty of Paris.

Mr. LITTLEFIELD. Then the gentleman does not understand the gentleman from Maine at all. The gentleman from Maine is going to commend the other side for performing that patriotic duty when he gets around to it. The gentleman from Maine does not complain, not at all.

Mr. COOPER of Texas. When the ratification of the treaty of Paris was made by the Senate of the United States, was there

not an obligation on the part of this Government to pay the $20,000,000, and would you ever have blamed the Democratic party for voting to pay that sum?

Mr. LITTLEFIELD. I will answer that by giving you a quotation from the speech of a distinguished Democrat, Mr. WHEELER, of Kentucky. It is true that an obligation rested upon us, just as to-day obligations rest upon us under the treaty of Paris. [Applause on the Republican side.] And just exactly as our Democratic friends—although I agree with them in some respects from a legal standpoint—as the gentleman from Indiana well said, have evaded and run from every one of those propositions under the treaty of Paris; and it does not answer it to say that Winfield Scott Schley, although he made a loop and escaped danger, fought in the war and acquired glory——

Mr. CLARK. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. LITTLEFIELD. Yes.

Mr. CLARK. Suppose that the Senate should ratify a treaty that every member of the House was opposed to—make an extreme case—necessitating an appropriation, do you think the House of Representatives in that kind of a case would be under any obligations to make the appropriation or not?

Mr. LITTLEFIELD. Well, now, I can quote the gentleman Democratic authority on that in just a moment; but before I reach it let me say this——

Mr. CLARK. I want the gentleman's opinion of the case. That is a fair question, a legal question, and I want to hear what he has to say.

Mr. LITTLEFIELD. As early as 1794 or 1814 the House of Representatives by solemn resolution declared that it had the right to exercise its constitutional judgment upon the question as to whether or not it would carry out similar conditions in a treaty away back there.

Mr. CLARK. That is all right.

Mr. LITTLEFIELD. I do not express any opinion on it, but that is what the House held away back there. Now, just for a moment, here were some of our distinguished friends who voted to carry out this obligation of the treaty of Paris:

Mr. BAILEY of Texas, Mr. BANKHEAD, Mr. BRANTLEY—I can not stop to read them all; Mr. COWHERD of Missouri, Mr. Cummings of New York, Mr. DINSMORE, Mr. FLEMING, Mr. LANHAM, and even Mr. Lentz of Ohio voted to do it. Mr. LIVINGSTON, Mr. MCCLELLAN of New York, Mr. RICHARDSON of Tennessee, the leader of the Democratic side of the House; Mr. ROBINSON of Indiana, Mr. SLAYDEN, Mr. SULZER, Mr. UNDERWOOD, Mr. WILLIAMS of Mississippi.

Now, I will read you what the distinguished gentleman from Kentucky [Mr. WHEELER] said upon this very occasion, before this vote was taken, so as to show that our Democratic friends who voted with us are entitled to the credit of it. Now, I do not complain about that. I congratulate them on performing a public duty under those circumstances. Here is what Mr. WHEELER said:

> Mr. Speaker, it seems to be fashionable for gentlemen to say how they intend to vote on this bill. I avail myself of this opportunity to say with great pleasure that I intend to vote against the bill, because I believe it to be wrong in principle and infamous in execution. And, sir, I can not understand how gentlemen can say they are opposed to the appropriation, they are opposed to the policy of the Government, they are opposed to the destruction of the lives of innocent islanders who are fighting for their homes and firesides, and yet, for a sentiment, for fear it will give offense to some effete and decayed monarchy, they propose to vote for this measure.

Now, if Mr. WHEELER was correct, the war was then on; voting for the $20,000,000 appropriation was voting war upon defenseless people, but our Democratic friends patriotically stood up to the number of 64 and voted that way, and Mr. WHEELER suggested that they were not entirely sincere upon that proposition. But we have 64 men who in the first great obligation devolving upon this country by the treaty of Paris stood shoulder to shoulder with the Republican party in discharging that duty.

Well, now, since then they have failed to stand with the Republican party in discharging the obligations, great, severe, and tremendous though they may be, vested in us and saddled upon us by the negotiation of that treaty. Now, what should we say about our distinguished friends who started out with us, but since have not continued to go with us in discharging these obligations? I do not propose to characterize them, but I will read what my friend from Kentucky [Mr. WHEELER], acting as a prophet and a seer, said on that very occasion. I do not adopt his language, but here is what he said:

> I am not a prophet nor the son of a prophet, but I venture to predict the time will come when those who are now so swift to give in their adherence to the policy of the Administration will be equally quick to swear that they were out of sympathy with it.

Now, if I am correctly informed and fully advised, I think our friends are out of sympathy with it; but this was not all of my friend's prophecy. He went on further. Now, I do not say this. I do not go so far as to say that I indorse it. I simply say that a distinguished Democrat from Kentucky, a man of character and ability and integrity, said this about his Democratic friends:

> And, sir, with all due deference and respect to some gentlemen on this side and some gentlemen on the other side, I can not refrain from expressing a superlative contempt for a man who believes a thing to be wrong, but for the sake of form will give in his adherence to it.

Well, I suppose he intended that blistering, scorching language to apply to our 64 friends who were voting the $20,000,000 to buy, upon their theory, 10,000,000 of people at $2 per. Now, I do not characterize them in that way. I simply call attention to this in order that the historical facts may be well understood, and that my friend from Indiana may be properly corrected in this respect.

Now, that is the record, and I will put into the RECORD, by the way, the list of the Democrats who, I believe, acted patriotically; and I will say, for the benefit of my friend from Missouri, Mr. CLARK, that he voted "no" upon that proposition. My friend from Missouri, Mr. DE ARMOND, also voted "no." There were 33 Democratic friends who voted "no" consistently, I have no doubt, and I have no doubt they have maintained a consistent attitude ever since. But it simply demonstrates that subsequent to this act, this attempt to discharge one of the great obligations resting upon the Republic by virtue of this treaty of Paris, our friends have been turning and running the other way. This is the list.

Democrats voting for appropriation:

Allen;	Davey,	Lewis, Ga.	Ridgley,
Bailey,	De Vries,	Livingston,	Robinson, Ind.
Bankhead,	Dinsmore,	Lloyd,	Settle,
Bell,	Dockery,	McClellan,	Sims,
Berry,	Driggs,	McLain,	Slayden,
Brantley,	Elliott,	Maddox,	Smith, Ky.
Baker, Md.	Fitzgerald,	Maguire,	Spight,
Barlow,	Fleming,	Meekison,	Stallings,
Bodine,	Fox,	Meyer, La.	Stark,
Brenner, Ohio	Greene (Pop.)	Miers, Ind.	Stokes,
Brucker,	Henry, Miss.	Moon,	Strode (Pop.)
Burke,	Henry, Texas	Newlands,	Sulzer,
Catchings,	Kleberg,	Ogden,	Underwood,
Clardy,	Lanham,	Pierce, Tenn.	Vincent,
Cowherd,	Latimer,	Rhea,	Williams, Miss.
Cummings,	Lentz,	Richardson,	

(See Cong. Record, 55th Cong., vol. 32, part 2, p. 2119.)

By way of further answer to the gentleman from Missouri, Mr. WHEELER said:

> I know we have the constitutional right to refuse to vote this appropriation, and behind the ægis of the Constitution I propose to exercise that right and vote against it, and to demand the yeas and nays, that the country may know how many there are of us in this body willing to go on record in defiance of the infamous penny-a-liners who are trying to drive every man out of public life who does not bow with superserviceable servility to their imperious dictates.

Now, I have just a word that I want to say here in connection with this question, which is, perhaps, more or less germane to this bill. I do not altogether like some of the terms of this bill, but I do not believe that the antecedent and cotemporaneous facts and suggestions that have been referred to in this debate have any legitimate force or consideration here, because I look upon the treaty of Paris as a great historical fact.

It is entirely immaterial from my point of view whether William Jennings Bryan made that treaty possible or not. The fact is that it is a treaty, the law of this land, of the archipelago. The fact which is of importance is that it is not only the law of this land, but it is the law of all lands. Under the Constitution it is the supreme law of the land, and by virtue of international law it is the supreme international law.

It governs this country, it governs the archipelago, it governs all countries of the world in dealing with this country and with this archipelago. In this treaty one of our obligations to Spain is to see that the Spanish citizens can engage in business and employment in this archipelago and be protected therein. The Republic, in my judgment, was made responsible to evolve order out of chaos in the archipelago.

It was bound to establish government, a government of law and order, and to see that life, person, and property should be protected in the archipelago, and not only to maintain this treaty, but to see that the obligations under the treaty are discharged, in order that the peace of Christendom be maintained. So far as I am concerned, while I do not like this provision, which only proposes that a part of the bill of rights shall go there, when I think they are all there, which makes them citizens of the archipelago when they owe allegiance to the Republic, I think they are full citizens of the Republic to which they owe allegiance. That is a matter which, in my view, the bill itself can not control.

But I believe in the bill, and especially that feature of it that confers legislative rights in the lower branch of the house upon Filipinos who are capable of taking part in it on the basis of the existing conditions, which enables them to control the real legislation for the people, and for that reason I am glad to have this opportunity to say that I firmly believe in the bill, which ought

to be passed in the discharge of one of the great obligations resting upon the Republic. It involves a change from military to civil rule. I would like to see our friends upon the other side stand with us upon the proposition that they are willing to improve the condition of the Filipinos in the archipelago, exchange the civil for the military rule, as they were willing to appropriate the $20,000,000 to carry out the first and most obvious obligation involved in the treaty of Paris. [Loud and continued applause on the Republican side.]

Mr. DE ARMOND. Mr. Chairman, I desire to have permission to address the committee for ten minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that he may be allowed to proceed for ten minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. DE ARMOND. Mr. Chairman, I have no intention whatever of trying to supplement, explain, or modify anything said so well by my colleague [Mr. CLARK]. What he said covers fully and abundantly all the questions to which he addressed himself. He spoke, as he always speaks, earnestly, ably, courageously; and exhausted the subject discussed.

The gentleman from Maine [Mr. LITTLEFIELD] evidently appreciates that fact, because while he seemed at the outset as if he were going to answer my colleague, it became very evident as he proceeded that he had no such purpose, and it is absolutely assured, now that he has concluded, that he did not touch a single thing said by my colleague.

The discussion has some interest, however. The gentleman from Maine started out to maintain the proposition that the Democrats have run from everything involved in this Philippine controversy. Now, I really was interested when the gentleman delivered that pronunciamento, and was curious to know what his specifications would be, and what he would offer in justification of his contention. He specified nothing at all; and of course it was unnecessary to offer anything in support of the specification. [Laughter and applause on the Democratic side.] The Democrats run from this proposition?

Mr. OLMSTED. Will the gentleman allow me?

Mr. DE ARMOND. I must decline that illumination that would be thrown upon this whole question by injecting at this point the wisdom of my friend from Pennsylvania. It would be so overwhelming that it would be confusing to all of us. [Laughter on the Democratic side.] I therefore prefer to proceed a moment in this semi-twilight that exists in the absence of that gleam which would come. [Renewed laughter.]

Mr. Chairman, the gentleman suggests that we ran from the propositions involved in this Philippine controversy. Now, I wonder what particular proposition and from what particular part.

Mr. OLMSTED. I was about to suggest——

Mr. DE ARMOND. I would rather the gentleman would not, because it can not be possible that he could know what the gentleman from Maine evidently does not know or he would have suggested it. [Laughter.] It is a kindness to decline to permit the gentleman from Pennsylvania to make a suggestion as to what the gentleman from Maine knew or intended to say. It is an evident kindness. [Laughter.]

The gentleman from Maine finds that some persons here voted to appropriate $20,000,000. That is running from something. What are the propositions to which the Democrats rush, and what are the propositions from which they run?

They stood from first to last on this proposition, and they stand upon it to-day, and they will stand upon it as long as a Democrat remains in the land: That this Republic has no right under the Constitution, no right in the light of our history, no right in decency or of any human principle that deserves consideration upon this continent, to force an alien rule upon the Filipino people, and to establish on their side of the world a colonial empire. [Applause on the Democratic side.]

At one time I thought, when an important matter with reference to Porto Rico was up, that a certain most distinguished gentleman from the State of Maine was about to nail his colors to the mast, and was about to sail the seas of political life, devoted also to the proposition that the Constitution controls, and that the rights of the people, not only of our own land, but of other lands with which we have to deal, are so sacred that we could not take up the rôle of tyrants in destroying them. [Laughter and applause on the Democratic side.] I will not say that he has run away from any such a proposition. I may have misunderstood what his proposition was, and he may have misunderstood the sentiment, not in the country at large, perhaps, but in a certain corner of the country, respecting that proposition. [Laughter on the Democratic side.] I do not know how that is.

The gentleman finds, too, that certain distinguished Democrats favored the ratification of the treaty with Spain and that certain Democrats voted for the appropriation of $20,000,000 to be paid to Spain. Let me submit this proposition: Does the gentleman accuse the Democrats who voted for the ratification of the treaty? Does he accuse the Democrats who voted to appropriate the $20,000,000 as guilty of some wrong, or does he defend and try to excuse the conduct of his party by the fact that they were found in good company when these things took place?

Now, which is the proposition? These Democrats voted wrong or they voted right. If they voted wrong, you voted wrong with them; if they voted right, you voted right with them. Now, are you excusing or defending yourself? [Laughter on the Democratic side.] Who is running away?

When the treaty was ratified no man proclaimed that the purpose of the Republican party or of any section or element of our citizenship was to hold the Philippine Islands at the point of the bayonet. No man proclaimed then any such policy as that of making a howling wilderness and leaving strewn over the wilderness the bloody corpses of men, women, and children, whose greatest offense was that they fought for liberty in their own land. Nobody proclaimed that.

It was intimated, not stated openly and boldly—it was intimated and the credulous were given to understand, that our Republican friends would deal with these questions when they came as Americans should deal with them, and even to this day you do not dare to proclaim what your policy is. Are you going to hold the islands permanently? "You will find it out by and by." When are you going to let them go? You do not know; you do not suggest. You are feeling along, feeling your way, feeling into the pockets of the Filipinos, feeling around for their lands and their money and their timber, feeling around for anything you may fasten your hands upon and find devices and means for carrying away. Yes; you are feeling your way. [Laughter and applause on the Democratic side.]

But, gentlemen, there is a retreat involved in this business. Your party has made a signal departure in principle. Your party has departed from everything in connection with this whole controversy which from time to time you professed. If you had been candid and honest, the people would have relied upon you to do what you should have been accustomed to do, having regard for the Constitution and respect for the Declaration of Independence.

Here is a bill now in which you provide that a man in his own land, out of the very territory in which he was born, where his forefathers for three hundred years have lived, may get 40 acres of land for a home, while a Godless corporation, organized for the purpose of exploiting and robbing, can get 5,000 acres of land. [Applause on the Democratic side.]

This bill is a scheme artfully contrived to take away from the Filipinos everything that can be carried away with profit and to use and enjoy, to the exclusion of every right of the people who dwell in that land, everything that can be used profitably. It is the robber's game. Talk about "Old Glory" floating over such a performance! You ought to raise the pirate flag. That would properly characterize what you are doing and properly indicate to those who see your flag flying what your purposes are. And when your fell designs are accomplished, if ever unhappily they be, that flag—the black flag, the flag of spoliation, the flag of robbery, the flag of wrong—will properly represent your achievements.

The gentleman from Maine seems to be in the business of making suggestions in regard to "running away;" and he seems to suggest that Schley made "the loop" in order to escape danger. The gentleman must have said that without thought. He did not mean, I think, to make an attack upon Admiral Schley. He did not mean that the man who commanded the American fleet, the man who won for America's arms the great victory down at Santiago, was a coward.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DE ARMOND. I ask five minutes more.

Mr. OLMSTED. I shall object, unless he will let me ask him a question.

Mr. DE ARMOND. Make it ten minutes, and I will give you all the opportunity you may ask.

The CHAIRMAN. Is there objection to extending the time of the gentleman from Missouri for ten minutes?

Mr. COOPER of Wisconsin. I object to an extension of more than five minutes, and when that time has expired I shall demand the regular order.

Mr. DE ARMOND. Well, I will yield to the gentleman from Pennsylvania in a moment. We have discovered in this exploitation——

Mr. OLMSTED rose.

Mr. DE ARMOND. Oh, let us get through with Schley. Schley is in a very embarrassing position just now. [Laughter.] Schley and "the loop!" Let us dwell a moment on that. Let us dwell for a moment on the man who stands in the naval history of this country with reference to these recent events second only to the hero of the battle of Manila Bay. Making a loop to get out of danger! Taking the coward's part! Surely the gentleman from

Maine could not have meant that. What he said must have been said in the wild exuberance of his enthusiasm, in the exultation with which he was exploiting something, through the feeling upon him of the necessity of magnifying and expanding, because he has too good an intellect to mislead him into the belief that he was really intending to talk so. His intellect is altogether too good for him to have intended to say anything about it. The gentleman really, I think, made his remark about Schley without thought and without meaning. He did not think, but he talked, and unfortunately he slandered an American hero when he did it. [Applause on the Democratic side.]

Mr. Chairman, if all of us could be as safe in history and as prominent in history as Admiral Schley; if there could be attributed to us no shortcomings and no evidence of cowardice which may not be attributed to him; if we might be credited with the same candor and the same manliness that he displayed, and if by any possibility our services to our country could be as valuable and as glorious to all our fellow-citizens as his, and if a page of the world's history could be illumined by anything which we might do to a thousandth part of the extent to which it has been gloriously illumined by what he did, fortunate indeed would we be! I am satisfied that the gentleman from Maine would do well—not justice to Schley and Schley's record, because Schley and Schley's record and Schley's achievements are far above the reach of flippant words or evil designs—by doing justice to himself, so that he will not pose as the slanderer of Schley.

But I notice that my time is slipping on, and I am really desirous to yield to the gentleman from Pennsylvania [Mr. OLMSTED] for the question which he wishes to ask.

Mr. OLMSTED. I simply wish to ask the gentleman from Missouri if, when, on the 29th of April, 1898, himself, his colleague, and 129 others upon that side of the Chamber voted against the bill to provide the revenues for the expenditure necessary to carry on the war, they were not running away from the war into which they had dragged us "by the scruff of the neck?"

Mr. DE ARMOND. Mr. Chairman, I did not know that so soon and by such direct evidence the real charity that was in my mind and my heart when I tried to keep the gentleman in his seat would be exemplified and established so completely. [Laughter on the Democratic side.]

Now, the gentleman's conception of the importance of these questions, of the bearing of this incident upon that proposition, of the relation of this fact to that theory, has been demonstrated by himself to be so peculiar, and his understanding of running away so remarkable, that I think even he, upon cooler reflection, and perhaps with the aid of friends making suggestions, will reach the conclusion that I did him far more kindness than he has done for himself. No, I do not think we ran away from anybody. I do not think the man who votes by his judgment and conscience, I do not think the man who stands as well as he can by his principles, I do not think the man who tries to be American as our forefathers were American, who tries to have regard for the Constitution as they had regard for it, who tries to respect the Declaration of Independence as they respected it, who tries to respect the rights of man as the noblest and greatest and loftiest and purest in our own land and all lands have done, is running away from anything. I do not think he has need to run away from anything, but I do not think that the truckling policy which began with wanting a coaling station, which later on reached out and got the cession of the islands, is particularly commendable.

Oh, yes, we could dispose of the matter nicely. We did not want the islands; we did not want them; we did not wish to acquire territory; we were magnanimous and generous; and then step by step, little by little, we are filching away the rights of people as a thief in the night filches away property. It may not be running away from things, but it certainly is reaching into things which had better be left alone.

Mr. WILLIAMS of Mississippi. It is running away with things.

Mr. DE ARMOND. It is running away with principle after pelf. [Applause on the Democratic side.]

[Here the hammer fell.]

The Clerk read as follows:

SEC. 36. That where an adverse claim is filed during the period of publication it shall be upon oath of the person or persons making the same, and shall show the nature, boundaries, and extent of such adverse claim, and all proceedings, except the publication of notice and making and filing of the affidavit thereof, shall be stayed until the controversy shall have been settled or decided by a court of competent jurisdiction or the adverse claim waived. It shall be the duty of the adverse claimant, within thirty days after filing his claim, to commence proceedings in a court of competent jurisdiction to determine the question of the right of possession, and prosecute the same with reasonable diligence to final judgment, and a failure so to do shall be a waiver of his adverse claim. After such judgment shall have been rendered the party entitled to the possession of the claim, or any portion thereof, may, without giving further notice, file a certified copy of the judgment roll with the Philippine bureau of public lands, together with the certificate of the commissioner of mines that the requisite conditions prescribed by this act have been complied with, whereupon the whole proceedings and the judgment roll shall be certified by the chief of the Philippine bureau of public lands, to the secretary of the interior for the Philippine Islands, and a patent shall issue thereon for the claim, or such portion thereof as the applicant shall appear, from the decision of the court, rightly to possess.

The adverse claim may be verified by the oath of any duly authorized agent or attorney in fact of the adverse claimant cognizant of the facts stated; and the adverse claimant, if residing or at the time being beyond the limits of the province or military department wherein the claim is situated, may make oath to the adverse claim before the clerk of any court of record or any notary public of any province or military department of said islands, or any other officer authorized to administer oaths where the adverse claimant may then be. If it appears from the decision of the court that several parties are entitled to separate and different portions of the claim, each party may pay for his portion of the claim, with the proper fees, and file the certificate and description by the chief of the Philippine bureau of public lands, whereupon he shall certify the proceedings and judgment roll to the secretary of the interior for said islands, as in the preceding case, and patents shall issue to the several parties according to their respective rights. If in any action brought pursuant to this section, title to the ground in controversy shall not be established by either party, the court shall so find, and judgment shall be entered accordingly. In such case costs shall not be allowed to either party, and the claimant shall not proceed in the office of the secretary of the interior for said islands, or be entitled to a patent for the ground in controversy until he shall have perfected his title. Nothing herein contained shall be construed to prevent the alienation of a title conveyed by a patent for a mining claim to any person whomsoever.

Mr. COOPER of Wisconsin. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GILLETT of Massachusetts, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2295, and had come to no resolution thereon.

ORDER OF BUSINESS.

Mr. COOPER of Wisconsin. Mr. Speaker, I ask unanimous consent that so much of the order as requires a recess at this time under which the House and the committee are acting may be vacated.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that so much of the order governing the consideration of this bill as requires the recess to be taken from 5 o'clock until 8 p. m. be vacated. Is there objection?

Mr. RICHARDSON of Tennessee. Mr. Speaker, reserving the right to object, I would like to ask the gentleman what his object is?

Mr. COOPER of Wisconsin. The object is to pass the bill to-night. We have a very full attendance. We have nearly completed the bill, and I think we can get to a vote easily in an hour.

Mr. WILLIAMS of Mississippi. That will not do away with the night session.

Mr. COOPER of Wisconsin. Yes; it will.

Mr. PAYNE. I will state to the gentleman from Tennessee that the final adjournment of this session of Congress will probably depend upon the final disposition of this bill. It is quite essential that we should get it into conference as soon as possible.

Mr. RICHARDSON of Tennessee. I understand that; but if it takes an hour longer to complete the reading of the bill, and then we have two yea-and-nay votes, it will keep us here until 7 o'clock and after, and I shall object.

Mr. WILLIAMS of Mississippi. Oh, no; let us stay here. It will save us time in the future.

Mr. RICHARDSON of Tennessee. For myself I do not think that we could get through before 7 o'clock.

The SPEAKER. The Chair will state that the Clerk reports that he can finish the reading of the bill in fifteen minutes.

Mr. RICHARDSON of Tennessee. I understood it would take an hour longer. I am not going to interfere with the minority members of the Insular Committee. If they desire to go on to-night, I have no objection. I was objecting for my own gratification, and I will not press my own wishes in the matter, if they desire to conclude the bill to-night, though I am quite sure if we have two yea-and-nay votes it will be past 7 o'clock before we are through.

Mr. JONES of Virginia. I think the minority members of the committee have no objection to the request made by the chairman.

Mr. RICHARDSON of Tennessee. That being true, I do not object.

Mr. SHAFROTH. I will ask the gentleman from Wisconsin whether this will preclude the offering of amendments and the brief discussion of amendments that may be offered.

Mr. COOPER of Wisconsin. Oh, no.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

GEORGE LEA FEBIGER.

By unanimous consent, the Committee on War Claims was discharged from the further consideration of the bill (S. 6117) for the relief of George Lea Febiger, and the same was referred to the Committee on Claims.

PHILIPPINE GOVERNMENT.

And then, in pursuance of the special order, the House again resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2295) temporarily to provide for the affairs of civil government in the Philippine Islands, and for other purposes, with Mr. GILLETT of Massachusetts in the chair.

The Clerk read as follows:

MUNICIPAL BONDS FOR PUBLIC IMPROVEMENTS.

SEC. 50. That for the purpose of providing funds to construct sewers, to furnish adequate sewer and drainage facilities, to secure a sufficient supply of water, and to provide all kinds of municipal betterments and improvements in municipalities, the government of the Philippine Islands, under such limitations, terms, and conditions as it may prescribe, with the consent and approval of the President of the United States, may permit any municipality of said islands to incur indebtedness, borrow money, and to issue and sell (at not less than par value) registered or coupon bonds in such amount and payable at such time as may be determined by the government of said islands, with interest thereon not to exceed 5 per cent per annum.

Mr. TAWNEY. I offer the amendment which I send to the Clerk's desk.

The amendment was read, as follows:

In line 6, page 97, after the word "annum," add:

"*Provided*, That the entire indebtedness of any municipality under this section shall not exceed 5 per cent of the assessed valuation of the property in said municipality, and any obligation in excess of such limit shall be null and void."

The amendment was agreed to.

Mr. VANDIVER. Mr. Chairman, in line 6, page 97, I move to strike out the word "five" and insert the word "four."

The CHAIRMAN. The gentleman from Missouri moves to strike out the word "five," in line 6, page 97, and to insert the word "four."

Mr. VANDIVER. Mr. Chairman, I just want to say a word. It seems that this provision is calculated to offer a market for the investment of money in bonds. The previous section, which has just been adopted, fixes the gold standard, which assures the payment of those bonds in gold. In every market of the world gold bonds can be sold or money can be borrowed at less than 5 per cent, and at less, even, than 4 per cent. If we are going to take charge of the government of that country, while I am opposed to the whole proposition, at the same time I believe that in common justice and fairness, even according to the policy of the bill itself, there ought not to be provided an exorbitant rate of interest to be paid mainly by the natives of the islands. There are various other provisions in the bill to which I seriously object. I should like to oppose the whole proposition; but I, at least, think the condition now under consideration ought to be remedied. It is bad enough to undertake to govern those people without their consent; it is still worse to tax them 5 per cent for their internal improvements when every other nation on earth borrows money at 3 or 4 per cent.

The amendment of Mr. VANDIVER was rejected.

The Clerk read as follows:

SEC. 51. That all municipal bonds shall be in denominations of $50 or any multiple thereof, bearing interest at a rate not exceeding 5 per cent per annum, payable quarterly, such bonds to be payable at the pleasure of the government of the Philippine Islands, after dates named in said bonds, not less than five nor more than thirty years from the date of their issue, together with the interest thereon, in gold coin of the United States of the present standard value, or its equivalent in value in money of said islands, and said bonds shall be exempt from the payment of all taxes or duties of the government of said islands or of any local authority therein or of the Government of the United States.

Mr. VANDIVER. In line 12 of the section that has just been read I move to strike out the word "thirty" and insert the word "twenty."

The CHAIRMAN. The gentleman from Missouri moves to strike out the word "thirty," in line 12, page 97, and to insert the word "twenty."

Mr. VANDIVER. One word. If we are to establish this system, and give the Philippine Commission authority to issue these bonds at an unusually high rate of interest, it seems to me we ought to limit them at least that much, and not allow them to run for thirty years.

The amendment of Mr. VANDIVER was rejected.

The Clerk read as follows:

COINAGE SYSTEM.

SEC. 58. That the gold dollar of the United States, consisting of 25.8 grains of gold, nine-tenths fine, as defined by section 3511 of the Revised Statutes of the United States, shall be the standard unit of value in the Philippine Islands.

Mr. JONES of Virginia. Mr. Chairman, I move to strike out the whole of section 58.

The CHAIRMAN. The gentleman from Virginia moves to strike out section 58.

Mr. JONES of Virginia. Mr. Chairman, it must be known to every member of this House that for hundreds of years the only currency to which the people of the Philippine Islands have been accustomed has been a silver currency. This section provides that the Philippine Islands shall hereafter be upon the gold standard. All of the business transactions of the people of these islands has been based upon a silver currency. Certainly to change all of that now and to place them upon the gold-standard basis must disturb business throughout the islands and bring about a most disastrous condition of affairs there. For this reason I trust that my amendment to strike out this section will be adopted.

I may say to those members of the House who are inclined to be frightened at the skeleton of silver that the Senate bill which we are seeking to amend does not provide for a gold standard in the Philippine Islands. On the contrary, the bill which recently passed the Senate recognizes the fact that if we suddenly place these people upon a gold basis it will result in great disaster and perhaps in ruin to the people of those islands. I trust that the gold advocates and supporters of the gold standard in this body will not be so forgetful of the interests of the people in those islands, who, as I have said, have never had any other currency than the silver currency, and whose transactions are all based upon a silver currency, as to fix upon them a gold standard. Surely Republican members of the Senate are no less loyal to the gold standard than are those of this House.

Mr. SHAFROTH. Mr. Chairman, I desire to offer, if it is in order now, and if not, in a minute, after the motion shall have been disposed of, a motion to strike out this provision and insert the corresponding provision of the Senate bill with relation to coinage, and upon that——

The CHAIRMAN. The Chair is inclined to the opinion that that should wait until the motion to strike out has been disposed of.

Mr. SHAFROTH. I would like to be heard on the motion to strike out.

The CHAIRMAN. Is the gentleman in favor of the motion or opposed to it?

Mr. SHAFROTH. I am in favor of the motion.

The CHAIRMAN. The Chair feels that he ought to recognize a member of the Committee.

Mr. SHAFROTH. I offer this amendment to the gentleman's motion—a motion to strike out and insert.

The CHAIRMAN. The Chair will recognize the gentleman later; but thinks the motion of the gentleman from Virginia should first be disposed of, and then the Chair will recognize the gentleman from Colorado.

Mr. CRUMPACKER. Mr. Chairman, I move that all debate upon this section and amendments thereto shall be closed in five minutes.

Mr. SHAFROTH. I hope the gentleman will not do that. I inquired of the gentleman, when he asked unanimous consent, as to whether a fair allowance would be given to the discussion on this question, and inasmuch as the Senate has sent over a provision of the bill which is not partisan in its nature——

Mr. CRUMPACKER. I amend my motion by making it ten minutes.

Mr. SHAFROTH. I would like to be recognized.

The CHAIRMAN. The gentleman from Indiana moves that all debate on this section and amendments thereto be closed in ten minutes.

The question was taken; and the motion was agreed to.

Mr. SHAFROTH. Mr. Chairman, the amendment which I offer is to strike out section 58 and insert in lieu thereof the first section of the Senate provision, relating to coinage in the Philippine Islands.

The House bill provides for the coinage of what is termed a light-weight silver coin, redeemable in gold. The Senate bill provides for the coinage of a silver dollar of identically the same weight and fineness as the British dollar, and upon identically the same terms and conditions as that coin is minted for Hongkong, Straits Settlements, and the oriental trade. It continues in existence the silver standard, which is now the standard of the Philippine Islands and the Orient.

I want to call your attention to the fact that the Senate provision relating to coinage was not considered as a partisan matter in that body. The Philippine government bill as introduced in the Senate by Senator LODGE contained the identical provisions with relation to coinage that the House bill before us for consideration contains.

The Senate Committee on the Philippines called before them expert witnesses as to the trade and currency of the Orient. They were not silver men, but men from New York, who believe in the gold standard for the United States, but who have had experience in oriental affairs. Mr. George H. Macy is a large tea merchant of New York City, having factories and wholesale houses in most of the large cities of China and Japan; Mr. A. M. Townsend, whose place of business is 50 Wall street, New York, is agent of the Hongkong and Shanghai Bank, which has branches in all the principal cities of China, Japan, India, the Straits Settlements, and in the Philippine Islands; Mr. Francis B. Forbes was a member of the firm of Russell & Co., large importers from the Orient;

he lived in China for nearly twenty years, and at one time was chairman of the Shanghai General Chamber of Commerce.

All of these gentlemen testified that, in their judgment, the establishment of the gold standard in the Philippine Islands would be a great mistake, both for the United States and for the people of those islands. Mr. Conant, the author of the provisions contained in the House bill relating to the currency, also testified before the Senate committee. After the hearing of the evidence and consideration by the committee it was unanimously determined by the Republican members of the Senate committee that the money system best suited to the Philippine people and which would produce best results, both to the Philippine Islands and the United States, was the same system which Great Britain has for the Straits Settlements and Hongkong, namely, the coinage of a silver dollar of 416 grains nine-tenths fine (which is identical with the Mexican dollar circulating in China) from silver bullion presented upon payment of 1 per cent.

I wish to call attention to the significant fact that after the hearing of the evidence relating to this subject not only one Republican Senator changed his views, but every Republican member of that committee came to the conclusion that it was best to strike out of the Senate bill the very provisions now urged by the House committee, and insert in lieu thereof the very amendments which I am now offering, and which I propose, as sections are reached, to offer as substitutes for the House provisions.

I want to call the attention of the Republican members of this House to the fact that there are as good gold-standard men upon the Senate Committee on the Philippines as can be found anywhere in the United States. Senator ALDRICH is a gold-standard man; Senator LODGE is a gold-standard man; Senator BEVERIDGE is a gold-standard man; Senator PROCTOR is a gold-standard man.

In fact, all of the Republican members of the committee are gold-standard men. Senator BEVERIDGE and Senator DIETRICH, of that committee, had visited the Philippine Islands and the Orient and examined personally into the needs of the people of those islands for a currency. When these Senators unanimously agreed to change the provisions of their own bill and insert the provisions for a silver standard, the reasons must have been overpowering. That fact alone ought to make the members of this House consider the question from a nonpartisan standpoint and not be stampeded by a political cry against silver.

It is conceded by all writers upon finance that the changing of a monetary standard of a nation is a very grave undertaking, and should be done only when it is clear that a better system, and one that can be successful, could be adopted.

The House bill provides for the coinage by the Philippine government of pesos of weight of 322.1 grains of pure silver. The United States silver dollar contains 371.25 grains. The British silver dollar for the Orient and the Mexican silver dollar contain each 374.2 grains of pure silver. The House bill therefore authorizes the minting of a light-weight silver coin, and makes it redeemable by the Philippine treasury in gold at the ratio of 2 pesos for one gold dollar. The pretended benefit from such a silver peso is that it will remain in the Philippine Islands, because it contains less quantity of silver than the Mexican dollar and the British dollar, which constitute the principal currency of the Orient.

The balance of trade is against the Philippine Islands. In the last report of the Secretary of War he places the exports from the islands as $23,000,000 and the imports to the islands as $30,000,000, leaving a balance of trade of $7,000,000 against the islands. A balance of trade must be met either by silver or by gold. If we make a silver coin for the Philippine Islands, which is so overvalued as not to be available for the payment of balances, it will necessitate the payment of all balances in gold, and the gold will have to be furnished by the government in the Philippines, and their only means of getting gold would be from the United States.

The question is, therefore, whether it is better for the United States to let the Philippine people settle their balances in silver, which, as the greatest silver-producing country in the world, we desire to sell, or whether we wish to furnish the Philippine government with the gold necessary to meet their balance, and perhaps to meet all the demand of the Orient for that metal.

In other words, do we wish to facilitate the shipment of gold or silver from our shores? Do we wish to deplete either our stock of gold or the quantity of gold held in our Treasury?

Mr. Chairman, gentlemen upon the other side of this Chamber have claimed that we were in the Philippine Islands, not alone for what trade we could get from those people, but for the advantages which it would give us in oriental trade. Here at the threshold they propose a monetary system for those islands which they admit can not be used in commerce with the Orient. Great Britain is in the Far East for trade, and in order to facilitate the same she adopted a monetary system for her provinces in the Orient of an open mint for the coinage of a silver dollar identical in weight and fineness with the Mexican dollar. Anyone having silver bullion, upon the payment of 1 per cent to the British mint, can have coined British dollars, which are a legal tender in the Straits Settlements and Hongkong, and which pass current at the same value in all the Orient.

The Mexican dollar is not a well-minted coin, the workmanship upon it being bad and it varying in weight as much as 1½ per cent. They are so defective that in large amounts they will be received only by weight, whereas the British dollar is received by piece. In China, 11 provinces each coin a different dollar, containing different devices and different number of grains of silver. That makes it impossible for a Chinese coin to circulate beyond the border of the province coining the same. Therefore there is now a most favorable opportunity of putting into the Orient, through the Philippine mint, a dollar which will become the dominant circulating medium of China.

The high-class workmanship upon our dollar, together with its accuracy in weight, would make it in a short time the preferred dollar of the Orient. If it is to the interest of Great Britain, a gold-standard nation, which produces no silver to speak of, and whose people must buy silver for coinage, to maintain an open mint for the coinage of that metal, how much greater interest have we, the greatest silver-producing nation in the world, in creating an open mint for the coinage of a dollar which will not only settle balances between the Philippine Islands and the world, but which promises to become the coin of the Orient, with its incidental advantages to our trade. Shall we surrender such a field to Great Britain without a contest?

Gentleman say that we tried the experiment of a trade dollar in 1873, and it failed. Why did it fail? Because we provided that it should contain 4 grains of silver more than the Mexican dollar, which was the one in general circulation in the Orient. It made our trade dollar worth nearly 2 cents more than the Mexican dollar. Who would want to pay debts with a dollar that cost 2 cents more than the dollar in general circulation?

Anyone possessed of the slightest knowledge of political economy would know that the dearer dollar could not supersede the cheaper in circulation. This is the reason the trade dollar issued by our Government was a failure.

But that is no argument against the issuing of a superior trade dollar as against the fact that the one issued by Mexico, which country has no possessions whatever in the Orient, and which even has not a good port of export, has been a success as a trade dollar.

The experience which we have had in the Philippine Islands in tinkering with the currency of that country, by attempting to fix a gold equivalent for their peso, has been a failure. We should never have attempted to fix the value of 2 pesos as equal to $1 in gold, but should have left the value of the two metals to be fixed by the general world market, which all banks throughout the world follow. As long as the bullion value of 2 pesos was less than 1 gold dollar, the requirement of the Philippine Commission upon the banks in Manila to pay 2 pesos for $1 in gold was exceedingly profitable to the banks, and when the bullion value of 2 silver pesos became more valuable than $1 in gold, as it did in 1900, the banks refused to exchange pesos for gold.

When silver rose in 1900, it made 2 pesos more valuable than 1 gold dollar, which made silver more valuable in China than in the Philippine Islands at the two-for-one ratio. That caused the exportation of silver from the Philippine Islands. In order to overcome that, the Philippine Commission enacted a law imposing an export tax on pesos and Mexican dollars of 10 per cent. That stopped the exportation of the pesos and Mexican dollars; but then the balance of trade had to be met in gold, which, even if satisfactory to the Philippine people because they could get 1 gold dollar for 2 pesos from our Government in the Philippine Islands, made a continual drain on the United States Treasury for gold to meet balances of trade between the Philippine Islands and the Orient.

Since that time silver has declined in value, so that now the ratio of one gold dollar for two pesos is no longer attempted to be imposed. Chinese brokers in Manila are giving two pesos and a quarter for a dollar in gold, and shipping that gold to China.

In the same way, if you attempt to fix by law, as in this bill, a currency which is redeemable in gold by the Government, you are bound to get into the difficulty of either giving the people an inadequate silver currency, or of making the Philippine treasury the gold-supply depot for the Orient.

Any system that makes one metallic money redeemable in another is an absurdity and is bound to be temporary. When a silver coin is made redeemable in gold it becomes simply a promise to pay gold. How absurd to stamp promises to pay upon as dear material as silver when just as good and binding promises can be printed upon paper at no appreciable cost. To say that such a currency is anything but temporary is ridiculous. No currency can be permanent unless it automatically responds to the

demands of commerce, such as is given by an open mint for gold in a gold-standard country, and for silver in a silver-standard nation. Any other monetary system requires continual legislative tinkering in order to meet the legitimate demands of commerce and the people, and in order to extricate the Government from the complications arising from an artificial system.

Gentlemen have referred to the fact that we are adopting the same system of currency for the Philippine Islands as is now in force in India. If so, they had better hesitate before enacting these provisions into law. It is by no means conceded, even in England, that the Indian currency experience has been satisfactory. Many of her most prominent statesmen and financiers, including Sir Robert Giffin, have condemned it as bad and temporary.

The Right Honorable Lord Aldenham, director of the Bank of England, a gold-standard man, in his testimony before the India currency committee in 1899, said:

It is to my mind a necessity of a good standard that it should be automatic; that the needs of commerce should be supplied by commerce itself. Now, in the place of that, the closing of the Indian mints substituted a managed currency. Instead of being automatic, you may say it was autocratic; the Government has under the present system, and would have under the proposed system, to settle what amount of currency is needed for the people. It should regulate itself by the needs of commerce. The currency existing in rupees is divorced from the metallic value of the rupee and is dependent only upon the face values. It is, in fact, a forced currency, a debased currency.

Mr. George Handasyde Dick, president of the Chamber of Commerce and Manufactures in the city of Glasgow, Scotland, in December, 1901, published a statement with relation to the Indian currency, which contains the following:

The foregoing are horns of the dilemma upon which the currency policy of India is impaled.

The first is, all history and experience show that there is nothing so detrimental to the progress and well being of a nation as an artificial currency "managed" and unduly limited. This is illustrated to-day by the prosperity enjoyed by the silver-currency countries where the currency is allowed to expand automatically in comparison with the present agricultural and commercial adversities of India with her limited currency. It is also illustrated by the recent phenomenal prosperity in America, following upon an increase in her legal-tender money, since March of last year, of about $200,000,000.

Mexico is said to be suffering from scarcity of her coin, due to an unusual demand for it from the Far East. The other dilemma is that the government of India dare not allow its silver currency to increase without check, because any such considerable increase might at once upset the exchange between India and London.

It is therefore submitted that the present policy of the Indian government to maintain India's foreign exchanges by limiting the supply of the only metal money which India will circulate is subversive of India's interests.

The two objects aimed at are incompatible with one another, and mutually destructive.

* * * * * * *

Even with the gold currency which Japan had its export has completely disorganized her trade. Consider the prosperity of China's trade now, with her unrestricted silver money, in comparison with the position in Japan. China has recently paid an enormous indemnity to Japan, and stands bound to pay an enormous indemnity to the allied countries who recently attacked her; but her trade continues good.

* * * * * * *

From what appears in the earlier part of this paper, it is failure and not success that has attended the attempt to set up a gold standard and currency in India.

The difficulty with the House provisions is that it starts the Government into the banking business by making one currency redeemable in another, and thereby starts the endless chain upon the gold reserve of the Philippine treasury. It even permits the Philippine government to sell drafts on our Government. It necessitates the Philippine government to provide a gold reserve and to maintain it at all times against the endless chain, not only for use in the islands, but also to meet balances of trade. It sets up a gold depot where gold can be obtained more favorably than at any other point in the Orient, and consequently is likely to become the supply for all the demands of the Orient upon that metal without any compensating advantages.

If gentlemen say the Philippine government can refuse to redeem silver in gold, we answer, so could our Government have refused to pay greenbacks in gold, but it never did it, even when we had to borrow gold to maintain the reserve.

Mr. Townsend in his testimony before the Senate committee clearly illustrates the working of that system:

Mr. TOWNSEND. At certain times and in certain conditions of trade the Philippines would have to export a certain amount of bullion in the absence of merchandise, and the 40-cent silver dollar could not be sent away, because it is worth 50 cents in Manila and worth only 40 cents outside. So it could not be sent away. If you have the silver dollar you would have to take it and get the more valuable gold and send the gold away, and the difficulty would be for the treasury to keep up the redemption fund.

Senator BEVERIDGE. So you figure that there would be a constant loss to the Government of 10 cents on each redemption?

Mr. TOWNSEND. There would not be a loss, as the Government would not issue the silver coin for less than 50 cents and they would give 50 cents for it. The loss to the Government would be in maintaining the gold reserve. The tendency would be all the time to redeem the silver dollars and to send away the gold which was received for them, and the expense to the Government would be in continually keeping up that reserve. The laying down of the American gold dollar in the Philippines to keep up that reserve means a cost of freight, insurance, and interest which I calculate amounts to about 1½ per cent, and the course would be for the Government continually at its own expense to send gold there, and it would be exported for the benefit of the exporter.

The statement that the currency of the House bill would facilitate exchange between the United States and the Philippine Islands is about the only sound argument of the opposition, and that amounts to very little, for China has no difficulty in either receiving pay for goods exported or in paying for goods imported. The rate of exchange may be slightly higher than it would with the Philippines under such a system, but the difference would not amount to one-half of 1 per cent. Under the provisions of an open mint, for a dollar of the same weight and fineness as the British dollar and the Mexican dollar there will be no complications whatever with the government of the Philippine Islands, as it will not be necessary to maintain a gold reserve or enter into the banking business.

The Government, when it pays its soldiers and officers, can pay them at their option either in gold or in the American-Philippine, the British, or the Mexican dollar, at the bullion value of that dollar, as the banks in Manila now pay the same, and can suffer no material loss in so doing.

The coinage of the silver dollar provided in the Senate bill will provide an automatic currency for the Philippine Islands, responsive to the demands of commerce—good at the same value not only among the people, but in payment of foreign exchange; not only at home, but in the Orient.

It will create a currency which, in my judgment, will become the principal circulating medium not only of the Philippine Islands, but of the entire Orient, thereby giving incidental advantages in trade and supplying a demand for the silver of America for nearly all the circulating medium of China. For these reasons I maintain that the Senate provisions relating to currency should be substituted for the corresponding provisions of the House bill.

Mr. HILL. Mr. Chairman, the statement that has been made that the Philippines have been on a silver basis for three hundred years is without foundation of fact. The same statement was made in the Senate report on this bill, whereas as matter of fact up to 1884 they were on a gold standard, and the mint at Manila coined $20,000,000 gold prior to that time. It was driven out by the bringing in of the Mexican silver dollar, the cheaper money, which under the fall of silver has gradually driven out the gold. These facts can be substantiated absolutely by the report of the Schurman Commission, on pages 144 to 147, inclusive.

Mr. Chairman, I would be glad if we had time to discuss the merits of this bill rather than politics, and to take up the consideration of this question. If we could do so, I would offer as a substitute for the proposition in the bill, the use of American money. But I want to reply to the remarks made by the gentleman from Colorado [Mr. SHAFROTH] in his statement in regard to the way in which the provisions for the free coinage of silver in the Senate bill got there. There was a hearing before the Senate committee of three persons, one was the manager of the British and Hongkong Bank, a gentleman who is to-day residing in England, who lived in the East ten years. Another gentleman was a tea merchant from Shanghai, and a third presented the views embodied in the bill now before the House.

I wish to call attention to this one fact, and leave this proposition to the House of Representatives and with the country, as to the effect of the provisions of the Senate bill. It provides for the coinage of a dollar to circulate at its bullion value, and the gentleman from Colorado says it is a success; that Mr. Townsend, the president of the British Hongkong Bank, said there had been 110,000,000 of those dollars coined and circulated in the Orient. The gentleman from Colorado, when he returned from his trip to Manila, told me in conversation that the British Hongkong Bank manager at Manila told him that bank alone on its own account had coined 64,000,000 of that 110,000,000 dollars.

Mr. SHAFROTH. The bank in all its branches.

Mr. HILL. The average profit must have been at least 6 per cent, or over three and a half million dollars. You adopt the Senate proposition and what will be the result? December last silver had gone from 2 to 1 in Manila down to 2.47½ to 1 now, and there has been a loss on the Chinese indemnity alone of 70,000,000 taels by shrinkage of the war indemnity in less than one year. What would be the effect on Philippine business interests? There is not a paper that comes from Manila to-day but is begging for relief. I have papers from there saying that the first thing they want, over and above civil government, over and above mining laws, is American money. That is what they want and that is what we want to put there, gentlemen.

Mr. SHAFROTH. Do not these letters and cry come from the American Chamber of Commerce in the Philippines?

Mr. HILL. The American Chamber of Commerce! Why, I have papers from all over there; here they are on my desk. I

will also put in the RECORD extracts from the Washington Post and the Times, beginning with last December and coming down to a dispatch from Manila dated May 25, showing conditions there and emphasizing their demand for American money:

The United States Philippine Commission has passed an act authorizing the insular purchasing agent to draw money in gold for the payment of supplies purchased, as the merchants refuse to sell goods for Mexican silver.

A general feeling of uneasiness prevails among the business men of Manila from the unofficial announcement that beginning January 1 the United States Philippine Commission intends to reduce, by the difference of the fall in the price of silver, the present ratio of two Mexican dollars for one gold dollar. It is hoped, however, that some solution of the difficulty may be found which may obviate this necessity, as, for instance, the taxing of each silver dollar imported into the islands by the difference between its actual bullion price and 50 cents in gold, until such time as the United States Congress gives authority for the issuance of a Philippine currency.

TROUBLE OVER FINANCES—VALUE OF MEXICAN DOLLARS STILL AGITATES MANILA MERCHANTS.

A dispatch from Manila yesterday says: Numerous meetings of merchants and others have been held recently, at which resolutions were passed urgently requesting Congressional action to meet the financial situation here. Since the ratio was officially changed, January 1, for the first quarter of 1902, to be $2.10 Mexican silver to one American gold dollar, business transactions of any sort have become difficult.

The majority of the business houses have raised their prices 5 to 10 per cent, and some houses refuse to accept any but American coins, which are difficult to obtain owing to the vast speculative shipments of coin during the past few months. Some banks refuse to recognize the government ratio and are fixing their own ratio at one American gold dollar to two Mexican silver dollars. Even the government's American employees, whose salaries are payable in Mexican dollars, object to the change, owing to the large increase in prices.

The leading banks refuse to handle government checks, not because they have any doubt of obtaining the money, but because of the frequent long delays over trifling irregularities. The postal authorities refuse to accept Mexican dollars for American dollars at any ratio.

AMERICAN MONEY WANTED—THE PHILIPPINE TREASURY FACE TO FACE WITH A SERIOUS CONDITION.

The Secretary of War has forwarded to the Senate Committee on the Philippines the following cablegram from Acting Governor Wright, of the Philippines, concerning the condition of the treasury of the Philippine government:

"After making available in United States money appropriations immediately necessary, there is left in the insular treasury about $600,000 money of the United States. Practically none is being received from customs or internal revenues; must very soon face the question obtaining enough next month to pay obligations payable in only money of the United States; request suggestions as to method of obtaining money of the United States; can pay for it only Mexican dollars; can advertise for bids to furnish gold, payment to be made in Mexican currency, or can raise ratio so high that customs and internal-revenue receipts will be gold; either method highly objectionable, and would greatly deplete treasury balance. Price of gold at local banks to-day is $1 for $2.41 Mexican, but no large orders can be filled."

MANILA FEELS NEED OF CURRENCY REFORM—BUSINESS MEN DECLARE THE WHOLE SYSTEM A CURSE—A SERIOUS CHECK ON LEGITIMATE TRANSACTIONS.

MANILA, *May 26, 1902.*

The currency difficulties have reached a stage where the whole system is generally considered a curse by the business men. In interviews the largest firms of merchants here absolutely condemned the continuance of the present silver standard or anything similar, declaring it a heavy drawback to the prosperity and development of the country.

It is impossible to conduct legitimate business by means of the present medium. To make time contracts under present conditions is to enter upon problematical ventures, while large transactions of any kind are absolutely prohibited. The shifting standard kills business, and nobody except the banks and exchange speculators derives any benefit.

Action by Congress fixing a standard is urgently imperative. In addition to the merchants, thousands of civil employees are monthly losing on their remittances to the United States, which is causing much dissatisfaction.

Mr. SHAFROTH. Is there a bank in the city of Manila that asks for it?

Mr. HILL. There never was on the face of the earth such a monumental specimen of adolescent statesmanship as that coming over from the Senate which the gentleman wants to introduce into this bill. [Laughter and applause on the Republican side.] It is in violation of every sense of political honor, in violation of the vote of the Republican party in this country over and over again. I have got here a letter from Governor Hunt, from Porto Rico, stating his position on the Porto Rican matter, that I will not read now, but I will put in the RECORD with my remarks. I asked him: "What would you do in the Philippines in view of your experience in Porto Rico?" And he said, referring to Porto Rico and their experiences: "I think the use of American money was entirely advisable." The letter is as follows:

EXECUTIVE MANSION,
San Juan, P. R., April 1, 1902.

Hon. E. J. HILL,
Banking and Currency Committee,
House of Representatives, Washington, D. C.

MY DEAR SIR: Your letter of March 18, in respect to the question of currency circulating medium for the Philippine Islands, was duly received, and I take pleasure in replying to some of the questions you suggest.

It must always be remembered that the change of money in Porto Rico pursuant to the so-called Foraker law, which was the act of Congress creating a civil government in Porto Rico, was effected a year after the terrible hurricane of 1899 and less than two years after the change of sovereignty. The hurricane had left a great deal of ruin and misery behind it, and the people were generally disheartened and poor. In addition to this, the issuance of rations, which had been undertaken as a relief measure immediately after the hurricane in August, 1899, was only discontinued July 15, 1900, or fifteen days before the change of currency occurred.

There was considerable apprehension on the part of the people and some little misunderstanding. In some places storekeepers closed their shops, because there was little or no American money to be had on August 1 in the particular towns where such action was had and because they feared that Porto Rican money would only be taken at its bullion value after that date.

Market people, omnibus drivers, street venders, storekeepers, and house owners could not understand that the new American dollar ought to have a greater purchasing power than the Porto Rican peso, and it was because of this misunderstanding and apprehension that on August 1 persons who had charged a peso for an article asked and received an American dollar.

Omnibus fares, which were 10 centavos on July 31, were 10 cents on August 1. Wages were raised considerably, and some mild strikes occurred, but through compromise these were adjusted in a few days, and there was less labor trouble than I had thought there would be. Rentals rose, and a dollar was exacted after August 1 for every peso that had been collected the month before.

Naturally, business was much disturbed for a short time, but the disturbed conditions were soon adjusted with some relation to American money. I think it can be safely said, however, that there never has been, in all respects, an entire readjustment; rents, for instance, never having gone back to what they were prior to August 1, 1900. Wages are somewhat higher than they were prior to that time, but, generally speaking, all prices have risen in Porto Rico within the past eighteen months, as all conditions have much improved.

The general result has been good, though the period of disturbed conditions was bad while it lasted. But it is a satisfaction to the people to know that they use the same money circulated in the main country and can transact business with a facility because of this fact.

I think, therefore, that the change was desirable, but that a preferable method of effecting it might have been had by a more gradual retirement of Porto Rican money through agencies such as United States depositaries. The people being unaccustomed to sudden changes did not prepare for that which came.

I think the use of American money was entirely advisable.

I remain, sir, very respectfully,

WILLIAM H. HUNT, *Governor.*

I also insert letter from E. L. Arnold, cashier of the American Bank in San Juan, Porto Rico:

AMERICAN COLONIAL BANK OF PORTO RICO,
San Juan, August 15, 1901.

CHARLES A. CONANT, Esq.,
Special Commissioner to Philippine Islands, Manila.

DEAR SIR: Yours of the 25th July came duly to hand. The change in currency in this island was made easily and comparatively quickly and did not result in hardship to the people to any great extent. At first the smaller merchants were disposed to ask dollars in place of pesos for their wares, but competition in business soon stopped that. Wages have risen slightly, but not as a result of the change of moneys, the cause being purely the result of better conditions and greater profits among the agricultural classes, save with the coffee growers.

With them the destruction of crops, and in many cases of whole plantations, by the hurricane of 1899 has cheapened the price of labor. We do not think that harm resulted to anyone, save temporarily in a few cases, through change of money, and it has removed the fluctuation of value in the money of the country. American currency was at a premium most of the time and values changed as much as 2 per cent in a single day. There is no more of that, much to our relief, and the people here appreciate the change from their cheap money to one that passes current the world over. We trust the same plans may be carried out in all of "Uncle Sam's" new dominions, as it does a good deal toward Americanizing the people of the country.

Truly, yours,

E. L. ARNOLD, *Cashier.*

Now, what we should do, gentlemen, is to do what we did at Porto Rico, what we are doing in Hawaii. Take up every coin; put our own money there. Can we do it? I say it is easier to do that than anything else, easier even than the proposition of this committee, for American money is there already and must be driven out to make room for a cheaper currency. I will insert in the RECORD editorial comments of the New York Times, New York Journal of Commerce, and New York Evening Post upon this proposition:

[From the New York Times.]

THE PHILIPPINE CURRENCY.

The plan for coinage and currency in the Philippines which is included in the bill for the government of the islands reported to the Senate requires very thorough discussion. On the face of the report, it is a defective and mistaken plan.

In substance, it proposes unlimited coinage of silver dollars of 416 grains, nine-tenths fine, to be legal tender in the islands. It adds a provision of no great importance for silver certificates of not less than $10 in denomination. Then there is to be a subsidiary coinage, which is to be furnished from any of the mints in the United States. The standard dollars, it will be noted, are of a weight a little greater than that of a United States dollar and a little less than that of the trade dollar which was tried some years ago.

It is difficult to see in what this scheme of coinage differs in the least, except in the weight of the dollar, from the scheme of free coinage which was defeated in this country with so much trouble and at the expense of such confusion, discredit, and loss. Nor is there any reason to suppose that the scheme will work any less badly in the Philippines than here. We shall await the text of the bill for further comment, and shall be impatient to see the explanation of the committee as to its provisions. As reported the plan is mischievous.

[From the Journal of Commerce.]

It seems incredible that after all of our experience with silver, after the success which has attended the struggle for the gold standard, and after the adoption of the gold standard by India and Japan, any considerable number of gentlemen in Congress should still be determined to maintain the silver standard in the Philippines. It is in the last degree discreditable if any of them think they can provide a market for silver for the benefit of our mine owners and regardless of the well-being of our dependency. Aside from the immorality of this, a recollection of recent events ought to satisfy any person that it is ridiculous. The Philippines do not use over 30,000,000 silver dollars, and that is not an annual consumption; it is a total circulation of coins, the greater part of which endure for years.

In view of the failure of our trade dollar of 1873 no one can count confidently upon a Philippine dollar displacing the Mexican and British dollars in the Orient. From 1878 to 1893 this country took from $20,000,000 to $55,000,000 of silver off the market every year, and yet we failed to sustain the price of silver; only for a few months after the passage of the "Sherman" Act did it advance. Anything the Philippines could do would be insignificant compared with our futile effort to "bull" the market. The Philippines may well have a silver currency. We have a paper currency, but the silver standard ought not to be thought of. It would hurt our trade as much, proportionately, as that of the islands.

[From the Journal of Commerce, June 5.]

It is incomprehensible that the Senate should have passed a bill establishing the silver standard in the islands. It is the more astonishing that it should have done so in a bill which provides that the bonds to be issued for the acquisition of the friars' lands and the local improvement bonds to be issued by municipalities shall be gold bonds. In the face of all the experience we have had in twenty-five years, and all the experience of Mexico and India and other countries, the Senate has voted to establish in our islands a silver standard currency and gold obligations. Nothing could be more injurious; nothing could more insolently defy the teachings of reason and experience and contradict the conclusions reached by the American people after a generation of agitation.

[From the New York Evening Post.]

The question what kind of money we shall sanction in the Philippines ought to be determined in harmony with the world's progress, and not in conflict with it—that is, in favor of the gold standard. A few years ago Japan was confronted with the same question. She had nominally the double standard, but actually the single silver standard. In order to keep pace with civilized nations, she found it necessary to adopt the gold standard. The market ratio between silver and gold at the time when she decided to take this step was 32 to 1. She accordingly decreed that the gold yen should bear that relation to the silver yen as to past contracts, and that for the future gold should be coined in unlimited quantities for private individuals, but that silver should be coined only on Government account.

The plan was carried out successfully, and no harm was done to anybody. The experience of India is no less useful as a guide. That country has passed successfully from the single silver standard to the single gold standard by taking as a basis and point of departure the actual market value of the two metals at the time when the change was decided upon—16 pence per rupee. The coinage of rupees was prohibited except on Government account, the English sovereign was made legal tender in India at that ratio, and gold coinage for private persons was authorized at the Indian mints in unlimited amounts. There is no occasion for a special coinage for the Philippine Islands. A special silver coinage would be a step backward. It would be an injury in the long run to the Filipinos, and would tend to a recrudescence of silverism in the United States

I also insert a letter, published in the New York Tribune on June 2, from Dr. James C. Hallock, an expert on the subject of coinage, calling attention to the effect which this new Philippine coinage will have on our own monetary circulation. It is as follows:

[New York Daily Tribune, Monday, June 2, 1902.]

PROPOSED FILIPINO COINS—PESSIMISTIC VIEW OF A CORRESPONDENT ON THE EFFECT OF PENDING BILL.

To the Editor of the Tribune.

SIR: Counterfeiting is a serious charge to make against any nation, particularly against one's own. On Tuesday next, June 3, the Senate will doubtless vote for the issue of seven more coins of the United States, to wit: Another silver dollar, another 50-cent piece, a 20-cent piece, another 10-cent piece, another nickel 5-cent piece, another bronze cent, and a half cent.

But the United States Government will nowhere receive the new dollar for a dollar, nor the 50-cent piece for half a dollar, nor the 20-cent piece for one-fifth of a dollar, nor the 10-cent piece for a dime, nor the 5-cent piece for half a dime, nor the cent for a cent, nor the half cent for half a cent. The metal in these queer coins will be the same as in the present pieces of similar denominations. In none will the weight be less; in the dollar and cent it will be more. The new coins will be practically identical with the old. However, as the United States Government will not receive them in payment outside of the Philippines, they will really be frauds in America, counterfeits of United States coin, and none the less so because the Government will be the counterfeiter.

As soon as the United States Government shall go into the business of counterfeiting, private counterfeiters will change their methods. They will no longer expose themselves to severe penalties of fine and imprisonment by secretly counterfeiting United States coin, but with perfect safety procure these counterfeits which the Government will make and put them into our circulation. The new pieces being coined for use in the Philippines, where the government will receive the new dollar for the value of the silver in it (now 40 cents), and the other coins in proportion, these reformed counterfeiters and others will be able to procure there through brokers at the rate of 40 cents on the dollar.

In my letter published in the Tribune on April 14, 1902, attention was called to the new trade dollar proposed by the Senate Committee on the Philippines. The currency of the other trade dollar coined under the act of 1873 and its final redemption under the act of 1887 show that such a piece will enter into our circulation to a large extent, and that after people have suffered from its intrusion for a number of years Congress will grant relief by authorizing and directing its redemption. This will surely be the outcome of the coinage of the new pieces and their introduction into our domestic circulation.

At first some difficulty may be met with in introducing the new dollar, for people, remembering the annoyance and loss which the other trade dollar occasioned, may be somewhat on their guard. There are, on the other hand, three of the new pieces which will enter into our circulation as if greased. They are the 50-cent piece and 10-cent piece, which will contain silver of the same weight and fineness as our half dollar and dime, and the 5-cent piece, containing the same weight of nickel as our current nickel. Who is going to stop and examine every half dollar, dime, and nickel tendered to see if it be marked "Filipino?" These are the pieces that will be incessantly pushed upon us with the greatest industry.

Brokers will get the 50-cent piece in the Philippines for 20 cents, the 10-cent piece for 4 cents, the nickel for 2 cents, to put them into circulation here at a profit of 150 per cent. Every $1,000,000 introduced will mean a profit of $600,000 to private parties and no profit to the Government, but only shame, disgrace, and curses for its stupidity in issuing such counterfeits of its own coin. There will also be vexatious annoyance from palming off the 20-cent piece for a quarter and the half cent for a cent. The new cent, two-thirds larger than our current cent, thus indicating a substantial difference in weight, will not suffer in public estimation on that score and will readily circulate.

If this most unwise duplication of our current coins is carried into effect to provide the Philippine Islands with United States coin, millions of them will be brought to this country and circulated here. Two years hence no one will be able to tell what United States coins he has in his pocket or his till unless he shall have carefully scrutinized every one upon its receipt. Few people will take that trouble.

JAMES C. HALLOCK.

WESTMINSTER, CONN., *May 31, 1902.*

Mr. SHAFROTH. Then you are not in favor of the provision of the committee's bill?

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

Mr. HILL. I ask for five minutes more.

The CHAIRMAN. Is there objection?

Mr. SHAFROTH. I am willing, if five minutes be allowed on this side.

Mr. SMITH of Kentucky. I object.

The CHAIRMAN. The question is on the adoption of the motion of the gentleman from Virginia to strike out the section.

The motion was not agreed to, there being—ayes 45, noes 84.

Mr. SHAFROTH. I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

Strike out section 58 and insert in lieu thereof the following:

"That the Philippine government is hereby authorized to establish a mint at the city of Manila, in the Philippine Islands, for coinage purposes, and the coins hereinafter authorized may be coined at said mint. And the said government is hereby authorized to enact laws necessary for such establishment: *Provided*, That the laws of the United States relating to mints and coinage, so far as applicable, are hereby extended to the coinage of said islands."

Mr. HILL. I desire to offer an amendment as a substitute.

Mr. SHAFROTH. I ask that ten minutes be allowed for debate—five minutes on each side. It seems to me that where a proposition of this kind has come to this House from the Senate it is entitled to serious consideration. [Cries of "Regular order!"]

The amendment of Mr. SHAFROTH was rejected, there being—ayes 55, noes 89.

The Clerk read as follows:

SEC. 59. That there shall be coined for use in the Philippine Islands a coin of the denomination of 1 peso, which shall contain 25 grams (a) of silver of the fineness of .835. The peso shall be divisible into 100 equal parts, called centavos, and there shall be coined silver pieces of 50 centavos, 20 centavos, and 10 centavos, containing silver of the same fineness and in equal proportions with the peso.

Mr. HILL. In order that I may get five minutes time for debate, I move to strike out this section. I shall withdraw the motion when I am through.

Mr. Chairman, my intention has been for several weeks to offer an amendment substituting American money for the class of money provided by this bill. The bill as it stands provides for the gold standard and the coinage of silver at the ratio of 32 to 1. I want to say to the Republican members of this House that after a more careful study of this question than I have given to any other during this session, I am convinced that this proposition is a mistake.

Right alongside of that I want to put the statement that Lyman J. Gage, late Secretary of the Treasury, says I am wrong, and he thinks that the provisions of the pending bill are better, for the present at least, than would be a provision for American money, which I would substitute. I want to be perfectly fair about this proposition. Personally I think it is a mistake, but at the same time I shall vote for this bill because I will not set up my judgment against the judgment of such a man as Lyman J. Gage. I have been to the War Department and found this fact, which substantiates what I saw personally in the Philippine Islands—that the money of account, the money of commerce, to-day in the Philippine Islands is American coin.

I believe it is a mistake to start off a new government and a weak government like that of the Philippine Islands by putting them into the banking business, as we propose to do, and compelling them to maintain the parity between gold and silver at any ratio. I would have them treated just as we are treating Porto Rico and Hawaii.

Mr. MCDERMOTT rose.

The CHAIRMAN. Does the gentleman yield to the gentleman from New Jersey?

Mr. HILL. Oh, I can not; I have but five minutes. There is to-day in the Philippine Islands more American money than all other kinds of money put together. We have sent there from the Pay Department $24,455,429.91 in cash, to say nothing of $12,040,818.04 in drafts. We have sent from the Quartermaster's Department $3,070,000; from the Commissary Department, $370,000, making about $28,000,000 in cash, on the gold basis, that we have sent to the Philippine Islands, and as far as it can be traced through the British and Hongkong bank only $1,000,000 has been

taken away. The committee do not claim that prior to our occupation there was more than forty millions of silver there, now worth about $17,000,000 gold. I have the newspapers of Manila here. You can take those advertisements. There are 12 advertisements in that paper which specify prices, and 11 out of 12 are in American money and one in Mexican—everything, theaters, restaurants, employments of various kinds, all naming American money.

Mr. SHAFROTH. That is an American paper, is it not?

Mr. HILL. Oh, certainly; there are no others published, which I saw, in the Philippine Islands except American.

Mr. SHAFROTH. Oh, yes; there are.

Mr. HILL. And the salaries of employees, the Army, are all paid in American money, and in my judgment it would be far better for us to-day, if we had time to discuss this thing and discuss it on the merits, to put the American money, not only gold, but silver, into the Philippine Islands and let the securing of gold for commercial purposes be a banking proposition, just as it is in Porto Rico and Hawaii.

You take the reports of banks there to-day. The bank deposits on December 31 showed $2,566,600.69 of American money, and they have got to have it. They have got to have their duties paid in American money. The report on June 15 showed that the insular funds in American money were reduced to about $615,000 unappropriated. But I am not going, here within an hour of the closing of debate on this bill, to introduce a proposition as important as this and antagonize this committee for this reason, I want to say to the chairman of the committee: It is in your power in the conference committee, under the terms of the bill as it now stands, to report back to these two Houses either the proposition of the bill or American money, or the Senate proposition.

That is for you to consider. I am not introducing this amendment to-night. I think you are wrong; I believe honestly you are wrong. I believe the purpose and the effect of your 32 to 1 silver coinage under your gold-standard law will be that the money of commerce will be gold and that the poor peasant on the farm in the Philippine Islands will take his peso, supposing that it is an American dollar or its equivalent, and for that reason I am against it, but it is too late. I do ask, however, of the committee that when they go into conference they will very carefully consider that proposition.

[Here the hammer fell.]

[Mr. MERCER addressed the committee. See Appendix.]

Mr. COOPER of Wisconsin. Mr. Chairman, I have only a word or two to say in reply to the gentleman from Connecticut [Mr. HILL], and then I shall move to close debate on this section. The gentleman from Connecticut admits that Mr. Gage, the late Secretary of the Treasury, to whom he wrote for an opinion upon the subject of this coinage plan, replied that he, Secretary Gage, believed not in the introduction of the American coinage, but in the plan incorporated in the pending bill.

In addition to that we have Professor Hollander, who was in Porto Rico at the time of the substitution of the coinage there, and he said that he is strongly opposed to any proposition to abruptly substitute American coinage in the Philippines, and that if they were to do it over again in Porto Rico they would adopt a different plan to introduce it there.

Mr. HILL. The governor says no.

Mr. COOPER of Wisconsin. Then we have another gold expert, Mr. Conant, and here I have a letter recently received at the War Department, written by Professor Jenks, who was secretary of the Industrial Commission. He was requested by the Secretary of War to go to the archipelago and study the industrial and financial conditions there. After investigation there, he writes a letter to Colonel Edwards of the War Department, from which I will read an extract:

> The result of this is that I am very positively of the opinion that Conant's plan (that is, the plan embodied in this bill, originally suggested by the Taft Commission two years ago) is better than free silver under conditions as they are here. I should myself favor free silver instead of the American gold standard, although I think probably the Commission would not. Conant's plan is, however, I am certain, very much better than either.

Then we have the testimony of George E. Roberts, the Director of the Mint, who says that the abrupt introduction of American coinage in the Philippines would be inadvisable at this time. I can put the argument all in a nutshell. Millions of those people are not well educated. They are but little traveled. They are a people of tribes, of different languages, full of prejudices.

The proposition to introduce pure American money amounts to this: To introduce an American silver piece of a certain size which is worth twice as much as a silver piece of exactly the same size of their money. They would look at the size of the coin, so Mr. Conant and Mr. Roberts say, and so the Commission say, and so all the experts say who have testified before us, and the ignorant people among them would wonder how this piece of silver of the same size as their money could be worth twice as much. There woud be confusion and distrust.

The object of the Commission now is to make a token coin; to stableize it, so to speak, with reference to our gold dollar; to put it at the ratio of 2 to 1; to make it a sufficiently low token coin, so that it will not leave the islands. In other words, to adopt the exact plan which England adopted in British India when she took a rupee, which is worth 19, and made it worth 32 in exchange value, and kept it at that ratio with the sovereign. It has gone at that ratio ever since, and they have more gold in their treasury than they know what to do with, according to their official reports.

Mr. HILL. Will the gentleman yield for a single question?

Mr. COOPER of Wisconsin. I do.

Mr. HILL. I do not wish to misunderstand the gentleman, but I want to know if I understood him correctly. [Cries of "Vote!" "Vote!"]

Mr. TAWNEY. Mr. Chairman, a question of order.

The CHAIRMAN. The gentleman will state his question.

Mr. HILL. I desire to ask the chairman of the committee [Mr. COOPER of Wisconsin] if I understood him correctly that he would prefer the free coinage of silver under the Senate proposition to the straight adoption of American money?

Mr. BARTLETT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BARTLETT. How is this debate proceeding?

The CHAIRMAN. By unanimous consent.

Mr. BARTLETT. I object.

The CHAIRMAN. The time for debate has expired.

Mr. COOPER of Wisconsin. I ask unanimous consent that the gentleman from Connecticut may ask his question.

Mr. SMITH of Kentucky. I object.

The CHAIRMAN. The question is on the motion of the gentleman from Connecticut to strike out the paragraph.

Mr. HILL. I withdraw the motion.

Mr. SHAFROTH. Mr. Chairman, I desire to offer an amendment.

The amendment was read, as follows:

Strike out the section and insert:

"That the said Philippine government is authorized to coin a silver dollar, which shall contain 416 grains of standard silver, and the standard of said silver coins shall be such that of 1,000 parts by weight 900 shall be of pure metal and 100 of alloy, and the alloy shall be of copper. And upon the said silver dollar there shall be devices and inscriptions to be prescribed by the government of the Philippine Islands, with the approval of the Secretary of War of the United States, which devices and inscriptions shall express or symbolize the sovereignty of the United States and that it is a coin of the Philippine Islands, together with the denomination of the coin expressed in English, Filipino, and Chinese characters, and the date of its coinage."

[Mr. SHAFROTH addressed the committee. See Appendix.]

Mr. SOUTHWICK. Mr. Chairman, the pending bill provides for a temporary administration of the affairs of the civil government in the Philippine Islands. Its provisions have been lost to sight on account of the wide range of debate and, at times, the violence of partisan discussion. Yet, so far as the bill proper is concerned, I question whether there is any member of the House of Representatives who can conscientiously and patriotically oppose its passage. The title of the measure indicates the spirit and purpose of every line of legislation involved in the bill. Provision is made for an organic law for nearly 10,000,000 human beings, or more than three times as many Americans as inhabited the 13 colonies when our great experiment in free government was actually undertaken on the Atlantic slope in 1789. These millions of Filipinos are divided into many classes and tribes. They speak many languages and dialects. They occupy an archipelago comprising many islands, provinces, and municipalities. While the Senate bill and the House bill have in view practically the same object, they differ in detail.

Personally, I prefer the House bill, because it provides, as the Senate bill does not, for a Philippine congress in which the Philippine Commission is to be the senate and the lower house is to be composed of Filipinos elected by those who shall be entitled to vote under certain conditions provided by the bill. To my mind this is by far the leading provision of the measure which is under consideration. It provides a popular participation in the Government of the Philippine Islands, and is earnestly desired by leading Filipinos, by Governor Taft, and by the Philippine Commission as highly desirable, in order to give to the people of the islands not only experience in governmental affairs, but greater satisfaction with the existing authority of the United States. In other words, the House bill seeks to reduce the military power in the Philippines. It enlarges the civil power and gives a much greater measure of local self-government to the Filipinos than they now enjoy.

This is a move in the right direction, and fittingly supplements the steady progress toward higher and better things which has marked affairs in the Philippines since Americans first set foot on the island of Luzon. I believe that every citizen of the United

States should be proud of what has been accomplished in the far-off islands of the Pacific during the brief period of American occupation.

In all the islands where peace prevails and law and order reign, schools have now been established. In the period of Spanish domination educational institutions were confined to Manila, Iloilo, and a few other of the larger cities. To these centers of population few were able to send their children from the outlying districts, and at best they could secure a mere smattering of education there. American rule, however, has given schools to the masses, until to-day there is scarcely a town of importance on any island which has been pacified that does not enjoy the blessings of a free public school. The legislative reports show that nearly 200,000 pupils have been enrolled, against a maximum enrollment during Spanish domination of 30,000. Moreover, not included in the figures given are more than 20,000 adults attending night school in the city of Manila, all of whom are eager to learn our language.

In the Philippines, as in every other country whose natural resources have not been developed, the land question is of the highest importance. The policy which we have pursued in permitting homesteaders to settle on the public domain, and causing the wild spots to blossom and produce, is to be pursued in the Philippines. The great drawback under which the people of the archipelago have labored for centuries, that of the control of large tracts of land by the religious orders, is to be removed. Provision is made for buying the lands owned by the friars; and these domains are to be opened for settlement by the Filipinos. In order that the lands may be used for the purposes desired, provision is to be made for limiting the land holdings of corporations to small amounts. We are to introduce into the Philippines the land policy which has made the Western section of our own country great and prosperous.

The marvelous and perhaps unprecedented feature of the American occupation of the Philippines is that civil government has followed in the very wake of the army. Military pacification has immediately been followed by the establishment of civil institutions, and in many instances the governors of provinces who have been selected are native Filipinos. It is a matter for congratulation that in the pacified provinces the people are resuming their wonted occupations—principally agricultural pursuits—which had been neglected in a large measure since 1896. In the cities manufacturing and commercial pursuits likewise have been resumed; and the marvelous feature not only in Manila, but in the other cities throughout the islands, has been the marked increase in the wages of laborers since the American occupation.

Furthermore, in the Philippines, as in Cuba, American methods have promptly taught the necessity for proper sanitation; and, as the dreaded yellow fever has practically been stamped out under American military rule in Habana and Santiago, so in the city of Manila the death rate has been reduced one-half during the short period which has elapsed since American soldiers and marines first disembarked on the water front of the Philippine metropolis.

To native governors has been added a native constabulary which has been organized and developed into a thoroughly equipped branch of the public service; and the native officers and men, in a fearless discharge of their duties, have well supplemented the efforts of the army in clearing both the highlands and the lowlands of roving bands of banditti. Law and order have been restored throughout most of the 127,000 square miles of Philippine territory.

Courts of justice of the American order have been instituted, where for the first time in the history of the islands justice has been administered impartially between both the rich and the poor; and the Filipinos are beginning to realize that their personal liberties are safe-guarded as would never have been possible under Spanish rule, nor under the despotism of Aguinaldo.

Roads and highways have been built, bridges have been constructed, cables and telegraph and telephone lines have been laid, and provision is now being made for making of the bay of Manila the best harbor in the Orient.

These developments but partially indicate the real progress which has been made under the wise administration of the Philippine Commission, and some day not only the Filipinos, but Americans generally, will realize the high character, persistent industry, and extraordinary genius of that great man who heads the Philippine Commission, and who has devoted the best years of his life to bringing order out of chaos and providing good government for the people of our new-found possessions in the Pacific. To what extent the transformation from military rule to civil rule has proceeded in the Philippines can be appreciated only by those who have followed the daily records of the progress which the Taft Commission has made. Nothing could more eloquently tell the rule of military pacification and civil rule than the statement sent to the Senate as late as June 19, by Secretary Root, wherein it appears that the number of troops in the Philippines is now only 23,000, whereas on the 1st of June, 1901, there were more than 70,000 American soldiers in the islands. Moreover, orders already issued will presently reduce the number of troops in the Division of the Philippines to 18,000.

Mr. Chairman, the consideration of the pending measure has been marked by acrimonious and partisan discussion. A Democratic minority, searching for an issue, has arraigned the national Administration as being guilty of imperialism and has attacked the Army of the United States with a venom not witnessed since the war of the rebellion. Personally, I am not in the slightest degree deterred from my support of the pending measure by reason of the charges of imperialism. I heartily favor the Philippine policy into which the American people were originally drawn by reason of the destruction of the battle ship *Maine* and the war with Spain. I fully approve the policy of the United States in dealing with the people of the Philippines from the day Dewey's fleet entered the harbor of Manila. More than that, I approve our entire policy in the Pacific Ocean, which has added not only the Philippines, but also the Hawaiian Islands and the Ladrones; which has dotted the Pacific Ocean with American coal heaps and given to our Navy a line of easy communication from San Francisco, 8,000 miles across the ocean, to Manila, which lies within twenty-four hours of the coast of Asia.

I believe that we are in Manila to-day and occupying the Philippines as rightfully and as lawfully as we are in possession of New Orleans and St. Louis. I have no patience with the Democratic policy which prevails on the other side of this Chamber, and which manifests itself in the cry of imperialism and the demand that our Army and Navy shall be withdrawn from the Philippines. There never has been a time since Dewey's men first raised the Stars and Stripes over the arsenal at Cavite when we could honorably have withdrawn. The exigencies of war compelled us to capture Guam and Manila and annex Hawaii. When our battle ships demolished the Spanish fleet and our soldiers and marines took possession of Manila, we overthrew the power of Spain, which, prior to our advent, had stood for the maintenance of law and order and the protection of life and property.

When our war with Spain began insurrection in the Philippines against Spanish authority was a thing of the past. Aguinaldo and his principal lieutenants, numbering 34 in all, had been bought by Spanish gold and sent out of the archipelago. Aguinaldo himself did not return to the neighborhood of Manila until May 19, 1898, or eighteen days after the Spanish fleet had been destroyed by Dewey and Manila was at the mercy of his guns. There were hundreds of Spanish families—men, women, and children—families of German and English business men, and also thousands of Spanish prisoners in the hands of our troops when Manila surrendered to Admiral Dewey and General Merritt.

The United States Army was absolutely responsible for the protection of the people of the city and its interests. It was subsequent to the capitulation of the city, and during the period which elapsed between that event and the signing of the protocol, after the capture of Santiago, that Aguinaldo, fortified by Spanish gold, was busy heading a conspiracy which ultimately developed into open warfare against the sovereignty of the United States. In this connection the recent testimony of Admiral Dewey should not be forgotten when he declared: "I will say that I believe he [Aguinaldo] was there for gain—for loot, for money—and I further believe that independence never entered his head."

That Aguinaldo organized a conspiracy against the American troops during the period between our naval victory of May 1, in Manila Bay, and our final conquest at Santiago early in July is not open to question, and is now a matter of history. And that this conspiracy continued during the existence of the protocol into which Spain and the United States had entered, prior to the ratification of the treaty of Paris, is also patent. Our troops occupied Manila and its suburbs, quietly and inoffensively, and outside of certain established lines they did not venture.

Any other course on the part of the United States than the maintenance of sovereignty and law and order in Manila would have been a crime of crimes, and would have let loose upon the civilized population of the city and its extensive business interests a horde of Filipinos whose entrance would have been marked by such atrocities as have always attended a savage invasion since the beginning of time. It would not have ended with the accomplishment of the object which Admiral Dewey attributes to Aguinaldo—the mere accumulation of money—but would have resulted in general slaughter, pillage, rapine, and ruin. And the United States would have been branded by the civilized world as a despicable coward and as a traitor to the very cause of civilization. [Applause.]

In view of the horrible possibilities which would have attended the departure from Manila of the army of Merritt and the fleet of Dewey, it is childish to claim that, then and there, the United

States could have avoided the responsibilities in the Philippines which now it is obliged to face. Had we, in weakness and cowardice, withdrawn after having fought to destruction the dominion of Spain which, despite all the errors of misrule, at least stood for the cause of law and order, it would have been necessary for Great Britain or Germany, or both, to enter Manila Bay, and, landing their marines and sweeping the streets of Manila with shot and shell, restore order and protect the foreign population and the business and commercial interests of Manila against the horde of Aguinaldo. [Applause.] How despicable a figure the United States would have cut, in running away from the responsibility which concerned it, does not require extensive consideration.

It was while the United States troops were occupying Manila, and simply protecting it from the army of Aguinaldo, which was mobilizing on the outside, that the trouble began. The instructions to our troops from General Otis were to avoid a conflict with these Filipinos under all circumstances. But with ribald jest, with curses and indecent oaths and insults—to employ the language of General Funston—

> They taunted us as cowards and dared our men to open fire. * * * Nearly all of us, I think, realized that it was not a question of months, but a question of a few days until the clash must come. Aguinaldo and his paper government, his cabinet, and his self-appointed congress retired to Malolos and there issued proclamations. Finally, two weeks before the beginning of the war, an insurgent captain, who refused to respond to the challenge of the sentry of the city of Manila, was shot dead. That was the first actual clash.
>
> About three days after that, a private soldier of the First Montana Regiment who was on sentry duty outside of the city was approached by a man with a rifle about 10 o'clock at night. He gave the usual challenge, but the man did not respond, and instead of that fired at him at a distance of a very few yards, but, Filipino-like, missed him. Only two days later a private of the South Dakota regiment, on outpost 2 miles north of the city, was approached by apparently an unarmed native who asked him for a match. The sentry started to hand him one, when he drew a bolo—a native knife about 2 feet long—and gave him a terrific blow across the face, cutting him from the top of the skull down to the chin; and, I am glad to say, within a half a second the native fell dead, shot through the heart.
>
> A few days later a drunken mob of Filipinos, partly officers and partly soldiers of Aguinaldo's army, attempted to rush through the lines of the First Nebraska near Santa Casa, when the presence of Colonel Sterns, that magnificent soldier who fell at Cang Co, prevented a fight from opening at that time. He had great influence over the natives and over his own men and he induced them to retire. Three days later an insurgent lieutenant and two soldiers approached a sentry on the Santa Lucia bridge, 3 miles east of Manila. The sentry, in accordance with orders that sentries usually have, challenged the three at once, and, instead of turning, the men gave him an insulting reply, came forward, started to cross his post, and he fired, and by one shot killed the lieutenant and one soldier. The remaining soldier ran back to the insurgent line after this shot rang out and the First Nebraska was ordered out.
>
> Of course there was a great deal of excitement, and everybody thought it was like the incident of the attempt to assassinate the sentry of the Montana regiment, which resulted in the shooting of the Filipino captain in Manila; they also thought that the thing was ended for the time being, but within a minute or two rifle firing broke out from the insurgent trenches in front of the First Nebraska Regiment and the war had begun.

Instantly sky rockets were fired into the air as a signal of attack, and rifle firing began all along the line of the insurgents.

This outbreak occurred just before the time of the ratification of the treaty of Paris; and when the question is raised, whether or not the American soldiers had the right to return the Filipino fire and defend themselves, I can only quote the words of Senator SPOONER:

> We had a perfect title to whip any body of troops that attacked our men anywhere under God's heaven.

The insurrection in the Philippines against the authority of the United States had begun, and the President of the United States had the same right to employ the Army to put it down as he would have had in case of an Indian outbreak in New Mexico or Arizona. There was never any shadow of turning from the policy in the Philippines which was inaugurated by President McKinley and has been continued by his successor. If our Army and Navy could not withdraw while the interests of civilization and humanity demanded that it should protect the people and the interests of Manila after Dewey's victory, there was a double, even a triple reason why it could not in honor be withdrawn after it had been assailed in open warfare by the Filipinos and after the ratification of the treaty of Paris had given to our Government sovereignty over the islands by as perfect a title as that by which we possess any considerable area of territory within the continental boundaries of the United States.

I can not understand how any political party searching after a winning issue could propose a policy of scuttle so far as the Philippines are concerned. Had this policy been pursued by President McKinley in 1898; had the flag which Dewey's men raised over the arsenal at Cavite been hauled down; had our troops been mobilized within the confines of Manila and placed aboard the transports, and had battle ships, monitors, cruisers, and transports sailed away, eastward-bound for San Francisco; had all the horrible results which shortly would have attended the irruption of Aguinaldo and his army into Manila been realized, the election days of 1898 and of 1900 would not have rolled round soon enough to satisfy the American people in its overwhelming demand that a political party and an Administration composed of cowards should be deprived of all power in the legislative and executive branches of our Government. [Applause.] Even the irresponsibility of a political minority does not justify the Democrats in Congress in disputing the sovereignty of the United States in the Philippines. [Applause.]

Loose talk regarding "imperialism" should deceive no one regarding the policy of the United States in the Philippines. It is the duty of our country to establish a stable form of government at Manila just as much as it was to drive the Spaniards out of Habana and establish a new government there after the iniquity of the *Maine's* destruction had been laid at the door of Spain. Our policy in the Philippines is in line with the policy which has prevailed from the foundation of the Government, with this qualification, there never has been an extensive addition to the territory of Uncle Sam where military rule has given way so quickly to civil authority, as in the case of these islands of the Orient.

How strange that the shades of Thomas Jefferson should be invoked by those who rebuke us for imperialistic innovations. This cry of imperialism, like many other partisan cries, is not without precedent. It broke forth in a perfect storm of popular disapproval, so far as the Federalists were concerned, around the devoted head of the author of the Declaration of Independence. He had purchased Louisiana as we have purchased the Philippines. For months after the great territory had been bought from Napoleon—greater in area than the entire thirteen colonies with all their territories—our new-found possessions had no government except the will of the President, and it was even treated as foreign territory for tariff purposes.

We purchased New Orleans and St. Louis, as we have purchased Manila and Iloilo. We purchased the French and the Spanish, and all the aborigines of that vast territory of Louisiana, just as we have purchased the Tagals of Luzon and all the outlying tribes and peoples of the islands which go to make up the Philippine Archipelago. President Jefferson governed the people of Louisiana without their consent. He divided his purchase into two Territories—that of Louisiana and that of Orleans—and in the act providing for this division, passed on his recommendation, the governor and secretary, and every member of the council, which was the only legislative body of the Territory of Orleans, was appointed by Jefferson; that is, the people of our new-found possessions were not allowed to elect a single member of their legislature, while under the House bill which is pending here, when order shall be restored in the Philippines the people of those islands can elect every member of the popular branch of a legislature which is provided for in this bill.

Jefferson went further in the direction of what our friends call imperialism in his treatment of the possessions purchased from France than has ever been dreamed of in connection with the government of the Philippines. [Applause.] The Federalists termed him a tyrant worse than Charles the First. When the anti-imperialists of those days talked about the constitutional rights of the people of Louisiana, Jefferson's stanch Democratic friends in Congress insisted: "Louisiana is a territory purchased by the United States and not a State;" and further: "Whatever limitation the Constitution fixed to the power of Congress over the State it fixed no limitation to the power of Congress over territory."

Jefferson and the Democracy insisted that they would govern Louisiana, not under any constitutional grant of power, but by the right of acquisition, as they saw fit. They did so govern, and they were prepared to use the Army of the United States if necessary to enforce our sovereignty within the borders of Louisiana. If there be any doubt on this point, read the President's message to Congress in June, 1804, wherein he stated that he had called out the militia in Ohio, Kentucky, and Tennessee and held the troops in readiness to crush out the opposition that might develop in Louisiana.

We had our anti-imperialists in those days—timid souls who viewed with alarm the expansion of our territory, the development of our resources, and the increase of our power. Some insisted that the territory east of the Mississippi River and its outlet to the Gulf should alone be retained; that the territory westward of the Mississippi was worthless and should be sold. Their names are not recalled at the present day. [Applause.] The memory of Jefferson, an "imperialist," will live as long as our institutions last, and even until the records of civilization shall have passed away, not only as the author of the greatest declaration handed down to man since the time of the Sermon on the Mount, but also as an expansionist and an imperialist who added to our possessions and our sovereignty the great Valley of the Mississippi and the great Northwest. [Applause.]

It was a sign of political decadence and of approaching dissolution that the Federalists of 1804 opposed the extension of the boundaries and the sovereignty of the United States; and the Hartford convention was scarcely needed to eliminate a moribund party from the political situation in this country.

The acquisition of Florida from Spain raised similar opposition from the anti-imperialists of 1818, and our records show the same shallow talk about "the enslavement of unfortunate people," "the purchase of human beings," "the use of the United States Army in extending our sovereignty by brute strength." But this is all of the past. To-day no sentiment exists in favor of ceding Louisiana back to France and Florida back to Spain. [Applause.]

The eloquence of Tom Corwin could not prevent the American eagle's being carried into the halls of the Montezumas; could not prevent the annexation of Texas and the acquisition of California and the Southwest. And perhaps the most lamentable episode in the career of our greatest orator and constitutional exponent is that wherein Daniel Webster, anti-imperialistic-like, withdrew to Boston and viewed the plains, valleys, and mountains of the Far West as his descendants to-day cry against the acquisition of the Philippines.

Almost within the memory of the present generation it was repeated over and over again that Alaska was worthless; that Russia had been for years endeavoring to give that territory away; that the United States had been victimized when it bought Alaska with gold—bought the land, bought the people, bought the forests above and the minerals beneath, just as Jefferson bought the territory of Louisiana. But Uncle Sam has never engaged in a great real estate operation which the American people have regretted. [Applause.] Even barren and frozen Alaska has developed a Klondike. [Applause.]

How quickly and how thoroughly President McKinley proceeded to supplement military conquest with civil rule, in which the native Filipinos should be given the highest degree of home rule compatible with existing conditions, is clearly shown in his instructions to the Secretary of War as early as April 7, 1900, when he recalled this extract from his message to Congress of December 5, 1899:

> As long as the insurrection continues, the military arm must necessarily be supreme, but there is no reason why steps should not be taken from time to time to inaugurate governments, essentially popular in their form, as fast as territory is held and controlled by our troops.

In announcing to the Secretary of War the selection of a Commission headed by William H. Taft, President McKinley gave these instructions:

> You will instruct the Commission to proceed to the city of Manila, where they will make their principal office, and to communicate with the military governor of the Philippine Islands, whom you will at the same time direct to render to them every assistance within his power in the performance of their duties. Without hampering them by too specific instructions, they should in general be enjoined to make themselves familiar with the conditions and needs of the country; to devote their attention, in the first instance, to the establishment of municipal governments in which the natives of the islands, both in the cities and in the rural communities, shall be afforded the opportunities of managing their own local affairs to the fullest extent of which they are found capable, and subject to the least degree of supervision and control which a careful study of their capacities and observation of the workings of native control show to be consistent with the maintenance of law and order and loyalty.

Thus we clearly perceive that, even while the insurrection engineered by Aguinaldo was in full blast, the President of the United States was taking proper and practical measures toward supplementing military with civil control at the very earliest practicable moment, and giving to the natives the fullest measure of home rule possible. Truly such utterances on the part of the lamented McKinley did not savor in the slightest degree of imperialism. On the contrary, they indicate clearly his determined policy of restoring civil rule at the earliest practicable moment to a greater degree than obtained at any prior period, in the history of our own country, when new-found territory has been added. Thus, California, for instance, for four years after it became United States territory, from 1846 to 1850, was under the direct and supreme control of the Army authorities.

Alaska remained without civil government for more than thirty years after the territory had been purchased from Russia, and only now is being favored with the civil institutions which President McKinley insisted should follow in the very wake of our army in the Philippines. While it has been the aim and policy of the American people, whenever new territory has been added, to extend to its new-found citizens the blessings of civil institutions, nevertheless, during our entire history no case can be found where this policy of superseding military with civil control was so quickly, so systematically, and so thoroughly pursued as in the case of the Philippines.

It is not surprising, therefore, that, during this entire protracted and acrimonious discussion of the pending bill our Democratic friends have persistently refused to direct their attention to the provisions of the bill itself. The record which the Taft Commission has made, in establishing civil institutions in the archipelago, is not open to adverse criticism. The Commission has performed its duties faithfully and well. All accounts agree as to the excellent progress which it has made, and at no time has there been friction between the military power and the newly established civil institutions in the islands.

The order of President McKinley of April 7, 1900, appears to have been obeyed in spirit as well as letter. And this pending bill is designed to supplement the work of the Taft Commission and give to the people of the Philippines a greater participation in civil affairs than they enjoy to-day. It is significant, I say, that with all the varied and vicious opposition to this bill which has been manifested by the Democratic minority, it has really never directed its attention to the bill's provisions. We have heard resonant denunciations of imperialism and imperialists, wild demands that independence should be granted to the Filipinos, vigorous insistence that the United States should adopt a policy of scuttle; and, last and principally, I regret to state, the most slanderous, disgraceful, and unpatriotic denunciation of the Army of the United States, its officers and its privates, which has ever been heard within the walls of this Chamber and the legislative Chamber at the other end of this building.

The only possible explanation of the Democratic policy toward the Army of the United States, which has recently been exhibited here, is that the minority is floundering around in search for an issue.

From what I have read in the newspapers and magazines, and from numerous conversations with private citizens, I believe that the Democratic party is again manifesting its capacity for blundering. From the day when our troops first arrived in Manila and begun the pacification of the island of Luzon; in the case both of volunteer troops from the States, as well as the regular troops of the United States Army, we have seen manifested not only here in Congress, but throughout the columns of the entire Democratic press, with here and there an honorable exception, a tendency to magnify all reports from the Philippines which might be construed as indicating brutality on the part of American officers or privates in dealing with the Filipinos.

That occasionally American soldiers in the Philippines, as elsewhere, have forgotten the duties which they owe to their enemies and to themselves is not to be doubted. But the treatment of such cases has not been left by our Democratic friends to the constituted military authorities. They have not waited to discover whether these cases have been brought to the attention of courts-martial, or where cases have been tried by the military courts they have not waited for the judgment of such tribunals. They have prejudged; they have invented; they have overlooked the improbability of reports of American cruelties to the Filipinos.

They seem to have forgotten the hard common sense of the American people, which distinctly tells our people that the very natures of American soldiers are not transformed by the fact that they are fighting their country's battles 8,000 miles out on the Pacific; that Americans are Americans in any other part of the world; that they are by far the fairest fighters in the world. Time and time again, since this Democratic policy of attacking the Army was inaugurated, both in and out of Congress, facts have demonstrated that the alleged outrages inflicted by American troops were either fabrications or gross exaggerations.

And the fact has not escaped the attention of the American people that the Democratic minority in its criticism of the Army has directed its attention entirely to our own officers and soldiers and has overlooked the fearful atrocities which the Malays of the Philippines have perpetrated against our troops. The Malay is far from an attractive creature. When we go back in the history to discover our first knowledge of him we find him playing the rôle of a cannibal—a man-eater. And to the natural savagery of the Malay there has been added, among the Filipinos, the cunning and cruelty acquired from the Spanish.

The news accounts from the Philippines have given scores and hundreds of instances of fiendish barbarity, cruelty, and treachery on the part of the natives, which, in our history, can only be duplicated by the performances of the Apache Indians of Arizona. When to treachery and murder has been added shocking mutilation of the bodies of our boys in blue in the Philippines, is it strange that our soldiers there, as was occasionally seen in this country during our wars with the savage aborigines, should have been roused to a height of indignation with a desire to revenge the awful fate of their comrades and been led to overstep the rules of civilized warfare? Many of the proven instances of Filipino treachery and savagery are almost too dreadful in their details to be repeated. They exist in the records of the Army to the extent of hundreds of cases.

Our soldiers are charged with having administered the water cure. Why was the water cure administered at Igbaras, for instance? Because Private O'Hearn was captured by people who were apparently friendly to us, was tied to a tree, was burned for four hours with a slow fire, and finally slashed with bolos. His murderers confessed under the water cure. And our Democratic friends have been denouncing the comrades of O'Hearn for administering the water cure to his murderers, while the dreadful fate which overtook O'Hearn and maddened his comrades has not occupied Democratic attention in the slightest degree.

At Dunangas the body of Corporal Donehy was dug up, mutilated, and burned.

At Calinog Privates Dugan, Hayes, and Tracey were murdered by the town authorities.

At Dingle, Private Nolan was tied up by women, while in a stupor, and his throat cut by Filipinos called to the scene.

Near Pototan Lieutenant Wagner was murdered on the road by Filipinos dressed in American uniform.

A little midshipman just out from Annapolis, in a yawl from the flagship *New York*, in need of water, landed at Nipa Nipa, a little village flying the white flag of peace and friendship. He lifted up his empty water jar as he approached the shore; the natives pointed to the white flag and held up their jars. He cast his boat into the surf and advanced 50 yards from the beach where the good Samaritans were awaiting him with their water jars. As he drank his first deep draft, two of the women approached behind him and buried their knives in his back.

Lieut. Col. J. T. Dickman, of the Twenty-sixth Infantry, referring to the loss of his men through Filipino treachery, made this official statement:

The conduct of the American troops in the Philippines has been so humane as to be a continued source of surprise to all foreigners and to the natives.

Brig. Gen. J. F. Bell gives this typical specimen of native treachery:

On January 10, five bodies of native scouts, who were only soldiers of the Fifth Infantry and were taken prisoners in a barrio of Batac, January 1, were found east of Batac. The soldiers' legs and arms had been cut off and the bodies otherwise mutilated. One white soldier named Lyons, Company K, Fifth Infantry, after having been taken prisoner, was cut with bolos and was left for dead on the field. He revived, and was able to crawl to a shack when night came on. Information was given to a local leader, and he was again taken prisoner and murdered.

And General Bell, after participating long and actively in our military operations in the Philippines, gives this official opinion:

I have been in Indian campaigns where it took one hundred soldiers to capture each Indian, but the problem here is more difficult on account of the inbred treachery of these people, their great number, and the impossibility of recognizing the actively bad from the only passively so. If it was deemed advisable to pursue the methods of European nations and armies in suppressing rebellions among Asiatics, the insurrection would have been put down months ago. Even now, although the seeds of rebellion have permeated all sections, such methods would soon end all active insurrections.

The operations of Gen. Jacob H. Smith and Maj. L. W. T. Waller of the Marine Corps in the island of Samar have been denounced by our Democratic friends in unmeasured terms and with especial reference to the "kill and burn" order which General Smith issued in order to render Samar "a howling wilderness." Yet, despite all that has been said, General Smith never intended to order the killing of women and children, as has been alleged. As a matter of fact, his troops never killed women and children. Without his drastic measures the war on the island of Samar would not have been ended yet. Nor do our Democratic friends admit the provocation for General Smith's policy, which was that the natives of Samar were more treacherous and implacable than the tribesmen of the Soudan or the Apaches of Arizona. It was for reasons which—when the findings of the court-martial ordered by the President shall be available—will undoubtedly be found entirely sufficient that General Smith in Samar pursued the awful, but necessary policy followed by Sheridan in the Shenandoah Valley and by Sherman on his march to the sea.

Rather than indulge in indiscriminate abuses of General Smith, as our Democratic friends are doing, I should prefer to await the verdict of the court-martial which has reviewed his operations on the island of Samar. I should prefer to give him the benefit of the doubt, in the meantime, and to say as said his counsel at his trial:

He was wounded in the assault on San Juan Hill and now carries a Mauser bullet in his body. He has served in these islands for three years, and his activity, pluck, and energy are known to all men living in the Philippine Islands. For forty-one years he has worn the uniform of the United States Army, with honor to himself and a benefit to the flag under which he has fought and bled; and now he is at the close of a most remarkable and successful campaign, during which he has accomplished that which Spain, in her three hundred years of occupancy, never attained—the pacification of Samar; while returning to his family and his native land, after thirty-eight years of service, as he, and all those who knew him, thought, with honor and glory, he is halted and taken off the transport to face charges for the language he used in giving the instructions for the conduct of a most successful campaign.

I should prefer to quote this from the Manila American rather than articles defamatory to the American soldier:

The administration of the army in the Philippines has been admirable and there can not be too much said in praise of the services of the officers and men. Confronted with an elusive and treacherous enemy, driven to impassable and untrampled brush, through miry fields and desolate jungle, the American army has well sustained the glory of the flag and perpetuated the sacred principles of liberty and justice.

These Democratic attacks are being made upon soldiers more than 10,000 miles from Washington, who have no opportunity of replying in their defense. It is a cowardly procedure. [Applause.]

I have sat here quietly and patiently during all this debate and I have yet to hear from the Democratic side a single admission of the horrible treachery and cruelty practiced by the Filipinos toward our troops. No Democrat has cited the few specific instances which I have presented, nor the hundreds of others of similar import, which may be found and are easily accessible in the records of the War Department. Take, for instance, the horrible official figures presented by the commanding officers of the different departments in the Philippines from time to time regarding the treatment by the Filipinos not only of American soldiers, but also of natives who sympathized with the American cause. For instance, Colonel Sumner, commanding the Department of Southern Luzon, reported on January 4, 1901, this dreadful compilation:

Natives assassinated for sympathizing with Americans, 14; natives assaulted for sympathizing with Americans, 104; assassination of municipal officers, 1; assaults upon municipal officers, 1.

General Hall, commanding the Second District in the Department of Southern Luzon, under date of January 12, 1901, gives these figures for crimes indicated above: 17; 106; 3; 12. Colonel Wilder, superintendent of police of the city of Manila, under date of December 21, 1900, reported 10 natives assassinated for sympathizing with Americans, and the commanding officer of the First District of Northern Luzon, under the same date, reported 100 assassinations of Filipinos, whose offense was sympathizing with Americans. From every department and from every island in the archipelago which has been in a state of insurrection come similar reports. Hundreds of Filipinos who have been friendly to our cause have forfeited their lives to their loyalty.

In view of this horrible record of assault and assassination of Filipinos whose offense has been loyalty to the American cause, what do the Democratic advocates of scuttle propose for the great masses of Filipinos who have demonstrated their friendship for us and who favor the adoption of American ideas, American methods, and American institutions in the Philippines? Are our friends and allies to be turned over to the tender mercies of those who already have rolled up these horrible figures of assault and assassination? No more despicable abandonment could be found in history if we should desert our new-found friends at the present juncture. The blood of these would be on the hands of the Democratic party, if it were sustained in its present position by the American people and the American flag in the Philippines were hauled down to be supplemented by the skull and crossbones of Aguinaldo and his band of looters and assassins. May a Divine Providence in mercy prevent such a bloody blot on the fair record of the United States of America. [Applause.]

Yet Democratic attention seems to be confined rather to the alleged brutalities of General Smith and Major Waller, surrounded by those both savage and treacherous, and compelled to resort to harsh measures in order to suppress insurrection—confined to American soldiers who administered the water cure in order to extract information from Filipinos regarding the whereabouts of men guilty of murdering American soldiers. The fierce nature of the Malay, behind all these outrages which has found manifestation in barbarities too shocking to contemplate, is not held up by our Democratic friends in extenuation, if not excuse, for the shortcomings of American soldiers.

Our Democratic friends apparently have sought to create the impression that the Army of the United States that is following the flag of its country and suffering all kinds of hardships and privations in the swamps and forests and mountains of the Philippine Islands, is a brutal aggregation given over to willful excesses and abuses of power. One might imagine, from listening to these Democratic tirades, that the Army of the United States had been recruited from the most brutal classes in the slums of our great cities. And this Democratic criticism is showered indiscriminately, and has been from the beginning, on the volunteer regiments from Nebraska, Iowa, Montana, Pennsylvania, Washington, and other States, as well as upon the regular troops.

The Army of the United States is not made up of hirelings. It is composed of brave, active, resolute young Americans. Neither in Europe nor elsewhere is the army so close to the people as in the United States. Our officers and men represent every State and Territory in the Union, and there is not a locality which can not point with pride to some of its noble sons who are in the military service of Uncle Sam. From my native city of Albany a score of young Americans are in the Army of the nation. No testimonial of their character is needed from me; they are known to family, friends, and neighbors. And I can assure you that, so far as my own locality is concerned, the Democratic policy of attacking the United States Army, far from receiving Democratic support is openly and roundly condemned by the people of both of the great parties alike.

Unlike their Senators and Representatives in Congress, the Democratic masses of the United States are not prepared to indorse a policy of indiscriminate abuse heaped upon the officers and men of the Regular Army. Altogether apart from the consideration that a very large proportion of the Army is composed of Democrats is the fact that the great mass of the Democratic

party is composed of loyal Americans who look with surprise and disgust at the spectacle which has recently been presented here in this building, where the representatives of their party, at both ends of the building, have vied with each other in seeking to discredit the military arm of the Government. [Applause.]

At the other end of the building a Democratic Senator [Mr. RAWLINS of Utah] has gone so far as to term that gallant soldier, General Chaffee, who commands our troops and is military governor of the Philippines, as one "who received his education in savagery." That of General Chaffee! The man who served gallantly and with honor in the Army of the Potomac until wounded in the Gettysburg campaign; who was brevetted in July, 1863, "for gallant and meritorious services in the battle of Gettysburg, Pa.;" who was promoted "for gallant and meritorious services in the battle of Dinwiddie Court-House, Va.;" who was again promoted "for gallant and efficient services in an engagement with Comanche Indians at Paint Creek, Texas.;" who was highly commended by General Lawton "for successfully planning an attack on Stone Fort at El Caney, Cuba, in July, 1898;" who left the theater of operations in the Philippines to command the American forces at Taku; who joined with the other forces of civilization in the march on Pekin. This of General Chaffee! An Ohio boy who, by meritorious services, has steadily worked his way upward on the roll of honor from the position of private to that of major-general in the Army of the United States. This of General Chaffee! An American volunteer who has fought the country's battles on the fields of the rebellion, in the swamps of Cuba, on the plains of the West, in the jungles of Luzon, and in the awful march on the capital of the Chinese Empire. "Who received his education in savagery!" And that utterance of the Democratic Senator from Utah is but a specimen of the abuse which has been heaped upon the American Army by our Democratic friends for weeks and months past. None escapes these general denunciations, from Commander in Chief Chaffee down to the humblest private. Our Democratic friends would have us believe that not only has the very nature of the men who fought their country's battles in Cuba and in China been transformed by their experience in the Philippines, but that from men of heart and mind and conscience they have descended to the level of the brute and the savage.

Personally I have viewed this performance with surprise, but with complacency. I do not believe that the Democratic members of Congress, in their assault on the Army, are representative of Democratic sentiment throughout the United States. It is not a Republican army which they are assailing, nor is it a Democratic army. It is an American army, composed of both Republicans and Democrats; men from the East and men from the West; men from the North and men from the South. I know personally of Democrats who are disgusted with the course of their Senators and Representatives on this matter, and who feel that even if their party was mistaken in its selection of tariff reform or free silver coinage as an issue, it at least did not disgrace itself as in the present attack which it is making on the men who wear the blue and the khaki uniform and are fighting their country's battles in the far-off Orient.

Let no time be wasted on the proposition that the United States shall guarantee to the Filipinos complete independence. Many, many years will elapse before the people of the islands, even under American tutelage, will be in position to govern themselves. There is no need of crossing the bridge of independence until we come to it. There is no necessity for making promises now which may return to plague us in the future. Long before the time when these people are fitted for independence shall arrive, they are quite likely to be united so thoroughly in all their feelings and sentiments with the American people that they may prefer annexation and a Territorial form of government, and even admission to statehood in the American Union.

Let not our Democratic friends indulge in unnecessary hysteria because the Filipinos are being governed without their consent. They can find numerous instances in the history of our country, from the first acquisition of additional territory by Thomas Jefferson in 1804 down to the acquisition of the Philippines under William McKinley in 1898, where this country has proceeded to govern without asking consent. But the concern of some of our Democratic friends over the dusky-hued Filipinos is painfully ludicrous. Here are gentlemen from the Carolinas, Georgia, Alabama, Mississippi, Louisiana, and Texas—from the very heart of the cotton belt—grieving that the United States should attempt to govern the Filipinos without their consent when there are 7,000,000 colored people in the South who, although in a majority in several of those States, no longer have a representative in this House and are no longer permitted to exercise an elective franchise.

The rights guaranteed to these colored people by the Constitution are violated, both in letter and in spirit. The fifteenth amendment to the Constitution might just as well be repealed. These gentlemen on the other side of the House, and the people whom they represent at home, I declare, are governing the colored masses in the population of the South without their consent. There, in the cotton belt, is real imperialism; there is the imperialism which not only governs American citizens without their consent, but also deprives them of participation, even to a limited degree, in legislation for the communities in which they reside. Instead of abusing American soldiers and wasting sympathy on the Malays of the Philippine Archipelago, I would suggest to my Southern friends that right at home they should proceed to confer upon the colored population of the South at least that limited participation in public affairs which we have already bestowed upon the Filipinos of the far-off Pacific. [Applause.]

I am satisfied that when the people of the United States are heard from at the ballot box next fall, then, and during the campaign, abuse of American soldiers who are facing the enemies of their country, fighting those that are firing on our flag, wading through swamps, fording rivers, climbing mountains, and enduring untold hardships for the restoration of law and order in our island possessions, will be found to be a losing issue. Oregon has already been heard from on this Democratic proposition of a policy of scuttle for the Philippines and unlimited abuses for American soldiers; and two members of this House have been returned from that far Northwestern State by majorities approximating the highest figures ever recorded. [Applause.]

If our occupation and control of the Philippine Islands represent imperialism, how proud we were not only that we were in possession of Manila, but with lying off her docks were our men-of-war ready for action and that throughout the island of Luzon were our fighting regiments quickly to be mobilized and placed on transports, when a cry of horror arose from the entire civilized world, two years ago, over the dreadful situation in Pekin. Religious fanaticism and hatred of the foreigners in China had found expression in an outburst of Boxer fury, which sought to take the lives not only of our missionaries scattered throughout the Empire, but even of the ministers of the United States and the other civilized nations represented at the Chinese capital, along with the lives of the attachés of the legations and the women and children connected therewith.

Then I say we were proud of the fact that we had been guilty of imperialism in the Philippines; proud that the ships of battle and the transports loaded with troops were quickly transferred from Manila to Taku; proud that Gen. Adna R. Chaffee, "who received his education in savagery," was in command of the United States troops disembarked on the soil of China; proud not only that we had been guilty of imperialism, but also that we had become a world power and were prepared to join with the forces of civilization in marching on the capital of the Chinese Empire for the relief of men, women, and children besieged there by religious fanatics. And the most heroic figure among the allied commanders of the forces of civilization which began that march was General Chaffee. He was resolute when others were faint of heart; he declared that the American troops would march to Pekin, if necessary, alone. [Applause.] What his words were I know not, but they must have been worthy of a place in history along with the immortal declarations of Lawrence and Dix. [Applause.] What true American regretted, as our troops struggled on through heat and dust toward Pekin, for the relief of men, women, and children in the legations there, that we had been guilty of imperialism; that we had become a ruling power, and that we had the men and the guns necessary to do our part in that great international drama of rescue? [Applause.]

The question has often been asked, What are we going to do with the Philippines, if we retain them? The very question suggests the shirking of responsibilities. We did not seek the Philippines; we did not seek an expansion of our territory; we did everything possible in an equitable way to avoid going to war with Spain. It was the villain's hand who fired the mine placed under the battle ship *Maine* which forced us into war and changed the map of the world; which forced Dewey out of Hongkong within twenty-four hours and compelled him to seek the batteries, the mines, and the fleet of Spain in the harbor of Manila. There never has been a moment since Gridley opened fire from the *Olympia* when we could beat an honorable retreat from the harbor of Manila. [Applause.]

The Philippines are as much a heritage of the war as is Porto Rico or Guam or Hawaii. They imposed national responsibilities upon us which we must meet. A nation is like an individual. It must face responsibilities and it must face them like a man. The Filipinos, as contrasted with Americans, are as mere children to grown men and women. We must treat them as children; we must supply them with a course in the kindergarten; they are not fit as yet for a course in the higher institutions of learning. [Applause.] We have back of us eight hundred years of steadily

advancing civilization, which have given us the best form of government on the face of the earth. The Filipinos, in a large part, have back of them only a record of barbarism, supplemented by centuries of Spanish oppression and misrule. It is our duty, which must be met, to educate them along the lines of American development and progress. We must afford to them every facility for improvement. These islands have come to us for purposes of betterment and not for loot. [Applause.]

But beyond the mere consideration of the institutions of the Philippines and the policy already under way of Americanizing their people, we need not lose sight of the fact that the islands afford a new field for the industrial and commercial enterprise of the American people. They represent vast natural resources in their mountains, laden with precious metals; in the primeval forests, waiting for the ax of the lumbermen; and in the fertile fields which have scarcely been touched by modern agricultural methods. They will yet teem with a vast population, largely American, and in time will become one of the leading markets of the world for the products of American agriculture and industrial genius. [Applause.]

Furthermore, they represent the extreme American outpost in the Orient, within striking distance of the coast of Asia. Let the unprogressive or the unpatriotic deride the idea as they may; nevertheless, the fact remains that the United States has become a world power, and like other powers of the earth is hunting for markets. Our triumph in China was not confined to the success of Chaffee and the other allied generals of civilization in forcing the gates of Pekin. Our diplomacy enjoyed a triumph less sensational and picturesque, perhaps, but nevertheless quite as substantial, when we used our influence to prevent the partition of China, to hold back the Russian invader, and to secure for our manufacturers and producers the "open door" into China. John Hay, Secretary of State, shares with Maj. Gen. Adna R. Chaffee the glory of that invasion of China. [Applause.]

From our distant outposts at Manila, with ships and soldiers, if necessary, and in cooperation with Great Britain and Japan, if necessary, we will maintain the door into China for our traders, open. That Chinese Empire, with its 400,000,000 people, affords the greatest market in the world, so far as future possibilities are concerned. For with the modern civilizing influences which will now have full play in China, with the construction of railroads, and with the development of the great natural resources of the Empire, will come an increased capacity on the part of the Chinese to consume.

It is scarcely conceivable to what vast proportions this Chinese market will develop. And we would be false to the interests of American manufacturers and producers and American wage-earners if we should withdraw, unless honor compelled it, from the Philippines, and thereby surrender not only the possibilities of that great market in the archipelago, but also the vantage ground at Manila, from which we may perform our part in maintaining the door into China's market open. This may be termed imperialism, but it may also be termed progress. Whatever it may be termed, it represents the way which, out of our present complications in the Philippines, will ultimately give to us vast markets both in the islands of the Pacific and on the mainland of Asia.

As well withdraw from Honolulu, from Pearl Harbor, from Guam! For, certainly, if we do not intend to retain Manila, and from Manila the advantages in China which our soldiers and diplomats have given to us, why not abandon the other islands of the Pacific where American coaling stations have been established and by which we maintain a practicable route through that vast expanse of water, 8,000 miles, from San Francisco to Manila? [Applause.] The policy of scuttle which our Democratic friends favor for the Philippines involves the abandonment of all our other possessions in the Pacific, and all of our advantages at the door of China.

Indeed, why retain Porto Rico; why purchase the Danish West Indies, with the splendid harbor of St. Thomas; why expend hundreds of millions of dollars on the construction of a canal between the Caribbean Sea and the Pacific Ocean in the interest of increased trade if we are to surrender our control of the trade of the Pacific which in the fullness of time Divine Providence appears to have given us? And yet the Democratic vision on the other side of this Chamber appears to be so contracted that during the entire progress of this debate no single Democratic Representative has referred to all these advantages resulting to us from the so-called policy of imperialism. Their thoughts and utterances seem to have been concentrated on reckless abuse of the American Army. [Applause.]

Our possession of the Philippines, already a practical fact, was confirmed in international law, by the ratification of the treaty of Paris. There are times when patriots can be partisans, and there are times when partisans must be Americans only. On matters of principle and policy Republicans have differed materially and radically with the man who, during the last two Presidential campaigns, has been the candidate of the Democratic party for President of the United States. And yet, above and beyond all partisan considerations, I express my own belief that when the history of the past four years shall be written, and when the character and methods and achievements of William J. Bryan shall be given the cold and calm consideration of the historian, the most brilliant chapter will be where Mr. Bryan, the Democrat and the partisan, laid aside both Democracy and partisanship, came to Washington and lobbied in the corridors and on the floor of the Senate Chamber for the ratification of the treaty of Paris.

His course was not popular with his party, which, almost to a man, at the other end of this building, was arrayed against ratification. Only one individual could influence from that Democratic minority sufficient support, combined with a Republican majority, to give the two-thirds vote necessary to ratify the treaty of Paris. That man was Mr. Bryan; and it was only his remarkable hold on the affections and the aspirations of his party which permitted him to secure the votes necessary for ratification. Time is constantly changing the perspective; yet when all the excitements, the sensations, and the mistaken issues, which have marked the last two national campaigns of the Democratic party, shall be forgotten, the service, personal, persistent, and productive, which Mr. Bryan rendered in dragging Democratic Senators unwillingly to the support of the treaty of Paris will, in my opinion, be the enduring monument which history will raise to the memory of the brilliant and versatile Nebraskan. It was truly a patriotic performance on Mr. Bryan's part. [Applause.]

Permit a man without partisanship nor oratorical proclivities, but who possesses practical knowledge and experience—a naval officer, Admiral Remey—to give his views on the present situation in the Philippines. On his arrival in the United States from Manila, recently, this was his summary of the situation:

> Concerning general conditions in the islands, General Chaffee told me before leaving that things were progressing satisfactorily—slowly but surely—and that pacification was only a matter of time. Talk of withdrawal of the United States from the Philippines is based on inaccurate and incomplete knowledge of conditions out there. This country could not withdraw. Chaos would be the result. My observations have convinced me that the natives are not capable of civil government yet. They need a guiding hand, and now that we have undertaken the task we can not for the sake of humanity withdraw until the work is completed.

The end of the Philippine matter is clearly in sight. All indications point to the collapse of the insurrection, which to-day largely partakes of the nature of brigandage. Ere long the country will be agreeably surprised to learn officially from the President of the United States that all the islands of the Philippines, where resistance of our authority has occurred, are pacified; and in line with the humane policy pursued by our military as well as civil authorities in the islands will probably come a proclamation of amnesty for the Filipinos recently in revolt. With that will ensue a glorious conclusion of the policy instituted by the lamented McKinley and steadfastly maintained by President Roosevelt, grandly enforced by the valor, endurance, and humanity of the American forces in arms, and worthily supplemented by the achievements of the Taft Commission, which has supplanted chaos with civil institutions of an enduring character.

The hands of the clock are rapidly approaching the hour when this long discussion will close and by Republican votes this measure will be passed.

When you ask me what of the future and what of the Republican policy toward the Filipinos, I point to this measure which is under discussion. It means better things for the people of the islands; it means improved conditions of government; it means increased participation of the people in the management of their own affairs; it means progress for the islands; it means the upbuilding of government; it means the education of children; it means the safeguarding of liberty; it means the elimination of the elements which made insurrection against Spain possible and gave Aguinaldo his opportunity.

And let us hope and trust that ultimately the hope of our dead President will be realized, that—

> all the inhabitants of the Philippine Islands will come to look back with gratitude to the day when God gave victory to American arms at Manila and set their land under the sovereignty of the people of the United States.

As an appendix to my remarks I desire to submit a publication by an eminent physician and surgeon of the city of New York, which, I believe, is altogether germane and pertinent to our occupancy and control of the Philippine Islands; and I sincerely hope that after careful perusal our Army officers may have suggested to their minds ideas which will lead to improvement in the matter of rations for American soldiers. Without indorsing all the views herein contained, I present this appendix as a production which is suggested by the experience of a talented and observing man, and is well worthy of attention.

APPENDIX.

NATIVE TROOPS FOR OUR COLONIAL POSSESSIONS.*

[By Maj. Louis Livingston Seaman, M. D., LL. B., New York City, Surgeon First United States Volunteer Engineers.]

The time is at hand for the authorities of the United States to decide a military question of the gravest importance, namely, whether our island possessions in the Tropics shall be garrisoned by troops sent from this country or whether native troops shall be recruited for this purpose. Involved in this question are considerations of climate and subsistence; of vast expenses for transportation of men and food; of expenditures for wages and future pensions; of intricate hospital arrangements involving elaborate establishments, mutually dependent but thousands of miles apart.

For the solution of a similar problem in China the recent experiences of Great Britain at Wei Hai Wei are luminous in purpose and results, and most timely for immediate application to this country's needs, especially in the Philippines. It is worth while to study with the utmost care what England has done with her native battalion at Wei Hai Wei.

Forty miles to the eastward of Chefoo, where in the year 1895, with the guns of the Russian fleet clearing for action, the treaty of Shimonoseki was ratified by China and Japan, lies the harbor of Wei Hai Wei. It is a bay formed by a sharp break in the rugged coast line, and is protected at its entrance by the island of Liu Kung Toa. Nature has been liberal to China in the matter of shelters to commerce, robbing the eastern shores of the Pacific that she might furnish the western with magnificent harbors and bays. Of these Wei Hai Wei takes easily primary rank, with its capacious, deep mud-bottomed harbor and its natural defenses.

Wei Hai Wei (pronounced as though it were written Way High Way) was founded in the reign of the Emperor Hung Wu, of the last (Ming) dynasty, about A. D. 1399. The third syllable—for there are three syllables rather than three words—means a walled military post; the first, though homophonous, means to awe, or, as we would say, to overawe; the middle member of the name is the word for sea. Thus Wei Hai Wei is the "Terror of the Sea," so called because it was used as a base from which to subdue the pirates that infested the neighboring seas.

In the year 1883 the first steps were taken to fortify Wei Hai Wei as a base for military operations, but the war with the French in 1894 led to the abandonment of the work before much had been accomplished. When peace came the interrupted activity was renewed and the rapidly growing northern ocean squadron of the Chinese navy found here its summer rendezvous, the harbor at Port Arthur, or Lu Shon Kon, as the Chinese call it, being far too small to shelter more than a few ships at one time.

Later two light-houses were erected. Forts were built under German superintendence, and supplied with guns by Krupp, whose agent, the late General Schnell, was instructor in gunnery in the Chinese garrison. Money was spent liberally, and excellent work was done in the way of fortifying the place, for the mandarins got their "squeeze" not by "jerry building," but by purchasing less than was provided for, and by drawing money for the expense of battalions which never existed. And when they did go in for "jerry building" their methods were radical. The presiding genius of the day, Li Hung Chang, found on his last inspection, made just before the Japanese sank the *Kow Shing*, and so opened the war, that a fort on the far east end of the bay had been built of wood. Mighty was the wrath of the great Li, and frightful the consternation of the two generals responsible for the fraud, fellow-provincials and protégés of Li himself. They were instructed to rebuild at once, and with stone.

But whence the funds? These were found in a way that was simplicity itself. A battalion was estimated for, and although it never existed, save on paper, money was drawn for its maintenance. Stone was obtained speedily from the wonderful and inexhaustible granite quarries of Shih Tao, in the Shan Tung promontory, and there it lies to-day, for the Japanese war put a stop to further fortifications. And when the Chinese Government recently turned the place over to the British the local authorities had no knowledge of the existence of this material, which was boldly claimed by a disgraced general.

On November 21, 1894, Port Arthur fell into the hands of the Japanese, who shortly began to turn their attention to Wei Hai Wei. On the 20th of January following 25,000 men were landed on the sheltered shore of Yung Cheng Bay under cover of the guns of the Japanese fleet. From that place to Wei Hai Wei a march of more than 40 miles was necessary over a country innocent of a road wider than a pack-mule track, and on February 12, 1895, Wei Hai Wei was evacuated by the Chinese.

Of their fleet, some were sunk and some captured. Admiral Ting, a brave officer, willing to fight, but under orders not to leave the harbor, chagrined and heartbroken, swallowed opium after signing articles of capitulation. The country around was occupied speedily and effectually by the Japanese. The treaty of Shimonoseki provided that Wei Hai Wei should remain in the hands of the Japanese until certain stipulations should be carried out, and for nearly four years Japan maintained a large garrison there, but on July 24, 1898, the Japanese flag disappeared from the harbor. For a brief time the Chinese emblem displayed its dragon swallowing the sun, shortly to find a companion in the Union Jack, and finally to disappear a few months later, leaving the British nominally, as they had been actually, in control of Wei Hai Wei, their new "sphere of influence."

It is on these historic shores that the experiment of transforming the Chinaman into a modern fighting machine has been successfully made by the newcomers, while the military experts of the world are watching the results with increasing interest.

And since the policy of our own country to retain permanent possession of our new insular colonies now seems established, we, too, should be especially interested in the experiment from a military as well as an economic point of view. Wherever the flag of England floats, there you will find her defenses maintained by native guardians. The flower of her army is not consumed in colonial garrisons. In India, the Gurkhas and Sikhs, officered by Englishmen, form her military reliance. In West Africa the Houssas are her defenders. In Egypt the Baggaras, transformed by the skill of Kitchener, rout the forces of the Mahdi. In the Windward and Leeward islands and Jamaica, native regiments (blacks) are employed exclusively; so, too, in Australia and Canada, her soldiers are mostly native born, and in South Africa, until the outbreak of the present war, Zulus, supplemented by a small contingent of English troops, maintained her defense and security. Where, indeed, would England be to-day were it not for these native forces guarding her colonial empire, while her own soldiers are engaged in the Transvaal hostilities.

Quick in her perception of this great advantage, she no sooner got possession of her new sphere in China than she at once set about organizing a means of defense by utilizing the material at hand, knowing that if successful she could at once eliminate two of the greatest problems besetting an army on a foreign shore—that of acclimatization, and of subsistence, with the attendant dangers of climatic and epidemic diseases.

It was my good fortune, on a recent visit to Wei Hai Wei, to meet Col. C. H. Bower, R. A., to whose genius has been intrusted the serious experiment of transforming native Chinese from mild-mannered coolies to modern soldiers, to witness many of their drills, and to get from Colonel Bower's own lips his account of the work. He approached the task with many misgivings, but after six months of patient work his views changed radically. The first battalion, Chinese regiment, recruited during the past year, numbered at the time of my visit 360 men, all from the Shan Tung Province, where the finest specimens of physical development of China are to be found.

These men are enlisted for three years, under the regular provisions of the British army act, for service in any part of the world. They have been selected with the greatest care. The average height is 5 feet 8 inches, with a chest development of 38 inches, a standard higher than that of the regular British army to-day. Three companies of 120 men each were well advanced in training. The organization of the company in detail is similar to that in the United States Army. All the commissioned officers are British, but the noncommissioned staff, with the exception of 1 sergeant-major, 1 color-sergeant, 1 orderly room clerk, and 1 armor sergeant are Chinese.

It is certainly wonderful what a few months' hard work accomplished in "licking these 'rookies' into shape." Colonel Bower assured me that while originally he was far from being impressed with the idea of making soldiers of the Chinese—indeed, he was decidedly prejudiced against even such an attempt—experience had convinced him of his error, and that he was now becoming an optimist. The initial processes of drilling were tedious, and required much patience on the part of the drillmaster; but the men soon learned to respect their superiors and became attached personally to them; and the officers, having once gained the confidence of the men, could do almost anything with them. Discipline was maintained with but little use of the guardroom, and drunkenness was unknown.

These Chinese recruits are remarkably respectful, orderly, docile, and learn their tactics well, but the greatest patience has to be exercised with them until they fully understand their positions and are brought to a realization of their responsibilities, of which, in their early days, they seem to have no understanding. For more than six thousand years the Chinaman has followed his own method and it is difficult to make him realize the importance of precision in military affairs. For instance, when a leave of absence for seventy-two hours is given to him, he will return perhaps in ninety-six, thinking it is all right. What's the difference?

He can not be made to see it: "came back all right; three days all the same four, so long as he did come back." But when put in the guard room for a week and made to do extra labor, his sleeping sense of duty is awakened and he does not repeat the offense. Notwithstanding that the drills at Wei Hai Wei have been very severe, desertions were unknown, although opportunity could be found easily, as the British concession or sphere of influence extends only 10 miles inland. The uniform of the troops is rather picturesque; straw hats in the extreme heat of summer, to be replaced by turbans in winter; khaki blouses and breeches for the summer, to be exchanged for rough Irish frieze in winter; red cummerbunds, and putties instead of leggings, with the regular artillery boot of the British army.

Colonel Bower was expecially enthusiastic over the results of his men's musketry practice at the rifle butts. At the time of my visit they had been trained for short-range work only—one, two, and three hundred yards; but their scores had been exceedingly gratifying, better even than those of the average British soldier after an equal amount of practice, to the great astonishment of all the officers of the regiment.

The cost of these troops to the British Government is another surprise. Their ration consists of one catty of rice (1.33 pounds), one-third catty of flour daily, and one pound of meat once a week. The cost of this to the British Government is $2.15, Mexican, a month; the soldier's pay is $8.09, Mexican, a month, making the entire cost to the Government for the soldier and his subsistence $10.15, Mexican, or $5, gold, a month.

All vegetables and luxuries are purchased by the soldier at his own expense. The health of the men was excellent. Since the organization of the regiment there had not been one death or a serious case of intestinal disease, although the period has included the most inclement season of the year. Colonel Bower was convinced that with a year or two more of training his men would be equal to any soldiers in the world.

At the time of my visit the battalion had its first experience in fighting fire. A conflagration occurred in the old city.

On such occasions it is the custom of the natives to sit by supinely, watching the progress of the flames, even though a whole city may be in a blaze, or to indulge in looting. But the English officers were on the scene quickly with the Chinese battalion, a fire brigade was organized promptly, water was passed up in buckets and the fire put under control, while the populace stood by and marveled.

Within a year of their enlistment, these troops successfully stood the crucial test of leading a charge. In a sharp action with a vastly superior force of boxers, the same who are now menacing the safety of the Chinese Empire in the provinces of Shan Tung and Pi Chi Li, and about Tien-Tsin and the Imperial City, Peking, the Chinese batallion, with their British officers, quickly routed the enemy, killing 60 and capturing a large quantity of arms. Their own casualties amounted to only two, both British officers, who were wounded. Thus they demostrated beyond cavil their fidelity and loyalty to the new flag they had sworn to uphold, even when their opponents were their own countrymen.

Hitherto we have been accustomed to laugh at the soldiery of China; but the fact that her soldiery is a laughing stock on account of lack of training and bad generalship proves nothing against the Chinaman's courage. Fortunately there can be no question of his innate bravery. For a consideration, or when convinced that he is right, he puts the fear of death entirely out of his mind. Like the negro, the Egyptian, or the Malay, all the Chinaman wants is the inspiration and leadership of resolute white officers. Conspicuous examples of their personal bravery are not lacking in the official reports of our own officers serving in the Philippines, notably those of Lieutenant Batson, of Major Bell, of Captain Sawtelle, of General MacArthur's staff, of Colonel Powell and Captain Durfee, of the Seventeenth Infantry, and of Major Shields, surgeon of the California Volunteers. My own observations on the firing line confirm these opinions. The Chinese drivers or litter bearers were as absolutely unconcerned under fire as though out in a snow storm, and they obeyed their orders implicitly.

An incident illustrating the bravery of the cooly is narrated by Major Fitzgerald. It occurred at the battle of Malolos, in Luzon. An American soldier had fallen at the front; two coolies had rushed forward with their litter, consisting of a little hammock swung from a pole, and were bringing the man back to the dressing station, when a bullet pierced the thigh of one of the litter bearers. He continued on, however, as though nothing had happened, until he deposited his charge beside the improvised operating table. Not until some time later was it found that the cooly was wounded severely and suffering intense pain. He endured it all with the patience and stoicism of his race, and expressed suprise that attention should be bestowed upon him at all; he had expected to be left by the wayside.

That the yellow and black races make excellent fighting material when properly officered by whites, has been proved conclusively in innumerable instances. In our own army at San Juan Hill, the Twenty-fourth and

* Read at the ninth annual meeting of the Association of Military Surgeons of the United States, at the Academy of Medicine, New York, June, 1900, and also published in the North American Review.

Twenty-fifth United States Infantry and Tenth Cavalry, negro troops, led by their gallant white American officers, did as effective work as any men, regulars or volunteers, on the field.

Nor did their heroism cease there. Later, when that more dreaded enemy, yellow fever, appeared in every camp, and when volunteers were called for to nurse the sick and dying and to bury the dead, it was these men of the negro regiments who responded to the call, notwithstanding that their numbers had been terribly reduced in the battle only a few days before, and the fatal pestilence was raging in their own ranks. One hundred and twelve of these martyrs succumbed to the disease, but they quavered not in the hour of danger.

Nor is this record for fearlessness in the so-called inferior races confined to our own Army. What did Kitchener do with the Egyptian peasants who for centuries had been regarded as menials and cowards? By tactics similar to those now being followed by Colonel Bower with the Chinese at Wei Hai Wei, he transformed them into cavalrymen, who not only successfully resisted but charged and broke the bloodthirsty followers of the Mahdi and defeated them with terrible slaughter.

Fifteen years ago the idea of making a soldier of an Egyptian would have been ridiculed as a practical joke by military men. Training and the inspiration of leadership won the victories, and the Egyptian soldier of to-day has his place in history.

The experience of "Chinese" Gordon at the taking of the Taku forts in 1860 is eloquent in its showing of the individual bravery of the Chinaman. Large numbers of coolies were pressed into his service as cooks, litter bearers, and for transportation purposes. Arriving at the moats surrounding the forts, these slaves of duty seized the scaling ladders, rushed into the water nearly neck deep, and in the face of a galling rifle and artillery fire placed the ladders on their shoulders from man to man, thus forming a continuous bridge supported by human pillars, and let the British army walk over their heads to the other side of the moat. Then, rushing from the water with their ladders, they ran to the walls of the fortress, and were the first to scale their ramparts. Thus was courage inspired, and thus did it become contagious, even as panic and disaster would have resulted had the leadership failed.

Nor has Spain been without experience in the use of native troops in her colonies. In the very place where this urgent military question must be met and solved by the United States, namely, in the Philippines, upon which Spain placed strong reliance, was her native Filipino troops, of whom, when Manila fell, she had about 5,000. They were among her best disciplined and bravest troops, familiar with the country, its warfare, its dangers, and its ambuscades, in excellent health and thoroughly acclimated, speaking the language of the country, free from danger of tropical diseases, and subsisting on native foods. Our failure to secure them for service under the American flag was promptly taken advantage of by the wily Aguinaldo, who, upon condition of their swearing fealty to him and entering his army, promised them immunity from their countrymen and reward for their services.

It was only a short time before the entire force was under his control, almost every soldier being made an officer in the Filipino ranks. It was in this way that Aguinaldo was enabled to create the disciplined array that was destined to cope with our army of over 50,000 men.

In view of our failure to secure the trained Spanish-Filipino soldiers, and considering the suspicion that exists and will probably continue to exist toward us among the natives of these islands, the experiment of Great Britain with the Chinese battalion at Wei Hai Wei is of signal concern to the United States. In our Philippine possessions there are already more than 100,000 Chinese, who form by far the most industrious class of the inhabitants. The Chinese mestizo (half Chinese and half Filipino) is acknowledged to be superior to the Eurasian, or to the mestizos of Oriental cross, Japanese, Hindoo, or Bornese. Many of them are wealthy bankers or merchants. Others are engaged as compradors and clerks, banking houses employing them almost to the exclusion of other nationalties, on account of their quick wit, sterling honesty, industry and individual merit. As in the Hawaiian Islands, they form the most valuable element of the population.

The Chinese-Hawaiian half-caste is the keenest business man and the most industrious citizen to be found in those islands. The exclusion of the Chinese laborer in that land will do inestimable damage in retarding industrial and commercial development. Despite his fanaticism when directed by ignorant rulers, he has shown his superiority over other Orientals in his untiring industry, his domesticity, and his honesty.

In the large foreign hongs of China and Japan he is the trusted employee in places requiring responsibility. When put in competition with the Bornese, the Filipino, the Singalese, the Hawaiian, the Japanese, or the Indian, he invariably wins, as may be seen by his rise from poverty to wealth and influence in the cities of Singapore, Calcutta, Sandakan, Manila, Honolulu, or Yokohama. It is time the world recognized that in the great race of civilization, and the greater race for the survival of the fittest, the nation that has preserved the integrity of its Government for over six thousand years; that has witnessed the rise and fall of the civilization of Chaldea, Egypt, Greece, and Rome; that can claim the discovery of the compass, of gunpowder, the game of chess, and the printing press, is more to be feared for its virtues than its vices. The presence of the Chinaman in the Philippines, as in the Hawaiian Islands, will do more to promote the industrial development of these colonies than any other single factor. His exclusion was a diplomatic blunder to be rated with our failure to secure the army of Filipinos trained by Spain and the discharge of the civil guard of Manila, 500 strong, all of whom immediately entered the service of Aguinaldo, and the irrational rationing of our troops, which did and is still doing so much to invalid and decimate our army. To attribute to climate the diseases of the Tropics is an error due to ignorance and custom. The vast majority of ailments credited to climate have their origin in the use of improper foods, overfeeding, or the abuse of stimulants.

During the past two years it has been my misfortune to see two great armies—one in our own southern country, Cuba and Porto Rico, and one in the Philippine Islands—largely invalided through culpable ignorance or neglect, by improperly subsisting the troops. To the the eternal disgrace of our medical and commissary departments it will be remembered that when entire regiments were suffering from stomach and intestinal catarrhs, from diarrhea ailments (and I have seen more than 75 per cent of an entire command in this condition at one time), they were subsisted on a ration of rich meats, pork and beans, tomatoes, and other foods that aggravated the diseases, crowded the hospital tents, and left the men weak and emaciated, so that their return to health was a prolonged struggle. Taps and the last volley were often the only reward many a poor soldier received for his patriotism.

As represented in caloric units, the ration supplied to the American soldier in tropical lands amounted to thirty-eight hundred units, while that given to an English prize fighter in a temperate zone, when training for the ring, amounts to only 2,800 caloric units.

It is an old saying that "it is the ration that wins the battle." As furnished to the soldier the ration was an excellent winter food, rich in elements requisite for respiration under a low temperature, but for a tropical land the enormous excess of carbon furnished by it to the lungs, over and above that which they could dispose of, imposed upon the liver and kidneys additional duties of elimination, producing congestions, fermentation and catarrhs, dyspepsia and lithæmia, glycosuria and phosphaturia, interfering with metabolism, and creating conditions favorable to bacteriological development, together with almost the entire train of diseases which have crowded our army hospitals. In phosphaturia, especially, the nervous system is deprived of the salts necessary for its proper function, which privation not infrequently results in mental disturbances that may end in suicide or insanity. How little the heat is directly responsible for these cases may be inferred from the extreme rarity of sunstroke in the Tropics.

Dr. John Ordonaux, emeritus professor of medical jurisprudence in the College of Physicians and Surgeons, served with distinction thirty-five years ago in our war of the rebellion as a volunteer surgeon. It was at that time that the famous saying, "Beans killed more than bullets," arose. In round numbers, the mortality from bullets, directly and indirectly, was 100,000, while that from disease was 500,000, or five to one. Commenting on this fact thirty-seven years ago, "that the ration served our troops in the South was the same in winter as in summer," Dr. Ordonaux said:

"By proper disposition of his diet man lives as healthfully under the equator as under the pole. The East Indian with his rice and yams, and the Eskimo with his seal blubber and putrid fish are both healthy enough in their respective climates, but let them once change residences without changing their diet, and what would be the consequence? The Eskimo would be attacked with putrid fever, and the East Indian would die of inanition.

"We perceive from this the absolute necessity of modifying all forms of diet in such a way as to accommodate them to the physiological requirements of varying seasons. For habit is not acquired as against laws of chemical combination, and no man can become habituated to doing that with impunity, which, being a violation of the physiological laws of his system, is, by its frequent admonitions of pain, notifying him of the evils about to overtake him.

"As the ration bill now stands, it presents us with too concentrated a form of diet for continued use. It abounds in fibrine, gluten, and fat, without, however, a sufficiency in starch, mucilage, gelatin, and acids. Aromatic herbs and spices, without which health can not for any length of time be preserved, particularly in hot climate or seasons, are entirely omitted, while fat pork, an article contra indicated in summer both by the state of the appetite and the physiological necessities of the system, stands as a sheet anchor of its animal food."

And of what avail was this prophetic warning? The ration table of the United States Army in the Spanish-American war was substantially the same as that during the rebellion.

From the dawn of history experience has shown that in time of war disease was a far more deadly foe to an army than the bullets of an enemy. In the war of the Crimea the French lost in killed 21,000, and from disease 100,000, or about 1 from bullets and wounds to 5 from disease. The English losses in that dreadful campaign ran a little higher, the proportion between fatalities from bullets and wounds and that from disease being 1 to 6.

In our civil war about the same proportions were maintained, 1 to 5. In round numbers, 100,000 men fell on the field or died from wounds, and 500,000 perished in hospital wards from the more fatal enemy, disease.

But it has been reserved for the Spanish-American war to cause a blush of shame and indignation at the apathy and stupidity which has permitted preventable diseases to play such havoc with the army. In the campaign, the actual hostilities of which lasted from July 1 to August 12, about six weeks, the mortality from bullets and wounds amounted to 268, while that from disease reached the appalling number of 3,862, or about 14 to 1. With proper subsistence and sanitation these proportions for such a short service should have been reversed.

With our military hospitals in the Philippines still crowded, despite the constant relief of their wards by shiploads returning on transports, and the decimating policy of irrationally subsisting the troops still in force, it behooves the United States to follow the example of England at the earliest possible moment and to resort to the only reasonable course left open for the maintenance of her army in the Orient, namely, the utilization of native troops. Most authorities agree that it will require a garrison of at least 40,000 men to maintain order in the Philippines, even after peace is declared, but I coincide with General Lawton, who told me that he thought it would require many more than that number to bring order out of chaos, to establish law in the various provinces, and to maintain its complete supremacy.

The United States now has 25 regiments of volunteers in the Philippines, whose term of service will expire on June 30, 1901. Most of the enlisted men will wish to return at the expiration of that time, some sooner, while some will be willing to serve longer. A majority of the commissioned officers would welcome the opportunity to retain their places permanently. I would suggest that at the earliest possible date such of the enlisted men, not exceeding one-third, as desire their discharge on account of sickness or for other causes be allowed to leave the service. Then from the third battalions of each regiment let all the enlisted men, excepting a few noncommissioned officers in each company, be transferred to the other two battalions, thus filling them to their full strength. Enlist one battalion of Chinese or of native friendly Filipinos (Macabebes or Ilocanos) to each regiment, making the composition of each regiment two battalions of white and one battalion of native troops, with white officers throughout, and a certain proportion of white noncommissioned officers in each native company. At such time as the authorities deem advisable, transform a second battalion of white to native troops in a similar manner. Then, when the proper time arrives, and the success of the move is demonstrated, transform the third battalion of each regiment, and, as circumstances may justify, replace such of the white noncommissioned officers as may seem best for the interests of the service by native noncommissioned officers, but keep white commissioned officers first, last, and all the time.

Published statistics recently furnished by Congress state that the cost of the army in the Philippines in the last year was about $150,000,000. It is easily within reason to declare that each fighting man costs the Government more than $1,000, gold, a year for pay, subsistence, cost of transportion service, and medical attendance, without any calculation for his future pension claim. The pay of the American soldier in the Philippines is $16, gold, a month. His ration costs far more, when the enormous wastage and cost of transportation is calculated. It is no uncommon incident for entire cargoes of beef to be lost in transportation across the Pacific. I know of three such instances last summer. And in calculating the cost of the American soldier, no mention has been made of the expenses of hospitals, with their medical staffs, nurses, orderlies, helpers, etc., all of which add enormously to the expenditure.

The native Chinaman or Filipino can be enlisted in unlimited numbers for $10 a month and can be subsisted for $4 more. Additional expenditures for transportation, etc., might cost $2 more, making a total of $16 a month, or not more than $200, gold, a year, or about one-fifth of our present expenditure, and with no danger from an everlasting pension claim in the future.

In an interview with Li Hung Chang, at his palace in Pekin, some months prior to the outbreak of hostilities in China, he assured me that China would interpose no objection to the enlistment of her subjects in the American Army. But if, in the present crisis, such recruits are not considered desirable, there are many friendly Filipinos to be substituted. Great Britain recruits her ranks from various tribes or castes in India, and tribal hatreds are often utilized in the pacification of outbreaks among the natives. The same

policy can be advantageously followed by us in the Philippines, where the friendly tribes of Ilocanos and Macabebes are the implacable foes of the rebellious Tagals.

England has a great advantage over the United States in colonial government and in colonial military affairs, in that there is not always a home party in opposition, wanting to apply the constitution to the natives, telling the discontents that as soon as their party gets control all complaints and wrongs will be rectified. The home Government acts as a unit and with a consistency that challenges the admiration of the world.

It remains to be seen whether by the liberal utilization of native troops we shall save the flower of our army for service at home, and preserve it from degrading conditions that, alas, too often are brought to this country by returning troops. And it also remains to be seen whether the country shall be spared the depletion of its Treasury through extravagant expenditures caused by improvident military administration leading to enormous pension claims. The Spanish war has resulted in the filing of over 25,000 of these claims already. Who can say what the number will be when those resulting from the Philippines campaign are recorded?

* * * * * * *

The foregoing article was written in China several months before the outbreak of the Boxer rebellion. That unexpected event afforded a rare opportunity for attesting the allegiance of the Chinese battalion and fully vindicated the claims I have advanced for the employment of native troops when officered by Englishmen or Americans. Let it not be forgotten that Liu Kung Tao, Lau Chau, and the old city of Wei Hai Wei, where the Chinese battalion was recruited, are located in the Shan Tung province, which was the very hotbed of the Boxer uprising. The following is an extract from my journal of a conversation with Colonel Bower in Tientsin on the 7th of March, 1901. Colonel Bower was at that time the imperial commissioner representing Great Britain in the government in Tientsin. Replying to my question regarding the battalion he said:

"No, there were practically no desertions from the battalion, although the men were subjected to terrible temptations. You know in China, parental love, Fung Shui, and ancestral worship are held as sacred tenets. When the Boxer movement was in its incipiency the families, priests, and friends of my men resorted to every persuasion and threat to induce them to desert, but without success. Finally they organized an attack and placed the fathers of my men in their front ranks, so that should the men shoot they would become parricides—guilty of the most heinous crime known in the Orient. But in the fight that followed, they cut their way through the 2,000 attacking Boxer rabble, killed many, and routed the remainder to the hills. Encouraged by this evidence of loyalty I took two of my three companies to Taku and joined General Seymour's column in its advance on Tientsin. In the fighting that followed from June 20 to July 14 the men did excellent work, losing in action 26 killed and 56 wounded. One officer was killed and 2 severely wounded. Fearing trouble, I ordered roll call every hour after reaching Tientsin. Two men were supposed to have deserted, but later investigations showed that 1 had been taken prisoner and the other was killed. The most remarkable thing that happened was with the company left at Wei Hai Wei.

"These men were so chagrined and disappointed at being left behind, and so determined to participate in the fighting, that almost the entire command deserted and fought their way through nearly 50 miles of hostile country to join their companions at Tientsin, where I kept them until active hostilities ceased. On returning to Wei Hai Wei, I shall renew recruiting and expect to largely increase the number of our Chinese force."

All the troops employed by Great Britain in the China relief expedition were Indian, most of them Gurkas, Sikhs, Beluchis, and Royal Bengal Lancers. Colonel Shone, who has long been an officer of the Royal Engineers in the imperial army of India, said to me:

"It would be quite impossible to maintain order in India without the employment of natives who can endure conditions in the Tropics which would soon annihilate white troops. England has found it advisable to keep an army of 75,000 British troops with 150,000 natives for her protection there. Too many of one tribe should not be employed in one locality; at least one-third should be white troops. Had this precaution been observed there never would have been a Sepoy rebellion or an Indian mutiny."

In the report of Adjutant-General Corbin, published to-day, it is asserted that if it is decided that General Chaffee's forces shall not be reduced, 20,000 new recruits will be necessary to replace those leaving the Philippines through expiration of time of service between now and July, 1902. As reenlistments in the American Army are now comparatively rare, owing to the abolition of the canteen and the hardships of tropical service, this force must practically be drawn from new blood, recruits, none of whom have been acclimated to tropical conditions. As the figures given in the Adjutant-General's report show that in the Philippines about five men die from disease for one who falls in battle, and that the casualties there have already amounted to 3,493, to say nothing of the enormous number invalided home to swell the pension rolls, it remains to be seen how much longer the American people will submit to this unnecessary waste of our home material when native force can be equally well substituted.

NEW YORK, *October 18, 1901.*

Mr. SAMUEL W. SMITH. Mr. Chairman, in the brief time allowed me I desire to call attention, in connection with this the fifty-eighth section of the bill, to the urgent necessity and advisability of the passage of some legislation that will give to the people of the Philippine Islands a stable and sound currency, and I will do so by reading a portion of a letter from a teacher in the Philippine Islands, which letter was recently forwarded to me by one of my constituents, and I have no doubt that it reflects the true condition of affairs there respecting this subject. He says, under date of April 23, 1902:

Our checks are made to us in Mexican currency. The Department fixes a ratio every quarter for the following three months—for instance, at $2.10. During that quarter the legal ratio goes to $2.30 or $2.40, as it is now, and we have to lose, you see, 20 or 30 cents on every $2.10 Mexican. It is a steal. We were hired at a fixed salary in gold and are then paid in Mexican (meaning, of course, in Mexican money).

This month I am paid $174.30 Mexican, at the ratio of $2.10, but the legal ratio in the bank is $2.40, at which rate I should get $199.20 Mexican (which equals $83.33 gold), thereby losing $24.90 Mexican, which equals $10.30 gold. That reduces my salary from $83.33 to $73 for this month. Is that justice? The Department says that the ratio may change and run back and then we should gain, but if we did we would have to keep our money until that time, and what would we live on or what would we send home?

In January the ratio was $2.10 (Mexican to $1 gold), and we were paid at $2.10, losing nothing. In February the ratio was $2.17, causing us to lose 7 cents on $2.10 Mexican, equal to $5.12 on our month's salary. By the time we got our March check (also at ratio of $2.10) the legal ratio had gone to $2.40, causing a loss, as I said, of $24.90 Mexican, or $10.30 gold. But this is the end of the quarter. I hope my April check will be at a different ratio. Indeed, I have just learned that the ratio for April, May, and June will be $2.27 Mexican for $1 gold. That's it, draw our salary at the bank at $2.27 and stand right in our tracks and pay it back at ratio of $2.40 to get gold, losing 13 cents on each $2.27 Mexican; and yet we were hired by the Government for a fixed salary gold.

What's the matter with Congress? Are they all asleep in America? It is hard enough to come over here and help make this country without having the Government take from us what justly belongs to us after we get here. God knows we don't get any too much salary when we get what was promised us; it takes it all to live here, and we don't have the kind of living you get in America, either.

How much this reminds us of the stories told us by our fathers, and doubtless well known by some members of the House, of the days of wild-cat money in this country. I see no reason why we should not give to the people of the Philippine Islands a sound currency, such a currency as we have, the best in all the world, or one equally as good.

I also avail myself of the opportunity to insert in the RECORD at this time a letter from James A. Le Roy, private secretary to Commissioner Dean C. Worcester, who has been in the islands for two years or more and is perfectly competent and qualified to speak. Mr. Le Roy has already contributed to various magazines, some of which may be found in the Independent, July 4, 1901, entitled "Civil government in the Philippines;" July 11, 1901, "The real Aguinaldo;" August 22, 1901, "Home rule in the Philippines;" October 10, 1901, "Higher administration in the Philippines;" November 14, 1901, "The Manila bishops' pastoral;" November 28, 1901, "The greatest of Filipinos;" also in The Islander for April, 1902, "The Chinese in the Philippines."

It may serve to correct some misstatements of Sixto Lopez which recently appeared in a distinguished Senator's speech.

PONTIAC, MICH., *June 14, 1902.*

Hon. SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: On pages 6643-6647 of the CONGRESSIONAL RECORD for this session there was published a series of answers made by Señor Sixto Lopez to questions stated to have been propounded by Senator CARMACK. These answers, though made in a somewhat more careful manner than various other communications bearing Señor Lopez's signature (hence supposedly prepared by him), are nevertheless glaringly incorrect in many respects.

These inaccuracies usually consist of glittering general statements, with no attempt to bolster up the statements by concrete facts or examples. All such must stand, then, as merely the opinion of Señor Lopez; and it should be noted that he has not been in the Philippine Islands for at least seven years. He was certainly not there during the revolt against Spain; nor has he been there since American occupation began. By some Filipinos I have been told that he has been absent for ten years. Again, Señor Regidor, the Filipino in London whom Señor Lopez sometimes quotes, has not been in the Philippine Islands for thirty years. Señor Lopez himself went to Hongkong last fall, and through third parties tried to get assurances that he would be welcome in Manila. He was assured that he was free to enter if he would, on entering, take an oath not to incite to rebellion against the constituted government there, and he chose to stay out.

With this qualification, Señor Lopez's opinions about the state of affairs in his own country may be taken for what they are worth. Those exceptional cases where he assumes to state facts, or give concrete examples to support his opinions, may well be called to notice.

First, Señor Lopez says: "I have been working for twelve years in order to secure the independence of the Philippines." It would be interesting to have him quote to us, from any publication of Manila, Madrid, or elsewhere, between the years 1890 and 1897, any argument, declaration, or what not of his, over his own name, in which he advocated such independence.

Señor Lopez has, I understand, claimed some of the glory justly accorded to José Rizal, a martyr in very truth, and a genius justly admired by his people; at least, Señor Lopez has, at various times, declared that he was a coworker with Rizal, and has intimated that he as good as inherited the mantle of Rizal. Is he not aware that Rizal never advocated the independence of his people from Spain; that his great novels were written primarily to point out to his own people their defects and to teach them the salutary and necessary lesson that in order to obtain the full measure of modern political, social, and economic freedom they must first earn and deserve that freedom?

Scathing as were Rizal's exposures of the defects of Spain's civilian and friar-ridden institutions, the larger lesson to his people stands out clearly in his books. He did not believe his people yet ready to stand alone, and what he preached to them was the need for an educational and moral awakening. To his dying hour he protested, and truthfully, that he had never been connected with the propaganda of revolution against Spain. Six months before he was executed he was accorded permission, at his own request, to go to Cuba and act as volunteer surgeon in the Spanish army then operating (1896) against the insurgents in that island. He did this to prove his loyalty to Spanish sovereignty, and in sending him on to Spain from Manila Governor-General Ramon Blanco wrote a letter commending him to the Spanish minister of foreign affairs, Marcelo de Azcárraga, in which he said (Manila, August 30, 1896):

"His conduct during the four years that he has lived in deportation in Dapitan (Mindanao) has been exemplary; and he is, in my judgment, so much the more worthy of pardon and benevolence that he is shown to be in no way complicated in the plotting we are these days lamenting here. Neither is he in any conspiracy or any of the secret societies they have been getting up."

Writing to his German friend, Dr. Blumentritt, while on his way to Spain, and thence to Cuba, September, 1896, Rizal speaks of having, during his wait at Manila for a steamer to Spain, remained on board a Spanish cruiser in Manila Bay, at his own request, that he might not be charged with a share in the uprising then being planned. He adds:

"During this period of time there happened the serious disturbances in Manila—disturbances *which I lament* [not his italics], but which serve to show that I am not the one responsible for upsetting things."

And again, writing to Dr. Blumentritt, on December 26, 1896, the night before he was shot, Rizal says: "To-morrow at 7 I shall be shot, but I am innocent of the crime of rebellion."

It would seem, therefore, that Señor Lopez had already in 1890, according to his statement of to-day, gone far beyond the position of Rizal.

Señor Lopez furnishes us with a list of 65 Filipinos, classified as "statesmen," "soldiers," "merchants," and "professional men," who, he says, should be summoned to testify as to the desires of his people.

The list is such as perhaps might have been expected from one out of intimate touch with affairs at home for more or less than a decade. It contains a number of obscure men, several who are absent from the islands (and not at Guam, either), with a fair number of representative men, while it omits some of the most intelligent and representative Filipinos now in the islands. Señor Lopez says all those whom he names are "opposed to the present policy," but I personally know that at least 26 of the 65 are not so in opposition. He enrolls among our "opponents," for instance, Chief Justice Cayetano S. Arellaño, who has actively cooperated with the American authorities since early in 1899, who has made speeches in favor of our governmental programme all over the archipelago, and who, for one thing, induced Aguinaldo to take the oath of allegiance.

Señor Lopez's ethnological figures are open to serious questioning. Of an assumed Philippine population of 10,000,000, he thinks 9,000,000 to 9,500,000 are "homogeneous," i. e., supposedly, are Christianized and live in the settled towns of the civilized provinces. These people are usually called the "Filipinos proper." The usual estimate of their number is 6,000,000 to 7,000,000. At any rate, Señor Lopez is very far wrong in saying that a total of half a million or less would include all the Moros, Igorrotes, Negritos, and wild people generally of the Philippine Islands. There may be 500,000 Moros in the single Lake Lanao region of Mindanao, and there are in all from 750,000 to 1,500,000 Moros in the southern part of the archipelago.

There are from 200,000 to 500,000 non-Moro wild people in Mindanao, the hill tribes, Indonesians, so called. It is by no means safe to assign figures of less than half a million for the Igorrotes and kindred tribes in northern Luzon and the various wild peoples in Mindoro, Palawan, Samar, and other islands.

Where did Señor Lopez get his authority for saying "the Moros have signified their willingness to join with the Filipinos in forming a government?" In the Moro country the dato is supreme ruler, for life or death, of those called his followers; and a compact with Moros is therefore of necessity, a compact with datos?

What dato or datos ever expressed a "willingness to join" with the Filipino revolutionary government? And if one, two, or three ever should, as might be possible (if promises of "something in it" were held out to them), that would imply nothing beyond the acquiescence of their few hundreds or few thousands apiece of followers. There is almost nothing in common between Moros and Filipinos—not language, nor customs, nor religion, nor laws, nor ways of life—and only to a degree have both a common racial origin, as anyone knows who knows anything about the matter.

Authority shall be given for the statement: "Even the Moros of Mindanao and the Igorrotes, who had never been subdued by Spain, acclaimed Aguinaldo and were prepared to recognize his government." At Cottabatto, Mindanao, the Moros slaughtered the men who claimed to represent Aguinaldo in the formation of a branch of the insurgent government. At Dávao, Mindanao, there had been considerable trouble between Moros and Filipinos, and the safety of the town was threatened by the Moros when our troops arrived and restored order. At Zamboanga, the other point in Mindanao where Moros and representatives of the Malolos government came into contact after the withdrawal of Spanish troops, Dato Mañdi repeatedly tried, before the arrival of American soldiers, to get the authority of the American naval officer in the harbor to sack the town in our behalf and take the heads of the Filipino leaders.

So much for Moro "cooperation" in Mindanao. As to the Igorrotes, the sturdy mountaineers of north central Luzon, Spain had not done much for them, it is true, but she had sent Ilocano officeholders from the lowlands among them, and they, cowed by show of firearms, were wont to yield tribute of forced labor, with no pay, when called on, except in the remoter mountain fastnesses, where Spaniards never penetrated and where head hunting was the rule between tribes. Somebody at Malolos conceived the idea of sending Ilocano emissaries among the Igorrotes of Bontoc and Lepanto and ordering them down to Aguinaldo's headquarters, where it was represented high honors would be paid them and they could take all the cowardly American heads they wished with their spears and head axes.

They came, willy nilly, at the bidding of their Ilocano domineerers—children of the hills and forests, a little band of a few score nearly naked savages, never having heard of the Americans, only knowing that they were white skins, like the hated Spaniards. In order that the news might go out to the world that poor, liberty-loving people had fought us with spears and shields, they were placed in the van of Filipino defense when the American forces first marched north from Manila. In the same way, when the insurgents tried to surprise the American garrison in Iba, Zambales Province, one night in 1899, with their rifles they drove in ahead of them a wretched band of the unclad dwarfs, the Negritos, punily brandishing their bows and arrows and terrified by the American bullets.

It is not meant to insinuate that there were not men of capability and sense connected with the Malolos undertaking, but these instances reveal the presence there of some harebrains, who thought thus to secure sympathy and help from the outside world, while at the same time other Filipinos of the same stamp were assuring their people at home that a half dozen European nations, more or less, were about to intervene for Philippine independence; and Señor Lopez's former chief, Agoncillo, was trying to make it appear to Mabini that he was worth his cost by writing from Germany that he had seen the minister of foreign affairs in Berlin and was soon to be accorded an interview with the German Emperor.

This handful of undeceived Igorrotes had speedily discovered that there were rifles in the American camp, and men who knew how to use them, and, when permitted, they made for their mountain homes as fast as their legs would carry them. To-day they know the Americans, and are good friends of ours, and a year and a half ago one of their leaders (who will sometimes admit, with hanging head, that he went down to Aguinaldo's camp) came down to Manila to ask for an American flag and an American school in his Bontoc community. His people now have both.

There was somewhat similar "cooperation" on the part of the peaceful agricultural Igorrotes of Benguet Province. It had been hoped to make the Benguet Mountains another Biacna Bato when our troops should drive the insurgents north, and a gun foundry was to be located halfway up the difficult trail leading into Benguet. Here, at Sablan, Benguet, one may see today half a dozen big church bells, taken from the towns on the coast, a boiler, and part of an old lathe. The Benguet Igorrotes were forced to drag these heavy things 10 miles up this trail, which tires the unencumbered traveler with horse.

Their labor was forced and without pay, for they were under the thumb of their Ilocano taskmasters. There was no talk about "consent of the governed" for these peaceful Igorrotes. Their towns were all given a paper organization under the Malolos government, and the offices were held by Ilocanos. To-day the Igorrote settlements of Benguet are under American Government, officered entirely by Igorrotes, except for the town secretaries, who are Ilocanos, as no Igorrotes can read and write. We have American teachers at work with youngsters, and I saw one school of these breechclouted semisavages where, in two weeks' time, several of the brightest youngsters had learned to read words, and even simple sentences out of a primer. So much for the difference between 1898 and 1901.

In his efforts to sustain his assertion that the Christianized population, the Filipinos proper, though called Tagalogs, Visayans, Bicols, Ilocanos, Cagayanes, Pangasinanes, and Pampangas, are really more homogeneous than the people of the various 45 States of our country, Señor Lopez has been led into strange statements.

First, he remarks that there was not, under Spanish domination, a case of intertribal warfare. Strictly speaking, that is so, since the time when Spain had made good her authority in all but the mountains and the Moro regions, and the friars had converted all these lowlanders to Christianity. Prior to this time the people were, almost everywhere, but somewhat scattered bands, under petty chiefs, varying in importance and power.

I am not one of those who carelessly asserts that the Filipinos were savages when the Spaniards came, for what little valid historical evidence we have does not bear out this view, but certainly the "pueblo" life of to-day, in almost all its features, is an outgrowth of conditions created by Spanish occupation. Prior to the time when the new force of military authority and of the missionaries was felt there was intertribal and intercommunity warfare in plenty, so far as the evidence goes to show anything as to these antehistorical times in the Philippines. And the Spanish rulers did not seem to have trouble in enlisting Filipinos of one dialect or tribe to fight those of another, or keep order among them.

Señor Lopez is horrified that the American authorities should have enlisted as scouts Macabebes "and some others." There are Ilocanos, there are Tagalogs, there are Visayans enlisted under our flag, and there is no trouble whatever in getting all the recruits wanted, in spite of the "unanimous desire for independence." Furthermore, these men are not looked upon by their people as Benedict Arnolds, as Señor Lopez would have us believe. My observation has been that they were usually envied by their fellows among the young men and that the unmarried among them could almost have their pick among the girls of their set. So differently do things go from what one who reasons about them from a distance of 10,000 miles sometimes thinks they should go! Similarly, those comparatively few Filipinos yet under compulsion as prisoners of war, awaiting the final proclamation of peace, have grown in Señor Lopez's overworked mind into many thousands.

To make a case for homogeneity Señor Lopez must minimize the difference in the languages of the Filipinos. He makes the other six dialects of the civilized peoples (treating the Visayan incorrectly as one) all derivable historically from the Tagalog. Of course, the truth is that the Tagalog and all the others are variations from a common Malay stock language, which had Sanscrit and Arabic, perhaps also other, influences worked into it. They are decidedly similar, of course, and yet different enough so that the Tagalog who knows no Spanish can not hold conversation with the Visayan, the Bicol, the Pampangan, the Pangasinan, or the Ilocano.

It should be borne in mind that the average Filipino's vocabulary (excluding now the educated classes who speak Spanish to each other) contains only from 300 to 600 words. Being born, living, and dying right where their fathers did, as in the past they almost always did, with very little or no going about, these masses have developed many colloquialisms, so that even a Tagalog, when too far removed from his particular communities, might not be able to understand all another Tagalog's ideas. This last is a rather extreme case, but I have known it to happen among the least educated.

Señor Lopez has carefully selected 31 words which are very similar in Tagalog and Visayan. To be worth while for comparison, we should have the 400 or so words which make up the language of the average man of the masses in the Tagalog province of Cavite and his compeer in the Visayan province of Iloilo, and it would readily appear how far apart the two men would be from understanding each other, except for a few of the commonest wants of life. And Señor Lopez has neglected to tell us that the Visayan commonly spoken in Panay has many differences from that spoken in Cebu and again from that spoken in Leyte.

Perhaps I am overbold in thus stating facts, for Señor Lopez has "challenged disproof" of his statements calculated to establish a common language for all the Filipinos. The facts I state here are, however, of the sort necessary to the most fundamental knowledge of these Malay dialects, and can be very readily verified.

Señor Lopez, speaking of there being representatives of the various tribes in the colleges of Manila, says, "Although there is considerable rivalry among the students, the rivalry is not between Visayans, Tagals, Bicols, etc." Again, he is out of touch with the facts existent to-day in Manila. And but twenty-five years ago—I have it on the authority of no less a man than Chief Justice Arellano himself—Tagalogs and Visayans, Ilocanos and Bicols, used to clash in fights in the halls of the oversleepy friar "university" of Manila.

It is very true that these tribal lines can be and have been magnified in importance. In physical appearance, in religion, in most of the ordinary customs of life, Tagalogs, Visayans, Ilocanos, etc., are quite the same. The greatest charge, perhaps, to be brought against the uneconomic civil measures of the Spanish Government, side by side with the mediæval influence of the friars, was that this whole system operated to keep the Filipinos from being and from feeling themselves to be a people; it kept them provincial, and the mass of them villagers in knowledge and in sympathies, while only the few rose above these unnatural barriers and gained the vision of nationality.

It may seem ridiculous that, with the really slight fundamental differences between tribes, they should not to-day be a people, but the fact is that they are not. And the language barrier is the greatest of all, now that uneconomic restrictions to trade and communication between provinces have been swept away by the application of the American principle of freedom of intercourse. That is why every effort is being made to give them a common language—the English. That is just one great difference between Spanish and American government. We want the spirit of nationality and unity to grow, with growing trade and better means of communication. Spain wanted to, and did, squelch almost all tendencies toward unity and nationality.

Señor Lopez is, at least, not entirely ingenuous in dealing with the question as to the state of education of his people. He once gave to the American people statistics to prove that the people of Batangas province are more literate than those of Massachusetts; he has not yet given us the authority for the figures which seemed to prove his case. Now he says 30 per cent of the Filipinos speak Spanish; almost all of them speak a few Spanish words—yes, and more than 30 per cent could understand the simple commands given to servants in Spanish—but not 10 per cent of Filipinos are educated in Spanish so as to speak and read it fluently, this according to all estimates yet made by competent authorities.

But, says Señor Lopez, 75 per cent of the people can read and write in their own dialect. True; but of what avail is it to be able to read if one has nothing which he can read, and of what use to be able to write if one but rarely has a chance to communicate? This respect for the ability to read and write, however, and the craving for something to read in their dialect are among the most encouraging signs for the Filipino masses. With what can the Tagalog, for instance, now satisfy this craving if he does not read Spanish?

Search Manila over, and you will find printed in Tagalog only the catechism, a few church books entitled "Models of Conduct," etc., almanacs, and now and then "Cinderella" and other fairy tales put over into the dialect years ago; no histories available, no Bible, no stories of a modern sort, no literature at all, in fact, according to our way of thinking.

There is a little Tagalog daily newspaper in Manila, but out in the provinces the great mass of the people have access to nothing of that sort. Suppose the average man does read, then, except by hearsay, he knows nothing of the world outside his own town. Mere ability to read and write does not constitute education. Señor Lopez tells of the Filipinos being able to read and write in their modified Arabic script before the Spaniards came. True, but they had no literature, and to-day we can not go back of the Spanish conquest except by traditions and a few curious old documents.

He says, "The Filipinos have opened elementary schools in every village. They have also founded high schools and university colleges throughout the archipelago, and a university, two large normals for male and female teachers, and five large schools for women in Manila." Surely Señor Lopez does not mean to state the Filipinos individually or by cooperation, and not the Spanish authorities, founded these institutions, while the grievance of the Filipinos, as they came to see their own needs, lay in the facts that these institutions were very far from sufficient for their needs and that they were deficient and monastic in methods.

He knows, of course, that the Dominican friar who was at the head of the so-called "university" in Manila was, ex officio, a sort of superintendent of public instruction for the archipelago, and that the Spanish decree of 1872 secularizing public instruction in the islands was never really carried into effect. One of the avowed grievances of the Filipinos was the absolute friar control of their means of education; hence it seems somewhat disingenuous for Señor Lopez to give us the inference that the Filipinos of themselves created, maintained, and managed their schools and colleges.

He speaks of "an educational institution (purely Filipino) granting scholarships which enabled the winners to study in Europe." He should also, in fairness, have told us how many Filipinos have ever had the benefit of this commendable undertaking, now being laudably carried on by the International Club of Manila (mostly Filipinos), which sends one or two young men every year to be educated in the United States.

Señor Lopez can also find little good in the sending of 1,000 American teachers to the Philippines, for he says: "There are thousands of capable teachers in the islands. We have had for the last thirty or forty years two large normal schools in Manila, and we are capable of conducting our own educational affairs." In this respect he differs from the majority of these same teachers, who realize their incompetence and crowd eagerly into the American normal courses during the vacation and take advantage of the cooperation and instruction of the American teachers day by day during the school year. Señor Lopez ought to give us the curriculum of these normal schools of which he talks grandiloquently.

The education of the teachers who graduated from them was, in most respects, not equal to that of an American youth who quits at the fifth or sixth grade. The text-book they employed in teaching the young Filipinos, in the latest form before American occupation, contained religion and morals, grammar, arithmetic, six pages of geometry, geography, history, deportment, one page each of botany, chemistry, and zoology; agriculture and orthography—all in 240 badly-printed 16mo. pages. Much of this, truly a "compendium of knowledge," was never touched upon, through the lack of familiarity with it on the part of the teacher or because the friar, who was school overseer in each parish, forbade it. This prohibition lay particularly against that part of the text-book which conveyed, and poorly enough, too, a little instruction in the grammar of the Spanish language.

Señor Lopez complains of the present government of the Philippines being a costly one; that the Schurman Commission's promise of lower taxes has not been carried out, and that the land tax is calculated to be oppressive and to force Filipinos to sell their land to foreigners.

Under the Spanish fiscal system the chief burdens in supporting government fell upon the poor man, through the cedula tax, which was applied directly, and the various forms of industrial or internal-revenue taxation, which bore principally on the great commodities of the people and not on luxuries. The wealthy landowner had no special contribution to make as such.

Under American government American principles of taxation have been introduced. With a full year's notice given, the direct tax on land is this year to be applied, the proceeds to go—the seven-eighths part—to the municipal and provincial governments themselves, and one-fourth of them to go to the municipal schools. The ordinary workingman is paying a cedula tax of $1 Mexican, as compared with $2.50 Mexican formerly. The more oppressive forms of industrial taxation have been done away with. The customs tariff provides a uniform levy of 15 per cent, for purposes of revenue, on the ordinary commodities that must be imported. Articles like diamonds, which formerly were assessed lightly, must now pay 25 per cent, and thence upward.

There is, of course, grumbling against the land tax on the part of some wealthy owners of estates who have in the past escaped their fair share of taxation. The Lopez family, including Señor Sixto Lopez and his brothers, are, if not the family owning the largest estates in Batangas, at least among the very largest landowners of that province.

Very respectfully, JAMES A. LE ROY.

I will also submit a further statement from Mr. Le Roy, which includes some instructions that have never before been published, and I desire to call especial attention to the first paragraph of "antecedent data:"

Early in January, 1899, when the situation was becoming critical in Manila, General Otis, in pursuance of his instructions to take every means for the avoidance of armed conflict with the Filipinos, under the nominal leadership of Aguinaldo, indicated to the latter through a third party the desirability of establishing a modus vivendi for their troops. President McKinley was then about to name a commission of civilians to proceed to the islands and associate themselves with Admiral Dewey and General Otis in ascertaining conditions, making recommendations as to the course to be pursued when the treaty of Paris should be ratified, and, by conference with representative Filipinos of all classes and factions, making a start toward permanent good relations with the natives of the islands.

The treaty not having been ratified, American authority extended only to Manila Bay and the city and its immediate environs. The actual conditions were: Our soldiers penned up in the city, responsible to foreign nations, to the citizens, natives and otherwise, and to our own honor for public order; while outside there surrounded them a cordon of Filipino soldiery, whose hostile attitude was daily becoming more evident, who were threatening and planning uprisings and burnings in the city itself, and who, by long and uninterrupted boasting, had come to believe that the American Army would be easy for them to annihilate. Regardless of all past relationships, of theoretical questions as to the rights or wrongs of the case—laying these considerations aside for the moment—these were the actual facts of the situation in January, 1899.

Naturally, the American commander, receiving almost daily cautions against provoking—nay, if possible, permitting at all—an outbreak and an appeal to arms, was desirous of arriving at some sort of modus vivendi which would permit the treaty to be acted on at Washington, the Commissioners of the President to arrive with their instructions, and something approaching a definite policy to be arrived at. Under the circumstances, he could not have been otherwise than anxious to meet Aguinaldo in a concilia tory spirit and to patch up some terms under which, for the time at least, hostilities would be averted.

In what temper did Aguinaldo meet these advances—or, rather, Aguinaldo's coterie of advisers? For Aguinaldo himself was never trusted to handle such a situation single handed; his name might be signed to papers and negotiations, but that was all he ever did in connection with them.

In this case it was "Chief Adviser" Mabini who handled the matter. The invitation was to send commissioners to treat with an equal number of representatives of General Otis in a purely informal way and make some purely temporary terms, to be backed by the authority simply of the two generals, as commanders of their forces. Mabini at once twists this informal invitation, sent through a civilian of Manila, into a chance for the exercise of subtility rather than frankness. He sends down to Manila Señors Florentino Torres and Manuel Arguelles, loaded with carefully prepared formal instructions and commissioned as representatives of the "revolutionary government of the islands," to treat with the "American government of occupation," signing their credentials himself as "President of the council." Their instructions, which will be given in full later on, and which are of importance for another reason, hint at the provisional recognition of Filipino independence (which he had privately made for them a sine qua non) and require the securing from General Otis of a promise for a final "treaty" between the "two governments."

This was the disingenuous way in which Mabini met this invitation to a conference to temporarily avert bloodshed. Knowing full well that the American general had no such authority, and that the American Government was not in position to make such terms if it wished until the treaty of Paris had been ratified, he only wished to trap General Otis into seeming to recognize representatives of Aguinaldo as official commissioners of the "revolutionary government," in order afterwards to say: "Here was another promise of our independence."

That this view of the case does no injustice to the shrewd Mabini is shown by the subsequent private correspondence between the president of council and the Filipino commissioners at Washington. To resume briefly:

These first instructions were given to them, and they were dispatched to Manila from Malolos on January 5, 1899. The next day they informed Mabini that they could not treat as "commissioners of the revolutionary government," and inclosed a note, furnished through the third party, signed by General Otis, saying that, "as general in command of the Army of the United States in the Philippines, he would nominate representatives to confer with an equal number named by General Aguinaldo, and also that he would be pleased to receive, at any time, representative Filipinos of character and influence." This was plainly all that General Otis had authority to do.

Mabini demurs at first, in his reply of January 7, that "if Aguinaldo sends representatives as a simple general he does not represent the people. Aguinaldo can only solve questions of present moment as chief of the government, not as chief of the army"—whatever he may have meant by this.

Aguinaldo's representatives repeat the refusal of General Otis to recognize the "revolutionary government," and add their own arguments as to why he could not go beyond this, urging that Mabini yield, in their telegraphic reply of January 7. Whereupon Mabini yielded, as he had expected all along to do, and on January 9 signed authority for three representatives of Aguinaldo as general—Señors Florentino Torres, Ambrosio Flores, and Manuel Arguelles—to meet three representatives of General Otis." As he put it in his handwriting, though signed this time by Aguinaldo, they were appointed "in order that, in accordance with the instructions already given them, they should negotiate with the commissioners named by Maj. Gen. E. S. Otis, commander in chief of the American forces, the bases of a provisional agreement to assure peace and amity between the said forces and the Filipino people until the establishment of a final agreement between the governments of both nations."

The American officers who represented General Otis in the conferences that ensued were Brig. Gen. R. P. Hughes, Brig. Gen. James F. Smith, and Col. E. H. Crowder. Only in part have the details of their conferences, lasting up to January 31, 1899, been made public, and it is not to the purpose to enter into them at this point. Suffice it to say that, at every turn, no matter how evident was the desire of the three Filipino commissioners to meet the American propositions fairly and to answer the questions which the latter propounded to them as to how they could possibly maintain an independent national existence, they were handicapped in their efforts at frankness by the hidebound instructions of Mabini that they must worm from these Americans some sort of recognition, if only halfway, of the revolutionary government.

When their meetings were for the second time on the point of breaking up, because the American commissioners had to state frankly that this matter of permanent status was not one on which they had any power whatever to treat—a fact expressly understood in the beginning—then Mabini, to whom the three Filipinos had, in despair, resorted for further instructions, while he still iterates and reiterates that they must stipulate for an agreement with the "revolutionary government," nevertheless adds a note (January 11, 1899) to his roundabout phrases, saying: "I expect that you gentlemen will be successful in this difficult undertaking, understanding well that in case no further session is announced we should be much prejudiced by that fact." In other words, "It is not yet time to break squarely with them. We must strengthen our public case, and can not afford to seem to have rejected a fair chance at negotiation and peaceful settlement."

Interesting sidelights on the twistings and turnings of the subtile Mabini may be obtained from the perplexing and shifting instructions he sent down to the Filipino commissioners at Manila during the latter part of January, 1899. The above statements only contain the gist of the matter, obtained from private documents still, for the most part, in the hands of private citizens of the Philippines. It is, however, well worth while to present in full the first set of instructions, those made out by Mabini at Malolos on January 5, 1899. The translation here presented is obtained from private sources, but a copy in Spanish of the original document, which is in Mabini's handwriting, is, I believe, on file in the War Department. The translation reads as follows:

[Presidency of the revolutionary government of the Philippines. Instructions to be observed by the commissioners, Señors Florentino Torres and Manuel Arguelles, under which they are to treat, in the name of the revolutionary government of the islands, with the American Government of occupation in Manila as to the bases for arriving at a provisional treaty to maintain the good relations which ought to exist between the two governments until the definite treaty be formulated and approved.]

ANTECEDENT DATA.

First. The chief of the Philippine people has not made any agreement with the Government of the United States, but, inspired by the same ideal of destroying the sovereignty of Spain in these islands, they have mutually assisted each other.

Second. In spite of the sacrifices made by the revolutionary army, the American general committed, when taking Manila, the injustice of not allowing a share in the triumph to those who were, though only "de facto,"

his allies, while it is public and notorious that the prompt surrender of the city was particularly due to the valor, bravery, and constancy of the beleaguering revolutionary army. That, after this, conflicts occurred between the allied forces, which, though settled in a friendly manner, gave rise to the subsequent manifestations of distrust.

Third. The cities of Iloilo and Cebu having been surrendered by the Spanish generals to the revolutionary chiefs, and, while the greatest order reigns in them, the Americans desire to occupy them in a friendly manner, if possible; and if not, by main force, as is set forth in an official telegram published in one of the newspapers of Manila, going to the extreme of intimating to the revolutionary chiefs by means of an ultimatum the surrender of the cities, especially that of Iloilo, for as regards that of Cebu there is so far no trustworthy news. This the revolutionary chiefs refused.

In consequence of this and in view of the mobilization of American troops to reenforce the independent brigade destined to occupy the Visayan Islands, the President, in accord with the council of secretaries, has considered it convenient to appoint a commission composed of said Señors Torres and Arguelles, with such confidential interpreters as they may select for the object above indicated, subjecting themselves, for that end, to the following instructions:

First. That they manifest to the government of occupation that the Philippine people desire to live in complete peace and harmony with the great American people, as they understand the necessity of its protection and will never forget that it was the first champion of the peoples oppressed by the bad Spanish Government, to which end the revolutionary government will take the necessary steps.

Second. In its consequence, that they will supplicate from said government of occupation the maintenance of the "statu quo" until the conclusion of a formal agreement between both Governments, as the Filipinos of the island of Luzon could not look with indifference upon the dismemberment of their territory in the Visayan Islands, and, wounded in their patriotism, will perhaps not be able to suffer the foreign invasion of their territory. So much more so as the invaders of to-day have been the allies of late, who, by manifestoes and proclamations, have assured the people that they had not come to make war against the Filipinos but to liberate them from the Spanish dominion.

Third. That with a view to the indicated aim of maintaining the "statu quo" as regards the armed action of the government of occupation, as well as in order to initiate the provisional treaty that is to improve the relations of both Governments, the basis be agreed upon, founded on the strictest justice, equity, and reciprocity, which basis, once ratified by both parties, will be developed by means of commissioners within a short term.

Malolos, January 4, 1899.

The president of the council.

MABINI.

The first clause of the above is of course the particularly pertinent one, containing thus a categorical denial, on the part of Mabini for Aguinaldo as late as January, 1899, of there ever having been any alliance of formal agreement with the American authorities. This becomes more important when the private, purely private, character of these instructions is considered. In the second paragraph, as if to emphasize it, he speaks of the Americans as allies, but only "de facto" allies. This at once shows that Aguinaldo, Mabini, et al. were not in the least deceived by a belief that an American consul at Singapore or at Hongkong, or even an American admiral, could bind the people of the United States and their Government to any course by their own action alone.

[If the translation be called into question, here is the Spanish of this paragraph relative to "The chief of the Philippine people," etc.:

"ANTECEDENTES.

"El Jefe del pueblo Filipino no tiene celebrado contrato alguno con el Gobierno de los Estados Unidos; sino que movidos por un mismo ideal de abatir la Soberanía de España en estas Islas, se ayudaron mútuamente."]

As to the three commissioners who came in for Aguinaldo. Señor Torres severed his connection with the Malolos government and came into Manila when they declared for war on us. He was attorney-general after the reorganization of the courts under the American military government, and is now a judge of the Philippine supreme court under the American civil government. Señor Ambrosio Flores retained his commission as general in the insurgent army and fought fairly and well until the war had degenerated into mere guerrillaism and assassination, when he gave it up, afterwards taking the oath of allegiance to the United States. Unlike some other such leaders who had the great chances to prey on his people which his command gave him, he did not emerge from the war a rich man, but was, in Manila in 1900, quite dependent upon the mercy of his friends. He was active in the organization of the Federal party; was appointed governor of Rizal Province, which adjoins the city of Manila, by the Commission, and in February last was reelected to that office.

Señor Manuel Arguelles, who was converted to the American side by the arguments which he heard at Manila on this occasion, was foolish enough to frankly state his views as to the interests of the Filipinos lying in the line of cooperation with the Americans after he got back to the insurgent headquarters. For this General Luna promptly clapped him into jail, where he was kept, without charge or trial, for some months, being furnished with a revolver at one time and cautioned that he would best commit suicide. He did not; was finally released at the approach of the Americans, and has since been an active "Americanista" in Manila. He was prominent in the formation of the Federal party.

When Isabelo de los Reyes, the same half-caste who has returned to Manila, taken the oath not to incite to rebellion against present government, and is at the present time engaged in promoting strikes of all the laborers in Manila for the purpose of embarrassing the government and sowing discontent—when this Ilocano half-caste, de los Reyes, was in Madrid, running a junta paper, called Philippines Before Europe, with revolutionary funds, he was loud in his denunciation of everything done by the Americans in Manila and the islands. There was one notable exception, however. In 1900 the decision of a Filipino judge in the Tondo district of Manila deprived him of the right of disposal of a house which he claimed as his property in that district.

Touched in his pocket, de los Reyes promptly discovered that the great need of the Philippines was for American judges and a reform of the old laws and old system of procedure. He gave up a large part of the issue of his revolutionary paper of September 25, 1900, to an "exposé" of this abuse committed against his pocketbook and proceeded to lecture the American authorities as to their duties in the matter of reforming the judiciary, sending marked copies to each member of the Taft Commission. He remarked, quite truthfully, "The Yankees are responsible for the acts of the judges put in office by them." And this man, who had been preaching in Europe the preparedness of the Filipinos for full self-government, had this to say also: "We should not find any objection to accepting the Americans' legal and educational systems, if they consider them indispensable for our moral uplifting."

Much has been said as to the adoption by the Filipinos at Malolos of a constitution, based in great part on ours; and as to their proposing to follow our examples and our principles of government, "Why," say some orators, "among their first provisions was one for freedom of conscience and freedom of religion." Far from it. The matter of separation of church and state was a much debated one in the congress of Malolos and with the leading Filipinos of the time. There was finally a committee report to the congress on the matter thus referred, and that committee report declared for the proclamation of a state church in the Philippines—that church to be, of course, the Roman Catholic. There was at that time an excommunicated native priest in Aguinaldo's headquarters, calling himself "War Bishop," and giving out orders to native priests all over the island, in the name of Aguinaldo, while Filipino representatives had been commissioned to secure if possible a recognition from the Papacy of this new government and the power for it to make appointments to curacies in the Philippines.

There was an element at Malolos opposed to this programme and desirous of a declaration for separation of church and state. They made opposition to the above committee report and a debate of several days ensued, in the course of which much feeling was aroused. It finally came to a vote in the session at Malolos November 29, 1898, and the result was at first a tie—25 to 25. The president refused to resolve the tie, fearing to arouse the factional feeling of the losing side and eventually be ousted from his post. One man who had abstained from voting finally cast his vote for separation of church and state. The American principle of freedom of worship and no support of church by state therefore prevailed at Malolos by one vote.

In the closing hours of Congress Admiral Dewey has been called to testify before the Senate Committee on the Philippines, and his testimony is of so much importance that it is to be regretted that it can not be procured and printed in full in the RECORD. One can, however, get a fairly good idea of the same by the extracts which follow.

[The Evening Star, June 26, 1902.]

Admiral Dewey made a statement before the Senate Committee on the Philippines to-day concerning the early operations at Manila, when he was in command of the American naval forces in Philippine waters. The Admiral's statement contributed an important addition to the history of the surrender of the city of Manila. This consisted of a positive statement by the Admiral to the effect that the city had been surrendered to him at the time that the Spanish fleet was sunk, and that when the city did surrender it was in pursuance of a definite understanding between himself and the Spanish governor-general.

The Admiral was questioned by Senator LODGE. He said he had first heard from Aguinaldo and his friends about April 1, 1898, a month before the battle in Manila Bay, when it became certain that there was to be war. "I then heard that there were a number of Filipinos who desired to accompany the fleet to Manila," he continued. "All of them were young and earnest. I did not attach much importance to them or to what they said. The day before we left Hongkong I received a telegram from Consul-General Pratt, located at Singapore, saying that Aguinaldo was at Singapore and would join me at Hongkong. I replied, 'All right; tell him to come aboard,' but I attached so little importance to the message that I sailed without Aguinaldo and before he arrived. There were then many promises as to what the Filipinos would do, but I did not depend upon them. Consul Williams assured me that upon our arrival and the firing of the first gun 30,000 Filipinos would rise. None did arise, and I frequently joked him on this point."

MANILA REALLY SURRENDERED.

It was at this point that the Admiral stated that the city of Manila had surrendered on the day of the destruction of the Spanish fleet.

He said that during the naval engagement several guns had been fired at him from the shore batteries and that as soon as the Spanish squadron was destroyed he steamed toward the city, sending word to the governor that if another shot was fired from the shore he would fire upon the city. "The governor replied," the Admiral went on, "that if I did not fire upon the city the shore batteries would remain silent. The Spanish flag was not taken down, but white flags were raised. It was a surrender, and if I had had with me 5,000 troops with which to occupy the city I could have taken it and held it. I anchored my ships under his guns 2,000 yards, and lay there twenty-four hours. During that time the governor-general sent word to me several times that he wanted to surrender to me—to the Navy. I could not entertain his proposition of a formal surrender because of the lack of troops to take possession of the city."

APPEARANCE OF AGUINALDO.

Admiral Dewey then told of the arrival at Manila of Aguinaldo, saying he had come from Hongkong on the revenue cutter *McCulloch*, and that upon his reporting to him on his flagship he had told him to go ashore and organize his army. Accordingly Aguinaldo had landed, but he came back a few hours afterward, apparently discouraged, and asked leave of absence in order to go to Japan. The Admiral said that he dissuaded him from pursuing this course and urged him not to give up. He advised him further to continue his efforts outside the American lines and gave him 75 Mauser rifles and some ammunition. "We had a common enemy," said the Admiral, "and I wanted his help."

Continuing, the Admiral said that after Aguinaldo got his forces organized he occupied Cavite, but when he (Dewey) learned that American troops were expected to arrive soon he asked the Filipinos to retire. They at first demurred, but ultimately consented.

It was after this time, on July 15, that Aguinaldo sent to him from Baccoor his first proclamation of the independence of the Philippines.

AGUINALDO'S PROCLAMATION.

"That proclamation," said the Admiral, "was the first intimation I had ever received of the aspiration of the Philippine people for an independent government. Aguinaldo had never told me that the independence of his people was his aim. But when the proclamation came I thought nothing of it. Indeed, I attached so little importance to it that I did not cable it to Washington, but left its transmittal to the mails."

He then told of Aguinaldo's military operations toward Manila, saying that he did wonderfully, whipping the Spanish many times. Aguinaldo had wanted to attack the city itself, but he (Dewey) had advised against this course. The Admiral said that at that time his intercourse with the Filipino chieftain was most friendly.

"Indeed," he said, "Aguinaldo and I were always on the most friendly terms. He considered me, I think, the liberator of himself and his people. I really think he entertained the highest admiration for us because we had whipped the Spaniards, who had so completely dominated the Filipinos for three hundred years."

DID NOT RECOGNIZE FILIPINOS.

"Did you ever recognize his government?" Senator LODGE asked.

"Never. Nor did I ever salute his flag, as was reported. He hoisted a flag on a small vessel that he had come into possession of. The admiral of the German fleet notified me of this fact and asked me if I meant to recognize the flag. I replied in the negative, adding that the flag was only a little piece

of bunting, and that anyone could run up a piece of bunting on a private yacht. No. I never saluted the flag, and, indeed, I did not attach any official significance to it or to Aguinaldo. I never called him General, but addressed him as 'Don Emilio.'"

"Did you recognize the Philippine republic?"

"I did not. I never gave it the slightest recognition. I had no authority to do so, and besides did not consider it an organized government. There was a reign of terror, and the Philippine forces were riding roughshod over the community, committing many acts of cruelty. I sent word to Aguinaldo that he must treat his prisoners kindly, and he replied that he would."

"What would have been the effect of permitting the Philippine forces to enter Manila when our troops entered?"

SURRENDER PREARRANGED.

The Spaniards were very fearful of the result of such a course, and, therefore, they surrendered to me in advance. That was all arranged, and there was no need for the loss of a man in the capture of the city. It was to be done at a signal and no gun need have been fired by us but for the desire of the governor-general, who said his honor demanded that a few shots should be fired. So that I had to fire and kill a few people, but the Spaniards did not fire, because of my warning that it would be disastrous to the city for them to do so. They had in the city 13,000 troops and 47 rifled guns.

Admiral Dewey added that he was pleased to supply the committee with this history. It had, he said, never been printed, and he had been reserving it with the view of writing the story himself.

He said, in reply to other questions, that he did not believe the Filipinos could have taken the city unaided, but he admitted that the Spanish forces were greatly demoralized.

The cross-examination was conducted by Senators PATTERSON and CARMACK.

FOOLISH LETTERS FROM PRATT.

In response to an inquiry from the former, Admiral Dewey said he had never received from Consul-General Pratt a letter notifying him that he was to cooperate with Aguinaldo. "I don't remember," he added, "when I did first hear from Pratt. He wrote me a number of foolish letters about that time." The Admiral also referred to a published statement to the effect that he was to have acted with Aguinaldo in his operations, saying that this was written by an unreliable person.

He added that before turning over his papers to the Navy Department, previous to surrendering the command of the squadron, he had made copies of some of the communications received.

"But," he added, "I did not copy any of the communications from Pratt. He didn't impress me. He seemed to be a sort of busybody, devoting much time to interfering with the business of other people."

CONSIDERED FILIPINOS UNGRATEFUL.

The admiral said that when Aguinaldo was at the height of his power the British admiral (Seymour) had advised the Filipino chief to tie to the Americans, as they were his best friends. He said that when he let the Filipinos have guns and ammunition he thought it was a military necessity. Looking backward he could see that they were not needed. He considered them very ungrateful in turning against the United States. The admiral said he and not the Filipinos had captured Subig Bay, and he had taken possession because a German man-of-war was preventing Aguinaldo from passing.

Admiral Dewey had not concluded when the committee adjourned.

[The Evening Star, June 27, 1902.]

Admiral Dewey continued his testimony before the Senate Committee on the Philippines to-day. Replying to questions put by Senator PATTERSON, he said that he had begun negotiations with the governor-general of the Philippines, General Jaudenes, for the surrender of the city, and the negotiations were conducted through the Belgian consul, who, after the death of the British consul, had been very courteous in acting as a go-between. It was a diplomatic negotiation, no letters being written. The Admiral said he had informed General Merritt of the proffer of General Jaudenes, but that he did not believe that Merritt had taken "much stock" in it.

MERRITT INCLINED TO BE INCREDULOUS.

"I assured him that such was the case," said the Admiral, "but told him of the arrangement that before the surrender should take place I was to engage an outlying fort and make the signal according to the international code, 'Do you surrender?' after which the Spaniards were to hoist the white flag on the southern bastion. I may say that I was the first to discover the flag, notwithstanding I had stationed 50 men to look out for it. It was a thick day, and I chanced to be the first to discover it." He also said he had read the testimony of General MacArthur, saying that he knew of no agreement of the kind mentioned, but that it had not been his (Dewey's) business to communicate with anyone except the commanding officer.

Asked by Mr. PATTERSON to explain his statement that General Merritt had not accepted the report that the Spaniards had agreed to capitulate, Admiral Dewey said that was only his belief. "I do not believe," he said, "that the General entirely trusted the Spanish authorities. Still he did not say so in so many words. I may add that I have since learned that some of the Spanish officers were tempted to fire at us, though they did not do so. Even my own flag lieutenant did not accept their proffer as in the best of faith. I knew, however, that they would surrender, for I understood the straits they were in."

Replying to a question as to whether the agreement to surrender had been made public at the time of the attack upon Manila, Admiral Dewey said he thought not.

"There are," he said "lots of things which are not communicated to the public."

AGUINALDO'S ATTITUDE.

Mr. PATTERSON sought to secure from Admiral Dewey an admission that Aguinaldo had issued a proclamation of independence to the Filipinos about the time of the sinking of the Spanish squadron, but the Admiral said he did not remember it, although it was possible that he might have done so.

Mr. PATTERSON then read the paper forwarded by Consul-General Pratt May 20, 1898, in which the Filipino leader said that Providence had opened the way for independence to the Filipinos and spoke of the Americans as their liberators. The Admiral said, however, that he did not remember to have seen the paper. He had, he said, given Aguinaldo a printing press, and probably he used this press for getting out his proclamations.

In reply to a question, the Admiral said that Consul Williams, who had been stationed at Manila, was an honest man, although perhaps quite enthusiastic. The Admiral did not, however, remember to have promised to Aguinaldo his "cordial cooperation," as the consul had reported.

For the purpose of making inquiry concerning some of the representations of Consul-General Wildman, located at Hongkong, Mr. PATTERSON asked concerning that gentleman's character. The Admiral apparently hesitated to reply, but then said: "He's dead—I had rather not say. He was the United States consul-general." He added that he would prefer not to reply to further questions, but when Mr. PATTERSON persisted, he added: "He was a very able man—an able consul."

Mr. PATTERSON then read Mr. Wildman's letter of July 18, 1898, saying that Aguinaldo had conducted himself in a dignified manner, etc., and the Admiral assented to the truth of this statement.

Speaking of Aguinaldo's loyalty, the witness said that he had become suspicious of that leader before the receipt of his proclamation of July 15. He said, "I began to suspect that he was not loyal to us when he demurred to moving out of Cavite when our troops arrived."

"You mean that they were thinking more of their own independence than of us?"

"Yes."

MONEY PAID BY SPAIN.

Admiral Dewey also testified concerning the arms sent to Manila by Aguinaldo, and Senator DIETRICH asked the Admiral if "he did not believe that the arms were purchased with money previously paid by Spain to secure peace, and that it was his intention to use the money to foment another insurrection for the purpose of gain."

The Admiral's reply was: "Exactly so."

Mr. PATTERSON next called attention to a number of proclamations forwarded by him to Washington in May, but Admiral Dewey said he did not remember having read them, and in explanation of his failure in this respect he said: "The days and nights were not long enough for me to get through with my work at that time. Evidently I didn't consider the proclamations as of importance if I did read them, for I made no comment on them."

The reading of these dispatches was followed by a number of questions.

VIEW OF AGUINALDO'S PURPOSE.

"Knowing of Aguinaldo's expectation and purpose to secure independence," said Mr. PATTERSON, in beginning a question, but before he had concluded he was interrupted by the witness, who said: "No; I did not know that."

"Then you believed such to be his purpose?"

"I didn't believe it, and since you have asked my opinion I will say that I believe he was there for gain—for loot—for money, and I further believe that independence never entered his head."

Replying to another question by Senator PATTERSON, the Admiral said that while Aguinaldo was located at Cavite and was under his observation he was always humane, but that he did not see him much after the Army came.

Senator CARMACK then put a number of questions to the witness. Replying to these, the Admiral said it was true he had assisted Aguinaldo in organizing his army by supplying him with arms, etc.; that at that time there were no American soldiers in the Philippines, and that Aguinaldo had complete control of his own forces, and that he was under no restraint. Mr. CARMACK then asked the witness why he had done so much to aid a man whom he regarded as "a common robber and plunderer."

The Admiral did not reply immediately. His face reddened and he laughed. He then said the Senator had not quoted him accurately, but he admitted that he had said Aguinaldo had gone to Manila for pillage and plunder. He added, "You know the old saying that 'All is fair in war.'"

"Do you consider it fair in war to assist a known plunderer and robber in an enemy's territory to pillage without restraint?"

"I believe it is, as I read history."

"Then you admit that you assisted this robber and plunderer to organize, etc.?"

"I didn't then call him a robber and plunderer; I called him the 'insurgent leader.' I have said here that he was there for money and loot. I think those were my words, and I think that is what he was there for. Do you," he said, turning interlocutor himself, "think he was there for anything else?"

"I do," responded the Senator.

"Well, I don't," said the Admiral, and as if to express his opinion still more emphatically, he repeated, "I don't," and added, "I swear I don't."

"Do you think you knew Aguinaldo better than General Otis?"

"In some things I think I do," the Admiral replied. "I think my judgment is better in some matters than the General's. I don't believe he ever saw Aguinaldo, and I saw him fifty times. Moreover, I know his history."

"Do you think you know him better than General Bell?"

"I think I know him better than any of our officers."

"Did Aguinaldo tell you that he was there for money and loot?"

"I saw in his actions that he was. He hadn't been there forty-eight hours before he was taking everything in sight—provisions, munitions, etc."

"From the Spaniards?"

"From everybody."

"For himself?"

"I expect he got the lion's share."

"If General Otis and General Bell should say they regard Aguinaldo as personally honest in money matters, would their statement influence your opinion in regard to him?"

"Not in the slightest degree."

DECLINED TO ANSWER.

"You don't know of a single dishonest act on the part of the man and yet you regard him as a thief?"

Just before this question was asked Senator LODGE, as chairman of the committee, had announced that 1 o'clock, the hour for adjournment, had arrived. The Admiral took advantage of this announcement to cut short a line of inquiry that was plainly annoying to him. He rose as the last question was being propounded, and when it was concluded said: "I think I shan't answer that question."

He then took his hat and left the room with a polite word of adieu, but without being formally dismissed.

The examination of the Admiral will be continued to-morrow.

GAVE AGUINALDO THE SLIP.

In the course of his testimony yesterday Admiral Dewey said, regarding his departure from Hongkong before the battle of Manila Bay, that he had left for Manila as early as he did largely because he wanted to get rid of Aguinaldo and the other "little brown" men, many of whom were constantly coming aboard his flagship. "I was very busy," he said, "getting ready for battle, and they were after me constantly, taking up much of my time. None of them went with me to Mirz Bay, for various reasons. One of them failed to do so because he didn't have his toothbrush with him."

The Hongkong Filipinos had not, he added, told him of any insurrection in the Philippines, and he said he had consented to see them on the same principle that one gives money to a man often to get rid of him. Indeed, he had himself given Aguinaldo the first information the latter had received that the Filipinos were assembling near Manila.

FILIPINOS AND CUBANS.

Asked if he had written to the Navy Department saying that the Filipinos were more capable of independent government than the Cubans, Admiral Dewey replied in the affirmative.

"I sent that communication," he said, "because I saw that Congress contemplated giving independence to Cuba, and because I knew the American people knew very little about the Filipinos.

"We then had employed at the navy-yard at Cavite several hundred Filipino workmen. They were docile, amiable, and kindly disposed toward us. I therefore wrote the statement that the Filipinos were better capable of governing themselves than the Spaniards were."

"You repeated the same statement later, did you not?"

"I did. And I still think so."

Senator CARMACK called Admiral Dewey's attention to the fact that he had given arms to Aguinaldo, notwithstanding the governor-general had told him he would surrender the city at any time, and asked why he had done so in the face of that understanding.

The reply was to the effect that he considered it a proper military act.

"The Filipinos were our friends," he said, "and they were doing our work. I believed that they were so delighted to get rid of the Spaniards that they would accept us with open arms."

"Even," he added, "when Aguinaldo was at the height of his power at Malolos Admiral Seymour, of the British navy, had told Aguinaldo that he should tie to the Americans, as they were their best friends. The Filipinos then were our friends and were helping us. We had no troops to land, and I knew that the more closely the city was invested the easier it would be to take it when our own troops should arrive. Still, I think we could have gotten on as well without them. It was their own idea. We all know that hind sight is better than foresight. Looking back, I wouldn't have had the Filipinos join me.

REGARDS FILIPINOS AS UNGRATEFUL.

"But I thought they would be friendly, and I think it very ungrateful in them to have turned against us. When I permitted Aguinaldo to go ashore, I did not know that any United States troops would be sent to the Philippines. I was a long way from home; there were no cables, and I was meeting emergencies as they arose. Whatever I did I did according to my best judgment at the time. Later I said to Aguinaldo, 'There is the enemy; you pursue your course and we will pursue ours.'

I think that is the wisest thing I ever said. They were assisting us and at the same time fighting their own battle. I had in mind in dealing with the Filipinos the assistance that the negroes had given the Federal forces during the civil war. We availed ourselves of that assistance and I thought we could accept the aid of the Filipinos in the same way. Their one idea was to get rid of the Spaniards, and I believe that if on May 1, before the insurrection was organized, we had had there a few American troops the Filipinos would have accepted us and that they would have remained loyal.

In reply to other questions Admiral Dewey said that he and not the Filipinos had captured Subig Bay, and he said he had done so because a German man-of-war was preventing Aguinaldo from passing. He had turned the prisoners taken over to Aguinaldo.

Asked why he had taken possession on Aguinaldo's complaint Admiral Dewey said: "I did not want any other power to interfere."

[The Evening Times, June 27, 1902.]

Admiral Dewey, before the Senate Committee on the Philippines, this morning gave it as his opinion that Aguinaldo went to Manila "for the sole purpose of gain—for loot and money."

He declared later that within forty-eight hours after his arrival there Aguinaldo began robbing right and left, taking rice, stores, and provisions from anybody that had them, the Americans included.

These statements stirred up the Democrats considerably, and led to a lively passage between the Admiral and Senator CARMACK.

TERMS OF SURRENDER.

In resuming his testimony Admiral Dewey, in response to questions by Senator PATTERSON, gave further details regarding the arrangement he had with the governor-general of Manila to surrender the city just as soon as American troops arrived to take possession.

"The agreement was that I was to fire upon one of the outlying forts, that of Malate. I was to engage this fort and fire for awhile, when I was to cease and signal by the international code, 'Do you surrender?'

"On the receipt of this message the Spaniards were to hoist a white flag on the south bastion. Everything went according to programme. And I may say that I was the one that discovered the white flag, although I had 50 men on the lookout for it."

The Admiral said that he had read General MacArthur's testimony before the committee in which he had said that he knew nothing about any arrangement for the surrender of the city.

"It was not my business to communicate it to any but the commanding general," Admiral Dewey remarked. "I had communicated it to General Merritt. The arrangement was simply for the purpose of taking the city without needless loss of life. General Jaudenes was the intermediary between us and the Spanish governor-general. It was fully understood among my squadron that there was to be no resistance by the city, and I supposed until later that it was known in the army.

DID NOT TRUST SPANIARDS.

"I continued all my preparations for battle, however, up to the last moment, for we did not altogether trust the Spaniards. General Merritt did not trust the arrangement, and my flag lieutenant, Brumby, had the same feeling. I learned afterwards that they came very near firing upon my ships from the city. One Spanish officer in charge of one of the 10-inch guns wanted to fire. They had some conversation about it. One of the Spaniards said: 'They won't dare to bombard this city with so small a fleet.' But one of the monitors—the *Monterey*—was lying with her guns trained on the city. Another of the Spaniards spoke up and said: 'Anyone who is such a fool as to cross the ocean in a thing like that would do anything.' So I think it is probable that the presence of the *Monterey* saved us from the necessity of bombarding the city."

KNEW OF NO PROCLAMATION.

Mr. PATTERSON attempted to secure an admission from Admiral Dewey that Aguinaldo had issued a proclamation declaring for independence before the American fleet left Hongkong and that he had been aiming for independence from the first. The Admiral said he knew of no such proclamation. It would have been impossible for him to have circulated it in the Philippines until after the destruction of the Spanish fleet.

"We captured a hand printing press at Cavite, and I gave it to Aguinaldo. He may have used that press for the printing of circulars, but the only proclamation of which I have any knowledge was that of July 15, of which he sent me a copy."

Mr. PATTERSON read from certain communications from United States Consul Wildman at Hongkong, which purported to give Aguinaldo's plans and declared that the Filipinos were fighting for independence.

PARRIES WITH PATTERSON.

"What kind of a man is Wildman?" asked Mr. PATTERSON.

"He is dead," replied the Admiral.

"Well, we are not prohibited from saying good of the dead," suggested Mr. PATTERSON, and pressed for a reply. The Admiral said he did not want to answer, and asked what bearing the question had on the case. He finally said: "He was a very able man, and a good consul."

Admiral Dewey said that he began to suspect that Aguinaldo was not loyal to the Americans when our troops began to arrive, and he demurred against moving from Cavite. He was then, he believed, thinking more of independence than of aiding the Americans.

SHIPMENT OF ARMS.

Mr. PATTERSON referred to the shipment of arms to the Filipinos from Hongkong, arguing that the purchase of these guns must have been made before the departure of Aguinaldo for Manila, and that this was evidence of his intention to fight for independence.

The Admiral declined to express an opinion.

[The Evening Times, June 28, 1902.]

Admiral Dewey, in resuming his testimony this morning before the Senate Committee on the Philippines, explained that the repeated offers of the governor-general of Manila to surrender the city, which came to him through the Belgian consul, were made in July and not within twenty-four hours after the destruction of the Spanish fleet, as he had been reported as saying.

CARMACK CROSS-QUESTIONS.

Mr. CARMACK began the cross-examination by saying that as he understood the Admiral's testimony yesterday the trouble in the Philippines was the result of Aguinaldo's evil influence.

"I will not say that. I do not think I have said that," replied the Admiral, "but I will repeat what I did say, that if we had had 5,000 troops at the time of the destruction of the Spanish fleet to take possession of the city, I do not believe we would have had any trouble, because the Filipinos were then friendly to us."

AGUINALDO A FIGUREHEAD.

"You said yesterday that Aguinaldo's sole purpose in going to Manila was for gain—for loot and money. Do you believe that he fomented the trouble we have had?"

"I think we are making too much of Aguinaldo," replied the Admiral. "He was a very small part in this affair, in my opinion. He was a figurehead. He had bright men around him. He killed one of the best of his men, Luna, or at least it was generally understood that he had him assassinated."

BETRAYED HIS PEOPLE.

"Reference has been made heretofore to the acceptance of money from the Spaniards by Aguinaldo at the close of a former revolution. Do you mean to indorse the accusation that Aguinaldo betrayed his people for money?" asked Mr. CARMACK.

"That was the general report out there," was the reply.

"You said yesterday that Aguinaldo began looting and robbing within forty-eight hours after his arrival, and that he took the lion's share. I would like to know why you say that?"

TOOK THE LION'S SHARE.

"He came there without anything, and very soon after he was living at Malolos like a prince, like a king, in a state that could only have come from his taking the lion's share. As I said, he began taking things and looting almost immediately after his arrival, within forty-eight hours. I am speaking of things of which I have absolute knowledge. I know that he secured money which was taken at the threat of death. I may seem a little ungrateful, but I am testifying on honor, and I think since you have asked me these questions that I should tell you about them. He sent me a herd of cattle for my ships which he had obtained from his own people shortly after his arrival. He had just simply taken them. We did not do things that way. I took coal and things belonging to English and others, but we paid for everything."

Mr. CARMACK read statements made by Generals Otis, Greene, and Bell, Consul Wildman, and others, to the effect that Aguinaldo was honest, and he asked the Admiral whether he had better opportunities of judging him than these officers.

"I believe I had," replied the Admiral. "I don't think Otis ever saw Aguinaldo, while I had frequent close intercourse with him. These officers are entitled to their opinions, but their statements do not change mine. I am testifying as to my own opinion, based on what I know."

CARMACK INTERRUPTS.

"Is it a fact that the man you took to the Philippines as the leader in an insurgent movement was a man who had betrayed his people?"

"It was a reign of terror in his time," the Admiral started to reply.

"Well, you wanted a man to raise the Filipinos against the Spaniards and to assist you?" interrupted Mr. CARMACK.

Chairman BEVERIDGE suggested that that was Mr. CARMACK'S own statement and not the Admiral's.

"I did not want Aguinaldo at all," said Admiral Dewey. "He and his people were forced on me by Consuls Pratt and Wildman."

"Could they bring force to bear on you?"

YIELDED TO PRESSURE.

"Yes," was the reply; "I yielded, as a man will, to constant pressure and solicitation. I did not want Aguinaldo or his people. I did not expect anything of them. I was led to believe that 30,000 Filipinos would arise at my first gun, as Consul Wildman put it, and I thought these half-dozen refugees at Hongkong would play a very small part. We would have got on better without them, as it has since turned out."

DID NOT KNOW AGUINALDO.

"Well, you have admitted that you encouraged Aguinaldo to organize an army. By so doing you placed the whole country at the mercy of a man who had no higher object than to plunder the people, while knowing the character of the man," said Mr. CARMACK.

"No; I did not know his character at that time. I knew practically nothing about him then. The talk about Aguinaldo in the East did not arise until after he had become prominent," was the admiral's reply.

"When did you first find out that his only object in coming to Manila was loot?"

"Well, as I have said, he began looting at once, by looting the city of Cavite and other places, and I began to form my opinion then."

Mr. PATTERSON, taking up the examination, asked: "Did Aguinaldo ever talk with you about selling out? Did he ever ask you for money?"

"Well, he came to me and wanted to exchange Mexican dollars for gold. I was pretty sure in my own mind where he got those dollars, as he had nothing when he came there. So I concluded that he was getting ready to leave, especially as he could not have used gold to pay his troops. It was only a suspicion, but this was one thing which led me to believe that he was feathering his own nest."

HAD NO TREASURY.

"Did he ever ask any compensation for raising troops and besieging the Spaniards?"

"Not to my knowledge."

"As his men came in it was necessary for him to get commissary stores."

"Yes."

"He had no treasury back of him?"

"Not when he arrived."

"Where were his headquarters?"

"First at Cavite and then at Malolos."

"It was at the latter place," interjected Mr. BEVERIDGE, "that the Admiral says Aguinaldo was living in a state of magnificence."

"Yes," said the Admiral, laughing; "he had a chariot and four, a band of 100 pieces, and put on great style."

"Was not that well calculated," resumed Mr. PATTERSON, "to inspire the Filipinos with a belief in the stability of government?"

"It also doubtless inspired those from whom he had taken the money," retorted the Admiral.

TILT BETWEEN SENATORS.

Mr. PATTERSON asked whether the Admiral thought "such innuendoes" were proper, and there was a wordy quarrel between Acting Chairman BEVERIDGE and Mr. PATTERSON as to the latter's language.

"Do you know that Aguinaldo has a dollar to-day?" resumed Mr. PATTERSON.

"No; how should I? I have been absent from there for three years."

"Do you not know, from your experience, that there was never a day when Aguinaldo might not, from the Government of the United States, have made himself rich if he had chosen to stop fighting for the independence of his people?"

Before he could be stopped Admiral Dewey answered: "No; I have no such knowledge."

Mr. BEVERIDGE then said that Mr. PATTERSON'S question having gone into the record, he could only express his objection.

"It is my opinion," he said, "that the reflection contained in that question, that the Government of the United States would have at any time bribed Aguinaldo or purchased him, is not a proper one to put before this committee."

Turning to the Admiral again Mr. PATTERSON said: "Well, you know that Aguinaldo's officers have been given good, fat offices?"

"I do not know anything about it," replied the Admiral.

[The Washington Post, June 29, 1902.]

Admiral Dewey yesterday concluded his testimony before the Senate Committee on the Philippines. He made many interesting statements. He insisted, for instance, when asked some questions about Aguinaldo by Senator CARMACK, that entirely too much was made of Aguinaldo. "He was a mere figurehead," said Admiral Dewey, "and was surrounded by stronger men than himself. Mabini was one of these, and General Luna, whom he had killed, was another."

Replying to another question, the Admiral said it was the general report throughout the East that in 1897 Aguinaldo had betrayed his people to the Spaniards for money. Nor did he remember that this report had been denied by American officers in the Philippines. Among other officers quoted in this connection was General Greene, and the Admiral called attention to the fact that General Greene had not given his authority. "If," he said, "Agoncillo told him, I don't think the authority was good."

AGUINALDO LIVED LIKE A PRINCE.

"Why do you say that Aguinaldo took the lion's share of the property gathered by the insurgents?"

"Because he was living at Malolos like a prince. He had nothing when he landed at Manila, and he could have procured the means for this ostentation in no other way. He began immediately after arrival to take every dollar in sight. It may be ungrateful in me to state the fact, but it is true, that he sent cattle to me—herds of them—for the ships. The stock was taken from the Philippine people."

"Was any statement made of this circumstance at the time?"

"No; that is war, as you know."

Continuing his reply to this question, the Admiral said the Philippine army was then only a mob and without organization and had to be fed and clothed. "He did as many others have done; he made the country support him."

"Do you regard that proceeding as pillage and loot?"

"Well, we didn't do that way. For instance, I took all the coal in sight, but I paid for it."

Senator PATTERSON. Do you refer to Aguinaldo taking property for the support of the army as loot and pillage?

Admiral DEWEY. That is one part of it.

Senator CARMACK. You didn't object at that time?

Admiral DEWEY. No; but he soon got beyond me.

CARMACK'S CLOSE QUESTIONING.

A number of questions were asked in regard to statements made by Generals Greene, Bell, and others, but the witness asked to be excused from criticising officers of the Army, and the Chair (Senator BEVERIDGE) said that he was not required to answer any questions, the replies to which would involve such criticism. Thereupon the Admiral said he was "very glad," and Senator CARMACK said he knew of no such rule, but he supposed he would have to submit. The Admiral added that no opinions by others would change his own opinions of Aguinaldo.

"Then it is a fact," remarked Senator CARMACK, "that you took a man to Manila to be a leader of the native people who had but recently betrayed those people for a bribe?"

"I think that would have made no difference," was the Admiral's reply. "The country was under a reign of terror."

"Then you wanted a man who could organize the natives?"

"No; I didn't want anyone. Aguinaldo and his people were forced upon me by Consul Pratt and others."

"Did the consul and others have any power to force these people upon you?"

"Yes; by constant pressure. I did not want the Filipino refugees, because I did not believe that a half dozen of them would do any good, in view of the report that thousands would rise up in insurrection upon our arrival at Manila. I thought they would play a very small part."

DEWEY DECLINED TO ANSWER.

"Then you placed the country at the mercy of a man who would plunder and rob, notwithstanding you had no need of his services?"

This question the Admiral declined to answer, and Senator PATTERSON took the witness, asking if Aguinaldo had ever talked to him on the basis of selling out to the Americans. The Admiral replied in the negative, and Mr. PATTERSON then asked if the Philippine leader had ever asked him for money. The reply was that Aguinaldo had asked him to exchange gold for Mexican dollars.

"I was pretty sure as to where he had gotten the dollars, as he had not brought them with him," said the Admiral, "and I thought that the fact that he wanted gold was a pretty good indication that he was getting ready to leave. That was one thing which made me think that the man was feathering his own nest, but it was only a suspicion."

Here the Admiral again referred to Aguinaldo's style at Malolos, and Senator PATTERSON asked if that style had not served the purpose of inspiring the admiration of his followers and holding their allegiance. To this inquiry the witness replied that the style was "probably more inspiring to them than to those from whom the property had been taken."

BEVERIDGE DEFENDS DEWEY.

"Do you think that is proper testimony?" asked Mr. PATTERSON, and Chairman BEVERIDGE interfered with a strong protest against innuendoes against Admiral Dewey. He considered the question as discourteous.

Mr. PATTERSON, however, disclaimed any intention to be otherwise than respectful, and he continued his questions.

"Do you know," he asked, "whether Aguinaldo has a dollar to-day?"

"I don't know," was the reply. "I haven't been in the Philippines for three years. How should I know?"

"Do you not know from your experience that there was never a day while he was in arms that he could not have made himself rich at the expense of the American Government if he had given up?"

DEWEY AGAIN DECLINES ANSWERING.

The witness hesitated and said he could not answer the question. He then was told by the chair that he need not do so.

"You do know," Mr. PATTERSON went on, "that there were several with him who got good fat offices?" The reply was in the negative. The witness also said he knew nothing of the payment of money to the Cuban general, Gomez, and he added the suggestion to Senator PATTERSON that he should not put such questions to him.

Senator PATTERSON also asked a number of questions concerning Admiral Dewey's association with General Anderson after his arrival and his visit to Aguinaldo in company with the general. He said he had suggested to General Anderson on the occasion of that visit that he need not wear his uniform or put on his sword, but that his blouse would be sufficient, and that the suggestion had been adopted. Referring to a report of that interview made by General Anderson and to copies of letters written by the general, in which Aguinaldo was assured of a desire for amicable relations, Admiral Dewey said that he did not remember that any such assurance had been given. Speaking of General Anderson's letters to the Philippine chieftain, the witness said, "When I heard that he was writing letters to Aguinaldo I advised him against doing so."

DID NOT LIKE THE QUESTIONS.

When Senator PATTERSON pressed other questions calling for reference to statements made by Army officers and others, the Admiral declined to answer, saying: "I am here to testify to what I know, and I will give all the information I can in that way, but I am not responsible for what others have said. I do not like your questions, and I do not think I ought to be required to reply to them."

The Chair assured the witness that he need not answer. The Admiral said, however, in reply to further pressing, that his views did not coincide with those expressed by General Anderson in a magazine article. "They do not coincide," he said. "We differed very much from the beginning."

DUE TO "A HIGHER POWER."

Senators BEVERIDGE and DIETRICH then asked a few questions. The former reminded the Admiral of a visit that he [Senator BEVERIDGE] had paid the Admiral on the flagship *Olympia* when she lay in the harbor at Manila, and asked him if he remembered a conversation that had occurred between them when, while they were looking out from the deck, the Admiral had said, referring to the success of the American arms, that "he couldn't help thinking that it was all due to a higher power than ours."

"I do," responded the Admiral. "I remember that I said that, and it is my opinion now."

Senator BEVERIDGE read extracts from the report of the first Philippine Commission, of which Admiral Dewey was a member, in which the statement was made that the Filipinos were incapable of standing alone, and that if the American support was withdrawn they would lapse into anarchy, and asked him if that had been his opinion. He replied in the affirmative, adding that he still entertained that view.

"Senator CARMACK. Was that always your opinion?

"Admiral DEWEY. Yes. True, I made a comparison once with the Cubans, saying the Filipinos were more capable of self-government than the Cubans. I think that neither the Filipinos nor the Cubans are capable of self-government."

ACCEPTS A BELATED SUGGESTION.

Senator DIETRICH'S questions were intended to show the state of Admiral Dewey's mind concerning the Filipinos at the time of the engagement with the Spanish squadron. He asked the Admiral if it was not true that if he had recognized the Filipinos as allies, trusted them as such, and considered them capable of taking charge of Manila, he would have accepted the proffer for the surrender of Manila before the arrival of the American troops.

"Yes," replied the witness; "that is true and it is a good idea. I had not thought of it, and I am glad you suggested it. It makes my testimony stronger. It is true, and the fact that I did not accept the surrender and put them in charge shows that I did not trust them; it never entered my head to do that."

With this Admiral Dewey was discharged as a witness, and he expressed himself as much gratified to secure his release.

And as bearing upon the testimony of Admiral Dewey, I desire to add an editorial from the Inter-Ocean of June 28 and one from the Philadelphia Inquirer of same date.

[The Inter-Ocean, June 28, 1902.]

DEWEY'S ANSWER.

Admiral Dewey was called before the Senate Committee on the Philippines at the instigation of the Democrats. He was called to embarrass the Administration and to discredit Republican policies. He was called in the belief that he would bolster up the theory that in May and June, 1898, the aspirations of Aguinaldo received encouragement from the United States Government; that his pretensions had been recognized by Dewey, and that the Americans could not have captured Manila without the aid of Aguinaldo and his followers.

There were three points on which the Democratic leaders have declared that Admiral Dewey could give damaging testimony if permitted to speak freely. In making up their case for the consideration of the American people they have assumed that Aguinaldo was treacherously dealt with by the Americans, and that Dewey could a tale unfold that would show just what promises had been made to Aguinaldo, and afterwards broken and repudiated, to the lasting shame of the United States.

Admiral Dewey has spoken several times in emphatic denial of this assumption, but for three years the antiexpansionists have persisted in their assertions that there was an understanding between Dewey and Aguinaldo and an agreement by which the nation's honor was engaged, and that all this would be made plain when Dewey could speak free from the restraints of official etiquette. In fact, what Dewey might say has been given the character of a mystery and has been used as a treasured party asset by the Democratic managers.

Called before the committee, Admiral Dewey spoke explicitly on every one of the points and demolished the Democratic case. He declared that

Aguinaldo had never spoken to him of independence, and that he knew nothing of Aguinaldo's aspirations in that direction until he read Aguinaldo's proclamation to the Filipinos, and then did not regard the matter as of any importance. Admiral Dewey declared further that he never had saluted Aguinaldo's flag nor recognized his so-called government, and that Manila really surrendered the day the Spanish fleet was destroyed, or some weeks before Aguinaldo had organized the insurgents.

This is conclusive on the points at issue. Admiral Dewey may have his own views as to a Philippine policy, but he was called to testify as to facts in regard to which he only could speak with authority. He has spoken, and in adding much of interest to the story of the American occupation of the Philippines has closed the case forever against Aguinaldo and his Democratic allies in this country.

[Philadelphia Inquirer, June 28, 1902].

DEWEY'S VIEWS ON MANILA.

There have been many rumors in the last few years that the surrender of Manila was a sort of military farce gotten up to save the honor of the Spanish commander, but no one supposed that it was quite true in all its details as reported. And now comes Admiral Dewey, who tells the story with more detail and gives it an official character. That the cause of the Spanish in Manila was hopeless after the destruction of the fleet in Manila Bay was as well known on May 1, 1898, as it is now, but there never was quite such a way of getting out of a bad situation since history has been faithfully recorded.

Admiral Dewey seems to think that he had a sort of copyright on the story, and wanted to write it independently, but as a witness he was obliged to tell it. What shocks the American sense most is the fact that the Spaniard demanded that a few of his men be killed in order to "save his face," as they say in China. It seems that the Admiral could not refuse this bloodthirsty request, but he did provide that no Americans' blood should be shed, a stipulation which was almost if not quite carried out when the American troops rushed over the wall in August, after the protocol had been signed, though not known in Manila.

The interesting fact in connection with this story is that it disposes of the claim of Spain, urged with great earnestness at Paris, that Manila should be restored because of the protocol. If the Spanish envoys knew of the arrangement for the surrender, they must have felt that their labors were farcical; if they did not know it, their situation was the more pitiable, in that they fought for the Philippines on a technicality that seemed to be valid, though in the light of the truth it was more than absurd.

It is interesting to note that Admiral Dewey made public the facts in this case on the very day the House passed the bill for the government of the Philippines. Those islands are ours irrevocably. The Admiral leaves Aguinaldo without a leg to stand on, while Spain is put in a most humiliating position. Dewey could have taken the city any day for the asking; but evidently he feared the lawless Filipinos, and waited for troops, a position more than justified by the march of events.

There is nothing left for recalcitrant American statesmen but to yell loudly for Filipino independence. If the Filipinos had been as earnest in behalf of real liberty as their unwise friends have been for impossibilities they might now be enjoying much better things than are compatible with existing conditions. The plain truth is that they must be governed for a while with a modicum of their own aid. Some day they will be fitted for better things and then a revolution could not drive them from the protection of this Government. They will know and appreciate the blessings showered upon them at our expense and for their sole benefit.

This debate in the House and Senate has now lasted for several weeks. It would seem as though every phase of it had been ably and eloquently discussed. For one I have been greatly entertained by the speeches which have been delivered upon both sides of this Chamber. Time alone can tell with what wisdom we have each played our part in this new and great drama.

In addition to all that has been so well said, I desire to commend to all the able article of Hon. William H. Taft, civil governor of the Philippines, found in the Outlook May 31, 1902. He spoke as one having authority, and knows whereof he speaks. Perhaps upon no question are the two great parties more sharply divided than upon the question, Shall we promise independence to the Filipinos? Through the kindness and permission of the editors of the Outlook I am permitted to quote from this article. Governor Taft says:

SHALL WE PROMISE INDEPENDENCE?

The question is frequently asked why it would not be well to promise the Filipino people that when they are fitted for complete self-government they shall be granted independence. In the first place, the Federal party, which furnishes the only organized expression of public opinion in the islands, does not ask independence, but seeks, rather, annexation to the United States and prospective statehood. In the second place, there is not the slightest probability that the Christian Filipinos will be ready for self-government in any period short of two generations.

Not 10 per cent of the people speak Spanish, and the remaining 90 per cent or more are densely ignorant, superstitious, and subject to imposition of all sorts. It is absolutely necessary, in order that the people be taught self-government, that a firm, stable government under American guidance and control, in which the Filipino people shall have a voice, should be established. Nothing but such a government can educate the people into a knowledge of what self-government is. Not only by precept but by practice must the self-restraints essential to self-government and the discretion and public spirit of a free people be taught them.

A promise to give the people independence when they are fitted for it would inevitably be accepted by the agitators and generally by the people as a promise to give them independence within the present generation, and would therefore be misleading, and the source of bitter criticism of the American Government within a few years after the promise was given and not performed as it was understood by the people. A promise of independence thus interpreted would destroy the possibility of the formation of a stable government in which the people should be learning what self-government is, because the conservative element, with the assumed early prospect of complete independence, would fear that when the islands were abandoned the violent agitators would come to the front, and those assisting the present government would be subjected to the hostility of the demagogues on the ground of their previous American sympathies.

The only policy, it seems to me, which will insure the establishment of a firm, stable government and the support of that government by the educated, wealthy, and conservative Filipinos, is the declaration of a policy in favor of the indefinite retention of the islands under a government in which the share taken by the Filipino people shall be made gradually to increase and the electorate of the Filipino people shall be gradually enlarged. After this government shall be successfully established the question whether the islands shall be annexed or shall be granted independence or shall have such a relation to this country as Australia or Canada has to England may be very well postponed until the practical education of the people in self-government shall have been sufficient to justify the adoption of either of these three courses.

The policy of establishing a firm and stable government in which the Filipino people shall take part will doubtless reveal much as to the wisdom of the one or the other of the courses suggested; but it seems to me to be very unwise to bind ourselves and the next generation by an authoritative declaration now as to what we shall do fifty or a hundred years hence. We can not now know what subsequent generations of our own people will then deem wise, or what succeeding generations of Filipinos, benefited by experience in self-government and advised of the advantage of association with the United States, will desire.

We are soon to have an election which will determine the political complexion of this House for the coming two years. It seems to me from every standpoint, looking to the best interests and prosperity of all our people, that the next House should be Republican, and as bearing upon this branch of the question Governor Taft has also spoken in no uncertain manner.

THE POLITICAL ASPECT OF THE PHILIPPINE QUESTION.

A difficulty which may possibly confront the Philippine government is the success of the Democratic party in the next Congressional elections. This will be taken in the Philippines as an indication that at the end of the present Administration the policy of the United States will be changed and the islands will be abandoned by the United States and turned over to a government to be established by the people of the islands through the calling of a constitutional convention.

The prospect of such a change will have a tendency to paralyze the energy of the conservative element of the Filipino people who are now assisting us in the maintenance of a civil government in the islands, and all will be suspense and agitation. This difficulty, however, is inherent in the government of dependent possessions by a Republic like our own whenever the chief political issue between the parties is the policy to be pursued with respect to such dependencies. I venture to think, however, that should the Republican party be successful in the Congressional elections next following and in the next national election, sufficient progress will be made in the solution of the problem of the Philippine government to insure the removal of the main issue from practical politics thereafter.

I can not conclude without calling attention to the tribute paid to Governor Taft by President Roosevelt at the commencement exercises at Harvard University June 25. It is given to but few men to make such sacrifices as Governor Taft has made for the cause of human right and for the betterment and higher civilization of millions of people who have been downtrodden and oppressed for three hundred years.

[The Evening Star, June 26, 1902.]

TRIBUTE TO JUDGE TAFT.

And Taft—Judge Taft, Governor Taft—who has been the head of the Philippine Commission, and who has gone back there—Taft, the most brilliant graduate of his year at Yale, the youngest Yale man upon whom that institution ever conferred a degree of LL. D.; a man who, having won high positions at the bar and then served as Solicitor-General, with all his tastes impelling him to a judicial career, and was appointed to the United States bench, was asked to give up the position in order to go to the other side of the world to take up an infinitely difficult and infinitely dangerous problem and to do his best to solve it.

He has done his best. He came back here the other day. The man has always had the honorable ambition to get upon the Supreme Court, and he knew that I had always hoped he would be put upon the Supreme Court, and when there was a question of a vacancy arising I said to him: "Governor, I think I ought to tell you that if a vacancy comes in the Supreme Court, while it would give you an opportunity to be put in the position you would like to have, I think I ought to tell you that if such a vacancy should occur I do not see how I could possibly give it to you, for I need you where you are."

He said to me: "Mr. President, it has always been my dream to be in the Supreme Court, but if you should offer me a judgeship now, and at the same time Congress should take entirely off my salary as governor, I should go straight back to the Philippines, nevertheless, for those people need me and expect me back, and I won't desert them." [Applause.]

He has gone back, gone as a strong friend among weaker friends, to help them upward along the stony and difficult path of self-government [applause], to do his part, and a great part, in making the American name a symbol of honor and of good faith in the Philippine Islands; to govern with justice and with that firmness, that absence of weakness which is only another side of justice. [Applause.] He has gone back to do all of that because it is his duty as he sees it. We are to be congratulated, we Americans, that we have a fellow-American like Taft. [Applause.]

[Mr. FOWLER addressed the committee. See Appendix.]

[Mr. LESSLER addressed the committee. See Appendix.]

Mr. COOPER of Wisconsin. Mr. Chairman, I move that all debate upon the section and pending amendment be now closed.

Mr. JONES of Virginia. I hope the gentleman will not make that motion as to the section. I have another amendment which I want to offer to the section.

The CHAIRMAN. It does not cut off amendments.

Mr. JONES of Virginia. I would like to have two minutes.

Mr. TAWNEY. This motion of the gentleman from Wisconsin does not preclude amendments.

Mr. JONES of Virginia. It says the section and pending amendment.

The CHAIRMAN. The gentleman from Wisconsin moves that all debate on this section and pending amendment be now closed.

The question was taken, and the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. SHAFROTH. Division!

The committee divided; and there were—ayes 47, noes 94.

So the amendment was rejected.

The Clerk read as follows:

SEC. 60. That the silver peso and its subdivisions shall contain devices to be prescribed by the government of the Philippine Islands, which shall express or symbolize the sovereignty of the United States; the fact that the coins are issued for use in said islands, the denominations of the coins, and the date of their coinage.

Mr. JONES of Virginia. Now, Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Virginia, a member of the committee, is recognized.

Mr. JONES of Virginia. I move to strike out of page 100, lines 20 and 21, the words "or symbolize the sovereignty of the United States."

The Clerk read as follows:

Page 100, lines 20 and 21, strike out the words "or symbolize the sovereignty of the United States."

Mr. JONES of Virginia. Mr. Chairman, these words add absolutely nothing to the sense of this section, and to strike them out will not affect its sense in any way. The chairman of the Committee on Insular Affairs a few days ago declared that it was the purpose of the Republican party to establish in the Philippine Islands "an invincible young republic," and I think that he will admit that the part of this section in which it is provided that there shall be inscribed upon the coin of the islands a device symbolizing the sovereignty of the United States does not very well comport or agree with that declaration.

It seems to me, Mr. Chairman, that if my friend from Wisconsin has correctly defined the purpose of the Republican party, no such device as this bill provides for should be placed upon these coins. To place any such device upon them is to offer to the people of the Philippines an unnecessary and most gratuitous insult. I ask that the words I have indicated may be stricken out. [Cries of "Vote!"]

The CHAIRMAN. The question is on the amendment of the gentleman from Virginia.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. JONES of Virginia. Division!

The committee divided; and there were—ayes 68, noes 96.

So the amendment was rejected.

Mr. HILL. Mr. Chairman, I desire to offer the following amendment.

The Clerk read as follows:

Strike out section 60 and insert:

"SEC. —. That the Mexican silver pesos now in use in the Philippines shall be receivable for public dues at a rate to be fixed by the quarterly proclamation of the civil governor of the Philippines until such date, not later than the 31st day of December, in the year 1903, as may be fixed by public proclamation of the civil governor, when such coin shall cease to be receivable: *Provided, however*, That such proclamation shall be issued and printed in the city of Manila at least sixty days before the date on which such coins cease to be receivable: *And provided further*, That the public offices of the government of the Philippines may at any time refuse to receive such coins as appear to be counterfeit or defective.

"SEC. —. That the silver pesos and the subsidiary silver coins issued under the authority of the Spanish Government for use in the Philippines shall be receivable for public dues at a rate to be fixed by public proclamation of the civil governor until such coins shall cease to be receivable, subject to the same provisions as those prescribed in this act for Mexican pesos.

"SEC. —. That for the purpose of retiring this silver and minor coins issued under authority of the Spanish Government for use in the Philippines and now in circulation there the Secretary of the Treasury is hereby authorized to redeem on presentation in the Philippines all of such coins, at a rate to be fixed by him and made known by the quarterly proclamation of the civil governor of the Philippines.

"The coins so purchased or redeemed and so many of the Mexican silver pesos which may have been received by the government of the Philippines for public dues as the Secretary of the Treasury shall in his discretion purchase may be sold by him or be treated as bullion and be recoined into such coins of the United States now authorized by law as the Secretary of the Treasury may prescribe, and in addition thereto, in his discretion, a half-cent coin of such form and with such devices as he may designate; and such half-cent coin shall be legal tender up to the same amount as the 1-cent coin now authorized by law.

"From andafter three months after the date when this act shall take effect, no coin shall be legal tender in payment of debts thereafter contracted for any amount in the Philippines except those of the United States, unless otherwise expressly provided in the contract, and thereafter all the money of the United States shall be a legal tender in the Philippines to the same extent and with the same limitations that are now provided by law in the United States, and whatever sum may be required to carry out the provisions hereof and to pay all expenses that may be incurred in connection therewith is hereby appropriated, and the Secretary of the Treasury is hereby authorized to prescribe such regulations and employ such agencies as he may deem necessary to accomplish the purpose hereof: *Provided*, That all debts owing in the Philippines on the date when this act shall take effect shall be payable in the legal-tender coin now in circulation in the Philippines unless otherwise expressly provided in the contract, or in the coins of the United States at the rate of exchange as herein provided."

Mr. HILL (during the reading). Mr. Chairman, I ask unanimous consent that the further reading of the amendment may be dispensed with, and that it may be inserted in the RECORD. This amendment provides for American money as a legal tender there precisely the same as we have it here.

Mr. COOPER of Wisconsin. Mr. Chairman, I move that all debate on this section and pending amendment be closed in five minutes.

The motion was agreed to.

Mr. HILL. Mr. Chairman, a few moments ago I said I had changed my purpose and did not intend to offer the amendment for the introduction of American money. I should not have done so if the chairman of the committee had not made the remark which I understood him to make. I understood him to say that he would advocate the free coinage of silver in the Philippine Islands as the Senate proposed before he would consent to the introduction of American money. I will ask the gentleman if I am right?

Mr. COOPER of Wisconsin. The gentleman from Connecticut, in his intensity, did not understand correctly. I do not see how he can keep a sober face and ask such a question of me. I never said anything of the kind, I never thought anything of the kind, I never dreamed of anything of the kind.

Mr. HILL. Did not the gentleman make a statement similar to that on the floor?

Mr. COOPER of Wisconsin. No; I did not. I read from Mr. Jenks, the secretary of the Commission, that he would favor it before he would consent to the introduction of American money.

Mr. HILL. Mr. Chairman, I desire to state—and I will read from the Taft report—that under the proposed provision of the committee bill "foreign trade would be conducted on a gold basis and domestic transactions upon the same basis, but with the token silver currency as an available method of conducting smaller transactions within the islands."

I have before me a statement of Mr. Conant himself, that his purpose in introducing this proposition is to stableize the currency at a present silver basis, and that I am opposed to. He says:

[Extract from testimony of C. A. Conant, page 21. Hearings before Committee on Insular Affairs, January 28, 1902.]

Now, coming down to the vital point of the system which I propose, and the suggestion that the peso would be put off on the natives for an American dollar, I see no reason to believe that any such thing would occur, or that it could possibly occur. The peso, according to the plan outlined in my report, and the bill of Mr. COOPER, is a substitute for the Mexican silver dollar.

Now, so far as the native is concerned, it benefits him materially instead of injuring him. The native suffered from the abandonment of the gold standard in the Philippines about 1884, because he did not realize that the extent of the fall in silver was decreasing the purchasing power of his wages; he continued to receive the same silver wages, but was not aware of the fact that they were declining at an appallingly rapid ratio in gold-purchasing power. What I have proposed in this bill is to arrest this downward course in the purchasing power of wages, to fix the value of the peso absolutely at 50 cents, in gold, instead of 44 cents, to which the Mexican often falls, or even less, although in the summer of 1900 the Mexicans were worth 52 cents, gold.

I also insert as a comment upon the foregoing extracts from the testimony of Mr. McLeod, of Maine, taken by Mr. Conant in that city on September 23, 1901:

Q. You do not believe it would be wise to introduce American currency?

A. Certainly not; because there would come up the question of labor. The native here looks upon a dollar as a dollar, and while in Manila, Iloilo, and Cebu the natives who are more experienced in handling money may consider the American dollar as worth two Mexicans, the native of the country, who forms the great mass of the population, thinks they are the same, and merely considers a dollar a dollar. The wages of the Filipinos here in agricultural districts must certainly be one of the greatest things there is to consider in the country. The country or provincial native earns his money by receiving so much a week and so much rice. If you pay the native a dollar a week, or 87½ cents, as they used to pay them, and offer him 47 cents, he will think that is not enough and that he is getting the worst of it. You would raise the cost of the country's products as a result.

And again:

Since the export of gold the natives have never noticed the difference between the silver dollar at its lower value and its former value when on a parity with gold. They paid out gold dollars in exchange for silver at the former value. The natives have lost through the depreciation of silver one-half of their money. But the native who was getting 87½ cents a week in the provinces for agricultural work was quite as happy to have it at 2 shillings instead of the 4 shillings it was worth twenty years before. He had not noticed the difference.

Now, I ask a vote upon the amendment. I want to state that I conversed with the leading business men in Manila, and they advised me that the danger was not in introducing American coin, but in the delay in introducing it; and when I make that statement I make it as a deliberately, carefully considered opinion of the best judges and the most extensive business houses in the city of Manila. I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was considered and rejected.

Mr. WANGER. Mr. Chairman, I move to amend in line 23, page 100, by striking out the word "date" and inserting the word "year."

Mr. COOPER of Wisconsin. I will accept that amendment, Mr. Chairman.

The CHAIRMAN. The question is on the motion of the gentleman from Pennsylvania to strike out, in line 23, page 100, the word "date" and insert the word "year."

The amendment was agreed to.

The Clerk proceeding with the reading of the bill read as follows:

SEC. 70. That the government of the Philippine Islands is authorized and directed to maintain at all times the parity of the silver coins issued under this act with the gold money of the United States, and for this purpose may, in its discretion—

First. Pay gold coin for silver coin.

Second. Pay silver coin for gold coin.

Third. Sell drafts on its deposits in the United States at a reasonable rate, not exceeding the usual cost of exchange.

Fourth. Transfer any form of money from the current funds of said government to the currency reserve fund.

Fifth. Issue temporary certificates of indebtedness, bearing interest at a reasonable rate, payable at periods of three months or more, but not later than one year, from the date of issue, which shall be in the denominations of $50 or 100 pesos, or some multiple of such sum, and shall be redeemable in gold coin of the United States or in lawful money of said islands, according to the terms of issue prescribed by the government of said islands; but the amount of such certificates outstanding at any one time shall not exceed $5,000,000.

Sixth. Buy gold coin or bullion at a cost not exceeding reasonable charges for its importation into said islands.

Mr. JONES of Virginia. Mr. Chairman, I move to strike out the whole of section 70.

The CHAIRMAN. The gentleman from Virginia moves to strike out section 70.

Mr. JONES of Virginia. Mr. Chairman, I presume our Republican friends are aware of the fact that the silver which these pesos are to contain is only worth, measured in gold, 80 cents.

Mr. HILL. Thirty-seven cents to-day.

Mr. JONES of Virginia. That would be 74 cents. I am not talking about the half dollars; I am talking about pesos. The gentleman from Connecticut says that instead of the pesos being worth 80 cents in gold they are only worth 74 cents. Now, if that be true, then these pesos to the extent of 26 cents are token money, since the silver in them is worth only 74 cents.

They are not 50-cent dollars; they are 74-cent dollars. I do not know how my friend from Connecticut [Mr. HILL] is going to support a measure which provides for palming off upon the Filipino people a dollar which he admits is only worth 74 cents.

Mr. HILL. The gentleman is mistaken; the peso is only 50 cents, and is to be redeemed at 50 cents; but it is worth only 37 cents to-day.

Mr. JONES of Virginia. Mr. Chairman, the gentleman from Connecticut is correct in that. The pesos are to be equivalent to 50 cents. What I should have said is that 2 pesos are made to equal $1, and these pesos are only worth, measured in gold, 37 cents apiece, so that two of them, which it is provided in the bill shall be received for all dues at a dollar, are only in reality worth 74 cents in gold. It therefore being admitted that two of these pesos, which are made equal to and must be received for $1, contain silver worth only 74 cents in gold, the bill, in this section, provides various means by which their parity with a gold dollar may be maintained.

Now, it seems to me that no consistent advocate of the gold standard can possibly support such a measure as this. If a 50-cent dollar is dishonest in the United States, then we think two 50-cent pesos, worth only 74 cents, and required to be accepted for a dollar, must be dishonest in the Philippine Islands. A 74-cent dollar must be a dishonest dollar in the Philippine Islands if a 50-cent dollar is a dishonest dollar in the United States.

It is merely a question of the degree of the dishonesty. Gentlemen who prate about dishonest 50-cent dollars in the United States should be ashamed to vote for a bill which expressly provides for palming off dishonest 74-cent dollars on the poor Filipinos, in whom they profess such great interest. Moreover, this currency is a device by which it is hoped to fool the poor Filipino laborer. The ignorant Filipino regards a peso as the equivalent of a dollar, and it is expected that he will receive these 50-cent pieces, to be called pesos, in exchange for the same amount of work or labor for which he now receives a Mexican dollar, or peso. I hope my amendment will be adopted.

Mr. COOPER of Wisconsin. I move to close debate on the pending section and all amendments in two minutes.

The motion was agreed to.

Mr. KAHN. Mr. Chairman, my attention has been called to the remarks, printed in the RECORD of June 23, of the gentleman from Ohio [Mr. NORTON], wherein he states that in a theater in this city some four months ago I made a speech inconsistent with the speech I delivered on the floor of this House on the 20th of this month. The gentleman is absolutely and entirely mistaken. I have never, at any time or at any place, made a speech respecting the government of the Philippines wherein I uttered views contrary to those expressed by me in this House last Friday.

Mr. WILLIAMS of Illinois. Will the gentleman allow me a question? [Cries of "Question!" "Question!" and "Vote!" "Vote!"] Will the gentleman from California tell this committee whether he is in favor of taking the Filipinos into the United States as citizens at any time in the future? [Cries of "Regular order!"]

Mr. KAHN. I have not time to answer that question. [Laughter.]

The question being taken on the amendment of Mr. JONES of Virginia, there were—ayes 46, noes 86.

So the amendment was rejected.

The Clerk read as follows:

SEC. 76. That the government of the Philippine Islands is authorized, subject to the limitations of this act, to provide by general legislation the terms upon which individuals, copartnerships, and corporations shall engage in the business of banking; and no corporation unless organized under such general law shall issue notes for circulation, and then only to an amount not exceeding its full paid capital and upon deposit with the government of said islands, as security for such notes, of bonds authorized by this act at their par value equal in amount to the notes authorized; and the shareholders of every such corporation authorized to issue notes for circulation shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such associations to the amount of their stock therein at the par value thereof in addition to the amount invested in such shares; and no individual or copartnership shall issue notes for circulation.

Mr. HILL. I offer as a substitute what I send to the desk.

The Clerk proceeded to read the following amendment:

Amend substitute for S. 2295 by striking out all of said substitute bill from and including line 5, page 107, to and including line 22, page 107, and inserting the following:

"THE REGULATION OF BANKING.

"SEC. —. That no person, firm, association, or corporation other than national banking associations shall be permitted to conduct a banking business or to establish or maintain a branch bank in the Philippines after the 30th day of September, in the year 1902, without a license in writing granted by the government of the Philippines. Such license shall be granted, in the discretion of the government of the Philippines, upon application in writing, setting forth the names and domicile of the applicants proposing to do a banking business, the nature of the business, the amount of capital proposed to be employed, and such other particulars as may be required by said government, and said license may be revoked at any time, but such license shall not give authority to issue circulating notes.

"SEC. —. That the provisions of section 5243 of the Revised Statutes of the United States, prohibiting the use of the word 'National' in the title of any bank not incorporated under the national bank act of the United States, are hereby made applicable to the Philippines.

"SEC. —. That all persons, firms, associations, or corporations other than national banking associations engaged in the business of banking in the Philippines shall comply with all regulations which may be prescribed by the government of the Philippines, and full power is hereby conferred upon said government of the Philippines to frame regulations regarding the business of any bank, and to appoint a receiver for winding up its affairs when in the judgment of said government such course is justified, and to impose and enforce proper penalties for failure to comply with such regulations and with the authorized acts of said government.

"SEC. —. That the government of the Philippines may appoint a suitable person or persons, who may be the same as the person designated by the Comptroller of the Currency, for the examination of national banks in the Philippines, which person shall have power to make thorough examination, from time to time, into all the affairs of persons, firms, associations, or corporations other than national banking associations engaged in the business of banking in the Philippines, and in so doing to examine any of the officers and agents of such banks under oath, and who shall make a full and detailed report of their condition to the government of the Philippines.

"SEC. —. By and with the approval of the Comptroller of the Currency any national banking association now or hereafter established in the United States, with a fully paid-up capital of not less than $1,000,000, is hereby authorized to establish and maintain branches in any part of the Philippines. The Comptroller of the Currency is hereby authorized to grant charters to national banking associations in the Philippines only.

"SEC. —. All laws relative to national banking associations shall, so far as they are applicable, have the same force and effect in the Philippines as in the United States, subject to the provisions and limitations of this act; and the provisions of section 5146 of the Revised Statutes are hereby amended so that any resident of the Philippines, otherwise qualified, may act as director of a national bank established or having branches in the Philippines, and no other qualifications shall be required as to residence, except that a majority of the board of directors of any such national bank shall be citizens of the United States or natives of the Philippines, or persons who have under and by virtue of the treaty of Paris acquired the political rights of natives of the Philippines."

Mr. HILL (interrupting the reading of the amendment). Mr. Chairman, as this amendment is somewhat long I ask unanimous consent that the further reading be dispensed with and that the entire amendment be printed in the RECORD. I will explain its purport.

Mr. COOPER of Wisconsin. I move that all debate on this section and pending amendments be closed in three minutes.

Mr. HILL. I have the floor.

The CHAIRMAN. The gentleman from Connecticut has been recognized.

Mr. HILL. Mr. Chairman, I have not the slightest objection to the usual five-minute debate being had on this amendment. But this is an important matter, and I think that the House will see this when I say that the coinage provisions which have been inserted in this bill were, as we have heard over and over again, placed there on the recommendation of the Commission and of Mr. Conant and of the War Department, and when I explain that statement by saying that the banking provisions of the bill are in violation of the recommendations of the Commission, in violation of the recommendations of the War Department, and diametrically opposed to the recommendations of Mr. Conant. If the recommendations of these parties were good in the case of the coinage, they certainly ought to have some weight in regard to the banking proposition.

Now, what is the banking proposition I have introduced here?

It is simply the transfer of the laws of the United States with reference to the national banks to the Philippine Islands, just as we have transferred those national banking laws to Hawaii and Porto Rico. I would ask the chairman of this committee why it is that they have turned down the unanimous recommendation of the Insular Commission, or Judge Taft himself, of the War Department, and of Mr. Conant, and inserted a proposition here under which it will be impossible to issue a bank note in the Philippine Islands. I mean that while it will be physically possible it will be financially impossible.

In addition to that this banking provision of the bill absolutely ignores and by specific legislation violates the vested rights which the Banco de Espanol now has in the Philippine Islands to issue bank notes. It may be a trifling thing in the face of this unanimous recommendation of every party who has had anything whatever to do with this question, both in the Philippine Islands and here, to absolutely wipe out of existence vested interests there because some man has an idea that the proposed recommendations were not what he desires, and I ask the House of Representatives now to adopt this amendment and extend the national-bank laws to the Philippine Islands with this further addition—and aside from that there is not a variation, and I want the House distinctly to understand it—that it provides for taking American capital there by allowing American banks with a capital of $1,000,000 to establish branches in the Philippine Islands, which I think our people on the Pacific coast very much desire.

Now, aside from that, there is not a thing in the whole amendment but what simply provides for extending our laws to the Philippine Islands, so that the Comptroller of the Currency can issue charters for national banks.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut.

The question was taken; and on a division (demanded by Mr. HILL) there were—ayes 30, noes 69.

So the amendment was rejected.

The Clerk read as follows:

SEC. 77. That any bank now doing business in the Philippine Islands which has its notes in circulation shall retire the same on or before the 1st day of January, in the year 1904, or make provision therefor when same are not presented for redemption, under regulations to be made by the government of said islands.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out that section. I should like to ask the gentleman who reports this bill, if I can get his attention, why it is that he wants banks that have been strong enough, if not good enough, to accommodate the United States Government during our troubles in the Philippine Islands, who are conducting and have conducted for years a good banking business over there—why he demands of them to call in the notes of circulation and put nothing in their place, it seems? Now, I ask the gentleman for the information of the House. I think that is a sort of dangerous process of contracting the currency when there is little enough money over there at best.

Mr. COOPER of Wisconsin. The Banco d'Espanola, referred to by the gentleman from Connecticut, and to which the gentleman from Tennessee refers, claims to have an exclusive monopoly, by virtue of its charter derived from the Spanish Crown, to issue bank notes. The United States Government doubts whether under the treaty of Paris that monopoly can be sustained, or whether the United States is bound to recognize that monopoly.

Mr. GAINES of Tennessee. Wherein is it a monopoly?

Mr. COOPER of Wisconsin. The right to exclusively issue notes in the islands is a monopoly.

Mr. GAINES of Tennessee. Have we not continued "existing laws," and does not that necessarily continue this monopoly, if it is one?

Mr. COOPER of Wisconsin. Not under this bill. We are not doing that.

Mr. GAINES of Tennessee. What bank is it that issues this paper money?

Mr. COOPER of Wisconsin. The Banco d'Espanola, the bank in which the friars are largely interested as stockholders. It has a capital of something like one or two million dollars.

Mr. GAINES of Tennessee. You assume that it may be a monopoly——

Mr. COOPER of Wisconsin. It is not assumption. It is an absolute monopoly under the terms of its charter.

Mr. GAINES of Tennessee. Now, then, until you create something else there to take the place of this or permit that bank to go on, or we put something in circulation to take the place of these notes, you are actually drawing in money from circulation, when there is hardly any money over there except the American money, and this money which you say is worth about 34 or 37 cents on the dollar.

Mr. COOPER of Wisconsin. The bill provides that no corporation unless organized under such general laws shall issue notes for circulation, and then only to an amount not exceeding its full face capital and upon deposit of bonds as security. It provides for a bond-secured currency, rather than the straight-asset currency, as we ordinarily understand it.

Mr. GAINES of Tennessee. Then simply because this may be a monopoly they are going to strike the circulation down without putting anything in its place. That is what this section means. We should strike down the exclusive privilege, make it general, and let the notes alone, at least until we put something in their place. Calling in those notes does not kill the monopoly without killing probably the little prosperity the people have there.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee, to strike out section 77.

The question was taken; and the motion was lost.

The Clerk read as follows:

SEC. 82. That all laws passed by the government of the Philippine Islands shall be reported to Congress, which hereby reserves the power and authority to annul the same.

Mr. PATTERSON of Tennessee. Mr. Chairman, I offer as a new section the amendment which I send to the Clerk's desk.

The Clerk read as follows:

Add the following as a new section:

"That from and after the passage of this act there shall be neither slavery nor involuntary servitude in the Philippine Archipelago, or in any province or dependency now held by the United States Government, or which may hereafter be acquired.

"That the so-called treaty or agreement made and entered into between John C. Bates, brigadier-general of United States Volunteers, acting for the Government, and the Sultan of the Sulu Archipelago and the datos whose names appear as parties to said agreement or treaty dated August 20, 1899, be, and the same is hereby, disapproved and disaffirmed, and declared void and of no effect.

"That the purchase, sale, or gifts of slaves in the whole of said archipelago is hereby forbidden and declared illegal, likewise the importation of any person bought or in any manner acquired in a foreign country and transported for the purpose of involuntary servitude to the Philippine Archipelago."

Mr. PATTERSON of Tennessee. Mr. Chairman, I will not occupy the time of the committee more than a moment.

The United States of America is the only civilized power today that is protecting the institution of human slavery. The contract, agreement, or treaty, whatever it may be called, that was entered into between Brig. Gen. John C. Bates and the Sultan of Jolo and the datos, by which they were paid $10,000 in Mexican money, and under the terms of which our Government agreed to protect them in their religious customs and manners, including the institutions of human slavery and polygamy, is still in force. According to the testimony before the Insular Affairs Committee of the House by Governor Taft these sums of money have been paid to the Sultan and the datos from the time this agreement was made up to the present time.

Now, I am aware of the fact that the thirteenth amendment to the Constitution of the United States provides that slavery shall not exist anywhere in any territory subject to the jurisdiction of the United States. And I am aware of the provision which has been inserted in this bill to prohibit slavery there; but the prohibition of slavery is one thing. The existence of slavery under the protection of the United States Government is quite a different thing. So that under this new section which I have offered I want to give the Republican party one opportunity to declare its abhorrence of slavery in the Philippine Islands, and to say that it shall not exist there under the protection of the American flag, under this treaty or agreement.

So far as we upon this side of the Chamber are concerned, if we are permanently to retain the possession of the Philippine Islands, we are opposed to the institution of human slavery.

I am aware that when President McKinley forwarded this treaty, negotiated by General Bates with the Sultan of Jolo, to the Senate of the United States he left the whole matter to Congress. It has been left in that situation ever since, the Congress of the United States having neither affirmed nor disaffirmed this treaty, so that so far as I know this is the first time the question has ever been presented to Congress for the affirmation or disaffirmation of this treaty.

Now, as I have said, I do not care to take up the time of the committee in any general discussion of this subject. The facts are that there are 300,000 or more human slaves in the Philippine Islands, held by these Mohammedan Moros, and the condition of their servitude is a condition of infinite horror. Young children are sold from their mothers, families are separated, and the female slaves are subject always to the desires of their masters. Anyone who has studied this question will understand that this Government is to-day protecting this institution of human slavery in the Philippine Islands.

Now, I want to say that England in 1834 set free every slave within the British Empire, and the United States Government is to-day the only first-class civilized power on earth within whose territory slavery exists.

I simply want to say that the Republicans have an opportunity,

which I present to them, to say or not to say whether slavery shall longer exist in those islands. [Applause on the Democratic side, and cries of "Vote!" "Vote!"]

Mr. COOPER of Wisconsin. Mr. Chairman, I have but a word to say in answer to the gentleman from Tennessee. He said that President McKinley indicated or intimated that he did not approve of the treaty made by General Bates. My impression——

Mr. GROSVENOR. But he says he remitted it to Congress.

Mr. COOPER of Wisconsin. I did not hear.

Mr. GROSVENOR. The gentleman went further than that. He said he remitted the whole thing to Congress.

Mr. COOPER of Wisconsin. Yes. Now, I understand that that is not a statement of the fact. President McKinley did not merely intimate his disapproval, but he expressed his absolute, unqualified disapproval of the treaty so far as it related to the subject of slavery.

Mr. PATTERSON of Tennessee. May I interrupt the distinguished gentleman? Is it not a fact that this Government has been paying the Sultan of Jolo and the datos sums of money that we were to give to them by virtue of the terms of that treaty?

Mr. COOPER of Wisconsin. But that is not the question.

Mr. PATTERSON of Tennessee. One moment. Is not that the fact, I ask?

Mr. COOPER of Wisconsin. That does not meet the proposition. The question that the gentleman is asking does not meet the proposition that he advanced. We can well pay these datos and yet not recognize the existence of slavery. We can pay them these funds to keep the peace. We pay them money to prevent piracy. We pay them money to preserve order within their domains. We can do all that and still not recognize human slavery or put it under our protection.

Mr. PATTERSON of Tennessee. Will my colleague on the committee——

Mr. SULZER. Will the gentleman——

Mr. COOPER of Wisconsin. One moment. One at a time. Now, the gentleman from Tennessee would give the House to understand, and I presume that the purpose of making the motion is to have the impression go to the country through the RECORD, that slavery is practiced generally throughout the archipelago.

Mr. PATTERSON of Tennessee. I have not said so.

Mr. COOPER of Wisconsin. But you do not say it was not true.

Mr. WILLIAMS of Mississippi. He said the Mohammedan portion.

Mr. COOPER of Wisconsin. The Mohammedan islands, in the extreme southern portion of the archipelago, and the island of Mindanao and the Jolo group, which is within the southern portion of the archipelago, have slaves. As I understand, 250,000.

Mr. HAMILTON. Which is the outside.

Mr. COOPER of Wisconsin. Which is the outside limit, as shown by the testimony of Governor Taft. It is more like feudalism than our old-fashioned system of slavery. It has not the barbarities which we usually associate with the system of human slavery. It is a sort of peonage or family affair—they live with the family, and the slaves are often indistinguishable from the members of the master's family.

Mr. GROSVENOR. Not sold.

Mr. COOPER of Wisconsin. They are not sold.

Mr. PATTERSON of Tennessee. Will the gentleman yield to me?

Mr. COOPER of Wisconsin. Not only that, but one of the datos has voluntarily relinquished all slaves and emancipated them. Judge Taft, in his testimony, said that he thought that with the influences which would be exercised upon Mindanao and the whole of the country by the presence of American institutions, methods, ideas, and principles, slavery would gradually be abolished.

Mr. PATTERSON. Will the gentleman allow me to ask him a question?

Mr. COOPER of Wisconsin. It is absolutely impossible, of course, to abolish it at once by a mere statute. It is a practical question, and it takes time. The United States Government is doing all that it can. President McKinley expressly said that he would not recognize slavery, and never has. Congress has not. Therefore the United States has never officially recognized it in those islands, and we prohibit it absolutely by this bill. In addition to that, the Constitution of the United States, in the thirteenth amendment, expressly prohibits it.

Mr. WILLIAMS of Mississippi. Does the thirteenth amendment apply there? [Cries of "Vote!"]

Mr. COOPER of Wisconsin. I move to close debate on this amendment.

The CHAIRMAN. Debate is exhausted.

Mr. SULZER. Mr. Chairman, I take it that the Republican party admits that it stands for slavery. [Cries of "Regular order!"]

Mr. PATTERSON of Tennessee. I simply want to read what President McKinley said.

Mr. TAWNEY. I make the point of order that debate is exhausted.

Mr. PATTERSON of Tennessee. I have not bothered the committee very much, and I shall ask unanimous consent.

Mr. TAWNEY. I object.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to address the committee for two minutes.

Several members objected.

Mr. PATTERSON of Tennessee. Who objects? I simply want to read what President McKinley said.

Mr. WILLIAMS of Mississippi. Mr. Chairman, I make the point of order that no gentleman arose in his seat and objected, and hence the gentleman from Tennessee has his two minutes.

The CHAIRMAN. The House has not disposed of the request. The gentleman asks that his time be extended for two minutes. Is there objection?

Mr. PEARRE. I object.

The CHAIRMAN. Objection is made.

Mr. SULZER. I move to strike out the last word.

The CHAIRMAN. That is not admissible; an amendment is pending.

Mr. GAINES of Tennessee. I move to strike out the section.

The CHAIRMAN. The rule only allows one amendment and debate and five minutes on each side, which has been had, and no other motion is admissible until this amendment is disposed of. The question is on the motion of the gentleman from Tennessee.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. PATTERSON of Tennessee. Division.

The committee divided; and there were—ayes 69, noes 104.

So the amendment was rejected.

Mr. McCALL. Mr. Chairman, I move to amend by adding a new section.

The Clerk read as follows:

Insert the following as section 83:

"In this first organic act, creating a civil government for the Philippine Islands, it is hereby solemnly declared to be the settled purpose of the Congress to extend to the inhabitants of those islands every aid in enabling them to develop the capacity for self-government, and when such capacity shall have been developed we pledge the faith of the Republic to confer upon them the right of self-government after the fashion of the really free nations."

Mr. McCALL. Mr. Chairman, I will occupy the time of the committee only a moment upon this amendment. Different Presidents have spoken upon what should be the ultimate policy of the people of the United States with reference to the future government of the Philippine Islands. I will read now what President Roosevelt said in his first message to Congress last December:

Our aim is high. We do not desire to do for the islanders merely what has elsewhere been done for tropic peoples by even the best foreign governments. We hope to do for them what has never before been done for any people of the Tropics—to make them fit for self-government after the fashion of the really free nations.

The treaty of Paris does not confer on the President the power to fix the status of the people of the Philippine Islands, but imposes that duty upon Congress. I agree most heartily with the utterance I have referred to by President Roosevelt. It seems to me the time has at last arrived when we who are charged by treaty with responsibility in the matter, that now, to-day, four years nearly after we have entered those islands, when we are passing a bill, a comprehensive act, an organic act for the government of the people of the islands, an act which looks far into the future, it is time for Congress to perform its duty under the treaty of Paris and declare in at least general terms what the policy of this people is to be. [Applause.]

This bill contains provisions which should never be enacted unless we couple with them a declaration of the line our policy is to follow. If we are silent as to our ultimate policy, those provisions will operate to determine what it is to be. One part of this bill will foreclose this question unless we write in this law notice of our purpose to the people who may act under it. This bill opens up every stick of timber, every acre of land, every nugget of ore to the people of these islands, to the citizens of the United States, I might say to the world.

Now, our people will go there, capitalists will swarm there like locusts—and I do not mean this in any opprobrious sense, because the movement will grow out of our commercial spirit and enterprise—they will make investments there, and after they have invested, if the proposition is ever made to take the islands from under the jurisdiction and sovereignty of the United States they will come to this Congress and they will say that they have invested their money on the faith of this act; they will appeal to us to protect them.

Gentlemen know as a practical proposition that no matter what

may be the desires of the American people Congress will be practically powerless, and that we shall probably never get out of the islands under those circumstances. The relations between capital and imperialism are very intimate. The Boer war grew out of the investment of capital by the subjects of Great Britain in the two South African Republics. If we invite the capitalists of this country and the world to invest there under the shield of the United States, it is morally certain that everything that has been said by our President, by our ex-commissioners, and our other public men will amount to nothing, and that we shall remain there, if not forever, at least into the far future.

Now, I desire to have it written in this act, so that anybody who goes there will go under notice imbedded in the act, that we are not liable to stay there forever.

Ultimate self-government is the policy, as I construe it, so well enunciated by the President of the United States. It is that about which the people of the United States are thinking more than about anything else connected with the Philippine Islands, and it seems to me here and now are the time and place for us to make some declaration with regard to it. We have followed the policy of drift long enough. We have voted tariffs for those people. We have created an army to subdue them, and we are now constructing a frame of government for them. Somewhere between the covers of this minute bill, in all its 83 sections, we should find room enough to convey a hint of our purpose.

If we can not here find a place to avow our purpose, when, I ask, may we properly state it? Whatever our and their interests may seem hereafter to demand, whatever an awakened sense of fealty to the very principle of our national life may point out, if we are silent now, we shall, I fear, bind these islands to us with cords of steel. This bill contains some liberal features. I think the gentleman from Wisconsin and those upon his committee have considered this question in a broad spirit; but it seems to me it would be vastly improved if the amendment I propose were inserted in it. [Applause.]

Mr. GROSVENOR. Mr. Chairman, I move to substitute for the proposition of the gentleman from Massachusetts the proposition which I send to the Clerk's desk.

The Clerk read as follows:

In this first organic act creating a civil government for the Philippine Islands it is hereby solemnly declared to be the settled purpose of the Congress to extend to the inhabitants of those islands every aid in enabling them to develop the capacity for self-government.

Mr. WILLIAMS of Mississippi. Mr. Chairman, is debate in order?

The CHAIRMAN. It is.

Mr. WILLIAMS of Mississippi. Mr. Chairman, much has been said here in the last two or three days about "running away," much about "cowardice" and "weaklings," and much about our "facing the responsibilities" and "obligations" thrust upon us by the Spanish treaty. Now, I invite every member of this House not to "run away" from the pending proposition——

Mr. LANDIS. I shall not run away.

Mr. WILLIAMS of Mississippi. Not to show any cowardice, but faithfully perform the very first duty laid upon you by the treaty with Spain and to meet bravely the great obligation that is thrust upon you by that treaty.

As a Congress, the first obligation thrust upon you is to "fix the political status of the people of those islands." Now, why will you constantly "run away" even from your own breath? Why are you constantly afraid even to declare your own policy so much as to let your words go out upon the circumambient air so that somebody somewhere may possibly know what you intend to do?

Why not now give notice of your policy to the world, as the gentleman from Massachusetts has said, even in the negative way in which he proposes? Have you any policy that you dare utter? Do you want simply to drift, without the courage to meet the real responsibilities and the real questions; continue to drift without a declaration of policy or intent until you have drifted so far that you can not retrace your steps—until there has drifted into the islands capital and invested interests of many different sorts that will hold you there whether the people behind you want you held there or not? An unsought policy may drift onto you.

Gentlemen, let us not talk always about "courage;" let us show some; let us not always talk about "facing responsibilities;" let us face one now. Suppose before we leave here this evening the American Congress shall declare "the political status of the people of the Philippine Islands," as the treaty of Paris requires, one way or the other—either declare it our way by giving them their independence or declare that they are subjects, colonial subjects, by saying that you are going to hold them perpetually or indefinitely as you are now holding them; or declare that they are to be citizens. We will vote with you if you do the first; meet you in confidence before the people if you do either of the other two things. But declare something.

Do not you think that the American people have a right to expect something of this kind from a great party that has absorbed the initials "G. O. P."—"Grand Old Party?" But I think those letters might better be "S. O. P."—"Smart Old Party," "Dexterous Old Party," "Cunning Old Party." Why not once in your lifetime let it be a "Brave Old Party," Don't you think the people have a right to expect from you simply that you shall utter your thoughts out loud in the public ear—not "run away" every time anybody proposes anything definite?

What do you declare in this bill? You are afraid to declare for the people of the islands their political status. You declare them to be "inhabitants" and "citizens of the Philippines." What is that, in God's name? Everybody knew that they were "inhabitants of the Philippines." And "citizens of the Philippines." What does that mean? What are the Philippines? An independent government? Not yet. How can anybody be a "citizen" of something that is not an independent country?

You decline to say that they are citizens of the United States. You decline to say that they are subjects of the United States. The nearest you have ever got anywhere to a declaration on this subject was in a judicial construction made by one of the judges of the Supreme Court—the others did not unite with him—that they were "citizens appurtenant." Now, just let us have it out here now. We have told the American people what we propose—announced our policy. Say what you mean. If you mean anything at all, have the courage to tell the American people what it is, and do not "run away;" face something. [Loud applause on the Democratic side.]

Mr. GROSVENOR. Mr. Chairman, I think it well that the House should understand what it is proposing to vote for. The proposition of the gentleman from Massachusetts [Mr. MCCALL] is a direct proposition, first, pledging ourselves to teach the Filipinos the arts of civilization, and, second, to create States according to the fashion of free nations.

Mr. MCCALL. Mr. Chairman, if my friend will permit me——

Mr. GROSVENOR. That is the plain English of it. Let me have it, please.

Mr. MCCALL. Does the gentleman understand that President Roosevelt is proposing they may be admitted as States into the Union and that he used the identical language that I do?

Mr. GROSVENOR. I do not care anything about that. I am unwilling to, even under the seductive invitation of the gentleman from Mississippi [Mr. WILLIAMS], force the Republicans of this country into a declaration that goes beyond and mortgages the future as to what shall be done in the matter of the final and ultimate disposition of the Philippine Islands. It is entirely enough to say this:

In this first organic act creating a civil government for the Philippine Islands, it is hereby solemnly declared to be the settled purpose of the Congress to extend to the inhabitants of those islands every aid in enabling them to develop the capacity for self-government.

That is fixing the status, if the gentleman from Mississippi will hear me. Now, what we will do after that is a question to be left to the future. I say not to mortgage the future by any act of the present—not pledge ourselves—for if we do, for all time we will have this language put into our faces when we fail to make Territories and States out of them.

Mr. CRUMPACKER. Mr. Chairman, I would ask the gentleman if his proposed substitute does not carry with it an implied promise?

Mr. GROSVENOR. Not in the slightest.

Mr. CRUMPACKER. Of independence?

Mr. GROSVENOR. Not in the slightest.

Mr. CRUMPACKER. It strikes me that we better keep off that field altogether.

Mr. GROSVENOR. I am perfectly willing to keep off that field, but if I am going on the field I do not propose that all the future of our country shall be thus pledged under the sneers of a Democratic minority, cooperating in this sort of way with members on this side of the House.

Mr. MCDERMOTT. Mr. Chairman, will the gentleman permit a question?

The CHAIRMAN. Does the gentleman yield to the gentleman from New Jersey?

Mr. GROSVENOR. Certainly, if I have any time.

Mr. MCDERMOTT. Will the gentleman accept an amendment to the last few words of his proposed substitute, so that it will read a pledge not to develop the "capacity for self-government," but to develop self-government?

Mr. GROSVENOR. No; "capacity" is quite as far as I want to go right now. [Laughter and applause.]

Mr. DE ARMOND. Mr. Chairman, I believe that we are now at a very important stage of this legislation. The venerable gentleman from Ohio [Mr. GROSVENOR] is apprehensive of a deep-laid design on the part of my friend from Mississippi [Mr. WILLIAMS]—to do what? To force the Republican party to say what it desires to do and what it will do! Now, that is a spectacle for gods and men! The gentleman from Mississippi, in this late hour

in the last days of the session, is seriously trying to force that valiant, that warlike, that brave party to say what it desires to do and to do openly what it desires to do!

I do not wonder at the apprehension of my friend from Ohio—to be thus suddenly attacked in this way, an effort to be made suddenly to force that great party to be honest with the country and honest with itself, to speak out and throw away subterfuges, to declare what its purposes are, and to give the American people the great surprise once, in connection with this Philippine transaction, of finding the party honest and candid! Will my friend from Mississippi refrain from this course of conduct? [Laughter on the Democratic side.]

Why pursue the gentleman from Ohio in this heartless way? Has my friend from Mississippi no bowels of compassion? Does mercy have no influence with him? [Applause and laughter on the Democratic side.] Where will he stop? Does he appreciate the character of his performance? About to force the Republican party to an act, single and alone, of course, in recent years, of honesty and candor! Forbear, forbear, my friend from Mississippi! This is asking too much! It is attempting too much.

I know you can bring enough of force to move those who desire to be honest and those who have any inclination to be candid. I know that. I know that everything involved in the question, I know that every incident and every surrounding fact, unite in protest and join in urging and persuading to one single, lone act of candor and honesty in connection with this Philippine play; but it is too much to hope for, it is too much, when you are in the minority, to strive for. It can not be done.

The gentleman from Ohio is right about it. The party will not be honest. You can not make it honest. It will not be candid. [Laughter and applause on the Democratic side.] Why, it would cease to be the Republican party of to-day if it were to be candid. [Laughter.] It would be a disorganization; it would be abandoning the organization that lives for spoil and plunder, that lives by pretense and hypocrisy. Do not ask it, do not expect it. The astute gentleman from Ohio is right about it. The party can not afford to be honest. The party is damned if it is honest. [Applause and laughter on the Democratic side.]

Honesty is the bane of the party. The party shrinks from it as it shrinks from death. Do not ask so much; do not go into a cruel performance here and endeavor to force it. We can not do it; we have not the numbers. Moral forces, high sentiments, lofty appeals, stern duty, persuasive eloquence, all these will fail. The gentleman from Ohio is going to stand by his guns, and he is going to turn his guns the wrong way. Already they are spiked. The conduct of the party, the pretense, the shambling and shuffling of the leaders, have been effective in spiking their guns. Let the gentlemen alone, alone in the political cowardice and hypocrisy in which they revel. Let them proceed, and by and by, my friends, we will learn what the American people say about it. [Prolonged applause on the Democratic side.]

The CHAIRMAN. The question is on the adoption of the substitute offered by the gentleman from Ohio.

The substitute was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. McCALL].

The question being taken, on a division (demanded by Mr. McCALL) there were—ayes 89, noes 128.

Accordingly the amendment was rejected.

Mr. GAINES of Tennessee. Mr. Chairman, I have an amendment to offer as a new section.

The Clerk read as follows:

SEC. 83. That it shall be and is unlawful for any person or persons, company or companies, firm or firms, corporation or corporations, associations or other concerns created or operating in the Philippine Islands, to create or be a party to any contract, combination, or other arrangement, the effect of which is or may be to curtail, restrain, or prevent full and free competition in all business, or control the price, production, or exchange, sale, or delivery of any goods, merchandise, or other business within the Philippine Islands.

That the supreme court, and courts of first instance in the Philippine Islands, shall possess and exercise jurisdiction as herein, or as may hereafter be provided; in all cases arising under this provision.

Mr. TAWNEY. I make the point of order that the amendment is not germane to the section.

The CHAIRMAN. It is offered as a new section.

Mr. GAINES of Tennessee. I desire to state what the proposed amendment is, and then if it is subject to the point of order the point of order can be sustained.

The CHAIRMAN. The Chair understands that it is offered as a new section, and it is, of course, in order.

Mr. GAINES of Tennessee. This, gentlemen, is an antitrust provision. You have provided everything in the world in the Philippine Islands except the independence of the inhabitants and some law to prevent the people who have not been shot to death from being consumed by the trusts. We have an antitrust law in Alaska which we passed during the last Congress. Everybody voted for that. You have an antitrust law on your statute books, put there by Democrats and Republicans alike. There was not a single dissenting vote when it passed this House.

Mr. TAWNEY. How many votes were there against consideration?

Mr. GAINES of Tennessee. Every Democrat in this House, sir, voted for it, and so did every Republican, on its passage.

Mr. TAWNEY. But every Democrat voted against the consideration of the Sherman antitrust law.

Mr. GAINES of Tennessee. Why, the Democrats helped to frame it.

Mr. TAWNEY. They voted against consideration of it.

Mr. GAINES of Tennessee. This amendment is offered for the benefit of these people in the Philippine Islands. It is in keeping with our antitrust law. It is a remarkable fact that these distinguished lawyers, and distinguished patriots, I may add by way of nick-name, should have proposed a bill here which in some parts of it is a good bill, and should have left the people defenseless in the Philippine Islands, with their rights to be strangled and suppressed, which this amendment would protect. There is no antitrust law there. It is every man for himself and the devil for them all. I want to put upon the statute book some provision, at least, for the protection of these people against the trusts.

Mr. LITTLEFIELD. Will the gentleman excuse me just a moment?

Mr. GAINES of Tennessee. Yes.

Mr. LITTLEFIELD. How many of our Democratic friends in the last Congress voted for the constitutional amendment which was proposed, giving Congress jurisdiction over this matter of trusts?

Mr. GAINES of Tennessee. I voted against it; and you came and took a lot of my anti-trust bill and put it into yours. That was the only good thing in your bill.

Mr. LITTLEFIELD. Your bill was not in the constitutional amendment at all.

Mr. GAINES of Tennessee. No; but you came and got my bill and asked my advice about it and took it. [Laughter.]

Mr. LITTLEFIELD. I want to say to my friend from Tennessee, in the first place I did not ask his advice, although his advice is good. [Laughter.]

Mr. GAINES of Tennessee. Does the gentleman mean to say that he did not come to me and ask me for my bill? [Great and long-continued laughter, and cries of "Vote!"]

Mr. HEPBURN. Mr. Chairman, I think the gentleman from Maine ought to have an opportunity to apologize. [Great laughter.]

Mr. GAINES of Tennessee. I think that he ought to apologize for not getting his bill through the Senate.

Mr. LITTLEFIELD. Now, Mr. Chairman, I can say for the gentleman from Maine that he did not ask the gentleman's advice, neither was there any occasion therefor. Now, I want to ask my friend the question which I rose to ask in the first place. How many of our Democratic friends during the last Congress voted for the constitutional amendment conferring upon the Congress power to control trusts?

Mr. SULZER. What has that got to do with it?

Mr. GAINES of Tennessee. I do not know how many, but the Supreme Court said that we had the power to prohibit trusts and crush them out of existence, and you have not enforced the antitrust law, and the bill that you asked us to pass is lying dead in the Senate of the United States to-day. [Applause on the Democratic side.] And in addition to that you put the provision I had in my bill in your bill. [Great laughter.]

Mr. LITTLEFIELD. Well, now, I will answer the question myself for my friend. Just two Democrats, Mr. NAPHEN of Massachusetts and Mr. NEWLANDS of Nevada, voted for that amendment. That is all.

Mr. COOPER of Wisconsin. Mr. Chairman, I desire the attention of the House a moment in order to reply to the statements of the gentleman from Mississippi and the gentleman from Missouri. The most complete answer to their queries and sarcasm with which I am acquainted is to be found in the testimony of Governor Taft, one of the great—really great—men of the nation. [Applause.] I looked for this testimony while the gentlemen were speaking, but could not find it. I have a copy of it on my desk at my hotel.

If I had had it here I should have met their statements at once; but I have succeeded in finding it in a copy of the CONGRESSIONAL RECORD, and I wish to call the attention of this committee and the country to it. The two gentlemen wished to know what reasons are actuating the Republican party in not now making an express promise of independence to the people of the Philippines.

Mr. Chairman, there are Republicans who are opposed to a permanent colonial system by Republican sanction. There are Republicans who believe that the United States will not continue a colonial system permanently. But, be that as it may, there are

Republicans who exercise judgment enough to know that it is not well to make promises under circumstances like those which surround us in the archipelago.

In this connection, I call attention to the testimony of Governor Taft. It is a complete answer to the suggestions of the gentleman from Missouri and the gentleman from Mississippi. When Governor Taft was asked if we should not make the promise of independence, he said:

No, sir; and I will say why. Nothing that can to-day be said to the Filipino people in the nature of a promise as to the form of government which may take place after an established stable government shall be formed could be otherwise than misleading to them and confusing in establishing that government.

It would at once begin the agitation among those who desire that separation to have that separation, because, in their opinion, they are fitted for it at once. It would drive away from the support of the stable government that conservative element who are strongly in favor of American guidance and control, because they would anticipate an early change.

They would think they would early be left without the support which the presence of the American Government necessarily gives, and the promise of something in the future, instead of helping to establish, would render unstable any government which was attempted to be established.

Again he said:

The personal hostility between leading Filipinos at times has been so great as to lead to bloody measures. How far they would be carried here I have no idea. That is conjectural.

In addition to that, he said:

In addition to that, by reason of the constant agitation as to the granting of this independence in a year or two years or three years or a decade, it would at once discourage the sincere efforts of the educated Filipinos who are with us to-day in building up a stable government. For these reasons I think such a promise as that would be a great mistake.

[Loud applause on the Republican side.]

Governor Taft came from the bench, where he had a life position, to see President McKinley. He has more than once said that when he entered the White House he had no more of thought of going to the Philippines on his present mission than he had to go to some far-off part of the world to be a hermit; but, said he, "President McKinley talked with me for hours, and when I came away I had another conception of what a man's duty is to his generation, and I decided to go."

Governor Taft said to me what he has been quoted as saying to others—members of the House have seen it in print: "I would go back to the Philippine Islands if there were no salary attached to the office rather than forsake that people. I know what the possibilities of that situation are; I know what my duty is. I have a deep interest in those people, and the Republic of the United States will be glad finally that we stayed to help them along." [Loud applause on the Republican side.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment was rejected.

The Clerk proceeded with and completed the reading of the bill.

Mr. JONES of Virginia. Mr. Chairman, if the reading of the bill is completed and there are no further amendments to be offered, I desire, on the part of the minority members of the Committee on Insular Affairs, to offer as a substitute for the House bill as amended the bill which I send to the Clerk's desk, and I ask that it be considered as pending in the House under the rule. I ask that the reading be dispensed with.

Mr. PAYNE. I supposed under the order it was to be reported to the House anyway.

Mr. JONES of Virginia. I do not want to lose the opportunity given me under the rule, and therefore I offer it now and ask that it be considered as pending in the House.

The CHAIRMAN. The gentleman from Virginia offers an amendment in the nature of a substitute for the House bill, and the gentleman asks unanimous consent that the reading of the bill be dispensed with. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER of Wisconsin. Mr. Chairman, I move the adoption of the amendment proposed by the Committee on Insular Affairs in the nature of a substitute for the Senate bill.

The CHAIRMAN. The gentleman offers the amendment proposed as a substitute as amended by the committee.

The question was taken; and the amendment in the nature of a substitute for the Senate bill was agreed to.

Mr. COOPER of Wisconsin. Mr. Chairman, I move that the committee do now rise and report the bill as amended to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GILLETT of Massachusetts, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration Senate bill 2295 and had directed him to report the same back with an amendment with the recommendation that as amended the bill do pass, also with another amendment in the nature of a substitute.

The SPEAKER. The gentleman from Massachusetts, Chairman of the Committee of the Whole House on the state of the Union, reports that that committee has had under consideration Senate bill 2295 and reports the same back with an amendment, recommending the adoption of the amendment and that the bill do pass; that the committee has also instructed him to report a pending amendment in the nature of a substitute for the consideration of the House. The first question will be on the adoption of the substitute amendment recommended by the minority.

Mr. JONES of Virginia. Mr. Speaker, on that question I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 97, nays 137, answered "present" 7, not voting 110; as follows:

YEAS—97.

Adamson,	Fleming,	Little,	Sims,
Allen, Ky.	Flood,	Lloyd,	Slayden,

Deemer,	Jett,	Robinson, Nebr.	
De Graffenreid,	Joy,	Ruppert,	

So the proposed substitute was rejected.

The following additional pairs were announced:
For the session:
Mr. SHERMAN with Mr. RUPPERT.
Mr. DAYTON with Mr. MEYER of Louisiana.
Until further notice:
Mr. LOUDENSLAGER with Mr. DE GRAFFENREID.
Mr. HENRY C. SMITH with Mr. TAYLOR of Alabama.
Until June 28:
Mr. JOY with Mr. COCHRAN.
Mr. EVANS with Mr. HENRY of Mississippi.
For this day:
Mr. MAHON with Mr. DAVEY of Louisiana.
Mr. SPERRY with Mr. MCLAIN.
Mr. HEATWOLE with Mr. PUGSLEY.
Mr. WM. ALDEN SMITH with Mr. JETT.
Mr. WOODS with Mr. MUTCHLER.
Mr. FLETCHER with Mr. BELL.
Mr. BALL of Delaware with Mr. NEWLANDS.
Mr. WADSWORTH with Mr. BELMONT.
Mr. FORDNEY with Mr. WHEELER.
Mr. SUTHERLAND with Mr. GLENN.
Mr. CANNON with Mr. LIVINGSTON.
Mr. REEVES with Mr. CONRY.
Mr. MUDD with Mr. NEVILLE.
Mr. DOVENER with Mr. WILSON.
Mr. MINOR with Mr. GOOCH.
Mr. LEWIS of Pennsylvania with Mr. FOSTER of Illinois.
Mr. HITT with Mr. DINSMORE.
Mr. DEEMER with Mr. COONEY.
Mr. CURTIS with Mr. CREAMER.
Mr. BABCOCK with Mr. NORTON.

The result of the vote was announced, as above stated.

The SPEAKER. The question is now on agreeing to the amendment recommended by the Committee of the Whole House.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and it was accordingly read the third time.

The SPEAKER. The question is now on the passage of the bill.

Mr. COOPER of Wisconsin. On that question I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 140, nays 97, answered "present" 4, not voting 110; as follows:

YEAS—140.

Adams,	Davidson,	Ketcham,	Pearre,

So the bill was passed.

The following pair was announced:
For this vote:
Mr. WACHTER with Mr. GRIGGS.

The result of the vote was announced as above recorded.

On motion of Mr. COOPER of Wisconsin, a motion to reconsider the last vote was laid on the table.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

H. R. 1456. An act granting a pension to William G. Miller;
H. R. 14206. An act granting a pension to Mary J. Moore;
H. R. 14042. An act granting an increase of pension to George W. Edgington;
H. R. 621. An act for the relief of Daniel Cherry;
H. R. 8108. An act for the relief of John Hornick;
H. R. 10279. An act to pay the claim of Stephen B. Halsey;
H. R. 8769. An act for the relief of S. J. Bayard Schindel;
H. R. 6031. An act authorizing the payment of part of the pension of Ira Steward to Adell Augusta Steward;
H. R. 12205. An act to provide for circuit and district courts of the United States at Valdosta, Ga.;
H. R. 14208. An act granting an increase of pension to Alexander Murdock;
H. R. 14802. An act for the purchase of real estate, for revenue and customs purposes, at Wilmington, N. C.;
H. R. 6009. An act granting a pension to Absolum Maynard;
H. R. 14656. An act granting an increase of pension to Charles A. Scott; and
H. R. 4170. An act granting an increase of pension to Henry P. Macloon.

The SPEAKER announced his signature to enrolled bills of the the following titles:

S. 6270. An act to amend an act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902;
S. 4284. An act to amend an act entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," approved January 14, 1889;
S. 2848. An act for the establishment of a subport of entry at Naco, Ariz.;
S. 3651. An act appropriating the sum of $3,000 a year for the support and maintenance of the permanent international commission of the congresses of navigation, and for other purposes; and
S. 5269. An act to provide a commission to secure plans and designs for a monument or memorial to the memory of Abraham Lincoln, late President of the United States.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills and joint resolutions of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 2865. An act for the protection of fish and game in the Indian Territory—to the Committee on Indian Affairs.

S. 2644. An act to promote the circulation of reading matter among the blind—to the Committee on the Post-Office and Post-Roads.

S. 1668. An act for the relief of Custis Parke Upsher—to the Committee on Claims.

S. 2342. An act for the relief of the legal representatives of George W. Curtis, deceased—to the Committee on Claims.

S. 4722. An act for the erection of a building for the use and accommodation of the Department of Agriculture—to the Committee on Public Buildings and Grounds.

S. 4083. An act for the relief of Surg. John F. Bransford, United States Navy—to the Committee on Naval Affairs.

S. 215. An act regulating the duties and fixing the compensation of the customs inspectors at the port of New York—to the Committee an Ways and Means.

S. 1156. An act for the relief of John C. Ray, assignee of John Gafford, of Arkansas—to the Committee on Claims.

S. 1468. An act for the relief of Henry Bash—to the Committee on Claims.

S. 3248. An act to establish a fish hatchery and fish station in the State of Maryland—to the Committee on the Merchant Marine and Fisheries.

S. 4986. An act to amend an act entitled "An act to receive arrearages of taxes due the District of Columbia to July 1, 1900, at 6 per cent per annum in lieu of penalties and costs," approved February 15, 1902—to the Committee on the District of Columbia.

S. 5531. An act for the relief of James F. McIndoe—to the Committee on Claims.

S. 6023. An act for the relief of John Scott—to the Committee on Claims.

S. 6123. An act granting an increase of pension to Thomas L. Collins—to the Committee on Invalid Pensions.

S. 6232. An act for the relief of I. I. Barber—to the Committee on Private Land Claims.

S. 6250. An act to regulate the use by the public of reservoir sites located upon the public lands of the United States—to the Committee on the Public Lands.

S. R. 97. Joint resolution to authorize certain officers of the Treasury Department to audit and certify claims of certain counties of Arizona—to the Committee on Claims.

S. R. 120. Joint resolution providing for the removal of shoal in North River of New York Harbor—to the Committee on Rivers and Harbors.

And then, on motion of Mr. PAYNE (at 7 o'clock and 56 minutes p. m.), the House adjourned until to-morrow at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. LITTLEFIELD, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 14275) to provide for the appointment of a district judge for the western judicial district of South Carolina, and for other purposes, reported the same with amendments, accompanied by a report (No. 2685); which said bill and report were referred to the House Calendar.

Mr. DICK, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 15257) to cede jurisdiction over place on which the National Home for Disabled Volunteer Soldiers is located to the State of Ohio, reported the same with amendment, accompanied by a report (No. 2693); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. POWERS of Massachusetts, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 15066) to incorporate the Association of Military Surgeons of the United States, reported the same without amendment, accompanied by a report (No. 2695); which said bill and report were referred to the House Calendar.

Mr. BABCOCK, from the Committee on the District of Columbia, to which was referred the joint resolution of the House (H. J. Res. 198) giving authority to the Commissioners of the District of Columbia to make special regulations for the occasion of the Thirty-sixth National Encampment of the Grand Army of the Republic, to be held in the District of Columbia in the month of October, 1902, and for other purposes incident to said encampment, reported the same with amendments, accompanied by a report (No. 2696); which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ALEXANDER, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 14764) to establish United States courts at Wilkesboro, N. C., reported the same without amendment, accompanied by a report (No. 2699); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SOUTHARD, from the Committee on Coinage, Weights, and Measures, to which was referred the bill of the House (H. R. 6261) to establish a branch mint of the United States at Omaha, in the State of Nebraska, reported the same without amendment, accompanied by a report (No. 2703); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CLARK, from the Committee on Patents, to which was referred the bill of the House (H. R. 12451) amending the statutes relating to patents, relieving medical and dental practitioners from unjust burdens imposed by patentees holding patents covering methods and devices for treating human diseases, ailments, and disabilities, reported the same with amendments, accompanied by a report (No. 2702); which said bill and report were referred to the House Calendar.

Mr. JENKINS, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 10300) conferring jurisdiction upon the circuit and district courts for the district of South Dakota in certain cases, and for other purposes, reported the same without amendment, accompanied by a report (No. 2704); which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions of the following titles were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. TRIMBLE, from the Committee on Claims, to which was referred the bill of the House (H. R. 15217) for the relief of George Lea Febiger, reported the same without amendment, accompanied by a report (No. 2684); which said bill and report were referred to the Private Calendar.

Mr. DEEMER, from the Committee on Invalid Pensions, to which was referred the bill of the Senate (S. 5239) granting an increase of pension to Joseph A. Kerbey, reported the same without amendment, accompanied by a report (No. 2686); which said bill and report were referred to the Private Calendar.

Mr. DICK, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 5381) to correct errors in dates of original appointments of Capt. James J. Hornbrook and others, reported the same without amendment, accompanied by a report (No. 2692); which said bill and report were referred to the Private Calendar.

Mr. PARKER, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 13605) for the relief of George A. Detchemendy, reported the same with amendment, accompanied by a report (No. 2694); which said bill and report were referred to the Private Calendar.

Mr. SLAYDEN, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 6326) for the relief of Hiram C. Walker, reported the same without amendment, accompanied by a report (No. 2697); which said bill and report were referred to the Private Calendar.

Mr. SNODGRASS, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 4641) for the relief of Benjamin Franklin Handforth, reported the same with amendment, accompanied by a report (No. 2698); which said bill and report were referred to the Private Calendar.

Mr. DICK, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 560) to correct the military record of John Shelton, reported the same without amendment, accompanied by a report (No. 2700); which said bill and report were referred to the Private Calendar.

Mr. BUTLER of Pennsylvania, from the Committee on Claims, to which was referred the bill of the Senate (S. 1206) for the relief of Frank J. Burrows, reported the same without amendment, accompanied by a report (No. 2701); which said bill and report were referred to the Private Calendar.

ADVERSE REPORTS.

Under clause 2, Rule XIII, Mr. SNODGRASS, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 1737) for the relief of Herbert Cushman, reported the same adversely, accompanied by a report (No. 2691); which said bill and report were ordered to lie on the table.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 10260) granting an increase of pension to Will Apitz, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. KLEBERG: A bill (H. R. 15270) to amend an act entitled "An act authorizing the Aransas Harbor Terminal Railway Company to construct a bridge across the Corpus Christi Channel, known as the Morris and Cummings ship channel, in Aransas County, Tex."—to the Committee on Interstate and Foreign Commerce.

By Mr. FLETCHER (by request): A bill (H. R. 15271) relating to the payment of money from the United States Treasury to aid in the support of State Soldiers' Homes—to the Committee on Military Affairs.

By Mr. RICHARDSON of Alabama: A bill (H. R. 15272) to amend section 532 of the Revised Statutes of the United States, and for other purposes—to the Committee on the Judiciary.

By Mr. MOON: A resolution (H. Res. 318) for the consideration of H. R. 12268—to the Committee on Rules.

By Mr. APLIN: A resolution (H. Res. 319) providing for the printing of the last issue of the House Calendar of the first session of the Fifty-seventh Congress as a House document—to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. MONDELL: A bill (H. R. 15269) to pay John Iredale for services as folder in April, 1901—to the Committee on Appropriations.

By Mr. CLARK: A bill (H. R. 15273) granting an increase of pension to Garland Spencer—to the Committee on Invalid Pensions.

Also, a bill (H. R. 15274) granting a pension to Josephine B. Harris—to the Committee on Invalid Pensions.

Also, a bill (H. R. 15275) granting a pension to Peter Berg—to the Committee on Invalid Pensions.

By Mr. GAINES of Tennessee: A bill (H. R. 15276) for the relief of William N. Bilbo, jr., administrator—to the Committee on War Claims.

By Mr. KETCHAM: A bill (H. R. 15277) granting a pension to Mary Schoonmaker—to the Committee on Invalid Pensions.

By Mr. MOSS: A bill (H. R. 15278) granting a pension to Francis Tate—to the Committee on Invalid Pensions.

By Mr. NAPHEN: A bill (H. R. 15279) to amend the military record of Timothy W. Riley, alias John Henneny—to the Committee on Military Affairs.

By Mr. PATTERSON of Tennessee: A bill (H. R. 15280) for the relief of the estate of R. B. Owen, deceased—to the Committee on War Claims.

By Mr. PUGSLEY: A bill (H. R. 15281) granting a pension to Kate H. Morris—to the Committee on Pensions.

By Mr. SIMS: A bill (H. R. 15282) granting a pension to Martha A. Sanders—to the Committee on Invalid Pensions.

By Mr. SOUTHARD: A bill (H. R. 15283) for the relief of George L. Adams—to the Committee on Military Affairs.

By Mr. BURNETT: A bill (H. R. 15284) to remove the charge of desertion from the record of Robert A. Godsey—to the Committee on Military Affairs.

By Mr. HOPKINS: A bill (H. R. 15285) to remove the charge of desertion from the military record of William Morrison—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ALEXANDER: Resolutions of Buffalo Business Men's Credit Council, of Buffalo, N. Y., favoring a bill to authorize the Mather Power Company to construct experimental span in Niagara River at Buffalo, N. Y.—to the Committee on Interstate and Foreign Commerce.

By Mr. BARTLETT: Resolution of the fourth annual convention of the Georgia Federation of Labor, favoring the passage of the Grosvenor anti-injunction bill—to the Committee on the Judiciary.

By Mr. BEIDLER: Petition of the American Committee on Human Rights and Justice, in relation to the administration of affairs in the Philippines, especially against the disregard of the Catholic faith and institutions of the people—to the Committee on Insular Affairs.

Also, petition of The American Association of Nurserymen, of Rochester, N. Y., asking for the passage of House bill 10999—to the Committee on Agriculture.

By Mr. BOUTELL: Petition of citizens of Chicago, for the erection of a monument to Baron Steuben—to the Committee on the Library.

By Mr. BUTLER of Pennsylvania (by request): Petition of W. C. Kelly and others, of Chester, Pa., in favor of House bill 178, for the reduction of the tax on alcohol—to the Committee on Ways and Means.

By Mr. CASSINGHAM: Paper to accompany House bill relating to the claim of Isaac Dewitt—to the Committee on Claims.

By Mr. DRAPER: Petition of American Association of Nurserymen, advocating the passage of House bill 10999, in favor of national quarantine of diseased and infected trees and plants—to the Committee on Agriculture.

Also, protest of American Committee on Human Rights and Justice, of Philadelphia, Pa., against alleged injustice to Catholics in the Philippines—to the Committee on Insular Affairs.

Also, protest of the Wine, Liquor, and Beer Dealers' Association of the State of New York, against the passage of House bill 14019, increasing the liquor license in the District of Columbia—to the Committee on the District of Columbia.

By Mr. GOLDFOGLE: Petition of citizens of the Ninth Congressional district of New York, in favor of the passage of House bill 12203—to the Committee on Invalid Pensions.

By Mr. GORDON: Petition of Valley City Federal Union, No. 8649, Sidney, Ohio, for more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. HOWELL: Petition of Carpenters and Joiners' Union of Bridgeton, N. J., for increase of pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. JONES of Washington: Petition of the Chamber of Commerce of Tacoma, Wash., favoring the passage of House bill 242, concerning the regulation of gasoline and other launches—to the Committee on the Merchant Marine and Fisheries.

By Mr. LACEY: Petition of Green and Bentley Drug Company, of Oskaloosa, Iowa, in favor of House bill 178, for the reduction of the tax on alcohol—to the Committee on Ways and Means.

By Mr. MANN: Petitions of South Park Drug Company, J. E. Grubb, and other retail druggists of Chicago, Ill., urging the reduction of the tax on alcohol—to the Committee on Ways and Means.

Also, petition of the American Association of Nurserymen, of Rochester, N. Y., asking for the passage of House bill 10999—to the Committee on Agriculture.

Also, resolutions of the Illinois National Guard and Naval Militia Association, in favor of the passage of House bill 11654, to promote the efficiency of the militia—to the Committee on the Militia.

By Mr. PUGSLEY: Protest of the Pure Oil Company of Pittsburg, Pa., against the passage of the ship-subsidy bill—to the Committee on the Merchant Marine and Fisheries.

Also, resolutions of West Side Lodge, No. 320, International Association of Machinists, of New York, favoring the construction of war vessels at the Government navy-yards—to the Committee on Naval Affairs.

Also, petition of American Association of Nurserymen, advocating the passage of House bill 10999—to the Committee on Agriculture.

Also, resolutions of Electrical Workers' Union No. 3, of New York, in favor of the proposed increase of pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. RAY of New York: Petition of Belden Post, No. 342, of Richford, Grand Army of the Republic, Department of New York, favoring a bill to modify the pension laws—to the Committee on Invalid Pensions.

By Mr. SULZER: Petition of Wine, Liquor, and Beer Dealers' Association of the State of New York, in opposition to the passage of House bill 14019, increasing the liquor license in the District of Columbia—to the Committee on the District of Columbia.

By Mr. YOUNG: Petition of Smith, Kline & French Company, of Philadelphia, Pa., suggesting an investigation of the facts connected with the occupation of the Philippines—to the Committee on Insular Affairs.

Also, protest of American Committee on Human Rights and Justice, of Philadelphia, Pa., against alleged injustice to Catholics in the Philippines—to the Committee on Insular Affairs.

SENATE.

FRIDAY, *June 27, 1902.*

Prayer by Rev. F. J. PRETTYMAN, of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. PRITCHARD, and by unanimous consent, the further reading was dispensed with.

AMENDMENT OF DISTRICT CODE.

Mr. PRITCHARD submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of

Columbia" having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with amendments as follows:

In said amendment, page 1, line 8, strike out "four" and insert "six."

On page 2, strike out lines 7 to 15, inclusive, and in lieu thereof insert the following: "And said Supreme Court shall from time to time divide the said district into subdistricts and prescribe the place in each subdistrict where the justice thereof shall have his office for the transaction of business, and may change the boundaries of such subdistricts and the localities of the offices of the justices therein from time to time as the volume and convenience of the business may require. No justice of the peace during his term of office shall engage in the practice of the law, subject to the penalty of removal from his office. When the number of such justices of the peace shall be reduced by death, resignation, or expiration of term of service, or otherwise, to six, the number of such justices of the peace shall be six only, and if the number shall not be reduced to six until the expiration of the term of the present justices of the peace, only six vacancies shall then be filled."

On page 3, strike out line 1.

On page 5, line 13, after "President," insert "by and with the advice and consent of the Senate."

On page 14, line 19, strike out "drunkards" and insert "any person."

On page 16, line 9, after "compensation" insert "at the rate of $4,000 per annum;" and in line 10, after the word "wills" add the following proviso: "*And provided further*, That the employees of said office shall not be in excess of the number actually necessary for the proper conduct of the office of said register of wills."

On page 32, line 25, strike out "five" and insert "fifth."

On page 35, line 25, strike out "live" and insert "life."

On page 53 strike out lines 23, 24, and 25; and on page 57 strike out lines 1 and 2, and in lieu thereof insert the following:

"SEC. 1073a. Whenever the court shall be satisfied that the party producing a witness has been taken by surprise by the testimony of such witness, such party may, in the discretion of the court, be allowed to prove, for the purpose only of affecting the credibility of the witness, that the witness has made to such party or to his attorney statements substantially variant from his sworn testimony about material facts in the cause, but before such."

On page 61, line 1, strike out "such person or corporation" and insert "the creditor."

On page 64, line 1, strike out "four" and insert "five."

On page 64, line 15, after "court," insert "holding an equity term;" and in line 18, after the word "infant," add "The court shall have power, in its discretion, to grant the prayer of such petition."

On page 68, line 10, strike out "line 3" and insert "lines 2 and 3."

And the House agree to the same.

J. C. PRITCHARD,
W. P. DILLINGHAM,
THOMAS S. MARTIN,
Managers on the part of the Senate.
JOHN J. JENKINS,
SAMUEL W. SMITH,
W. S. COWHERD,
Managers on the part of the House.

The report was agreed to.

CONGRESSIONAL DIRECTORY.

The PRESIDENT pro tempore laid before the Senate the following concurrent resolution of the House of Representatives; which was read, and referred to the Committee on Printing:

Resolved, etc., That there be printed, and bound in cloth, 3,000 copies of a Congressional Directory which embraces the biographies of all members of Congress from the Continental Congress to the Fifty-seventh Congress, inclusive, compiled by O. M. Enyart, 2,000 copies for the use of the House of Representatives and 1,000 copies for the use of the Senate.

DAUGHTERS OF THE AMERICAN REVOLUTION.

The PRESIDENT pro tempore laid before the Senate a communication from the acting secretary of the Smithsonian Institution, transmitting the fourth annual report of the National Society of the Daughters of the American Revolution; which, with the accompanying papers, was referred to the Committee on Education and Labor, and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. C. R. MCKENNEY, its enrolling clerk, announced that the House had passed, each with an amendment, the following bills; in which it requested the concurrence of the Senate:

A bill (S. 2295) temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes; and

A bill (S. 4450) confirming in the State of South Dakota title to a section of land heretofore granted to said State.

The message also announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 13674) amendatory of sections 3339 and 3341 of the Revised Statutes of the United States relative to the internal-revenue tax on fermented liquors;

A bill (H. R. 14801) to make Wilmington, N. C., a port through which merchandise may be imported for transportation without appraisement;

A bill (H. R. 15003) to authorize the construction of a bridge by the New York, Chicago and St. Louis Railroad Company and the Chicago and Erie Railroad Company across the Calumet River at or near the city of Hammond, Ind., at a point about 1,200 feet east of the Indiana and Illinois State line, and about 100 feet east of the location of the present bridge of the New York, Chicago and St. Louis Railroad Company across said river; also to authorize the construction of a bridge by the Chicago and State Line Railroad Company across said river at the point where said company's railroad crosses said river in Hyde Park Township, Chicago, Ill., being at the location of the present bridge of said company across said river in said township; and

A bill (H. R. 15140) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court in the city of Fort Worth, in the State of Texas, on the first Monday in November in each year.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the President pro tempore:

A bill (S. 2848) for the establishment of a subport of entry at Naco, Ariz.;

A bill (S. 3651) appropriating the sum of $3.000 a year for the support and maintenance of the Permanent International Commission of the Congress of Navigation, and for other purposes;

A bill (S. 4284) to amend an act entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," approved January 14, 1889;

A bill (S. 5269) to provide a commission to secure plans and designs for a monument or memorial to the memory of Abraham Lincoln, late President of the United States;

A bill (S. 6270) to amend an act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902;

A bill (H. R. 621) for the relief of Daniel Cherry;

A bill (H. R. 1456) granting a pension to William G. Miller;

A bill (H. R. 4170) granting an increase of pension to Henry P. Macloon;

A bill (H. R. 6009) granting a pension to Absolum Maynard;

A bill (H. R. 6031) authorizing the payment of part of the pension of Ira Steward to Adell Augusta Steward;

A bill (H. R. 8108) for the relief of John Hornick;

A bill (H. R. 8769) for the relief of S. J. Bayard Schindel;

A bill (H. R. 10279) to pay the claim of Stephen B. Halsey;

A bill (H. R. 12205) to provide for circuit and district courts of the United States at Valdosta, Ga.;

A bill (H. R. 14042) granting an increase of pension to George W. Edgington;

A bill (H. R. 14206) granting a pension to Mary J. Moore;

A bill (H. R. 14208) granting an increase of pension to Alexander Murdock;

A bill (H. R. 14656) granting an increase of pension to Charles A. Scott; and

A bill (H. R. 14802) for the purchase of real estate for revenue and customs purposes at Wilmington, N. C.

CIVIL GOVERNMENT FOR THE PHILIPPINE ISLANDS.

Mr. LODGE. I ask that Senate bill 2295, just returned from the House, may be laid before the Senate.

The PRESIDENT pro tempore. The Chair lays before the Senate the amendment of the House of Representatives to the bill (S. 2295) temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes.

Mr. LODGE. I move that the Senate nonconcur in the amendment of the House and ask for a conference on the disagreeing votes of the two Houses thereon.

The motion was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the conferees on the part of the Senate; and Mr. LODGE, Mr. ALLISON, and Mr. CULBERSON were appointed.

PETITIONS AND MEMORIALS.

Mr. QUAY. I present a petition of 152 citizens and residents of the Cherokee Nation, praying for the passage of the bill (H. R. 5956) providing for the allotment of lands of the Cherokee Nation, and for other purposes; which is the order of business for to-day. I move that the petition lie on the table.

The motion was agreed to.

Mr. CLAY presented resolutions of the Board of Trade of Savannah, Ga., favoring the ratification of reciprocal trade agreements with the Dominion of Canada; which were referred to the Committee on Relations with Canada.

Mr. FORAKER presented petitions of 402 citizens of Ohio, praying for the adoption of certain amendments to the internal-revenue law relative to the tax on distilled spirits; which were referred to the Committee on Finance.

He also presented a petition of the Woman's Christian Temperance Union of Oberlin, Ohio, praying for the enactment of a Sunday-rest law for the District of Columbia; which was referred to the Committee on the District of Columbia.

He also presented a memorial of Cigar Makers' Local Union No. 173, of Zanesville, Ohio, remonstrating against any reduction of the duty on tobacco imported from Cuba; which was referred to the Committee on Finance.

He also presented petitions of the Pattern Makers' Association of Dayton; of Iron Molders' Local Union No. 250, of Massillon; of Lodge No. 203, International Association of Machinists, of Akron; of Iron Molders' Local Union No. 143, of Mount Vernon; of the Central Labor Union of Ashtabula; of Lodge No. 453, International Association of Machinists, of Mansfield, and of Lodge No. 200, International Association of Machinists, of Youngstown, all in the State of Ohio, praying for the passage of the so-called eight-hour bill; which were referred to the Committee on Education and Labor.

He also presented a petition of Encampment No. 41, Union Veteran Legion, of Cincinnati, Ohio, praying for the passage of a per diem service pension bill; which was referred to the Committee on Pensions.

He also presented a petition of the Young People's Society of Christian Endeavor, of Greenwich, Ohio, praying for the adoption of certain amendments to the so-called anticanteen law; which was referred to the Committee on Military Affairs.

He also presented resolutions of 100 members of the Baptist Church of Burlington, Ohio, favoring the enactment of legislation to make effective the provisions of the Constitution having reference to the disfranchisement of citizens; which were referred to the Committee on the Judiciary.

Mr. MASON presented resolutions adopted by the Illinois National Guard and Naval Militia Association, praying for the enactment of legislation to promote the efficiency of the militia; which were referred to the Committee on Military Affairs.

He also presented petitions of Retail Clerks' Local Union No. 45, of Streator, and of Retail Clerks' Local Union No. 493, of Decatur, in the State of Illinois, praying for the enactment of a Sunday-rest law for the District of Columbia; which were referred to the Committee on the District of Columbia.

He also presented petitions of Stone City Lodge, No. 124; of Unity Lodge, No. 134, of Chicago, and of Batavia Lodge, No. 213, of Batavia, all of the International Association of Machinists, in the State of Illinois; and of Hopedale Lodge, No. 48, International Association of Machinists, of Milford, Mass., praying for the passage of the so-called eight-hour bill; which were referred to the Committee on Education and Labor.

He also presented petitions of the Woman's Christian Temperance Unions of Kewanee and Lake County; of the Ministerial Union of Dixon, Ill., and of the Rev. Wilbur F. Crafts, of Washington, D. C., praying for the enactment of legislation to prohibit the sale of intoxicating liquors at immigrant stations; which were ordered to lie on the table.

LEWIS AND CLARKE DISCOVERY CENTENNIAL EXPOSITION.

Mr. MITCHELL. I hold in my hand a memorial of the legislature of my State. I ask that it may be read at length, and then I shall ask consent of the Senate that I may occupy not to exceed ten minutes in submitting some remarks in support thereof.

The PRESIDENT pro tempore. The memorial of the legislature of Oregon, presented by the Senator from Oregon, will be read.

The Secretary read as follows:

House concurrent resolution No. 22.

Whereas the State of Oregon and the people of the city of Portland and of the Pacific Northwest States have provided the means for holding a centennial exposition in honor of the Lewis and Clarke expedition to the Pacific coast in the city of Portland during the year 1905; and

Whereas it is believed that the holding of such an exposition will be of great material benefit to the people of the Pacific Northwest and to the General Government of the United States and of all oriental countries: Therefore, be it

Resolved, That Congress be, and they are hereby, requested to make a suitable appropriation for a national exhibit at said fair, and also that proper acts be passed and proper resolutions be presented to the oriental countries and to other foreign governments and the Dominion of Canada, requesting them to make industrial exhibits at said fair. Be it

Further resolved, That our Senators and Members of Congress be, and they are hereby, requested to use every effort in their power to secure the proper legislation by Congress to carry out the spirit and intent of this resolution.

Adopted by the house February 21, 1901.

L. B. REEDER,
Speaker of the House.

Concurred in by the senate February 21, 1901.

C. W. FULTON,
President of the Senate.

Approved February 25, 1901.

T. T. GEER, *Governor.*

[Indorsed.]

House concurrent resolution No. 22, A. C. Jennings, chief clerk. Executive department, State of Oregon, received February 23, 1901. Filed February 26, 1901, F. I. Dunbar, secretary of State.

UNITED STATES OF AMERICA,
STATE OF OREGON, OFFICE OF THE SECRETARY OF STATE,
Salem, Oreg., March 11, 1901.

I, F. I. Dunbar, do hereby certify that I am the secretary of state of the State of Oregon, and custodian of the seal of said State; that the foregoing transcript of house concurrent resolution No. 22 of the twenty-first legislative assembly of the State of Oregon, filed in the office of the secretary of state February 26, 1901, has been by me compared with the original copy of the said house concurrent resolution No. 22, now on file in this office, and that it is a true and correct transcript thereof, and the whole of said original house concurrent resolution No. 22.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol, at Salem, Oreg., this 11th day of March, A. D. 1901.

[SEAL.] F. I. DUNBAR,
Secretary of State.

Mr. MITCHELL. Mr. President, I beg the indulgence of the Senate for a few moments while I submit a remark in support of the legislative memorial just read.

Mr. President, the page of historic military adventure and discovery, either ancient or modern, fails to record a parallel in all that is implied in daring, persevering, successful effort, brilliant accomplishment, and pregnant with such tremendous possibilities, in the face of unparalleled obstacles and discouraging surroundings, comparable with the military expedition of Lewis and Clark across the wilderness of the North American continent in 1804 and 1805.

They were the heroic and persistent vanguard in geographic discovery, exploration, and physical development who blazed the pathway of advancing physical, industrial, and moral civilization, the grandest of this or that of any other age, and which now, in all its splendor and expanding glory, attracts the attention and commands the bewildering admiration of the whole civilized world.

The names of Meriwether Lewis and William Clark are inseparably connected with the military and political history, and the growth and development of American civilization, while their names lead in the great column of names that have become immortal in all ages through grand military and individual geographic achievement.

The historic page which records the unfolding, development, and upbuilding of all nations since the beginning of time is marked at intervals with events which stand as milestones in their national life and which are worthy of commemoration—events which open wide the door of possibilities, immeasurable in character and value, incomparable in importance in their relation to the advancement of spiritual inspiration, or the promotion of the principles of human liberty, or of representative government, or of scientific attainment, or geographic discovery and exploration, or, as is sometimes the case, which mark the beginning of an epoch involving most and at times all of these, and which lead on to a new, a better, and more exalted civilization than that of any which has preceded it—such as the birth of the Saviour, the advent of the Christian religion, the invention of the telescope by Galileo, the discovery of America by Columbus, the landing of the Pilgrims, the Declaration of American Independence, the Louisiana purchase, and last, but not least, the military expedition of Lewis and Clark. All these and many more that might be cited have from the dates of their respective occurrence in the past nineteen hundred years been deemed worthy by all civilized people of being kept alive by appropriate commemorating ceremonies.

The wisdom, the remarkable prescience, of Jefferson which led him to negotiate with the great Napoleon for the Louisiana purchase, and which about the same time inspired him to commission Lewis and Clarke to enter upon the great military expedition of geographic exploration and scientific discovery across the then trackless American continent, have of themselves rendered his name immortal. But why should the names of the men whose military genius, whose remarkable hardihood and untiring perseverance, whose scientific attainment, whose unyielding courage in the face of tremendous obstacles, seemingly insurmountable, enabled them to so successfully execute the commission imposed upon them by President Jefferson, be permitted to fade on the great scroll of American immortals? Why should the passing generations be permitted to forget the grandest achievement in the lines of military and scientific exploration upon the part of two heroic members of the American Army ever recorded by historic pen?

Why should not the millions of our people now living in peace, in prosperity, and many of them in affluence, between the Missouri and the Pacific coast, and reaping the fruits of agriculture, of mining, of grazing, of forestry, of trade, of commerce, and of all the varied industries of a civilization unparalleled by any people in any nation, enjoying the protection of a beneficent government of law and order, and a system of jurisprudence unparalleled by that of any people—why should not they, in an appropriate manner, by an exhibition of their products, testify their appreciation of the men who laid the corner stones of all this magnificent beneficence? Why should we, as a nation, hesitate to join in some proper manner in appropriately commemorating an event in our nation's history that marks the beginning of an era of that history, so pregnant not only with realized benefits, but so full of future possibilities; one that stands as the initiatory in an epoch in the development and exaltation of American civilization? And why should we as a nation, and why should we as a people, irrespective of party, regardless of sectional lines, fail to aid in a proper manner an appropriate industrial and commercial exposition, in commemorating the names and memories of the men who

blazed the pathway that has enabled us to mount these towering heights as a nation and as a people?

And in what manner can the one hundredth anniversary of the passing of the continent by Lewis and Clarke in 1804–5 be so appropriately and conspicuously commemorated, and their names be thus kept forever bright in the world's biographical lexicon of immortal names, and on history's enduring page as by a grand industrial exposition of the varied products of that section of our common country to which their memorable expedition opened an entrance for the builders of physical and moral empire and for the founders of States?

The purpose of my remarks at this time is to attract the attention not only of the Senate and House of Representatives of the United States, but the whole country, to the the fact that it is the settled determination of the people of the great West and of the grand Pacific Northwest, as individuals and as States, to join hands in commemorating the centennial anniversary of the achievements of Lewis and Clarke by holding a grand industrial exposition at Portland, Oreg., in the year 1905. And in this connection I am pleased to be able to state that indeed great and satisfactory progress has already been made in this direction.

Many months ago a corporation for this purpose was organized by many of the leading, influential business men of Oregon, materially aided by prominent business men of the States of Washington and Idaho, having for its purpose the promotion of this enterprise. At the head of this corporation and as its president is Hon. H. W. Corbett, former Senator from that State in this body, one of the wealthiest and most enterprising business men of the Pacific coast, and he has already contributed largely of his means and is untiring in his efforts in promoting the cause. Already more than $350,000 in cash have been raised in support of the enterprise. The legislature of the State of Oregon, nearly eighteen months ago, spoke out boldly and emphatically in favor of the great purpose, as is indicated by the legislative memorial just read. The people not only of Oregon but of all the Pacific coast States are enthusiastic in its favor. The press of the Pacific coast, irrespective of party, without a single exception, is earnest, cordial, and enthusiastic; our public men are a unit, but not less enthusiastic are the people generally of all classes.

It is not our purpose to have in magnitude a Chicago, a Paris, or a St. Louis exposition, but it is our purpose and our firm determination to have an industrial exposition on a scale while somewhat less in pretentions than those, yet one which will, by the magnitude and character of our varied products, command the admiration of all who visit it. We propose to present for the inspection of the people, not only of our own country, but those of foreign countries as well, the varied products of our great Pacific Northwest, which we are sure will elicit not only their astonishment, but their admiration and respect.

Not now, Mr. President, but at the next session of this Congress I shall ask, with the confident expectation that it will be surely granted, some proper Congressional recognition of this proposed exposition, and thus recognized and aided, at least by the smiles and approbation of Congress, we shall hope to have an exposition which will appropriately commemorate the great military and scientific exploration of Lewis and Clarke in 1804 and 1805. I shall do this notwithstanding the statement yesterday of the distinguished Senator from Maine that "we ought not again in a generation take any part whatever in any of these expositions," and in which, after referring to the expositions at Buffalo and Charleston, he further said: "As I have said, I hope the fate of these two will deter subsequent enterprises of this kind." I am sure the great, patriotic heart of the Senator from Maine will not hesitate when the time comes, and the matter is presented in its true light, and when the demand upon the Congress will be in all respects reasonable and modest, to make this one exception, and that we will find him, a distinguished leader of the Senate and of the Committee on Appropriations, cooperating with the people and the States of the great Pacific Northwest in bringing to a successful conclusion a modest industrial exposition, commemorative of the great geographical and scientific achievements of Lewis and Clarke, and which has done so much to open the doors to a great future for so many of the citizens of this country, many of whom come from the New England States.

The PRESIDENT pro tempore. The memorial presented by the Senator from Oregon will be referred to the Select Committee on Industrial Expositions.

REPORTS OF COMMITTEES.

Mr. BARD. I am directed by the Committee on Fisheries, to whom was referred the bill (S. 6286) prohibiting the killing or taking of seals, porpoises, whales, or marine animals, or fish of any kind in the waters of the United States by means of explosive materials, to report it favorably without amendment, and to submit a report thereon.

Mr. HALE. That is a very important bill, to which there is no objection. I should like very much to have it passed now, in order that it may go to the House.

Mr. MORGAN. I think the bill ought to go on the Calendar, Mr. President.

The PRESIDENT pro tempore. The Senator from Alabama objects. The bill will be placed on the Calendar.

Mr. WARREN, from the Committee on Claims, to whom was referred the bill (S. 2429) to provide for the payment of overtime claims of letter carriers excluded from judgment as barred by limitation, reported it with amendments, and submitted a report thereon.

He also, from the same committee, reported a joint resolution (S. R. 126) to provide for the printing of a digest of the decisions of the Court of Claims, together with the rules of practice of and the statutes relating to that court; which was read twice by its title, and referred to the Committee on Printing.

Mr. MASON, from the Committee on Claims, to whom was referred the bill (S. 339) for the relief of Noah Dillard, reported it with amendments. and submitted a report thereon.

Mr. STEWART, from the Committee on Claims, to whom was referred the bill (S. 2488) for the relief of P. S. Corbett, reported it with an amendment, and submitted a report thereon.

Mr. CLAPP, from the Committee on Claims, to whom were referred the following bills, reported them each without amendment, and submitted reports thereon:

A bill (H. R. 367) for the relief of Angus A. McPhee; and

A bill (S. 5272) for the relief of Darwin S. Hall.

Mr. PENROSE, from the Committee on Immigration, submitted a report to accompany the bill (H. R. 12199) to regulate the immigration of aliens into the United States, heretofore reported by him.

Mr. BEVERIDGE, from the Committee on Territories, to whom was referred the bill (H. R. 14383) to validate certain acts of the legislative assembly of the Territory of New Mexico with reference to the issuance of certain bonds, reported it without amendment.

He also, from the same committee, submitted a report to accompany the bill (S. 5422) authorizing the county of Maricopa, of the Territory of Arizona, to issue bonds for the construction of reservoirs and dams for water storage and other purposes, heretofore reported by him.

Mr. McCUMBER, from the Committee on Indian Affairs, to whom was referred the bill (S. 340) to ratify and confirm an agreement with the Turtle Mountain band of Chippewa Indians in the State of North Dakota, and to make appropriations for carrying the same into effect, reported it without amendment, and submitted a report thereon.

Mr. FAIRBANKS, from the Committee on the Judiciary, to whom was referred the bill (H. R. 11656) to incorporate The Society of the Army of Santiago de Cuba, reported it without amendment.

MONUMENT TO PRISON-SHIP MARTYRS.

Mr. WETMORE. I am directed by the Committee on the Library, to whom was referred the joint resolution (H. J. Res. 6) in relation to monument to prison-ship martyrs at Fort Greene, Brooklyn, N. Y., to report it favorably with amendments, and I ask unanimous consent for its present consideration.

Mr. QUAY. I will not object to the consideration of the joint resolution if it is not likely to provoke debate. If it is, I shall be compelled to object. I desire to proceed with the regular order.

The Secretary read the joint resolution; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

The amendments of the Committee on the Library were, on page 1, line 6, before the word "monument," to strike out "said" and insert "a;" in line 7, after the words "New York," to insert "to the memory of the soldiers and sailors of the Colonial forces in the war of the Revolution who perished upon the English prison ships in New York Harbor;" and in line 10, at the beginning of the line, to strike out the words "as aforesaid," and insert "by the State of New York and municipality of New York;" so as to make the joint resolution read:

Resolved, etc., That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $100,000 as a part contribution to the erection of a monument in Fort Greene Park, in the borough of Brooklyn, city and State of New York, to the memory of the soldiers and sailors of the colonial forces in the war of the Revolution who perished upon the English prison ships in New York Harbor: *Provided, however*, That said sum shall not be payable until there has been raised, by private subscription and by public appropriations by the State of New York and the municipality of New York, sums aggregating an additional $100,000: *And provided further*, That said moneys shall not be paid for the erection of a monument, plans for which shall not have been approved by the Secretary of War of the United States and the governor of the State of New York and mayor of the city of New York; and the said moneys shall be expended under the joint supervision of the said Secretary and said governor and said mayor.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time, and passed.

MEMORIAL ADDRESS ON PRESIDENT M'KINLEY.

Mr. KEAN. From the joint special committee on memorial exercises in memory of the late President McKinley I report a joint resolution, and ask for its present consideration.

The joint resolution (S. R. 124) to provide for the printing of the memorial address on the life and character of William McKinley, late President of the United States, by the Hon. John Hay, before the two Houses of Congress, was read the first time by its title and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That there be printed 100,000 copies of the memorial address on the life and character of William McKinley, late President of the United States, delivered by the Hon. John Hay before the two Houses of Congress, with the proceedings on that occasion, of which 33,000 copies shall be for the use of the Senate, 64,000 copies shall be for the use of the House of Representatives, 1,500 copies shall be for the use of the Department of State, 750 copies shall be for the use of Mrs. Ida S. McKinley, and 750 copies shall be for the use of the Hon. John Hay; and the Secretary of the Treasury be, and he is hereby, directed to have printed to accompany the same the memorial card prepared by the Bureau of Printing and Engraving.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MONTGOMERY PATTON AND OTHERS.

Mr. WARREN, from the Committee on Claims, reported the following resolution; which was considered by unanimous consent, and agreed to.

Resolved, That the claims represented by the following bills, to wit: (S. 54) for the relief of Montgomery Patton; (S. 86) for the relief of J. Viosca; (S. 863) for the relief of John F. Kranz; (S. 1130) for the relief of the heirs of William H. DeGroot; (S. 1587) for the relief of the estate of William Crutchfield, deceased; (S. 1588) conferring jurisdiction on the Court of Claims to try, adjudicate, and determine the claim of Bvt. Capt. (Second Lieut.) James Davison, United States Army, retired; (S. 1813) for the relief of William H. Brown; (S. 2528) to confer jurisdiction upon the Court of Claims to adjudicate the claim of Augustine Meaher and Daniel J. McDonald as asministrators of the estates of James M. and Timothy Meaher, and to remove the bar of the statute of limitations therefrom; (S. 2680) for the relief of the estate of Louis Friedman; (S. 2847) for the relief of John Schierling, administrator de bonis non of the estate of Gallus Kerchner, deceased; (S. 2949) for the relief of Jackson Foster; (S. 1853) for the relief of Elizabeth Thomas; (S. 3419) for the relief of customs inspectors; (S. 3511) for the relief of Wynona A. Dixon; (S. 3749) for the relief of Henry M. Smith; (S. 3925) for the relief of the Atlantic Works, of Boston, Mass.; (S. 3948) for the relief of the estate of E. R. Gordon, deceased; (S. 3807) for the relief of Mary F. B. Grice; (S. 4902) for the relief of John H. Baker; (S. 5222) for the relief of M. T. Swick; (S. 5322) for the relief of Mary A. Shaw; (S. 5947) for the relief of Elias J. Riley, administrator of John Riley, deceased; (S. 6140) for the relief of the heirs of William A. White, deceased; (S. 4317) for the relief of John M. Lea; (S. 4753) for the relief of Ellen O. Thomas, administratrix, and (S. 5126) for the relief of William O. Saville, now pending in the Senate, together with all the accompanying papers, be, and the same are hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887. And the said court shall proceed with the same in accordance with the provisions of such act, and report to the Senate in accordance therewith.

Also that the claims represented by the following bills, to wit: (S. 767) for the relief of the estate of Valerie Breaux, deceased; (S. 800) for the relief of Stephen E. Beauchamp; (S. 846) for the relief of the estate of William P. Williamson, deceased; (S. 3441) for the relief of Remy Bagary; (S. 4116) for the relief of estate of Nicholas White, deceased; (S. 4155) for the relief of the estate of Louisa Breaux, deceased; (S. 6181) for the relief of Matilda M. Fairex, administratrix of the estate of Daniel Fairex, deceased; (S. 1121) for the relief of the estate of Henry Von Balsan, deceased; (S. 1124) for the relief of Mrs. M. W. G. Smethurst, sole heir of Laura M. Gibbs, deceased; (S. 4691) for the relief of John I. Rowland; (S. 4695) for the relief of John Wilson; and (S. 5192) for the relief of the estates of John Nelson, deceased; A. J. Donelson, deceased; Sarah Donelson, deceased; and for the relief of the distributees and personal representatives of said decedents now pending in the Senate, together with all the accompanying papers, be, and the same are hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887. And the said court shall proceed with the same in accordance with the provisions of such act, and report to the Senate in accordance therewith.

LIEUT. JOSEPH M. SIMMS.

Mr. MARTIN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same.

WILLIAM P. FRYE,
THOMAS S. MARTIN,
Managers on the part of the Senate.
WILLIAM P. HEPBURN,
J. S. SHERMAN,
W. C. ADAMSON,
Managers on the part of the House.

The report was agreed to.

NEW MEXICO, OKLAHOMA, AND ARIZONA.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by Mr. BEVERIDGE on the 25th instant, reported it without amendment; and the resolution was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Territories be, and it hereby is, authorized to sit during the recess of the Senate, at such times and places as it may desire, for the purpose of considering bills for the admission of the Territories of New Mexico, Oklahoma, and Arizona to statehood, and to send for persons and papers, take testimony, and employ a stenographer, and that the expenses incurred shall be paid from the contingent fund of the Senate upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

BILLS AND JOINT RESOLUTIONS INTRODUCED.

Mr. MILLARD introduced a bill (S. 6293) granting an increase of pension to David Whitney; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. FORAKER introduced a bill (S. 6294) granting an increase of pension to Peter O. Benham; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. PERKINS introduced a bill (S. 6295) directing the Secretary of the Treasury to impose additional countervailing duties on foreign sugars to meet the so-called "cartel" bounties; which was read twice by its title, and referred to the Committee on Finance.

Mr. MASON introduced a bill (S. 6296) for the relief of William M. Loughlin; which was read twice by its title, and referred to the Committee on Claims.

Mr. PETTUS introduced a bill (S. 6297) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Montgomery, in the State of Alabama, on the first Monday in September in each year; which was read twice by its title, and referred to the Committee on the Judiciary.

Mr. PENROSE introduced a bill (S. 6298) to amend section 2743 of the Revised Statutes of the United States concerning the examination of drugs; which was read twice by its title, and referred to the Committee on Finance.

He also introduced a bill (S. 6299) granting an increase of pension to John M. Thomas; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

He also introduced a bill (S. 6300) granting an increase of pension to Brice S. Ramsey; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 6301) authorizing the transmission of postal money orders by wire; which was read twice by its title, and referred to the Committee on Post-Offices and Post-Roads.

Mr. SCOTT introduced a joint resolution (S. R. 125) providing for the appointment of a commission to report a plan for a memorial in honor of the heroes of the Revolutionary war; which was read twice by its title, and referred to the Committee on the Library.

PNEUMATIC TUBES IN THE DISTRICT OF COLUMBIA.

Mr. MASON. I introduce a joint resolution, and ask unanimous consent for its immediate consideration.

The joint resolution (S. R. 128) providing for the laying of pneumatic tubes in the District of Columbia was read, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That authority is hereby given to any person, persons, or corporation who may hereafter obtain a contract with the Government for supplying pneumatic-tube mail service to enter the Capitol and the grounds thereof with lines of pneumatic tubes, connecting the Capitol and the several departments of the Government, the Government Printing Office, and the city post-office and the postal stations.

The Commissioners of the District of Columbia are hereby authorized and directed to permit any person, persons, or corporation having a contract with the Government, as aforesaid, to open the streets or alleys necessary to lay such pneumatic tubes.

The right to lay said pneumatic tubes in the public reservations is hereby authorized under such regulations as may be prescribed by the Secretary of War.

Mr. ALDRICH. The joint resolution ought to go either to the Committee on the District of Columbia or the Committee on Public Buildings and Grounds.

Mr. MASON. It is in the exact language of a joint resolution sent by the Postmaster-General. I offered a resolution, which was referred to the Commitee on Post-Offices and Post-Roads, and sent it to the Post-Office Department for the opinion of the Postmaster-General, and I have just introduced the joint resolution which was prepared by the Post-Office Department.

Mr. ALDRICH. I am not talking about the authorship of the joint resolution. It ought to be considered by some standing committee, and I ask that it be referred to the Committee on the District of Columbia.

Mr. MASON. I think if it is to be referred at all, it should go to the Committee on Post-Offices and Post-Roads, where the pneumatic-tube question has been considered.

Mr. ALDRICH. This is not a question of post-offices. The joint resolution ought to go either to the Committee on the District of Columbia or to the Committee on Public Buildings and Grounds, certainly to one or the other.

The PRESIDENT pro tempore. The Senator from Rhode Island objects to the present consideration of the joint resolution. What is the motion of the Senator?

Mr. ALDRICH. I ask that it be referred to the Committee on the District of Columbia. I think that is the proper committee.

The PRESIDENT pro tempore. The Senator from Rhode Island moves that the joint resolution be referred to the Committee on the District of Columbia.

Mr. MASON. I move to amend the motion by moving that it be referred to the Committee on Post-Offices and Post-Roads.

The PRESIDENT pro tempore. The motion is not amendable except to add instructions. The question is on the motion to refer the joint resolution to the Committee on the District of Columbia.

Mr. MASON. I want to have the yeas and nays taken on that question. The Committee on Post-Offices and Post-Roads had under consideration a resolution, and this is offered as a substitute for it. I see no specially good reason for taking it away from the Post-Office Committee. We have already passed a bill committing the Government to the use of the pneumatic-tube system and authorizing the Post-Office Department to make contracts for the District of Columbia. This matter has been to the Commissioners' office, as I understand it, and it has been to the Postmaster-General, and the Postmaster-General recommends this resolution. It is all to be under the direction of the Commissioners. It only authorizes them, provided the Postmaster-General requests it, to enter into contract, under such directions as the Secretary of War may prescribe. I can see no reason for referring it to either one of the committees named.

Mr. ALDRICH. The joint resolution proposes to authorize the introduction into the Capitol building and various other buildings in the District of Columbia of the pneumatic-tube service. It has nothing whatever to do with the Post-Office Department or the Post-Office Committee. We refer all questions relating to telegraphs, telephones, and all other public service within the District to the Committee on the District of Columbia, and it seems to me, without endeavoring to infringe upon the rights of the Post-Office Committee, that the joint resolution clearly ought to go to the Committee on the District of Columbia.

The PRESIDENT pro tempore. On the motion made by the Senator from Rhode Island the Senator from Illinois demands the yeas and nays.

Mr. MASON. Mr. President, one word. The only object in asking for the immediate consideration of the joint resolution is because the Postmaster-General is authorized now to make contracts for this service, and to send the matter to any other committee simply means that it will be delayed at least for another year, so far as Washington and the District of Columbia are concerned.

The PRESIDENT pro tempore. Is there a second to the demand for the yeas and nays?

The yeas and nays were not ordered.

Mr. MASON. I will withdraw the joint resolution.

Mr. ALDRICH. That can only be done by unanimous consent, but I will not object to the withdrawal.

The PRESIDENT pro tempore. No; the yeas and nays have not been ordered. The joint resolution can be withdrawn.

Mr. ALDRICH. I do not object to it.

The PRESIDENT pro tempore. The Senator from Illinois withdraws the joint resolution.

Mr. MASON subsequently introduced a joint resolution (S. R. 128) providing for the laying of pneumatic tubes in the District of Columbia; which was read twice by its title, and referred to the Committee on the District of Columbia.

PARK IMPROVEMENTS IN THE DISTRICT OF COLUMBIA.

Mr. CLAPP. I introduce a joint resolution and ask unanimous consent for its immediate consideration.

The joint resolution (S. R. 127) authorizing the loan of plans and drawings of park improvements of the District of Columbia was read the first time by its title and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Charles Zueblin, of Chicago, Ill., president of the American League for Civic Improvement, be, and he is hereby, authorized to remove from the Library of Congress such of the plans, drawings, and photographs prepared in connection with the improvement of the park system of the District of Columbia as may be specified by the Superintendent of the said Library, and to exhibit the same, under the auspices of the American League for Civic Improvement, at St. Paul, Minn., and other cities in the United States: *Provided*, That the said Charles Zueblin shall, before the removal of such plans, drawings, and photographs, enter into a sufficient bond to insure the return of such plans, drawings, and photographs in good order: *And provided further*, That no expense shall be incurred by the Government under the operation of this resolution.

Mr. GALLINGER. Mr. President, manifestly the joint resolution ought to go to the Committee on the District of Columbia, and I move its reference to that committee.

Mr. CLAPP. I desire to call the attention of the Senator from New Hampshire to the fact that this has been submitted to the chairman of the Committee on the District of Columbia, and his letter is attached to the joint resolution, approving its passage. It has also been submitted to the chairman of the Committee on Public Buildings and Grounds. It is desirable, if possible, to have the joint resolution passed at this time.

Mr. GALLINGER. I will say in response to the Senator that if the chairman of the Committee on the District of Columbia has approved it that is satisfactory to me.

Mr. CLAPP. His letter is at the desk and can be read to the Senate.

Mr. GALLINGER. I withdraw my motion.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

Mr. PLATT of Connecticut. Let the letter be read.

The PRESIDENT pro tempore. The letter will be read.

The Secretary read as follows:

SENATE OF THE UNITED STATES,
COMMITTEE ON THE DISTRICT OF COLUMBIA,
Washington, D. C., June 7, 1902.

MY DEAR SIR: Inclosed I return the papers which you handed to me in regard to the desire of the American League of Civic Improvement to exhibit the plans of the Park Commission at its annual convention in St. Paul during September next. In reply I would say that the plans belong to Congress, and it will require a special act in order to permit them to leave Washington. I inclose a draft of a joint resolution providing for such permission, and if you will secure its passage in the House I shall be pleased to look after it in the Senate.

Some time ago the Senate passed a concurrent resolution to provide for the publication of the report of the Commission for distribution by members of Congress, but thus far the House has not acted upon it.

Very truly, yours,

JAMES MCMILLAN.

Hon. F. C. STEVENS,
House of Representatives.

Mr. PLATT of Connecticut. I wish that the joint resolution might be read again. I think perhaps it was not understood.

The joint resolution was again read.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

Mr. GALLINGER. I wish to ask the Senator from Minnesota a single question. I notice that this gentleman, whoever he is, wants to exhibit this plan in St. Paul and other cities of the United States. What is his purpose? Is it for gain?

Mr. CLAPP. No; it is so that the people of this country who can not come to Washington may have some idea of the proposed plan of improvement of this city.

Mr. GALLINGER. It is purely educational?

Mr. CLAPP. It is purely educational. I have no objection to inserting the words "the city of New York and other cities." I simply named one city.

Mr. GALLINGER. That is all right. I have no objection to it.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

Mr. MONEY. I ask that it may be again read.

The joint resolution was again read.

Mr. MONEY. I wish to ask if it was reported from the Committee on the Library?

The PRESIDENT pro tempore. The Senator from Mississippi inquires of the Senator from Minnesota whether the joint resolution is reported from any committee.

Mr. CLAPP. No, sir; the joint resolution was drawn by the chairman of the Committee on the District of Columbia. I did not think that it was necessary to have it referred to his committee.

Mr. MONEY. It seems to me that a joint resolution like this ought to go to the Committee on the Library.

Mr. CLAPP. Mr. President, I just want to say this about the joint resolution. There is a plan to improve the city of Washington. It is going to be a large and comprehensive plan; it is going to entail a large expense, and I think the people of this country ought to have an opportunity to see it so that they will appreciate what is being done under the plan. By presenting it under the auspices of the American League for Civic Improvement in the different cities it will give thousands an opportunity to understand and to appreciate what we are doing who never by any other means will know anything about it. I have no particular interest in the matter.

Mr. MONEY. I might agree probably with the Senator in his statement of the good to come from this action; but I think it probably ought to be considered by the committee which peculiarly has charge of these very matters.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

Mr. TELLER. Mr. President, I should like to inquire whether this plan for the improvement of the city has ever been accepted by Congress?

Mr. HALE. I will answer the Senator, if he will allow me?

Mr. TELLER. Very well. I yield to the Senator from Maine.

Mr. HALE. I desire to protest against an inference that may be drawn from what the Senator from Minnesota has said, that here is a plan already embarked upon for an immense improvement, a park system and other expensive features in the District of Columbia. Nothing of that kind has been adopted or entered upon. The Senator says the people of the United States ought to be educated as to what we are doing. We are doing nothing whatever about this great scheme with reference to Washington. The whole matter fell absolutely dead the moment Senators and Representatives began to examine it. No committee has sought to urge it upon Congress. It is purely in the brain of the architect who has designed an immense scheme of improvement that suits him.

Mr. GALLINGER. Will the Senator permit me?

Mr. HALE. Certainly.

Mr. GALLINGER. The Senator, of course, does not want to do injustice to the Committee on the District of Columbia. I wish to say to the Senator that the committee never had any idea that Congress would adopt this plan. It never suggested that Congress should adopt this plan.

Mr. HALE. I so understand.

Mr. GALLINGER. The plan was formulated by a very distinguished commission with the idea that it might serve as a suggestion in the matter of future appropriations for the District of Columbia, and that was the sole purpose.

Mr. HALE. I so understand it, and in what I said I embraced not only the Committee on the District of Columbia as not having sought to force the plan matters upon Congress, but no other committee. That committee has been extremely wise about it. It called a halt when it saw the magnificence of the scheme. It is a scheme which, as I have said, would never have been evoked from any source but the brain of the architect.

Mr. GALLINGER. If the Senator will permit me a single word, the Senator says the committee called a halt, The committee did not call a halt. The committee perfectly understood that Congress could not adopt a plan of this kind.

Mr. HALE. But I understand the committee was asked and declined. That is what I mean by the use of my metaphor that the committee called a halt. The committee did.

Mr. GALLINGER. I think the committee never was asked to do it, Mr. President. Of course, these distinguished architects would like to have their plan followed in the matter of future appropriations, but they did not suggest to the committee, certainly at no meeting when I was present, that we should recommend it to Congress. It was merely a suggestive plan.

Mr. HALE. I want that understood. When this exploiting scheme, when this large assortment of drafts and plans of a scheme is started on its tour around the country as a matter of exhibition, and people are asked to come and pay so much to see it, I do not want it to be understood by them, nor to have the press anywhere assume that it is, to use the language of the Senator from Minnesota, what we are doing, because we have done nothing of the kind.

Mr. GALLINGER. I think that is wise.

Mr. HALE. I am very much in favor of almost everything that comes up for the improvement of this most important and most delightful national city, but I am not in favor of this scheme, which would cost in the end no man can tell what amount—some hundreds of millions of dollars. I believe that Congress can be left to do its own work in that regard from year to year. There will no year pass, Mr. President, that some scheme for the improvement and beautifying of this city will not be taken up and passed. It will not be done all at once. It will not be done at the command or even at the suggestion of any architect who wants to embrace the whole thing in one plan.

I am in favor, from year to year, of the erection of great buildings, the improvement of the roadways, the opening of parks, and all of the things that go to make this city what it will be in thirty years from now—the finest winter residence in all the world; but I protest against anything that we do here to-day being considered here or elsewhere as committing the Congress to this vague, vast, and extraordinary scheme.

The Senator from Connecticut [Mr. PLATT] suggests to me that the object is to stir up sentiment throughout the country in favor of the scheme. If that is the purpose then, Mr. President, I object.

The PRESIDENT pro tempore. Objection is made. What does the Senator from Minnesota desire to have done with the joint resolution, objection having been made to its present consideration?

Mr. PLATT of Connecticut. It lies over.

Mr. ALDRICH. It will lie over until to-morrow.

Mr. CLAPP. I do not understand that objection has been made. It was a mere suggestion that if a certain thing is to result from this matter, objection is made.

Mr. HALE. It had better go over until to-morrow.

The PRESIDENT pro tempore. The joint resolution will lie on the table.

Mr. HALE subsequently said: I ask that Senate joint resolution 127, to which I objected a few moments ago, may be laid before the Senate. I have an amendment to suggest that will be entirely satisfactory to the Senator from Minnesota [Mr. CLAPP], who introduced the joint resolution.

The PRESIDENT pro tempore. The Chair lays before the Senate the joint resolution referred to by the Senator from Maine, the title of which will be stated.

The SECRETARY. A joint resolution (S. R. 127) authorizing the loan of plans and drawings of park improvements of the District of Columbia.

Mr. HALE. I do not ask for the entire reading of the joint resolution, as it has been read so many times, but I should like to have that part read referring to the places where these plans and drawings are to be exhibited.

The PRESIDENT pro tempore. The Secretary will read as requested.

The Secretary read as follows:

At St. Paul, Minn., and other cities in the United States.

Mr. HALE. I move to strike out the words "and other cities in the United States." If that amendment be adopted, I shall not object to the joint resolution.

The PRESIDENT pro tempore. Is their objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The PRESIDENT pro tempore. The amendment submitted by the Senator from Maine [Mr. HALE] will be stated.

The SECRETARY. After the words "St. Paul, Minn.," it is proposed to strike out "and other cities in the United States."

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

COMPILATION ON INDIAN AFFAIRS.

On motion of Mr. STEWART, it was

Ordered, That the compilation prepared under the direction of the Committee on Indian Affairs by authority of the resolution of the Senate of May 20, 1902, being the compilation of all treaties, laws, and Executive orders in force relating to Indian affairs, be printed.

POST-CHECK SYSTEM.

Mr. MASON submitted the following resolution; which, with the accompanying papers, was referred to the Committee on Printing:

Resolved by the Senate, That there be printed, as a document, 1,000 copies of the proceedings and conclusions of the committee appointed by the Secretary of the Treasury and the Postmaster-General to consider the advisability of adopting the "post check;" also the supplemental report of the committee appointed by the Postmaster-General to examine into the merits of the "post-check" system, said document to also include a letter addressed to the chairman of the Committee on Post-Offices and Post-Roads in the Senate, under date of June 19, 1902, by the Postmaster-General, and a letter addressed to the chairman of the Committee on Post-Offices and Post-Roads in the Senate, under date of June 7, 1902, by the Secretary of the Treasury, having reference to Senate bills Nos. 5201 and 4557, providing for a safe and convenient method of sending money in small amounts by mail and to increase the postal revenues, the bills being similar to House bill No. 12799, for the use of the Committee on Post-Offices and Post-Roads in the Senate.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles, and referred to the Committee on Commerce:

A bill (H. R. 14801) to make Wilmington, N. C., a port through which merchandise may be imported for transportation without appraisement; and

A bill (H. R. 15003) to authorize the construction of a bridge by the New York, Chicago and St. Louis Railroad Company and the Chicago and Erie Railroad Company across the Calumet River at or near the city of Hammond, Ind., at a point about 1,200 feet east of the Indiana and Illinois State line and about 100 feet east of the location of the present bridge of the New York, Chicago and St. Louis Railroad Company across said river; also to authorize the construction of a bridge by the Chicago and State Line Railroad Company across said river at the point where said company's railroad crosses said river in Hyde Park Township, Chicago, Ill., being at the location of the present bridge of said company across said river in said township.

The bill (H. R. 13674) amendatory of sections 3339 and 3341 of the Revised Statutes of the United States relative to internal-revenue tax on fermented liquors was read twice by its title and referred to the Committee on Finance.

The bill (H. R. 15140) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court in the city of Fort Worth, in the State of Texas, on the first Monday in November in each year, was read twice by its title and referred to the Committee on the Judiciary.

WILLIAM VICTOR TOMB.

Mr. BLACKBURN. I am directed by the Committee on Naval Affairs, to whom was referred the joint resolution (S. R. 123) for the relief of Naval Cadet William Victor Tomb, United States Navy, to report it without amendment and to submit a report thereon. I ask that it may be read, and then I request its present consideration.

The Secretary read the joint resolution, as follows:

Whereas William Victor Tomb, naval cadet, United States Navy, has been found upon examination to be physically disqualified for promotion to the grade of ensign in the Navy on account of disability incurred in the line of duty: Therefore,

Resolved, etc., That the President be, and he is hereby, authorized to promote the said Tomb to the grade of ensign in the Navy.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

Mr. PLATT of Connecticut. I do not make any objection, but I want some explanation other than appears in the joint resolution itself.

Mr. BLACKBURN. I shall be glad to make it. This cadet served his academic term of four years in the Academy at Annapolis creditably. Then the two years of sea service remaining under the law was given by him in the Philippines, where his present physical disability was incurred. There is no way of retiring a cadet. Hence the Navy Department indorse this joint resolution, and the indorsement of the Secretary of the Navy is attached to the report.

This is to give to this cadet his commission as an ensign now. That is the whole scope of the joint resolution. The cadet failed in nothing except his physical examination when called up here for promotion, and that failure is directly resulting from disability incurred in the line of duty in the Philippines.

Mr. PLATT of Connecticut. Is that physical disability one which is to be permanent, so that we are to put into the Navy a person as an officer who is permanently disqualified?

Mr. BLACKBURN. We can not tell, Mr. President; but we are not willing to drop him now and assume that his disability is permanent. The Secretary of the Navy says that he favors the passage of this joint resolution, giving the young man an opportunity of rebuilding his health; and if that shall result, then he stands without prejudice resulting from this disability incurred in the line of duty. If his health should not be restored, then he is in a position to be retired; but this is the only way in which he can ever get onto the retired list, because there is no way provided by law for the retirement of a cadet. He is a cadet; and the purpose of this joint resolution is to make him an ensign. If his health shall prove to be permanently impaired, then he may be put upon the retired list.

The joint resolution which I have reported has the unanimous indorsement of the Committee on Naval Affairs and the unqualified indorsement of the Secretary of the Navy.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

CONFIRMATION OF TITLE TO LAND IN SOUTH DAKOTA.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 4450) confirming in the State of South Dakota title to a section of land heretofore granted to said State; which was in line 8, after the word "imposed," to insert "the proceeds thereof, if sold, to be used in aid of the militia of the State of South Dakota."

Mr. KITTREDGE. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. C. R. MCKENNEY, its enrolling clerk, announced that the House had passed the bill (S. 4611) to authorize the West Elizabeth and Dravosburg Bridge Company to construct and maintain a bridge across the Monongahela River in the State of Pennsylvania.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CANNON, Mr. BARNEY, and Mr. LIVINGSTON managers at the conference on the part of the House.

The message further announced that the House insists upon its amendment to the bill (S. 2295) temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. COOPER of Wisconsin, Mr. PAYNE, Mr. CRUMPACKER, Mr. JONES of Virginia, and Mr. MADDOX managers at the conference on the part of the House.

The message also announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the House to the following bills:

A bill (S. 1225) granting an increase of pension to Clara W. McNair;

A bill (S. 3320) granting an increase of pension to Adelaide G. Hatch;

A bill (S. 5506) granting an increase of pension to Clayton P. Van Houten; and

A bill (S. 5856) granting an increase of pension to Elizabeth A. Turner.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I ask the Chair to lay before the Senate the action of the House of Representatives on the amendments of the Senate to the general deficiency appropriation bill.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes, and asking for a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HALE. I move that the Senate insist upon its amendments disagreed to by the House of Representatives and agree to the conference asked for by the House.

The motion was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the conferees on the part of the Senate; and Mr. HALE, Mr. ALLISON, and Mr. TELLER were appointed.

CLARA W. M'NAIR.

Mr. GALLINGER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1225) granting an increase of pension to Clara W. McNair, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

J. H. GALLINGER,
WM. J. DEBOE,
Managers on the part of the Senate.

H. C. LOUDENSLAGER,
WILLIAM RICHARDSON,
J. H. BROMWELL,
Managers on the part of the House.

The report was agreed to.

ELIZABETH A. TURNER.

Mr. GALLINGER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 5856, "An act granting an increase of pension to Elizabeth A. Turner," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same.

J. H. GALLINGER,
J. C. PRITCHARD,
Managers on the part of the Senate.

H. C. LOUDENSLAGER,
WILLIAM RICHARDSON,
J. H. BROMWELL,
Managers on the part of the House.

The report was agreed to.

ADELAIDE G. HATCH.

Mr. DEBOE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3320) granting an increase of pension to Adelaide G. Hatch, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

WM. J. DEBOE,
J. R. BURTON,
Managers on the part of the Senate.

H. C. LOUDENSLAGER,
WILLIAM RICHARDSON,
J. H. BROMWELL,
Managers on the part of the House.

The report was agreed to.

CLAYTON P. VAN HOUTEN.

Mr. McCUMBER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5506) granting an increase of pension to Clayton P. Van Houten, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment, and agree to an amendment as follows: After the word "receiving," in line 9, add the following: "*Provided*, That at the expiration of two years after the passage of this act, if the said Clayton P. Van Houten be then living, a medical examination shall be ordered, and the rate of pension allowed by this act shall be subject to change to accord with the degree of disability then existing;" and the Senate agree to the same.

P. J. McCUMBER,
N. B. SCOTT,
Managers on the part of the Senate.
H. C. LOUDENSLAGER,
J. H. BROMWELL,
WILLIAM RICHARDSON,
Managers on the part of the House.

The report was agreed to.

EXECUTIVE SESSION.

Mr. PLATT of Connecticut. I move that the Senate proceed to the consideration of executive business. I wish to say that it is merely for the purpose of taking an order which it is important should be taken at this time. I do not think that we need to have an executive session of more than two or three minutes.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Connecticut.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After six minutes spent in executive session the doors were reopened.

RUSSIA'S ATTITUDE TOWARD AMERICAN CITIZENS.

Mr. PETTUS. I offer a resolution which I ask may be now considered.

The PRESIDENT pro tempore. The Senator from Alabama submits a resolution for which he asks present consideration. The resolution will be read.

The Secretary read as follows:

Whereas it is asserted that American citizens, holding American passports, have been, and are, excluded by the Russian Empire from its territory, solely because of their religious belief, contrary to treaty stipulations: Therefore,

Resolved, That the President of the United States is requested, if not incompatible with the public interest, to inform the Senate as to the attitude of the Russian Government toward American citizens attempting to enter its territory with American passports.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. BEVERIDGE. I do not see any member of the Committee on Foreign Relations present, and I think in their absence——

Mr. BACON rose.

Mr. BEVERIDGE, I beg pardon. I was going to say that I thought the resolution ought to go over in the absence of any member of the Committee on Foreign Relations.

Mr. BACON. There are several present.

Mr. QUAY. I will not object to the resolution with the understanding that it will not provoke debate.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution? The Chair hears none.

Mr. SPOONER. I ask that it be again read.

The Secretary again read the resolution.

Mr. SPOONER. The word "interest" should be inserted in place of the word "service;" so as to read, "not incompatible with the public interest." With that change I have no objection to the resolution.

The PRESIDENT pro tempore. The resolution will be modified as suggested, if there is no objection. The Chair hears none.

Mr. BACON. There is the assertion of a fact in the resolution about which I should like to have some information before we vote.

Mr. ALDRICH. I was about to make that suggestion.

Mr. BACON. It is asserted that a certain thing has been done. I should like to know whether Senators have information that there has been such an assertion upon reliable authority. I do not mean to ask whether or not it is a fact.

Mr. PETTUS. I have information directly from persons who assert that they know that it has been done and is now being done; but I do not know anything about the facts, and I do not assert any fact.

The PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

PANAMA CANAL COMPANY.

Mr. MORGAN. I submit a resolution, and ask for its present consideration.

The PRESIDENT pro tempore. The Senator from Alabama submits a resolution, and asks for its present consideration. The resolution will be read.

The Secretary read as follows:

Resolved by the Senate, That under the authority and powers conferred upon the Committee on Interoceanic Canals it is referred to said committee to investigate and report whether any claims exist in favor of citizens of the United States who are bondholders, shareholders, or creditors of the New Panama Canal Company, or the former Panama Canal Company, and to this end the chairman of said committee is authorized, in addition to the other powers conferred upon the committee, to publish a request that the holders of such bonds, stocks, or demands will present statements of their claims to the committee.

And it is also referred to said committee to ascertain and report to the Senate whether any unlawful or corrupt efforts, practices, or combinations exist on the part of any persons or corporations to obtain any part of the sum that may be applied to the purchase of the property belonging to the New Panama Canal Company by the United States under the authority of any act of Congress.

Mr. HANNA. Mr. President, is the resolution offered for consideration at this time?

The PRESIDENT pro tempore. It is.

Mr. MORGAN. Yes.

Mr. HANNA. I hope the resolution will not be passed.

The PRESIDENT pro tempore. Objection is made, and the resolution will go over.

Mr. HANNA. I am willing to settle it now. I do not see the object of the scope of the resolution as affecting——

Mr. QUAY. Will the Senator from Ohio permit an interruption?

Mr. HANNA. Certainly.

Mr. QUAY. I observe that the resolution is liable to provoke discussion, and I object to its consideration, as I am very anxious to reach the Indian bill.

The PRESIDENT pro tempore. The resolution will go over under the rule.

SAFETY APPLIANCES ON RAILROADS.

Mr. FORAKER. If the Senator from Pennsylvania will yield, I should like to call up the motion to reconsider the vote by which Senate bill 3560 was passed a few days ago. It will take only a moment to dispose of the matter.

The PRESIDENT pro tempore. The Chair lays before the Senate the action of the House of Representatives, returning to the Senate, in compliance with its request, the bill (S. 3560) to amend an act entitled "To promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896.

The question is on agreeing to the motion to reconsider the vote by which the bill was passed.

Mr. FORAKER. I do not resist the motion to reconsider, because it is only that the bill may be amended by the insertion of a line which has been agreed upon.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote by which the bill was passed? The Chair hears none. The bill is before the Senate, and the vote by which it was ordered to be engrossed and read a third time will also be reconsidered if there is no objection. The Chair hears none.

Mr. FORAKER. I move to amend the bill by adding at the end of section 3 the following:

And the provisions of section 7 of the said act of March 2, 1893, shall apply to all the requirements of this act.

Mr. SPOONER. As I understand it, that leaves the date fixed the 1st of next January.

Mr. FORAKER. Yes.

Mr. SPOONER. Subject to extension by the Interstate Commerce Commission upon a proper showing?

Mr. FORAKER. The date remains as fixed in the bill as passed by the Senate, but under this amendment the railroads will have a right to appeal to the Interstate Commerce Commission for an extension of the time.

Mr. ALDRICH. That is satisfactory to me.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Ohio.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ORDERS OF GOVERNOR-GENERAL OF CUBA.

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution coming over from a previous day, which will be read.

The Secretary read the resolution submitted by Mr. MONEY on the 25th instant, as follows:

Resolved by the Senate, That the honorable Secretary of War be, and is hereby, directed to furnish to the Senate at his earliest convenience copies of all orders, general and special, issued by the Governor-General of Cuba from date of the beginning of his administration up to May 20, 1902.

Mr. SPOONER. The chairman of the committee is not in the

Senate Chamber, nor is the mover of the resolution. I think perhaps it might go over to a later period in the afternoon without losing its place.

Mr. QUAY. I hope that will be done.

The PRESIDENT pro tempore. Is there objection to the resolution going over, retaining its place on the table?

Mr. BATE. I ask that it retain its place, in the absence of the Senator from Mississippi.

Mr. SPOONER. I asked that when I made the suggestion.

The PRESIDENT pro tempore. The Chair hears no objection, and it will retain its place on the table.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. ALLISON submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14019) "making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numberd 4, 21, 22, 23, 24, 25, 26, 35, 37, 39, 41, 42, 49, 55, 57, 58, 59, 61, 64, 65, 67, 68, 69, 70, 74, 75, 86, 89, 90, 96, 101, 102, 104, 106, 109, 111, 112, 115, 116, 117, 118, 119, 120, 121, 126, 127, 129, 130, 131, 132, 133, 136, 137, 138, 139, 143, 145, 146, 147, 151, 152, 153, 163, 164, 165, 166, 167, 168, 169, 175, 176, 177, 184, 190, 195, 196, 201, 206, 207, 208, 210, 211, 212, 213, 214, 215, 216, 217, 218, 228, and 229.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 27, 31, 33, 34, 38, 40, 43, 44, 45, 47, 48, 50, 52, 53, 54, 58, 60, 62, 63, 66, 71, 72, 73, 76, 77, 79, 80, 82, 83, 84, 85, 88, 91, 92, 94, 95, 97, 98, 99, 100, 103, 105, 113, 114, 122, 123, 124, 125, 140, 141, 142, 144, 148, 149, 150, 154, 155, 156, 160, 171, 178, 179, 181, 182, 185, 186, 187, 188, 189, 197, 198, 199, 200, 202, 203, 204, 205, 219, 220, 221, 222, 223, 224, 225, and 227, and agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$69,224;" and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In line 1 of said amendment after the word "that" insert "hereafter;" and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment as follows: Strike out all of the matter inserted by said amendment down to and including the word "aforesaid," in line 16 thereof, and insert in lieu thereof the following: "*Provided*, That hereafter when differences arise in the examination of the accounts of the disbursing officer of the District of Columbia, calling for the suspension of any item in said accounts, it shall be the duty of the auditor for the State and other Departments, who settles said accounts, to notify the auditor of the District of Columbia, in connection with the disbursing officer of the District of Columbia, of the grounds of such objections resulting in said suspensions, in order that said auditor, in connection with said disbursing officer, may by explanation, if possible, remove said grounds of suspension;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,600;" and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,000;" and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,800;" and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: On page 12 of the bill, in line 18, before the word "fuel," insert the word "rent;" and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: Omit the matter inserted by said amendment and insert in lieu thereof the following: "Except as provided for in the appropriation for contingent and miscellaneous expenses;" and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$145,000;" and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lines 12, 13, and 14 of the matter inserted by said amendment strike out the following: ", and an additional sum of $25,000 is appropriated from the revenues of the District of Columbia for the same purpose;" and the Senate agree to the same.

Amendment numbered 78: That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$151,300;" and the Senate agree to the same.

Amendment numbered 81: That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: After the word "dollars," at the end of the last line of the matter inserted by said amendment, insert the following:

"And the Secretary of War is authorized to enter into a contract or contracts for the construction of said bridge within the said limit of cost. The cost of maintaining in good condition the asphalt paving between the street railway tracks and 2 feet outside thereof on said bridge shall be paid by the street railway company or companies using the same under such regulations as the Commissioners of the District of Columbia shall prescribe: *Provided*, That all street railroads chartered or that may hereafter be chartered by Congress shall have the right to cross said bridge upon terms mutually agreed upon with the Washington, Alexandria and Mount Vernon Railway Company, or in case of disagreement, upon terms determined by the supreme court of the District of Columbia, which is authorized and directed to give hearing to the interested parties and to fix the terms of joint trackage."

And the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with amendments as follows: In lieu of the sum named in said amendment insert "$50,000," and after the word "dollars," at the end of line 2 of the matter inserted by said amendment, insert the following: "and the Commissioners of the District of Columbia are authorized to enter into a contract or contracts for the construction of said sewer in part at a cost not to exceed $250,000;" and the Senate agree to the same.

Amendment numbered 93: That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$14,000;" and the Senate agree to the same.

Amendment numbered 107: That the House recede from its disagreement to the amendment of the Senate numbered 107, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "*And provided further*, That during the fiscal year 1903 the illuminating power of the gas furnished by any gaslighting company, person, or persons in the District of Columbia shall be equal to 22 candles, notwithstanding the requirements as to candle power prescribed by section 3 of the act regulating the sale of gas in the District of Columbia, approved June 6, 1896;" and the Senate agree to the same.

Amendment numbered 108: That the House recede from its disagreement to the amendment of the Senate numbered 108, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$76,000;" and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In line 3 of the matter inserted by said amendment, after the word "authorized," insert the following: ", under conditions and regulations to be prescribed by them;" and the Senate agree to the same.

Amendment numbered 128: That the House recede from its disagreement to the amendment of the Senate numbered 128, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "and one head of department of English in Manual Training School No. 1, six in all;" and the Senate agree to the same.

Amendment numbered 134: That the House recede from its disagreement to the amendment of the Senate numbered 134, and agree to the same with an amendment as follows: In lieu of the number proposed insert: "ninety-eight;" and the Senate agree to the same.

Amendment numbered 135: That the House recede from its disagreement to the amendment of the Senate numbered 135, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$918,175;" and the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the number proposed insert "three hundred and fifty;" and the Senate agree to the same.

Amendment numbered 158: That the House recede from its disagreement to the amendment of the Senate numbered 158, and agree to the same with an amendment as follows: In lieu of the number proposed insert "two hundred and forty;" and the Senate agree to the same.

Amendment numbered 159: That the House recede from its disagreement to the amendment of the Senate numbered 159, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$713,230;" and the Senate agree to the same.

Amendment numbered 161: That the House recede from its disagreement to the amendment of the Senate numbered 161, and agree to the same with an amendment as follows: Insert as a separate paragraph after the matter inserted by said amendment the following:

"For rent of building to be occupied temporarily during construction of the new fifth precinct station, $600."

And the Senate agree to the same.

Amendment numbered 162: That the House recede from its disagreement to the amendment of the Senate numbered 162, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$79,785;" and the Senate agree to the same.

Amendment numbered 170: That the House recede from its disagreement to the amendment of the Senate numbered 170, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$7,500;" and the Senate agree to the same.

Amendment numbered 172: That the House recede from its disagreement to the amendment of the Senate numbered 172, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$7,500;" and the Senate agree to the same.

Amendment numbered 173: That the House recede from its disagreement to the amendment of the Senate numbered 173, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$360;" and the Senate agree to the same.

Amendment numbered 174: That the House recede from its disagreement to the amendment of the Senate numbered 174, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$65,860;" and the Senate agree to the same.

Amendment numbered 180: That the House recede from its disagreement to the amendment of the Senate numbered 180, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$43,750;" and the Senate agree to the same.

Amendment numbered 183: That the House recede from its disagreement to the amendment of the Senate numbered 183, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,800;" and the Senate agree to the same.

Amendment numbered 191: That the House recede from its disagreement to the amendment of the Senate numbered 191, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$46,500;" and the Senate agree to the same.

Amendment numbered 192: That the House recede from its disagreement to the amendment of the Senate numbered 192, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,000;" and the Senate agree to the same.

Amendment numbered 193: That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$900;" and the Senate agree to the same.

Amendment numbered 194: That the House recede from its disagreement to the amendment of the Senate numbered 194, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$21,740;" and the Senate agree to the same.

Amendment numbered 209: That the House recede from its disagreement to the amendment of the Senate numbered 209, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$25,475;" and the Senate agree to the same.

Amendment numbered 226: That the House recede from its disagreement to the amendment of the Senate numbered 226, and agree to the same with an amendment as follows: In line 4 of the matter inserted by said amendment strike out the word "third" and insert in lieu thereof the word "first;" and the Senate agree to the same.

Amendment numbered 230: That the House recede from its disagreement to the amendment of the Senate numbered 230, and agree to the same with

amendments as follows: Restore the matter proposed to be stricken out by said amendment, amended as follows:

After the word "district," in the last line, insert the words "except as otherwise provided herein;" and after the word "reimbursed," in the last line of the matter inserted by said amendment, insert the words "which reimbursement shall be made within three years from said last-named date."

In line 1 of the matter inserted by said amendment strike out the words "SEC. 2" and insert in lieu thereof the words "SEC. 3."

And on page 60, in line 11 of the bill, strike out the words "SEC. 3" and insert in lieu thereof the words "SEC. 4."

And the Senate agree to the same.

Amendment numbered 231: That the House recede from its disagreement to the amendment of the Senate numbered 231, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"TAXATION OF REAL ESTATE.

"SEC. 5. That hereafter all real estate in the District of Columbia subject to taxation, including improvements thereon, shall be assessed at not less than two-thirds of the true value thereof, and shall be taxed 1½ per cent upon the assessed valuation thereof, and whenever a subdivision of any portion of said real estate is made and recorded with the surveyor of the said District, the board of assistant assessors of said District are hereby authorized and directed to reassess said property so subdivided, and the tax on said reassessment shall be due and payable at the semiannual payment of taxes next following said reassessment.

"That hereafter property used for educational purposes that is not used for private gain shall be exempt from taxation, and all other property used for educational purposes shall be assessed and taxed as other property is assessed and taxed.

"In all cases where the assessments for benefits for street extensions have been or may hereafter be levied, payment of the same shall be made in five equal annual installments with interest at the rate of 4 per cent per annum from and after sixty days after the confirmation of the verdict and award: *Provided*, That the amount of any payment of any installment or installments heretofore made on account of any such assessment shall be credited thereon, and the balance shall be due and payable as if such assessment had been originally payable in the installments and with the interest as herein provided.

"In all cases of payments the accounting officers shall take into account the assessment for benefits and the award for damages, and shall pay only such part of said award in respect of any lot as may be in excess of the assessment for benefits against the part of such lot not taken, and there shall be credited on said assessment the amount of said award not in excess of said assessment."

And the Senate agree to the same.

Amendment numbered 232: That the House recede from its disagreement to the amendment of the Senate numbered 232, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"TAXATION OF PERSONAL PROPERTY.

"SEC. 6. That in order to provide revenues to meet the appropriations made by this act and appropriations to be hereafter made to provide for the expenses of the government of the District of Columbia, it is further enacted: That the act of Congress entitled 'An act to provide an immediate revision and equalization of real estate values in the District of Columbia; also to provide an assessment of real estate in said District in the year 1896 and every third year thereafter, and for other purposes,' approved August 14, 1894, is hereby amended to take effect from and after July 1, 1902, as follows: Section 2, line 2, strike out the word 'three' and insert in lieu thereof the word 'five;' section 2, line 5, after the words 'assistant assessors, who,' strike out the words shall hold office for a term of four years, unless sooner removed by said Commissioners for cause satisfactory to them and;' section 2, line 9, after the words 'per annum,' insert the following: 'The assessor of the District of Columbia and the members of said permanent board of assistant assessors shall not be removed except for inefficiency, neglect of duty, or malfeasance in office.'

"That the assessor of the District of Columbia shall designate 3 of the members of said permanent board of assistant assessors for the assessment of real estate, who shall constitute and compose the excise board, under the provisions of the act of Congress approved August 14, 1894, aforesaid; and the 2 other members of said permanent board of assistant assessors shall be designated by said assessor to compose a board of personal-tax appraisers, to assess personal property in accordance with the provisions of this section; and all 5 members of said permanent board of assistant assessors, together with the assessor as chairman, shall constitute the board of equalization and review of real-estate assessments and also the board of personal-tax appeals: *Provided*, That the assessor of the District of Columbia shall act as chairman, ex officio, of the several boards aforesaid.

"That the 2 members of the permanent board of assistant assessors designated, as aforesaid, by the assessor to assess personal property shall, under the direction and supervision of the said assessor, assess personal property in the District of Columbia as follows:

"That hereafter the assessor of the District of Columbia, or his successor in office, shall annually cause to be prepared a printed blank schedule of all tangible personal property and all general merchandise or stock in trade, owned or held in trust or otherwise, subject to taxation under the provisions of this section, and of the classes of corporations and companies to be assessed, together with the rate of tax prescribed, to which shall be appended an affidavit in blank, setting forth that the foregoing presents a full and true statement of all such personal property, taxable capital, or other basis of assessment, or either, as the case may be. When said schedule is ready for delivery, notice thereof shall be given by the assessor by advertisement for three successive secular days in one or more of the daily newspapers published in said District, and a copy of said schedule shall be delivered to any citizen applying therefor at the office of the assessor. Every person, association, corporation, firm, or company in said District liable to taxation hereunder, and every association, company, executor, administrator, guardian, or trustee holding personal property in trust liable to taxation hereunder, shall, within thirty days after the last publication of said advertisement, as aforesaid, fill out the proper blanks in said schedule with a full and true statement, as in this section hereinbefore required, and make and sign an affidavit to the truth thereof, as aforesaid, before the assessor or one of the other members of the said board of personal-tax appraisers, and the members of the said board are hereby authorized to administer such and all oaths in connection with their duties as assessor and appraisers without charge, or before any person authorized by law to administer oaths; and the address in the District of Columbia of the person, corporation, or company making affidavit shall in each case be given below his, its, or their signature, and thereupon said board of personal-tax appraisers, or any one of the members thereof, shall assess said property at its fair cash value, and enter the same in the columns upon said blanks provided for that purpose, and the amount thus ascertained shall be entered upon the books for taxation for the fiscal year beginning July 1, 1902, and each fiscal year thereafter: *Provided*, That if any person, firm, association, corporation, company, administrator, executor, guardian, or trustee shall fail to make and deliver to the assessor or one of the said appraisers, within thirty days after the date of the last advertisement of the notice hereinbefore required, the schedule of his or its said personal property, owned, held in trust, or otherwise, as provided for in this section, then the said board of personal-tax appraisers hereinbefore provided for shall without delay, from the best information they can procure, make an assessment against such person, firm, association, corporation, company, administrator, executor, guardian, or trustee, to which they shall add 20 per cent thereof: *Provided further*, That if the said board of personal-tax appraisers be not satisfied as to the correctness of the return of personal property made by any person, firm, association, corporation, company, administrator, executor, guardian, or trustee, said board may reject said return, and said board, or any one of the members thereof, may, from the best information he or they can procure, or by making such an examination of the personal property as may be practicable, assess the same in such amount as may to him or them seem just; and notice of the rejection of the sworn return shall be given to the party interested by leaving the same at the address given in said return, and in all such cases there shall be a right of appeal from the action taken by said appraisers to the board of personal-tax appeals, hereinafter provided for, or to their successors in office, within fifteen days after delivery of said notice of rejection as aforesaid: *And provided further*, That if any person, firm, association, corporation, company, administrator, executor, guardian, or trustee shall make a false affidavit touching the matters herein provided for, he or they shall be deemed guilty of perjury, and upon conviction thereof shall be subject to the penalties for that offense now provided by section 858 of the Code of the District of Columbia.

"PAR. 2. On all tangible personal property, assessed at a fair cash value (over and above the exemptions provided in this section), including vessels, ships, boats, tools, implements, horses, and other animals, carriages, wagons, and other vehicles, there shall be paid to the collector of taxes of the District of Columbia 1½ per centum on the assessed value thereof.

"PAR. 3. Dealers in general merchandise of every description shall pay to the collector of taxes of the District of Columbia 1½ per centum on the average stock in trade for the preceding year.

"After the passage of this act it shall be unlawful for any person or persons entering the District of Columbia subsequent to June 30 in each year, and establishing a place of business for the sale of goods, wares, or merchandise, either at private sale or at auction, to conduct such business until a sworn statement of the value of said stock has been filed with the assessor of the District of Columbia, who shall thereupon render a bill for the unexpired portion of the fiscal year at the same rate as other personal taxes are levied. The assessor is hereby authorized to reassess said stock whenever in his judgment it has been undervalued. The goods, wares, and merchandise of any person or persons who shall fail to pay the tax required by this paragraph within three days after beginning business shall be subject to distraint, and it shall be the duty of the assessor to place bills therefor in the hands of the collector of taxes, who shall seize sufficient of the goods of the delinquent to satisfy said tax: *Provided*, That said owner shall have the right of redemption within thirty days on payment of said tax, to which shall be added a penalty of 1 per centum, together with the costs of seizure. The collector shall sell such goods as are not redeemed, at public auction, after advertisement for the three days preceding said sale.

"PAR. 4. Hotel companies and the proprietors of hotels shall pay to the collector of taxes of the District of Columbia 1½ per cent on the assessed value of their furniture.

"PAR. 5. Each national bank, as the trustee for its stockholders, through its president or cashier, and all other incorporated banks and trust companies in the District of Columbia, through their presidents or cashiers, and all gas, electric-lighting, and telephone companies, through their proper officers, shall make affidavit to the board of personal-tax appraisers on or before the first day of August of each year as to the amount of its or their gross earnings for the preceding year ending the 30th day of June, and shall pay to the collector of taxes of the District of Columbia per annum on such gross earnings as follows: Each national bank and all other incorporated banks and trust companies, respectively, 6 per cent; each gas company, 5 per cent; each electric-lighting and telephone company, 4 per cent. And in addition thereto the real estate owned by each national or other incorporated bank, and each trust, gas, electric-lighting, and telephone company in the District of Columbia shall be taxed as other real estate in said District: *Provided*, That street railroad companies shall continue to pay the 4 per cent per annum on their gross receipts and other taxes as provided by existing law, and insurance companies shall continue to pay the 1½ per cent on premium receipts, as provided by section 650 of the Code of the District of Columbia.

"That so much of the act approved October 1, 1890, entitled 'An act to provide for the incorporation of trust, loan, mortgage, and certain other corporations within the District of Columbia,' as is inconsistent with the provisions of this section is hereby repealed.

"PAR. 6. All companies who guarantee the fidelity of any individual or individuals, such as bonding companies, shall pay to the collector of taxes of the District of Columbia 1½ per cent of their gross receipts in the District of Columbia.

"PAR. 7. Savings banks having no capital stock and paying interest to their depositors shall, through their president or cashier, make affidavit to the board of personal-tax appraisers on or before the 1st day of August in each year as to the amount of their surplus and undivided profits, and shall pay to the collector of taxes of the District of Columbia a sum equal to 1½ per cent on the amount of their surplus and undivided profits on the 30th day of June preceding.

"PAR. 8. The capital stock of all corporations, other than those herein provided for, organized in the District of Columbia or under the laws of any of the States or Territories of the United States chiefly for the purpose of and transacting business within the District of Columbia, except those exempted by the laws relating to the District of Columbia, shall be appraised in bulk at its fair cash value by the board of personal-tax appraisers, and the corporation issuing the same shall be liable for the tax thereon according to such value, and shall pay to the collector of taxes of the District of Columbia a sum equal to 1½ per cent on the assessed valuation thereof; but from the assessed valuation of such capital stock shall first be deducted the value of any and all real estate owned by such corporation in said District, which real estate shall be separately taxed against said corporation: *Provided*, That nothing in this act contained shall be construed to include newspaper, real estate, and mercantile companies, which by reason of incorporation receive no special franchise or privilege; but all such corporations shall be rated, assessed, and taxed as individuals conducting business in similar lines are rated, assessed, and taxed.

"PAR. 9. Building associations shall pay to the collector of taxes of the District of Columbia 4 per cent per annum on their gross earnings for the preceding year ending June 30.

"PAR. 10. The following personal property shall be exempt from taxation:

"First. The personal property of all library, benevolent, charitable, and scientific institutions incorporated under the laws of the United States or of the District of Columbia and not conducted for private gain.

"Second. Libraries, schoolbooks, wearing apparel, articles of personal adornment, all family portraits, and heirlooms

"Third. Household and other belongings, not held for sale, to the value of $1,000, owned by the occupant of any dwelling house or other place of abode, in which such household and other belongings may be located.

"PAR. 11. That said board of assistant assessors hereinbefore provided for, with the assessor of the District of Columbia as chairman, shall compose a board of personal-tax appeals, and as such board of personal-tax appeals shall convene in a room, to be provided therefor by the said assessor, on the 15th day of November in each year, and public notice of the time and place of such meeting shall be given by advertisement for two consecutive secular days in two daily newspapers published in the District of Columbia. It shall be the duty of the board of personal-tax appeals, between the date of convening and December 15th of each year, to hear all appeals made by any person or persons against the assessments made by the board of personal-tax appraisers and to impartially equalize the value of said personal property as a basis for assessment. Any four members of the said board shall constitute a quorum for business, and in the absence of the assessor a temporary chairman shall be selected. They shall be empowered to diminish or increase such assessments as they may believe to have been returned at other than their true value to such amount as, in their opinion, may be the value thereof, and the action of said board in such cases shall be final. Said board of assistant assessors shall also perform such other official duties as may be required of them by the assessor of the District of Columbia: *Provided*, That in case the personal-tax appraisers shall fail to complete any of the duties in this section to be by them performed within the time provided therefor the taxation provided by this section shall not by reason thereof be invalid; but such appraisers shall proceed with all reasonable diligence to complete such duties, and their acts shall be valid as if performed within the time fixed therefor. If, at any time within any current year, property subject to taxation under the provisions of this section shall have been omitted from assessment, said board of personal-tax appraisers shall immediately proceed to assess the same for the then current year, giving notice in writing to the persons or corporations so assessed, who shall have a right of appeal within ten days from date of said notice.

"PAR. 12. That when the taxes on personal property due and payable in each year shall not be paid on or before the 1st day of June, then and in that event the collector of taxes of the District of Columbia, or his deputy, may distrain sufficient goods and chattels found within the District of Columbia and belonging to the person, firm, association, corporation, company, administrator, executor, guardian, or trustee charged with such tax to pay the taxes remaining due, under the provisions of this law, from such person, firm, association, corporation, company, administrator, executor, guardian, or trustee, together with the penalty thereon and the costs that may accrue; and for want of such goods and chattels said collector of taxes may levy upon and sell at auction the estate and interest of such person, firm, association, corporation, company, administrator, executor, guardian, or trustee in any parcel of land in said District: and in the case of the levy on any estate or interest in land the proceedings subsequent to sale thereof shall be the same as now provided by law in the case of sales for arrears of taxes against real estate; and in the case of distraint of personal property or the levy upon real estate as aforesaid the collector of taxes shall immediately proceed to advertise the same by public notice to be posted in the office of said collector and by advertisement, three times within one week, in one or more of the daily newspapers published in said District, stating the time when and the place where such property shall be sold, the last publication to be at least six days before the date of sale, and if the said taxes and penalty thereon, and the costs and expenses which shall have accrued thereon, shall not be paid before the day fixed for such sale, which shall not be less than ten days after said levy or taking of said property, the collector shall proceed to sell at public auction in his office, to the highest bidder, such property, or so much thereof as may be needed to pay such taxes, penalty, and accrued costs and expenses of such distraint and sale. Said collector shall report in detail, in writing, every distraint and sale of personal property to the Commissioners of the District of Columbia or their successors in office, and his accounts in respect to every such distraint or sale shall forthwith be submitted to the auditor of the District of Columbia and be audited by him. Any surplus resulting from such sale over and above such taxes, costs, and expenses shall be paid into the Treasury, and upon being claimed by the owner or owners of the goods and chattels aforesaid shall be paid to him or them upon the certificate of the collector of taxes stating in full the amount of such excess.

"PAR. 13. That all taxes levied under the foregoing provisions of this section shall be due, payable, and collectible at the same time and times as the general tax on real estate in said District, and shall be subject to the same penalties for nonpayment thereof until distraint or sale as hereinbefore provided.

"PAR. 14. That private banks or bankers not incorporated shall pay a tax of $500 per annum. Every person, firm, company, or association not incorporated having a place of business where credits are opened by the deposit or collection of moneys or currency subject to be paid or remitted upon draft, check, or order, or where money is advanced or loaned on stocks, bonds, bullion, bills of exchange, or promissory notes, or where stocks, bonds, bills of exchange, or promissory notes are received for discount or for sale, shall be regarded as a private bank or banker.

"PAR. 15. General brokers shall pay a tax of $250 per annum. Every person, firm, company, or association not incorporated (except insurance and real-estate brokers acting as such) that solicits business from the general public by advertisement or otherwise, and that purchases, sells, or negotiates for others securities, shares, stocks, bonds, exchange, bullion, coin, money, bank notes, or promissory notes, or that deals in futures on market quotations of prices or values on merchandise, shares, stocks, bonds, or other securities, or accepts margins on prices or values of said shares, stocks, bonds, merchandise, or securities, shall be deemed a general broker: *Provided*, That the Washington Stock Exchange, through its president or treasurer, shall pay to the collector of taxes of the District of Columbia a sum equal to $500 per annum in lieu of tax on the members thereof for business done on said exchange: *Provided further*, That any broker who is a member of a regularly organized stock exchange located outside of the District of Columbia and transacting a brokerage business therein, shall pay a sum equal to $100 per annum to the collector of taxes of the District of Columbia: *And be it further provided*, That if any person or firm shall have paid the tax in this section provided for banks and bankers, such person or firm shall not again be taxed as a broker or brokers.

"PAR. 16. Note brokers shall pay a tax of $100 per annum. Every person, firm, company, or association not incorporated (except private banks and bankers) that loans money on promissory notes without real estate or collateral security or advances money on personal property as security without possession of said personal property shall be deemed a note broker: *Provided*, That exception shall be made of cooperative associations whose business is restricted to the members of such association.

"PAR. 17. The taxes for said private banks and bankers, general brokers, and note brokers shall be paid to the collector of taxes of the District of Columbia, and shall date from the 1st day of July in each year and expire on the 30th day of June following. Said taxes shall date from the first day of the month in which the liability begins, and payment shall be made for a proportionate amount.

"PAR. 18. Any person or persons violating any of the provisions of this section shall be liable to a penalty of not exceeding $500 for each offense, said penalty to be imposed, upon conviction in the police court of the District of Columbia, as other fines and penalties are imposed, and said court is hereby invested with jurisdiction thereof; and in default of the payment of said penalty the person or persons so convicted shall be imprisoned, in the discretion of the court, not exceeding six months.

"PAR. 19. That the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to appoint a clerk and assistant clerk to said board of personal-tax appraisers at annual salaries of one thousand four hundred and one thousand dollars each, and three inspectors at annual salaries of $1,200 each, all of whom shall perform such duties as may be assigned to them by the chairman of said board; and to pay the salaries of the two assistant assessors, the clerk and assistant clerk to said board of personal-tax appraisers, and the three inspectors aforesaid for the fiscal year beginning July 1, 1902, and $6,000 for books, stationery, printing, means of transportation, and other incidental expenses, including the hire of temporary clerks, not to exceed $1,000, the sum of $18,000 is hereby appropriated."

And the Senate agree to the same.

Amendment numbered 233: That the House recede from its disagreement to the amendment of the Senate numbered 233, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

"LICENSE TAXES.

"SEC. 7. That no person shall engage in or carry on any business, trade, profession, or calling in the District of Columbia for which a license tax is imposed by the terms of this section without having first obtained a license so to do. Applications for licenses shall be made to the assessor of the District of Columbia, and no license shall be granted until payment for the same shall have been made. Every license shall specify by name the person, firm, or corporation to which it shall be issued, the business, trade, profession, or calling for which it is granted, and the location at which such business, trade, profession, or calling is to be carried on. Licenses granted under the terms of this section may be assigned or transferred on application upon the conditions applicable to granting the original licenses, and the assessor shall issue a certificate of such assignment or transfer upon the payment to the District of Columbia of a fee of 50 cents therefor. All licenses and transfers issued or granted shall be signed by the assessor of the District of Columbia and impressed with the seal of his office.

"PAR. 2. That when more than one business, trade, profession, or calling for which a license is herein prescribed shall be carried on by the same person, the license tax shall be paid for each such business, trade, profession, or calling: *Provided*, That licenses issued under any of the provisions of this act shall be good only for the location designated thereon, and no license shall be issued for more than one place of business, profession, or calling, without the payment of a separate tax for each: *Provided further*, That no license shall be granted under the provisions of this section, relating to hotels and theaters, until the inspector of buildings and the chief officer of the fire department have certified in writing to the Assessor that the applicant for license has complied with the laws enacted and the regulations made and promulgated for the protection of life and property.

"PAR. 3. That all licenses issued shall date from the 1st day of November in each year and expire on the 31st day of October following, except as hereinafter provided. Licenses issued at any time after the beginning of the license year shall date from the first day of the month in which the license was issued and end on the last day of the license year above prescribed, and payment shall be made of the proportionate amount of the annual license tax: *Provided*, That in cases where the tax is less than $5 per annum the license shall terminate one year from the first day of the month in which the license was issued.

"PAR. 4. That no person holding a license under the terms of this section shall willfully suffer or allow any other person chargeable with a separate license to operate under his license.

"PAR. 5. That all licenses granted under the terms of this section must be conspicuously posted on the premises of the licensee. Said licenses shall be accessible at all times for inspection by the police or other officers duly authorized to make such inspections. Licensees having no located place of business shall exhibit their licenses when requested to do so by any of the officers above named.

"PAR. 6. That no person shall set up, operate, or conduct any business or device by or in which any person, animal, or living object shall act or be exposed as a target for any ball, projectile, missile, or thing thrown or projected, for or in consideration of profit or gain, directly or indirectly.

"PAR. 7. That apothecaries or druggists shall pay a license tax of $6 per annum. Every person who sells patent medicines, or manufactures, compounds, sells, or dispenses medicines by prescription or otherwise from a located place of business shall be regarded as an apothecary or druggist.

"PAR. 8. That auctioneers shall pay a license tax of $100 per annum. Hereafter the provisions of the act of Congress entitled "An act to prevent fraudulent transactions on the part of commission merchants," approved March 21, 1892, shall be applicable to all licensed auctioneers, their agents, and employees.

"PAR. 9. That commission merchants shall pay a license tax of $40 per annum. Every person, firm, or corporation that acts as agent for others in negotiating sales or purchases of goods, wares, or merchandise, live stock, produce, etc., or negotiates freights for railroads, ships, or vessels, or for the shippers or consignees of freights carried by railroads, ships, or vessels, shall be regarded as a commission merchant.

"PAR. 10. That cattle dealers shall pay a license tax of $15 per annum: *Provided*, That one person only shall be entitled to do business under each license. Every person who makes a business of trading, buying, or selling horses, cattle, sheep, or hogs shall be regarded as a cattle dealer.

"PAR. 11. That proprietors or owners of hacks coaches, omnibuses, carriages, wagons, and other passenger vehicles for hire shall pay license taxes as follows: Vehicles drawn by one animal, $6 per annum; autovehicles, automobiles, electromobiles, or other horseless vehicles by whatever name called, and vehicles drawn by more than one animal, $9 per annum. Licenses issued under this section shall date from July 1 in each year. The driver of every licensed passenger vehicle, while transacting business as such driver, shall wear conspicuously upon his breast a badge numbered to correspond with the license of his vehicle. The badge shall be furnished by the District of Columbia and a tax of 50 cents shall be charged therefor in addition to the amount of the vehicle license.

"PAR. 12. That proprietors or owners of livery stables shall pay license taxes as follows: For stables containing 10 stalls or less, $25 dollars per annum, and $2 per annum additional for each stall in addition to 10: *Provided*, That nothing in this paragraph shall be so construed as to exempt livery-stable keepers from paying additional license taxes for operating any description of vehicles occupying the public stands.

"PAR. 13. That proprietors or owners of establishments where autovehicles of any pattern, description, or motor power whatsoever are kept for hire or are kept or stored for others, for profit or gain, shall pay a license tax of $25 per annum for 10 vehicles or less and $2 additional for each vehicle in addition to 10: *Provided*, That nothing in this paragraph shall be so construed as

to exempt the owner of any vehicle using the public stands from paying the additional license tax provided in paragraph 11 of this section.

"PAR. 14. That persons, firms, or corporations operating vehicles for hire or for the transportation of passengers in the District of Columbia with sufficient regularity to enable the public to take passage therein at any point intermediate to the stable or stand of such vehicle, or operate such vehicle over a route sufficiently definite to enable the public to ascertain the streets and avenues on which such vehicle can be found en route, shall pay license taxes as follows: For each vehicle with a seating capacity not to exceed 10 passengers, $6 per annum; for each vehicle with a seating capacity exceeding 10 passengers, $12 per annum. No license shall be issued under the terms of this paragraph without the approval of the Commissioners of the District of Columbia.

"PAR. 15. That real estate brokers or agents shall pay a license tax of $50 per annum. Every person who sells, or offers for sale, as the agent for others, real estate, wherever located, including mining and quarry property, or who makes or negotiates loans thereon, or who rents houses, buildings, stores, or real estate, or who collects rents for others, shall be regarded as a real estate broker or agent: *Provided*, That the practice of a profession in connection with the real estate business shall not exempt any person from the requirements of this paragraph who would otherwise be liable hereunder.

"PAR. 16. That persons, firms, corporations, or associations transacting the business of the purchase or sale of securities, stocks, shares, or certificates, based upon an estimated value after a lapse of a certain period of time, or who undertake to guarantee the holder of said securities, stocks, shares, or certificates certain sums of money based upon investments after the lapse of a certain time, or who promise to divide with the holders or investors of said securities, stocks, shares, or certificates, or with the heirs or assigns of such holders or investors, any profit which may accrue from their investments at maturity, shall pay a license tax of $100 per annum: *Provided*, That this paragraph shall not apply to any fire or life insurance company or building association allowed to transact business as such in the District of Columbia.

"PAR. 17. That railroad-ticket brokers shall pay a license tax of $25 per annum.

"PAR. 18. Proprietors of hotels shall pay annually $1 for each room provided for the accommodation of guests: *Provided*, That no license shall be issued for less than $30 per annum, dating from November 1. Every place where food and lodging are provided for transient guests shall be regarded as a hotel.

"PAR. 19. That victualers, owners of restaurants, oyster houses, cookshops, ice-cream parlors, dairy lunches, or eating houses, by whatsoever name designated, where food, meals, or refreshments are served to transient customers, to be eaten on the premises where sold, shall pay a license tax of $18 per annum: *Provided*, That this paragraph shall not apply to the proprietors of hotels nor to private boarding houses where board and lodging are provided by the week or month.

"PAR. 20. That owners, lessees, or managers of theaters having a stage and movable scenery used for the purpose of acting, performing, or playing any play, farce, interlude, opera, or other theatrical or dramatic performance, or any scene, section, or portion of any play, farce, burlesque, or drama of any description, for gain, shall pay a license tax of $100 per annum: *Provided*, That licenses may be granted for theatrical performances for one week on the payment of $20, and for less than one week on the payment of $10: *And provided further*, That the proprietors of buildings other than theaters where exhibitions, lectures, or entertainments of any description are conducted for gain shall pay a license tax of $100 per annum; or for lesser periods as follows: Three dollars per day, or $10 for the first week, and $5 for each subsequent consecutive week: *And provided further*, That for entertainments, concerts, or performances of any kind given in church premises or private residences where the proceeds are intended for church or charitable purposes, and where no rental is charged, no license tax shall be required.

"PAR. 21. That every person who exhibits paintings, pictures, or works of art, or makes industrial, mechanical, agricultural, food, or floral exhibitions, including cattle and poultry shows, freaks and museum attractions, side shows, and all other lawful exhibitions not otherwise provided for, shall pay a license tax of $3 per day, or $10 for the first week and $5 additional for each consecutive week, and for an annual license the tax shall be $100.

"PAR. 22. That persons conducting concerts, entertainments, or balls to which an admission fee is charged, directly or indirectly, shall pay a license tax of $3 for each day or night.

"PAR. 23. That proprietors or owners of any circus shall pay a license tax of $200 per day.

"PAR. 24. That owners or lessees of grounds used for horse racing, tournaments, athletic sports, baseball, football, polo, golf, and kindred games, or where feats of horsemanship are performed, to which admission fees are charged or which are used for profit or gain, directly or indirectly, shall pay a license tax of $20 per week or $5 per day.

"PAR. 25. That owners or lessees of grounds or premises used for picnics or lawn fêtes, or resorts where theatrical or musical attractions or other amusements are presented, to which admission fees are charged or which are used for profit or gain, directly or indirectly, and which are not taxed under any other paragraph of this section, shall pay a license tax of $3 per day or $10 per week and $5 additional for each subsequent consecutive week, or for an annual license a tax of $100.

"PAR. 26. That owners or lessees of buildings used for skating rinks, fairs, carnivals, or amusements not otherwise provided for in this section shall pay a license tax of $3 per day, or $10 for the first week and $5 additional for each subsequent consecutive week, or for an annual license a tax of $100.

"PAR. 27. That owners or lessees of shooting galleries, fencing schools, public gymnasiums, places where firearms of any description are used, or schools where the art of self-defense is taught shall pay a license tax of $12 per annum: *Provided*, That no place of business or shooting gallery where firearms are to be used shall be licensed until the inspector of buildings for the District of Columbia shall furnish a certificate that suitable precautions have been taken for the public safety by the erection of iron shields and such appliances as in his judgement may be necessary: *And provided further*, That before such license shall be issued the proprietor shall furnish to the assessor of the District of Columbia the written consent of a majority of the occupants and residents on the same side of the square or block in which the proposed gallery is to be located and also on the confronting side of the square fronting opposite the same. The major and superintendent of police is hereby authorized to prescribe the caliber of firearms and kind of cartridges to be used in such licensed places.

"PAR. 28. That proprietors or owners of apparatus or machines known as merry-go-rounds, flying horses, or similar devices for amusement shall pay a license tax of $12 for the first week and $10 for each subsequent consecutive week, or $3 per diem: *Provided*, That license therefor may be refused in the discretion of the Commissioners of the District of Columbia.

"PAR. 29. That proprietors or owners of slot or automatic machines, so called (telephones excepted), by which objects, pictures, or figures are presented to public view or musical or vocal exhibitions are automatically given on the deposit of money or metal, or where a pecuniary consideration is received for the use of said apparatus or machines, shall pay a license tax of $2 per annum for each machine or apparatus: *Provided*, That on the payment of a license tax of $50 per annum the number of machines at any one location shall not be limited: *And provided further*, That no license shall be issued for less than $2.

"PAR. 30. That owners or managers of Turkish, Russian, or medicated baths shall pay a license tax of $25 per annum.

"PAR. 31. That owners or managers of massage establishments shall pay a license tax of $25 per annum: *Provided*, That no license shall be issued under this paragraph without the approval of the major and superintendent of police.

"PAR. 32. That mediums, clairvoyants, soothsayers, fortune tellers, or palmists, by whatsoever name called, conducting business for profit or gain, directly or indirectly, when permitted to practice their calling in the District of Columbia, shall pay a license tax of $25 per annum: *Provided*, That no license shall be issued without the approval of the major and superintendent of police.

"PAR. 33. That hucksters or produce dealers at large shall pay a license tax of $12 per annum for each vehicle used in the conduct of their business. Licenses issued under this paragraph shall date from April 1 in each year. Every person who vends or sells fresh, smoked, or salt fish, meats, oysters, clams, shellfish, poultry, game, butter, eggs, vegetables, fruits, berries, candies, nuts, groceries, or produce of any kind from a vehicle of any description shall be regarded as a huckster. Every driver shall be furnished with a badge corresponding to the number of his license, which shall be worn conspicuously while transacting business, and a similar number on metal shall also be furnished him which shall be attached to his vehicle: *Provided*, That no license shall be required of any person bringing to and selling at the several markets produce of his own raising: *And provided further*, That raisers of produce shall not be exempt from the license tax imposed unless they sell such produce at the several markets, or by the wholesale in cart, wagon, or carload lots.

"PAR. 34. That fuel hucksters shall pay a license tax of $5 per annum for each vehicle used in the conduct of their business. Every person who vends or sells fuel, oils, gasoline, wood, coal, etc., from house to house from vehicles of any description shall be regarded as a fuel huckster.

"PAR. 35. That peddlers shall pay a license tax of $25 per annum. Licenses issued under this paragraph shall date from April 1 of each year, and one person only shall be entitled to operate thereunder. Every person who vends or sells from house to house miscellaneous articles of merchandise or personal property of any description, either as a foot peddler or selling from a vehicle, shall be regarded as a peddler.

"PAR. 36. That brewers or manufacturers of fermented liquors of any description for sale, and brewers' agents, shall pay a license tax of $250 per annum: *Provided*, That agent's license under this paragraph shall only authorize the licensee to conduct his business with the goods of the brewer represented by such agent: *And provided further*, That a licensed brewer's solicitor, whose business is confined to soliciting orders for his principal, shall not be liable for the license tax provided for in this paragraph.

"PAR. 37. That distillers or rectifiers shall pay a license tax of $250 per annum.

"PAR. 38. Section 8 of 'An act regulating the sale of intoxicating liquors in the District of Columbia,' approved March 3, 1893, is hereby amended by striking out therefrom the words 'The fee for a wholesale license shall be $250 per annum, and for a barroom license $400 per annum," and inserting in lieu thereof the words: 'The fee for a wholesale license shall be $300 per annum, and for a barroom license $800 per annum.'

"PAR. 39. That billposters and persons engaged in the business of painting or placing signs or advertisements on land, buildings, billboards, fences, or other structures in the District of Columbia visible from a street or other public space shall pay an annual tax of $20 before engaging in said business. No person shall place, exhibit, maintain, or continue any advertisement or poster except upon such land, houses, buildings, billboards, fences, or other structures as the Commissioners of the District of Columbia may, in their discretion, authorize in writing for that purpose. The said written authority shall only be granted in resident streets upon application made in writing and signed by a majority of the residents on the side of the square in which said display is to be made and also the side of the confronting square: *Provided*, That nothing in this paragraph shall apply to persons who advertise a business, exhibition, or entertainment on the premises where the same is conducted, nor to signs relating to the sale, rent, or lease of lands when the sign or advertisement is on the land referred to in the said sign or advertisement. Any person violating any of the provisions of this paragraph shall, upon conviction thereof in the police court of the District of Columbia, be punished by a fine of not more than $200, and after conviction of any such violation the offender shall be liable to a further fine of not more than $10 for each and every day thereafter that said violation of law shall continue.

"PAR. 40. That owners or lessees of any buildings, structures, or tanks used for the storage of any description of inflammable oils in quantities exceeding five barrels shall pay a license tax of $10 per annum and shall have the approval of the fire marshal before license is granted.

"PAR. 41. That owners or lessees of laundries operated otherwise than by hand power shall pay a license tax of $20 per annum. Owners or lessees of laundries operated by hand labor shall pay a license tax of $10 per annum.

"PAR. 42. That proprietors or owners of intelligence offices, information bureaus, registries, or employment offices, by whatsoever name called, shall pay a license tax of $10 per annum.

"PAR. 43. That dealers in second-hand personal property shall pay a license tax of $40 per annum. Every person who buys, sells, trades, exchanges, or deals in old gold, silver, jewelry, precious stones, iron, metals of all kinds, cordage, tentage, hides, pelts, glass, rags, paper, ordnance, ship chandler's stores, junk, furniture, clothing, or second-hand personal property of any description shall be regarded as a second-hand dealer.

"PAR. 44. Pawnbrokers shall continue to pay to the collector of taxes of the District of Columbia $100 for license, and be subject to the regulations prescribed by existing law.

"PAR. 45. Keepers of billiard, bagatelle, jenny lind, and pool tables, shuffleboards, or any table upon which legitimate games are played within the District of Columbia for public use, or for profit or gain, shall continue to pay to the collector of taxes of the District of Columbia $12 per annum license for each table and be subject to the provisions of the act of Congress approved February 25, 1897, entitled 'An act to license billiard and pool tables in the District of Columbia, and for other purposes.'

"PAR. 46. An annual license tax is hereby imposed upon the following classes of business, trades, and professions, namely: Boarding houses (public), $1 per room; claim agents, $25; building and other contractors, $25; carriage or wagon making establishments, $25; cigar dealers, $12; confectionery establishments, $12; dealers of every description in the several markets, except farmers and producers, $5; florists, $15; land and improvement companies, $50; undertaking establishments, $25.

"PAR. 47. That any person violating any of the provisions of this section shall, on conviction thereof in the police court of the District of Columbia, be punished by a fine of not more than $500 for each offense, and in default of payment by imprisonment not exceeding thirty days, in the discretion of the court, except as otherwise provided in this section.

"PAR. 48. That for the purposes of this section the word 'person' shall signify and include firms, corporations, companies, associations, executors, administrators, guardians, or trustees; the word 'agent' shall signify and include every person acting for another; the word 'merchandise' shall signify and include every article of commerce, whether sold in bulk or otherwise; the word 'dealers' shall signify and include every person engaged in selling or offering for sale any description of merchandise or property. Words of one number shall signify and include words of both numbers, respectively, and words of one gender shall signify and include words of every gender, respectively: *Provided*, That nothing in this section shall be interpreted as repealing any of the police or building regulations of the District of Columbia regarding the establishment or conduct of the businesses, trades, professions, or callings herein named."

And the Senate agree to the same.

Amendment numbered 234: That the House recede from its disagreement to the amendment of the Senate numbered 234, and agree to the same with an amendment as follows: In lieu of the number proposed insert the number "8;" and the Senate agree to the same.

W. B. ALLISON,
JAMES McMILLAN,
F. M. COCKRELL,
Managers on the part of the Senate.

J. T. McCLEARY,
J. G. CANNON,
M. E. BENTON,
Managers on the part of the House.

The report was agreed to.

AGREEMENT WITH CHOCTAW AND CHICKASAW INDIANS.

Mr. STEWART submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13172) to ratify and confirm an agreement with the Choctaw and Chickasaw tribes of Indians, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 16.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 8, 9, 10, 11, 13, 19, 20, and 21, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: Restore the matter proposed to be stricken out by said amendment and add at the end thereof the following: "Such citizenship court shall also have like appellate jurisdiction and authority over judgments rendered by such courts under the said act denying claims to citizenship or to enrollment as citizens in either of said nations. Such appeals shall be taken within the time hereinbefore specified and shall be taken, conducted, and disposed of in the same manner as appeals by the said nations, save that notice of appeals by citizenship claimants shall be served upon the chief executive officer of both nations: *Provided*, That paragraphs 31, 32, and 33 hereof shall go into effect immediately after the passage of this act by Congress;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the matter proposed to be stricken out by said amendment insert the following: "and such intermarried white persons as may have married recognized citizens of the Choctaw and Chickasaw nations in accordance with the tribal laws, customs, and usages on or before the date of the passage of this act by Congress;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: At the end of said amendment add the following: ", all of said Mississippi Choctaws so enrolled by said Commission shall be upon a separate roll;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the matter intended to be inserted by said amendment insert the following: "in good faith continuously resided;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the matter intended to be inserted by said amendment insert the following: "continuous, bona fide;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "*Provided*, That occupants or purchasers of lots in town sites in said Choctaw and Chickasaw nations upon which no improvements have been made prior to the passage of this act by Congress shall pay the full appraised value of said lots instead of the percentage named in the Atoka agreement;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: Restore the matter intended to be stricken out by said amendment and add at the end thereof the following: "*Provided, however*, That nothing contained in this section shall be construed or held to commit the Government of the United States to any expenditure of money upon said lands or the improvement thereof, except as provided herein, it being the intention of this provision that in the future the lands and improvements herein mentioned shall be conveyed by the United States to such Territorial or State organization as may exist at the time when such conveyance is made;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: Omit the word "SEC." before each paragraph number wherever it occurs and number the paragraphs consecutively; and the Senate agree to the same.

WM. M. STEWART,
O. H. PLATT,
JAMES K. JONES,
Managers on the part of the Senate.

CHARLES CURTIS,
JOHN F. LACEY,
JOHN S. LITTLE,
Managers on the part of the House.

The report was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. C. R. McKENNEY, its enrolling clerk, announced that the House had agreed to the concurrent resolution of the Senate to print 7,500 additional copies of the report of the Daughters of the American Revolution for 1890 to 1897, together with a historical preface thereto.

The message also announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 179) to amend the internal-revenue laws; and

A bill (H. R. 14082) to provide for the construction of a bridge by the Duluth, Pierre and Black Hills Railroad Company across the Missouri River at Pierre, S. Dak.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the President pro tempore:

A bill (H. R. 2978) for the relief of Joseph H. Penny, John W. Penny, Thomas Penny, and Harvey Penny, surviving partners of Penny & Sons;

A bill (H. R. 3519) granting an increase of pension to John Marble;

A bill (H. R. 6005) granting a pension to James A. Chalfant;

A bill (H. R. 8327) to amend an act entitled "An act for the protection of the lives of miners in the Territories;"

A bill (H. R. 9187) granting an increase of pension to Caroline A. Hammond;

A bill (H. R. 9308) granting an increase of pension to Edwin P. Johnson;

A bill (H. R. 10856) granting a pension to Jacob Findley;

A bill (H. R. 10964) granting an increase of pension to Francis M. Beebe;

A bill (H. R. 11019) directing the Secretary of the Treasury to bestow medals upon First Lieut. David H. Jarvis, Second Lieut. Ellsworth P. Bertholf, and Samuel J, Call, surgeon, all of the Revenue-Cutter Service;

A bill (H. R. 12056) granting an increase of pension to Warren C. Plummer;

A bill (H. R. 12097) to amend the internal-revenue laws in regard to storekeepers and gaugers;

A bill (H. R. 13123) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1903, and for other purposes;

A bill (H. R. 13598) granting a pension to John J. Southerland;

A bill (H. R. 14182) granting an increase of pension to Susan B. Lynch;

A bill (H. R. 14247) to authorize the Charleston, Suburban and Summerville Railway Company to construct and maintain two bridges across Ashley River, in the State of South Carolina; and

A joint resolution (H. J. Res. 103) relative to the disposition of patent specification and drawing in the western district of Pennsylvania.

HOUSE BILLS REFERRED.

The bill (H. R. 179) to amend the internal-revenue laws was read twice by its title, and referred to the Committee on Finance.

The bill (H. R. 14082) to provide for the construction of a bridge by the Duluth, Pierre and Black Hills Railroad Company across the Missouri River at Pierre, S. Dak., was read twice by its title, and referred to the Committee on Commerce.

CHEROKEE INDIAN LANDS.

Mr. QUAY. I desire to call up for present consideration the bill (S. 5956) to provide for the allotment of lands of the Cherokee Nation, for the disposition of town sites therein, and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Indian Affairs with an amendment in the nature of a substitute.

Mr. QUAY. I desire to say, in preface, that there is but one committee amendment to the original bill, and that is a substitute. The entire bill originally introduced is stricken out—that is, all of the words after the enacting clause—and a new bill is inserted. I ask unanimous consent that the reading of the original bill may be dispensed with, that the substitute be treated as the original bill, that the first reading be dispensed with, and that amendments may be disposed of as they are presented during the reading of the substitute.

The PRESIDENT pro tempore. The Senator from Pennsylvania asks unanimous consent that the reading of the original bill proposed to be stricken out may be dispensed with, and that the amendment taking its place be read.

Mr. QUAY. And that it be treated as the original bill.

The PRESIDENT pro tempore. And that it be treated as the original bill for amendment.

Mr. QUAY. For amendment.

The PRESIDENT pro tempore. The substitute will be read.

Mr. JONES of Arkansas. Is it the intention that the amendments intended to be proposed shall be offered during the reading or after its conclusion?

Mr. QUAY. I prefer that they should be proposed during the reading. The committee has no amendments. I have three or four unimportant ones to offer on behalf of the Indians, and I understand there are one or two others.

The PRESIDENT pro tempore. The Committee on Indian Affairs report an amendment, which is to strike out all after the enacting clause and insert a substitute. The substitute will be read.

The Secretary proceeded to read the substitute, and read to the end of line 12, on page 31, as follows:

DEFINITION OF WORDS EMPLOYED HEREIN.

1. The words "nation" and "tribe" shall each be held to refer to the Cherokee Nation or tribe of Indians in Indian Territory.
2. The words "principal chief" or "chief executive" shall be held to mean the principal chief of said tribe.
3. The words "Dawes Commission" or "Commission" shall be held to mean the United States Commission to the Five Civilized Tribes.
4. The word "minor" shall be held to mean males under the age of 21 years and females under the age of 18 years.
5. The terms "allottable lands" or "lands allottable" shall be held to mean all the lands of the Cherokee tribe not herein reserved from allotment.
6. The word "select" and its various modifications, as applied to allotments and homesteads, shall be held to mean the formal application at the land office, to be established by the Dawes Commission for the Cherokee Nation, for particular tracts of land.
7. The words "member" or "members" and "citizen" or "citizens" shall be held to mean members or citizens of the Cherokee Nation, in the Indian Territory.
8. Every word in this act importing the masculine gender may extend and be applied to females as well as males, and the use of the plural may include also the singular, and vice versa.

APPRAISEMENT OF LANDS.

9. The lands belonging to the Cherokee tribe of Indians in Indian Territory, except such as are herein reserved from allotment, shall be appraised at their true value: *Provided*, That in the determination of the value of such land consideration shall not be given to the location thereof, to any timber thereon, or to any mineral deposits contained therein, and shall be made without reference to improvements which may be located thereon.
10. The appraisement, as herein provided, shall be made by the Commission to the Five Civilized Tribes, under the direction of the Secretary of the Interior.

ALLOTMENT OF LANDS.

11. There shall be allotted by the Commission to the Five Civilized Tribes and to each citizen of the Cherokee tribe, as soon as practicable after the approval by the Secretary of the Interior of his enrollment as herein provided, land equal in value to 110 acres of the average allottable land of the Cherokee Nation, to conform as nearly as may be to the areas and boundaries established by the Government survey, which land may be selected by each allottee so as to include his improvements.
12. For the purpose of making allotments and designating homesteads hereunder, the 40-acre, or quarter of a quarter section, subdivision established by the Government survey may be dealt with as if further subdivided into four equal parts in the usual manner, thus making the smallest legal subdivision 10 acres, or a quarter of a quarter of a quarter of a section.
13. Each member of said tribe shall, at the time of the selection of his allotment, designate as a homestead out of said allotment land equal in value to 40 acres of the average allotable lands of the Cherokee Nation, as nearly as may be, which shall be inalienable during the lifetime of the allottee, not exceeding twenty-one years from the date of the certificate of allotment. Separate certificate shall issue for said homestead. During the time said homestead is held by the allottee the same shall be nontaxable and shall not be liable for any debt contracted by the owner thereof while so held by him.
14. Lands allotted to citizens shall not in any manner whatever or at any time be encumbered, taken, or sold to secure or satisfy any debt or obligation, or be alienated by the allottee or his heirs, before the expiration of five years from the date of the ratification of this act.
15. All lands allotted to the members of said tribe, except such land as is set aside to each for a homestead as herein provided, shall be alienable in five years after issuance of patent.

Mr. QUAY. I move, in lines 11 and 12, on page 31, to amend the substitute by striking out the words "issuance of patent" and inserting the words "the ratification of this act."

Mr. TELLER. I should like to ask the Senator from Pennsylvania why he moves the amendment.

Mr. QUAY. I move the amendment at the suggestion of the Cherokees. They prefer that the title to their homesteads shall show upon its face the time from which the right of alienation commences. It is to make it uniform, as I understand the amendment.

Mr. TELLER. It undoubtedly shortens the time in which the lands are nonalienable. I think that is a mistake. Five years is a very short time after the patent issues.

Mr. QUAY. It was at the suggestion of the Indians themselves that I offered the amendment.

Mr. TELLER. The truth is, we ought not to allow the Indians to sell their homesteads for the next twenty-five or thirty years. Let them sell their other lands, but the lands which they take as homesteads ought to be exempt from forced sale or even voluntary sale.

The experience has been, wherever we have put a limitation upon the sale, that when that time has been reached almost immediately the Indians sell the land. Up in Michigan I know a good many years ago there were a very large number of patents issued with a five years' limit, and within a few months, you may say, after the limit had been reached pretty nearly every Indian who had received his patent had sold it. The fact was, they commenced selling it beforehand, although they could not make a very good deed. The time is so very short that I wish the Senator from Pennsylvania would let the words "five years after issuance of patent" stand. It would be better, because the patents will not issue for a year or so.

Mr. QUAY. Very well; I will not insist upon the amendment.

Mr. TELLER. If I had been drafting the bill I should have made it ten years instead of five.

The PRESIDING OFFICER (Mr. PETTUS in the chair). The Senator from Pennsylvania withdraws the amendment. The reading of the substitute will be resumed.

The Secretary resumed the reading of the substitute and read to the end of line 9, on page 35, as follows:

16. If for any reason an allotment should not be selected or a homestead designated by or on behalf of any member of the tribe, it shall be the duty of said Commission to make said selection and designation.
17. In the making of allotments and in the designation of homesteads for members of said tribe said Commission shall not be required to divide lands into tracts of less than the smallest legal subdivision provided for in section 12 hereof.
18. It shall be unlawful after ninety days after the ratification of this act by the Cherokees for any member of the Cherokee tribe to inclose or hold possession of, in any manner, by himself or through another, directly or indirectly, more lands in value than that of 110 acres of average allotable lands of the Cherokee Nation, either for himself or for his wife, or for each of his minor children, if members of said tribe; and any member of said tribe found in such possession of lands, or having the same in any manner inclosed, after the expiration of ninety days after the date of the ratification of this act, shall be deemed guilty of a misdemeanor.
19. Any person convicted of violating any of the provisions of section 18 of this act shall be punished by a fine of not less than $100, shall stand committed until such fine and costs are paid (such commitment not to exceed one day for every $2 of said fine and costs), and shall forfeit possession of any property in question, and each day on which such offense is committed or continues to exist shall be deemed a separate offense. The United States district attorney for the northern district is required to see that the provisions of said section 18 are strictly enforced, and he shall immediately, after the expiration of the ninety days after the ratification of this act, proceed to dispossess all persons of such excessive holdings of lands and to prosecute them for so unlawfully holding the same, and the Commission to the Five Civilized Tribes shall have authority to make investigations of all violations of section 18 and make report thereon to the United States district attorney.
20. If any person whose name appears upon the roll prepared as herein provided shall have died subsequent to the 1st day of September, 1902, and before receiving his allotment, the lands to which such person would have been entitled if living shall be allotted in his name, and shall, with his proportionate share of other tribal property, descend to his heirs according to the laws of descent and distribution as provided in chapter 49 of Mansfield's Digest of the Statutes of Arkansas: *Provided*, That the allotment thus to be made shall be selected by a duly appointed administrator or executor. If, however, such administrator or executor be not duly and expeditiously appointed, or fails to act promptly when appointed, or for any other cause such selection be not so made within a reasonable and proper time, the Dawes Commission shall designate the lands thus to be allotted.
21. Allotment certificates issued by the Dawes Commission shall be conclusive evidence of the right of an allottee to the tract of land described therein, and the United States Indian agent for the Union Agency shall, under the direction of the Secretary of the Interior, upon the application of the allottee, place him in possession of his allotment, and shall remove therefrom all persons objectionable to him, and the acts of the Indian agent hereunder shall not be controlled by the writ or process of any court.
22. Exclusive jurisdiction is hereby conferred upon the Commission to the Five Civilized Tribes, under the direction of the Secretary of the Interior, to determine all matters relative to the appraisement and the allotment of lands.
23. All Delaware Indians who are members of the Cherokee Nation shall take lands and share in the funds of the tribe, as their rights may be determined by the judgment of the Court of Claims, or by the Supreme Court if appealed, in the suit instituted therein by the Delawares against the Cherokee Nation, and now pending; but if said suit be not determined before said Commission is ready to begin the allotment of lands of the tribe as herein provided, the Commission shall cause to be segregated 157,600 acres of land, including lands which have been selected and occupied by Delawares in conformity to the provisions of their agreement with the Cherokees dated April 8, 1867, such lands so to remain, subject to disposition according to such judgment as may be rendered in said cause; and said Commission shall thereupon proceed to the allotment of the remaining lands of the tribe as aforesaid. Said Commission shall, when final judgment is rendered, allot lands to such Delawares in conformity to the terms of the judgment and their individual rights thereunder. Nothing in this act shall in any manner impair the rights of either party to said contract as the same may be finally determined by the court, or shall interfere with the holdings of the Delawares under their contract with the Cherokees of April 8, 1867, until their rights under said contract are determined by the courts in their suit now pending against the Cherokees.

Mr. QUAY. At the end of paragraph 23, page 35, line 9, I move to add:

Said suit shall be advanced on the dockets of said courts and determined at the earliest time practicable.

I will say in explanation that this litigation has been pending since 1898, and it is important in the settlement of the affairs of the Cherokees that the contention between them and the Delawares shall be disposed of early. I suppose there will be no objection to the amendment.

The amendment was agreed to.

The Secretary read as follows:

RESERVATIONS.

24. The following lands shall be reserved from the allotment of lands herein provided for:

(a) All lands set apart for town sites by the provisions of the act of Congress of June 28, 1898 (30 Stats., p. 495), the provisions of the act of Congress of May 31, 1900 (31 Stats., p. 221), and by the provisions of this act.

(b) All lands to which, upon the date of the ratification of this act, any railroad company may, under any treaty or act of Congress, have a vested right for right of way, depots, station grounds, water stations, stock yards, or similar uses only, connected with the maintenance and operation of the railroad.

(c) All lands selected for town cemeteries not to exceed 20 acres each.
(d) One acre of land for each Cherokee schoolhouse not included in town sites or herein otherwise provided for.
(e) Four acres for Willie Halsell College at Vinita.
(f) Four acres for Baptist Mission school at Tahlequah.
(g) Four acres for Presbyterian school at Tahlequah.
(h) Four acres for Park Hill Mission school south of Tahlequah.
(i) Four acres for Elm Springs Mission school at Barren Fork.
(j) Four acres for Dwight Mission school at Sallisaw.
(k) Four acres for Skiatook Mission near Skiatook.
(l) Four acres for Lutheran Mission school on Illinois River north of Tahlequah.
(m) Sufficient ground for burial purposes where neighborhood cemeteries are now located, not to exceed 3 acres each.
(n) One acre for each church house outside of towns.
(o) The square now occupied by the capitol building at Tahlequah.
(p) The grounds now occupied by the national jail at Tahlequah.
(q) The grounds now occupied by the Cherokee Advocate printing office at Tahlequah.
(r) Forty acres for the Cherokee Male Seminary near Tahlequah.
(s) Forty acres for the Cherokee Female Seminary at Tahlequah.
(t) One hundred and twenty acres for the Cherokee Orphan Asylum on Grand River.
(u) Forty acres for colored high school in Tahlequah district.
(v) Forty acres for the Cherokee Insane Asylum.
(w) Forty acres for the school for blind, deaf, and dumb children near Fort Gibson.

Mr. QUAY. I have been requested to move to strike out the word "forty" before "acres" in line 10, and to insert the word "four." That will reduce the acreage for the school near Fort Gibson from 40 acres to 4 acres.

The amendment was agreed to.

The Secretary read as follows:

The acre so reserved for any church or schoolhouse in any quarter section of land shall be located where practicable in a corner of such quarter section adjacent to the section lines thereof.

Mr. JONES of Arkansas. I offer the following to be inserted immediately after the words just read by the Secretary as a proviso.

The SECRETARY. After line 15, page 37, it is proposed to insert the following proviso:

Provided, That the Methodist Episcopal Church South may, within twelve months after the ratification of this act, pay $10 per acre for the 160 acres of land adjacent to the town of Vinita, and heretofore set apart by act of the Cherokee national council for the use of said church for missionary and educational purposes, and now occupied by Willie Halsell College (formerly Galloway College), and shall thereupon receive title thereto; but if said church fail so to do it may continue to occupy said 160 acres of land as long as it uses same for the purposes aforesaid.

Any other school or college in the Cherokee Nation which claims to be entitled under the law to a greater number of acres than is set apart for said school or college by section 24 of this act may have the number of acres to which it is entitled by law. The trustees of such school or college shall, within sixty days after the ratification of this act, make application to the Secretary of the Interior for the number of acres to which such school or college claims to be entitled, and if the Secretary of the Interior shall find that such school or college is, under the laws and treaties of the Cherokee Nation in force prior to the ratification of this act, entitled to a greater number of acres of land than is provided for in this act, he shall so determine and his decision shall be final. The amount so found by the Secretary of the Interior shall be set apart for the use of such college or school as long as the same may be used for missionary and educational purposes: *Provided*, That the trustees of such school or college shall pay $10 per acre for the number of acres so found by the Secretary of the Interior and which have been heretofore set apart by act of the Cherokee national council for use of such school or college for missionary or educational purposes, and upon the payment of such sum within sixty days after the decision of the Secretary of the Interior said college or school may receive a title to such land.

Mr. JONES of Arkansas. By Article XIV of the treaty of 1866 this provision was made:

ART. XIV. The right to the use and occupancy of a quantity of land not exceeding 160 acres, to be selected according to legal subdivisions in one body, and to include their improvements, and not including the improvements of any member of the Cherokee Nation, is hereby granted to every society or denomination which has erected or which, with the consent of the national council, may hereafter erect buildings within the Cherokee country for missionary or educational purposes. But no land thus granted, nor buildings which have been or may be erected thereon, shall ever be sold or otherwise disposed of, except with the consent and approval of the Cherokee national council and of the Secretary of the Interior. And whenever any such lands or buildings shall be sold or disposed of, the proceedsthereof shall be applied by said society or societies for like purposes within said nation, subject to the approval of the Secretary of the Interior.

There were a number of churches which, availing themselves of the rights under this paragraph, have improved quarter sections of land in different parts of the nation. They have erected expensive school buildings thereon, buildings that will not be included in the limited area which it is proposed now to fix in the bill.

The purpose of this amendment is simply to reserve the rights these people have already acquired. If the bill should be passed as it stands it would be useless so far as depriving these people of the rights they have under the treaty of 1866 goes. There is no question that they can hold this land, and it is better in the bill to reserve the rights which they have under the treaty of 1866 and thereby avoid the number of lawsuits that will otherwise be entailed upon them.

This question was taken up in the House Committee on Indian Affairs, and they recommended the amendment of the bill in the House which I have just had read. I took the amendment which I have just sent to the desk from the House bill as reported from the Committee on Indian Affairs. I hope the Senator from Pennsylvania will agree that it shall go into the bill.

Mr. QUAY. Is it an exact copy of the amendment reported in the other House?

Mr. JONES of Arkansas. Yes; it is offered here just as the House committee reported it.

Mr. QUAY. I will accept the amendment.

The amendment was agreed to.

Mr. GALLINGER. I ask the Senator from Pennsylvania to yield to me to make a request.

Mr. QUAY. Certainly.

DISTRICT OF COLUMBIA BILLS.

Mr. GALLINGER. There are two bills relating to the District of Columbia, one in relation to taxes and tax sales and the other for the extension of a street line of railroad, which are very important. They are House bills and will take but the time to read to pass them. I ask unanimous consent that when this bill is disposed of those two bills may be taken up for consideration.

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield?

Mr. GALLINGER. The Senator did yield, Mr. President.

Mr. QUAY. I yielded.

The PRESIDING OFFICER. The Secretary will report the bills.

Mr. GALLINGER. I ask consent that after the Cherokee lands bill is completed they may be considered.

The PRESIDING OFFICER. The Senator wants unanimous consent to take them up after the Cherokee agreement bill is disposed of?

Mr. GALLINGER. After this bill is completed.

Mr. QUAY. After this bill has been completed.

The PRESIDING OFFICER. The Senate has heard the request of the Senator from New Hampshire.

Mr. JONES of Arkansas. What is the request?

Mr. GALLINGER. That two District of Columbia bills, House bills, that will not take longer than the time to read them, may be considered at the conclusion of this bill. They are House bills, and it is very important that they should be passed. One relates to taxes and tax sales in the District, and is an important bill. The other proposes to extend the Eleventh street line of railroad.

Mr. JONES of Arkansas. I think the right ought to be reserved to object, because there are very few Senators in the Chamber, and there may be some who may object to the bills. I do not know as to that. I have no objection to their consideration.

Mr. GALLINGER. There will be no objection to them, I will assure the Senator from Arkansas.

The PRESIDING OFFICER. Is there any objection to the request of the Senator from New Hampshire? The Chair hears none, and it is so ordered.

CHEROKEE INDIAN LANDS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 5956) to provide for the allotment of the lands of the Cherokee Nation, for the disposition of town sites therein, and for other purposes.

The Secretary resumed, at page 37, line 16, the reading of the substitute reported by the Committee on Indian Affairs, as follows:

ROLL OF CITIZENSHIP.

25. The roll of citizens of the Cherokee Nation shall be made as of September 1, 1902, and the names of all persons then living and entitled to enrollment on that date shall be placed on said roll by the Commission to the Five Civilized Tribes.

26. The names of all persons living on the 1st day of September, 1902, entitled to be enrolled as provided in section 25 hereof, shall be placed upon the roll made by said Commission, and no child born thereafter to a citizen, and no white person who has intermarried with a Cherokee citizen since the 16th day of December, 1895, shall be entitled to enrollment or to participate in the distribution of the tribal property of the Cherokee Nation.

27. Such roll shall in all other respects be made in strict compliance with the provisions of section 21 of the act of Congress approved June 28, 1898 (30 Stats., p. 495), and the act of Congress approved May 31, 1900 (31 Stats., p. 221).

28. No person whose name appears upon the roll made by the Dawes Commission as a citizen or freedman of any other tribe shall be enrolled as a citizen of the Cherokee Nation.

29. For the purpose of expediting the enrollment of the Cherokee citizens and the allotment of lands as herein provided, the said Commission shall, from time to time, and as soon as practicable, forward to the Secretary of the Interior lists upon which shall be placed the names of those persons found by the Commission to be entitled to enrollment. The lists thus prepared, when approved by the Secretary of the Interior, shall constitute a part and parcel of the final roll of citizens of the Cherokee tribe, upon which allotment of land and distribution of other tribal property shall be made. When there shall have been submitted to and approved by the Secretary of the Interior lists embracing the names of all those lawfully entitled to enrollment, the roll shall be deemed complete. The roll so prepared shall be made in quadruplicate, one to be deposited with the Secretary of the Interior, one with the Commissioner of Indian Affairs, one with the principal chief of the Cherokee Nation, and one to remain with the Commission to the Five Civilized Tribes.

30. During the months of September and October, in the year 1902, the Commission to the Five Civilized Tribes may receive applications for enrollment of such infant children as may have been born to recognized and enrolled citizens of the Cherokee Nation on or before the 1st day of September,

1902, but the application of no person whomsoever for enrollment shall be received after the 31st day of October, 1902.

31. No person whose name does not appear upon the roll prepared as herein provided shall be entitled to in any manner participate in the distribution of the common property of the Cherokee tribe, and those whose names appear thereon shall participate in the manner set forth in this act: *Provided*, That no allotment of land or other tribal property shall be made to any person, or to the heirs of any person, whose name is on said roll and who died prior to the 1st day of September, 1902. The right of such person to any interest in the lands or other tribal property shall be deemed to have become extinguished and to have passed to the tribe in general upon his death before said date, and any person or persons who may conceal the death of anyone on said roll as aforesaid for the purpose of profiting by said concealment, and who shall knowingly receive any portion of any land or other tribal property or of the proceeds so arising from any allotment prohibited by this section, shall be deemed guilty of a felony, and shall be proceeded against as may be provided in other cases of felony, and the penalty for this offense shall be confinement at hard labor for a period of not less than one year nor more than five years, and in addition thereto a forfeiture to the Cherokee Nation of the lands, other tribal property, and proceeds so obtained.

SCHOOLS.

32. The Cherokee school fund shall be used, under the direction of the Secretary of the Interior, for the education of children of Cherokee citizens, and the Cherokee schools shall be conducted under rules prescribed by him according to Cherokee laws, subject to such modifications as he may deem necessary to make the schools most effective and to produce the best possible results; said schools to be under the supervision of a supervisor appointed by the Secretary and a school board elected by the national council.

33. All teachers shall be examined by said supervisor, and said school board and competent teachers and other persons to be engaged in and about the schools with good moral character only shall be employed; but where all qualifications are equal, preference shall be given to citizens of the Cherokee Nation in such employment.

34. All moneys for carrying on the schools shall be appropriated by the Cherokee national council, not to exceed the amount of the Cherokee school fund; but if the council fail or refuse to make the necessary appropriations, the Secretary of the Interior may direct the use of a sufficient amount of the school fund to pay all necessary expenses for the efficient conduct of the schools, strict account therefor to be rendered to him and the principal chief.

35. All accounts for expenditures in carrying on the schools shall be examined and approved by said supervisor, and also by the general superintendent of Indian schools in the Indian Territory, before payment thereof is made.

36. The interest arising from the Cherokee orphan fund shall be used, under the direction of the Secretary of the Interior, for maintaining the Cherokee Orphan Asylum for the benefit of the Cherokee orphan children.

ROADS.

37. Public highways or roads 2 rods in width, being 1 rod on each side of the section line, may be established along all section lines without any compensation being paid therefor, and all allottees, purchasers, and others shall take the title to such lands subject to this provision; and public highways or roads may be established elsewhere whenever necessary for the public good, the actual value of the land taken elsewhere than along section lines to be determined under the direction of the Secretary of the Interior while the tribal government continues and to be paid by the Cherokee Nation during that time; and if buildings or other improvements are damaged in consequence of the establishment of such public highways or roads, whether along section lines or elsewhere, such damages, during the continuance of the tribal government, shall be determined and paid for in the same manner.

TOWN SITES.

38. The lands which may hereafter be set aside and reserved for town sites upon the recommendation of the Dawes Commission under the provisions of the act of Congress approved May 31, 1900 (31 Stats., p. 221), shall embrace such acreage as may be necessary for the present needs and reasonable prospective growth of such town sites, not to exceed 640 acres for each town site.

39. Whenever any tract of land shall be set aside by the Secretary of the Interior for town-site purposes, as provided in said act of May 31, 1900, or by the terms of this act, which is occupied at the time of such segregation by any member of the Cherokee Nation, such occupant shall be allowed to purchase any lot upon which he then has improvements other than fences, tillage, and temporary improvements, in accordance with the provisions of the act of June 28, 1898 (30 Stats., p. 495), or, if he so elects, the lot will be sold under rules and regulations to be prescribed by the Secretary of the Interior, and he shall be fully compensated for his improvements thereon out of the funds of the tribe arising from the sale of the town sites, the value of such improvements to be determined by a board of appraisers, one member of which shall be appointed by the Secretary of the Interior, one by the chief executive of the tribe, and one by the occupant of the land, said board of appraisers to be paid such compensation for their services as may be determined by the Secretary of the Interior out of any appropriations for surveying, laying out, platting, and selling town sites.

40. All town sites which may hereafter be set aside by the Secretary of the Interior on the recommendation of the Commission to the Five Civilized Tribes, under the provisions of the act of Congress approved May 31, 1900 (31 Stats., p. 221), with the additional acreage added thereto, as well as all town sites set aside under the provisions of this act having a population of less than 200, shall be surveyed, laid out, platted, appraised, and disposed of in like manner and with like preference rights accorded to owners of improvements as other town sites in the Cherokee Nation are surveyed, laid out, platted, appraised, and disposed of under the act of Congress of June 28, 1898 (30 Stats., p. 495), as modified or supplemented by the act of May 31, 1900: *Provided*, That as to the town sites set aside as aforesaid the owner of the improvements shall be required to pay the full appraised value of the lot instead of the percentage named in said act of June 28, 1898 (30 Stats., p. 495).

41. Any person being in possession or having the right to the possession of any town lot or lots, as surveyed and platted under the direction of the Secretary of the Interior, in accordance with the act of Congress approved May 31, 1900 (31 Stats., p. 221), the occupancy of which lot or lots was originally acquired under any town-site act of the Cherokee Nation, and owning improvements thereon, other than temporary buildings, fencing, or tillage, shall have the right to purchase the same at one-fourth of the appraised value thereof.

42. Any person being in possession of, or having the right to the possession of, any town lot or lots, as surveyed and platted under the direction of the Secretary of the Interior, in accordance with the act of Congress approved May 31, 1900 (31 Stats., p. 221), the occupancy of which lot or lots was originally acquired under any town-site act of the Cherokee Nation, and not having any improvements thereon, shall have the right to purchase the same at one-half of the appraised value thereof.

43. Any citizen in rightful possession of any town lot having improvements thereon other than temporary buildings, fencing, and tillage, the occupancy of which has not been acquired under tribal laws, shall have the right to purchase same by paying one-half the appraised value thereof: *Provided*, That any other person in undisputed possession of any town lot having improvements thereon other than temporary buildings, fencing, and tillage, the occupancy of which has not been acquired under tribal laws, shall have the right to purchase such lot by paying the appraised value thereof.

44. All lots not having thereon improvements other than temporary buildings, fencing, and tillage, the sale or disposition of which is not herein otherwise specifically provided for, shall be sold within twelve months after appraisement, under the direction of the Secretary of the Interior, after due advertisement, at public auction, to the highest bidder, at not less than their appraised value.

45. When the appraisement of any town lot is made and approved, the town-site commission shall notify the claimant thereof of the amount of appraisement, and he shall, within sixty days thereafter, make payment of 10 per cent of the amount due for the lot, and four months thereafter he shall pay 15 per cent additional, and the remainder of the purchase money he shall pay in three equal annual installments without interest; but if the claimant of any such lot fail to purchase same or make the first and second payments aforesaid or make any other payment within the time specified, the lot and improvements shall be sold at public auction to the highest bidder under the direction of the Secretary of the Interior, at a price not less than its appraised value.

46. When any improved lot shall be sold at public auction because of the failure of the person owning improvements thereon to purchase same within the time allowed in said act of Congress approved June 28, 1898 (30 Stat., p. 495), said improvements shall be appraised by a committee, one member of which shall be selected by the owner of the improvements and one member by the purchaser of said lot; and in case the said committee is not able to agree upon the value of said improvements, the committee may select a third member, and in that event the determination of the majority of the committee shall control. Said committee of appraisement shall be paid such compensation for their services by the two parties in interest, share and share alike, as may be agreed upon, and the amount of said appraisement shall be paid by the purchaser of the lot to the owner of the improvements in cash within thirty days after the decision of the committee of appraisement.

47. The purchaser of any unimproved town lot sold at public auction shall pay 25 per cent of the purchase money at the time of the sale, and within four months thereafter he shall pay 25 per cent additional, and the remainder of the purchase money he shall pay in two equal annual installments without interest.

48. Such towns in the Cherokee Nation as may have a population of less than 200 people not otherwise provided for, and which, in the judgment of the Secretary of the Interior, should be set aside as town sites shall have their limits defined as soon as practicable after the approval of this act in the same manner as provided for other town sites.

49. The town authorities of any town site in said Cherokee Nation may select and locate, subject to the approval of the Secretary of the Interior, a cemetery within suitable distance from said town, to embrace such number of acres as may be deemed necessary for such purpose. The town-site commission shall appraise the same at its true value, and the town may purchase the same within one year from the approval of the survey by paying the appraised value. If any citizen have improvements thereon, said improvements shall be appraised by said town-site commission and paid for by the town: *Provided*, That lands already laid out by tribal authorities for cemeteries shall be included in the cemeteries herein provided for without cost to the towns, and the holdings of the burial lots therein now occupied for such purpose shall in no wise be disturbed: *And provided further*, That any park laid out and surveyed in any town shall be duly appraised at a fair valuation, and the inhabitants of said town shall, within one year after the approval of the survey and the appraisement of said park by the Secretary of the Interior, pay the appraised value to the proper officer for the benefit of the tribe.

50. The United States shall pay all expenses incident to surveying, platting, and disposition of town lots, and all allotments of lands made under the provisions of this plan of allotment, except where the town authorities may have been or may be duly authorized to survey and plat their respective towns at the expense of such towns.

51. No taxes shall be assessed by any town government against any town lot remaining unsold, but taxes may be assessed against any town lot sold as herein provided.

52. If the purchaser of any town lot fail to make payment of any sum when due, the same shall thereafter bear 6 per cent interest per annum until paid.

53. All lots or parts of lots, not exceeding 50 by 150 feet in size, upon which church houses and parsonages have been erected, and which are occupied as such at the time of appraisment, shall be conveyed gratuitously to the churches to which such improvements belong, and if such churches have inclosed other adjoining lots actually necessary for their use, they may purchase the same by paying the appraised value thereof.

54. Whenever the chief executive of the Cherokee Nation fails or refuses to appoint a town-site commissioner for any town, or to fill any vacancy caused by the neglect or refusal of the town-site commissioners appointed by the chief executive to qualify or act, or otherwise, the Secretary of the Interior, in his discretion, may appoint a commissioner to fill the vacancy thus created.

55. The purchaser of any town lot may at any time pay the full amount of the purchase money, and he shall thereupon receive title therefor.

56. Any person may bid for and purchase any lot sold at public auction as herein provided.

57. The United States may purchase in any town in the Cherokee Nation suitable lands for court-houses, jails, or other necessary public purposes for its use by paying the appraised value thereof, the same to be selected under the direction of the department for whose use such lands are needed, and if any person have improvements thereon the same shall be appraised in like manner as other town property, and shall be paid for by the United States.

TITLES.

58. The Secretary of the Interior shall furnish the principal chief with blank patents necessary for all conveyances herein provided for, and when any citizen receives his allotment of land, or when any allotment has been so ascertained and fixed that title should under the provisions of this act be conveyed, the principal chief shall thereupon proceed to execute and deliver to him a patent conveying all the right, title, and interest of the Cherokee Nation, and of all other citizens, in and to the lands embraced in his allotment certificate.

59. All conveyances shall be approved by the Secretary of the Interior, which shall serve as a relinquishment to the grantee of all the right, title, and interest of the United States in and to the lands embraced in his patent.

60. Any allottee accepting such patent shall be deemed to assent to the allotment and conveyance of all the lands of the tribe as provided in this act, and to relinquish all his right, title, and interest to the same, except in the proceeds of lands reserved from allotment.

61. The acceptance of patents for minors and incompetents by persons authorized to select their allotments for them shall be deemed sufficient to

bind such minors and incompetents as to the conveyance of all other lands of the tribe.

62. All patents, when so executed and approved, shall be filed in the office of the Dawes Commission, and recorded in a book provided for the purpose, until such time as Congress shall make other suitable provision for record of land titles, without expense to the grantee, and such records shall have like effect as other public records.

MISCELLANEOUS.

63. The tribal government of the Cherokee Nation shall not continue longer than March 4, 1906.

64. The collection of all revenues of whatsoever character belonging to the tribe shall be made by an officer appointed by the Secretary of the Interior, under rules and regulations to be prescribed by the said Secretary.

65. All things necessary to carry into effect the provisions of this act, not otherwise herein specifically provided for, shall be done under the authority and direction of the Secretary of the Interior.

66. All funds of the tribe, and all moneys accruing under the provisions of this act, shall be paid out under the direction of the Secretary of the Interior, and when required for per capita payments shall be paid directly to each individual by an appointed officer of the United States, under the direction of the Secretary of the Interior.

67. The Secretary of the Interior shall cause to be paid all just indebtedness of said tribe existing at the date of the ratification of this act which may have lawfully been contracted, and warrants therefor regularly issued upon the several funds of the tribe, as also warrants drawn by authority of law hereafter and prior to the dissolution of the tribal government, such payments to be made from any funds in the United States Treasury belonging to said tribe, and all such indebtedness of the tribe shall be paid in full before any pro rata distribution of the funds of the tribe shall be made. The Secretary of the Interior shall make such payments at the earliest time practicable and he shall make all needed rules and regulations to carry this provision into effect.

68. Jurisdiction is hereby conferred upon the Court of Claims to examine, consider, and adjudicate, with a right of appeal to the Supreme Court of the United States by any party in interest feeling aggrieved at the decision of the Court of Claims, any claim which the Cherokee tribe, or any band thereof, arising under treaty stipulations, may have against the United States, upon which suit shall be instituted within two years after the approval of this act; and also to examine, consider, and adjudicate any claim which the United States may have against said tribe, or any band thereof. The institution, prosecution, or defense, as the case may be, on the part of the tribe or any band, of any such suit, shall be through attorneys employed and to be compensated in the manner prescribed in sections 2103 to 2106, both inclusive, of the Revised Statutes of the United States, the tribe acting through its principal chief in the employment of such attorneys, and the band acting through a committee recognized by the Secretary of the Interior. The Court of Claims shall have full authority, by proper orders and process, to make parties to any such suit all persons whose presence in the litigation it may deem necessary or proper to the final determination of the matter in controversy, and any such suit shall, on motion of either party, be advanced on the docket of either of said courts and be determined at the earliest practicable time.

69. After the expiration of nine months after the date of the original selection of an allotment by or for any citizen of the Cherokee tribe as provided in this act, no contest shall be instituted against such selection, and as early thereafter as practicable patent shall issue therefor.

70. Allotments may be selected and homesteads designated for minors by the father or mother, if citizens, or by a guardian or curator, or the administrator having charge of their estate, in the order named; and for prisoners, convicts, aged and infirm persons, and soldiers and sailors of the United States on duty outside of the Indian Territory, by duly appointed agents under power of attorney; and for incompetents by guardians, curators, or other suitable persons akin to them; but it shall be the duty of said Commission to see that said selections are made for the best interests of such parties.

71. Any allottee taking as his allotment lands located around the Cherokee National Male Seminary, the Cherokee National Female Seminary, or Cherokee Orphan Asylum which have not been reserved from allotment as herein provided, and upon which buildings, fences, or other property of the Cherokee Nation are located, such buildings, fences, or other property shall be appraised at the true value thereof and be paid for by the allottee taking such lands as his allotment, and the money to be paid into the Treasury of the United States to the credit of the Cherokee Nation.

72. Cherokee citizens may rent their allotments when selected for a term not to exceed one year for grazing purposes only, and for a period not to exceed five years for agricultural purposes, but without any stipulation or obligation to renew the same; but leases for a period longer than one year for grazing purposes and for a period longer than five years for agricultural purposes and for mineral purposes may also be made with the approval of the Secretary of the Interior and not otherwise. Any agreement or lease of any kind or character violative of this section shall be absolutely void and not susceptible of ratification in any manner, and no rule of estoppel shall ever prevent the assertion of its invalidity. Cattle grazed upon leased allotments shall not be liable to any tribal tax, but when cattle are introduced into the Cherokee Nation and grazed on lands not selected as allotments by citizens the Secretary of the Interior shall collect from the owners thereof a reasonable grazing tax for the benefit of the tribe, and section 2117 of the Revised Statutes of the United States shall not hereafter apply to Cherokee lands.

73. All acts and portions of acts or treaty provisions in conflict with any of the provisions of this act shall not be in force in the Cherokee Nation after the ratification of this act by the Cherokees.

Mr. QUAY. I move to amend by striking out paragraph 73, which has just been read, and inserting in lieu thereof what I send to the desk, which is the language of the act of 1901.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. It is proposed to strike out paragraph 73, and in lieu thereof to insert:

73. The provisions of section 13 of the act of Congress approved June 28, 1898, entitled "An act for the protection of the people of the Indian Territory, and for other purposes," shall not apply to, or in any manner affect, the lands or other property of said tribe, and no act of Congress or treaty provision inconsistent with this agreement shall be in force in said nation, except sections 14 and 27 of said last-mentioned act, which shall continue in force as if this agreement had not been made.

The amendment was agreed to.

The reading was resumed and concluded, as follows:

74. This act shall not take effect or be of any validity until ratified by a majority of the whole number of votes cast by the legal voters of the Cherokee Nation in the manner following:

75. The principal chief shall, within ten days after the passage of this act by Congress, make public proclamation that the same shall be voted upon at a special election to be held for that purpose within thirty days thereafter, on a certain date therein named, and he shall appoint such officers and make such other provisions as may be necessary for holding such election. The votes cast at such election shall be forthwith duly certified as required by Cherokee law, and the votes shall be counted by the Cherokee national council if then in session, and if not in session, the principal chief shall convene an extraordinary session for the purpose, in the presence of a member of the Commission to the Five Civilized Tribes, and said member and the principal chief shall jointly make certificate thereof and proclamation of the result.

Mr. TELLER. Mr. President——

Mr. PLATT of Connecticut. Will the Senator from Colorado permit me a moment?

Mr. TELLER. I yield to the Senator.

Mr. PLATT of Connecticut. Ought there not to be some provision here as to how the result of the ratification shall be communicated to this Government? It ought to be communicated to the President of the United States, I should think.

Mr. TELLER. I should think so.

Mr. PLATT of Connecticut. The language now is "shall jointly make certificate thereof and proclamation of the result." I move to add "and transmit the same to the President of the United States."

The PRESIDENT pro tempore. The amendment proposed by the Senator from Connecticut will be stated.

The SECRETARY. In paragraph 75, on page 56, at the end of line 20, after the word "result," it is proposed to insert "and transmit the same to the President of the United States."

Mr. QUAY. I have no objection to that amendment.

The amendment was agreed to.

Mr. TELLER. Mr. President, I do not desire to discuss the pending bill, but I wish to submit a few remarks, and, to keep within the rules of the Senate, I presume it will be in order to submit them on this bill.

Mr. PLATT of Connecticut. Will the Senator permit one other suggestion in regard to the pending bill?

The PRESIDENT pro tempore. Does the Senator from Colorado yield?

Mr. TELLER. Certainly.

Mr. PLATT of Connecticut. I think these paragraphs might each one of them be stated as sections of the bill. These are paragraphs as they appear in another agreement, and there do not appear to be any sections in the bill. I suggest that every one of the paragraphs in the bill be stated as a section—section 1, section 2, section 3, etc. I presume that change can be made by the clerks.

Mr. QUAY. That can be corrected at the Secretary's desk.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and that order is made.

Mr. TELLER. Mr. President, for nearly two months I have been giving attention to a question that has excited considerable attention in the country. I refer to the suggested reduction of the duty upon Cuban sugar that may be imported into the United States. As a member of the Committee on Relations with Cuba and as a member of the subcommittee appointed for the purpose of investigating that subject, I have been somewhat concerned with this matter. Representing in part a State which perhaps is as well adapted to the making of beet sugar as any other State of the Union, or perhaps any other section of the world, I have a special interest in the question. On these accounts I do not believe it quite proper for me to let this session of Congress adjourn without submitting at least a few facts concerning the developments resulting from this inquiry and inserting in the RECORD, if I may obtain permission to do so, certain statements which may have been made.

I do not desire at this late day of the session to take advantage of the Senate by reading any considerable number of documents, but I have several on my table which I feel ought to go into the RECORD. I do not feel exactly justified in putting some of them into the RECORD to swell that publication unnecessarily beyond its usual size. I therefore ask to be permitted to have two or three pamphlets published as documents. Consent to this end being given, I will not of course be under the necessity of making them a part of my remarks by reading them.

Mr. PLATT of Connecticut. What are they?

Mr. TELLER. They are pamphlets which I presume the Senator from Connecticut has seen. I hold in my hand four of them prepared by Mr. Truman G. Palmer, who appeared before the committee. I have looked through them, and I believe there is nothing in them which can be objected to.

The PRESIDENT pro tempore. The Senator from Colorado asks that certain documents be printed.

Mr. TELLER. I will designate them. One of them is a pamphlet entitled "The Deadly Parallel," on Cuban tariff reduction, being quotations from the RECORD and from the public press. I do not know whether the Senator from Connecticut has seen that pamphlet or not, but I can send him a copy if he desires to

examine it. Another one of the pamphlets is entitled "The Story of Cuban Distress," another "The American Beet-Sugar Industry and the Proposed Cuban Tariff Reduction," and still another is entitled "Press Comment on the War of the Sugar Trust Against American Beet-Sugar Producers," containing quotations from the press of the country. All of these have been prepared by Mr. Truman G. Palmer.

Mr. PLATT of Connecticut. Mr. President, of course I can not interpose an objection to the request of the Senator from Colorado to print as documents articles certain persons may have prepared relating to subjects under discussion in the Senate, but I know that practice has prevailed; I do not believe in it very much, but it has become the custom of the Senate. If I should object to the printing of these papers as documents, of course the Senator could read all of them in his own time, thus taking up the time of the Senate, and therefore I do not make any objection.

The PRESIDENT pro tempore. Does the Chair understand the Senator from Colorado to make the request for printing now?

Mr. TELLER. I make the request. I also make the request that there may be published separately as a document a letter addressed to me by Mr. Truman G. Palmer, which consists practically of extracts from the testimony—a compendium of the testimony—taken before the committee. I ask that that letter may be printed also as a document, but separately from the others.

The PRESIDENT pro tempore. The Senator from Colorado asks that the four papers first referred to by him may be printed as a document, and that the last-named one may be printed separately as a document. Is there objection? The Chair hears none.

Mr. TELLER. There is also another paper which should go in with the others I asked to have printed. It is a statistical chart, showing the growth of beet-sugar production in the United States from the first year, when the total annual product reached 1,000 tons, to the season of 1902. I ask that that also may be printed as a document.

The PRESIDENT pro tempore. The Senator from Colorado asks that the paper now sent to the desk by him may be printed with the first four documents he presented. Is there objection? The Chair hears none, and that order is made.

Mr. TELLER. Mr. President, I want to submit some remarks, but not at any great length, for I know I should be regarded as unduly trespassing on the time of the Senate if I should occupy any considerable length of time at this period of the session.

Since the committee suspended the taking of testimony one of the witnesses, Mr. Thurber, has sent a letter to the committee, which I shall read before I conclude.

ALLEGED DISTRESS IN CUBA.

Early last fall a good deal of interest was exhibited in this country by reason of the statement published in a very public way through the press concerning the condition which was said to exist in the island of Cuba. We were told that the people of that island were in great distress. We were assured by many articles in the public press that unless some relief was furnished to the people of Cuba it would be utterly impossible for them to maintain an orderly, decent, and respectable government. Such was asserted to be the case by some members of the so-called committee that came here from Cuba who appeared before the Ways and Means Committee of the House of Representatives. One member of that committee since has been traveling around the country and asserting that unless we shall give immediate relief to Cuba by a reduction of the tariff there will be revolution in the island.

Mr. President, there never has been any reason for that statement; there never has been any condition in Cuba which would justify that assertion; there has been no distress in Cuba at any time which has called for the intervention of the Government of the United States. I assert that that has been positively proven before the Committee on Ways and Means of the House of Representatives.

Certain witnesses who appeared before that committee were exceedingly active and urgent in the effort to secure relief, as they said, upon the theory that there was a financial condition in the island of Cuba betokening much distress. I refer now to the evidence of Mr. Louis Place, from the district of Matanzas, taken before the House committee. He made a statement before the committee on the 14th day of January, I think, and there are large numbers of similar statements which could be presented, but which I do not now propose to present in order that I may save the time of the Senate. That statement, I think, will give a general idea of the conditions and methods which have been pursued.

I want to assert, measuring my words as I go, that it is not an exaggeration to say that there has not been, since I have been in public life, so patent and open an attempt to deceive the American people on any subject as there has been on this question of the pecuniary condition of Cuba, relying upon a well-known characteristic of the American people of promptitude in responding to every call of distress.

We were first told that there was distress—that there was starvation—in Cuba. We were assured that the condition was such that revolution would follow in a very short time unless Congress gave relief; and certain gentlemen having large interests in Cuba, while citizens of the United States, interested themselves to the extent of coming here and demanding of us, first, the admission of sugar duty free from Cuba. That demand, failing apparently to meet the approbation of Congress and the public, was modified and we were then asked for a 50 per cent reduction.

Later, when they found that would not work, they insisted upon a reduction of 20 or 25 per cent. A number of the persons interested, including the present Chief Executive of Cuba, declared that nothing less than 50 per cent would be of any avail whatever to them, adding that they did not desire any help unless the reduction should be equal to that amount. If the newspapers may be relied upon, the President of the new Republic, after reaching the island, announced that 20 per cent might be given, but said that it would be of no particular value to the people of Cuba, adding that they would not consider this question settled with that reduction, but would try to secure a reduction of 50 per cent.

WHAT MIGHT BE CONCEDED.

Mr. President, I want to be frank about this matter, and to say that I believe there might have been a reduction of 20 per cent of the duty on sugar from Cuba to the United States without materially injuring the beet-sugar industry or the cane-sugar industry of the United States, but it could not have been allowed with the statement which has always accompanied the demand—namely, that 20 per cent is only the entering wedge, and the insistance that there must be a further reduction. That statement has been made not only by those who are contending for a reduction of 50 per cent, but by a large number of people who are contending at this time for only 20 per cent.

The people of the State of Colorado this year will make 20,000 tons of sugar, affording the farmer there a better outlook for a paying crop than he has ever had from anything that he has ever attempted to raise. And that remark as to the prospect applies to Kansas, Nebraska, indeed to all of the arid or semiarid region. It is a notorious fact that beets raised anywhere in the arid section, including Montana, Washington, Oregon, Nevada, and California, are better, richer in saccharine, and of higher purity than those grown in any other portion of the world. We would think, if we had to raise beets with no higher percentage of purity and saccharine matter than those raised in some of the European countries, and with no better success, that our country was not adapted to the raising of beets.

INTEREST OF THE SUGAR TRUST.

Hence I say that this question is one of considerable importance to the people of the Western country. Yet, of as much importance as it is, there was a very general disposition on the part of the people in our Western country in the commencement of this discussion to say: "If this thing is absolutely necessary, we are in favor of granting some relief to Cuba; if Cuba is in starving condition, we want the Government of the United States to respond to that demand." But it did not take very long before the intelligent people of that section discovered that the American Sugar Refining Company, or what is commonly called the American sugar trust, was active in supporting and urging the reduction of the duty on Cuban sugar. There was some demand made by the Cubans for a reduction of the duty on tobacco, but if any Senator will call to mind the newspaper discussion of the question of Cuban tariff in the last three or four months he will bear me out that the tobacco question has been practically lost sight of. Why? Because this propaganda in favor of the reduction of the sugar duty was carried on by the American sugar trust, and that their interest was in sugar. Hence, while I do not know how much interest they may have had in tobacco, I do know that the newspapers dealt largely and almost entirely with the subject of sugar.

Mr. President, I presented to the Senate a resolution and asked for an investigation by the Committee on Relations with Cuba, and I desired particularly to have the committee consider the following points:

First. Whether the American Sugar Company had bought a considerable portion of the sugar and had it on hand.

Second. Whether a considerable portion of the sugar raised there was or was not raised by American citizens who were to be benefited, and not Cubans.

Third. What was the cost of producing sugar in Cuba, and whether, if we made the reduction, the Cuban sugar producer really would get the benefit of it, or whether the benefit would go to the American sugar trust, in which I include all of the sugar refining concerns of the United States, without any particular exception.

With reference to the last point, I would say that if the American sugar trust, refining 65 per cent of the sugar refined in the United States, and actually controlling a concern which refines about 12 per cent more, as I understand, thus having the very large part of the refining business, was interested, every other refining concern must also have been interested. So we had every refining concern in the United States, headed by the sugar trust, advocating this reduction, advocating it, first, upon the ground of the necessity to assist the Cubans, and, secondly, upon the ground of an obligation to those people which we had incurred. It should, of course, be added that the scope of the committee's inquiry was materially lessened by the action of the majority, but notwithstanding these limitations enough was developed to show that American holdings in Cuban lands are now enormous and rapidly increasing, and that the American sugar trust joined with the American government in Cuba in this raid upon our tariff system in the interest of Cuban products.

OBLIGATIONS TO CUBA.

Nobody has ever stood up and told the truth as to what that obligation was or is. There have been more misrepresentations and false statements made about that question than are usually made about any subject. We have been told repeatedly in the public press that, in the first place, we had deprived Cuba of her market, the idea being to convey to the American people the impression that when we dissevered Cuba from Spain politically we destroyed her market, which was in Spain. There is not an intelligent man in the country who does not know that at all times when Spain was in control no considerable portion of Cuban products ever went to Spain, and that we did not destroy the market. Nor did we lessen the market in the slightest possible degree. The American market has been the market of the Cubans for all time, and that market we retain to them just as they had it when they were laboring under the burden of a miserable government put upon them by Spain.

I do not think I need to spend very much time on this subject, and I will not do more than say in a general way that this Government has performed every obligation it was under to Cuba. And I desire some Senator to-day, who thinks we ought to make concessions to Cuba, to tell me what is the obligation. No man yet has been able to tell what is the obligation which we have not discharged. We said we would give those people a government of their own. We gave them a government of their own. We allowed them to create it as they wanted it, and we put it in operation, and for the first time in four hundred years there is a government of the people, by the people, and for the people in Cuba.

We were told by some of the Cuban witnesses before the committee that it was vain for us to relieve them of political burdens if we left them to stagger and fall under commercial and economic burdens, as if we had put something on them. They have the American market for their sugar, the market they have always had for it, and they have had it freed of the burdens of taxation which they had long borne.

WHERE THE DEMAND COMES FROM.

The people of Cuba are not so ungrateful as these statements would make them appear. In my correspondence from Cuba—and I have had some letters within a few days—the writers declare to me that there is no distress in Cuba, and that the Cubans are not mendicants at our hands and do not need our assistance. If the Cubans do not need our assistance, whence comes the clamor for it? I assert that it is the American sugar grower in Cuba and the American Sugar Refining Company in this country who have been at the bottom of this effort to change our financial system with reference to Cuba.

Mr. MONEY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. TELLER. Certainly.

Mr. MONEY. I should like to ask the Senator from Colorado if he can state to the Senate how much American capital is invested in Cuba, and how much German capital is invested there?

Mr. TELLER. I can not.

Mr. MONEY. You have not the figures?

Mr. TELLER. I will tell the Senator why. I was not authorized in the committee to go into that question, but I can tell the Senator that I will undertake to demonstrate before an American jury, if that can be made so that I can do it, that American citizens to-day own more than three-quarters of the present sugar-producing capacity of that island. More than 75 per cent of it is in the hands of Americans, and American capital has been going in there within the last six months or a year at a rate in which capital has gone into no other section of the Western world.

I wish to say now that Cuba is the richest country on the globe. I was told by a reputable gentleman of high standing in Cuba that two years ago, in 1900, in eleven months the people of Cuba transmitted from Cuba to Spain a hundred and fifty-three millions of exchange. When I asked why, he said, "The money was mainly owned by Spaniards, and we (he being a Spanish lawyer) did not know exactly what would be the condition here, and we do not propose to take any chances; hence we have sent our money over to Spain."

Mr. MONEY. If the Senator will permit me, I should like to ask him a question for information. When he mentions the amount of American ownership in proportion to the holdings in Cuba, does he mean that the property is owned by Americans resident in Cuba or alien Americans?

Mr. TELLER. There are some residents there calling themselves Cubans who are American citizens, but the greater portion of this holding of which I speak is owned by people who live within the United States, and do not live in Cuba and never did live in Cuba.

Mr. PATTERSON. Speculators.

Mr. TELLER. Speculators in Cuban land. I shall not attempt to tell you about the holdings of these people. If you choose to go to the Commission created by Congress to settle the question as to what is our obligation for the destruction of property during the war down there, you will find that these poverty-stricken Cubans have filed claims against this Government for more than $60,000,000, and I can point out eight persons who have filed such claims for $2,500,000 for loss of profit on the crop alone.

I did not get up for the purpose of going into the details of this matter, except to say, and I want to repeat the statement, that I challenge anybody here to show that there is any distress in Cuba. I have the evidence taken before the committee of the House of Representatives, where men who came here and talked about the distress there were compelled before they got through to admit that there was no distress in Cuba.

In addition to the large amount of American capital that is going into Cuba, there has been an immense amount of German capital going in, and also some English capital. Mr. Atkins, a gentleman whom a great many members of this body know personally, who owns or is interested in two plantations there, testified before the House committee that the greater portion of the property of Cuba was held by Spaniards and not by Cubans. That statement will be found in his testimony.

REPRESENTATIONS TO CONGRESS.

In order to make a fair and full presentation of this subject, I ought to have an entire day. I know it would not be proper for me to ask so much time at this period, and so I am not going to do so. However, I do want to call attention to the character of telegrams that were sent here. I started to do that a while ago and was diverted. Mr. Place presented to the committee a telegram, when he came before it, telling about the distress in Cuba. It read:

Crisis more serious every day, calling for immediate remedy. Most energetic endeavors necessary to save country imminent disaster—anything preferable to such a calamity.

BEA,
President Matanzas Board of Merchants.

Here is another from the same place sent to another person:

JANUARY 13, 1902.

Immediate relief to Cuba situation absolutely necessary. Your most energetic cooperation solicited. Situation so serious prompt solution has become a question of humanity.

BEA,
President Matanzas Board of Merchants.

I wish to stop long enough to say that Mr. Atkins, who came here, as he said, for free sugar, and who said that Cuba had to have 50 per cent reduction, at least, if it could not get free sugar, admitted that the laborers of Cuba were getting more pay than the laborers in the Southern States of the United States. He stated that laborers in Cuba were getting from $23 to $30 in gold a month, and everybody knows that a laborer who gets $23 a month in Cuba can live better than a man who gets $30 a month can live in any part of the United States.

Mr. Corwine, a gentleman from New York, and who, I believe, is interested in sugar in Cuba, came before the committee, and when he got here he had a telegram from some one, saying:

Absolutely necessary something should be done for Cuba immediately. Do not leave any stone unturned in promoting quick action.

He also had another telegram:

You have my hearty support and cooperation in your mission to Washington. Absolutely necessary that something be done immediately in way of reciprocity with Cuba, not only for her sake, but for the manufacturing interests of this country.

JOHN C. EAMES.

Then Mr. Corwine presented another from a Mr. Fuller:

The entire business community of this city are, irrespective of party, deeply interested in securing reciprocal relations with Cuba.

Mr. Atkins said in the course of his testimony:

I do not wish to be an alarmist. I do not wish to say to what extent these disturbances will go; but a people without employment, where the masses are uneducated, as they are in Cuba, always lay their first loss to the government, no matter how good the government may be, etc.

Any Senator who wishes to verify this excerpt can do so by looking at Mr. Atkins's testimony. And before Mr. Atkins left the stand he declared that there were not laborers enough in Cuba to perform the labor that the conditions there demanded. I may digress to say that it is a historical and well-known fact that since we pulled down the Spanish flag and ran up our flag in Cuba 60,000 Spanish laborers have come from Spain on account of the urgent demand for laborers and the good wages being paid in the island of Cuba.

CUBA'S RELATIONS WITH OTHER COUNTRIES.

I wish to make a few remarks about the inability of Cuba to contract with other countries. This condition has been dwelt upon ad nauseam in the public press, and I have had letters from very well meaning people who have said to me that they thought I was cruel when I objected to a reduction of the duty on sugar, as they said, "inasmuch as we have prevented Cuba from making treaties with other nations." That is not true. There is no such prohibition, either direct or implied. I did not believe at the time that the Platt amendment should be adopted.

I think now it was a violation of good faith on our part—an unnecessary violation of good faith, in my judgment. But I said on the floor of the Senate when objecting to it that it was not objectionable because it took away or destroyed the sovereignty of Cuba, and nobody then pretended that it did accomplish that result. That was not my objection, nor was it the objection of anybody else who voted against it. Let us see what we did say Cuba should not do. We said:

That the government of Cuba shall never enter into any treaty or other compact with any foreign power or powers which will impair or tend to impair the independence of Cuba, nor in any manner authorize or permit any foreign power or powers to obtain, by colonization or for military or naval purposes or otherwise, lodgment in or control over any portion of said island.

That simply was a prohibition in the Cuban constitution, which the Cubans put in, that they would not part with the sovereignty of the island, and it applies to us as much as it applies to any other power. We did not propose to take the sovereignty of the island. The Supreme Court of the United States has already held that the Cubans are a sovereign people, and that so far as we are concerned Cuba is a foreign land.

Mr. SPOONER. Will the Senator from Colorado allow me?

Mr. TELLER. Certainly.

Mr. SPOONER. The Senator has referred to what the Supreme Court has said. I wish to call his attention to the fact that that amendment provided for a permanent treaty between the United States and Cuba, which of course involved independence.

Mr. TELLER. I am coming to that. That is the last thing here—that Cuba agreed that she would ultimately incorporate these things in a treaty with us, which, unless she was an independent power, she could not do.

I wish to say, in order to hasten over this point, that every considerable nation in the world has already recognized the Republic of Cuba. Great Britain has her minister there. France has her minister there. If Spain has not a minister there, she will have. We have ours there. We are not in the habit of sending our ministers to powers that do not have a sovereignty of their own; and if Cuba does not have absolute sovereignty, who has it? We have not, surely.

The next provision was:

That said government shall not assume or contract any public debt, to pay the interest upon which, and to make reasonable sinking-fund provision for the ultimate discharge of which, the ordinary revenues of the island, after defraying the current expenses of government, shall be inadequate.

I understand very well what was in the mind of Senators who insisted upon that provision. There was a large debt that Spain owed and for which she had pledged the revenues of Cuba, and there was some fear in the island and here that some time there might be pressure brought to compel Cuba to adopt that obligation and accept it as her debt. Nobody familiar with Cuban affairs believed Cuba would do it, at least not while the control of the island was in its present hands or in the hands of the people who are there now. Then we declared—

That all acts of the United States in Cuba during its military occupancy thereof are ratified and validated, and all lawful rights acquired thereunder shall be maintained and protected.

We also claimed the right to intervene if we thought intervention was necessary for the maintenance of peace. We intervened when the sovereignty was in Spain, and we can intervene to-morrow if there is disturbance there, without interfering with the sovereignty of the island.

Then we also provided, as the Senator from Wisconsin has called to my attention, that those provisions should be put into a treaty with the United States. There is where we expected to exercise our strong influence over the Cuban people.

The Senator from Wisconsin calls my attention to the fact that our right of intervention was to maintain their independence. That is the reason why we were to intervene. There is no sense in anybody's saying that Cuba can not contract commercially with any power in the world as she sees fit. She may have a tariff on imports that will give to Great Britain an advantage that she denies to us. I hope she will not enter into such an arrangement, but she may do so, and we can not complain if she does. That is, we can not legally complain. I think perhaps we might feel that we had some good ground of complaint.

NO DISTRESS.

I repeat that there is no distress in Cuba. I had a letter from a gentleman giving a very careful detailed statement to me of the conditions there, written after three years' residence. It is a private letter and I do not care to introduce it, but it is in accord with other letters I have received. In that letter the gentleman said that it was the finest place in the world for American capital and American enterprise, and I have no doubt it is.

I have here in a pamphlet a few things to which I should like to call attention. I am not going to read the entire paper, but I wish to read certain extracts, and have them appear in the RECORD for the benefit of those who do not have the advantage perhaps of looking at all these documents. There came before the committee of the House of Representatives Colonel Bliss, who had been the United States collector at Habana. Colonel Bliss, who is an officer of high character, was asked this question: "Is there any distress at the present time in the island of Cuba?" His reply was: "No, sir." Being asked if the people were all employed, he said they were, and added: "I should say there was no distress whatever, from all I have seen."

Then again he said, when asked about distress:

I have not spoken of distress except to deny that any existed so far as I knew. It is a long time since I have seen anyone begging on the streets, or anyone who wanted work who was not at work at good wages.

That was on the 25th of January last, before the House committee.

On the 27th of January what I am about to read appeared in one of the great dailies of this country, the New York Tribune. I do not mean to charge that the New York Tribune had any especial purpose in publishing it, but I do mean to charge that there was a propaganda here securing the publication of just such statements, and that the American sugar trust was furnishing in part, at least, the money to procure such fraudulent and false statements. Speaking of Cuba, on the 27th of January the New York Tribune said:

The public misery is terrible. Municipal council requests your support for speedy solution of economic problem, to avoid awful condition of hunger and calamities which will occur if efficient remedy is not furnished. Laborers without work; there are no industries; commerce is ruined. Cuban people expect that the United States, the arbiter of this situation, will make of Cuba a happy country, and not a land of mendicants.

That was published in one of the great newspapers of the national metropolis as late as Janury last. Senators can imagine how thousands of good American citizens would feel when they saw that, and then heard that I and others were objecting to the relief of Cuba, which we were charged with doing because we were not willing to change our economic laws to meet the demands of the so-called appalling condition of the people of Cuba.

Mr. Hawley, formerly a member of Congress, who had gone to Cuba and bought for himself and associates there a large principality of 60,000 or 70,000 acres of land or more, said:

And anybody who comes there will be a competitor in the field of labor, and as all these people are now employed, how can they be distressed and starved?

He was before the House committee asking for a reduction of the tariff. The question was that of distress, and to that he replied: "Who has said they are? Who has said they are starving? Nobody before the committee."

Mr. L. V. de Abad, who was a self-constituted commissioner from Cuba and who has repeatedly, if the newspapers do not do him an injustice, said that no government could be maintained in Cuba unless we made a concession to Cuba on the tariff, admitted before the House committee that he was a sugar grower with sixty or seventy thousand acres of sugar land. The question was this:

Then there is no suffering among the laboring classes, is there?

He replied:

No; that is not the case, because living in Cuba is very high; it is very expensive.

Then he was compelled to add after stating this:

The situation in Cuba to-day is that they have not enough laborers to do the work.

Mr. President, who ever heard of a starving population where there is a demand for work beyond the supply?

The New York Tribune again on the 2d of February had the following:

HABANA, *January 21.*

Cuban workmen's situation more pressing than ever, owing to economic crisis. Tariff concessions much wanted. Cuban Workmen League, composed of 10,000, appointed Commissioners Gamba, Place, Mendoza, their representatives, and respectfully urge you bring influence bear on Congress in order to remedy immediately evils before it is too late.

WORK AND WAGES IN CUBA.

Mr. Mendoza, one of these commissioners, said before the House committee:

There is plenty of work for the workmen in Cuba to-day.

And when the question arose in that committee whether Cuba could double her output of sugar, which somebody had said they could do, Mr. Mendoza and Mr. Atkins and Mr. Place and several other Cubans declared that that was impossible, because the labor could not be had. Mr. Atkins said:

In my section I pay $23 for a month of twenty-six working days. Mr. Kelly has to pay $1 a day.

The price of labor in Cuba is in excess of the price of labor in the Southern States.

He is the owner of a plantation of 14,000 acres and is interested in it.

Mr. Kelly, who is the owner of a plantation of 9,000 acres, said:

In our end of the island we are paying an average of $30 a month.

Mr. JONES of Arkansas. What is the date of that statement?

Mr. TELLER. That statement was made on the 15th day of January.

Mr. MONEY. If the Senator will permit me at that point in his speech, if it does not interfere with him at all, the statement made by those two gentlemen as to the wages in Cuba compared with the wages of Southern agricultural laborers is made in ignorance of the character of wages of the Southern farm laborer. It is true that in some parts of Cuba that may be true, but the average wages for farm labor, not engineers, or machinists, or mechanics, is about $20 a month; but in the South there are no money wages paid at all for farm laborers, but it is a part of the crop that they get, and the crop is one that takes the whole year to make and market. The workmen live on the place and stay there the whole year, and receive part of the crop for their labor.

Mr. TELLER. Mr. Place said that they paid in his part of the island $22 and $24 a month, and the evidence is that they paid as high as $30 a month. They make two crops down in Cuba where they make one in the South, and in Cuba there is a longer season to work.

Mr. MONEY. Excuse me, they do not make two crops of sugar per annum in Cuba.

Mr. TELLER. They make a crop of something else besides sugar. They have a season practically twice as long as we have in the Northern States.

Mr. MONEY. The Senator will permit me to say that they make but one crop of sugar.

Mr. TELLER. Of course.

Mr. MONEY. And on that land they raise nothing but sugar. They do not plant, on an averege, more than once in fifteen years.

Mr. TELLER. This demand for reciprocal relations with Cuba is not to be confined to sugar. That has been particularly pronounced because of the hand the sugar trust took in it. What the Cuban is demanding includes tobacco and vegetables, the citric fruits, everything that we grow in the semitropical region of the United States.

I wish to read what Mr. Hawley said. I am now reading from one of the documents I have asked to have published, and I wish to say that in every case where we called witnesses who made reference to the statements of others as to the statements of Mr. Hawley and Mr. Atkins, the page is given in the report of the evidence so that it can be readily found. Mr. Hawley said, on page 372 of the House report, on the 24th of January:

All that seek employment are employed.

Mr. Atkins said, on page 15, on the 15th of January:

The men are not to be had, and in order to increase the cane crop of Cuba, I think you would have to import the labor to make it.

Under normal conditions, sir, the labor in Cuba is not sufficient to go around.

Mr. Rabidan, who was one of the Commission, said:

Since the American occupation there has been a Spanish immigration of 60,000 laborers.

I have asked for the printing of the document from which these extracts are taken, and therefore I do not care about reading any more from it.

THE HOUSE BILL.

I wish now to call attention to the bill which passed the House of Representatives to provide for reciprocal trade relations with Cuba. Without reading it, I ask that I may put it at the end of my remarks as it passed the House. [See Appendix.] This bill provides for a reduction of 20 per cent in the duty on raw sugar coming from Cuba to the United States. It also provides for a tariff reduction which is equivalent to about 12½ cents per hundred on refined sugar, which is called the differential. It further provides that this reciprocal relation shall not take effect until such time as Cuba shall enact immigration, exclusion, and contract-labor laws and shall enter into a commercial agreement with the United States. I hardly know what is meant by the bill's reference to "exclusion" laws, but I suppose it means that Cuba must adopt the Chinese-exclusion law. They have now about 20,000 Chinamen in the island, according to the testimony of Mr. Atkins. I supposed there were more, but I am taking his statement. Last year there was an immigration of seven hundred and some Chinamen into Cuba. There is no law to prevent their going in.

Up to the time that this bill passed the House it had been very acceptable to the sugar trust, but I think that when the 12½ cents a hundred was taken off the duty on refined sugar there was a great and immediate falling off of interest on its part.

Mr. SPOONER. And the beet-sugar people, too?

Mr. TELLER. No; not on the part of the beet-sugar people. We offered to accept that bill if the advocates of reciprocity, as presented, would take it.

The evidence we took before the Senate committee will show that the American Sugar Company or the Havemeyer Company, through their regular officers, were preparing articles that appeared in the public press, and also preparing pamphlets and publishing in what are called the "patent-inside" papers professed editorials describing the necessity of immediate aid to Cuba because of her distress. It will also appear from Mr. Thurber's evidence before the committee that when he went to Mr. Havemeyer Mr. Havemeyer handed him his check for $2,500.

Mr. Thurber was employed by the military government of Cuba, and admitted before the committee that he had published three editions of 80,000 each, addressed "To the Best Thought of the United States," and paid for, he said, by the Cuban committee. Since he went home he has remembered that instead of three there were four of those editions. I hold in my hand a copy of his letter saying that he had overlooked the fact that there was a fourth edition and admitting that there were four.

Mr. MONEY. Paid by the committee?

Mr. TELLER. Oh, no; these bills were paid by the military government of Cuba. When he was before the committee he said he thought the advertising had been paid for by the Cuban committee. That committee had paid part of his expenses, but the military government had also paid part of it. He then said there had been three payments by the government of $2,880 each, but on returning home he found that there was still another payment to be accounted for, and that eleven thousand and some odd dollars had been paid by the Cuban military government for the purpose of reaching "the best thought" in the United States and showing the necessity of immediate relief. I think it well to print here the text of Mr. Thurber's letter to make the record complete. It is as follows:

UNITED STATES EXPORT ASSOCIATION,
New York, June 20, 1902.

Hon. O. H. PLATT,
Chairman Committee on Cuban Affairs, Washington, D. C.

DEAR SIR: In examining the publication work which I did in connection with securing a reduction in the tariff on Cuban products, I find that there was one edition of 80,000 documents paid for by the United States military government of Cuba, which I supposed was paid for by the Cuban committee, making four instead of three editions paid for by the military government, as I testified when before your committee.

I therefore wish to have my testimony amended in this respect, or, if it is too late to do this, kindly have the above correction printed in connection with my testimony; also, will you kindly inform Senator Teller.

Yours, very truly,

F. B. THURBER.

IN CASE OF A TREATY.

Mr. President, I want to say a word or two about the impropriety, as it seems to me, of our giving a concession of this kind to Cuba. We allow Cuba to have labor laws to suit herself while giving a reduction to our Asiatic subjects of only 25 per cent and enforcing our labor laws there. I need not dilate upon that. I think any Senator can see the impropriety of it. I am admonished that I ought not to take too much time on this matter.

Mr. MONEY. You have plenty of time.

Mr. TELLER. I do want to say a word or two, though, Mr. President, about the labor of Cuba. We are told by the public press that while no effort will be made at this session to secure any concession in the way of a reduction of duty, at the next session of Congress we will be met with a treaty. I want to say that I think it will be exceedingly unfair to the American sugar growers, whether cane or beet, to make any concession to Cuba and allow Cuba to maintain her present labor laws, to do her work with Chinese labor and menial labor of that class, and expect the American sugar growers of Colorado, Kansas, or Louisiana or Texas to compete with their cheap Chinese labor. I hope that the friends of concession, if they are going to present such a scheme to us at the next session, will be wise enough to see that it contains a provision that Cuba's labor laws must be like unto our labor laws.

IS THE TARIFF TOO HIGH?

I wish also to say a word about the reduction of duty on sugar. I have been told by a number of gentlemen, and I have seen the statement in the public press, that the sugar duty is very much too high. Possibly that is true. It was not thought too high when the Dingley tariff bill passed. Nobody then suggested—at least, the friends of the bill did not—that the duty was too high, and

this proposition to reduce the tariff on Cuban products has not come from the men who complained of the high tariff in the Dingley law.

I think all will agree that perhaps the present tariff is unnecessarily high upon some articles. So far as I am concerned (and of course I speak for myself only on this matter), I am quite prepared to join our friends on the other side of the Chamber in a proper reduction of tariff to meet the changed conditions since 1897, when the Dingley bill was passed. But, Mr. President, I do not intend, while I stay here, to give my approval to a reduction upon the only artiticle on which the American farmer has any real protection.

You have gone through the form of putting a tariff upon wheat. Everybody knows that it cuts no figure in the affairs of this country whatever. Here is an article that the farmers in 24 States can raise with profit—beets that make sugar—and now the purpose is to take the tariff off sugar and maintain the tariff upon steel and a hundred other things that the farmer has to buy that have risen in price since the tariff law was passed, I think, from 25 to 40 per cent. The farmer pays for every pound of steel, of nails, of iron, that he buys from 25 to 40 per cent more than he paid when the Dingley law was enacted. When you are ready to take 25 per cent of the duty off of your steel and iron and come to us, I say, as a representative of the sugar growers of the West, that I will agree for my people that we will take a like proportion off the duty on sugar. But I mean to see that you do not get it off of sugar unless you get it off of other things. A prominent member of your party in the House of Representatives said this ought to be entitled "A bill to protect the trust at the expense of the American farmer," and that is what it is; that is its purpose.

Mr. President, we can make all the sugar that we need in the United States, provided we can have a fair degree of protection, a protection on lines of equity with every other article that is protected. We do not ask any more protection for sugar than we will give to cotton cloth and every other thing that is manufactured in the United States, but we do insist that there is a reciprocity in protection which must be maintained. There must be a relative relation to one article with others in the way of a tariff, and that we are going to insist upon. We can not make sugar in the United States if you take off 50 per cent of the tariff. There is not a manufacturer of sugar in the United States who will not shut up with 50 per cent reduction on the present sugar duty unless you should choose, as we did some years ago, to offer a bounty.

A BOUNTY TO CUBA AT OUR EXPENSE.

I am not a free trader, Mr. President, myself. I belong to the old early school that believed in protection to a degree that equalized conditions. As we paid more for our labor than they paid in other countries, as capital was higher with us, we wanted to put our people upon an equality by giving them the benefit of a fair tariff.

The worst free trader I ever knew in my life never proposed a thing so infamous and so partial as that bill proposes. It is not simply to take the tariff off of sugar; the proposition there is to take out of the pocket of the American sugar grower 20 per cent of his protection and hand it over to his competitor. It is, in other words, Mr. President, an attempt to give a bounty to the sugar grower of Cuba. If any man can defend it on the lines of protection or within the lines of decent free trade, I have yet to hear him do so.

We can not raise sugar if we give a bounty to sugar grown in Cuba or anywhere else outside the United States, and that is what is proposed. Then you wonder why the people who raise sugar in Louisiana and Texas and in Colorado and Kansas and Michigan do not submit to so trifling a reduction as 20 per cent, when that 20 per cent taken from us is to be paid to other people, according to your theory, and according to mine to be paid to the great American monopoly, the sugar trust.

EFFORTS TO DESTROY AMERICAN SUGAR MAKING.

Last year the American sugar trust went into the Missouri Valley country and put their sugar on the market at a cent and a half a pound below the price for which it was selling in the city of New York, where the refineries are located. They expected by that means to destroy the sugar industry in the West, and they made their boast that they would do that. They put great quantities of sugar on the market and compelled the beet-sugar refiners in the Western country to store their sugar, and they are storing it yet. They made no secret that they intended to destroy the beet-sugar industry of the United States. Mr. Atkins said before the committee of the House of Representatives that he did not believe in encouraging the domestic production of sugar; that we ought to buy our sugar of Cuba. That statement, of course, was made because he raised sugar there.

There are a dozen men connected with the great sugar trust who have great plantations down in Cuba. We have a letter which was presented to the committee from one gentleman who said that he had bought 150,000 acres of Cuban sugar lands within the last year. A gentleman connected with one of the great railroads in this country has admitted that he has bought 64,000 acres in Cuba within a year. There has been not one such purchase only, but a dozen or twenty such purchases. Those men have not gone into this business in a very small way. This is the day of large accounts and great transactions, and the new plantation in Cuba which does not contain 75,000 or 100,000 acres—and they do not always know how many acres their plantations contain—does not amount to anything. To one gentleman who came before the committee, I said: "You have been buying some sugar lands down in Cuba." He said: "Yes; not my company, but I have joined with some other gentlemen in buying sugar lands there." I said: "How much have you bought?" "Well," he said, "I do not know; it is between 70,000 and 90,000 acres; but I do not know the exact amount." "What did you pay for it?" I asked. He replied: "In the neighborhood of $400,000."

Why, Mr. President, sugar lands have been bought in Cuba for a dollar an acre, and yet the very men who have gone down there and bought those sugar lands and invested thousands and tens of thousands of dollars in land and in buildings for making sugar come up here and tell us that, unless we change our economic system in this country to meet conditions in Cuba, they will lose money.

Mr. President, sugar can be made in Cuba for a cent a pound. If the Committee on Relations with Cuba had allowed me to go into that question, I should have proved beyond question that for between 1 cent and 1.35 cents the great body of sugar produced in Cuba has been made.

SUGAR TRUST HOLDINGS.

I beg the indulgence of the Senate for a few moments that I may call attention to one other phase of this question. The evidence taken before the committee shows that Mr. Havemeyer, the head of the American sugar trust, and his friends and people who are more or less connected with them in the production and refining of sugar, own 13 enormous sugar estates in Cuba, covering over half a million acres of sugar lands, each estate equipped with an extensive sugar factory. While but a small per cent of their lands is now in sugar cane, their production is nearly 190,000 tons. A tariff reduction of 20 per cent would mean for them a profit of $1,425,000 a year.

The testimony also shows that Americans, principally residents in the United States and Europe, own 1,500,000 acres of cane land in Cuba, of which 330,000 acres are or have been in cane, capable of producing 825,000 tons of sugar, and the proposed reduction of the tariff on that production would give something over $6,000,000, an absolute gift, Mr. President, to these Americans who are raising sugar in Cuba, provided that it is not taken and absorbed entirely by the refineries of the United States.

I think it is certainly safe to say that none of the proceeds from this reduction of five or six million dollars will reach the poor people of Cuba. There is a gentleman by the name of Newman Terry residing in Paris who is a citizen of the United States, who is a large property owner in Cuba, and who has filed immense bills against the Government before the Spanish Claims Commission. He has factories in Cuba on his several estates, which it is said are capable of producing 47,000 tons of sugar a year. He alone would receive, if the reduction inured to the benefit of those who make sugar, $357,000 of this 20 per cent reduction.

Mr. Terry has filed a claim against the United States Government for $2,754,302 for losses sustained on his several estates by reason of the Cuban war. He is said to live in Paris, and to expend at the rate of half a million dollars a year. He is one of the people who will receive the benefit if this reduction goes to those who raise sugar. Indeed, if the benefit of the reduction goes to the people who raise sugar, 75 per cent of it will go to American citizens, and more than $3,000,000 will go to persons who live in the United States and make sugar in Cuba.

AMERICAN CONSUMPTION OF SUGAR.

Now, sir, in my judgment, every interest of the American people demands that we should encourage the making of sugar in the United States. I have here a statement of the amount of money we have paid for sugar in twelve years. This is the amount we paid for foreign sugar, and at the wholesale prices of sugar, which has come into the United States in twelve years. The total for twelve years is $1,160,283,667. The table is as follows:

Value of sugar imported into the United States from 1890 to 1901, inclusive.

1890	$96,094,532	1897	$99,066,181
1891	105,728,216	1898	60,472,749
1892	104,408,813	1899	94,964,120
1893	116,255,784	1900	100,250,974
1894	126,871,889	1901	90,487,800
1895	76,462,836		
1896	89,219,773	Total for 12 years	1,160,283,667

Every year our consumption of sugar grows larger and larger. Dr. Wiley, the chemist of the Agricultural Department, esti-

mates that in 1911, nine years from now, the consumption of sugar in the United States will be 3,333,500 tons. Reckoning the retail price at 4 cents a pound, which is less than is now being paid, the American people will pay for this item of food alone $298,000,000. The estimate of Dr. Wiley is made upon the continued increase of consumption by American citizens during the last twenty years. He expresses the opinion that in 1921 our consumption of sugar will be 4,723,500 tons. I want to say that this calculation is not based upon the average increase for twenty years, which is nearly 7 per cent, but Dr. Wiley has cut it down to 4½ per cent, thinking, perhaps, that in the future the increase might not be so great; and yet at 4 cents a pound the cost to the American people will be $453,000,000.

Mr. President, I want to know whether anybody believes it is good policy for us to discourage the production of American sugar on the American Continent; whether it is well for us to depend upon foreign markets for one of the great food products of the country? We are consuming now about 66 pounds of sugar per capita per annum. We ought properly to consume at least 90 pounds per capita, which is the amount of English consumption. I admit that a good deal of the English consumption arises from the fact that they use large quantities of sugar in the making of preserves, marmalades, etc. We ought to do that also; and with the enormous amount of fruit raised in the United States we ought to consume at least as much sugar in proportion to population, and produce as much of that character of goods as any other people in the world.

Sugar has become a necessity; it is no longer a luxury. France has adopted the use of sugar in her army. After a very careful trial of its effect upon the soldiers, the French Government has determined that it is a valuable food product for the army, and has adopted it as one of the rations that it issues. We shall ultimately do the same, because it has been discovered that sugar is a heat-giving product, and that soldiers who use it can endure more than soldiers who do not use it, although the latter may live upon a heavy meat diet.

EXTENT OF OUR CUBAN TRADE.

Mr. President, the question is, are we as a people to make our own sugar, or are we to have it made by a foreign country upon the statement that we will secure trade with Cuba when Cuba sells us sugar? Why, Mr. President, the trade with Cuba is of practically no value to us as a nation. Last year we bought of Cuba about $31,000,000 worth of sugar, and that is the largest amount we have bought in a good many years. We sold Cuba about $27,000,000 worth of products. We bought a little more from Cuba than we sold her because we bought tobacco of her. Our total imports from Cuba were $46,000,000, and our exports were $27,000,000 in round numbers. Why, sir, the trade of Colorado with New England and New York is worth twice as much as the trade with Cuba is worth to the entire nation.

When the time comes that the American people will be producing $400,000,000 worth of sugar, the vast sum that is now paid out for foreign sugar will then be paid to American labor for the maintenance of American homes. And yet the Cuban reciprocity bill, which came to us from the House of Representatives and which found its tomb in the Senate Committee on Relations with Cuba, is based upon the theory that we are not to make our own sugar, but that it is to our interest to let the Cubans make it, and that we shall sell to Cuba whatever we can.

I want to add to what I have said a definition of reciprocity from a Republican authority, The Economist, a paper which has been published for many years in the interest of protection. It is as follows:

A DEFINITION OF RECIPROCITY.

With a candor altogether commendable, the Nashville News asks and answers the question, "What is true reciprocity?"

"To tell the truth, reciprocity is a sorry substitute for free trade. In theory complete reciprocity means free trade, or, in other words, it means the mutual removal of restrictions upon trade between a country and other countries with which it has to deal in a commercial way. In practice reciprocity is not complete. It consists only in the partial removal of restrictions on trade between two or more countries."

A better definition of reciprocity from the free-trade point of view could not be asked. Reciprocity is good as far as it goes, but it does not go far enough. It "is a sorry substitute for free trade," a mere makeshift. In the opinion of the News, it is also a trouble breeder.

Let the United States enter into a reciprocal agreement with a favored nation in regard to one or more products, and what is the result? Trade between the two countries may proceed smoothly enough, it may increase in accordance with expectations, but other nations become dissatisfied. They demand concessions, and if their demands are not granted retaliation tariff wars are set up, for the tariff game is open to all. Then, with high tariffs with some, low tariffs with others, and no tariffs with still others, and with high tariffs on certain articles and lower tariffs on others, the whole tariff schedule and the whole tariff question becomes more complicated and confused than ever. The attempt to carry out the idea of reciprocity usually causes trouble. It will engender commercial wars and sometimes worse. It is said that one of the principles inculcated by the reciprocity advocates in the Republican party is that the duties should be increased to a very high rate in order that they may then be lowered in return for concessions from the nation to which we offer the benefits of reciprocity. This large margin is called the bargaining power. Such a policy is unworthy of statesmen.

There is much force in the contention that any scheme of bargain-counter tariffs is certain to be attended with more friction than advantage; that, so far from conducing to universal peace in trade and commerce, it is certain to provoke and promote commercial warfare. Whether we make ducks or drakes of our tariff system through special trade treaties, or through the adoption of the maximum and minimum juggle, the result must always be the same—namely, trouble. The wiser plan is to leave our tariff system as it is until we get ready to sweep away all tariffs.

I wish Senators would take the pains to look at the testimony taken before the House Committee on Ways and Means, and also the testimony taken before the Committee on Relations with Cuba of the Senate at the latter part of this session, so that if at the next session of Congress there shall be an effort made to reduce the duty on sugar the Senate will be prepared to consider it.

I should like to say again that I shall be quite ready myself to join my Republican friends in any proper reduction of the tariff that shall include sugar as well as anything else, but I am not going to agree, if I can help it, to reducing the duty on the only article in which the American farmer is directly interested and keeping up the duty on everything else.

Mr. PLATT of Connecticut. Mr. President, I regret that at this period of the session, when we are all looking to an early adjournment and when business is pressing so that every Senator feels the pressure of it, upon a bill for the consideration of which the Senator from Pennsylvania [Mr. QUAY] had obtained unanimous consent, the Senator from Colorado [Mr. TELLER] should have thought it necessary to occupy so much of the time of the Senate as he has occupied in an attack by the beet-sugar trust upon the sugar-refining trust. It is outside of the question whether this country ought to enter into close and closer reciprocal arrangements for trade with the new Republic to which she has given birth and which for good or for evil is to be our immediate neighbor; and no discussion like that we have listened to this afternoon, no effort to excite prejudice against a sugar trust, no effort to make the community believe that any such reciprocal trade arrangement would injure the beet-sugar industry of this country is going to affect very much one way or the other this issue. It is made up; and from such statements as have been made here this afternoon, largely based upon the speculative imaginings of a witness employed by the beet-sugar lobby here, I appeal to the American people.

They understand this question. They understand perfectly well that no arrangement which has been proposed for extending American trade into Cuba and aiding Cuban trade within the island is going to hurt the beet-sugar industry of this country one particle, and the Senator himself acknowledges it. The Senator said that if the friends of beet sugar could have been sure that there would have been a reduction of only 20 per cent on Cuban sugar they would not have opposed it, because they did not suppose it would interfere with their industry. Why, then, all this talk to which we have listened this afternoon? No; this question——

Mr. TELLER. I want to interrupt the Senator to say that when he gets through I will make that statement correctly. He does not make it correctly.

Mr. PLATT of Connecticut. I do not wish to misquote or to misapprehend the Senator, and I will wait for him now to make his statement.

Mr. TELLER. Go on. I will tell you when you get through.

Mr. PLATT of Connecticut. That is certainly what I understood the Senator to say.

But this question is above any such considerations as have been presented to the Senate this afternoon. It is a question of political policy for the United States, and the most important question of foreign policy or domestic policy, outside of the immediate continental area of the United States, which has been presented to Congress in many a year.

For three-quarters of a century the question, What was to be the future of Cuba—what was to be its future attitude to and relations with the United States—has engaged the attention of the wisest and ablest and most farseeing of our statesmen and public men. Everybody has seen and everybody knows to-day that there is just one question, as there has been but one question, before the American people with regard to our neighbor, now a neighboring Republic. It is this: Whether Cuba is to be occupied and governed by a friendly power, so that it shall be in time of trouble an outpost of our defense, or whether it is to be in the hands of an unfriendly and hostile people, until for self-defense the United States must needs take possession of it and incorporate it into our system.

In my mind it is not so much a question of relief for Cuba, though I think, notwithstanding all that has been said by the Senator from Colorado, that events in the near future will show that the condition of Cuba is such that it would have been not only an act of generosity but an act of wisdom to have extended some relief to Cuba. It is more than that. It is protecting the United States in one of its most vital points. It is an act of self-defense for the United States that, in the language of President McKinley,

we should see that with our close neighbor, Cuba, we must be close friends. I have not the time to extend these remarks so as to follow the Senator from Colorado in all the statements he has made, and I do not stop now to dwell on the commercial importance of close and closer trade relations with Cuba.

I do not stop to dwell upon the fact that there is in this whole world to-day no place where we can so quickly, so surely, and so largely extend our foreign trade as in the island of Cuba. I could demonstrate it if I had the time. But I simply want to protest here to-day that this question will not down before the American people because some have seen fit to try to make it revolve around a prejudice against the sugar trust in the United States, or because some people have unjustly and, as I believe, without foundation, tried to convey the idea that by this means there would be some destruction of or injury to the American beet-sugar industry.

Seventy-five per cent of the people of the United States, unless I am mistaken, are going to be disappointed and chagrined and humiliated because Congress is going to adjourn without having acted upon this very important question. That humiliation, that disappointment, and that chagrin will not down, Mr. President. The people of the United States see through all these things and are not going to be diverted in their sense of what we, in justice and self-interest, owe to Cuba and ourselves in this matter, by anything which may be alluded to for the purpose of obscuring the real issue in this matter. That sentiment will grow, as it ought to grow.

I do not know, Mr. President, that I care to say more in this matter. I desire to say here that from the day Cuba came into our military occupation I have seen or thought I saw that there could be but one ending to this matter—either that we must come into such economic relations with Cuba as would give that Republic, created by us—in a measure shut off from profitable communication with the rest of the world—such fair prosperity as would produce contentment and happiness and affection for the United States, or on the other hand such a condition in Cuba as would eventually compel us to accept at the hands of the disappointed people of Cuba an offer for annexation to the United States.

I regard that, Mr. President, as the greatest peril which to-day besets our Government. I can think of no future danger to be so much apprehended as that. When we begin to annex to our country foreign territories with foreign inhabitants, inhabitants alien to our race, to our habits, to our customs, to our traditions, and to our institutions, with the near certainty that statehood is to follow, we shall have taken the first step, in my judgment, toward the demoralization, if not the disintegration, of our republican institutions. I want it to end by the maintenance in Cuba of a friendly, affectionate, independent republican form of government, whose people will know that they can always rely upon the United States in an emergency to continue that independent, republican, and affectionate government.

Mr. President, I think we have come to a crisis in our affairs. I think we have one plain duty, and that is so to treat Cuba, with reference to her commercial relations to the United States, as that we may make and keep her our friend. I stand for a permanent republic in Cuba. If the amendment, which I had the honor to present to the Army bill at the last session, meant anything it meant that Cuba was not only to have its independence, but that the United States stood and would stand ready at hand to see that that independent and republican government was permanent in the island of Cuba.

I am not going to talk about whether there is distress in Cuba. Time, and time not very remote, will show; but I do believe that the best interests of that people and the best interests of the United States, the best interests of that Government and of our Government should lead us to such close reciprocal, commercial, and political relations as that we shall always be friends and shall not be called upon to absorb Cuba.

Mr. TELLER. Mr. President, I do not know whether the time has quite come when the Senator from Connecticut [Mr. PLATT] can lay out for me what shall be my course; but I think that while I remain in the Senate I shall exercise my judgment as to when it is proper for me to take the floor to speak upon a subject. I will hardly ask permission from the Senator from Connecticut.

Mr. President, if we owe anything to Cuba, we owe it to all the Southern Republics. We owe it to Mexico; we owe it to Guatemala, Costa Rica, Colombia, and the whole line of Spanish-speaking people in the Western Hemisphere. The Senator did not have time to tell us why we owe anything to Cuba. Of course, he calls attention to the fact that there is a place for us to extend our commerce. That is a second thought in connection with this question. There was no suggestion six months ago that it was necessary to extend our commerce in order to help Cuba. We were to help Cuba because she was in such dire distress; and when it was proved that there was no distress there, that there was no foundation for that statement, then the Senator and his confreres shifted their position and concluded it was a great question of domestic policy for us and for Cuba that we should enter into this reciprocal arrangement and expand our commerce in Cuba.

The population of Cuba is not very much different in size from the population of Michigan. Michigan has a very large industry threatened by this sort of legislation, and her commerce with the other States that deal with her is worth more in one single year than Cuba's commerce would be worth in ten. The population of Colorado is a little more than a third of the population of Cuba. We consume more every year of the things that New England and the other sections of the country produce that we do not produce than Cuba consumes in a single year.

ANNEXATION A BABY CRY.

Mr. President, the Senator now thinks to frighten us by suggesting, and we have had that ad nauseum, that if we do not yield to this demand we are going to annex these people.

That is a baby cry, if I may say it without being offensive. It is childish. I would infinitely prefer to have close political relations with those people if we are to have commercial relations of the character that the Senator proposes. We would then have some control. He does not propose any control over anything of importance.

I wish to say here that I have been connected with the investigation of this question now for two months. I know very well that this movement was never started by anybody who wanted to help Cuba. On the contrary, it was started in the interest of American holders of land in Cuba. It started in the interest of the great American sugar trust, and if there is a public sentiment, as the Senator from Connecticut says there is, if it is true that 75 per cent of the people of the United States are in moral distress because we have not come up to the great duty we owe to Cuba, it is because they have been deceived by purchased newspapers and by published falsehoods that have been sent out and paid for either by the money of Cuba or by the money of the sugar refiners of the United States.

Now, the Senator talks about the beet trust. He knows just as well as I do that there is not a beet trust in this country, and there never has been. He knows that is not a fact. There never has been any beet trust.

I do not want to debate this question with much warmth, although I must say that I do not think that under the pretense of helping Cuba we ought to undertake to help somebody else. I want to know why the people who live in the United States and produce more than one-half the sugar of Cuba should be paid a bounty, and a bounty, too, that you propose to take from the American sugar producer. If you took the money out of the Treasury of the United States, the process would be objectionable, but it would not be so objectionable as it is to take it from the beet-sugar makers alone.

Mr. President, the Senator from Connecticut seems to think the moral sense of the country is shocked by the failure of this legislation. I want the Senator to tell us why in the name of common sense there is not a bill here for this purpose. Why is there not a bill before the Senate? Why has the bill not been reported from committee? There would have been a bill here, the bill which came from the House would have been here if that body had not taken off the differential duty on refined sugar. If the sugar trust had not got a lick of 12½ cents a hundred on its refined sugar the bill would have got out of the committee and would be now in the Senate. That is the reason why it is not here now. We on this side were prepared to take that bill as it came from the House, and we will take it now, if the professed advocates of reciprocity will let us have it.

I did not say, and the RECORD will not show that I said, that a reduction of 20 per cent would not injure us. I said we would have conceded that reduction if we had known that the reduction would stop there, even if it did hurt us, and if we had believed that the people of Cuba were in such distress as that it was necessary to make the concession. When we were appealed to to help suffering Cuba a good many on this side of the Chamber replied, "You can take out of the Treasury money and vote it to Cuba if you will see to it that it reaches the Cuban sugar growers and not the sugar trust," and such a measure could have been passed if the Senator from Connecticut had been as anxious to pass that bill as he now seems to be to pass his own bill. You could have passed a bill here that would put into the hands of the present Executive a sum equivalent to the total that would be represented by the reduction you proposed—20 per cent or 25 per cent—to be paid out to the actual producers of sugar in Cuba—Cubans—and not to great syndicates and trusts in the United States.

The truth is the anxiety and the power back of it have not come from a desire to help Cuba. It has been a desire to take care of the people who have gone from the United States down there and bought land; to take care of American citizens living in the United

States and holding interests in Cuba. It has been their influence which has been felt here, and it is not the sentiment of the American people, in my judgment, that we owe anything to Cuba any more than we owe something to Guatemala or Mexico or any other of the Republics of the earth.

Mr. President, I want to say another thing while I am on my feet, and I think I say it with some knowledge of the conditions in Cuba. The great mass of the people of that island do not want to be annexed to the United States. The men who would not take Cuban citizenship and who have maintained their citizenship with Spain want the islands to be annexed. Also the men who have gone down there from this country and bought hundreds of thousands of acres of cheap land favor annexation, that they may exploit their purchases. Those are the classes of men who want annexation. The men who carried the banner of Cuba and fought Spain do not want it, and they would not have it unless you forced it on them, and you could not do that without a war. There is no danger because we do not give them a reduction of 20 per cent in the duty on sugar that they will come to us and say "you must admit us into the Union." If they do come it will be for us to determine whether we are to admit them or not.

Mr. President, I am not one of those who are very much frightened about the admission of Cuba, as the Senator appears to be. I do not want to admit Cuba. I do not believe it would be profitable for Cuba or for our own people to make Cuba a State in the Union to-day. I do not believe it would be profitable for us to make the Philippine Islands a State or several States in the Union. I want to see Cuba have a government of her own, and she will maintain a government of her own if she is not interfered with by people from this side. If you will keep hands off of Cuba, and if the men or combinations of men who have gone down there and bought 100,000 and 150,000 acre tracts of land will be kept from dominating the conditions in Cuba you will have no application whatever for annexation from Cuba.

I think when that application comes, if it does come, we will probably have virtue enough in the United States not to admit Cuba if it is not for our interest to do so. I do not think it is necessary that we should change our tariff laws and that we should encourage competition with our sugar growers by the people of Cuba by giving them a bounty of 20 per cent over anybody else in the world so that they might compete with us in order to prevent Cuba from going into disorder. I think that view is a slander upon Cuba, Mr. President. That is not the way for us to maintain the friendly relations the Senator talks about.

I wish to repeat that so far as I am concerned I would do anything it was proper to do for Cuba. If it were necessary to vote money out of our Treasury, I would aid in such a movement. We voted $3,000,000 one time after the war was over to pay the soldiery of Cuba, and I would vote another $3,000,000 to maintain order and quietude in that Republic, if necessary. But there is no sign to-day, nor has there been since the Cuban Government went into operation, of any necessity for assistance from us, financially, morally, or in any other way.

An act (H. R. 12765) to provide for reciprocal trade relations with Cuba.

Be it enacted, etc., That for the purpose of securing reciprocal trade relations with Cuba, the President is hereby authorized, as soon as may be after the establishment of an independent government in Cuba and the enactment by said Government of immigration, exclusion, and contract-labor laws as fully restrictive of immigration as the laws of the United States, to enter into negotiations with said Government with a view to the arrangement of a commercial agreement in which reciprocal and equivalent concessions may be secured in favor of the products and manufactures of the United States by rates of duty which shall be less by an amount equivalent to at least 20 per cent ad valorem upon such products and manufactures than the rates imposed upon the like articles when imported into Cuba from the most favored of other countries, and which shall not be greater than the rates imposed by the United States upon the like articles imported from Cuba; and whenever the Government of Cuba shall enact such immigration, exclusion, and contract-labor laws, and shall enter into such commercial agreement with the United States, and shall make such concessions in favor of the products and manufactures thereof as aforesaid, and which agreement, in the judgment of the President, shall be reciprocal and equivalent, he shall be authorized to proclaim such facts both as to the enactment of such immigration, exclusion, and contract-labor laws and the making of such agreement; and thereafter until the 1st day of December, 1903, the imposition of the duties now imposed by law on all articles imported from Cuba, the products thereof, into the United States shall be suspended, and in lieu thereof there shall be levied, collected, and paid upon all such articles imported from Cuba 80 per cent of the rate of duty now levied upon like articles imported from foreign countries.

And upon the making of said agreement and the issuance of said proclamation, and while said agreement shall remain in force, there shall be levied, collected, and paid, in lieu of the duties thereon now provided by law, on all sugars above No. 16 Dutch standard in color and on all sugar which has gone through a process of refining, imported into the United States, 1 cent and eight hundred and twenty-five one-thousandths of 1 cent per pound. The President shall have power, and it shall be his duty, whenever he shall be satisfied that either such immigration, exclusion, or contract-labor laws or such agreement mentioned in this act are not being fully executed by the government of Cuba, to notify such government thereof, and thereafter there shall be levied, collected, and paid upon all articles imported from Cuba the full rate of duty provided by law upon articles imported from foreign countries.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. C. R. MCKENNEY, its enrolling clerk, announced that the House had passed with amendments the bill (S. 5383) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Atlanta, in the State of Georgia, on the first Monday in October in each year; in which it requested the concurrence of the Senate.

CIRCUIT COURT OF APPEALS.

Mr. BACON. I ask the Chair to lay before the Senate the bill which has just been returned from the House of Representatives with amendments, in order that I may move that the Senate concur in the amendments of the House of Representatives.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 5383) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Atlanta, in the State of Georgia, on the first Monday in October in each year; which were, on page 2, line 2, after the word "act," to insert:

Provided, That nothing herein contained shall prevent the court from hearing appeals or writs of error wherever the said court shall sit in cases of injunctions and in all other cases which under the statutes and the rules, or in the opinion of the court, are entitled to be brought to a speedy hearing.

And after line 9, on page 2, to insert the following as a new section:

SEC. 5. That the clerk of said court is authorized and permitted to pay out of the fees and emoluments of his office, (1) the necessary expenses incurred by him in transporting from his office in New Orleans, La., to Atlanta, Ga., and in transporting from Atlanta, Ga., to New Orleans, La., the records, books, papers, files, dockets, and supplies necessary for the use of the court at its terms to be held in Atlanta, Ga.; (2) and allowance for actual expenses not exceeding $10 per day, to cover travel and subsistence, for each day he may be required to be present at Atlanta, Ga., on business connected with his said office, such expenses and allowance to be approved and allowed by the senior circuit judge of the fifth judicial circuit.

Mr. BACON. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

SOUTH CAROLINA DISPENSARY LAW.

Mr. TILLMAN. I ask leave to make a request for publication in the RECORD and as a document of an article which I send to the desk, relating to the South Carolina dispensary law. I am pestered almost beyond endurance by inquiries from all over the United States, and I have letters every week asking me about the details of our whisky legislation in South Carolina. This will enable me to answer a great many of them by simply mailing a copy of this document, which will be of interest to everybody.

The PRESIDENT pro tempore. The Senator from South Carolina asks unanimous consent of the Senate that there be printed as a document an article in relation to the dispensary law of South Carolina.

Mr. TILLMAN. And also that it go into the RECORD.

Several SENATORS. Oh, no.

Mr. BACON. Why does the Senator want it in the RECORD?

Mr. TILLMAN. It is only a short article about two columns long.

The PRESIDENT pro tempore. The Senator from South Carolina asks that the matter referred to be printed in the RECORD. Is there objection? The Chair hears none, and it will be printed in the RECORD and as a document.

The article referred to is as follows:

[The Press and Banner, Abbeville, S. C., Wednesday, June 25, 1902.]

FLORIDA SEEKING LIGHT ON THE DISPENSARY LAW.

Senator P. W. Butler, of Leesburg, Fla., has written to the Greenville News, seeking information as to the practical workings of the dispensary law in South Carolina. As the reports of no two men who disagree are likely to agree, so the reports of men who oppose the dispensary and those who favor the dispensary can not be along the same lines. Mr. Butler can, by writing to the editors of the city newspapers and men who favor the license system, get one opinion, and from those who favor prohibition and support the dispensary because of its prohibitive features, he can get another opinion.

In reaching the answer to his letters Mr. Butler should find out the personal feelings, prejudices, or convictions of his correspondent. The standpoint from which the writer views the matter may give color to his convictions.

For instance: This editor has been a prohibitionist all his life, and has worked against the sale and use of liquor during a lifetime of more than sixty years. He was as strongly opposed to the dispensary as anybody could have been, but since it was forced upon the town this editor has become an unalterable convert to the system of controlling the sale of liquor. Our reasons for supporting the law may be colored by some of these reasons:

1. It gives absolute prohibition from sunset to sunrise, as well as from sunset Saturday to sunrise Monday.

2. Drunkenness has almost disappeared from our streets. In former times it was by common consent thought proper for ladies to stay off of our streets on Saturday and sale day.

3. The habit of treating has been broken up, root and branch. This school for training drunkards has entirely disappeared, and it is hoped that, when these drunkards end their days, drunkenness will be unknown.

4. The bars were formerly kept open until a late hour at night, and their back doors were not always kept closed on Sunday. The places for temptation have been closed and no man can buy liquor at night.

5. The dispensary commends itself to temperance people because no liquor is sold on credit. No man may pledge his week's wages or his wife's jewelry for drink. The cash must be paid at the time of purchase, and this fact of itself is a great restraint.

6. If men must have liquor they may rely implicitly on getting what they call for and pay for.

7. No drinking is allowed on the premises, and few men will buy a pint to drink it out of the neck of a bottle behind a fence corner.

8. When the licensed bars were closed 999 houses were left for other and better business. The estimate is that 5,000 persons were actively engaged in the liquor traffic at that time.

9. Since the dispensary law, only about 100 houses are occupied with the liquor traffic. The number of employees has been reduced from 5,000 to perhaps 200 in the dispensaries throughout the State, while at the central office not over 500 persons are employed, largely women who wish to earn an honest sum.

10. The result of the dispensary, therefore, is to reduce the number of men and houses devoted to the business, the men from 5,000 to 700, the houses from 999 to 100.

11. The advantages of the change in Abbeville have been improvement of the streets and neighborhoods. Not long ago the nicest jewelry store that Abbeville ever had was in a storeroom from which liquor was retailed.

12. The post-office is located there now, and next door to it is our dispensary, where it was lately moved. In all of the United States, we presume, a post-office could not be found with only a brick wall separating it from a barroom.

13. The dispensary has been the death knell of pool and billiard playing, and places for the resort of mixed crowds of boys and men at night are no more.

14. The arrests for drunkenness in this town have been reduced to a minimum. They do not at all compare with former arrests.

15. If there is a sober man in Abbeville who would return to the barroom system or to prohibition—when we had free liquor—we do not know of the fact.

16. This editor has lived on the public square for forty years. In that time we have had high license, prohibition, license, dispensary.

17. Our testimony would be that prohibition gave us more drunkenness and more of a feeling of unrest than anything else. High license was the most veritable humbug. It deprived poor and honest men of the privilege of selling. It gave a few the monopoly, and then we had no confidence in the quality of the liquor sold, which was generally put in bottles which were short of their repute. For instance, so-called quart bottles were, with rarest exception, what are called "sixes," that is to say, six, and not four, contained a gallon. The dispensary gives full measure.

This, in brief, would be the testimony of an ardent temperance advocate. We are not willing to let go the substance of the prohibition which we now have for the shadow of total prohibition.

The larger cities and the daily newspapers of Florida, would, in all probability, fight the dispensary for various reasons, one of which is it removes the liquor dealers from politics. The barkeeper and the church deacon who rents him a house would fight the measure, and any intelligent or sensible man knows whether whisky does not control the local elections. If for no other reason, this of itself would commend the dispensary to temperance people.

This newspaper has never looked particularly to the profits arising from the dispensary. The question as to the disposition of the half million dollars' profit has been a matter of concern. If we sell dispensary liquor at cost, we encourage liquor drinking. If we sell at a higher price, we restrain the sale. For this reason we favor the higher price of dispensary liquor. The profits to this county last year was $10,182.81, one-half going to the town, the other half to county expenses. The State's profit was added and charged in Columbia, before it was received in Abbeville, and our profits are therefore over and above the State's share.

REQUEST FOR PRINTING.

Mr. CARMACK. Mr. President, I wish to ask leave to print some matters in the RECORD, being extracts from testimony before the Senate committee and from official documents in reference to the charges of cruelty alleged to have been perpetrated in the Philippine Islands.

Mr. ALDRICH. In the absence of the chairman of the committee [Mr. LODGE], I feel obliged to object.

Mr. CARMACK. Does the Senator from Rhode Island object?

Mr. ALDRICH. I do.

Mr. CARMACK. I have the floor, Mr. President?

Mr. ALDRICH. The Senator from Pennsylvania [Mr. QUAY] has the floor.

Mr. CARMACK. If I can have the opportunity to make the request in the presence of the Senator from Massachusetts [Mr. LODGE], I will wait. I do not know when I shall have the opportunity, or whether I shall have an opportunity to get the floor or not.

I will say in this connection, Mr. President, that in the course of my speech on this question I expressed my intention of including this testimony with my speech and I thought I had asked permission to do so. I remember that the Senator from Indiana [Mr. BEVERIDGE] and I were then engaged in a colloquy and he remarked that he would have no objection to its being done. But I find in looking over the report of my remarks that I did not ask and obtain permission to print it and I make that request now. The Senator from Indiana made a like request and it was granted.

Mr. ALDRICH. I did not object to the publication of the matter the Senator referred to for any purpose of making that objection final, but I thought that as long as the committee was not represented by the chairman upon the floor, or as far as I could see by any Republican member, the request should be deferred.

Mr. CARMACK. The Senator from Indiana [Mr. BEVERIDGE] was here a moment ago.

Mr. ALDRICH. I suggest to the Senator that it is far more in accordance with my notion of comity between Senators that he should make the request when the Senator from Massachusetts [Mr. LODGE] is here.

Mr. CARMACK. The Senator from Maryland [Mr. MCCOMAS] is a member of the committee, and he is present. I am sure there will be no objection from any member of the committee.

Mr. MCCOMAS. I concur in the suggestion of the Senator from Rhode Island that the Senator from Tennessee defer his request until to-morrow, when I suppose the chairman of the committee will be here.

Mr. ALDRICH. The Senator from Massachusetts will certainly be here to-morrow.

The PRESIDENT pro tempore. The Chair will recognize the Senator from Tennessee at any time.

PRINTING OF DOCUMENTS.

Mr. CARMACK. Very well. I wish to ask consent to print some other matters in the RECORD. I will say before doing so that I am not going to try to coerce the Senate into it. They are matters in regard to the steel trust, the wire-rope trust, and the sugar trust.

Mr. ALDRICH. It had better be printed as a document. That kind of material ought not to be printed in the RECORD at an immense cost to the Government. The Government ought not in any form to be made responsible for statements of that kind.

Mr. CARMACK. That will suit me just as well.

Mr. PATTERSON. As a document?

Mr. CARMACK. As a document.

Mr. COCKRELL. As a document?

Mr. CARMACK. I will request that the matter be printed as a document.

Mr. BACON. As one document?

Mr. CARMACK. No; as three separate documents.

The PRESIDENT pro tempore. The Senator from Tennessee asks that the papers he sends to the desk may be printed as three separate documents. Is there objection?

Mr. ALDRICH. I will not object, but I think it is hardly fair toward all the people of the United States that the Government should be used to print and circulate documents for political purposes by any political party.

The PRESIDENT pro tempore. The Chair hears no objection, and the order is made.

CHEROKEE INDIAN LANDS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 5956) to provide for the allotment of the lands of the Cherokee Nation, for the disposition of town sites therein, and for other purposes.

The PRESIDENT pro tempore. Will the Senate agree to the amendment of the Committee on Indian Affairs as amended?

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TAXATION IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER. Mr. President, that there may be no misunderstanding, I will state that some two hours ago the Senate kindly gave unanimous consent that at the conclusion of the bill which was then under consideration and which has just passed, I might ask for the consideration of two House bills relating to the District of Columbia, that it is very important should be passed.

I ask the Senate to proceed to the consideration of the bill (H. R. 11400) to amend an act entitled "An act in relation to taxes and tax sales in the District of Columbia," approved February 28, 1898.

The PRESIDENT pro tempore. Did the Senator obtain unanimous consent that the bill might be taken up for consideration?

Mr. GALLINGER. I did, I will say to the Chair.

The PRESIDENT pro tempore. Then the bill is before the Senate for consideration.

The Senate, as in Committee of the Whole, proceeded to the consideration of the bill, which had been reported from the Committee on the District of Columbia with amendment.

Mr. GALLINGER. I ask unanimous consent that the formal reading of the bill may be dispensed with, and that the bill be read for action on the amendments.

The PRESIDENT pro tempore. The Senator from New Hampshire asks unanimous consent that the formal reading of the bill be dispensed with, that it be read for amendment, and that the committee amendments shall first receive consideration. Is there objection? The Chair hears none.

The Secretary proceeded to read the bill.

The first amendment of the Committee on the District of Columbia was, on page 2, line 4, after the words "Monday in" to strike out "March" and insert "February;" so as to read:

That the said Commissioners shall give notice, by advertising twice a week for three successive weeks, beginning on the third Monday in February of each year hereafter, in the regular issue of three daily newspapers published in said District, that the said pamphlet has been printed and that a copy thereof will be delivered to any taxpayer applying therefor at the office of the collector of taxes of said District, etc.

The amendment was agreed to.

The next amendment was, on page 3, line 3, after the words "SEC. 3." to strike out:

That every purchaser other than the District at any sale of property sold as aforesaid shall pay the amount of his bid to the collector of taxes within five days after the last day of sale. If any such purchaser shall not have paid his bid or the same shall not have been collected from him within the time above mentioned, the Commissioners may set aside the sale for which the bid was made, and all the rights of the purchaser under such bid shall thereby be extinguished.

And to insert:

That the collector of taxes shall require from every purchaser of property sold as aforesaid a deposit sufficient, in his judgment, to guarantee a full and final settlement for such purchase. Every purchaser other than the District of Columbia at any sale of property as aforesaid shall pay the full amount of his bid, including surplus, if any, to the collector of taxes within five days after the last day of sale, and in case such payment is not made within the time specified the deposit of the person so failing to make payment shall be forfeited to the District of Columbia, and said collector of taxes shall then issue the certificate of sale for such property to the next highest bidder, and if payment of the amount of the bid of said next highest bidder be not made within two days thereafter the Commissioners of the District of Columbia shall set aside both sales for which the bids were made.

The amendment was agreed to.

The next amendment was, on page 4, line 9, after the word "sale," to insert "exclusive of surplus;" so as to read:

Immediately after the close of the sale, upon payment of the purchase money, the said collector of taxes shall issue to the purchaser a certificate of sale, and if the property shall not be redeemed by the owner or owners thereof within two years from the last day of sale, by payment to the collector of taxes of said District, for the use of the legal holder of the certificate, the amount for which it was sold at such sale, exclusive of surplus, and 12 per cent per annum thereon, a deed shall be given by the Commissioners of the District, or their successors in office, to the purchaser at such tax sale, his heirs or devisees, or to the assignee of such certificates, etc.

The amendment was agreed to.

The next amendment was, on page 6, line 22, after the word "thereof," to strike out "the Commissioners of the District of Columbia, through;" on page 7, in line 3, after the word "sale," to strike out "reciting the time when same was bid off as aforesaid and the amount paid by the person or persons to whom such certificate may be issued;" in line 7, after the word "date," to strike out "when bid off by the collector" and insert "of said certificate;" and in line 10, after the word "amount," to insert "(exclusive of surplus);" so as to read:

Provided, however, That failure on the part of the District, from any cause whatsoever, to enforce the liens acquired aforesaid shall not release the property from any tax whatsoever that may be due the D strict: *Provided further*, That at any time after any property shall have been bid off as aforesaid by the collector of taxes, and before the expiration of the time allowed for the redemption thereof, the collector of taxes of said District may issue to any person or persons, upon the payment of a sum not less than the aggregate amount of the taxes, penalties, and costs due at the time the property was bid off by the collector and that may have accrued after that date, a certificate of sale; and if the property shall not be redeemed by the owner or owners thereof within two years from the date of said certificate, by payment to the collector of taxes of said District, for the use of the legal holder of the certificate, the amount (exclusive of surplus) paid by the person or persons to whom such certificate was issued and 12 per cent per annum thereon, a deed shall be given by the Commissioners of the District of Columbia, or their successors in office, to the legal holder of such certificate.

Mr. GALLINGER. Let the parentheses before and after the words "exclusive of surplus" be stricken out. There is no need for them.

The PRESIDENT pro tempore. The parentheses will be stricken out. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 8, line 11, after the word "for," to insert "exclusive of surplus;" and in line 13, after the word "sale," to strike out:

Together with any tax or assessment which the holder of said certificate shall have paid between the days of sale and redemption, with interest on the same at the rate of 8 per centum per annum,

So as to read:

That the owner of any property sold as aforesaid, or any other person having an interest therein at the time of redemption, may redeem the same from such sale at any time within two years after the last day of sale by paying to the collector of taxes, for the use of the purchaser, his heirs and assigns, the sum mentioned in the certificate of sale therefor, exclusive of surplus, with interest thereon at the rate of 12 per centum per annum after the date of such certificate of sale.

The amendment was agreed to.

The next amendment was, on page 9, line 1, after the word "collected," to strike out "as provided in sections 161 and 162, chapter 6, of the Revised Statutes of the United States, relating to the District of Columbia," and insert "as hereinbefore provided for;" and in line 8, after the word "District," to insert:

Provided, That if any property sold for taxes, as herein provided, is redeemed from such sale within two years from last day of sale, any surplus paid at time of sale shall be paid by the District of Columbia to the legal holder of certificate of sale.

So as to read:

That the collector of taxes shall, within twenty days, exclusive of Sundays and legal holidays, after the last day of the sale hereinbefore provided for as aforesaid, file with the recorder of deeds a written report, in which he shall give a statement of the property sold, other than that sold to the District of Columbia, to whom it was assessed, the taxes due, to whom sold, the amount paid, the date of sale, the cost thereof, and the surplus, if any. Any surplus remaining after the collection of taxes, penalties, and costs on any real estate shall be collected as hereinbefore provided for, and shall be deposited by the collector of taxes to the credit of the surplus fund, to be paid to the owner or owners, or their legal representatives, in the same manner as other payments made by the District: *Provided*, That if any property sold for taxes, as herein provided, is redeemed from such sale within two years from last day of sale, any surplus paid at time of sale shall be paid by the District of Columbia to the legal holder of certificate of sale.

The amendment was agreed to.

The next amendment was, on page 9, line 18, after the words "per annum," to insert "and the surplus, if any," and in line 20, after the word "assigns," to insert:

Provided, That if any conveyance made by the said Commissioners, of property sold for taxes, shall at any time be set aside by decree of any court as invalid, the party in whose favor the decree is rendered shall pay to the party holding such conveyance, his heirs or assigns, the amount paid for such taxes and conveyances, together with interest at the rate of 6 per cent per annum.

So as to read:

That the said Commissioners shall not convey any property sold for taxes if they shall discover, before the conveyance, that the sale was for any cause invalid and ineffectual to give title to the property sold; but they shall cancel the same and cause the purchase money, together with interest at the rate of 6 per cent per annum, and the surplus, if any, to be refunded to the purchaser, his representatives or assigns: *Provided*, That if any conveyance made by the said Commissioners, of property sold for taxes, etc.

The amendment was agreed to.

The next amendment was, on page 10, after line 5, to insert:

SEC. 8. That in the District of Columbia all property, except that owned by the United States or the District of Columbia, shall be subject to assessments for water-mains and local improvements; and only such property used for educational purposes as is not used for private gain shall be exempt from general taxation.

Mr. GALLINGER. Let section 8 be disagreed to. That has been taken care of in an appropriation bill.

The amendment was rejected.

The next amendment was, on page 10, after line 11, to insert:

SEC. 9. That hereafter the assessor of the District of Columbia shall have the records of his office open to inspection of the public, free of charge, at such time or times as the public interest will permit.

The amendment was agreed to.

The next amendment was on page 10, after line 15, to insert:

SEC. 10. That hereafter the rate of taxation on all real estate in the District of Columbia, including improvements thereon, shall be uniform, not exceeding $1.50 on each $100 of assessed valuation; and that whenever a subdivision of any portion of said real estate is made and recorded with the surveyor of the said District, the board of assistant assessors of said District are hereby authorized and directed to reassess said property so subdivided, and the tax on said reassessment shall be due and payable at the semiannual payment of taxes next following said reassessment.

SEC. 11 That in all cases where assessments of benefits for street extensions in the District of Columbia have been, or may hereafter be, levied, payment of the same shall be made in five equal annual installments, with interest at the rate of 4 per cent per annum until paid: *Provided*, That in all cases of payment the accounting officers of the District shall take into account the assessments for benefits and the awards for damages.

Mr. GALLINGER. The amendment included in sections 10 and 11 has likewise been taken care of in the appropriation bill. I ask that it be rejected.

The amendment was rejected.

Mr. COCKRELL. I was going to call attention to section 11. That has been covered in the appropriation bill.

Mr. GALLINGER. Section 10 likewise.

Mr. COCKRELL. Yes.

The next amendment was, on page 11, line 13, after the word "repealed," to insert the following proviso:

Provided, That nothing herein contained shall be construed as reducing the present rate of interest to be paid in redemption of any tax certificate issued to any purchaser other than the District of Columbia upon any sale held prior to the 1st day of July hereafter.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

DISTRICT STREET RAILROADS.

Mr. GALLINGER. I ask the Senate to proceed to the consideration of House bill 12805.

The bill (H. R. 12805) requiring the Anacostia and Potomac River Railroad Company to extend its Eleventh street line, and for other purposes, was considered as in Committee of the Whole.

Mr. GALLINGER. I move an amendment by striking out all after the word "avenue," in line 11, page 1, down to and including the word "authorized," in line 3, page 2, and inserting:

Provided, That until streets of suitable width to accommodate a double-track railway shall be opened substantially on a line northerly from the termini of the extension of the railway herein provided for and of the Metropolitan Railway on old Sixteenth street, cars may be switched on Lydecker avenue and on old Sixteenth street, respectively.

The amendment was agreed to.

Mr. GALLINGER. I move likewise to insert a new section as section 5.

The SECRETARY. Add as a new section:

SEC. 5. That the time within which the Washington and Gettysburg Railway Company shall construct its line within the District of Columbia is extended two years from March 1, 1903.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

FIRST REGIMENT OHIO VOLUNTEER LIGHT ARTILLERY.

Mr. FORAKER. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 619) providing for the recognition of the military service of the officers and enlisted men of the First Regiment Ohio Volunteer Light Artillery, to report it without amendment, and ask that the bill may be read—it is a very short one—and that it may be now considered.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. ALDRICH. That is a pretty important bill, and I suggest it ought not to be considered by unanimous consent.

Mr. FORAKER. The Senator from Rhode Island may have that impression, but I am sure if he would look at the bill a moment he would see that it ought to pass. There is nothing provided for in the bill except only that that command, a battery of light artillery which served three months under the first three-months' call during the civil war and was in a number of engagements in West Virginia, may be mustered. It was not mustered for the reason that it was a National Guard organization. It was ordered to report for duty in West Virginia under the officers of the Army of the United States. There was an urgent necessity for it. The mustering officer visited it when it was crossing the river at Marietta and Parkersburg, but the command was so hurried that it was impossible to stop to be mustered. They served clear through the three months' service without being mustered, and came home and were mustered out simply as a State organization.

They are to get no pay, no bounty, no allowances, no emoluments of any kind. It is simply a matter of satisfaction that they may be granted certificates of discharge as if they had been formally mustered into the service of the United States, as they were entitled to be at the time they rendered the service; but they did not have a chance to be so mustered when they should have been.

Mr. ALDRICH. How does it happen, if the Senator from Ohio will permit me to ask him a question, that this action has not been taken before?

Mr. FORAKER. It has been taken repeatedly in the House, and bills have been passed through that body, but always, for some reason or other, in the Senate such bills have failed to pass. This is the Cleveland Battery, and General Barnett, who was one of the most distinguished soldiers in the Union Army, was the colonel of it. My colleague is familiar with the matter, and will sustain all I say regarding it.

Mr. ALDRICH. Will the bill permit the granting of a pension for less than ninety days' service?

Mr. FORAKER. I understand not.

Mr. GALLINGER. I was about to inquire if the bill did make these soldiers pensionable. There are thousands and thousands of men who served in the militia organizations under the control of the several States who are not pensionable under existing laws, and the Committee on Pensions have been careful not even to report special bills in their behalf, as we do not want to open that door.

Mr. FORAKER. This battery did not serve under officers of the State. It reported for duty to officers of the Union Army in West Virginia and was under the command of General McClellan. The battery was ordered to duty with the Fourteenth Regiment of Ohio Volunteer Infantry, commanded by General Stedman.

Mr. McCOMAS. How long did they serve?

Mr. FORAKER. They served three months, and then they were veteranized and mustered out as a State organization after their three months' service. They never were mustered in as part of the United States forces, but that was no fault of theirs. They were repeatedly in engagements during their three months' service in West Virginia.

I hope there will not be any objection to the bill. This measure has passed the House unanimously, and there is an extended report setting forth the merits of the case. As I understand it, the members of the regiment by the bill are cut off from the possibility of getting a pension by the proviso, which I will ask the Secretary to again read. The Senator from New Hampshire [Mr. GALLINGER] can tell better than I as to that.

The Secretary read as follows:

Provided, That no pay, bounty, or other emoluments shall become due or payable by virtue of the passage of this act.

Mr. McCOMAS. Is it the purpose that they shall have no pay or pension?

Mr. FORAKER. The bill provides that they shall receive no pay, bounty, or other emoluments.

Mr. McCOMAS. I suggest that the word "pension" should be inserted after the word "pay."

Mr. FORAKER. I will leave it to the Senator from New Hampshire [Mr. GALLINGER] to decide whether it is necessary to put anything more in the bill.

Mr. GALLINGER. My only apprehension is—of course, I do not want to obstruct the bill in any way—that it will open the door to all the State troops coming here and asking for pensions. I am very sure it will. I will suggest to the Senator, if this is a mere matter of justice to these men, a matter of patriotism, that the word "pension" be inserted after the word "bounty."

Mr. FORAKER. Very well; I have no objection to that being inserted.

The PRESIDENT pro tempore. The amendment proposed by the Senator from New Hampshire will be stated.

The SECRETARY. On page 2, line 6, after the word "bounty," it is proposed to insert the word "pension;" so as to read:

Provided, That no pay, bounty, pension, or other emoluments shall become due or payable by the virtue of the passage of this act.

Mr. FORAKER. I want to say, in answer to the suggestion of the Senator from New Hampshire, that I think this case is differentiated from all the others to which he referred, by the fact that this command did not serve under State officers at all, but it served with the regular Union Army in West Virginia under the command of General McClellan and General Rosecrans for three months and rendered very efficient and distinguished service.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from New Hampshire [Mr. GALLINGER].

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

DEPUTY COLLECTORS OF CUSTOMS AT TACOMA AND SEATTLE.

Mr. SPOONER. I am instructed by the Committee on Finance, to whom was referred the bill (S. 268) authorizing the Secretary of the Treasury to fix the salaries of the deputy collectors of customs at the subports of Tacoma and Seattle, in the State of Washington, and repealing all laws inconsistent therewith, to report it favorably with an amendment. I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment reported by the Committee on Finance was, at the end of section 1, to insert "such salaries, however, not to exceed the sum of $2,500 each per annum;" so as to make the section read:

That the annual salaries to be paid to the deputy collectors of customs of each of the United States subports, Tacoma and Seattle, in the State of Washington, shall be determined and fixed by the Secretary of the Treasury, who may raise or lower the same at his discretion as the business of the said ports shall warrant, such salaries, however, not to exceed the sum of $2,500 each per annum.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CORPORATIONS IN ALASKA.

Mr. WARREN. I ask unanimous consent for the present consideration of the bill (S. 6139) to provide for the organization of private corporations in the district of Alaska.

Mr. BEVERIDGE. I was about to ask for the consideration of the bill just named by the Senator from Wyoming [Mr. WARREN]. I am glad the Senator has asked to have it taken up.

Mr. WARREN. I will state that the bill is one which had the unanimous approval of the Committee on Territories, where it has been under consideration. I think there will be no objection to it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THOMAS WILKINSON.

Mr. BERRY. I ask unanimous consent for the present consideration of the bill (H. R. 5453) granting an increase of pension

to Thomas Wilkinson. It will take not two minutes to pass it, and the beneficiary is a man who is 84 years old.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Thomas Wilkinson, late of Company G, First Regiment Massachusetts Volunteer Infantry, and to pay him a pension of $12 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BALEY W. SMALL.

Mr. FAIRBANKS. I ask unanimous consent for the consideration at this time of the bill (H. R. 12026) granting an increase of pension to Baley W. Small.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Baley W. Small, late first lieutenant Company K, Seventy-seventh Regiment Indiana Volunteer Infantry, and to pay him a pension of $24 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISTRICT COURT IN LEWISBURG, W. VA.

Mr. SCOTT. I ask unanimous consent for the present consideration of the bill (S. 5732) establishing a regular term of United States district court in Lewisburg, W. Va. It is a very short bill to which there will be no objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment, to add to the bill the following proviso:

Provided, That accommodations for said term of court shall be furnished without cost to the United States.

So as to make the bill read:

Be it enacted, etc., That the regular term of the district court of the United States for the southern district of West Virginia shall be held in each year in the city of Lewisburg, W. Va., on the second Tuesday in February: *Provided*, That accommodations for said term of court shall be furnished without cost to the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN W. THOMAS.

Mr. PETTUS. I ask unanimous consent for the present consideration of the bill (H. R. 8644) granting a pension to John W. Thomas.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of John W. Thomas, late of Company D, Seventh Regiment United States Infantry, and to pay him a pension of $16 per month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

UMATILLA INDIAN RESERVATION.

Mr. MITCHELL. I ask unanimous consent for the present consideration of the bill (H. R. 9501) to provide for the sale of the unsold portion of the Umatilla Indian Reservation.

The PRESIDENT pro tempore. The bill will be read in full for the information of the Senate, subject to objection.

The Secretary read the bill, as follows:

Be it enacted, etc., That all the lands of the Umatilla Indian Reservation not included within the new boundaries of the reservation and not allotted or required for allotment to the Indians, and which were not sold at the public sale of said lands heretofore held at the price for which they had been appraised, and upon the conditions provided in an act entitled "An act providing for allotment of lands in severalty to the Indians residing upon the Umatilla Reservation, in the State of Oregon, and granting patents therefor, and for other purposes," shall be sold at private sale by the register of the land office in the district within which they are situated, at not less than the appraised value thereof, and in conformity with the provisions of said act: *Provided*, That any bona fide settler upon any of said lands who is the owner of substantial improvements thereon, and who has so settled and improved any subdivision of said lands, with the intent of permanently residing on the same as a homestead, shall have a preference right to buy the lands so settled upon by him at any time within ninety days after the passage of this act, upon making satisfactory proof in the local land office as to settlement, intent, and improvements.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. ALDRICH. That bill is a little too important to pass with unanimous consent.

Mr. MITCHELL. I hope the Senator will not object to this bill. It is a House bill which simply provides for the sale of a few lots which remain unsold in the Umatilla Indian Reservation.

Mr. ALDRICH. How much land is involved?

Mr. MITCHELL. Not very much; I can not say precisely how much; but the bill was carefully considered in the House and also by the committee in the Senate who reported it favorably.

Mr. ALDRICH. I suppose in Oregon 100,000 acres would not be considered much?

Mr. MITCHELL. This land is to be sold in lots of 40 acres.

Mr. ALDRICH. Do the homstead laws apply to this land?

Mr. MITCHELL. Where there are bona fide settlers on any of the lands who have made substantial improvements thereon, and only to that extent——

Mr. ALDRICH. Does this bill take those lands out from under the operations of the homestead act?

Mr. MITCHELL. What does the Senator mean?

Mr. ALDRICH. I mean, after this bill passes, can an actual settler go in and take a home on those lands under the homestead act?

Mr. MITCHELL. No, sir; it simply provides that those who are on the lands and who have made substantial improvements shall have the preference.

Mr. ALDRICH. But that land is open to homestead settlement, is it not?

Mr. MITCHELL. No, sir; it is not.

Mr. ALDRICH. Why not?

Mr. MITCHELL. Because it is included in this Indian reservation, and is subject to the provisions of the act cited in the bill.

Mr. ALDRICH. And that reservation has by law ceased to be an Indian reservation?

Mr. MITCHELL. These are lands belonging to the Indians.

Mr. ALDRICH. Formerly belonging to the Indians?

Mr. MITCHELL. They belong to the Indians yet. This bill provides for the sale of lands and the Indians will get the benefit.

Mr. ALDRICH. I still think the bill ought not to pass by unanimous consent, but I withdraw my objection to its consideration.

Mr. MITCHELL. The bill is all right. I am obliged to the Senator for withdrawing his objection.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JASON E. FREEMAN.

Mr. PATTERSON. I ask unanimous consent for the present consideration of the bill (H. R. 7013) granting an increase of pension to Jason E. Freeman.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment, in line 8, before the word "dollars," to strike out "forty" and insert "thirty;" so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of Jason E. Freeman, late of Company C, Sixth Regiment Vermont Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

MONUMENTAL COLUMN AT PRINCETON, N. J.

Mr. WETMORE. I am instructed by the Committee on the Library, to whom was referred the bill (S. 3850) in regard to a monumental column to commemorate the battle of Princeton, and appropriating $30,000 therefor, to report it favorably with amendment.

Mr. KEAN. I ask unanimous consent for the present consideration of the bill just reported by the Senator from Rhode Island.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment reported by the Committee on the Library was to strike out all after the enacting clause and insert:

That the sum of $30,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to be expended by said association, under the direction of the Secretary of War, to aid in erecting and completing on the battlefield of Princeton, in the State of New Jersey, a suitable monument: *Provided*, That no part of the sum herein appropriated shall be available until the Princeton Battle Monument Association shall have raised an additional sum of $30,000, to be expended in the erection of said monument and in the purchase and improvement of the site. *And provided further*, That the design for said monument shall be approved by the Secretary of War.

Mr. SCOTT. I should like to ask if the bill has been referred to a committee, and if it has been reported favorably by the committee?

The PRESIDENT pro tempore. It was reported to-day.

Mr. KEAN. It was reported to-day.

Mr. SCOTT. I should like to have the report read.

Several SENATORS. Withdraw the request.

Mr. KEAN. Does the Senator wish to have his memory in regard to the battle of Princeton refreshed?

Mr. SCOTT. As Senators are in such a hurry, many of them having bills which they desire to call up, I withdraw the request to have the report read, but I do think it is bad legislation to rush through here a bill appropriating $30,000 without knowing something about it.

Mr. TELLER and Mr. BATE. That is right.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

CERTAIN NEW MEXICAN BONDS.

Mr. BEVERIDGE. I ask unanimous consent for the present consideration of the bill (H. R. 14383) to validate certain acts of the legislative assembly of the Territory of New Mexico with reference to the issuance of certain bonds. It is a very brief bill.

The PRESIDENT pro tempore. The Senator from Indiana asks unanimous consent for the present consideration of a bill which will be read for information.

The Secretary read the bill, as follows:

Be it enacted, etc., That the act of the thirty-fourth legislative assembly of the Territory of New Mexico entitled "An act providing for additional buildings for the New Mexico Military Institute at Roswell," approved February 20, 1901, and the act of the same assembly and session entitled "An act providing for additional buildings for the New Mexico Insane Asylum at Las Vegas," approved March 21, 1901, and the act of the same assembly and session entitled "An act to provide for the issue of bonds for the New Mexico College of Agriculture and Mechanic Arts," approved March 21, 1901, be, and each of said acts hereby are, approved, ratified, validated, and confirmed.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. BATE. Mr. President, I think the bill is rather objectionable. I do not think it ought to be passed now.

The PRESIDENT pro tempore. The Senator from Tennessee objects.

Mr. BATE. No, sir; I desire to say something in regard to it. I have the floor, I believe.

I wish to say in connection with this bill that while I would offer no objection to appropriations to eleemosynary institutions, while I do not object to allowing them to have buildings and making appropriations for that purpose, as I look at this——

Mr. BEVERIDGE. This is in no sense an appropriation, if the Senator will permit me.

Mr. BATE. I mean it gives the authority. The Senator has interrupted me and should explain. I understand there is a law, known as the Harrison law, by which the indebtedness of a county can not exceed 4 per cent for any purpose. This bill is brought here, asking permission of the United States to exceed that.

Mr. BEVERIDGE. No.

Mr. BATE. That is the way I understand it.

Mr. BEVERIDGE. Not at all.

Mr. BATE. Then you had better explain your bill.

Mr. BEVERIDGE. I am perfectly willing to do so, but the Senator was at the committee meeting. That is not the point which this bill means to reach at all.

Mr. BATE. It gives the privilege, as I understand it——

Mr. BEVERIDGE. Of exceeding the Harrison 4 per cent limit?

Mr. BATE. Yes.

Mr. BEVERIDGE. No.

Mr. BATE. As I understand it, this permits them to issue bonds not to provide buildings for these institutions, but to enlarge them. Is not that it?

Mr. BEVERIDGE. Not at all. The case briefly stated is this: Of course, if the Senator is going to object, I do not want to go into a discussion of the bill this evening; but the Senator from Tennessee has something else in mind. There is what is known as the Harrison Act with reference to Territories, which provides that they can not exceed in indebtedness the 4 per cent limit. Most of the bills that come before the committee which affect bonds are designed to cure that, where they expect to exceed that amount of indebtedness.

This is entirely different, however. The Congress granted to the Territory of New Mexico certain land for its school and educational purposes. Certain of these lands were assigned to these three institutions, one of which is an insane asylum, one of which is a college, and one of which is a military institute. They are sadly in need of buildings. This law provided that the rentals should be used for their maintenance and operation, and one thing and another. Now, it is found, in order to build the necessary buildings, that it is necessary to borrow money on those lands and to turn over the rentals so as to create a sinking fund for the payment of the bonds. It has nothing whatever to do with the Harrison Act.

The committee heard this matter. It is one which has already been passed upon by the Territory of New Mexico. The bill has been passed by the House; and, Mr. President, in all deference to the Senator from Tennessee, it is an entirely just and proper measure. The reason I call it up now is because it is exigent.

The bill, as I say, has been passed by the House, and we are within a few days of adjournment, and this measure should become a law for the purpose of affording the necessary relief to the insane asylum there and these other two institutions to which this land is already allotted. It simply provides that they may turn their rentals into a sinking fund to pay this mortgage indebtedness. It is not intended at all to cure the limitation of the Harrison Act.

Mr. BATE. They are to issue the bonds for the purpose of raising money?

Mr. BEVERIDGE. Yes.

Mr. BATE. It gives them authority to do that?

Mr. BEVERIDGE. Yes.

Mr. BATE. I do not object so much to aiding the insane asylum, but I do not approve of allowing the military institute there to be built up in this manner. The reason for my objection is this: The House has passed a bill giving statehood to the Territory. The measure has come to the Senate. It has been recently throttled here, you know, up to the present at least, but it is understood, with time set by agreement, that at the next session of Congress the Territory will be made a State.

I think it is better that there should be a legislature there independent of the Congress, representing those people, and that we should let that legislature enact such laws as are necessary in regard to these institutions and to furnish the money, if necessary, in the manner they think best for the purpose of enlarging these institutions. I beg pardon of the Senator from Indiana. This is not for the purpose of carrying on those institutions, as I understand.

Mr. BEVERIDGE. No; it is for buildings.

Mr. BATE. But it is for the purpose of enlarging the buildings of the institutions. They are good institutions now and are being carried on well and successfully. This is to enable them to enlarge the buildings. I do not think the necessity is so great that it can not be postponed until New Mexico becomes a State. That is the whole issue here.

Mr. BEVERIDGE. Does the Senator from Tennessee object?

Mr. BATE. I do not object to the consideration of the bill, but to the passage of the bill at this time.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. MORGAN. Mr. President, I have to object. I know a little about this matter, and I am satisfied there is at least one solid day's debate in it. I object.

The PRESIDENT pro tempore. Objection being made, the bill goes over.

RANSOM SIMMONS.

Mr. BURROWS. I ask unanimous consent for the present consideration of the bill (H. R. 12549) granting an increase of pension to Ransom Simmons.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment in line 8, before the word "dollars," to strike out "thirty-six" and insert "thirty;" so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of Ransom Simmons, late of Company K, First Regiment Michigan Volunteer Light Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

AGREEMENT WITH KANSAS OR KAW INDIANS OF OKLAHOMA.

Mr. QUARLES. I ask unanimous consent that to-morrow morning after the routine morning business the bill (H. R. 12597) to accept, ratify, and confirm a proposed agreement submitted by the Kansas or Kaw Indians of Oklahoma, and for other purposes, may be taken up as the unfinished business.

Mr. ALDRICH. The rule to apply for to-morrow only.

The PRESIDENT pro tempore. The Senator from Wisconsin asks unanimous consent that on the completion of the routine business to-morrow morning the bill indicated by him may be

taken up for consideration, not to interfere with appropriation bills or conference reports, and only for the day. Is there objection? The Chair hears none, and the order is made.

THE SOCIETY OF THE ARMY OF SANTIAGO DE CUBA.

Mr. HANNA. I ask unanimous consent for the present consideration of the bill (H. R. 11656) to incorporate The Society of the Army of Santiago de Cuba.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CERTAIN PUBLIC LANDS IN NEW MEXICO.

Mr. GAMBLE. I ask unanimous consent for the present consideration of the bill (H. R. 11062) to amend an act entitled "An act to make certain grants of lands to the Territory of New Mexico, and for other purposes." I may state that the senior Senator from Wisconsin [Mr. SPOONER] on Tuesday asked that the bill go over. I do no understand that he has any further objection to it. The bill has been read.

Mr. ALDRICH. Let it be read again.

Mr. SPOONER. I asked that it might go over until I could examine it.

Mr. ALDRICH. It had better go over again.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill indicated by the Senator from South Dakota? It has been read in full, and in Committee of the Whole the amendments of the committee were agreed to.

Mr. ALDRICH. Let it be read again.

The PRESIDENT pro tempore. It will be read again.

The Secretary again read the bill.

Mr. PLATT of Connecticut. How much land is to be sold in any one tract?

The SECRETARY. Not to exceed 25,000 acres.

Mr. ALDRICH. In any one tract?

Mr. COCKRELL. Let the bill go over.

The PRESIDENT pro tempore. Objection is made, and the bill goes over.

DESERT-LAND ENTRIES IN YAKIMA COUNTY, WASH.

Mr. FOSTER of Washington. I ask unanimous consent to call up the bill (S. 6091) extending the time for making final proof in desert-land entries in Yakima County, State of Washington.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It provides that the time for making final proof on unperfected, uncontested, and uncanceled desert-land entries in Yakima County, Wash., shall be extended for one year from the date of its passage, but no other or additional expenditure shall be made than is now required by law.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DISTRIBUTION OF SUPREME COURT REPORTS.

Mr. MCCOMAS. I ask unanimous consent for the present consideration of the bill (H. R. 5809) for the further distribution of the reports of the Supreme Court.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments.

The first amendment was, on page 1, line 8, after the word "Currency," to strike out "the Commissioner of Internal Revenue;" so as to read:

That the Secretary of the Interior be, and he is hereby, authorized and directed to distribute to each of the following-named officers of the United States, additional to those named in section 683 of the Revised Statutes, namely: Each Assistant Attorney-General; the Solicitor of the Department of State; the Comptroller of the Currency; the Judge-Advocate-General, Navy Department, etc.

The amendment was agreed to.

The next amendment was, on page 2, line 13, after the word "judge," to insert "and to each judge of the court of appeals of the District of Columbia," and in line 17, after the word "office," to insert "and to the Secretary of the Senate, for the use of the committees of the Senate, 10 complete sets of said reports;" so as to read:

To each United States circuit and district judge and to each judge of the court of appeals of the District of Columbia who has not already been supplied, one set; and he shall also distribute to each additional United States judge hereafter appointed one complete set of said reports, which shall in all cases be transmitted to their successors in office, and to the Secretary of the Senate, for the use of the committees of the Senate, 10 complete sets of said reports, and to the Clerk of the House of Representatives, to be distributed to and for the use of the committees of said House, 10 complete sets of said reports.

The amendment was agreed to.

The next amendment was, on page 3, line 1, after the word "Territory" to insert "islands of Hawaii and Porto Rico;" in line 4, after the word "eighty-nine," to insert "and to the Naval Academy at Annapolis and to the Military Academy at West Point," and in line 11, after the word "distribute," to insert "to the Secretary of war twelve complete sets for the use of the proper courts and offices of the Philippine Islands, and of the headquarters of military departments in the United States, in his discretion, and;" so as to read:

SEC. 2. That the Secretary of the Interior shall likewise distribute to each of the places where circuit and district courts of the United States are now holden, including the Indian Territory, islands of Hawaii and Porto Rico, to which they have not already been supplied under the provisions of the act of Congress approved February 12, 1889, and to the Naval Academy at Annapolis and to the Military Academy at West Point, one complete set of the Reports of the Supreme Court, including those already published and those hereafter to be published, or a reprint of the same, or such volumes as with those already furnished will make one complete set, the judges holding such courts to select the edition of such reports to be supplied for such courts; and he shall also distribute to the Secretary of War 12 complete sets for the use of the proper courts and offices of the Philippine Islands and of the headquarters of military departments in the United States, in his discretion, and to each and every place where a new circuit and district court may be hereafter established one complete set of said reports.

The amendment was agreed to.

The next amendment was, on page 4, line 2, after the word "law," to strike out "74" and insert "104;" so as to read:

SEC. 3. That, beginning with volume 183, the publishers of the Decisions of the Supreme Court shall deliver to the Secretary of the Interior, in addition to the number heretofore supplied by law, 104 copies of each and every volume of such decisions.

The amendment was agreed to.

The next amendment was, on page 4, after line 18, to insert as a new section the following:

SEC. 5. That the Secretary of the Interior shall, at the beginning of the first session of each Congress, distribute to each Senator and Representative in such Congress who may in writing apply for the same one copy of the Revised Statutes of the United States and the supplements thereto: *Provided*, That such applicant shall certify in his written application for the same that the volumes for which he applies are intended for his personal use exclusively: *And provided further*, That no Senator or Representative during his term of service shall receive more than one copy of such Revised Statutes and supplements thereto.

The amendment was agreed to.

The next amendment was, on page 5, line 6, after the word "digest," to insert "and for the Revised Statutes and supplements thereto;" so as to read:

SEC. 6. That such sum of money as is required to pay for the reports of the Supreme Court and for the digest, and for the Revised Statutes and supplements thereto, the delivery and distribution of which are provided for in this act, is hereby appropriated, out of any money in the Treasury not otherwise appropriated.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill for the further distribution of the reports of the Supreme Court, and for other purposes."

EAST WASHINGTON HEIGHTS TRACTION RAILROAD COMPANY.

Mr. GALLINGER. I am directed by the Committee on the District of Columbia, to whom was referred the bill (H. R. 12086) to extend the time for the construction of the East Washington Heights Traction Railroad Company, to report it with an amendment, and as it will take but a moment to pass the bill I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. The amendment of the Committee on the District of Columbia was, after the word "two," in line 7, to insert the following proviso:

Provided, That the said railroad company is authorized and empowered to extend its lines by a single track across the Pennsylvania avenue bridge to connect with the eastern terminus of the Capital Traction Company under such conditions as the Commissioners of the District of Columbia may prescribe, the plans and specifications to be approved by, and the construction to be under the supervision of, the Commissioners of the District of Columbia; and the said railway company shall bear one-half of the cost of maintenance and repair of said bridge in like manner and under the same conditions as are now provided by law as to bridges across Rock Creek occupied by the tracks of street railways.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

DISTRICT COURT IN ADDISON, W. VA.

Mr. SCOTT. As a personal favor I ask consent to call up the bill (S. 5914) establishing a regular term of United States district court in Addison, W. Va. It is a bill for a court, just as the other one was, and it will embarrass me if I do not get both of these court bills through.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported

from the Committee on the Judiciary with an amendment, in line 6, after the word "September," to insert:

Provided, That accommodations for said term of court shall be furnished without cost to the United States.

So as to made the bill read:

Be it enacted, etc., That the regular term of the district court of the United States for the southern district of West Virginia shall be held in each year in the city of Addison, W. Va., on the first Monday in September: *Provided*, That accommodations for said term of court shall be furnished without cost to the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

GEORGE E. BUMP.

Mr. PLATT of Connecticut. I ask unanimous consent to call up the bill (H. R. 10824) granting an increase of pension to George E. Bump.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to place on the pension roll the name of George E. Bump, late of Company A, First Regiment Connecticut Volunteer Heavy Artillery, and to pay him a pension of $24 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. KEAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After seventeen minutes spent in executive session, the doors were reopened, and (at 6 o'clock and 12 minutes p. m.) the Senate adjourned until to-morrow, Saturday, June 28, 1902, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 27, 1902.

REGISTERS OF LAND OFFICES.

George E. French, of Nebraska, to be register of the land office at North Platte, Nebr., to take effect August 8, 1902, at expiration of his present term. (Reappointment.)

Henry V. Hinman, of Roslyn, Wash., to be register of the land office at North Yakima, Wash., vice Walter J. Reed, term expired.

RECEIVERS OF PUBLIC MONEYS.

Frank Bacon, of Nebraska, to be receiver of public moneys at North Platte, Nebr., to take effect August 8, 1902, at expiration of his present term. (Reappointment.)

Eugene B. Hyde, of Spokane, Wash., to be receiver of public moneys at Spokane, Wash., vice Samuel A. Wells, term expired.

COLLECTORS OF CUSTOMS.

Isaac L. Patterson, of Oregon, to be collector of customs for the district of Willamette, in the State of Oregon. (Reappointment.)

Robert Smalls, of South Carolina, to be collector of customs for the district of Beaufort, in the State of South Carolina. (Reappointment.)

William Mahone, of Virginia, to be collector of customs for the district of Petersburg, in the State of Virginia. Reappointment.

MARSHALS.

Walter F. Matthews, of Oregon, to be United States marshal for the district of Oregon, vice Zoeth Houser, who term expired January 9, 1902.

Frank S. Elgin, of Tennessee, to be United States marshal for the western district of Tennessee, vice Thomas H. Baker, whose term expired March 8, 1902.

APPOINTMENTS IN THE ARMY.

Cavalry arm.

Corpl. John A. Barry, Troop D, Third Cavalry, to be second lieutenant, June 13, 1902.

NOTE.—Corporal Barry was nominated to the Senate June 25, 1902, for appointment as second lieutenant in the Cavalry Arm, to rank from June 24, 1902. This nomination is submitted for correction of his date of rank to June 13, 1902, instead of June 24, 1902.

APPOINTMENTS, BY TRANSFER, IN THE ARMY.

Capt. Joseph C. Byron, quartermaster, to be captain of infantry, with rank from March 2, 1899, vice Baker.

Capt. Chauncey B. Baker, Infantry Arm (detailed as quartermaster), to be quartermaster with the rank of captain, March 2, 1899, vice Byron.

APPOINTMENT AS MEDICAL OFFICER OF VOLUNTEERS.

John P. Kelly, of Florida, contract surgeon, United States Army, to be assistant surgeon, United States Volunteers, with the rank of captain, June 26, 1902, vice Reifsnyder, appointed surgeon of volunteers.

WITHDRAWAL.

Executive nomination withdrawn June 27, 1902.

Eli E. Starkey, to be postmaster at Seabreeze, in the State of Florida.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 27, 1902.

CONSUL.

John B. Richardson, of Kansas, to be consul of the United States at Port Limon, Costa Rica.

APPOINTMENT IN REVENUE-CUTTER SERVICE.

Edward S. Addison, of Maryland, to be a third lieutenant in the Revenue-Cutter Service of the United States.

MARSHALS.

George M. Christian, of Iowa, to be United States marshal for the southern district of Iowa.

Edward Knott, of Iowa, to be United States marshal for the northern district of Iowa.

Fred A. Field, of Vermont, to be United States marshal for the district of Vermont.

William H. Darrough, of the Indian Territory, to be United States marshal for the northern district of the Indian Territory, commencing July 1, 1902.

UNITED STATES ATTORNEYS.

William M. Mellette, of the Indian Territory, to be United States attorney for the western district of the Indian Territory, commencing July 1, 1902.

Lewis Miles, of Iowa, to be United States attorney for the southern district of Iowa.

RECEIVER OF PUBLIC MONEYS.

J. M. W. Moore, of Prescott, Ariz., to be receiver of public moneys at Prescott, Ariz.

REGISTER OF THE LAND OFFICE.

Fen S. Hildreth, of Prescott, Ariz., to be register of the land office at Prescott, Ariz.

APPOINTMENTS IN THE NAVY.

To be civil engineers in the Navy, with the rank of lieutenant (junior grade), to fill vacancies existing in that corps, namely:

Charles A. Wentworth, a citizen of Massachusetts.

George A. McKay, a citizen of New York.

PROMOTIONS IN THE NAVY.

Lieut. Thomas W. Ryan, to be a lieutenant-commander in the Navy from the 9th day of October, 1901.

Lieut. Commander John E. Roller, to be a commander in the Navy from the 28th day of December, 1901.

Lieut. Frederick C. Bowers, to be a lieutenant-commander in the Navy from the 5th day of April, 1902.

Lieut. (Junior Grade) William S. Whitted, to be a lieutenant in the Navy from the 5th day of April, 1902.

Commander Richardson Clover, to be a captain in the Navy from the 11th day of April, 1902.

Lieut. Commander John C. Fremont, to be a commander in the Navy from the 11th day of April, 1902.

Lieut. Commander Albert Mertz, to be a commander in the Navy from the 11th day of April, 1902.

Lieut. George R. Salisbury, to be a lieutenant-commander in the Navy from the 11th day of April, 1902.

Lieut. John L. Purcell, to be a lieutenant-commander in the Navy from the 11th day of April, 1902.

Lieut. (Junior Grade) Robert H. Osborn, to be a lieutenant in the Navy from the 11th day of April, 1902.

Lieut. Commander Rogers H. Galt, to be a commander in the Navy from the 29th day of April, 1902.

Lieut. Frank W. Kellogg, to be a lieutenant-commander in the Navy from the 29th day of April, 1902.

Lieut. (Junior Grade) Clarence England, to be a lieutenant in the Navy from the 29th day of April, 1902.

Commander John V. B. Bleecker, to be a captain in the Navy from the 3d day of June, 1902.

Lieut. Commander Vincendon L. Cottman to be a commander in the Navy from the 3d day of June, 1902.

Lieut. Reuben O. Bitler, to be a lieutenant-commander in the Navy from the 3d day of June, 1902.

Lieut. (Junior Grade) Edwin H. De Lany, to be a lieutenant in the Navy from the 3d day of June, 1902.

Capt. Yates Stirling, to be a rear-admiral in the Navy from the 8th day of June, 1902.

Commander Andrew Dunlap, to be a captain in the Navy from the 8th day of June, 1902.

Lieut. Commander Frank E. Sawyer, to be a commander in the Navy from the 8th day of June, 1902.

Lieut. Samuel H. Leonard, to be a lieutenant-commander in the Navy from the 8th day of June, 1902.

Lieut. (Junior Grade) Frank H. Brumby, to be a lieutenant in the Navy from the 8th day of June, 1902.

Commander John A. B. Smith, to be a captain in the Navy from the 8th day of June, 1902.

Lieut. Commander Thomas B. Howard, to be a commander in the Navy from the 8th day of June, 1902.

Lieut. Harry Phelps, to be a lieutenant-commander in the Navy from the 8th day of June, 1902.

Lieut. (Junior Grade) Charles K. Mallory, to be a lieutenant in the Navy from the 8th day of June, 1902.

Capt. William C. Wise, to be a rear-admiral in the Navy from the 14th day of June, 1902.

Walter S. Yates, to be postmaster at Forney, in the county of Kaufman and State of Texas.

HOUSE OF REPRESENTATIVES.

FRIDAY, *June 27, 1902.*

The House met at 12 o'clock noon.

Prayer by the Chaplain, Rev. HENRY N. COUDEN, D. D.

The Journal of yesterday's proceedings was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed with amendments a bill of the House (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 15108, the general deficiency bill, and ask that the House disagree to all of the Senate amendments and ask for a conference thereon.

The SPEAKER. The gentleman from Illinois asks unanimous consent to take from the Speaker's table the bill H. R. 15108, the general deficiency bill, and that the House disagree to the amendments of the Senate and ask for a conference thereon. Is there objection?

Mr. ALEXANDER. Mr. Speaker, reserving the right to object, I would ask the gentleman from Illinois [Mr. CANNON] if it goes to a conference at once if he will allow a separate vote to be taken upon the Buffalo Exposition amendment when it comes back from conference?

Mr. CANNON. Mr. Speaker, I would say to the gentleman from New York that I have not the power to deny a separate vote if I would. Now, then, if the Senate is in earnest in placing on this amendment for the Pan-American Exposition, I have no doubt that the disagreement will be submitted to the House. I want to be fair with the gentleman, and I would state that so far as I am concerned as an individual member of the House I am against the proposition; but when the disagreement is reported the gentleman can make his motion, and if the Senate is in earnest about it there will be a disagreement if I am one of the conferees and my brethren agree with me.

Mr. ALEXANDER. Then, with the understanding that if it comes back from conference there will be an opportunity to take a separate vote on this amendment——

Mr. CANNON. Why, I could not cut the gentleman off from a separate vote if I would.

Mr. ALEXANDER. Would the gentleman from Illinois be willing to consider it now, to have a vote taken to agree to the Buffalo amendment?

Mr. CANNON. The gentleman has that power. I suppose he could call up any one of these amendments. My judgment is, I would say to him, that there is more expedition in the course that I have asked unanimous consent for.

Mr. ALEXANDER. Very well.

Mr. CANNON. But that is only my judgment, and the gentleman could pursue his own course.

Mr. ALEXANDER. Very well.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none.

The Chair announced the following conferees on the part of the House: Messrs. CANNON, BARNEY, and LIVINGSTON.

ELIZABETH A. TURNER.

Mr. BROMWELL. Mr. Speaker, I call up a conference report on the bill (S. 5856) granting an increase of pension to Elizabeth A. Turner, and ask unanimous consent that the reading of the report may be dispensed with and the statement be read in its place.

The SPEAKER. The gentleman from Ohio calls up a conference report, and asks unanimous consent to dispense with the reading of the report and that the statement be read.

Mr. GAINES of Tennessee. What is the report about?

Mr. BROMWELL. A conference report on a pension bill.

The SPEAKER. Without objection, this course will be pursued.

There was no objection.

The Clerk read the statement, to be found on page 7442.

Mr. BROMWELL. Mr. Speaker, I move the adoption of the report.

The SPEAKER. The question is on the motion of the gentleman from Ohio.

The question was taken, and the report adopted.

ADELAIDE G. HATCH.

Mr. BROMWELL. Mr. Speaker, I call up a conference report on the bill (S. 3320) granting an increase of pension to Adelaide G. Hatch, and ask unanimous consent that the reading of the report be dispensed with and that the statement be read.

The SPEAKER. The gentleman from Ohio calls up the conference report and asks unanimous consent that the reading of the report be dispensed with and the statement be read. Without objection this course will be pursued.

There was no objection.

The Clerk read the statement, to be found on page 7442.

Mr. BROMWELL. Mr. Speaker, I move the adoption of the report.

The SPEAKER. The question is on agreeing to the conference report.

The report was agreed to.

CLARA W. M'NAIR.

Mr. BROMWELL. Mr. Speaker, I call up a conference report on the bill (S. 1225) granting an increase of pension to Clara W. McNair, and ask unanimous consent that the reading of the report be dispensed with and that the statement be read.

The SPEAKER. The gentleman from Ohio calls up a conference report and asks unanimous consent that the reading of the report be dispensed with and that the statement be read. Without objection, this course will be pursued.

There was no objection.

The Clerk read the statement, to be found on page 7442.

Mr. BROMWELL. Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. The question is on the motion of the gentleman from Ohio to agree to the conference report.

The question was taken, and the report agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 2295) temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. LODGE, Mr. ALLISON, and Mr. CULBERSON as conferees on the part of the Senate.

CLAYTON P. VAN HOUTEN.

Mr. BROMWELL. Mr. Speaker, I call up the conference report on the bill (S. 5506) granting an increase of pension to Clayton P. Van Houten.

The conference report and statement were read.

(For conference report and statement see page 7442.)

The conference report was agreed to.

On motion of Mr. BROMWELL, a motion to reconsider the votes by which the several conference reports were adopted was laid on the table.

BRIDGE ACROSS MONONGAHELA RIVER, PENNSYLVANIA.

The SPEAKER. The Chair lays before the House the bill (S. 4611) to authorize the West Elizabeth aud Dravosburg Bridge Company to construct and maintain a bridge across the Monongahela River, in the State of Pennsylvania, being similar to a House bill favorably reported and not requiring consideration in Committee of the Whole.

The bill was read. It provides that the West Elizabeth and Dravosburg Bridge Company, a corporation organized under the laws of the State of Pennsylvania, is hereby authorized to construct, maintain, and operate a bridge across the Monongahela River between a point on the eastern side of said river, at or near property of the Glassport Brick Company, in the borough of Port Vue, in the county of Allegheny, and a point on the western side of said river, in the township of Jefferson, in said county, on property of the Monongahela River Consolidated Coal and Coke Company, fronting on the public road, known as the river road, between Dravos and West Elizabeth.

The bill was ordered to a third reading, and was accordingly read the third time, and passed.

On motion of Mr. GRAHAM, a motion to reconsider the last vote was laid on the table.

By unanimous consent, the bill H. R. 12706, being the corresponding House bill, was ordered to lie on the table.

PROMOTIONS AND RETIREMENTS IN THE ARMY.

Mr. MONDELL. Mr. Speaker, I am authorized by the Committee on Military Affairs to call up a privileged resolution, No. 284.

The SPEAKER. The gentleman from Wyoming, from the Committee on Military Affairs, calls up a privileged resolution, which the Clerk will report.

The resolution was read, as follows:

Resolved, That the Secretary of War be, and he is hereby, directed to inform the House of Representatives of the number of promotions made in the Army since the 1st day of April, 1898, of officers, together with their names and rank, who have been retired within one year of their last promotion with a higher grade than that held at the time of their promotion, and the said Secretary of War is also directed to report to the House of Representatives the additional cost to the Government by reason of these promotions and retirements.

Mr. RICHARDSON of Tennessee. I should like to understand this resolution. I do not know why it is privileged.

The SPEAKER. It is a seven-day resolution of inquiry.

Mr. RICHARDSON of Tennessee. A resolution of inquiry addressed to the head of a department?

Mr. MONDELL. A resolution of inquiry addressed to the Secretary of War, and I am instructed by the Committee on Military Affairs to move that the resolution be adopted.

The resolution was agreed to.

BRIDGE ACROSS MISSOURI RIVER, PIERRE, S. DAK.

Mr. BURKE of South Dakota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 14082) to provide for the construction of a bridge by the Duluth, Pierre and Black Hills Railroad Company across the Missouri River, at Pierre, S. Dak.

The bill was read. It provides that the Duluth, Pierre and Black Hills Railroad Company, a corporation duly organized under the general incorporation laws of the State of South Dakota, its successors and assigns, is hereby authorized to construct and maintain a bridge across the Missouri River at or near the city of Pierre, Hughes County, S. Dak., and also to lay on and over said bridge a railway track or tracks for the passage of railway trains; and said corporation may construct and maintain ways for wagons, carriages, and foot passengers, charging and receiving such reasonable tolls therefor as may be approved from time to time by the Secretary of War.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time; and was accordingly read the third time, and passed.

On motion of Mr. BURKE of South Dakota, a motion to reconsider the last vote was laid on the table.

COURT OF APPEALS, ATLANTA, GA.

Mr. FLEMING. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 5383) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Atlanta, in the State of Georgia, on the first Monday in October in each year.

The bill was read.

The amendments recommended by the Committee on the Judiciary were read.

The SPEAKER. Is there objection?

There was no objection.

The amendments recommended by the committee were agreed to.

The bill as amended was ordered to a third reading, and was accordingly read the third time, and passed.

On motion of Mr. FLEMING, a motion to reconsider the last vote was laid on the table.

GEORGE H. PAUL.

Mr. OTJEN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill I send to the desk.

The Clerk read as follows:

A bill (S. 1949) to authorize the Secretary of the Navy to appoint George H. Paul a warrant machinist in the Navy.

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to appoint George H. Paul to fill an original vacancy in the 100 warrant machinists in the Navy, authorized by section 14 of the act approved March 3, 1899, entitled "An act to reorganize and increase the efficiency of the personnel of the Navy and Marine Corps of the United States," notwithstanding he was about seven months beyond the age limit at the time of examination he having passed the examination, near the top of the list, under a misapprehension as to the age limit, and having served twelve months at the Naval Academy and four years at sea in the Government service as an engineer

The SPEAKER. Is there objection?

Mr. RICHARDSON of Tennessee. Reserving the right to object, Mr. Speaker, I would like to have some explanation as to what this bill does and the necessity for it. I ask for order, that we may hear the gentleman.

Mr. OTJEN. Mr. Speaker, this young man took the examination for a warrant machinist, and after he had taken the examination it was found that he was seven months over the age limit. The Secretary of the Navy recommends that he be appointed. The bill has passed the Senate, and it has been recommended by the Committee on Naval Affairs.

The SPEAKER. Is there objection?

Mr. RICHARDSON of Tennessee. There are no peculiar reasons for the action?

Mr. OTJEN. He passed a very high examination and stands very nearly at the top of the list. He has served one year in the Naval Academy. He has had four years of sea experience, and the Secretary of the Navy is holding one of these places open for him, and on account of his high examination and experience recommends his appointment.

Mr. RICHARDSON of Tennessee. I do not like this matter of special legislation, Mr. Speaker, and without further understanding the matter I shall object to its consideration.

The SPEAKER. Objection is made.

Subsequently,

The SPEAKER. The Chair is advised that the gentleman from Tennessee has withdrawn objection to the bill called up by the gentleman from Wisconsin [Mr. OTJEN].

Mr. RICHARDSON of Tennessee. Mr. Speaker, I made the objection. After an examination of the bill, so far as I am concerned, I have no further objection to its consideration.

The SPEAKER. Is there further objection?

Mr. MOON. Mr. Speaker, I object.

The SPEAKER. Does the gentleman object?

Mr. MOON. I do.

The SPEAKER. Objection is again made.

MARINE-HOSPITAL SERVICE.

Mr. ADAMSON. Mr. Speaker, by instruction of the Committee on Interstate and Foreign Commerce I desire to ask unanimous consent for the consideration of the bill (S. 2162).

The Clerk read as follows:

A bill (S. 2162) to increase the efficiency and change the name of the United States Marine-Hospital Service.

Be it enacted, etc., That the United States Marine-Hospital Service shall hereafter be known and designated as the Public Health and Marine-Hospital Service of the United States, and the Supervising Surgeon-General and the officers now or hereafter commissioned under the act of January 4, 1889, entitled "An act to regulate appointments in the Marine-Hospital Service of the United States," and acts amendatory thereof, shall hereafter be known as the Surgeon-General, surgeons, passed assistant surgeons, and assistant surgeons of the Public Health and Marine-Hospital Service of the United States. Nothing in this act contained shall be held or construed to discharge any of the officers above named, or any of the acting assistant surgeons, pharmacists, and other employees of the Marine-Hospital Service, or to deprive any officer of his commission or the benefits derived by longevity of service. The care of sick and disabled seamen and all other duties now required by law to be performed by the Marine-Hospital Service shall hereafter be performed by the Public Health and Marine-Hospital Service, and all funds and appropriations now provided by law for use by the Marine-Hospital Service and all properties and rights pertaining to said service shall be available for use for like purposes and in like manner, under the Treasury Department, by the Public Health and Marine-Hospital Service.

SEC. 2. That the salary of the Surgeon-General of the Public Health and Marine-Hospital Service shall be $5,000 per annum, and the salaries and allowances of the commissioned medical officers of said service shall be the same as now provided by regulations of the Marine-Hospital Service.

SEC. 3. That commissioned medical officers, when detailed by the Surgeon-General for duty in the Public Health and Marine-Hospital Bureau at Washington, D. C., in charge of the administrative divisions thereof, namely, marine hospitals and relief, domestic quarantine, foreign and insular quarantine, personnel and accounts, sanitary reports and statistics, and scientific research, shall, while thus serving, be assistant surgeons-general of the Public Health and Marine-Hospital Service, but their pay and allowances shall be the same as now provided by regulations of the Marine-Hospital Service for officers in charge of said divisions; and the senior officer thus serving shall be the assistant within the meaning of section 178, Revised Statutes of the United States: *Provided, however*, That no such officer shall be detailed in charge of said divisions who is below the rank of passed assistant surgeon.

SEC. 4. That the President is authorized, in his discretion, to utilize the Public Health and Marine-Hospital Service in times of threatened or actual war to such extent and in such manner as shall in his judgment promote the public interest without, however, in any wise impairing the efficiency of the service for the purposes for which the same was created and is maintained.

SEC. 5. That there shall be an advisory board for the hygienic laboratory provided by the act of Congress approved March 3, 1901, for consultation with the Surgeon-General of the Public Health and Marine-Hospital Service relative to the investigations to be inaugurated, and the methods of conducting the same, in said laboratory. Said board shall consist of three competent experts, to be detailed from the Army, the Navy, and the Bureau of Animal Industry by the Surgeon-General of the Army, the Surgeon-General of the Navy, and the Secretary of Agriculture, respectively, which experts, with the director of the said laboratory, shall be ex officio members of the board, and serve without additional compensation. Five other members of said board shall be appointed by the Surgeon-General of the Public Health and Marine-Hospital Service, with the approval of the Secretary of the Treasury, who shall be skilled in laboratory work in its relation to the public health, and not in the regular employment of the Government. The said five members shall each receive compensation of $10 per diem while serving in conference, as aforesaid, together with allowance for actual and necessary traveling expenses and hotel expenses while in conference. Said conference is not to exceed ten days in any one fiscal year. The term of service of the five members of said board, not in the regular employment of the Government, first appointed shall be so arranged that one of said members shall retire each year, the subsequent appointments to be for a period of five years. Appointments to fill vacancies occurring in a manner other than as above provided shall be made for the unexpired term of the member whose place has become vacant.

SEC. 6. That there shall be appointed by the Surgeon-General, with the approval of the Secretary of the Treasury, whenever, in the opinion of the Surgeon-General, commissioned medical officers of the Public Health and Marine-Hospital Service are not available for this duty by detail, competent persons to take charge of the divisions, respectively, of chemistry, zoology, and pharmacology of the hygienic laboratory, who shall each receive such pay as shall be fixed by the Surgeon-General, with the approval of the Secretary of the Treasury. The director of the said laboratory shall be an officer detailed from the corps of commissioned medical officers of the Public Health and Marine-Hospital Service, as now provided by regulations for said detail from the Marine-Hospital Service, and while thus serving shall have the pay and emoluments of a surgeon: *Provided*, That all commissioned officers of the Public Health and Marine-Hospital Service not below the grade of passed assistant surgeon shall be eligible to assignment to duty in charge of the said divisions of the hygienic laboratory, and while serving in such capacity shall be entitled to the pay and emoluments of their rank.

SEC. 7. That when, in the opinion of the Surgeon-General of the Public Health and Marine-Hospital Service of the United States, the interests of the public health would be promoted by a conference of said service with State or Territorial boards of health, quarantine authorities, or State health officers, the District of Columbia included, he may invite as many of said health and quarantine authorities as he deems necessary or proper to send delegates, not more than one from each State or Territory and District of Columbia, to said conference: *Provided*, That an annual conference of the health authorities of all the States and Territories and the District of Columbia shall be called, each of said States, Territories, and the District of Columbia to be entitled to one delegate: *And provided further*, That it shall be the duty of the said Surgeon-General to call a conference upon the application of not less than five State or Territorial boards of health, quarantine authorities, or State health officers, each of said States and Territories joining in such request to be represented by one delegate.

SEC. 8. That to secure uniformity in the registration of mortality, morbidity, and vital statistics it shall be the duty of the Surgeon-General of the Public Health and Marine-Hospital Service, after the annual conference required by section 7 to be called, to prepare and distribute suitable and necessary forms for the collection and compilation of such statistics, and said statistics, when transmitted to the Public Health and Marine-Hospital Bureau on said forms, shall be compiled and published by the Public Health and Marine-Hospital Service as a part of the health reports published by said service.

SEC. 9. That the President shall from time to time prescribe rules for the conduct of the Public Health and Marine-Hospital Service. He shall also prescribe regulations respecting its internal administration and discipline, and the uniforms of its officers and employees. It shall be the duty of the Surgeon-General to transmit annually to the Secretary of the Treasury, for transmission by said Secretary to Congress, a full and complete report of the transactions of said service, including a detailed statement of receipts and disbursements.

Mr. MANN. Mr. Speaker, is this a request for unanimous consent?

The SPEAKER. It is.

Mr. MANN. Well, Mr. Speaker, I think that bill is too important a measure to be considered by unanimous consent without going into Committee of the Whole, and I object.

The SPEAKER. Objection is made.

PHILIPPINE GOVERNMENT.

Mr. COOPER of Wisconsin. Mr. Speaker, I call up the Philippine government bill, and move that the House insist upon its amendments disagreed to by the Senate and agree to the conference asked.

The SPEAKER. The gentleman from Wisconsin moves that the House insist on its amendments to the Philippine government bill and agree to the conference asked by the Senate.

The question was taken, and the motion was agreed to.

The SPEAKER announced the following conferees: Mr. COOPER of Wisconsin, Mr. PAYNE, Mr. CRUMPACKER, Mr. JONES of Virginia, and Mr. MADDOX.

AMENDMENT OF DISTRICT CODE.

Mr. JENKINS. Mr. Speaker, I desire to submit a conference report.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia."

The SPEAKER. The report and statement will be printed, under the rule.

The report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill (S. 493) to amend an act entitled "An act to establish a code of law for the District of Columbia,"

having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with amendments as follows:

In said amendment, page 1, line 8, strike out "four" and insert "six."

On page 2 strike out lines 7 to 15, inclusive, and in lieu thereof insert the following:

"And said supreme court shall from time to time divide the said district into subdistricts and prescribe the place in each subdistrict where the justice thereof shall have his office for the transaction of business, and may change the boundaries of such subdistricts and the localities of the offices of the justices therein from time to time as the volume and convenience of the business may require. No justice of the peace during his term of office shall engage in the practice of the law, subject to the penalty of removal from his office. When the number of such justices of the peace shall be reduced by death, resignation, or expiration of term of service, or otherwise, to six, the number of such justices of the peace shall be six only, and if the number shall not be reduced to six until the expiration of the term of the present justices of the peace, only six vacancies shall then be filled."

On page 3 strike out line 1.

On page 5, line 18, after "President," insert "by and with the advice and consent of the Senate."

On page 14, line 19, strike out "drunkards" and insert "any person."

On page 16, line 9, after "compensation," insert "at the rate of $4,000 per annum;" and in line 10, after the word "wills," add the following proviso: "*And provided further*, That the employees of said office shall not be in excess of the number actually necessary for the proper conduct of the office of said register of wills."

On page 32, line 25, strike out "five" and insert "fifth."

On page 35, line 25, strike out "live" and insert "life."

On page 56 strike out lines 23, 24, and 25; and on page 57 strike out lines 1 and 2, and in lieu thereof insert the following:

"SEC. 1073a. Whenever the court shall be satisfied that the party producing a witness has been taken by surprise by the testimony of such witness such party may, in the discretion of the court, be allowed to prove, for the purpose only of affecting the credibility of the witness, that the witness has made to such party or to his attorney statements substantially variant from his sworn testimony about material facts in the cause; but before such."

On page 61, line 1, strike out "such person or corporation" and insert "the creditor."

On page 64, line 1, strike out "four" and insert "five."

On page 64, line 15, after "court," insert "holding an equity term;" and in line 18, after the word "infant," add "The court shall have power, in its discretion, to grant the prayer of such petition."

On page 68, line 10, strike out "line 3" and insert "lines 2 and 3."

And the House agree to the same.

JOHN J. JENKINS,
SAML. W. SMITH,
W. S. COWHERD,
Managers on the part of the House.

J. C. PRITCHARD,
W. P. DILLINGHAM,
THOMAS S. MARTIN,
Managers on the part of the Senate.

The statement is as follows:

Statement of the managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill S. 493, "An act to amend an act entitled 'An act to establish a code of law for the District of Columbia.'"

The first amendment provides for a reduction in the number of the justices of the peace from ten to six, instead of to four, as provided by the House, the reduction to take place as the present justices retire from office, either by death, resignation, or expiration of terms.

The second amendment provides for changes in the subdistricts to correspond with the reduction of the number of justices of the peace.

The third amendment leaves section 7 of the code as it is at the present time.

The fourth amendment provides that the nominations of justices of the peace shall continue to be confirmed by the Senate.

The fifth amendment is simply a change in legal phraseology.

The sixth amendment provides that the employees of the office of the register of wills shall be restricted to the number actually necessary to the proper conduct of that office, and makes the compensation of this officer to correspond with that received by the register of deeds and the clerk of the supreme court of the District of Columbia.

The further amendments are simply verbal, or changes in the legal phraseology.

JOHN J. JENKINS,
SAML. W. SMITH,
W. S. COWHERD,
Managers on the part of the House.

AUTOMATIC CAR COUPLERS.

Mr. WANGER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill which I send to the desk.

The Clerk read as follows:

A bill (H. R. 15144) to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896.

Be it enacted, etc., That the provisions and requirements of the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896, shall be held to apply to common carriers by railroads operated by steam power in the Territories and the District of Columbia; and the provisions and requirements hereof, and of said acts relating to automatic couplers, grab irons, and the height of drawbars, shall be held to apply to all locomotives, tenders, cars, and similar vehicles used on any railroad operated by steam power engaged in interstate commerce, and in the Territories and the District of Columbia, and to all other locomotives, tenders, cars, and similar vehicles used in connection therewith, excepting those trains, cars, and locomotives exempted by the provisions of section 6 of said act of March 2, 1893, as amended by the act of April 1, 1896; and the grab irons or hand holds in the ends of locomotives and tenders shall extend the full length of the end sills thereof, and shall extend upward at least 4 inches clear of any obstruction.

SEC. 2. That whenever, as provided for in said act, any car is equipped with train or power brakes in condition to be operated the same shall be used and operated in every train in which such car is hauled, unless independently of such car 65 per cent of the cars in such train are equipped with power or train brakes and are associated together and so used and operated in such train: *Provided*, That nothing in this act shall be held to release any common carrier from any of the provisions or requirements of said act approved March 2, 1893, and amended April 1, 1896.

SEC. 3. That the provisions of section 1 of this act shall not take effect until January 1, 1903, and the provisions of section 2 of this act shall not take effect until ninety days after the passage of this act.

Mr. BINGHAM. Mr. Speaker, I object.

The SPEAKER. Objection is made.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had insisted upon its amendments to the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. ALLISON, and Mr. TELLER as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill (S. 493) to amend an act entitled "An act to establish a code of laws for the District of Columbia."

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service.

ARTURO R. CALVO.

Mr. SLAYDEN. Mr. Speaker, I desire to call up and ask unanimous consent for the consideration of Senate joint resolution 118.

The Clerk read as follows:

A joint resolution (S. R. 118) authorizing the Secretary of War to receive for instruction at the Military Academy at West Point Arturo R. Calvo, of Costa Rica.

Resolved, etc., That the Secretary of War be, and he hereby is, authorized to permit Arturo R. Calvo, of Costa Rica, to receive instruction at the Military Academy at West Point: *Provided*, That no expense shall be caused to the United States thereby: *And provided further*, That in the case of the said Arturo R. Calvo the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

The SPEAKER. Is there objection?

Mr. MOON. I object, Mr. Speaker.

The SPEAKER. Objection is made.

HOUSE CALENDAR.

Mr. HEATWOLE. Mr. Speaker, I am directed by the Committee on Printing to ask for the present consideration of the following privileged resolution, No. 319.

The Clerk read as follows:

Resolved, That of the last issue of the House Calendar for the first session of the Fifty-seventh Congress there shall be printed as a House document 1,000 copies, of which number 400 copies shall be bound in cloth, for the use of the House.

The resolution was agreed to.

REPORT OF THE DAUGHTERS OF THE AMERICAN REVOLUTION.

Mr. HEATWOLE. Mr. Speaker, I am also directed by the Committee on Printing to call up Senate concurrent resolution No. 27.

The Clerk read as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed 7,500 additional copies of Senate Document No. 164, third session Fifty-fifth Congress, being the report of the Daughters of the American Revolution for 1890 to 1897, together with the historical preface herewith, indorsed by the board of management of that society, of which 2,500 shall be for the use of the Senate and 5,000 for the use of the House of Representatives.

The resolution was agreed to.

On motion of Mr. HEATWOLE, a motion to reconsider the last two votes was laid on the table.

CAPT. SIDNEY S. SHAW.

Mr. RUCKER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 7539) for the relief of Capt. Sidney S. Shaw.

The Clerk read the bill at length.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MOON. I object.

The SPEAKER. Objection is made by the gentleman from Tennessee.

NATIONAL ENCAMPMENT OF THE GRAND ARMY OF THE REPUBLIC.

Mr. BABCOCK. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 198, giving authority to the Commissioners of the District of Columbia to make special regulations for the occasion of the Thirty-sixth National Encampment of the Grand Army of the Republic, to be

held in the District of Columbia in the month of October, 1902, and for other purposes incident to said encampment.

The Clerk read the joint resolution at length.

The SPEAKER. Is there objection to the present consideration of the joint resolution?

Mr. MOON. I object.

The SPEAKER. Objection is made by the gentleman from Tennessee.

AMENDING SECTIONS 3362 AND 3394 OF REVISED STATUTES.

Mr. GROSVENOR. Mr. Speaker, I call up the privileged bill (S. 3896) to amend section 3362 of the Revised Statutes, relating to tobacco.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 3362 of the Revised Statutes, as amended by the act of March 1, 1879, and by the act of January 9, 1883, be, and the same is hereby, amended by striking all out after the fifth paragraph thereof and inserting in lieu of the words so stricken out the following:

"And every such wooden package shall have printed or marked thereon the manufacturer's name and place of manufacture, the registered number of the manufactory, and the gross weight, the tare, and the net weight of the tobacco in each package: *Provided*, That these limitations and descriptions of packages shall not apply to tobacco and snuff transported in bond for exportation and actually exported: *And provided further*, That perique tobacco, fine-cut shorts, the refuse of fine-cut chewing tobacco, refuse scraps, clippings, cuttings, and sweepings of tobacco may be sold in bulk as material, and without the payment of tax, by one manufacturer directly to another manufacturer, or for export, under such restrictions, rules, and regulations as the Commissioner of Internal Revenue may prescribe: *And provided further*, That wood, metal, paper, or other materials may be used separately or in combination for packing tobacco, snuff, and cigars under such regulations as the Commissioner of Internal Revenue may establish."

The following amendment was recommended by the committee:

Add the following as section 2:

"SEC. 2. That the last paragraph of section 3394 of the Revised Statutes, as amended by the tenth section of the act of July 24, 1897, is hereby further amended so as to read as follows:

"'No packages of manufactured tobacco, snuff, cigars, or cigarettes prescribed by law shall be permitted to have packed in or attached to or connected with them, nor affixed to, branded, stamped, marked, written, or printed upon them, any paper, certificate, or instrument purporting to be or represent a ticket, chance, share, or interest in or dependent upon the event of a lottery, nor any indecent or immoral picture, representation, print, or words; and any violation of the provisions of this paragraph shall subject the offender to the penalties and punishments provided by section 3456 of the Revised Statutes.'"

Mr. RICHARDSON of Tennessee. Mr. Speaker, I desire to ask the gentleman from Ohio if this has been reported from the committee.

Mr. GROSVENOR. It is the unanimous report of the Committee on Ways and Means. There is an amendment to the bill, Mr. Speaker.

The amendment was agreed to.

The bill was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. GROSVENOR, a motion to reconsider the last vote was laid on the table.

Mr. GROSVENOR. I desire to ask unanimous consent to amend the title by adding "section 3394." The amendment amends another section, so that the title does not cover both sections.

The SPEAKER. Without objection, the amendment of the title will be agreed to.

There was no objection.

Mr. SULZER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. The bill having been passed, will not the gentleman have to move to reconsider?

The SPEAKER. Not where unanimous consent is given to amend the title, as is customary.

AMENDMENT TO INTERNAL-REVENUE LAWS.

Mr. DALZELL. Mr. Speaker, I call up the privileged bill (H. R. 179) to amend the internal-revenue laws.

The Clerk read the bill, as follows:

Be it enacted, etc., That all distilled spirits now in internal-revenue bonded warehouses or which may hereafter be produced and deposited in such warehouses shall be entitled to the same allowance for loss from leakage or evaporation which now exists in favor of distilled spirits produced, gauged, and so deposited prior to January 1, 1899, and subject to the same conditions and limitations.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time; and it was read the third time, and passed.

On motion of Mr. DALZELL, a motion to reconsider the last vote was laid on the table.

CONTESTED-ELECTION CASE—HORTON AGAINST BUTLER.

Mr. TAYLER of Ohio. I call up the contested-election case of Horton *v.* Butler, from the Twelfth Congressional district of Missouri. I ask that the resolution reported by the committee be read.

Mr. RICHARDSON of Tennessee. Mr. Speaker, I desire to make a parliamentary inquiry. Is not this day set apart under the rules as the day for invalid pensions?

The SPEAKER. It is; but the election case is of higher privilege.

Mr. RICHARDSON of Tennessee. Surely we are not going to set aside the pension business assigned by the rules for to-day in order to take up an election contest where no one is to be seated. Surely gentlemen do not desire to do that. I wish to raise the question of consideration.

The SPEAKER. The resolution will first be read.

The Clerk read as follows:

Resolved, That no valid election for Representative in Congress was held in the Twelfth Congressional district of Missouri on the 6th day of November, 1900, and that the seat now held by the contestee is hereby declared vacant.

Mr. BOWIE. Mr. Speaker, I would like to have about five minutes by unanimous consent.

Mr. TAYLER of Ohio. I demand the regular order.

The SPEAKER. The regular order is demanded. The gentleman from Tennessee raises the question of consideration.

Mr. RICHARDSON of Tennessee. I understand that Mr. Butler, the contestee in this case, is sick in bed, and that his physician certifies he is not able to be here.

The SPEAKER. The question of consideration is not debatable.

Mr. TAYLER of Ohio. I call for the regular order.

Mr. RICHARDSON of Tennessee. I remind gentlemen that this is the last day of the present session on which pension business will have any showing. I raise the question of consideration.

The SPEAKER. The gentleman from Tennessee is out of order. The question of consideration has been raised, and is not debatable.

Mr. RICHARDSON of Tennessee. This is the last day you will get for pensions.

The SPEAKER. The gentleman from Tennessee is out of order, and he will please take his seat.

The question being taken, Will the House now consider the resolution reported from the Committee on Elections? there were—ayes 114, noes 88.

Mr. RICHARDSON of Tennessee. I call for tellers.

Tellers were ordered.

Mr. TAYLER of Ohio. I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 146, nays 112, answered "present" 12, not voting 80; as follows:

YEAS—146.

So the House decided to consider.

The following pairs were announced:

For the session:

Mr. WRIGHT with Mr. HALL.

Mr. BOREING with Mr. TRIMBLE.

Mr. KAHN with Mr. BELMONT.

Mr. METCALF with Mr. WHEELER.

Mr. BULL with Mr. CROWLEY.

Mr. IRWIN with Mr. GOOCH.

Until further notice:

Mr. JOY with Mr. COCHRAN.

Mr. LOUDENSLAGER with Mr. DE GRAFFENREID.

Mr. HENRY C. SMITH with Mr. TAYLOR of Alabama.

Mr. JENKINS with Mr. SMITH of Kentucky.

Mr. HAUGEN with Mr. LEVER.

Mr. SKILES with Mr. TALBERT.

Mr. DRISCOLL with Mr. ROBINSON of Nebraska.

Mr. EMERSON with Mr. GILBERT.

Mr. SHERMAN with Mr. RUPPERT.

For two weeks:

Mr. WEEKS with Mr. SHEPPARD.

For ten days:

Mr. BURKETT with Mr. SHALLENBERGER.

Until the 28th:

Mr. EVANS with Mr. HENRY of Mississippi.

For the day:

Mr. NEEDHAM with Mr. BRUNDIDGE.

Mr. POWERS of Maine with Mr. FOX.

Mr. RUSSELL with Mr. ROBERTSON of Louisiana.

Mr. WM. ALDEN SMITH with Mr. JETT.

Mr. REEDER with Mr. SELBY.

Mr. PATTERSON of Pennsylvania with Mr. SCARBOROUGH.

Mr. MINOR with Mr. MCLAIN.

Mr. MCCLEARY with Mr. MCANDREWS.

Mr. LONG with Mr. LATIMER.

Mr. LANDIS with Mr. HENRY of Texas.

Mr. HULL with Mr. GLENN.

Mr. ESCH with Mr. ELLIOTT.

Mr. CORLISS with Mr. KERN.

Mr. SHELDEN with Mr. EDWARDS.

Mr. CONNELL with Mr. DAVIS of Florida.

Mr. FORDNEY with Mr. REID.

Mr. CANNON with Mr. CREAMER.

Mr. BARNEY with Mr. CONRY.

Mr. ACHESON with Mr. BROUSSARD.

Mr. STORM with Mr. BELLAMY.

Mr. WOODS with Mr. WHITE.

Mr. VREELAND with Mr. VANDIVER.

Mr. YOUNG with Mr. COONEY.

The result of the vote was announced as above recorded.

The SPEAKER. The Chair will recognize the gentleman from Ohio [Mr. TAYLER].

Mr. TAYLER of Ohio. Mr. Speaker, I am just in the midst of a conference with the gentleman from Alabama [Mr. BOWIE] and his colleague respecting the time that the debate shall endure.

Mr. BOWIE. Mr. Speaker, I would make this suggestion, that the gentleman proceed and grant time to whoever is to open on his side, and, pending that, we can confer as to the time. I wish to confer with some gentlemen on this side of the House.

Mr. TAYLER of Ohio. I was anxious to know at this time if there was to be no debate.

Mr. BOWIE. I would not agree to have no debate.

Mr. TAYLER of Ohio. Of course I do not desire to compel anybody to withhold debate. I yield, then, to my colleague [Mr. SMITH of Iowa], to speak in his own time.

Mr. SMITH of Iowa. Mr. Speaker, this contest was instituted by William N. Horton, who was a Republican candidate for Congress from the Twelfth district of Missouri in the election of 1900, as against James J. Butler, who was the Democratic nominee and who received his certificate of election. The Committee on Elections No. 1, having had this matter under consideration, have reported in favor of declaring the seat vacant. Before proceeding to a discussion of the facts in this particular case, I desire to call attention to those laws of the State of Missouri which are applicable to it. It is provided by the constitution of the State of Missouri that every ballot shall be so marked as that it can be determined after the election who cast that ballot. As a matter of fact, in Missouri the name of every voter is given a number at the time he casts his ballot and his ballot is given the same number, and so it becomes possible in the case of an election contest to determine, in the absence of mistakes upon the part of the election officers, the name of every person who cast a ballot in that election.

In the State of Missouri the city of St. Louis is usually Republican and the State usually Democratic; and to remove the patronage from the city government, or for other causes which are not material here, the legislature of Missouri passed a law creating a police commission in the city of St. Louis, appointed by the governor and having entire control of the police force of that city. This police force, by reason of the political character of the State of Missouri, is and has been ever since the passage of the law referred to a Democratic police force. The law of the State of Missouri provides now that the election commissioners of the city of St. Louis shall also be appointed by the governor.

The Filley law, passed in 1895, provided that two of the election commissioners should be appointed by the governor and one by the mayor, and explicitly provided that the one appointed by the mayor should be of the opposite political faith to that entertained by those appointed by the governor. As the mayor of St. Louis is usually a Republican, practically this law entrusted the appointment of the Democratic members of this commission to the Democratic governor and the appointment of the Republican member to a Republican mayor. But as at times the mayor of St. Louis is a Democrat, it was explicitly provided that he must appoint a commissioner of the leading political party other than that of the governor. This law also provided that the governor should designate the chairman of the election commission, and that the mayor's appointee should be the secretary of the commission.

But in 1899 the law was changed, so that all appointments are made by the governor, and the commission select the secretary from without the board, who is of the political party represented by the majority upon the board. So that while under the former law the Democrats got the chairman of the board and the Republicans the secretary of the board, under the new law the Democracy receives a majority of the board and the chairman and the secretary. Under the old law it was provided that this Republican representative should have the choice of all the judges and clerks representing the Republicans upon the various election boards in the city and county of St. Louis. Under the new law no such power is given to the Republican representative, but the power is intrusted first to the election commission itself, and in their absence to the secretary of the commission, who is clothed with all the powers of the full board when the board are absent or otherwise not in session.

While the new law requires that the Republicans shall be given equal representation upon these election boards, it does not give to the Republicans the choice of their representation upon these boards. A pretense in this case was made of carrying out the law; but in 5 wards of the 15, in this district where the committee have taken the pains to see how these alleged Republican judges and clerks voted, the record shows that 53 voted for the Republican candidate for Congress and 60 voted against the Republican candidate for Congress. An absolute majority of the so-called Republican judges and clerks, so far as they were canvassed by this committee, have voted against the Republican candidate for Congress, and that is the kind of representation that was given to the Republicans upon the election boards in the city of St. Louis. And if we bear this in mind we will be able the better to understand the methods by which the iniquity was carried out in the election of 1900.

Before the election of 1900 it was believed by the Republicans that large numbers of fictitious names had been registered. They

succeeded in getting a list of about fifteen hundred of these names. They sent out registered letters to those persons at the addresses given upon the register books. The post-office officials made special efforts to make delivery of those letters, but were unable to find any substantial number of the persons at the places indicated upon the registration books. Warrants were then sworn out for the arrest of these people, and deputy sheriffs were on election day sent to the polls to arrest such persons as might cast ballots under these names.

But this effort was futile, because on the Sunday night before election there met at the Southern Hotel, in the city of St. Louis, the attorney-general of the State, the chairman of the Democratic State central committee, the chairman of the Democratic city central committee, the Democratic members of the election commission, the Democratic assistant or deputy election commissioner, the Democratic police commissioners, and the chief of the police force of the city of St. Louis, Col. Ed. Butler, and this contestee, James J. Butler, and it was then and there resolved that instructions should be issued to the police force of the city not to allow any deputy sheriff within a hundred feet of the polls.

There is no law in Missouri prohibiting anyone from being within a hundred feet of the polls. There is a law prohibiting electioneering within a hundred feet of the polls. But this collection of gentlemen at the Southern Hotel first procured an order to be issued that these deputy sheriffs should not under any circumstances be allowed within a hundred feet of the polls. It needs but little reflection to see that an order like that would absolutely defeat every effort for the arrest of the guilty, for the names upon the register books were not the names of any human beings. They were mere fictions, put there that repeaters might vote in those names.

No warrants issued for the arrest of these people could be served save only by waiting until some individual gave that name at the ballot box and then laying hands upon him. But the order wisely and discreetly provided that no deputy sheriff should be allowed within 100 feet of the polls, so that he could not hear any name given and make any arrests. Subsequently, discovering that this order was a little too radical, an order was issued that a deputy sheriff might be permitted within a hundred feet of the polls for the purpose of making an arrest of some person who was there situated; but inasmuch as it was utterly impossible for the sheriff to know who was to cast this fraudulent vote unless he could stay close enough to the polls to hear his name given in, of course this accomplished the purpose just as well as the original order. The result was that fraud ran rampant in that district on election day.

Shortly after the election the Republicans, satisfied that the extraordinary change since the last election could but be the result of fraud, took a canvass of all that part of the Twelfth Congressional district where colonization would be apt to take place. At the previous Congressional election the district went Republican by 2,300 majority; at this election there was a majority of 3,500 for Mr. Butler, as shown by official returns, a change of 6,000 votes in favor of the Democracy, when all over that western country they were losing as compared with the vote in 1898 in Congressional matters.

The result was that the Republicans decided to make a house to house canvass in that part of the district where colonization was apt to take place. They did so, and they got a census for all that territory, and when you give to the Democracy of that district credit for every man who had been either upon the Federal census, taken in June of that year, or upon this private census, taken in December of that year, there are 9,180 fraudulent names registered in the Twelfth Congressional district in this election of November, 1900.

In the minority report it is strenuously insisted that this private census can not be considered, that it is hearsay testimony, and they make that and other objections to it. I want to say that I do not care whether this House considers the so-called McBurney canvass or not; the United States census was taken in June, 1900. The registration in the city of St. Louis commenced the same month; and if you take the census, and if you take the register, there were over 12,000 fraudulent votes cast in this district. The McBurney canvass, that our friends have made such a strenuous effort to get out of this case, has credited them with every man who moved into this district between June and December.

So much for the McBurney canvass. Yet it is entitled to weight. It had been taken by an officer of the census. It was taken just like the Federal census, and the parties did not know what they were taking it for. They thought they were taking it for world's fair industrial statistics, so that they had no object or incentive to take it other than fairly and properly. I think it was taken fairly. I think it throws some light upon this question. But if it does not throw any light upon this case, then the only result of that is to deprive our Democratic friends of the credit of the names found in the McBurney canvass and not found upon the Federal census. Throw it out, therefore, if you want to, but the amount of fraud in this district is all the more apparent.

Our object was to credit them with every honest vote there was in this district, and for any man who had come in since the registry commenced, if they want to count him, and so we consider the McBurney canvass; but throw it out, if you please, and the record shows only more fraud in the Twelfth district of Missouri. Never has such infamy come under my observation in connection with an election as appears upon the record in the case. These people were not satisfied to prostitute a partisan election commission, to prostitute a partisan police force, but proceeded to prostitute the courts of the State of Missouri.

The court of appeals sitting in St. Louis is a Democratic court with three Democratic judges. It is a court of appeals and for the correction of errors. It has absolutely no jurisdiction or authority to grant naturalization papers. But it so happened that the judges of the circuit court and its clerk were Republican; the clerk required the Democrats to pay the statutory fees to be naturalized as he required Republicans to pay these fees.

This court of appeals of the city of St. Louis proceeded in defiance of all law, and without one vestige of authority, State or Federal, to sit for naturalization of aliens, because, forsooth, the Democratic clerk offered to the State committee to issue papers gratuitously. There is not an authority, so far as I know, in this country, and none has been called to my attention, which holds that a court of appeals can sit for the naturalization of aliens. On the contrary, it has been specifically held by the courts of South Carolina and of California that no such power exists.

The authority is conferred by law upon the courts of common-law jurisdiction. Courts of appeal do not have common-law jurisdiction within the meaning of that term as used in this statute. It has never been the practice in this country, so far as I know, to go to appellate tribunals for naturalization papers. This court was composed of three judges. They sat night after night in October, 1900, granting naturalization papers as high as five to six hundred a night. One of the judges of that court had too much decency and too much self-respect to sit during these proceedings. But two of these judges sat there and granted these papers. Every paper thus issued was void for want of jurisdiction in the court.

But I propose to call attention to the proceedings of that tribunal and show that fraud was everywhere. The laws of the United States provide that minors whose parents are naturalized during their minority are naturalized by the naturalization of the parents. The laws of the United States provide that persons who come here under 18 years of age may take out both sets of papers at the same time. Minors as a body, coming here under 16 years, are naturalized by the naturalization of their parents, the great body of them. Minors coming here over 18 years of age have no right to take out both papers at once. And so it is that those who take out both papers at once are substantially confined to those who come here between 16 and 18 years of age.

Now, what does the record show in this court in St. Louis? It shows that prior to October, 1900, only 218 persons in all have been naturalized in this court in its history; but in the month of October, 1900, 1,530 persons were naturalized. Of that number 842 were naturalized adults and 688 were naturalized as having come here minors under 18 years of age. In other words, nearly one-half of those naturalized in that court of appeals succeeded in getting second papers without producing first papers, upon the pretense that they came here under 18 years of age.

It has been my privilege through a course of ten years to have some observation of what percentage of naturalizations are of persons who are entitled to take out both papers at once as having come here under 18 and what percentage have to wait two years between their papers, and I assert that it is the common experience of everyone that not more than 5 to 10 per cent are entitled to take out both sets of papers at once. But down at St. Louis, of this body of Democrats naturalized in a court that had no jurisdiction, substantially one-half of all pretended that they came here under 18 years of age, when if they came here under 16 most of them would have been naturalized by the naturalization of their fathers. It so happens that the years between 16 and 18, of all the years of man between 1 and 70, seem to be the years during which migration takes place, and nearly one-half of all who came here came between 16 and 18 years of age. [Laughter.]

Has there ever been a record of a high judicial tribunal which bore upon its face more manifest evidence of fraud than this record to which I have referred? But these gentlemen collected $20,000 from the police force of the city of St. Louis alone with which to carry this election. Having by the police-commission law taken the police force out of the jurisdiction of the city of St. Louis and placed it in the control of the men appointed by a

Democratic governor, they put the screws on them and made them contribute more than $20,000 for the purpose of debauching this particular election.

But all these things would have been unavailing to overcome a Republican majority in this district. The police force went with the gangs of repeaters and kept off from them the deputy sheriffs and other people. The repeaters went about from polling precinct to polling precinct, about 60 of them in a body, and cast their ballots, voting in these fictitious names; and not satisfied with that, the same repeaters would simply go and change their hats and coats and come back and vote again in the same precinct, and this is abundantly established by direct evidence.

Now, I want to call attention to a certain precinct and some facts concerning it—the second precinct in the Twenty-third Ward. A clerk of the elections came out from the polling place and he was asked how many votes had been polled. He replied, 140 votes. I know it is claimed that this is hearsay. It is an official declaration, and I say it is part of the res gestæ and is not hearsay in the ordinary sense of that term. I say he came out and made that announcement.

Mr. BOWIE. Is the gentleman referring to the Breitschuh testimony?

Mr. SMITH of Iowa. It is shown by the Breitschuh testimony and an abundance of other testimony. At that time a cry went up, "Here come the Indians;" and it appears in the testimony that down in this virtuous city of St. Louis that term means repeaters. "Here come the Indians!" And this Williams gang went in and voted, and when they had concluded their voting there were 260 votes cast.

Mind you, I do not mean when they had voted once this was the result. These men went out and changed their coats and hats in the presence of respectable people in St. Louis and voted over again in the same precinct, giving new names.

Every time that this gang came to a polling place there was passed out to each of them, as shown by the evidence, a slip telling his name and where he lived. When this crowd had got through voting in this second precinct of the Twenty-third Ward, there were, I say, 260 votes where there had been 140 when they commenced. An examination of the ballots showed that not a single vote from 140 to 260 was cast for the Republican candidate. By some strange mystery 120 Democrats in succession voted in this precinct. But that is not the only remarkable incident here. Not a single one of these 120 names had any middle initial. A strange circumstance that, with probably nine-tenths or more of the American people in possession of two Christian names, not one of these 120 men who voted in succession had any middle initial. Of the voters in this precinct not shown by the McBurney canvass, 130 voted for Butler.

But there were other difficulties to be overcome in carrying out this enterprise than those I have indicated. There was the danger that deputy sheriffs would lay their hands upon these miscreants, and they were driven from the polls by the police force of St. Louis. But there was danger that Republican challengers would interfere with this pleasant procedure, and so, in precinct after precinct, they threw out the Republican challenger and left nobody there to represent the Republicans except these Republican judges and clerks, who, as the returns show, voted the Democratic ticket.

But still there was fear that this corrupt police force had not done enough in contributing $20,000 to the fund to pay these repeaters and in driving from the polling places in that district the deputy sheriffs, men having equal authority with themselves, and driving away the challengers. Squads of them went down to the polling place just as "the Indians" were coming, and cleared the way to see that no one interfered with them.

Now, by these methods, by fraudulent naturalization, by void naturalization, by corrupt use of money, by fraudulent registration, by using repeaters, by every means known to man by which the ballot box may be debauched, they succeeded in carrying this election, as they claim, for James J. Butler.

But all these things were not, they feared, sufficient. They knew they had taken 60 men from place to place, voting them everywhere—voting them twice in a single precinct. But still they were afraid that they had not stolen enough, and so a recanvass of the vote shows that these judges and clerks of integrity stole more than 400 votes in the count. On the report as made out by the minority, not by the majority, we think they stole more than that. It further appears that some of these judges and clerks deliberately turned out Republican ballots with the name of the Republican candidate for Congress erased before the ballots were delivered to the voter. It appears that one Republican judge wanted to challenge a voter, and while he was trying to prepare the challenge blank the Democratic judge took the man's ballot and put it in the box.

Thus by corruption, thus by fraud, thus by force, thus by violence they succeeded in subverting the will of the people in the Twelfth district of Missouri. You ask me, Why did not the majority vote in favor of seating the Republican member, if this is all true? I will tell you why. We are not desirous of seating any Republican who is not entitled to his seat. We have shown by an abundance of testimony, sufficient to convince the most doubting, that at least 5,000 fraudulent votes were cast for James J. Butler; votes of men who had no existence, votes of men who registered from disreputable houses, 30 of them to a house, and 100 of them to a block in which there was not a respectable house. One hundred of them at a time registered from stables. Men registered from vacant lots, and men registered who, if they had located the number where it would have to be in order to correspond, it would have been in the middle of a public highway. More than 5,000 fraudulent votes were thus cast for James J. Butler.

More than 400 were stolen from Horton in the count, but it does appear that there were 2,000 votes cast for Horton that could not be found in the census or in the McBurney canvass. There is no evidence of repeating. There is no evidence of fraudulent voting. There is no evidence of anything affecting Horton's title, save only the fact that these voters can not be found—not as in Butler's case, proof of padded registration list; not as in Butler's case, proof of interference by the police; not as in Butler's case, partisan judges and partisan clerks allowing the same men to vote two or three times at a precinct. But there is enough doubt in the minds of the members of this committee as to whether Horton got those 2,000 votes fairly, so that we are unwilling to give him this seat.

There is no doubt that the election of Butler is a scandalous fraud. There is some doubt whether Horton was really elected or not: whether he did not get some fraudulent votes, too. I have thought something upon this subject, and I am convinced that the chances are that some of these repeaters that our friends were using down there, some of them Abyssinians, took the advice of "our peerless leader" and took Jim Butler's money and voted for Horton. I do not know whether that accounts for it or not. It may. There is not a particle of evidence tending to reflect upon Horton save only that he got these votes from people who are not found in the district.

Mr. BARTHOLDT. If the gentleman will permit, I would state that the general explanation in St. Louis is that these people simply made a mistake in scratching their ballots. Instead of scratching the Democratic ballot, they scratched Republican ballots, being illiterate men, unable to read.

Mr. SMITH of Iowa. I do not know what the explanation is. That may be it. It may be that accounts for it, but there is no evidence, I say, reflecting upon Horton, aside from this mere canvass.

Mr. BARTLETT. Mr. Speaker, if the gentleman will permit, I have listened with a great deal of interest to what the gentleman has stated. The committee, as I understand it, reports the seat to be vacant.

Mr. SMITH of Iowa. Yes.

Mr. BARTLETT. And the majority of the committee do that, as I understand, because of the fact and from the evidence they arrive at the conclusion that the election was fraudulent, and that on account of the election being fraudulent, the evidence not being sufficient to show for whom these fraudulent votes were cast, sufficient to declare either one or the other entitled to the seat. That is the theory upon which the majority proceed, is it not? That is, you first determine from the evidence which you have stated——

Mr. SMITH of Iowa. No; that is not the theory, if the gentleman asks me that question. Perhaps I had better state that there is no difficulty in telling just exactly who cast every one of those fraudulent votes.

Mr. BARTLETT. May I ask the gentleman this question? He has stated now something about the evidence with reference to certain fraudulent naturalization, some 1,500.

Mr. SMITH of Iowa. Not all of them fraudulent. Some of them fraudulent, but all of them illegal.

Mr. BARTLETT. Perhaps I should have said illegal—on account of want of jurisdiction.

Mr. SMITH of Iowa. And fraudulent as to the character of many of the applicants.

Mr. BARTLETT. Now, was there evidence before the committee, or did the committee run it down far enough to see how many of those fraudulent or illegal naturalized voters voted for Butler and how many for Horton?

Mr. SMITH of Iowa. No.

Mr. BARTLETT. That was not ascertained before the committee.

Mr. SMITH of Iowa. It is before the committee, but you may well imagine that with the enormous number of votes in this case to find just how every individual voted is a matter of some difficulty.

Mr. BARTLETT. I have undertaken to do it, and that

prompted the question, because I wanted to know this fact, if the committee has been able to find out who voted then the committee could sift the fraudulent votes from the legal votes.

Mr. SMITH of Iowa. They can do that. I simply say they did not do it with reference to naturalization in the court of appeals. The law of Missouri requires every voter's name shall be numbered, and that his ballot shall have the same number upon it. Now, there are over 9,100 names registered that are not either upon the Federal census, taken the same time the registration commenced, or in the McBurney canvas. Now, we can turn to the poll books and find the number of every one of those names and turn and find the ballot that was cast by the person who claimed to be the man and find out just who he voted for.

Mr. BARTLETT. The gentleman says that the committee did not do that.

Mr. SMITH of Iowa. I say they did do that, but did not do it with reference to the naturalization list. They did do it with reference to this list of 9,100 fraudulent names upon this registration list, and they found that some of them were scared away by these warrants that had been issued, and by the notices that had been sent out, and the list that had been published, showing who they were; but more than 7,000 of them voted at that election, and more than 5,000 voted for Butler and 2,000 voted for Horton.

Mr. BARTLETT. Then the committee has been able to find out who that number of fraudulent voters voted for.

Mr. SMITH of Iowa. Yes.

Mr. BUTLER. Deducting each from the man for whom they were cast, how does it leave the election?

Mr. SMITH of Iowa. If it was so deducted, and more than 400 votes erroneously counted were deducted, it would elect Horton.

Mr. BARTLETT. But the majority of the committee were so satisfied of the improprieties and frauds that were committed in the election that they determined that no man was legally elected, I understand.

Mr. SMITH of Iowa. We determined that we were uncertain as to whether these were fraudulent votes cast for Horton by procurement of himself or friends, or whether they were some of Butler's repeaters who either did not know how to vote or decided to vote for Horton anyhow, because they were Africans, after taking Butler's money. We were uncertain, I say, whether Horton was in any sense responsible for these 2,000 votes thus cast for him, and we were unwilling to ask this House, therefore, to seat him with apparently 2,000 fraudulent votes to his credit.

Mr. BARTLETT. Then, the committee were not able definitely to sift the fraudulent votes from the legal and valid votes, so as to authorize them to say that anybody was elected?

Mr. SMITH of Iowa. Yes; we were able to sift the fraudulent from the legal votes all right; but when Mr. Butler ran a repeater up to the polls to vote in the name of a man who did not exist, and that repeater, either through ignorance or because he was an African and wanted to vote the Republican ticket, took Butler's money and voted for Horton, we can not say whether Horton was fairly elected or not.

Mr. BARTLETT. Do you think he ought to stay bought?

Mr. SMITH of Iowa. Why, I presume that is what you think.

Mr. BARTLETT. No; I do not say that.

Mr. SMITH of Iowa. That is what your side seems to think.

Mr. RUCKER. Will the gentleman from Iowa yield?

Mr. SMITH of Iowa. Certainly.

Mr. RUCKER. I understood my colleague from Missouri [Mr. BARTHOLDT] a moment ago to aid the gentleman who now has the floor in explaining the 2,000 votes that were cast for Mr. Horton.

Mr. SMITH of Iowa. Yes.

Mr. RUCKER. As I understand, the gentleman who is now addressing the committee consented to that as a possible explanation of it.

Mr. SMITH of Iowa. That may be possible; yes.

Mr. RUCKER. Now, if I understood my colleague, he said that about St. Louis the general impression was that ignorant persons erroneously scratched the Democratic ticket when they intended to scratch the Republican ticket. Now, I should like to ask the gentleman in this connection how could that have been done in view of the fact that each political party had a ticket printed on a separate sheet of paper?

Mr. SMITH of Iowa. As I understand the Missouri law, each voter receives all of the tickets from the judges of election. Is not that true?

Mr. RUCKER. He may do so.

Mr. SMITH of Iowa. He does receive them ordinarily, does he not?

Mr. RUCKER. Yes, ordinarily.

Mr. SMITH of Iowa. And goes and picks out the one he wants to vote and hands it to the judge of election. I do not see any difficulty about it.

Mr. RUCKER. Now, the idea is that he mistakes the Republican ballot for a Democratic ballot.

Mr. SMITH of Iowa. That is the suggestion that Mr. BARTHOLDT made, and that, I said, might possibly be the explanation.

Mr. RUCKER. In other words, your idea is that these 2,000 men wanted to vote the Democratic ticket, but accidentally got the wrong ticket.

Mr. SMITH of Iowa. I told you I did not know how they came to vote that way.

Mr. RUCKER. That is the gentleman's explanation.

Mr. BARTHOLDT. If the gentleman will permit, those 2,000 votes are admitted to have been fraudulent votes, cast by people whom we do not know and whom we can not identify, and most of them—a good many of them—had been imported into the city of St. Louis from outside for the purposes of that election.

Mr. RUCKER. Can the gentleman tell us in that connection when they were imported?

Mr. BARTHOLDT. Oh, I can tell you that from my own experience and observation.

Mr. RUCKER. I thought possibly you might, if you desired.

Mr. BARTHOLDT. Weeks before the election the boarding houses along Market street and Chestnut street were filled with strangers who had never been seen before in the city of St. Louis. They were all used for the purposes of that election, and in explanation of what my colleague asks these tickets are handed out to each voter in bunches, as he is aware.

Mr. RUCKER. That is usually the case.

Mr. BARTHOLDT. And of course it is not very difficult to explain that a repeater, a man who can not read the caption of the Republican or Democratic ticket, might mistake the ticket and intend to vote the Democratic ticket, but actually vote the Republican ticket.

Mr. RUCKER. I would make this suggestion: I never heard of a Republican candidate making such a grievous error as to buy men who did not know enough to vote the right ticket after being bought.

Mr. SMITH of Iowa. Did not know how to vote the right ticket! Did not your candidate on the Democratic ticket advise men to take the money and then go and vote their own ticket?

Mr. RUCKER. I say that any man who says the last Democratic candidate for the Presidency advised men to sell their votes utters a foul slander, which I do not believe the gentleman from Iowa intends or is capable of doing.

Mr. SMITH of Iowa. He said, "Take their money and vote as you choose." I do not mean he ever advised men to sell their votes, because at the time he was advising them to vote for himself. Of course, he never advised them to sell their votes. He was trying to get them to vote for him.

Mr. RUCKER. I do not believe that he ever told them that.

Mr. SMITH of Iowa. You do not?

Mr. RUCKER. Did you ever hear him say it?

Mr. SMITH of Iowa. I never heard him say so.

Mr. RUCKER. I do not think any other man ever heard him.

Mr. SMITH of Iowa. It has been stated in the press time and again and never questioned.

Mr. RUCKER. I question it now.

Mr. SMITH of Iowa. It was never questioned.

Mr. RUCKER. He is too great a man to question every political falsehood that may be circulated through Republican papers.

Mr. SMITH of Iowa. I trust that he is too great a man to tolerate such a charge against him without denying it if false.

Mr. RUCKER. It would take a man a lifetime to answer all Republican slanders.

Mr. MANN. He is still their leader.

Mr. SMITH of Iowa. In some polling precincts, in order that this iniquity might be carried on with greater safety, they pasted newspapers all over the windows clear up to the ceiling, to prevent anyone from by any possibility discovering the fraud, from seeing it, and then carried it out according to their sweet will and pleasure.

Colonel Butler was the boss of the Democratic party of the city of St. Louis. He conducted this marvelous campaign by which there was a reversal of 6,000 in the vote in that district. I need not refer to the reputation of this distinguished Democratic leader. I say that no man can read his record without coming to the conclusion that this whole election was a travesty. So when gentlemen ask McBurney, "If Mr. Hennings roomed at the Jefferson Club, then your canvasser was not correct?" He said, "Of course it was not, if he lived there; but I did not find him." They never produced any evidence that he lived at the Jefferson Club. They proved their case by the question put to the witness and never by the answer. Witness after witness was brought up and testified that he lived in the house designated as the home of some of these fraudulent voters and swore that no such person ever lived in that place.

Witness after witness comes upon the stand and swears that

he lives next door to a certain place where voters registered from, and no such person lives there at all. That is one of the things repeated by this contestee. No witnesses are called by him to disprove any of these grave charges; not a syllable of evidence is furnished to this House tending to strengthen his case. Suspicious at least. We should have supposed that he would have regarded some of these circumstances. If these men existed, why did he not bring in just a few of them so that we could look at them. But witnesses living in the very house from which the registry was made swore no such person ever lived there, persons living in houses adjoining those from which persons were registered swore that these people never lived there. Not one syllable of evidence is brought by this contestee to refute that charge.

Mr. BARTLETT. I understand the gentleman to say that the evidence in this case is that when it was alleged that certain voters who were alleged to have voted for the contestee did not live at the place at which they were registered that no other person answering to the description either by name or otherwise was produced to say that he did vote for Mr. Butler?

Mr. SMITH of Iowa. No. A woman would come on the stand from a house where a man was registered and voted for Butler, and swear that no such man lived there at that time, and never lived there, and there was no evidence brought in to show that he had ever lived there.

Mr. BARTLETT. You never asked for the voter. Why did not they produce him if he really voted?

Mr. SMITH of Iowa. That was what we were trying to find out. We never could get them to produce them.

Mr. BARTLETT. Not one?

Mr. SMITH of Iowa. Not one.

Mr. BARTLETT. Not one?

Mr. SMITH of Iowa. Not one. [Laughter.] There were 9,000, and not one produced; 9,180, and not one produced.

Mr. MANN. I think there was one produced.

Mr. SMITH of Iowa. One produced. There was one produced. I beg the gentleman's pardon. There were 9,179 who were not produced. [Laughter.]

Mr. NEVILLE. Will the gentlemen permit an interruption?

Mr. SMITH of Iowa. Certainly.

Mr. NEVILLE. How much majority does the evidence show in favor of Butler?

Mr. SMITH of Iowa. Three thousand five hundred.

Mr. NEVILLE. And you say that there were 9,000 fraudulent votes cast?

Mr. SMITH of Iowa. No; I did not say so. I said there were 9,180 fraudulent registrations.

Mr. NEVILLE. And how many fraudulent votes?

Mr. SMITH of Iowa. A little over 7,000.

Mr. SHACKLEFORD. How does the gentleman account for the fact that the contestee only got 3,000 majority, if there were cast 9,000 fraudulent votes?

Mr. SMITH of Iowa. I have told the gentleman that there were only between 7,000 and 8,000 fraudulent votes, and the Republicans had 2,300 majority in the previous election, and these fraudulent votes were enough to overcome that majority and give Butler 3,500.

Mr. SHACKLEFORD. What became of the other 2,000?

Mr. SMITH of Iowa. I told the committee that 5,000 and odd of those votes were found by examination of the ballots to have been cast for Butler, and about 2,000 for Horton, making the 7,000.

Mr. SHACKLEFORD. They were split up, then?

Mr. SMITH of Iowa. I have explained the best I know how. Now, Mr. Speaker, I want to say in conclusion that we have been hearing a great deal lately about imperialism. I want to say that the enemies of republican liberty and of republican institutions are not those who seek to carry them across the waters to the people beyond our western sun. The people who are the enemies of republican institutions and republican liberty are those who procure fraudulent naturalization; those who procure fraudulent registration; those who procure fraudulent votes to be cast; those who by force and violence subvert the will of the people at the ballot box; those who debauch the whole election machinery until republican government at home becomes naught but a mockery. [Applause on the Republican side.]

Mr. WILLIAM W. KITCHIN. Before the gentleman takes his seat I want to ask him a question.

Mr. SMITH of Iowa. Very well.

Mr. WILLIAM W. KITCHIN. I want to ask the gentleman from Iowa if he will not modify his statement he made against the last Democratic candidate for President. I understood that it was said that he advised those men that were supposed to be intimidated into wearing the McKinley button to wear the button and vote the Democratic ticket, and I do not believe it was ever charged that he advised them to take money for voting one way and then vote the other. I ask the gentleman if he will not modify the statement by omitting the charge as he has alleged it?

Mr. SMITH of Iowa. My recollection is the other way.

Mr. WILLIAM W. KITCHIN. My recollection is that he only told them that if they insisted on wearing the buttons to wear them.

Mr. SMITH of Iowa. It was the farthest from my intention to slander Colonel Bryan.

Mr. WILLIAM W. KITCHIN. I think it only applied to those men who were employed by large corporations, which corporations required them to wear the McKinley button, and that there never was a charge made against him that he told them to take the money and then vote the other way.

Mr. SMITH of Iowa. I want to say that I have no desire to say anything unjustly reflecting upon Colonel Bryan. My recollection is as I stated. If I am mistaken, then I am ready to withdraw the remark.

Mr. WILLIAM W. KITCHIN. I ask the gentleman to withdraw it now, or put in his speech some publication from some newspaper making the charge.

Mr. SMITH of Iowa. I am not able, Mr. Speaker, at this time, after the lapse of years to produce any newspaper article making that charge.

Mr. CLAYTON. Well, then, upon that sort of a vague recollection is the gentleman willing to slander a good man?

Mr. SMITH of Iowa. If the gentleman chooses to call it a slander, I have nothing to reply. I have not said that I made the statement on any vague recollection. I believe it to be true, as I have stated. I have said that I could not produce the proof at this moment, and if I am mistaken I wish to withdraw it.

Mr. CLAYTON. You do not know it yourself? You can not get any witness to it?

Mr. VANDIVER. Can the gentleman give the name of any reputable newspaper that published such a charge?

Mr. SMITH of Iowa. I think they all made the charge.

Mr. VANDIVER. But you can not give the name of one?

Mr. SMITH of Iowa. I think they all made the charge.

Mr. CLAYTON. The charge, if ever made, is false and slanderous, and the gentleman from Iowa ought to know it to be so.

Mr. VANDIVER. The gentleman can not give the name of a single paper.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14019) making appropriations to provide for the expenses of the Government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes.

ELECTION CONTEST—HORTON AGAINST BUTLER.

Mr. TAYLER of Ohio. Mr. Speaker, I would like to interrogate my colleague on the committee, the gentleman from Alabama, as to how much time he now desires.

Mr. BOWIE. I will state to the gentleman from Ohio that Mr. Butler told me this morning that he was very sick. I saw him in bed, and he looked like he was sick. I have a certificate from his physician to that effect. Mr. Butler told me he did not want to come here if it was possible to avoid it, but he said if the case was called and entered into consideration of it, notwithstanding the advice of his physician to the contrary, he was going to come here.

I have been looking for him to come here. That is the last word I had from him. I sent his secretary to him a half or three-quarters of an hour ago to find out whether he was coming. I have not yet heard. If Mr. Butler should come, he has a speech that he wants to read. He says that he is not strong enough to deliver it. That will take an hour. I can not possibly discuss this case in less than an hour or an hour and a half.

Mr. TAYLER of Ohio. Why not take two hours and a half on each side?

Mr. BOWIE. That would carry the question over until to-morrow?

Mr. TAYLER of Ohio. Yes, sir.

Mr. BOWIE. Well, I am perfectly willing to agree to that with the understanding that if Mr. Butler should come and should want more time than this arrangement contemplates, he may have it.

Mr. TAYLER of Ohio. Mr. Speaker, I ask unanimous consent that debate on this case continue for five hours altogether, the gentleman from Alabama [Mr. BOWIE] controlling one half of the time and I the other half, one hour having been consumed on our side—five hours in all.

Mr. BOWIE. But the arrangement should be subject to this provision, that if Mr. Butler should come here we may ask that the time be extended for another hour.

Mr. TAYLER of Ohio. Of course Mr. Butler's speech will be on the side of the contestee——

Mr. BOWIE. I understand that; but I want it understood that there shall be more time allowed on our side if he should come and want more.

Mr. TAYLER of Ohio. Of course if there is a situation that makes it necessary, we can act accordingly. But I think the gentlemen on the other side can cut their cloth to fit his needs.

The SPEAKER pro tempore (Mr. NEVIN). The gentleman from Ohio asks unanimous consent that debate on this case be closed in five hours, two hours and a half being allowed on each side, and the one hour already consumed being counted as part of the five hours.

Mr. SHACKLEFORD. I think we ought to have another hour. Missouri wants to be heard on this question.

Mr. TAYLER of Ohio. Well, make it six hours.

The SPEAKER pro tempore. The request is for six hours' debate, three hours on each side.

Mr. TAYLER of Ohio. And at the end of that time that the previous question shall be considered as ordered upon the resolution and substitute.

The SPEAKER pro tempore. The gentleman asks that at the expiration of six hours the previous question be ordered on the resolution. In the absence of objection this order will be made. The Chair hears no objection.

Mr. BOWIE. Mr. Speaker, it has been stated by the gentleman [Mr. SMITH of Iowa] who has just closed his remarks that the evidence in this case shows that more than 9,000 persons were illegally registered in the Twelfth Congressional district in the city of St. Louis at the last election. Now, before categorically denying the statement that the legal evidence in this case shows any such fact as that, I wish to correct the gentleman and say that the McBurney canvass, to which he alludes, and which, as I insist, constitutes the whole basis and fabric of this case, shows not 9,000 fraudulent registrations, but, if that canvass be true, it shows a fraudulent registration in six of the wards of 14,088, in precincts covering barely more than one-half of the district. And it was stated during the oral argument before the committee that the only reason that that canvass did not extend through the whole district was that they did not have sufficient time in which to make the canvass, and that the information which they had was that the false registration in the remaining precincts of the district was just as great proportionately as it was in the portion they did examine. So that if the statement be true there is, according to the theory on which the majority base their case, upon which the contestant bases his case, more than 24,000 fraudulent registrations in one Congressional district in the city of St. Louis; not 9,000, not 14,700, but over 24,000.

Now, Mr. Speaker, I assert without the fear of successful contradiction that if this were a case to be tried before the Supreme Court or in a circuit court, as against which an appeal to the Supreme Court would lie, that instead of 24,000 fraudulent registrations being shown by this evidence to exist in this one district the legal and competent evidence in this record would not show 200. I expect to demonstrate that to any fair-minded man who will do me the honor to listen to the analysis of the case that has been presented in behalf of the contestant.

In the first place I assert the proposition that when they say that in less than two-thirds of the election precincts in one Congressional district there were 14,088 fraudulent registrations they assert a proposition which challenges the credulity of any human being. It is a thing which on its face we know is not true, and it never happened in the Twelfth Congressional district of Missouri at the last election. It never happened anywhere on earth—that is, in the United States, at least; never in any Congressional district—that more than 50 per cent of the total registration is fraudulent.

Mr. Speaker, I want to call the attention of this House for a few moments to what the accusation of 14,088 fraudulent names means. These figures are obtained from page 67 of the brief of contestant's counsel in this case. I quote the table, as follows:

Ward.	Registered.	Not found.		
		McBurney.	Census.	In either.
4	3,673	2,092	2,313	1,598
5	4,771	3,111	3,139	2,443
6	5,114	1,618	1,885	956
14	4,944	2,469	2,906	2,042
15	4,052	1,603	1,881	1,060
23	4,913	1,518	1,964	1,110
Total	27,467	12,411	14,088	9,209

Now let us analyze the meaning of these figures. If out of 27,467 names registered 14,088 are fraudulent, we find the legitimate registration only 48.7 per cent of the total. Now, the complete registration in the district was 47,752. Take 48.7 per cent of this total registration and we find the legitimate registration to be only 23,255 in the whole district. Now, the population of the district in June, 1900, was 179,767, and the ratio of legitimate registration to population according to this contention is only 12 per cent. The mere statement of this proposition ought to be enough to show its absurdity, but I offer other testimony which, in my judgment, clinches it beyond all peradventure.

We have the census of the United States, which shows, first, the population of that district in the month of June, 1900, all told; second, the male population over 21 years of age in that Congressional district. We have the same with reference to every Congressional district in the United States. Now, if there were either 14,000 or 24,000 fraudulent names upon the registration list, it would swell the total proportion of registration in this Congressional district higher than in any other in the Union, for no Representative on this floor will admit that in his district any such condition of affairs exists. It will be the highest percentage of any in the United States.

If there were 14,000 fraudulent names, the result of it would be that there would be more names registered than the census of the United States showed were there, because we know, as a matter of fact, that in a closely contested election in a great city like St. Louis they always register from 80 to 90 per cent of the possible vote, and oftentimes more, and if you add to the legitimate registration, which, running between 80 and 90 per cent and in some cases a little over in less than two-thirds of the election precincts of the district, 14,088 names, we will have the case that in this Congressional district there were registered largely more names than the census showed lived there. Well, now, what does the census show with reference to that proposition? In the first place, as already shown, the population of the Twelfth Congressional district is 179,767. The total registration in that district is 47,752; the percentage which that registration bears to the total population is barely 0.26.

I am speaking of the registration, mind you, and not the vote. Unfortunately there are some wards that are fractional wards in this Congressional district, as there are in the other two Congressional districts in the city of St. Louis, but we have eight wards that are complete—eight full wards in this district. The population of males over 21 years of age, as shown by the official returns of the census, is limited to the full wards, and hence the percentage can not be carried into the fractional wards, but the fractional wards offset each other throughout the city. Now, in the eight full wards of the Twelfth Congressional district there were male inhabitants over 21 years of age, according to the census of the United States, a total of 48,704. There were only 38,439 of these who registered, making more than 10,000 less registered voters in eight wards of this district than the census showed lived there three months before the election; 10,000 less. There were only 33,397 who actually voted.

Now, what else do we find? We find that the proportion of registered males over 21 years of age to the total in these wards of this district is 78.9 per cent. The proportion of vote to population in this district—they claim over 7,000 fraudulent votes—is only 68.5 per cent, showing that 31.5 per cent of the total male population over 21 years of age in that district never voted. Twenty-one per cent never registered. What does further comparison show? It is not claimed that in the Tenth Congressional district of St. Louis there is any evidence to show there was any fraud in the registration. Upon the contrary the assertion was made in the oral argument before the committee by the counsel for the contestant that they had tested some wards and precincts in the Tenth and the Eleventh districts, now represented by Republicans on this floor, with their celebrated McBurney canvass, and it run about even, about natural, what it ought to be.

Now, let us apply that test. In the district represented by the gentleman who is now looking at me [Mr. BARTHOLDT] the total registration of males over 21 years of age was 78 per cent—within a fraction of 1 per cent of the same as the registration in Mr. Butler's district. In Mr. JOY'S district, the Eleventh, it was 78.5 per cent, or within four-tenths of 1 per cent of the same, going by full wards, you understand, because I have not got the registration by fractional wards as bearing on males over 21 years of age. Now, when we come to the vote, when you take the case of the Tenth district, we find that the vote was 72.5 per cent of the total male population over 21 years of age. In Mr. JOY'S district it was 73.5 per cent, and in Mr. Butler's district it was 68.5 per cent; right there, three districts, side by side, in the same city, two of them represented by Republicans and elected under this same law as Mr. Butler was elected under, and their registration is within a fraction of 1 per cent of the same, and their vote is in one case 4 per cent more and in the other 5, and yet they tell us that there were 14,000 fraudulent registrations and 7,500 fraudulent votes in the Democratic district.

Mr. BARTHOLDT. Will the gentleman pardon me? I have figures here to show——

Mr. BOWIE. So have I.

Mr. BARTHOLDT. That the total increase in the Republican and Democratic vote in the Butler district was something over 12,000 votes, while in the adjoining district, the district which I have the honor to represent——

Mr. BOWIE. Does the gentleman say that the total increase in the votes was 12,000?

Mr. BARTHOLDT. The increase in the total vote was 12,000.

Mr. BOWIE. At what election?

Mr. BARTHOLDT. The increase of the Democratic and Republican vote.

Mr. BOWIE. At what election?

Mr. BARTHOLDT. Nineteen hundred.

Mr. BOWIE. Over what election?

Mr. BARTHOLDT. Over the preceding election.

Mr. BOWIE. Oh!

Mr. BARTHOLDT. While in the adjoining district, which I have the honor to represent, a district which has a much larger population, the increase is but 9,000, and in Mr. JOY'S district the increase is but 7,500. And the increase in the party vote makes it still more apparent. The party vote has increased evenly in my district, and so it has in Mr. JOY'S district, while in Mr. Butler's district a Republican majority of 2,500 was wiped out and a Democratic majority of 3,500 substituted.

Mr. BOWIE. "I thank thee, Rhoderick, for that word." In the Twelfth Congressional district of the city of St. Louis, in 1896, when the election was held under the celebrated and much-lauded Filley law, the vote was only 2,000 less than it was in 1900 under the much-denounced Nesbit law. Those were Presidential years, and it is fair to compare them. And when you run the comparison down further, you will find that, making allowance for the increase of population between 1896 and 1900 at the same ratio as the population increased between 1890 and 1896—in other words, proportioning the increase of population fairly between the two periods—the vote and the registration under the Filley law in 1896 in this district was higher than it was in 1900 under the Nesbit law.

Mr. BARTHOLDT. Has the gentleman taken into consideration the fact that this district is a business district, situated in the heart of the city, and that a migration has taken place from these business wards out into the outskirts on account of the rapid-transit facilities which have been inaugurated in the city, so that the increase in the district represented by Mr. Butler is naturally not as large as it would be in other districts?

Mr. BOWIE. Well, I do not know anything about that, but I say that the record shows that the vote in 1896, under the Filley law, was a greater per cent to the total population than it was in 1900, under the Nesbit law.

Now, I want to call the attention of the members of this House to some further figures which I have on that subject. The gentleman who has just taken his seat [Mr. SMITH of Iowa] claims that there are over 9,000 names not found either by the census or the McBurney canvas, 14,000 not found by McBurney, and over 12,000 not found by the census, 9,000 not found by either. Now, bear in mind the fact that Mr. Butler's total vote in proportion to the male population was 68.5 per cent, and that his total registration to male population was 78.9. Now, let me apply those same figures to the Congressional district of the gentleman who has just argued this case on behalf of the majority. I have the official figures of the Ninth Iowa district. That district had a population in June, 1900, of 202,253, and of males over 21, 56,135, with a total vote of 47,858. I have not the registration, but the total vote. The percentage of votes to population is 23.6, or more than it was in Butler's district. The percentage of votes to males over 21 years of age was 85.2, against 68.5 in Butler's district. And yet there is nobody charges that there were either 7,000 or 9,000 or 14,000 or 12,000 fraudulent votes in his district. And it shows a larger per cent of votes to population and a much larger per cent of votes to male population over 21 years of age.

And I want to carry the comparison a little further. I want to take the case of the Eighteenth Ohio district, represented by the distinguished chairman of this committee [Mr. TAYLER of Ohio]. The percentage of that vote to population was 24.6, or 1.6 per cent more than it was in this district, and the percentage of votes of males over 21 was 82.4, or about 4 per cent more than the registration in Butler's district.

Take another one, the Tenth Indiana district, represented by the gentleman from Indiana [Mr. CRUMPACKER]. The percentage of votes to population is 26.2, or more than 3 per cent greater. The per cent of votes to males over 21 is 88.3, against 68.5 of vote, or 78.9 of registration in Butler's.

In every case that I have cited the per cent of votes to males over 21 years of age is greater than the per cent of registration to males over 21 years of age in Butler's district.

I could carry it further. I could take the district represented by General GROSVENOR, of Ohio, where the percentage of votes was 89.2 of males over 21 years of age and the percentage of votes to population was 24.1. I could take a number of others which I have here, which I will not take the time to refer to, but I dare assert this proposition. That in a hotly contested election, in what we call the close States of this country, that in more than two-thirds of them, in over half of the districts represented by Republicans in this House, the percentage of votes was greater than it was in Butler's, and the percentage of votes in many of them was greater than the percentage of the registration in Butler's.

Now, I have shown that, with these facts staring us in the face, I assert that it was a physical impossibility for this thing to be true. Here was a Republican district, they say. It has gone Republican three times in twenty years. Here is a district which has gone Republican three times in twenty years, the last two prior to this being Republican. Here was a closely contested election, in a city where everybody lives within a few hundred yards of the polling place, and only 68 per cent of the total possible vote was cast, and only 78 per cent of the total possible registration was made. I say that it staggers anybody's credulity to say that there were 14,000 fraudulent registrations under those circumstances, or even 9,000.

Now, what else do we find? The idea of 14,000 fraudulent registrations is based upon a political canvass made by paid employees of the attorneys of the contestant. They took about six or seven days to make it. The canvassers were paid the munificent sum of 2 cents a name. It was made six months after the census was taken. It was made in the month of December, when the town was full of people as compared with what it would be in June. There were more people, as everybody knows, in the city of St. Louis in December, 1900, than there were in June, 1900; and yet what does this canvass show in the eight wards of the city of St. Louis? It shows in the eight wards of the city of St. Louis that Mr. McBurney found 9,000 less people than were found by the census in June. I will read it by wards.

McBurney found in the Third Ward 5,612 males over 21 years of age. The census, six months before, found 6,522.

In the Fourth Ward McBurney found 3,553; the census found 5,517.

In the Fifth Ward McBurney found 4,032; the census found 5,833.

In the Sixth Ward McBurney found 5,285; the census found 6,260.

In the Fourteenth Ward McBurney found 4,291; the census found 5,351.

In the Fifteenth Ward McBurney found 4,465; the census found 5,979.

In the Twenty-second Ward McBurney found 5,491; the census found 5,963.

In the Twenty-third Ward McBurney found 5,209; the census found 5,454.

Total in eight wards found by McBurney, 37,938; by the census, 46,940; or 9,002 more male inhabitants over 21 years of age found by the census in June than by McBurney's canvassers in the same territory in December of the same year.

Now, Mr. Speaker——

Mr. WILLIAM W. KITCHIN. Will the gentleman allow me to ask him a question right there?

Mr. BOWIE. Certainly.

Mr. WILLIAM W. KITCHIN. Is the correctness of McBurney's canvass essential to the success of the contestant?

Mr. BOWIE. Assuredly.

Mr. MANN. Oh, well—will the gentleman yield?

Mr. BOWIE. Certainly.

Mr. MANN. The contestant or the report would be sustained either upon the McBurney canvass or the census canvass. Is that not so?

Mr. BOWIE. No, sir.

Mr. MANN. Would it not be sustained upon the census canvass?

Mr. BOWIE. No, sir.

Mr. MANN. Does the gentleman claim that the census canvass does not show that there are at least 9,000 registered voters not found by the census officials?

Mr. BOWIE. Why, certainly, on the compilation as they state it to us it shows that there were 12,000.

Mr. MANN. Is it not a fact that there were at least 9,000 voters who were registered who were not found on the census canvass in this district?

Mr. BOWIE. Speaking truthfully, no; speaking literally, according to the compilation as made, yes; and I will explain myself. The census shows that in eight full wards, which I read a while ago and which I have in my hand, there were 10,000 more people over 21 years of age there in June, 1900, than were registered in November, 1900. In other words, the register was 10,000 short in eight wards; and the fact is, as I expect to demonstrate,

that there were a great many people—and the evidence shows it in this record—who moved between the time when the census was taken and the time registration was closed; there were people who not only moved, but people who died; not only people who died, but mistakes were made in the census and in the registration; so that, truthfully speaking, the statement the gentleman makes is not a fact.

Mr. MANN. Well, that is an argument. I did not want the gentleman to be misled. Is it not a fact that there were 9,000 names of persons on the registration list whose addresses were not found by the census officials under those names?

Mr. BOWIE. At those addresses. That is what is said by the compilers. I do not dispute it, nor do I know anything about it.

Mr. MANN. I understood the gentleman did not dispute it; we all know it to be a fact, but I thought his answer to the gentleman from North Carolina was misleading in that respect.

Mr. WILLIAM W. KITCHIN. Let me ask the gentleman from Illinois does he depend on the correctness of the McBurney report?

Mr. MANN. So far as I am concerned, I do not depend on the correctness of the McBurney report.

Mr. TAYLER of Ohio. If I may answer that—and I think the gentleman from North Carolina wants information—I am sure the gentleman from Alabama does not intend to give anything but his view of the case. We do not depend, in any serious sense, upon the McBurney canvass. It is a mere incident in this inquiry. Our conclusion—and I speak for five of my colleagues—would be as certainly what it is now if the McBurney canvass had never been taken.

Mr. WILLIAM W. KITCHIN. Does the gentleman contend that the McBurney canvass is correct?

Mr. TAYLER of Ohio. I think it is practically correct—as correct as any well-taken directory would be; but I think there are objections that are applicable to the McBurney canvass technically considered.

Mr. WILLIAM W. KITCHIN. I understand the gentleman from Alabama has shown conclusively that the McBurney canvass can not be correct if any reliance can be placed on the census.

Mr. TAYLER of Ohio. Oh, I think the McBurney canvass is practically correct; I think it is the most accurate thing of its kind.

Mr. WILLIAM W. KITCHIN. But it shows a discrepancy of several thousand between that and the census.

Mr. TAYLER of Ohio. But that is as easily demonstrated on the other side as my friend demonstrates it on his side. It is one of those interesting logical processes.

Mr. BOWIE. Now, Mr. Speaker, I assert that there is no basis for this case unless the McBurney canvass is relied upon, the gentleman's disclaimer to the contrary notwithstanding. Unless that canvass is actually accepted as speaking the truth in this case there is not a single peg for this case to stand upon.

The gentleman from Illinois suggested that the same thing would be shown by the census. It is asserted by the compilers of the figures—and none of us have verified them; we have all accepted the compilers's statement; no member of the committee undertook to verify them—it is asserted by the compilers that there were 12,000 names found in the registration that were not found by the census under those names at the same addresses. I submit that it is not competent evidence; that it does not prove anything; that it does not justify any judgment, because the same proof shows that a census enumerator found 10,000 more men in June than were registered in November in the eight wards.

Mr. MANN. Do I understand the gentleman's position to be that if a man registers and he did not live at the place that he registered from, that that is offset by a man's registering at some other place?

Mr. BOWIE. No; but in connection with the argument I have made, that there was a smaller registration here than there was in over one-half of the Congressional districts of the United States; that there was a smaller vote here than in over half of the Congressional districts in the United States; in the face of the fact that we know that between the months of June and November men move away and men die, and in the face of the fact that we know that mistakes are bound to be made both in the census and in the registration and in the compilation; in the face of all these facts it can not be seriously contended that a partisan compilation from United States census is competent evidence for any purpose, any more than the McBurney canvass. We can refer to it for the purpose of showing how many males were found there; but to show that A lived in a certain house in June, 1900, does not show that he is an incompetent voter merely because A registered from another house in October or November. The vice of the proposition is that the period of taking the census is not contemporaneous with that of the registration, and the evidence we have of the census is not the original copy, but is secondary evidence of the most vicious type.

Now, who is to say how many men moved in the city of St. Louis in these three months? Who is to say how many men died? Who is to say how many mistakes were made by the compilers? Who is to say how many mistakes were made by the enumerators? Who is to say how many mistakes were made by the registrars? There is not a single thing in the alleged discrepancy between the census and the registration inconsistent with perfect honesty and fairness. Now, the gentleman says that they do not rely upon the McBurney canvass, and yet they make the McBurney canvass the basis of their report, declaring that Horton is not entitled to a seat on this floor. It runs through all the argument of counsel from beginning to end, and runs through the majority report in this case in more than a dozen instances.

Now, what is the McBurney canvass? I want to read you what Mr. McBurney said his canvass was. I read from the testimony as printed on page 269 of the record:

Q. What, if any, information had you concerning the population in various districts and parts of the city by which you could judge whether the returns of these men were accurate or not?
A. I did not have any. I had them, but I did not compare them.

Again, I read from page 270. Mr. McBurney was asked this question:

Q. Now, you say the canvassers returned to you certain houses as vacant What did you do in such a case in order to test the original report of the canvassers?
A. Well, the original report of the canvassers was taken and jotted on the registration list opposite the registration.
Q. In such cases did you send out a second time in order to get information about those houses that were reported vacant, if, in fact, it appeared from the registration list that any persons were registered from those houses?
A. No, sir.

Now I want to read from the testimony of Mr. Moone, as printed on page 331 of the record:

I obtained—went to the door and obtained all the information necessary under the instructions, calling for the names of every male living in the house at that date of the age of 21 or over. I always got the information through the parties, the head of the family, or whoever came to the door.

On page 335 he was asked:

Q. Did you receive any information or instruction when you went out these first six days, or at any other time, to make inquiries as to whether the men whose names you would find at certain numbers were registered from there or lived there on election day and prior thereto?
A. No, sir; nothing was said about election day.
Q. As I understand it, your sole instruction and the sole inquiries you made was, did they live there at that time?
A. At that time.
Q. Namely, the day you visited the house?
A. Yes, sir.
Q. And you commenced about the 20th of December?
A. I think that was the day; yes, sir.
Q. And ended it some time this last week?
A. Well, in the first six days it really ended.
Q. After it really ended you went back?
A. Well, I was hired to do some work over again.
Q. After you had done the work in Judge Fisse's office—McBurney's office?
A. Yes, sir; McBurney's office.
Q. And this was not connected with the World's Fair statistics, but was an election contest? You understood that, did you not—that your work was to ascertain whether men were correctly registered at those numbers?
A. I did after that; yes, sir.
Q. Now, after you understood that, you would go to these houses—such as Mr. Shapleigh's house—and would you make an inquiry as to whether or not he lived there on election day and prior thereto?
A. No, sir.
Q. Knowing it was about an election contest and for the purpose of ascertaining votes fraudulently registered, this canvass of yours being made long after the election, why didn't you make those inquiries?
A. I was not told to.
Q. Yes; but why didn't you anyway?
A. Well, I wasn't instructed to.

* * * * * * *

Q. Well, where you find a man died about the 1st of January, as is your recollection in the case of Mr. Shapleigh, and you were making that canvass for the purpose of ascertaining whether or not he was correctly registered there on election day, why didn't you make further inquiry?
A. I wasn't instructed to do it, and I didn't do it.
Q. You didn't do it?
A. No, sir.
Q. Now, that is true all over the district canvassed, isn't it?
A. Yes, sir.

* * * * * * * *

Q. And where you found Mr. Shapleigh dead, and was satisfied from the vicinity that he had lived there a long while, you reported his name as not found?
A. I didn't put it down at all. I just put down the coachman's name.

That testimony shows how this alleged canvass was taken. These canvassers went there the last week in December. They went to the doors of houses and asked anybody who came to the door who there was over 21 years of age living there at that time. They got some of the names down and some they did not. They put down whatever name was given them by anybody who came to the door. This canvass was the last week in December, a few of the canvassers extending their work into the first few days of January.

That is the McBurney canvass. Did those canvassing officers themselves come here and go upon the witness stand and swear that they made this canvass fairly? There were 57 of them. One man did go on the witness stand and testified just what I have

read to you from his testimony as to what he did. The other 56 did not testify at all. There was no opportunity to put the testimony of a single one of the McBurney canvassers to the test of cross-examination except in the case of Mr. Moone; and his testimony shows that it is utterly unworthy of credit, because he said he asked just anybody who came to the door to answer his questions. No other one of the canvassers was put upon the stand. These others make ex parte affidavits; they talked the matter over with an employee of the contestant; and he makes a compilation. Now, let us see what is the value of that compilation.

Mr. VANDIVER. Allow me to ask the gentleman whether those men who took that count were sworn as to the results, and were they cross-examined?

Mr. BOWIE. No; they were not examined judicially. They made an ex parte affidavit on a printed blank after they came back with such information as they had.

Mr. MANN. Does not the gentleman think that if they had been put on the stand and cross-examined the cross-examination would be continuing now?

Mr. BOWIE. No, sir; I do not.

Mr. MANN. Does not the gentleman think they would have had to examine about every man whose name was on the list?

Mr. BOWIE. No, sir. The gentleman from Illinois might have tried his case that way; but the gentlemen who represent the contestee did not. Take this record of over 2,000 printed pages, and I will show to any man who will take the trouble to investigate it that there was four times as much time spent on the direct examination as on the cross-examination.

There is not a single thing to indicate anywhere that any attempt was made to unduly prolong the examination, not one. They took up four times the time in the direct examination as was taken up in the cross-examination, and, what is more than that, if they had undertaken to do a thing of that sort this committee and this House would have the right, and it would have exercised it, of granting time to complete it. Such a thing never would have happened.

Mr. MANN. Is it not true that the gentleman himself, in one of these cases we had, insisted upon not considering evidence because it was not put in at the time?

Mr. BOWIE. Who; I?

Mr. MANN. The gentleman from Alabama.

Mr. BOWIE. What case?

Mr. MANN. In the Burnett case.

Mr. BOWIE. The committee unanimously found BURNETT was elected.

Mr. MANN. Yes, and disregarded evidence that was taken after time, in which opinion the gentleman from Alabama very cheerfully joined.

Mr. BOWIE. Yes, because that man was right there in reach of the attorneys for the contestant for the forty days during the first examination and for the last ten days in the rebuttal, and was not examined until three months after the time had run and they got him in the office of the lawyers in the city of Birmingham and got him to sign an affidavit as to what his testimony would be, after he was fixed, and that man's testimony shows that he is utterly unworthy of belief by any human being. [Applause on the Democratic side.] It ought to have been excluded, but so far as I am concerned I have to say that the question of the exclusion of that testimony was never discussed before the committee except by the lawyers in the case. The majority of the committee came in and announced that they thought that Burnett was entitled to his seat, and we thought so, too. That is all that happened at the meeting of the committee.

Now, what has this House itself said with reference to such testimony as this McBurney canvass? Here is a case that was decided more than forty years ago. I desire to call the attention of the House to the contested-election case of Whyte *v.* Harris, from the State of Maryland, in 1858, forty-four years ago, in which a similar canvass was attempted to be introduced in evidence, and the response which the committee made to that attempt and the judgment of the House upon the report of the committee:

> Hearsay evidence is uniformly incompetent to establish any specific fact which in its nature is susceptible of being proved by witnesses who speak from their own knowledge. That it supposes something better that might be adduced in the particular cases is not the only ground of its exclusion. Its intrinsic weakness, its incompetency to satisfy the mind as to the existence of the fact, and the frauds which may be practiced under its cover, all combine to support the rule that hearsay evidence is wholly inadmissible.
>
> [The exceptions to the rule are well known, such as cases of pedigree, inscriptions on tombstones, etc.] Chief Justice Marshall, in the case of Minor Queen *v.* Hepburn (7 Cranch, 290) emphasizes this doctrine in saying that "all questions upon the rule of evidence are of vast importance to all orders and degrees of men; our lives, our liberty, our property are all concerned in the support of these rules, which have been matured by the wisdom of ages. One of them is that hearsay evidence is totally inadmissible." This rule was also strictly applied in an election case in the English Parliament, cited in Rogers' Law and Practice of Elections, page 172, where "it was proposed that a witness should be sent for to prove a conversation with one Delande, upon the ground that he (Delande) could not be found to be served with the speaker's writ, but, on argument, it was refused."

Continuing further, it is said:

> We regard the contestant's proof on both these points as wholly vicious and inadmissible. Lists are filed by him of names of persons in the different wards who, it is claimed, did not vote because they were "intimidated." These lists are obtained, as the evidence shows, by sending men into the various wards, who, dividing them into different districts, make out separate lists of such persons as they are assumed to have seen or heard from, stating that the persons whose names they thus returned were "intimidated." They do not state, except in comparatively isolated cases, that they knew the persons to be qualified voters, or what was the ground or reason of what they called their intimidation. In a vast number of cases they do not know, personally, those they see; many they do not even see, personally, but get the information they report from their wives, their children, their neighbors, or their landlords, and then, to add to the absurd insufficiency of such proof, in the case of a number of these lists, they are put in evidence by the person who makes up the general list filed from these separate lists thus handed in to him, and the separate lists, in many cases, are not proved by those who collected the information in them, and many of these persons are not even put upon the stand.
>
> A greatly stronger case than the one now being considered, because the alleged census was at least directed to the facts as they were supposed to exist at the time of the election, whereas in the present one the test of a man's legitimacy as a voter is not whether he resided in the precinct at the time of his registration, but whether he continued to reside there for several months later

Now, Mr. Speaker, the House decided that the minority of the committee which made that report was correct and refused to unseat the contestee upon such evidence as that. Moreover, I have here in my hand Mr. Rowell's Digest of Contested Election Cases, from which I will not read, but which shows that since the organization of this Congress there has not been a single case in which evidence of this sort was not spurned by the House of Representatives. In every case where hearsay evidence was sought to be introduced the majority and the minority of the committees have declared that it was illegal and refused to accept it. I have plenty of authority here from the highest courts of the land to the same effect in contested election cases. This is the only case in the history of this Congress in which evidence of this character has been admitted and upon which it has been sought to deprive a man of a seat upon the floor of the House.

In this McBurney canvass, take the case of Mr. Shapleigh, president of the Shapleigh Hardware Company, a concern doing business all over the United States, who died two months after the election was over. Yet in the McBurney canvass he goes down as a fraudulent voter.

Take the case of Mr. Thomas C. Henning, one of the most prominent lawyers in the city of St. Louis, who lives at the Jefferson Club. The canvasser went there and asked of "whoever came to the door" the names of those over 21 years of age who lived there, and the man gave him the name of T. Henning, or possibly T. C. Henning, or possibly Thomas; but at any rate the canvasser put him down as T. Henning, and on that they put this man down as a fraudulent voter, because it did not happen to be T. C. Henning.

Take the case of Eugene Johnson. He is registered as Eugene Johnson. The canvasser puts him down as E. Johnson, and yet he goes into this record as a fraudulent voter.

Take the case of the man who testified as a witness for the contestant and who was not found by the McBurney canvasser, Mr. Sam W. Dicks. Here is his evidence in the record, and yet he was not found and was put down as a fraudulent voter.

Now, it was asserted by the gentleman from Iowa a few minutes ago that this McBurney canvass is entitled to the same credit and is as carefully prepared as the city directory, and the majority of the committee in their report undertake to give us the result of an examination into what the city directory of St. Louis shows with reference to certain persons to whom registered letters were sent.

I wish to call the attention of this House to the fact that the canvass for the city directory of St. Louis for 1901 was made concurrently with the McBurney canvass and about the same time these witnesses were testifying; yet that city directory shows that 309 of the witnesses who testified for the contestant in this case do not live at the places where they said they lived. They offer the St. Louis city directory in evidence. They examined 929 witnesses, and the St. Louis city directory shows that 309 of those witnesses did not live at the places given by them in their sworn testimony in this record.

The McBurney canvass is entitled to the same credit as the St. Louis City Directory, they say, and they ought to add that it is entitled to no more credit! Three hundred and nine witnesses swore in this record that they lived at certain places, and the St. Louis directory, taken at the same time, says that they did not.

It is upon such testimony that the case of the majority rests.

That is the character of testimony on which this House is asked to declare this election null and void. There were 57 of McBurney's canvassers engaged in this work about a week, and 19, or more than one-fourth, of them are not found in the city directory of St. Louis. The majority of this House ask us to turn out a man on a census taken in January, when there was a chance for thousands of men, not hundreds, to move; a second chance of

many hundreds at least to die; a third chance for thousands of mistakes in the first enumeration; another chance for thousands of mistakes in the compilation; a still further chance for the registrar to get the name or the initial or the residence address wrong. All of these chances, and yet not one of them taken into account by the majority of the committee.

Judge Smith says that if we reject this McBurney canvass it makes it worse for the contestee. Turn a man out because this compilation, made by the contestant in January, 1901, found that it did not exactly correspond in name, in initials, in residence, or something of that sort with the census taken six or seven months previously. It is the most preposterous proposition that ever was presented to the House of Representatives; a greater outrage, in my humble judgment, was never attempted. They talk about frauds that were committed there. I say that to rely on the census or on the McBurney census under those circumstances, and to hold that either of them, singly or collectively, by themselves or added together, are a proper basis to deprive a member holding the certificate of a sovereign State to his right to a seat in this House, is a greater outrage upon justice than anything which they charge upon the Democratic party in the city of St. Louis.

Now, Mr. Speaker, it was said that the law of 1895, known as the Filley law, was changed in 1899. I have already shown that under the law of 1895 there was a larger percentage of registration and vote than under the law of 1899; and if the law of 1899 permitted these pretended fraudulent practices, what must have been the law it superseded? It is said that 53 of the gentlemen who were appointed to represent the Republican party in five of the wards of this district voted for Mr. Butler. I do not know whether they did or not. I have not verified the statement; and hence I will let it pass without a contradiction; but over and against it I shall set the proposition that in every one of the wards referred to by the gentleman from Iowa excepting one only, the officers, judges, and clerks appointed to represent the Republican party were appointed upon the recommendation of the local Republican committeemen, the chairman of the committee for the precinct in question.

And in the only one to which there is an exception we have the evidence that there were factional differences between the Republicans and the Republican representative on the board of election commissioners. Mr. Kobusch made the motion that representation be divided between the opposing factions. That fact is undisputed. It is in the record. It is proven by the testimony of the contestant's witnesses that where they had two Republican factions contending for supremacy in a particular ward, on the motion of the Republican member of the board of election commissioners the representation was divided. In all the others, the Republican committee—the chairman of the committee—selected his own representatives, both judges and clerks; and if they selected men who for any reason were unable to vote for Mr. Horton I submit that it is no reason why this House should declare that election null and void and turn this man out of his seat.

The Republican quota in this district was 348. The Republican committeemen—the regular committee which had charge of Horton's campaign—recommended all but 21 of the 348 names, and these 21 were appointed upon the recommendation of the opposing political factions in the Republican party in the city of St. Louis upon the motion and at the instance of the Republican election commissioner, and every one of them took an oath that he was a Republican at the time he was appointed. This is the record. It is impossible to conceive a just law more justly administered.

But gentlemen say that there was a remarkable change which came over that district. I have already alluded to the fact that in the last twenty years the Democratic party carried that district seven times and the Republican party carried it three times, and two of the times that the Republican party carried it were in 1896 and in 1898, when the Democratic party in the city of St. Louis was torn to pieces over the money question.

For sixteen years prior to that time the district had gone Democratic in every election but one. The Democratic party was in the midst of great dissensions in 1896, and the Republican party nominated a strong man and he was elected. The same thing happened in 1898, but by a largely reduced majority. In 1900 in the precincts that I am going to read you from the record, in the precincts where the Republican precinct committeemen got every judge and every clerk of their own selection, in those wards where there is no single judge or clerk but what was appointed by supporters of Mr. Horton, what does it show? The Democratic party in 7 of those wards gained 4,599 votes; the Republican party in 5 of them gained 563 votes; a net Democratic gain in 12 wards of St. Louis, where the Republicans had their own judges and clerks of their own selection, of 4,036.

Mr. Pierce's majority, the Republican nominee in 1898, was 2,321. Subtracting that from the Democratic gain in districts where the Republicans had their own representation and wipe out all the balance and Butler has a majority of 1,715. Add to it the Democratic gains in those precincts in the other wards where the regular Republicans got their own men and the majority is about 3,000. That is the history of this district. That is the condition of affairs.

Now, what else do we find in that district going to show that Butler was fairly and honestly elected? We find, as I say, that it is a Democratic district, and it only went Republican because of the split on the money question. In 1900 the Gold Democrats came back into the party in that district in the city of St. Louis, and there were no factional differences. That fact is abundantly attested in the brief of the counsel for the contestant. The Democratic party got together in that district, and it was easy enough to restore the Democratic majority. But that was not all by any means.

The Republican party nominated the most unpopular candidate that they could put out if they had scraped the district with a fine-tooth comb. The history of this case, as this record shows, shows that after Horton was nominated, it being understood that he was the candidate of Baumhoff, the traction magnate of that city, the celebrated strike of the street car employees occurred. I can not go into all the details of it, but it is sufficient to say that it shook that city from center to circumference as nothing like it had ever done before.

Mr. Baumhoff was hung in effigy in dozens of places in the city of St. Louis. His name became a by-word and a hissing. Mr. Horton was his candidate, and organized labor took up the fight and almost to a man supported Mr. Butler. Added to that, the fact is that heretofore the negro vote in that district, which amounts to five or six thousand, had been going almost solidly Republican. At this time the colored Butler Republican club was so numerous in St. Louis that you could hardly count the number of the clubs. Mr. Butler polled a large percentage of the negro vote in that district. You add the normal Democratic majority in the district, when both factions of the party are united, and then add that part of the labor vote which had been going Republican, and add to it the large negro vote which had been going Republican, and you find out where the majority for Butler came from. He got all of it, in my judgment, fairly and honestly, unless there was some slight mistakes made in the count.

The gentleman from Iowa says that it is admitted that there were 400 fraudulent errors in the count. There is nothing of the sort. There were over 41,000 votes cast in that district, and a recount made under auspices of the contestant, two months after the election, and that only shows a discrepancy of 403 out of over 41,000 votes. There is just as much likelihood of fraud in the recount as there was in the original count.

But in any case it is by no means improbable that a mistake of a few hundred would be found in a recount of over 40,000 ballots. There is nothing at all remarkable in it; there is no evidence of fraud of any kind.

But they say they have independent evidence of men who canvassed these election precincts. They have a few cases, they have got perhaps 200 or 300 instances in all shown by men who went around and made a pretense of canvassing on the day before the election that was infinitely better than the infamous canvass made by McBurney. In one precinct, the worst place they have, the very worst, three men went around and said there were 67 men registered that they could not find.

Mr. McBurney's canvass shows there were 147 that he couldn't find. As a matter of fact, it is not shown that these 67, because they were not found, were illegal. One of the men who made the canvass testified that he was a city employee and under this Republican administration, he was instructed to go around and make a political canvass of his precinct on the day before election, and his time would run on at the office. The city of St. Louis paid this canvasser for his time while he served the Republican party, and of course he had to bring in something of a showing, and he brought in 67 names. But the Republican precinct committeemen in other precincts who come and testify, some of them put one man down that they couldn't find, and some of them put a half a dozen. One of them puts down 15; and that was at the headquarters of the Republican party in his precinct. There is not a single one, barring this case of this employee of the city, whose time was running while he was serving the Republican party—there is not a single one that puts down over a dozen, except in this case where the registration was made at the Republican headquarters. In every similar case McBurney reports from 150 to 200 not found.

Now, against that testimony what do we have? The law of the city of St. Louis—this much-denounced law—provides that the two clerks—the Republican clerk and the Democratic clerk of each precinct in the city of St. Louis—shall go to every house in the various precincts with a certified copy of the registration list, to find out if the men whose names are on the list are there;

and if they are not there it is the duty of these two clerks, or either of them, to report such fact to the four judges sitting as a board, and notice is served upon any man who is not found or who they think is fraudulently registered, that notice being by personal service, if possible, or if not, they must try to reach him through the mails, and if he does not come up and make proper explanation his name is stricken from the list. These clerks in every precinct in this Congressional district—Republican and Democratic—took a certified copy of the registration list and went through every precinct in the district. These men made that canvass under oath. They were representatives of both political parties; and then there was the board of judges, who were representatives of both political parties; and provision was made for giving notice through the mail when a man could not be found, and every man in regard to whom there was any suspicion, every man who was found to be fraudulently registered, had his name turned in, and those names were stricken from the list before election day.

Here was a canvass made under the law, under the oaths of the officers of the law—made to officers of the law in every precinct of the city—made a few days before the election—after the registration book had closed; and yet they tell us that because the compilers of this political canvass and the employees of this contestant report to us that there is a discrepancy in the initials or in the addresses of some of the names—that this must be set off against the sworn report of the officers of the law acting in the discharge of their duties under their oaths! I say, gentlemen, that it would be a shame upon the House of Representatives if a man were denied his seat in this Congress on such a case.

Ah, but they say they discovered that a fraudulent registration was going on, and that they sent out registered letters for the purpose of testing the fraudulent registration. Did they send out 14,000 of such letters—did they send out 20,000, did they send out 12,000, or did they send out 9,000? Not a bit of it.

Mr. SMITH of Iowa. Will the gentleman allow me a question?

Mr. BOWIE. Surely.

Mr. SMITH of Iowa. It is a fact, is it not, that at the time these letters were sent out the parties who sent them out were not in possession of copies of the Federal census and had no method of locating or determining those 9,000-odd names that should have been on the list?

Mr. BOWIE. I do not know whether they had the Federal census or not. I presume they had not.

Mr. SMITH of Iowa. Does not the gentleman know that the Federal census had to be put in in rebuttal; that it was not even copied in time to be put in in chief?

Mr. BOWIE. I know that they did not have this document that we had.

Mr. SMITH of Iowa. They did not have the McBurney canvass and they did not have the Federal census?

Mr. BOWIE. No, sir.

Mr. SMITH of Iowa. So that they had no means of knowing these names until after those letters had been sent out?

Mr. BOWIE. Certainly they did not know anything about the McBurney canvass, and they did not have the copy of the Federal canvass which they have since put in evidence. But I know that under the law in Missouri it was required that each of the election precincts should as nearly as practicable have 400 voters. Of course in some cases the number went, of necessity, above that and in some the number below, so as to avoid splitting up blocks. But that was about the average under the law of the State. And I do know that the Republican precinct committeemen elected by the party authorities made canvasses. I do know that the Republican clerks and the Democratic clerks made canvasses under oath, and under the penalties of the law.

Mr. SMITH of Iowa. Will the gentleman permit me to ask him one further question?

Mr. BOWIE. Certainly.

Mr. SMITH of Iowa. Is it not a fact that, when these Republican committeemen went about, there is evidence here that the keepers of these lodging houses in which we now claim these frauds largely took place would go out and bring in lists that had been furnished them and check them off and say, "Yes, that man lives here; yes, that man lives here," and the like? Is there not evidence to that effect?

Mr. BOWIE. In one instance one man so testifies, and there is a dozen in which the committeemen themselves say that there is not a single man on the list that did not belong there.

Mr. SMITH of Iowa. And is it not a fact that these Republican clerks that the gentleman is talking about largely voted the Democratic ticket?

Mr. BOWIE. No, sir.

Mr. SMITH of Iowa. You say there is not a large percentage of those clerks that you present us with and labor Republicans that voted the Democratic ticket?

Mr. BOWIE. I admit that you state it, and I do not dispute it. Your committee stated that you had found fifty three or four clerks and judges——

Mr. SMITH of Iowa. Sixty who voted against our ticket.

Mr. BOWIE. All right, put it sixty. But did not all vote for Butler?

Mr. SMITH of Iowa. Not quite. Fifty-four voted for Butler.

Mr. BOWIE. All right. I admit that you stated you made an examination of the ballots and you found those sixty or fifty-four, whichever it is, who voted for Butler.

Mr. SMITH of Iowa. In five wards out of fifteen.

Mr. BOWIE. Did you examine the others?

Mr. SMITH of Iowa. No, sir; we did not.

Mr. BOWIE. Then you ought to have done it, if you thought it was worth anything to you. The Republican quota was 348 in that district, and one-sixth of them, you say, voted the Democratic ticket.

Mr. SMITH of Iowa. And you do not dispute it.

Mr. BOWIE. And I say that four-fifths of those who voted the Democratic ticket were appointed upon the recommendation of the Republican committeemen.

Mr. SMITH of Iowa. The Good Government League?

Mr. BOWIE. No, sir; the supporters of William M. Horton, and the balance of them under the resolution offered by Mr. Kobusch, from the contesting factions, and everyone took an oath that he was a Republican. That is what I say.

Mr. POWERS of Maine. And then voted the Democratic ticket?

Mr. BOWIE. No, sir. There were others running in that election besides Congressmen. There was a municipal election and a national election for President, and because some of these men who had hung Mr. Baumhoff in effigy, some of them who thought they were ground down by Mr. Baumhoff in that strike, some of these laboring men, said that they would not vote for two men on that ticket, did not prevent them from being Republicans, and it did not interfere with the fact that they were honorable men, not a bit of it, and would make an honest canvass. Now, I want to call attention to the testimony of the Republican committeeman, the chairman of his ward, Mr. Patrick H. Clark, and read what he says about the condition of affairs in the city of St. Louis.

Q. You remember, as a matter of course, the street-car strike in this city during the summer last past?
A. Yes, sir.
Q. Between the management of what is commonly known as the Transit Company and their employees?
A. Yes, sir.
Q. You remember, of course, that Sheriff Pohlman swore in about 1,000 men that constituted what he was pleased to call a posse comitatus, arming them with shotguns, do you not?
A. Yes, sir.
Q. Do you remember that public feeling ran very high in the city of St. Louis on account of that strike?
A. Yes, sir.
Q. And that the citizens, regardless of party, were greatly divided on account of the strike?
A. Yes; no doubt about that.
Q. That it even went so far as to create more or less personal feeling between the citizens?
A. Yes, sir.
Q. Do you remember that these men were uniformed and that they were in charge of men with a quasi military title, such as "colonel," "lieutenant," "captain," etc., in which Mr. Fisse, the chief counsel for Mr. Horton in this matter, was known as a captain, or general, or brigadier, or something or other, and in which Mr. Chester H. Krum, also counsel for Mr. Horton in this matter, was known by some quasi military title, and also in which Mr. Charles Broadhead, counsel for Mr. Horton in this matter, was a prominent officer, and also in which Mr. Charles W. Holtcamp, counsel for Mr. Horton in this matter, was known as a captain, or chaplain, or something, and also Mr. A. C. Orrick was known as a first lieutenant or leftenant; also in which Mr. Arthur Shepley, counsel for Mr. Horton, took a prominent part; do you know of that organization known as the posse comitatus, such as I have described?
A. Yes, sir.
Q. You know, also, that these men, under the able leadership of these able generals paraded the streets of St. Louis and made themselves very obnoxious to citizens of certain quarters, particulary so in South St. Louis?
A. Yes, sir.
Q. Do you know, too, by public rumor, press reports, and matters of public knowledge, that a great many men were shot down by the rank and file of this posse comitatus?
A. Yes; I read of it.
Q. You know, also, that several men were killed by members of this posse, supposedly?
A. Yes, sir.
Q. At all events, they were killed in a disturbance between the striking men and the posse?
A. Yes, sir.
Q. And that an inquest was held over the bodies of those dead citizens before the coroner, and that the coroner's jury returned a verdict of "unjustifiable homicide?"
A. Yes; I have read of that, too.
Q. You know that men congregated daily upon the street corners and in the hotels and around the grocery stores, and that that was almost the sole topic of discussion?
A. Yes, sir.
Q. You know, too, at this time, that Mr. Baumhoff was the acting spirit on behalf of the railroad company, and he occupied the position of general manager of the railroad company?
A. Yes; he occupied that position, and occupies it now, I guess.
Q. And do you know, of your own personal knowledge, or through the public press, that Mr. Baumhoff was hanged in effigy from the trolley poles and from lamp-posts, and other places all over town?

A. Yes, sir.
Q. So high did public sentiment run. Following this strike, Mr. Horton was nominated by the Republican party for Congress?
A. You have got that wrong; he was nominated before that strike.
Q. Before the strike? Very well. Do you know as a matter of fact that Mr. Horton was generally considered in the city of St. Louis, whether rightfully or wrongfully, as being the direct representative and the nominee of Mr. Baumhoff?
A. The laboring people thought so.
Q. That was the prevalent opinion, was it not?
A. Yes, sir.
Q. Don't you know that on account of that prevalent opinion a large body of the Republican party refused to support Mr. Horton?
A. I know a good many of them that said they wouldn't support him; printers and mechanics of all kinds.
Q. All the trades unions were allied with the street-car men in this strike, were they not?
A. Yes, sir.
Q. And they combined against the candidacy of Mr. Horton and other candidates?
A. That was the principal cause of the defeat of the Republican ticket.
Q. Even at the time of Mr. Horton's nomination, as you say, prior to the strike, is it not a fact that there was much dissatisfaction among the rank and file of the Republican party over his nomination?
A. There was a great deal of dissatisfaction over the rolling of Major Pearce—beating of Major Pearce.
Q. Major Pearce had represented this district previously?
A. Yes, sir.
Q. And had made an acceptable candidate to his party and an acceptable Congressman to the party at large?
A. A good Congressman; the best we ever had here.
Q. Now, can you tell me who was responsible, mainly, for the rolling of Major Pearce?
A. Principally, I think it was Mr. Baumhoff.
Q. Didn't that rolling of Major Pearce, who was a prominent, popular, and able man, create within itself much dissatisfaction?
A. Yes, sir.
Q. Among the rank and file of the Republican party?
A. Yes; a good many said it was a mistake.
Q. There are a great many Germans in the Twelfth Congressional district, are there not?
A. Yes; there is a good many.
Q. Before I go into that, is it not a fact that you know that the national Republican committee called representatives of Mr. Horton to the city of Chicago and endeavored, in the interest of peace and harmony in the Republican party, to induce him to withdraw from the race?
A. I have heard that; I don't know that to be a fact.
Q. You don't know that to be a fact?
A. I have heard that rumor.
Q. You have heard that rumor, and it was generally talked of in Republican circles?
A. Yes, sir.
Q. And talked of as an accepted fact?
A. Yes; I have heard of it.
Q. So great was the dissatisfaction with the candidacy of Mr. Horton, and so sure were the rank and file of the Republican party that he would be beaten, as you understand, he was called to Chicago by the national committee, in an effort to get him to withdraw from the race?
A. I have heard that.

Now, I might quote a great deal more along the same line. I want to quote one piece of testimony further in corroboration of that proposition. Here is the testimony of Philip Rodan, the second vice-president of the Fourteenth Ward Republican League Club, a chairman of the precinct committee of the eleventh precinct of that ward, testifying on this question:

Q. Your position in your precinct gives you an exceptional opportunity to learn the sentiment of the voters of your own party, does it not?
A. It ought to.
Q. What was the sentiment and the apparent intention, from your knowledge, of the Republican voters in your precinct?
(Objected to.)
A. Well, a great many of them believed that Mr. Horton was put up as a "straw man;" that it was simply an understanding between Mr. Butler—that is, I mean Col. Ed Butler—and certain Republican officials that Horton would be defeated and Butler elected, and I believe a good many of them came to the conclusion that as long as the prominent Republicans were of that belief, that the little ones might just as well fall in line.

There you have your explanation as to why it was that this Republican majority in this district was overcome and Mr. Butler was elected—out of the mouths of their own witnesses and their own officials, whose character they vouch for when they put them upon the stand.

Mr. PALMER. You were speaking about 1,500 letters that were sent out, when somebody diverted your attention. I will ask you what became of those.

Mr. BOWIE. Yes; I want to get to that. I have some testimony on the desk.

Mr. PALMER. Those letters were sent out to persons alleged to have been illegally registered?

Mr. BOWIE. That is the pretense.

Mr. PALMER. That is what they claim?

Mr. BOWIE. That is what they now claim, and I want to show upon what a thin and unsubstantial foundation that pretense rests.

Mr. PALMER. The question I want you to answer is, What became of the letters? Did they find the people to whom they were addressed?

Mr. BOWIE. Some of them did and some of them did not. Now, have you heard what was in those letters?

Mr. PALMER. Never mind what was in them.

Mr. BOWIE. I prefer to answer in my own way. There was nothing in the letters except the card of William M. Horton, candidate for Congress. The letters were marked "Personal," and strict orders were given not to deliver them to any man except the person to whom they were addressed; to accept no agents, to accept no orders, but to deliver them only to the men to whom they were addressed. Two or three hundred of those letters were actually delivered. The men who got them felt that they were the victims of a fraud and an imposition, and they denounced it as a fraud, and they were outraged because a thing of that sort had been attempted upon them. They noised it abroad. They talked it far and wide, and every man to whom those letters were addressed became aware of the fact that all there was in these letters were Mr. Horton's cards. They were sent in bunches of 50 or 60 to one place. They were sent between the hours of 8 or 9 in the morning and 4 and 5 in the afternoon to laboring men who rose at sun-up and did not return to their places of residence until after dark.

The purpose, the infamous purpose, behind the sending of those letters was to build up a fraudulent case in order to offset to some extent the great dissatisfaction which existed in St. Louis against the Republican nominee. And so they refused to send those letters there at the time when these men could receive them. The only way they could get them after they got the notices was to go—it may be several miles to the post-office—and get witnesses who happened to be acquainted with the clerk at the post-office to identify them after they got there, and then to receive what they knew in advance was nothing but the card of Mr. Horton. Now, what does the evidence show? I want to call your attention to what the evidence shows with reference to whether those men actually lived at those places or not. I want to take as a sample 509 South Second street. I hope the gentleman will listen.

Mr. PALMER. I am listening.

Mr. BOWIE. The facts which I am now about to state are set forth in the minority report.

Mr. J. H. Schultze, letter carrier, testifies, on page 665, that he had 30 registered letters addressed to 509 South Second street, many of which were undelivered, and the inference is sought to be drawn that these were all fraudulent. And yet on this very matter Mr. George Schumacher, the Republican judge for the fifth precinct of the Fifth Ward (Rec., 936), says that 509 South Second street was a four-story hotel, having 68 beds; that it was a perfectly reputable place; that ordinarily 35 to 40 men lived there at the time he kept it, which was up to July, 1900; that he was succeeded by Peter Gill, who ran it in the same manner; that as a rule a poor class of laboring men lived there, but no women whatever were received; that on a pinch they could accommodate 68 men.

Mr. Ehlert, the Republican clerk for the second precinct of the Fifth Ward, in which this house is located, testifies (Rec., 942) that he went there with the Democratic clerk and was informed by the proprietor that every man registered from there lived there, and there were 38 in all. He marked no one off the list.

Mr. John Allen, the Republican judge for that precinct (Rec., 1176), said that he was personally acquainted with nearly every man who was registered there, and that he also knew pretty nearly all who lived in the precinct.

Mr. Remmler, the Republican challenger (pp. 861-862), testified that he did not know whether there were 20 men or 40 men living at this place, but that many of them did not vote; and that he was satisfied that every man who did vote from that place was entitled to do so.

The Republican challenger testified to that. That is the testimony as to that place, and there is identically the same character of testimony virtually as to every one of those places. Take 520 South Third street, concerning which Mr. Schultz, the letter carrier, testified:

Q. Can you say why these were not delivered, those addressed to 520 South Third?
A. Because they were not there at the time.
Q. What is 520 South Third?
A. A lodging house.
Q. How large a house?
A. It is a two-story building about 25 feet wide by about 75 feet deep.
Q. Glance over the letters addressed to 520 South Third and tell me how many of the men you know.
A. Do you mean that I know personally?
Q. Yes; that you know were in the house.
A. I do not know any of those personally.
A. How many of them do you know to have been in the house at the time?
A. I recognize some of them as being people I have left letters for. I do not know them. They would probably be working.

Now, I have not the time to read all this testimony, because there are over 2,000 pages of it. There were 50 or 60 witnesses examined on this very matter. They went to these places when these laboring men could not have been there except by accident.

Mr. PALMER. I am a juror here. I want to get at the truth of this.

Mr. BOWIE. I am trying to give you the truth.

Mr. PALMER. Do you undertake to say that any of these persons who were alleged to have been fraudulently registered were in fact in existence, and did you bring any of those men to testify?

Mr. BOWIE. Why, my dear sir, the testimony of Republican challengers here in this ward, in the first case that I read, is that the challenger knew all these people that voted, and he did not believe a single one had voted illegally.

Mr. PALMER. That is all right enough, but then the allegation is that there were eight or nine thousand men who were fraudulently registered, and that these men did not live in St. Louis

and never had lived there; that they could not have been at the places where they were registered from. Did you bring any of these men before the Election Committee to prove that they actually existed and were entitled to register from the places from which they were registered?

Mr. BOWIE. The contestee did not take any testimony.

Mr. PALMER. Oh!

Mr. BOWIE. He submitted the case upon the testimony of the contestant——

Mr. PALMER. That answers the question.

Mr. BOWIE. Because that testimony shows conclusively to any fair-minded man, in my humble judgment—and I do not mean any reflection upon the majority of this committee—that these charges of fraud are false. It was an utter impossibility, with the safeguards that were thrown around that election, and with the managers and clerks who were appointed, an utter impossibility for there to have been that number of fraudulent registrations.

Mr. PALMER. Now, as I understand your position, it is this: The fact that a person alleged as being fraudulently registered could not be found when the census was taken, and could not be found in December, that is no evidence that they were not there and not legal voters.

Mr. BOWIE. That they were not found. It is simply a question of mistake of the officials. It is secondary testimony five or six times removed from the original. There are some who moved from one precinct to another; there are some who died; some mistakes in the census; some mistakes in the registration; some mistakes in the compilation. It is perfectly preposterous to talk about unseating a man on such evidence. Why is it that this condition applies to this election district, the only one in the United States, where there were so many names, more than half, according to the theory of the contestant, about two-thirds in many cases, of all the votes not registered? Do you believe that, gentlemen, when these Republican judges and clerks and committeemen themselves testified to the fairness of it? Do you believe that in this district the legitimate registration was only 12 per cent of the population? Yet such is the case presented by the majority of the committee.

Again, the gentleman from Iowa quotes from the testimony of a man named Breitschuh, alias Bradshaw, in which he says how many votes were cast by the so-called Williams gang.

Mr. SMITH of Iowa. About 120.

Mr. BOWIE. One hundred and twenty; and yet the testimony of the negro driver of the wagon which hauled the Williams gang said that its utmost capacity was 18 or 20.

Mr. SMITH of Iowa. Will the gentleman allow me to ask him this? Did not the gentleman well know that the 20, not 120, of the Williams gang voted time after time in the same precinct?

Mr. BOWIE. Well, I will read—I will prove what I started to assert by your witness Breitschuh, alias Bradshaw, who is also the man that you were speaking of.

Mr. SMITH of Iowa. When you say that I named the witness, I never named the witness, but said that he was one of many.

Mr. BOWIE. He was your crackerjack witness, the one that you singled out in your argument.

Mr. SMITH of Iowa. I never named him in my argument. You asked me about him, and I said he was one of many.

Mr. BOWIE. I asked you about the man you were talking about. I do not care whether you named the man or not. I understood whom you referred to. Mr. Herman Breitschuh was the witness. It is fortunate that this occurrence is testified to by other witnesses than Mr. Breitschuh, alias Bradshaw. And I will read the testimony of the other witnesses.

Mr. SMITH of Iowa. I trust the gentleman will remember that he is the first man who named this witness.

Mr. BOWIE. I do not care anything about who it was that first mentioned him. You referred to the witness's testimony, and I wanted to identify him.

Mr. SMITH of Iowa. I spoke of him as one of many.

Mr. BOWIE. He was the one that you were talking about, and the fact is there were other witnesses who testified to the same occurrence you referred to and who prove that Mr. Breitschuh lied about it. Here is what Mr. Breitschuh said about it. I have it, and I will read from the minority report. It is on page 182 of the record. He testifies as to an alleged outrage on the clerk of that precinct. Breitschuh says there were 75 to 100 men in this gang, and this driver said that the wagon which hauled them would not hold over 15 to 20, and the wagon was not always full.

Mr. TAYLER of Ohio. Where is the statement of 75 or 100?

Mr. BOWIE. That is the number of the Williams gang mentioned by Breitschuh and who were alleged to be present at the time of the occurrence related by that versatile witness about which so much is said in the majority report and to which the gentleman from Iowa referred in his opening argument.

Mr. TAYLER of Ohio. I referred to Breitschuh. I stand by Breitschuh. He is a very intelligent witness.

Mr. BOWIE. I believe that he says that there were 75 to 100 of the "gang" present, but I am not sure.

Mr. TAYLER of Ohio. It was 50 or 75 he told us, and that they voted two or three times apiece.

Mr. BOWIE. My recollection is he said 75 to 100. I will ask some other gentleman if he will examine the record. I will ask the gentleman from Texas [Mr. BURGESS] to please examine page 182 of the record and see if he can find this. I do not want to make any mistake about it. I am reading from page 29 of the minority report:

> They voted so often that it took them from 10 o'clock in the morning until 2 in the afternoon at one precinct.

Four hours this Williams gang remained at one precinct! The majority of the committee say that this same gang went to 25 or 30 precincts; and according to that, if the majority is right and Breitschuh is right, they had a day in St. Louis that was from one hundred to one hundred and twenty hours long. This lays in the shade even the famous record of Joshua, when he commanded the sun to stand still.

Now, Breitschuh testifies to a great outrage—and is quoted at length by the majority—perpetrated on the clerk by these men, who put a pistol at his head and run him out. I will read:

> Mr. ORRICK. Did you see the clerk come out?
> A. I did.
> Q. Was he put out or did he come out voluntarily?
> A. I guess he ran out—scared of getting killed. He said a fellow had a gun up to his head, and he thought it was about time to move.

Again he was asked:

> Q. Were these men you refer to as Indians white or colored?
> A. White men.

Now, it so happens that Mr. Wefferling, the Republican clerk, was also examined as to what happened that day, and he completely contradicts Mr. Breitschuh on this question. I quote from Mr. Wefferling (Record, p. 1642), as follows:

> Q. Was there any trouble of any kind there at the polls in your precinct?
> A. I don't know. There may have been on the outside.
> Q. But there was none on the inside?
> A. No, sir.
> Q. Did you look outside of the polling place at any time?
> A. Once in a while, when we had nothing to do.

Now, Mr. Clark, the Republican central committeeman of that ward, testifies that Wefferling was appointed upon his recommendation. Mr. Wefferling said further that he had made a careful canvass of the precinct; that he had lived there all his life; that he knew practically every white man in it, and found only one case of false registration, which he reported. On page 1639 he was asked:

> Q. Did anyone appear there and ask to vote and was not entitled to vote, to your knowledge?
> A. I don't know; not to my knowledge.
> Q. How long have you been living in that precinct?
> A. Twenty-seven years.

Again, on pages 1641 and 1642, he said:

> Q. How long have you lived in that place?
> A. For twenty-seven years; not exactly in the same house, but in that neighborhood.
> Q. So you know nearly everybody there, do you?
> A. Yes, sir.
> Q. Did you see anybody come there to register or vote that you did not know?
> A. No, sir.
> Q. You knew them all?
> A. All, except the darkies.

None of the Republican judges at this precinct were examined, but they were all appointed upon the recommendation of Mr. Clark.

Such is the character of testimony upon which the committee in this case seek to impeach the result of this election.

Mr. Speaker, I regret that this record is so large and the issues so great I have been forced to consume very much more time than I had expected to do in the presentation of this case. I have done so in the hope that this case would get fairly presented to the House. I believe that every suggestion made by the other side can be answered, as I have answered these. I do not believe that there was any such fraud in the election there as they charge. I do not believe there was any more there that day than was usual in large cities. There were a few fights, a few little irregularities; perhaps some things happened that ought not to have happened, but nothing whatever upon which to found the judgment that 3,500 majority should be wiped out, as proposed in this case.

I believe this man was honestly and fairly elected, and he is entitled to keep his seat. I do not know whether the gentlemen on the other side who have not done me the honor to listen to me, or even those who have, will vote as I shall in this case; but I have no hesitation in saying that, in my humble judgment, I honestly and sincerely believe that James J. Butler was fairly elected to Congress from that district, and I believe he ought to,

and if he gets his dues will, retain his seat. [Applause on the Democratic side.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1225) granting an increase of pension to Clara W. McNair.

Also, that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5506) granting an increase of pension to Clayton T. Van Houten.

Also, that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5856) granting an increase of pension to Elizabeth A. Turner.

Also, that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3320) granting an increase of pension to Adelaide G. Hatch.

Also, that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 4450) confirming in the State of South Dakota title to a section of land heretofore granted to said State.

The message also announced that the Senate had passed with amendments the joint resolution (H. J. Res. 6) in relation to monument to prison-ship martyrs at Fort Greene, Brooklyn, N. Y., in which the concurrence of the House was requested.

The message also announced that the Senate had passed joint resolutions of the following titles; in which the concurrence of the House was requested:

S. R. 123. Joint resolution for the relief of Naval Cadet William Victor Tomb, United States Navy;

S. R. 124. Joint resolution to provide for the printing of the memorial address on the life and character of William McKinley, late President of the United States, by the Hon. John Hay, before the two Houses of Congress; and

S. R. 127. Joint resolution authorizing the loan of plans and drawings of park improvements of the District of Columbia.

A further message from the Senate announced that the Senate had agreed to the amendments of the House to the bill (S. 5383) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Atlanta, in the State of Georgia, on the first Monday in October in each year.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13172) to ratify and confirm an agreement with the Choctaw and Chickasaw tribes of Indians, and for other purposes.

The message also announced that the Senate had passed a bill of the following title (S. 3560): An act to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving-wheel brakes, and for other purposes," approved March 2, 1893, and amended April 1, 1896, in which the concurrence of the House was requested.

ELECTION CONTEST—HORTON AGAINST BUTLER.

Mr. TAYLER of Ohio. Mr. Speaker, I yield one hour to the gentleman from Missouri [Mr. BARTHOLDT].

The SPEAKER. If the gentleman will suspend for a moment, the gentleman from Minnesota has a conference report.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. McCLEARY. Mr. Speaker, I desire to present a conference report on the District of Columbia appropriation bill.

The SPEAKER. It will be printed under the rule.

[For conference report see Senate proceedings, page 7498.]

The statement is as follows:

The managers on the part of the House at the conference on the disagreeing votes of the two House on the amendments of the Senate to the bill (H. R. 14019) making appropriations for the support of the government of the District of Columbia for the fiscal year ending June 30, 1903, submit the following written statement in explanation of the action agreed upon and recommended in the accompanying conference report on each of the Senate amendments, namely:

On Nos. 1, 2, 3, 4, and 5, relating to the executive office: Increases the salary of the janitor from $1,000 to $1,200 and of the property clerk from $1,200 to $1,400, as proposed by the Senate, and strikes out the provision for an additional clerk at $720.

On No. 6: Inserts the provision proposed by the Senate to punish bribery in the District of Columbia.

On Nos. 7, 8, and 9, relating to the assessor's office: Increases the salary of the assistant assessor from $1,600 to $2,000 and of the clerk to the board of assistant assessors from $1,200 to $1,500, as proposed by the Senate.

On No. 10: Appropriates $5,500, as proposed by the Senate, for salaries and expenses of the excise board, and requires that all receipts from liquor licenses shall be paid into the Treasury.

On No. 11: Strikes out the provision inserted by the House reviving the personal-tax law of 1877.

On Nos. 12, 13, and 14, relating to the collector's office: Provides for an assistant cashier at $1,400 and for two coupon clerks at $900 each, as proposed by the Senate.

On No. 15: Authorizes the employment of clerks on extra labor in the preparation of tax-sale certificates.

On Nos. 16, 17, 18, 19, and 20, relating to the Auditor's Office: Increases the compensation of the chief clerk from $2,100 to $2,250 and of one clerk from $1,400 to $1,600, as proposed by the Senate, and inserts a provision defining the duties of the Auditor with reference to settling differences with the Treasury and requiring him to countersign all checks.

On Nos. 21 and 22: Appropriates for a clerk at $900, as proposed by the House, instead of at $1,000, as proposed by the Senate, in the office of the sealer of weights and measures.

On Nos. 23, 24, and 25: Strikes out the increase in the salaries of the computing engineer and superintendent of sewers proposed by the Senate.

On Nos. 26, 27, and 28, relating to the department of insurance: Appropriates $600 for temporary clerk hire and strikes out the provision proposed by the Senate for one clerk at $1,400 and one clerk at $1,200.

On Nos. 29 and 30: Appropriates $13,000, instead of $12,000, as proposed by the House, and $15,000, as proposed by the Senate, for employees in the surveyor's office.

On Nos. 31, 32, and 33: Appropriates $12,000, as proposed by the Senate, instead of $9,500, as proposed by the House, for binding and miscellaneous expenses of the Free Public Library, and authorizes expenditures for rent.

On No. 34: Appropriates $30,000, as proposed by the Senate, instead of $25,000, as proposed by the House, for contingent and miscellaneous expenses.

On Nos. 35, 36, and 37: Restores to the bill the provision proposed by the House regulating the expenditures for horses and wagons.

On No. 38: Appropriates $540, as proposed by the Senate, instead of $240, as proposed by the House, for rent of office for the department of insurance.

On No. 39: Strikes out the appropriation of $480 proposed by the Senate for rent of office for superintendent of property.

On No. 40: Appropriates $2,500, as proposed by the Senate, for clerical service, books, and equipments in the office of register of wills.

On No. 41: Strikes out the appropriation of $5,000 proposed by the Senate for fireproof bookshelves in the office of the recorder of deeds.

On No. 42: Strikes out the appropriation of $150 for glass for certain portraits in the District offices.

On Nos. 43, 44, and 45: Appropriates, as proposed by the Senate, $600 for enlargement of fireproof file case in the surveyor's office, $300 for photolithographing certain old maps, and $2,000 for resurvey of Beatty and Hawkins's addition to Georgetown.

On No. 46: Appropriates $145,000 instead of $140,000, as proposed by the House, and $150,000, as proposed by the Senate, for assessment and permit work.

On Nos. 47, 48, 49, and 50: Appropriates, as proposed by the Senate, $15,500 for paving South Capitol street and Delaware avenue, $15,400 for paving North Capitol street, and $6,400 for paving P street NW., and strikes out the appropriation of $14,600 proposed by the Senate for paving S street NW.

On No. 51: Reappropriates the unexpended balance of the appropriation of $40,000 for opening alleys, and strikes out the appropriation proposed by the Senate of an additional sum of $25,000 for said work.

On Nos. 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, and 78, all relating to the construction of county roads and suburban streets, appropriates as proposed by the Senate for the following:

Leroy place to Wyoming avenue, $8,000;
Joliet street, $7,000;
Providence street, Brookland, $5,500;
Nebraska avenue, $2,500;
Kenesaw avenue, $10,000;
Eleventh street extended, $15,000;
New Hampshire avenue, $13,500;
Connecticut avenue extended, $10,000;
Thirty-seventh street, and other streets in Burleith subdivision, $3,000;
Wyoming avenue, $4,300;
Mintwood place, $5,000;
Decatur street, $12,000; and
Quincy street, $5,000; and strikes out the provisions proposed by the Senate for the following:
R street, $6,500;
Blagden avenue, $3,000;
Reno road and Emerson street, $3,000;
Kramer street, $5,000;
Pennsylvania avenue extended, $10,000;
Erie street, $2,500;
Rhode Island avenue, $25,000;
Wisconsin avenue, $15,000;
Concord street, Brookland, $2,000;
Seventh street, Bunker Hill road, $5,000;
Messmore street, $1,500;
Fourteenth street, $40,600; and
Kansas avenue, $2,000.

On No. 79: Appropriates $10,000, as proposed by the Senate, for the Massachusetts avenue bridge.

On No. 80: Appropriates $65,000, as proposed by the Senate, for repairs to the Aqueduct Bridge.

On No. 81: Increases the limit of cost of the highway bridge across the Potomac River from $568,000 to $996,000, and extends the time for construction of the bridge from two to four years; authorizes contracts for constructing the bridge within the limit of cost; requires the asphalt paving between railway tracks on said bridge to be maintained by street railway companies using the same, and grants to all street railway companies chartered or that may hereafter be chartered by Congress the right to cross said bridge.

On No. 82, Appropriates $5,000, as proposed by the Senate, for survey of Anacostia River flats.

On Nos. 83, 84, 85, 86, and 87, relating to sewers: Appropriates $52,000, as proposed by the Senate, instead of $50,000, as proposed by the House, for completing the East Side intercepting sewer; $20,000, with right to contract up to $42,000, as proposed by the Senate, for constructing trunk sewer to serve the western part of Georgetown; appropriates $50,000, instead of $250,000, as proposed by the Senate, for constructing in part the B street and New Jersey avenue trunk sewer, authorizes a contract for $200,000 additional work on said sewer, and strikes out the appropriation of $75,000 proposed by the Senate for the Arizona avenue sewer.

On No. 88: Appropriates $2,000, as proposed by the Senate, for fencing James Creek Canal.

On No. 89: Appropriates $90,000, as proposed by the House, instead of $200,000, as proposed by the Senate, for sprinkling, sweeping, and cleaning streets.

On No. 90: Appropriates $1,000 as proposed by the House, instead of $5,000 as proposed by the Senate, for cleaning snow and ice from cross-walks and gutters.

On Nos. 91 and 92: Makes the appropriation for the bathing beach available from May 15, 1902.

On No. 93: Appropriates $14,000, instead of $12,000 as proposed by the House, and $15,000 as proposed by the Senate, for general supplies of the electrical department.

On No. 94: Appropriates $9,000 as proposed by the Senate, instead of $8,000 as proposed by the House, for placing under ground the wires of the electrical department.

On Nos. 95 and 96: Strikes out the appropriation of $5,250 proposed by the Senate for a 4-dial 4-number manual transmitter for fire-alarm office, and makes a verbal correction in the text of the bill.

On Nos. 97 and 98: Appropriates $4,000 as proposed by the Senate, instead of $3,800 as proposed by the House, for raising roof of building occupied by fire alarm headquarters.

On Nos. 99, 100, 101, 102, 103, 104, 105, 106, and 107: Appropriates $200,000 as proposed by the Senate, instead of $185,000 as proposed by the House, for street gaslighting; limits the price per lamp to $20 as proposed by the Senate, instead of $18 as proposed by the House; requires the gas company to pay the expense of purchasing, erecting, and maintaining new lamp-posts, street designations, lanterns, and fixtures; authorizes the use of $15,000 as proposed by the House, instead of $20,000 as proposed by the Senate, for Welsbach street lights of not less than 60 candlepower, at a cost of not exceeding $25 per lamp as proposed by the House, instead of $30 as proposed by the Senate; and inserts a provision authorizing the gas company during the fiscal year 1903 to reduce from 25 candlepower to 23 candlepower illuminating gas.

On Nos. 108, 109, and 110: Appropriates $76,000, instead of $66,656 as proposed by the House and $85,000 as proposed by the Senate, for electric arc lighting; fixes the price at $72 per annum as proposed by the House, instead of $85 as proposed by the Senate, for each electric arc light, and inserts the provision proposed by the Senate authorizing the erection of poles and the stringing of overhead wires outside of the fire limits and east of Rock Creek for electric-lighting purposes.

On No. 111: Strikes out the appropriation of $18,000 proposed by the Senate for preliminary surveys for additional conduit from Great Falls.

On Nos. 112 and 113: Appropriates $600,000 as proposed by the House, instead of $1,200,000 as proposed by the Senate, for the filtration plant.

On No. 114: Appropriates $67,240 as proposed by the Senate, instead of $12,000 as proposed by the House, for fencing and other improvements around the Washington City Reservoir and shafts of the Washington Aqueduct tunnel.

On No. 115: Appropriates $2,500 as proposed by the House, instead of $20,000 as proposed by the Senate, for Rock Creek Park.

On Nos. 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, and 156, all relating to the public schools: Strikes out all of the increases in salaries proposed by the Senate on account of employees of the school board and of school teachers, except that one head of department of English in Manual Training School No. 1, at $1,300, is provided for instead of one teacher, at $1,000; appropriates for expenses of night schools and for kindergarten instruction, as proposed by the House, instead of as proposed by the Senate; strikes out the appropriation of $5,500 proposed by the Senate for medical inspectors of schools; provides for a superintendent of janitors, at $1,200, as proposed by the Senate; appropriates $55,000, as proposed by the House, instead of $60,000, as proposed by the Senate, for repairs of school buildings; appropriates $12,000, as proposed by the Senate, for repair of heating apparatus in school buildings; strikes out the appropriation of $5,000 proposed by the Senate for grading, filling, paving, draining, and inclosing school yards; appropriates $15,000, as proposed by the House, instead of $20,000, as proposed by the Senate, for tools, etc., in connection with instruction in manual training; appropriates $2,500, as proposed by the Senate, for pianos for school buildings; appropriates $52,500, as proposed by the Senate, instead of $45,000, as proposed by the House, for text-books and school supplies; provides for a business high school building, as proposed by the Senate, to cost not exceeding $175,000, and appropriates $77,500 for site and plans therefor; appropriates, as proposed by the Senate, $25,000 for a new school building in Brookland, $7,000 for purchase of lot for Western High School, and $1,944 for additional playground for Giddings School; and strikes out the following appropriations proposed by the Senate: $15,000 for manual training school on School street, $26,000 for reconstructing Henry School, and $65,000 for a new school building in the second division.

On Nos. 157, 158, 159, 160, 161, and 162, all relating to the Metropolitan police: Provides for 15 additional policemen instead of 35 as proposed by the Senate; appropriates $30,000 as proposed by the Senate, instead of $25,000 as proposed by the House, for contingent expenses; appropriates $30,000 as proposed by the Senate for a station house and stable in southeast Washington, and $600 for rent of a building in said precinct.

On Nos. 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, and 180, all relating to the fire department: Strikes out all of the increases in compensation proposed by the Senate; appropriates $65,860, instead of $60,000, as proposed by the House, and $71,480, as proposed by the Senate, for miscellaneous objects, including repairs to engine houses, apparatus, contingent expenses, and other objects; appropriates $15,750, as proposed by the House, instead of $15,000, as proposed by the Senate, for purchase of new engines; strikes out the appropriation of $25,000 proposed by the Senate for a new engine house in the southwestern section; appropriates $22,000, as proposed by the Senate, for a new truck house in the southeastern section, and authorizes the diversion of an unexpended balance of an appropriation for completing a stable on North Carolina avenue.

On Nos. 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, and 192, all relating to the health department: Provides for an inspector and deputy health officer at $1,800, instead of an inspector at $1,200; increases the compensation of the chemist from $1,600 to $1,800; increases the compensation of the chief clerk and deputy health officer from $1,800 to $2,200; provides for 2 additional sanitary and food inspectors at $900 each; strikes out the proposed increase in the salaries of 1 veterinary surgeon from $1,200 to $1,500 and of 6 sanitary and food inspectors from $900 to $1,200, and appropriates $1,000, instead of $1,500, as proposed by the Senate, for traveling expenses of sanitary and food inspectors.

On Nos. 193, 194, 199, and 200, transfers the salary of the deputy marshal from the force in the care of the court-house to the police-court paragraph.

On Nos. 195 and 196: Appropriates for 10 justices of the peace at $2,000, as proposed by the House, instead of at $2,400 each, as proposed by the Senate.

On Nos. 197 and 198: Strikes out the provision proposed by the House that fees should not be paid to the clerk of the supreme court by the District of Columbia and fixes the compensation of the clerk of the supreme court of the District at $4,000, as proposed by the Senate, instead of at $3,500, as proposed by the House.

On No. 201: Appropriates for salary of the warden of the jail $2,000, as proposed by the House, instead of $2,250, as proposed by the Senate.

On Nos. 202, 203, and 204: Provides, as proposed by the Senate, for an additional inspector at $720 and increases the amount for traveling expenses from $200 to $400 for the board of charities.

On Nos. 205, 206, 207, 208, and 209: Appropriates $1,200, as proposed by the Senate, instead of $1,000, as proposed by the House, for principal overseer at the Washington Asylum and strikes out the other increases in salaries of employees of that institution proposed by the Senate.

On Nos. 210, 211, 212, 213, 214, and 215: Strikes out the increases in compensation of employees at the Reform School for Girls proposed by the Senate and the appropriation of $5,000 for an additional building for that institution.

On Nos. 216 and 217: Strikes out the appropriation of $5,000 proposed by the Senate for plans for a new building for the Freedmen's Hospital.

On No. 218: Strikes out the appropriation of $25,000 proposed by the Senate for reconstructing building for the National Homeopathic Hospital.

On No. 219: Appropriates $1,450 proposed by the Senate for protecting the Central Dispensary and Emergency Hospital from fire.

On Nos. 220, 221, and 222: Appropriates $12,000 for the Hart Reform School, as proposed by the Senate.

On No. 223: Appropriates $3,000, as proposed by the Senate, for completing a building for the Industrial Home School.

On No. 224: Appropriates for the National Association for the Relief of Destitute Colored Women and Children without requiring a contract to be made with the Board of Children's Guardians.

On Nos. 225 and 226: Inserts the provision proposed by the Senate with reference to the service of Government employees in the National Guard of the District of Columbia.

On No. 227: Strikes out the appropriation proposed by the Senate requiring a reduction of 10 per cent of appropriations made by the bill under certain conditions.

On Nos. 228 and 229: Strikes out the increase in the salary of the clerk in the water department from $1,400 to $1,600, proposed by the Senate.

On No. 230: Restores section 2 of the House bill, and inserts as section 3 a provision authorizing advances out of the General Treasury to meet any deficiency in the revenues of the District of Columbia during the fiscal year 1903.

On Nos. 231, 232, and 233: Inserts sections 4, 5, and 6 of the bill, as proposed by the Senate, with reference to the taxation of real estate and providing for taxation of personal property; both of which sections are quoted literally in the accompanying conference report, which is printed in the RECORD.

On No. 234: Makes necessary change in the numbering of a section.

The bill as finally agreed upon appropriates $3,547,526.97, being $650,316 more than as it passed the House, $1,346,847 less than as it passed the Senate, $45,257.03 more than the law for the current fiscal year, and $2,219,971 less than the estimates of the Commissioners.

J. T. McCLEARY,
J. G. CANNON,
M. E. BENTON,
Managers on the part of the House.

CHOCTAW AND CHICKASAW INDIANS.

Mr. CURTIS submitted the following conference report, with the accompanying statement of the House conferees, to be printed in the RECORD and lie over, under the rule:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13172) to ratify and confirm an agreement with the Choctaw and Chickasaw tribes of Indians, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 16.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 8, 9, 10, 11, 13, 19, 20, and 21; and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: Restore the matter proposed to be stricken out by said amendment and add at the end thereof the following:

"Such citizenship court shall also have like appellate jurisdiction and authority over judgments rendered by such courts under the said act denying claims to citizenship or to enrollment as citizens in either of said nations. Such appeals shall be taken within the time hereinbefore specified and shall be taken, conducted, and disposed of in the same manner as appeals by the said nations, save that notice of appeals by citizenship claimants shall be served upon the chief executive officer of both nations: *Provided*, That paragraphs 31, 32, and 33 hereof shall go into effect immediately after the passage of this act by Congress."

And the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the matter proposed to be stricken out by said amendment insert the following: "and such intermarried white persons as may have married recognized citizens of the Choctaw and Chickasaw nations in accordance with the tribal laws, customs, and usages on or before the date of the passage of this act by Congress;" and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: At the end of said amendment add the following: ", all of said Mississippi Choctaws so enrolled by said Commission shall be upon a separate roll;" and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the matter intended to be inserted by said amendment insert the following: "in good faith continuously resided;" and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the matter intended to be inserted by said amendment insert the following: "continuous, bona fide;" and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "*Provided*, That occupants or purchasers of lots in town sites in said Choctaw and Chickasaw nations upon which no improvements have been made prior to the passage of this act by Congress shall pay the full appraised value of said lots instead of the percentage named in the Atoka agreement;" and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: Restore the matter intended to be stricken out by said amendment and add at the end thereof the following: "*Provided, however*, That nothing contained in this section shall be construed or held to commit the Government of the United States to any expenditure of money upon said lands or the improvements thereof, except as provided herein, it being the intention of this provision that in the future the lands and improvements herein mentioned shall be conveyed by the United States to such Territorial

or State organization as may exist at the time when such conveyance is made;" and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: Omit the word "SEC." before each paragraph number wherever it occurs and number the paragraphs consecutively; and the Senate agree to the same.

CHARLES CURTIS,
JOHN F. LACEY,
JOHN S. LITTLE,
Managers on the part of the House.

WM. M. STEWART,
O. H. PLATT,
JAMES K. JONES,
Managers on the part of the Senate.

The statement is as follows:

The managers on the part of the House at the conference of the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13172) to ratify and confirm an agreement with the Choctaw and Chickasaw tribes of Indians, and for other purposes, submit the following statement in explanation of the fact of the action agreed upon and recommended in the accompanying conference report:

The House managers recede from the disagreement to the Senate amendments numbered 1, 2, 3, 4, 5, 8, 9, 10, 11, 12, 13, 19, 20, and 21, and agree to the same.

Amendments 1, 2, 3, 4, 5, 8, 10, 11, 12, 20, and 21 are simply changes of phraseology.

Amendment No. 9 changes the word "person," so as to make the provision apply to the Mississippi Choctaw Indians, whether of full or of mixed blood, and thus makes the provision more definite and certain.

Amendment No. 19 extends the time for the calling of a special election to ratify the agreement on the part of the Choctaws and Chickasaws from ninety days to one hundred and twenty days. The Senate recedes from amendment No. 16.

From amendments Nos. 14 and 15 the House recedes, with an amendment, thus restoring the House provisions and changing the wording of the sections, so as to require that the Mississippi Choctaws shall in good faith have resided upon the lands in the Choctaw Nation for a period of three years in order to establish their rights in said nation.

The House recedes from amendment No. 13, which is an amendment striking out the House provision making an appropriation of $15,000 to remove the Mississippi Choctaws from Mississippi to the Indian Territory.

The House recedes from amendment No. 6, with an amendment which gives those persons whose applications have been rejected by the court the same right to appeal that is given the nation in cases decided against them.

The House recedes from its amendment No. 17, with an amendment which simply requires those persons who may hereafter make improvements upon town lands in the Indian Territory to pay the full appraised value, and the section thus amended permits persons who have heretofore made improvements upon town lots under the Atoka agreement pay simply the price provided for in said agreement. This amendment fully protects the interests of those people who have gone to the Indian Territory and expended their money in good faith in building up towns.

The House recedes from its disagreement to amendment No. 18, with an amendment which declares the purpose of Congress in regard to the Sulphur Springs referred to in said section, which is not to permanently hold the said land.

The House recedes from its disagreement to amendment No. 7, with an amendment which limits the time for the admission of intermarried whites to the rolls of the Choctaw and Chickasaw tribes to date with the passage of this act by Congress.

CHARLES CURTIS,
JOHN F. LACEY,
JOHN S. LITTLE.

NAVAL APPROPRIATION BILL.

Mr. FOSS submitted the following conference report, with the accompanying statement of the House conferees, to be printed in the RECORD and lie over, under the rule:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 14046) making appropriations for the naval service for the fiscal year ending June 30, 1903, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 7, 13, 46, 47, 52, 56, 57, 58, 64, 77, 92, and 93.

That the House recede from its disagreement to the amendments of the Senate numbered 9, 25, 26, 88, and 89, and agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the appointment of six additional civil engineers is hereby authorized, three to be appointed during the present calendar year, and the other three in the calendar year of 1903."

And the Senate agree to the same.

Amendments numbered 37, 38, 39, and 40: That the House recede from its disagreement to the amendments of the Senate numbered 37, 38, 39, and 40, and agree to the same with an amendment as follows: In lieu of the amended paragraph (being lines 18, 19, 20, and 21, on page 33 of the bill) and of the amendments insert the following:

"Navy-yard, Charleston, S. C.: Stone and concrete dry dock (toward completion), $250,000: *Provided*, That the amount authorized in the act of June 7, 1900, to be expended for the purchase of a site for a naval station at or in the vicinity of Charleston, S. C., from the appropriation for a new naval station and a dock be increased from $100,000 to $106,000, and $6,000 are hereby appropriated; office building for the commandant, $35,000; quarters for the commandant, $12,000; quarters for civil engineer, $7,500; landing and wharves, $50,000; grading and drainage, $10,000; workshop (to cost $80,000), $50,000; storehouse and storekeeper's office, $50,000; equipment building (to cost $125,000), $62,500; machine shop for steam engineering (to cost $174,000), $80,000; foundry and copper shop for steam engineering (to cost $118,000), $60,000; power house (to cost $50,000), $25,000; workshop for ordnance, $40,300; ship fitters' shop, with mold loft and furnace shed, for construction and repair (to cost $200,000), $50,000; power house and fuel storage for construction and repair (to cost $80,000), $35,000; machine shop for construction and repair (to cost $120,000), $40,000; joiner shop for construction and repair (to cost $120,000), $90,000; foundry for construction and repair (to cost $75,000), $20,000; in all, navy-yard, Charleston, $913,300.

"In all cases where buildings and structures are provided for in this act and where appropriations in full are not made for the same, authority is hereby given to the Secretary of the Navy, in his discretion, to enter into contracts for the entire construction of such buildings and structures, within the limit of cost as fixed in this act."

And the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: In lieu of the sum proposed insert the following: "$7,649,325;" and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That in addition to the number of naval constructors and assistant naval constructors now authorized, the appointment of six assistant naval constructors is hereby authorized, two to be appointed during the present calendar year, and the remaining four in the calendar year of 1903."

And the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That, until the year 1914, in addition to the naval cadets now authorized by law (the title having been changed by this act to midshipmen), the President shall appoint five midshipmen, and there shall be appointed from the States at large, upon the recommendation of Senators, two midshipmen for each State."

And the Senate agree to the same.

On amendment numbered 91 the committee of conference have been unable to agree.

GEORGE EDMUND FOSS,
ALSTON G. DAYTON,
ADOLPH MEYER,
Managers on the part of the House.

EUGENE HALE,
GEO. C. PERKINS,
B. R. TILLMAN,
Managers on the part of the Senate.

The statement of the House conferees is as follows:

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14046) making appropriations for the naval service for the fiscal year ending June 30, 1903, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report on each of the amendments of the Senate, viz:

On No. 1: Strikes out the increase in the amount of appropriation for pay of the Navy, as proposed by the Senate.

On Nos. 7 and 13: Places the provision "maintenance of colliers" under the Bureau of Navigation.

On No. 9: Reappropriates the unexpended balances remaining in the Treasury June 30, 1902, from the appropriation for "Ordnance and ordnance stores," 1900, or so much thereof as may be necessary, for expenditure in the fulfillment of contracts heretofore made and properly chargeable to such appropriation.

On No 24: Provides that the corps of civil engineers shall be increased by six civil engineers, three to be appointed the present calendar year and three the following year.

On Nos. 25 and 26: Appropriates $500 for making an examination concerning the furnishing water supply of Portsmouth Navy-Yard, and an appropriation of $200,000 toward the removal of Hendersons Point, near said navy-yard.

On Nos. 37, 38, 39, and 40: Appropriates $663,300 additional for the development of the navy-yard at Charleston, S. C., as more fully appears in conference report above.

On No. 43: Increases the totals in appropriations for public works by the amounts agreed to in conference, as proposed by the Senate.

On No. 46: Strikes out the appropriation of $100,000 for the construction of a building for Bureau of Equipment at Pensacola Navy-Yard, proposed by the Senate.

On No. 47: Strikes out the increase in the appropriation for public works, Bureau of Ordnance, as proposed by the Senate.

On No. 52: Strikes out the provision for an increase in the corps of surgeons.

On No. 56: Strikes out appropriation of $2,000 for one bookkeeper and one clerk at Pensacola Navy-Yard, as proposed by the Senate.

On No. 57: Strikes out the increase in total appropriations for civil establishment, Bureau of Supplies and Accounts, as proposed by the Senate.

On No. 58: Strikes out provision for increase in the Pay Corps, as proposed by the Senate.

On No. 61: Provides that the corps of naval constructors shall be increased by 6 naval constructors; two to be appointed the present calendar year and 4 the following year.

On No. 64: Strikes out the appropriation of $200,000 for an experimental station and testing laboratory at Annapolis, proposed by the Senate.

On No. 76. Increases the corps of midshipmen by providing that until the year 1914, in addition to the naval cadets now authorized by law (the title having been changed by this act to midshipmen), the President shall appoint five midshipmen, and there shall be appointed from the States at large, upon the recommendation of Senators, two midshipmen for each State.

On No. 77: Strikes out the provision authorizing all examinations for admission to the Naval Academy to be held at Annapolis, as provided by the Senate.

On No. 88: Appropriates $1,500 for improvements at the Marine Barracks, navy-yard, Boston, as proposed by the Senate.

On No. 89: Changes the amount of total appropriations for public works in accordance with the above.

On No. 92: Strikes out the provision for five more Holland submarine boats, as provided by the Senate.

On No. 93: Strikes out the provision for the testing and purchasing of submarine boats other than that of the Holland type.

The committee of conference have been unable to agree on the following amendment:

On No. 91, as to "increase of the Navy" and the method of construction of new ships authorized, whether they shall be built by contract or some in the Government navy-yards, or the whole subject be left within the discretion of the Secretary of the Navy.

GEORGE EDMUND FOSS,
ALSTON G. DAYTON,
ADOLPH MEYER,
Managers on the part of the House.

ELECTION CONTEST—HORTON AGAINST BUTLER.

Mr. BARTHOLDT. Mr. Speaker, in the spring of 1901 I wired the governor of Misssouri from Republican headquarters at St. Louis: "This city is in the hands of a ballot-box stuffing mob," and then went on to say that he would be held responsible, etc. This relates to the spring election, an exact duplicate of the fall election of 1900. Let me say right here that the citizens of St. Louis, not to speak of the Republicans at all, have no more control over their own elections than they have over the affairs of Afghanistan, for the reason that the governor of the State, under Democratic law, appoints the election board, and is thus placed in almost absolute control, by a cunningly devised machinery, of all our elections.

Hence the governor's responsibility, to which I have just referred. I was prompted to send that message to the governor on the morning of the day of election by reports coming to headquarters from half a dozen wards in the central portion of the city that bands of Democratic repeaters were being driven in wagon loads from one polling place to the other, and were voting again and again by means of slips furnished them by some one on the inside. These reports proved to be true, although at that time we had no idea of the extent of the crimes which were being committed against the ballot. There were a number of hot-headed young fellows at Republican headquarters who in wrathful indignation demanded that fraud be met by force. We succeeded in pacifying them by sending the dispatch I just referred to and by pointing to the courts as our remedy. How bitterly we were disappointed in this is now a matter of history.

The reply from Jefferson City was that the governor was not at home, and when we appealed to the courts we were told by the tribunal of last resort, the State supreme court, that the ballot boxes could not be opened, because the secrecy of the ballot must not be interfered with. This decision, effectually nailing up the ballot boxes, was handed down just in time to prevent the frauds and criminal secrets of the ballot boxes from being revealed. It gladdened the hearts, if they have any, of the perpetrators of these election outrages, but it filled with righteous indignation every honest man who loves his country and believes in the political rights guaranteed by its institutions.

As an American citizen I believe there is a redress under our political skies for every wrong. Therefore I appear before the bar of public opinion, and, on behalf of an outraged constituency, which in this instance is a vast majority of the people of Missouri, confidently lay our case before this House and the country. It is our last recourse. All other means of redress being denied us, we propose to arouse the public conscience by laying the facts before the highest authority, and then this fall we shall appeal to that authority, the people themselves, for a verdict upon that issue alone. [Applause.]

Mr. CLAYTON. From what publication or document has the gentleman been reading?

Mr. BARTHOLDT. I decline to answer such a question.

Mr. GROSVENOR. Will the gentleman allow me to ask him one question?

Mr. BARTHOLDT. I will, with pleasure.

Mr. GROSVENOR. It is stated as an historical fact—I should like to have your statement in regard to it—that the Republican party in the State of Missouri gave Mr. McKinley 48 per cent of the popular vote of that State at the election of 1900.

Mr. BARTHOLDT. Yes, between 47 and 48 per cent.

Mr. GROSVENOR. It is further reported that the present apportionment law adopted by a Democratic legislature is so arranged that the Republicans will have 1 representative out of 16. Is that correct?

Mr. BARTHOLDT. The districts are so gerrymandered that it is the intention of the Democrats to take 15 and graciously yield us 1.

Mr. GROSVENOR. That is all I wanted to know.

Mr. BOWIE. I would like the gentleman from Ohio to answer me a question.

Mr. GROSVENOR. Very well.

Mr. BOWIE. Does the gentleman think that that has anything to do with this case?

Mr. GROSVENOR. Yes.

Mr. BOWIE. How?

Mr. GROSVENOR. As raising a presumption, at least, that a similar policy has been followed in other matters.

Mr. BOWIE. Then you think that because the Democrats may have done something they ought not to have done, you ought to go to work and do the same?

Mr. GROSVENOR. Oh, no; the only object is to show how your party is influenced in other things.

Mr. BARTHOLDT. Mr. Speaker, I wish to say that I prefer not to be interrupted. I intend to present my argument logically, and I believe that any question which gentlemen may feel inclined to ask will be answered in the course of my remarks.

The SPEAKER. The Chair will protect the gentleman from interruption.

Mr. BARTHOLDT. Mr. Speaker, St. Louis is a Republican city by a large majority. In 1896 McKinley carried it by 15,000. Then came the Nesbit law, and the Republican majorities went glimmering. They had disappeared as if by magic. The same as the contestee in the case now under discussion, there are many Democrats now holding offices in St. Louis to which they have no title. At two succeeding elections every Republican candidate was slaughtered by the infamous methods which I have just described. But when we instituted contests and proceeded to prove that the incumbents were not legally elected, a partisan supreme court stopped us on the way to the ballot boxes and told us in as many words that, no matter how much evidence of fraud they may contain, these boxes must not be opened because the secrecy of the ballot would thus be violated.

This ended the contests, of course. We had exhausted our efforts to vindicate justice and the sanctity of the franchise. There was general indignation among the people who still cherish these things—treasures without which our republican form of government would be but an empty word—but they were scoffed at and derided on account of their very impotence. There remained one consolation, the fact that Congress could pass upon the election in the Twelfth district. Hundreds of public-spirited citizens came immediately to the front, offering their mites for the institution of a contest, and even if I attempted to describe it I could give you but a faint idea of the sacrifices made and the sum total of time, energy, and money expended to unearth the frauds and gather the evidence in this case.

In this connection let me ask the question: Is there another State in this great Union of ours where the only method by which election frauds may be detected is prohibited? There is none. Missouri alone enjoys that unenviable distinction. And do you not agree with me, Mr. Speaker, that there ought to be a change; that this alone should be the strongest possible inducement to the voters to oust the party which is responsible for such a humiliating condition? And if you will bear with me, I will show you that it is not partisanship which dictates these sentiments.

The demand for honest elections is certainly not a partisan demand. If it were, the party opposing it would never see daylight again. It would be an insult to the honest Democrats of Missouri to assume that they would less vigorously denounce and repudiate election frauds than the honest Republicans do. There may be a difference in the intensity of feeling, and there may be those who are disinclined to accept proof of fraud and corruption against their own party, but if a party once stands convicted of fraud, by positive and incontrovertible evidence, and the knowledge of it becomes public property, then that party's doom is sealed.

The reason is that the American people are instinctively for fair play, and this instinct is much stronger than partisanship. Moreover, no true American will stand idly by while the fountainheads of popular government are being poisoned. He will protest and will make common cause with anybody or any party to protect his priceless heritage. Upon this, Mr. Speaker, are founded our hopes in Missouri. [Applause on the Republican side]

I said "positive and incontrovertible evidence of fraud and corruption." This has been adduced in bulk in the Horton-Butler contest now under discussion. It fills three thick volumes.

Nothing that I can say could add to the force of the indictment contained in the majority report of the committee. That report is a masterly array, in a nutshell, of all the intricacies of the case, and for it the honorable chairman of the committee, the distinguished gentleman from Ohio [Mr. TAYLER] is entitled to the highest commendation. His conscientious labors and those of his able coworkers on the committee are nowhere more appreciated I assure them, than in St. Louis and Missouri.

If partisanship instead of a sense of exact justice had actuated them they would have reported in favor of seating the Republican contestant. We should have been glad if they had reached such a conclusion, but we accept their decision that no valid election was held in the Twelfth district, as the just verdict of an unbiased, fair-minded jury. I have not the time to go into details, nor shall I rehash the facts and arguments which have already been so ably and well presented by the gentlemen who preceded me. But for a better understanding of the case it is necessary that I call attention to some of the more glaring features of that election, or of what is dignified by that name.

In 1898 the total Republican and Democratic vote in the district was 28,299. In 1900 it was 40,655, an increase of 12,346 in two years, while in the adjoining district, which I have the honor to represent and which has a much larger population, the increase was but 9,000 votes. This plainly shows the padding of the vote, but the fraud will become still more apparent when you compare the relative increase in the party vote. While in the Butler district the Democratic increase was over 9,000,

namely, 9,115, as against a Republican increase of but 3,241; in my district the increase in the vote of the two parties was almost exactly the same—about 4,500. And the same is true in the other adjoining district, the one so ably represented by my colleague, Mr. JOY. There, too, the corresponding increase in the Republican and Democratic vote is about even, namely, 7,700 in one case and 7,300 in the other. Why this discrepancy? Mr. JOY was elected by 2,600 plurality in 1898 and by 2,700 in 1900. I was elected by 6,500 plurality in 1898 and by 6,400 in 1900. These are the two adjoining districts. But in the Butler district the Republican plurality of 2,300 was completely wiped out and a Democratic plurality of 3,553 returned, a difference of nearly 6,000 votes! It is claimed that there were certain causes militating against the Republican ticket; but if this were true, surely the same causes would have operated in all districts alike, because all three are in the city of St. Louis.

This, however, is not the case, as I have already shown. To explain the abnormal Democratic increase in the Twelfth district the claim is set up in the minority report that many Republicans voted for the Democratic candidate because they did not like their own. The figures do not bear out this assertion. In 1898 Major Pearce, an exceptionally popular candidate, received 15,310 votes in this district, while in 1900 Mr. Horton received 18,551, a healthy and natural increase due to the Presidential election. The fact is that whatever losses contestant may have suffered on personal grounds were more than made up by gains caused by Democratic objections to contestee. Thus the abnormal increase in the Democratic vote remains unexplained except on the theory that gigantic frauds were perpetrated.

Circumstantial evidence, you say? Yes; but hundreds of citizens have seen these frauds perpetrated with their own eyes. They have seen the repeaters as they were driven in wagonloads from polling place to polling place; they have seen them enter; they have seen the doors closed behind them, and they have seen them emerge after their nefarious work was done. In many places they saw how the Republican challengers and judges and clerks were ejected, and they saw how all this was done under the very eyes, with the connivance of and in some cases under the protection of the police.

This is not circumstantial evidence, but what I have just recited are stubborn facts which the minority of the committee by no amount of sophistry can explain away. There were about seventy-five to a hundred of those repeaters or "Indians," as they are called in slander of our aborigines. On election day they were divided in smaller bands, and, each under the leadership of a chief, sent out to do the work for which they had been hired. The preparations for these election crimes had been so openly and boldly carried on that weeks in advance the Republican leaders were fully advised of the plans of the Democratic bosses.

We knew that the registration lists had been padded with thousands of fraudulent names, and that each one of those names was to be voted. They were registered in large numbers from stables, saloons, coal yards, bawdy houses, and vacant lots. From the stables of the Excelsior Hauling Company—an enterprise controlled by Edward Butler, contestee's father—97 men were registered, though it is a notorious fact that not more than two or three men usually live there. To what extent fraudulent registration has been carried on was shown later when 19,000 names were dropped from the voters' lists.

We were advised, I repeat it, of every detail of the scheme to steal the election, but under the circumstances the Republicans were well-nigh helpless. The election machinery and the police organization were completely under the domination of the Democratic party. Should the Republicans resort to force to prevent the perpetration of the frauds? Fortunately, calmer councils prevailed, and as the only alternative left this plan was finally agreed upon: That registered letters be addressed to those suspected of false registration, and warrants be issued against all the persons who could not thus be found.

These warrants were to be placed in the hands of deputy sheriffs to be specially appointed for that purpose. It was an honest and perfectly legal plan to prevent crime. Of course but a small percentage of the 1,500 registered letters which were sent out could be delivered, but when the deputy sheriffs on the morning of the election presented themselves at the polls with their warrants, they were told by the police to move on. A State law, which provides that no electioneering shall be permitted within 100 feet of the polls, was enforced by the police even against the officers of the law, in which capacity the deputy sheriffs undoubtedly acted.

Under these circumstances no arrests could be made, because a fraudulent voter could be identified only when inside of the poll he would announce his alleged name. Had the presence of a deputy sheriff been permitted, he would have immediately arrested his man, and probably the whole conspiracy would have been nipped in the bud. It was for this reason that, as a result of a dark-lantern conference at the Southern Hotel, orders were issued to the police to keep the deputy sheriffs away from the polls. These orders were carried out to the letter at each polling place. Thus the last obstacle to the boldly arranged orgies of fraud was swept away and a new chapter was added to the election history of fair St. Louis which brings the blush of shame and indignation to the cheek of every good citizen, irrespective of party affiliation.

Do not imagine, as evidently the conspirators did, that the public conscience of St. Louis was dead or paralyzed. On the contrary, never in my life did I see it more thoroughly aroused. Every avenue of lawful redress being closed, there was wild talk of violence in every precinct of the district and city.

> "Yes, there's a limit to the despot's power!
> When the oppressed looks round in vain for justice,
> When his sore burden may no more be borne,
> With fearless heart he makes appeal to Heaven,
> And thence brings down his everlasting rights,
> Which there abide, inalienably his,
> And indestructible as are the stars," etc.

In these words of the poet can best be described what was uppermost in the minds of the people. Riots and bloodshed were fortunately averted, as I said before, but for this the Democratic bosses can claim no part of the credit. In view of the wrongs and outrages committed against the Republicans at that election, how absurd and ridiculous is the assertion made in the minority report that the Democratic leaders had met at the Southern Hotel "to discuss and consider"—I follow the language of the report—"what rights the Democratic party had left in St. Louis, if any."

It reminds me of the wolf in the fable who accuses the lamb of muddying the water, though the wolf was standing upstream and the lamb way down. It is adding insult to injury. It is like accusing a man of assault and battery who lies flat on his back, tied hand and foot. The rights and privileges which the Republicans of St. Louis enjoyed in the management of campaigns, insignificant as they always had been, were taken away from them by the Nesbit law, an instrument specially designed for that purpose.

Let me tell you something about that law. It is as neat a piece of partisan legislation as has ever been brought to the notice of this House or the country. It applies to St. Louis alone. The reason for this is that the great metropolis of the Mississippi Valley, abreast with the best sentiment of the country, had dared to give McKinley 15,000 majority, while most of the rural districts of Missouri had rolled up their old-time Democratic majorities. This was bitter, so the bosses went to the legislature and asked that St. Louis be made Democratic by law.

Troubled by their consciences and afraid of public opinion, some of the Democratic members balked, but they were finally whipped into line. The Nesbit law was passed, and it was a great moment, because from the birth of Nesbitism dates the decadence of the Missouri Democracy. It was giving notice to all the people of the State that Democratic majorities are no longer the natural expressions of public opinion, but must henceforth be manufactured by artificial devices. You see? But what are the provisions of the law?

Well, the governor appoints three election commissioners, not four, as in some Republican States, so that two might be appointed for each party; oh, no; only three—two Democrats and one Republican, and the Republican, too, is one of his own choosing. No matter how good a man the representative of the minority party may be, you know that a pair always beats ace high. That is the secret of the law. The rest is easy. The commissioners have complete charge of the registration, locate the polling places, and appoint the judges and clerks of election.

It is true that the Republican judges and clerks shall be recommended by the city central committee of that party, the same as the Democratic election officials, but there is no provision to prevent the commissioners from arbitrarily substituting other names for those recommended by the party committees. Wholesale substitutions of this kind were made in the Twelfth district. According to the law these substitutes should have been Republicans, but what party they really belonged to was shown when the ballots were examined. Fifty-four of these alleged Republicans voted the Democratic ticket outright, three scratched Horton, and three voted for the third party candidate.

Here we have the reason, too, why the election law of 1895, the passage of which had been forced through the legislature by public opinion and a Republican lower house, was supplanted by the partisan measure I am just discussing. It is because under the old law Republican judges and clerks were sure to be appointed. Why, this gave the Republicans an equal chance at the polls, therefore would never do! Under these circumstances do you blame the Republicans of St. Louis for looking to Congress for relief, for urging you first, that the fraudulent results of such election methods be not recognized, and second, that the United States Government throw such safeguards around Congressional elections as to render a repetition of such outrages impossible?

Permit me to quote the expressions of the recent State convention of the Republicans of Missouri on this question. I insert them here:

The fundamental doctrines of an honest ballot and a fair count compel the earnest attention and demand the unselfish support of every elector of the State, irrespective of former political affiliations, because at present, by virtue of unfair and partisan laws passed by the Democratic legislature and signed by a Democratic governor, in the three great commercial centers, namely, in St. Louis, Kansas City, and St. Joseph, the whole matter of registration of all voters and the conduct of all elections for local as well as State officers is in the exclusive power of boards selected by the governor, without the consent of the local authorities or their people, and without such safeguards as will insure a fair expression of the voters' will.

The partisan and infamous administration of the Nesbit law for St. Louis in two elections has operated so successfully as to return the election of candidates who received a minority of the votes cast, and their title to office was validated by a decision of a supreme court to the effect that the constitutional provisions authorizing election contests was no longer applicable to protect the honesty of the ballot in that community.

We declare that in violation of these principles of self-government and in contravention of the letter and spirit of the constitution, in order to keep in power politicians without sanction of a majority of the voters, numerous laws from time to time have been enacted by the Democratic legislature and sustained by decisions of the supreme court which vests in the governor the sole authority to appoint various boards and officers with unlimited power over the local affairs and municipal revenues of the cities of St. Louis, Kansas City, and St. Joseph, without the voice or consent of the local authorities or their people.

We declare that all cities and towns in the State should be self-governed, with full authority to select and control their local boards and officers, levy and collect all taxes and charges for local purposes and distribute them as they please and be alone responsible for the local administration, unhampered and unrestrained by the legislation of the State, and to this end we pledge our support to such necessary amendments to the constitution as can not be nullified and construed away by our supreme court.

The platform adopted by the Congressional convention which recently honored me with a renomination contains the following plank, to wit:

We denounce the Democratic party of this State for the passage of iniquitous election and police laws, enacted to prevent a fair expression of the will of the people, and we invite all good citizens, irrespective of party, to join with us for the purpose of correcting this crying evil and of reestablishing a republican form of government in Missouri, such as will guarantee an honest election and a fair count. The efforts of our Representatives in Congress in behalf of a Federal election law have our hearty approval.

"And we invite all good citizens, irrespective of party, to join with us for the purpose of reestablishing a republican form of government in Missouri." This means that what the Constitution of the United States guarantees to every State does not now exist in Missouri. A rather broad assertion, is it not? And yet it is literally true! Does the man, I ask you, who comes to the polling place and finds that his name has already been voted enjoy a republican form of government?

Or does the community enjoy it in which one party, by means of a partisan State law, turns a minority into a majority? Or where repeaters are employed to stifle the popular will? I ask the constitutional lawyers on the other side of the House. They will also be interested to learn of a decision of our State supreme court to the effect that a repeater shall go scot free if he votes a fictitious name fraudulently placed on the registration lists. How will you reconcile such a decision with public morals and constitutional guaranties? Is there a spot in the wide world where the judiciary has stooped so low in order to gain a partisan advantage or to save a follower of its party from the penitentiary?

The minority say in their report that the House of Representatives has no right to annul or set aside the laws of a sovereign State, and this, by the way, is the only defense they wisely attempt of the Nesbit law and its fraudulent results, if it is a defense at all. That assertion is true, of course. They might have gone further and denied the right of Congress to question a decision of the Missouri State supreme court. Certainly there is no such power vested in this body, and no one claims there is. The majority of the committee do not base their findings upon the State law, but upon the facts.

They do not propose to annul the election because of a partisan law which makes fraud possible, but because of the frauds which were actually committed under it. Incidentally, though properly, they call attention to that iniquitous law and to the Democratic methods of its enforcement. We may have no right here to change State laws and decisions, destructive though they are of the people's rights and liberties, but we have the right to cry out against the wrongs inflicted upon us, and in asking redress, incidentally tell the country how Democratic victories in Missouri are to be accounted for. They may not permit our votes to be counted at home, but they can not gag us here. [Applause.]

Mr. TAYLER of Ohio (before the remarks of Mr. BARTHOLDT were concluded). Will the gentleman yield for a motion to adjourn?

Mr. BARTHOLDT. Yes, sir; as the hour is late, I prefer to conclude in the morning.

The SPEAKER. The gentleman from Missouri reserves the balance of his time.

MONUMENT TO PRISON-SHIP MARTYRS.

The SPEAKER. If the gentleman from Ohio [Mr. TAYLER] will withhold the motion to adjourn for a moment——

Mr. TAYLER of Ohio. I will do so.

The SPEAKER. The Chair will lay before the House Senate amendments to House joint resolution No. 6.

The amendments to the joint resolution (H. J. Res. 6) in relation to a monument to prison-ship martyrs at Fort Greene, Brooklyn, N. Y., were read, and, on motion of Mr. MCCLELLAN, concurred in.

On motion of Mr. MCCLELLAN, a motion to reconsider the vote by which the amendments were concurred in was laid on the table.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles; when the Speaker signed the same:

H. R. 3519. An act granting an increase of pension to John Marble;

H. J. Res. 103. Joint resolution relative to the disposition of patent specification and drawing in the western district of Pennsylvania;

H. R. 11019. An act directing the Secretary of the Treasury to bestow medals upon First Lieut. David H. Jarvis, Second Lieut. Ellsworth P. Bertholf, and Samuel J. Call, surgeon, all of the Revenue-Cutter Service;

H. R. 12097. An act to amend the internal-revenue laws in regard to storekeepers and gaugers;

H. R. 9308. An act granting an increase of pension to Edwin P. Johnson;

H. R. 10964. An act granting an increase of pension to Francis M. Beebe;

H. R. 2978. An act for the relief of Joseph H. Penny, John W. Penny, Thomas Penny, and Harvey Penny, surviving partners of Penny & Sons;

H. R. 8327. An act to amend an act entitled "An act for the protection of the lives of miners in the Territories;"

H. R. 6005. An act granting a pension to James A. Chalfant;

H. R. 14247. An act to authorize the Charleston, Suburban and Summerville Railway Company to construct and maintain two bridges across Ashley River, in the State of South Carolina;

H. R. 12056. An act granting an increase of pension to Warren C. Plummer;

H. R. 10856. An act granting a pension to Jacob Findley;

H. R. 9187. An act granting an increase of pension to Caroline A. Hammond;

H. R. 13598. An act granting a pension to John J. Southerland;

H. R. 13123. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1903, and for other purposes;

H. R. 14182. An act granting an increase of pension to Susan B. Lynch;

H. R. 12804. An act making appropriations for the support of the Army for the fiscal year ending June 30, 1903;

H. R. 2641. An act for the relief of Albion M. Christie;

H. R. 6570. An act to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps; and

H. R. 3110. An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans.

The SPEAKER announced his signature to enrolled bills and joint resolutions of the following titles:

S. R. 111. Joint resolution limiting the gratuitous distribution of the Woodsman's Handbook to the Senate, the House of Representatives, and the Department of Agriculture;

S. R. 103. Joint resolution providing for the binding and distribution of public documents held in the custody of the Superintendent of Documents, unbound, upon orders of Senators, Representatives, Delegates, and officers of Congress, when such documents are not called for within two years after printing;

S. 4450. An act confirming in the State of South Dakota title to section of land heretofore granted to said State;

S. 5434. An act to authorize the city of Little Falls, Minn., to construct a wagon and foot bridge across the Mississippi River within the limits of said city; and

S. 4776. An act to authorize the construction of a bridge across the Emory River, in the State of Tennessee, by the Tennessee Central Railway or its successors.

ENROLLED BILLS PRESENTED TO THE PRESIDENT OF THE UNITED STATES.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had presented this day to the President of the United States for his approval bills of the following titles:

H. R. 1456. An act granting a pension to William G. Miller;

H. R. 14208. An act granting an increase of pension to Alexander Murdock;

H. R. 14206. An act granting a pension to Mary J. Moore;

H. R. 14042. An act granting an increase of pension to George W. Edgington;
H. R. 14656. An act granting an increase of pension to Charles A. Scott;
H. R. 4170. An act granting an increase of pension to Henry P. Macloon;
H. R. 8769. An act for the relief of S. J. Bayard Schindel;
H. R. 8108. An act for the relief of John Hornick;
H. R. 6031. An act authorizing the payment of part of the pension of Ira Steward to Adell Augusta Steward;
H. R. 6009. An act granting a pension to Absolum Maynard;
H. R. 621. An act for the relief of Daniel Cherry;
H. R. 14802. An act for the purchase of real estate for revenue and customs purposes at Wilmington, N. C.;
H. R. 2066. An act to change the terms of the district court for the eastern district of Pennsylvania;
H. R. 8840. An act granting an increase of pension to John H. Lauchly;
H. R. 2063. An act amending an act creating the middle district of Pennsylvania;
H. R. 10178. An act granting an increase of pension to Daniel Thomas;
H. R. 6871. An act granting an increase of pension to Harman Scramlin;
H. R. 3323. An act granting a pension to Daniel L. Mallicoat;
H. R. 5315. An act granting an increase of pension to Orrin J. Wells;
H. R. 3500. An act granting an increase of pension to Kate O. Phillips;
H. R. 10933. An act to provide for the erection at Fredericksburg, Va., of the monument to the memory of Gen. Hugh Mercer, which was ordered by Congress on the 8th day of April, 1777, should be erected;
H. R. 12507. An act granting an increase of pension to Ebenezer W. Oakley;
H. R. 12299. An act granting a pension to William C. Roberts;
H. R. 12648. An act to establish a regular term of United States district court in Roanoke City, Va., and for other purposes;
H. R. 12284. An act granting an increase of pension to George W. Shaw;
H. R. 14691. An act to authorize the construction of a pontoon bridge across the Missouri River, in the county of Cass, in the State of Nebraska, and in the county of Mills, in the State of Iowa;
H. R. 14111. An act to authorize the construction of a bridge across the Tennessee River, in the State of Tennessee, by the Harriman Southern Railroad Company;
H. R. 14221. An act granting an increase of pension to Nancy J. McArthur;
H. R. 12800. An act granting an increase of pension to Horatio N. Whitbeck;
H. R. 4556. An act to amend an act entitled "An act to supplement existing laws relating to the disposition of lands," etc., approved March 3, 1901;
H. R. 13650. An act to correct the military record of James M. Olmstead;
H. R. 10279. An act to pay the claim of Stephen B. Halsey;
H. R. 12205. An act to provide for circuit and district courts of the United States at Valdosta, Ga.; and
H. R. 13676. An act making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1903, and for other purposes.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, bills and joint resolutions of the Senate of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:
S. R. 124. Joint resolution to provide for the printing of the memorial address on the life and character of William McKinley, late President of the United States, by the Hon. John Hay, before the two Houses of Congress—to the Committee on Printing.
S. R. 127. Joint resolution authorizing the loan of plans and drawings of park improvements of the District of Columbia—to the Committee on the Library.
S. R. 123. Joint resolution for the relief of Naval Cadet William Victor Tomb, United States Navy—to the Committee on Naval Affairs.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:
To Mr. STEVENS of Minnesota, for five days, on account of important business.
To Mr. THOMAS of North Carolina, for five days, on account of important business.

MILITIA.

Mr. DICK. I ask unanimous consent that immediately after the pending election case is disposed of, the bill (H. R. 11654) to promote the efficiency of the Army, be taken up in the House and be a continuing order until disposed of, not to interfere with conference reports or motions to suspend the rules.
Mr. RICHARDSON of Tennessee. I do not understand that this request is made with the concurrence of the minority of the committee, and for the present I shall have to object.
Mr. DICK. I will say to the gentleman that the proposition has the unanimous concurrence of the minority members of the committee. The report is unanimously signed.
Mr. RICHARDSON of Tennessee. I suggest to the gentleman to withhold this matter until to-morrow morning. We can not get through the election case until 2 or 3 o'clock to-morrow, and there will be ample time meanwhile to confer with the minority of the committee. If they assent, I shall make no objection.
Mr. DICK. Very well.
Mr. TAYLER of Ohio. I renew the motion to adjourn.
The motion was agreed to; and accordingly (at 5 o'clock and 15 minutes p. m.) the House adjourned.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communication was taken from the Speaker's table and referred, as follows:
A letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the case of Philip M. Buckey, administrator of estate of Philip J. Buckey against The United States—to the Committee on War Claims, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:
Mr. DAVIS of Florida, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the Senate (S. 6119) to authorize the Pensacola, Alabama and Tennessee Railway Company to erect, maintain, and operate a railway bridge across the Alabama River, in Wilcox County, in the State of Alabama, reported the same without amendment, accompanied by a report (No. 2705); which said bill and report were referred to the House Calendar.
Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 15270) to amend an act entitled "An act authorizing the Aransas Harbor Terminal Railway Company to construct a bridge across the Corpus Christi Channel, known as the Morris and Cummings ship channel, in Aransas County, Tex.," reported the same without amendment, accompanied by a report (No. 2706); which said bill and report were referred to the House Calendar.
Mr. SHACKLEFORD, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the Senate (S. 6070) to authorize the construction of a bridge across the Missouri River, at a point to be selected, within 5 miles north of the Kaw River, in Wyandotte County, State of Kansas, and Clay County, State of Missouri, and to make the same a post route, reported the same without amendment, accompanied by a report (No. 2707); which said bill and report were referred to the House Calendar.
Mr. DALZELL, from the Committee on Ways and Means, to which was referred the bill of the Senate (S. 215) regulating the duties and fixing the compensation of the customs inspectors at the port of New York, reported the same without amendment, accompanied by a report (No. 2708); which said bill and report were referred to the Committee of the Whole House on the state of the Union.
Mr. BABCOCK, from the Committee on the District of Columbia, reported the bill of the House (H. R. 15289) to regulate the sale of viruses, serums, toxins, and analogous products in the District of Columbia, to regulate interstate traffic in said articles, and for other purposes, as a substitute in lieu of H. R. 13392, accompanied by a report (No. 2713); which said bill and report were referred to the House Calendar.
Mr. TAWNEY, from the Committee on Ways and Means, to which was referred the bill of the House (H. R. 15006) to amend an act entitled "An act to amend the statute in relation to the immediate transportation of dutiable goods, and for other purposes," approved June 10, 1888, reported the same with amendment, accompanied by a report (No. 2714); which said bill and report were referred to the Committee of the Whole House on the state of the Union.
Mr. DICK, from the Committee on Military Affairs, to which

was referred the bill of the Senate (S. 4426) to authorize the Secretary of War to loan arms to the institutions having companies of the Boys' Brigade connected therewith, reported the same without amendment, accompanied by a report (No. 2715); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill of the House (H. R. 14379) for the erection of a memorial building or monument at Fort Recovery, Ohio, reported the same with amendments, accompanied by a report (No. 2718); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WATSON, from the Committee on Naval Affairs, to which was referred the bill of the Senate (S. 3791) to provide suitable medals for the officers and crew of the United States vessel of war *Kearsarge*, reported the same without amendment, accompanied by a report (No. 2721); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GARDNER of New Jersey, from the Committee on Labor, to which was referred the bill of the House (H. R. 15157) to authorize the appointment of boards of investigation and arbitration, and to define their powers and duties, reported the same with amendments, accompanied by a report (No. 2722); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions of the following titles were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. DICK, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 8132) to remove the record of dishonorable dismissal from the military record of John Finn, alias Flynn, reported the same without amendment, accompanied by a report (No. 2709); which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill of the Senate (S. 661) authorizing the restoration of the name of Thomas H. Carpenter, late captain, Seventeenth United States Infantry, to the rolls of the Army, and providing that he be placed on the list of retired officers, reported the same without amendment, accompanied by a report (No. 2716); which said bill and report were referred to the Private Calendar.

Mr. ESCH, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 917) for the relief of Henry Cook, reported the same with amendment, accompanied by a report (No. 2717); which said bill and report were referred to the Private Calendar.

Mr. DAYTON, from the Committee on Naval Affairs, to which was referred the bill of the Senate (S. 4083) for the relief of Surg. John F. Bransford, United States Navy, reported the same without amendment, accompanied by a report (No. 2719); which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill of the Senate (S. 3317) authorizing the President to appoint Lieut. Robert Platt, United States Navy, to the rank of commander, reported the same without amendment, accompanied by a report (No. 2720); which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. PEARRE (by request): A bill (H. R. 15286) to revise, equalize, fix, and adjust special assessments levied for street extension benefits in the District of Columbia—to the Committee on the District of Columbia.

By Mr. STEPHENS of Texas: A bill (H. R. 15287) to amend an act relating to the removal of timber and stone from the Indian Territory—to the Committee on Indian Affairs.

By Mr. LACEY: A bill (H. R. 15288) relating to proofs in homestead and other claims to public lands and punishing false swearing therein, and for other purposes—to the Committee on the Public Lands.

By Mr. BABCOCK, from the Committee on the District of Columbia: A bill (H. R. 15289) to regulate the sale of viruses, serums, toxins, and analogous products in the District of Columbia, to regulate interstate traffic in said articles, and for other purposes, as a substitute for H. R. 13392—to the House Calendar.

By Mr. GOLDFOGLE: A bill (H. R. 15294) authorizing attorneys and counselors duly admitted to the Supreme Court of the United States to appear and practice in all the district and circuit courts of the United States—to the Committee on the Judiciary.

Also, a resolution (H. Res. 320) relating to the consideration of H. J. Res. 198—to the Committee on Rules.

By Mr. GIBSON: A resolution (H. Res. 321) referring House bills Nos. 2744, 2747, 3801, 3918, 3920, 4780, 4781, 6973, 7260, 7262, 7550, and 8222 to the Court of Claims—to the Committee on War Claims.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mr. BOWERSOCK: A bill (H. R. 15290) granting an increase of pension to John T. Collins—to the Committee on Invalid Pensions.

By Mr. BURK of Pennsylvania: A bill (H. R. 15291) granting a pension to Patrick W. O'Donnell—to the Committee on Pensions.

By Mr. GOLDFOGLE: A bill (H. R. 15292) granting a pension to Harry Hirschensohn—to the Committee on Pensions.

By Mr. JACKSON of Maryland: A bill (H. R. 15293) for the relief of Joseph Flewhart—to the Committee on War Claims.

By Mr. JOY: A bill (H. R. 15295) granting an increase of pension to John Ford Smith—to the Committee on Invalid Pensions.

By Mr. PADGETT: A bill (H. R. 15296) to remove the charge of desertion and correct the military record of Isaac B. Goforth—to the Committee on Military Affairs.

By Mr. SMITH of Iowa: A bill (H. R. 15297) to correct the military record of William Vickory—to the Committee on Military Affairs.

Also, a bill (H. R. 15298) for the relief of C. A. Berry—to the Committee on Claims.

By Mr. JONES of Virginia: A bill (H. R. 15299) granting an increase of pension to Henrietta V. West—to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 15300) granting a pension to Delania Preston, widow of William G. Preston—to the Committee on Pensions.

By Mr. THOMAS of North Carolina: A bill (H. R. 15301) for the relief of W. P. Lane, administrator of W. K. Lane—to the Committee on War Claims.

By Mr. MEYER of Louisiana: A bill (H. R. 15302) to remove the charge of desertion against Charles H. Vogt—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMS: Resolutions of the Israelite Alliance of America in relation to the attitude of the Russian Government toward American citizens attempting to enter its territory—to the Committee on Foreign Affairs.

By Mr. BALL of Delaware: Papers to accompany House bill No. 11531, for the relief of Georgiana McNott—to the Committee on Military Affairs.

Also, paper to accompany House bill 7967, granting a pension to Robert Kelly—to the Committee on Invalid Pensions.

Also, papers to accompany House bill 10982, granting an increase of pension to John T. Lungren—to the Committee on Invalid Pensions.

Also, papers to accompany House bill 9978, granting a pension to Columbus Robey—to the Committee on Invalid Pensions.

By Mr. BATES: Papers to accompany House bill granting an increase of pension to Henry Tryon—to the Committee on Invalid Pensions.

By Mr. CALDERHEAD: Resolution of the Israelite Alliance of America relating to the discrimination against the Jews by the Russian Government—to the Committee on Foreign Affairs.

Also, protest of American Committee on Human Rights and Justice, of Philadelphia, Pa., against alleged injustice to Catholics in the Philippines—to the Committee on Insular Affairs.

By Mr. DICK: Petition of Mrs. E. S. Sherer and 728 other citizens of Cuyahoga Falls, Ohio, and vicinity, for an amendment to the Constitution preventing polygamous marriages—to the Committee on the Judiciary.

Also, resolutions of Order of Railway Telegraphers, Ashtabula Division, No. 36; Brotherhood of Railroad Trainmen, Lake Shore Lodge, No. 84, and Team Drivers' Union, all of Ashtabula, Ohio; Journeymen Stonecutters' Union and Retail Clerks' Union, both of Akron, Ohio, favoring the restriction of immigration of cheap labor from the south and east of Europe—to the Committee on Immigration and Naturalization.

Also, petition of East Plymouth Grange, No. 1548, Patrons of Husbandry, East Plymouth, Ohio, opposing the branch banking bill—to the Committee on Banking and Currency.

Also, petition of Journeymen Stonecutters' Union, No. 4, of Akron, Ohio, urging the use of the Cleveland sandstone in the Federal building to be erected in Cleveland, Ohio—to the Committee on Public Buildings and Grounds.

Also, petition of Taplin, Rice & Co., Akron, Ohio, urging the policy of protection to American industries in reciprocity concessions—to the Committee on Ways and Means.

Also, petition of J. W. Watrous and 5 others of Ashtabula, Ohio, favoring House bill 5286, providing for the classification of the salaries of post-office clerks—to the Committee on the Post-Office and Post-Roads.

Also, petition of the First National Bank of Warren, Ohio, for the repeal of the internal-revenue tax on bank capital and surplus—to the Committee on Ways and Means.

Also, petition of saloon and hotel keepers of Conneaut, Ohio, in favor of House bills 178 and 179, for the repeal of the tax on distilled spirits—to the Committee on Ways and Means.

Also, petition of James E. Shallenberger, of Piqua, Ohio, in relation to House bill to retire officers in the Regular Army—to the Committee on Military Affairs.

Also, resolutions of Eadie Post, No. 37, of Cuyahoga Falls, Ohio, Grand Army of the Republic, favoring the construction of war ships in the United States navy-yards—to the Committee on Naval Affairs.

Also, resolutions of Hod Carriers' Union No. 8773, of Akron, Ohio, in regard to employees in navy-yards—to the Committee on Naval Affairs.

Also, resolution of the same union for the exclusion of Chinese laborers—to the Committee on Foreign Affairs.

By Mr. DRAPER: Resolutions of a meeting of citizens of New York, in relation to the attitude of the Russian Government toward American citizens entering its territory—to the Committee on Foreign Affairs.

By Mr. ESCH: Resolution of the Israelite Alliance of America, relating to the discrimination against the Jews by the Russian Government—to the Committee on Foreign Affairs.

By Mr. FOERDERER: Resolution of Israelite Alliance of America, of New York City, approving the action taken by the House of Representatives as to the attitude of the Russian Government toward American citizens of Jewish birth attempting to enter its territory—to the Committee on Foreign Affairs.

Also, protest of American Committee on Human Rights and Justice, of Philadelphia, Pa., against alleged injustice to Catholics in the Philippines—to the Committee on Insular Affairs.

By Mr. GOLDFOGLE: Protest of the Wine, Liquor, and Beer Dealers' Association of the State of New York, against the passage of House bill 14019, increasing the liquor license in the District of Columbia—to the Committee on the District of Columbia.

Also, resolutions of West End Woman's Republican Association; United Garment Workers of America, and Electrical Workers' Union No. 3, of New York, in favor of the proposed increase of pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. GRAHAM: Resolution of the Israelite Alliance of America in relation to the attitude of the Russian Government toward American citizens attempting to enter its territory—to the Committee on Foreign Affairs.

By Mr. GRAFF: Petition of retail druggists of Peoria, Ill., in favor of House bill 178, for the reduction of the tax on alcohol—to the Committee on Ways and Means.

By Mr. HOWELL: Petition of Engineers and Firemen's Union of Jersey City, N. J., for increase of pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. JONES of Virginia: Papers to accompany House bill granting an increase of pension to Henrietta V. West—to the Committee on Invalid Pensions.

By Mr. LACEY: Resolution of Israelite Alliance of America asking relief from Russian hostile action against the Jews—to the Committee on Foreign Affairs.

By Mr. LINDSAY: Resolution of the Israelite Alliance of America in relation to the attitude of the Russian Government toward American citizens attempting to enter its territory—to the Committee on Foreign Affairs.

By Mr. MERCER: Papers to accompany House bill No. 15261 granting an increase of pension to Louis Lowry—to the Committee on Invalid Pensions.

By Mr. MEYER of Louisiana: Paper to accompany House bill to correct the military record of Charles H. Vogt—to the Committee on Military Affairs.

Also, resolution of the Louisiana Bar Association in opposition to the adoption of Senate bill 5383, requiring the United States circuit court of appeals for the fifth circuit to hold a session in Atlanta—to the Committee on the Judiciary.

By Mr. MOON: Petition of retail druggists of Chattanooga, Tenn., in favor of House bill 178, for the reduction of the tax on alcohol—to the Committee on Ways and Means.

By Mr. PEARRE: Petition of citizens of Montgomery County, Md., in favor of House bills 178 and 179, for the repeal of the tax on distilled spirits—to the Committee on Ways and Means.

By Mr. RUPPERT: Resolution of the Israelite Alliance of America approving the action of the House in relation to the religious discrimination against American citizens by Russia—to the Committee on Foreign Affairs.

By Mr. RYAN: Resolutions of the Israelite Alliance of America, urging the United States Government to take steps to secure from Russia a removal of the discrimination against citizens on account of religion—to the Committee on Foreign Affairs.

By Mr. SHACKLEFORD: Papers to accompany House bill granting an increase of pension to Robert D. Davis—to the Committee on Invalid Pensions.

By Mr. STEVENS of Minnesota: Resolutions of the Brotherhood of Locomotive Engineers No. 333, St. Paul, Minn., against the substitute for the Hoar anti-injunction bill—to the Committee on the Judiciary.

By Mr. THOMAS of North Carolina: Papers to accompany war claim of W. P. Lane—to the Committee on War Claims.

By Mr. WILSON: Resolution of Israelite Alliance of America, relating to the discrimination against the Jews by the Russian Government—to the Committee on Foreign Affairs.

By Mr. ZENOR: Papers to accompany House bill 13843, granting an increase of pension to O. D. Heald—to the Committee on Invalid Pensions.

SENATE.

SATURDAY, *June 28, 1902.*

Prayer by Rev. F. J. PRETTYMAN, of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. BERRY, and by unanimous consent, the further reading was dispensed with.

The PRESIDENT pro tempore. Without objection, the Journal will stand approved.

THOMAS WILKINSON.

Mr. BERRY. Yesterday evening, at the request of one of my colleagues in the House, I called up a pension bill. I gave by mistake the wrong number to the clerks, and a bill was passed not intended by me to be considered. I know nothing about the merits of the bill, and I do not know whether the beneficiary desires that the bill shall be passed at this session or not.

Therefore I move to reconsider the votes by which the bill was ordered to a third reading and passed, and ask that it be placed upon the Calendar. It is the bill (H. R. 5453) granting an increase of pension to Thomas Wilkinson.

Mr. PETTUS. I will inquire what the bill is about.

Mr. BERRY. It is a pension bill, and there was a mistake in the number. I know nothing about the bill. I do not know whether it is a meritorious bill or not. I do not know whether the beneficiary of the bill desires to have it passed at this session, for the reason that it is thought by many that bills passed now can not be signed. I do not wish to be responsible for the passage of a bill that I know nothing about, and I therefore move to reconsider the votes by which the bill was ordered to a third reading and passed.

The PRESIDENT pro tempore. The Senator from Arkansas asks unanimous consent that the votes by which the bill (H. R. 5453) granting an increase of pension to Thomas Wilkinson was read the third time and finally passed may be reconsidered. Is there objection? The Chair hears none. The Chair understands that the bill has not been sent to the House.

CONSIDERATION OF PENSION BILLS.

Mr. GALLINGER. In connection with the subject the Senator from Arkansas has alluded to, I will state that I have been importuned by some Senators and a great many members of the House to have the Pension Calendar cleared. I have said to them all that I felt very sure that if we passed the bills now on the Calendar they would fail of approval. For that reason I have not taken action in that direction. I make the public statement so that members of both Houses may understand the reason why the bills are allowed to remain on the Calendar.

Mr. BERRY. It was because the chairman of the Committee on Pensions had made that statement to me that I preferred to have the bill reconsidered, because I did not wish to have a bill passed where the beneficiary might not desire it.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1902, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 6, 14, 15, 16, 17, 27, 28, 33, 36, 37, 71, 74, 75, 76, 77, 78, 79, 84, 95, and 96.

That the House recede from its disagreement to the amendments of the

Senate numbered 1, 3, 4, 5, 7, 10, 11, 12, 13, 18, 19, 20, 21, 22, 23, 25, 29, 30, 31, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 72, 73, 80, 83, 85, 86, 89, 92, 94, 97, 98, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 118, 119, 121, 124, 125, 127, 128, 129, 130, 131, 132, 133, 134, and 135, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$53,777.13;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: After the word "three," in the last line of said amendment, insert the following: "for the procurement of like military stores to replace those so transferred;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Governors Island, N. Y.: For continuing the enlargement of Governors Island by construction of wharf, dredging, bulkhead, and filling, to continue available during the fiscal year 1903, $200,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 117, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "and Senate Document No. 424;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 120, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: "and Senate Document No. 432;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 122, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert: "$447,480;" and in line 5 of the matter inserted by said amendment, after the word "twenty-three," insert the following: ", except the judgment in favor of Samuel S. Cholson and Jonathan Miles, which has been vacated;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 123, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "and Senate Document No. 425, Part II;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 126, and agree to the same with an amendment as follows: In line 12 of the matter inserted by said amendment, after the word "Numbered," insert "430;" and the Senate agree to the same.

On the amendments of the Senate numbered 8, 9, 26, 34, 81, 82, 87, 88, 90, 91, 93, 99, and 116 the committee of conference have been unable to agree.

EUGENE HALE,
W. B. ALLISON,
H. M. TELLER,
Managers on the part of the Senate.

J. G. CANNON,
S. S. BARNEY,
L. F. LIVINGSTON,
Managers on the part of the House.

The report was agreed to.

Mr. HALE. I move that the Senate still further insist upon its amendments not disposed of, and ask for a further conference with the House upon the disagreeing votes of the two Houses.

The motion was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. HALE, Mr. ALLISON, and Mr. TELLER were appointed.

ST. CHARLES COLLEGE, MISSOURI.

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the Secretary of War, which will be read.

The Secretary read as follows:

WAR DEPARTMENT, *Washington, June 26, 1902.*

SIR: The act of Congress approved May 27, 1902 (Public, No. 124), provides "That the Secretary of War be authorized and directed to cause to be investigated by the Quartermaster's Department the circumstances, character, and extent of the alleged use and occupation by the United States military authorities for Government purposes, during the late war, of the college buildings and grounds of St. Charles College, in St. Charles County, Mo."

As an examination of the records of the War Department fails to show the receipt of any claim in favor of the said St. Charles College, I have the honor to request that all the papers in the case now before Congress be transmitted to this Department, in order that the investigation directed by law may be made.

A similar letter has been addressed to the Speaker of the House of Representatives.

Very respectfully, ELIHU ROOT, *Secretary of War.*

The PRESIDENT OF THE SENATE PRO TEMPORE.

The PRESIDENT pro tempore. The Chair suggests that some Senator offer an order directing the Secretary of the Senate to send to the Secretary of War the papers referred to, if they are within the jurisdiction of the Senate.

Mr. KEAN. I make that motion.

The PRESIDENT pro tempore. The Senator from New Jersey moves that the Secretary of the Senate be instructed to send to the Secretary of War the papers referred to in the communication, if they are within the jurisdiction of the Senate. The Chair hears no objection, and the order is made.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. C. R. MCKENNEY, its enrolling clerk, announced that the House had agreed to the amendments of the Senate to the joint resolution (H. J. Res. 6) in relation to monument to prison-ship martyrs at Fort Greene, Brooklyn, N. Y.

The message also announced that the House had passed, with amendments, the bill (S. 3896) to amend section 3362 of the Revised Statutes relating to tobacco; in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolutions; and they were thereupon signed by the President pro tempore:

A bill (S. 4450) confirming in the State of South Dakota title to section of land heretofore granted to said State;

A bill (S. 4776) to authorize the construction of a bridge across the Emory River, in the State of Tennessee, by the Tennessee Central Railway or its successors;

A bill (S. 5434) to authorize the city of Little Falls, Minn., to construct a wagon and foot bridge across the Mississippi River within the limits of said city;

A bill (H. R. 2641) for the relief of Albion M. Christie;

A bill (H. R. 3110) to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans;

A bill (H. R. 6570) to amend the act of May 12, 1900, authorizing the Commissioner of Internal Revenue to redeem or make allowance for internal-revenue stamps;

A bill (H. R. 12804) making appropriations for the support of the Army for the fiscal year ending June 30, 1903;

A joint resolution (S. R. 103) providing for the binding and distribution of public documents held in the custody of the superintendent of documents, unbound, upon orders of Senators, Representatives, Delegates, and officers of Congress, when such documents are not called for within two years after printing; and

A joint resolution (S. R. 111) limiting the gratuitous distribution of the Woodsman's Handbook to the Senate, the House of Representatives, and the Department of Agriculture.

PETITIONS AND MEMORIALS.

Mr. FOSTER of Washington presented a petition of sundry citizens of Alaska, praying for the construction of a military road between Valdez and Eagle City, in that Territory; which was referred to the Committee on Territories.

He also presented a petition of the International Association of Machinists, of Spokane, Wash., praying for the passage of the so-called eight-hour bill; which was referred to the Committee on Education and Labor.

Mr. FAIRBANKS presented a memorial of the Chandler & Taylor Company, of Indianapolis, and of the Terre Haute Shovel and Tool Company, of Terre Haute, in the State of Indiana, remonstrating against the passage of the so-called Hoar anti-injunction bill, to limit the meaning of the word "conspiracy" and the use of restraining orders and injunctions in certain cases; which were ordered to lie on the table.

He also presented a petition of Retail Clerks' Local Union No. 10, of Fort Wayne, Ind., praying for the enactment of a Sunday-rest law for the District of Columbia; which was referred to the Committee on the District of Columbia.

He also presented a petition of the city council of Michigan City, Ind., praying for the enactment of legislation granting pensions to certain officers and enlisted men in the Life-Saving Service; which was referred to the Committee on Pensions.

Mr. FRYE presented a petition of the Grand Army of the Republic, Department of New York, praying for the enactment of legislation giving preference to veterans in the Government service; which was referred to the Committee on Civil Service and Retrenchment.

SALE OF MILK IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER. I present a paper on the subject of the adulteration of milk and cream in relation to the public health. It is a compilation of documents heretofore printed. Most of it, I think, is stereotyped, and as the cost will be but little, I move that it be printed as a document.

The motion was agreed to.

E. G. RATHBONE.

Mr. TELLER. Mr. President, I hold in my hand a petition from a citizen of the United States who has held an official position in Cuba, who feels aggrieved at the action of the courts of that country, and who appears under the present condition to be without any redress if he has been wronged, as he asserts he has, unless he can have an investigation by Congress. As this is an unusual request and the conditions are unusual, I ask unanimous consent that the petition may be read.

The PRESIDENT pro tempore. The Senator from Colorado presents a petition and asks that it may be read. Is there objection? The Chair hears none, and the Secretary will read the petition.

The Secretary read as follows:

WASHINGTON, D. C., *June 26, 1902.*

To the Congress of the United States:

Your petitioner respectfully represents that he is 53 years of age and a citizen of the United States; that late in the year 1898, as an appointee of the

Post-Office Department of the United States, he went to Cuba in the capacity of director-general of posts of Cuba; that while acting in such capacity in Cuba, and while that country was governed by the United States, he was accused of high crimes and misdemeanors in connection with such office in the year 1900, resulting in his being arrested and put upon trial for such alleged crimes and misdemeanors, which resulted in his conviction and sentence for a term of imprisonment and fine, in April, 1902. Later he was released under a general amnesty act to all American citizens by the Cuban Congress.

Your petitioner respectfully requests the United States Congress to direct that a thorough investigation be made, by a committee of its members or otherwise, into all of his acts and doings in Cuba in connection with the said postal service, to the end that all the facts may be known and the truth established.

Your petitioner bases his petition upon the ground that whenever the Government of the United States assigns one of its citizens to public service in a foreign land, and in the course of the performance of his official duties in that foreign service he is accused of high crimes and misdemeanors, it is the duty of the Government of the United States to see that he has a fair and impartial trial under usual and regular rules of judicial procedure.

He should not be subjected to trial by arbitrary and unusual methods of procedure, contrary alike to the laws of that country and the fundamental principals of justice.

He should not be sentenced to severe and unusual penalties without the right of appeal to the Government of his own country for relief and protection.

Your petitioner further represents that he was improperly tried, unjustly convicted, sentenced to unusual and severe penalties, and as a new trial can not now be had, because of the amnesty by the Cuban Government, which new trial, under uninfluenced conditions, would bring out all the facts, your petitioner submits that as a citizen of the United States he is justly entitled to a full, fair, and impartial investigation by the Congress of his own country.

Your petitioner makes the following statement of the reasons for this application:

The proceedings which led to his conviction were not judicial proceedings, but were special proceedings directed and controlled by a person or persons (or an authority) by whose orders such courts were established and controlled and who in violation of law and established rules of judicial procedure issued orders, instructions, and communications to the courts by whom your petitioner was tried from time to time during the progress of the trial and so influenced and dominated these tribunals as to thwart the purposes of justice and inflict a great wrong upon your petitioner.

Ex parte evidence was admitted to the trial, consisting of ex parte depositions taken in the United States on behalf of the prosecution, at the taking of which neither the petitioner nor his attorneys had opportunity to be present or cross-examine the witnesses, and the trial court refused to summons witnesses in his behalf in violation of Article VI of the "Bill of Rights," amendment to the Constitution of the United States; that his attorneys were not given proper time to prepare the defense, and that evidence vital and material to his defense was withheld, and that the principal witness of the State and practically the sole witness against him was not sworn upon the trial. His testimony was not given under oath. This witness testified as a defendant.

Your petitioner further represents that, under the laws of Cuba, a defendant in a criminal trial is not required to be sworn or put under the sanction of an oath. He can not be punished for perjury if he gives false testimony. This witness was convicted under the same proceedings as your petitioner, and afterwards was pardoned as a "witness for the State in the post-office cases," when in fact he was not declared a witness for the State, as required by law, but was a defendant in the case. This witness took advantage of his position as a defendant to escape liability for perjury if he gave false testimony. He took advantage of his position as a witness for the State to secure a pardon.

In view of these and other reasons your petitioner requests Congress to make a thorough and exhaustive investigation of all his acts in Cuba in connection with the office to which he was assigned under the authority of the United States Government, the methods employed to secure his conviction, to the end that the truth may be discovered, the ends of justice secured, and that your petitioner may be relieved from the unjust aspersions cast upon his character.

And your petitioner will ever pray.

E. G. RATHBONE.

The PRESIDENT pro tempore. What does the Senator from Colorado desire to have done with the petition?

Mr. TELLER. I desire to say just a word.

This petitioner is not now in jeopardy. He was in jeopardy and he would be in jeopardy but for the action of the Cuban Government, for which he is not responsible, in granting a general amnesty. That prevents the petitioner from having a trial, and so he stands before the world as a convicted felon, without any opportunity to have his case reviewed as it would have been provided there had been no amnesty granted. I will say for him that he is not responsible for the amnesty.

Mr. President, this is perhaps a unique question. It is one involving the liberty of a citizen of the United States. With our present relations in other parts of the world, in the Philippine Islands, for instance, this question may arise again, and it seems to me that it is a case which demands the attention of the Senate.

I have presented the petition, first, because I felt that it was the right of every citizen to present a petition of this kind who had been so treated, as he claims to have been, and also because I have known the petitioner for twenty years as a public officer, and because, while not wishing to pass upon the question of his guilt or innocence, I think under the conditions he states there must be a fair presumption, at least, that he has not had the fair trial every citizen is entitled to have everywhere.

I therefore move that the petition may be referred to the Committee on Relations with Cuba, with the instructions to that committee to report what shall be done in this case.

Mr. PLATT of Connecticut. Does the Senator suppose that it would be possible for the committee to report at this session?

Mr. TELLER. No; I had not any idea that there could be anything done now, of course.

Mr. PLATT of Connecticut. Does the Senator desire to have the committee instructed? Will he not be satisfied to have the matter referred to the committee?

Mr. TELLER. I will withdraw that part of my motion. I am quite content to have the committee take it up and do as the committee think best.

The PRESIDENT pro tempore. The petition is referred to the Committee on Relations with Cuba.

REPORTS OF COMMITTEES.

Mr. HANSBROUGH, from the Committee on the District of Columbia, to whom was referred the joint resolution (S. R. 121) giving authority to the Commissioners of the District of Columbia to make special regulations for the occasion of the thirty-sixth national encampment of the Grand Army of the Republic, to be held in the District of Columbia in the month of October, 1902, and for other purposes incident to said encampment, reported it with amendments, and submitted a report thereon.

Mr. GAMBLE, from the Committee on Indian Affairs, to whom was referred the bill (S. 3622) to provide for the payment to the heirs of Darius B. Randall, deceased, for certain improvements relinquished to the United States for the use of the Nez Percé Indians, reported it without amendment, and submitted a report thereon.

MISSOURI RIVER BRIDGE AT PIERRE, S. DAK.

Mr. BERRY. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 14082) to provide for the construction of a bridge by the Duluth, Pierre and Black Hills Railroad Company across the Missouri River at Pierre, S. Dak., to report it favorably without amendment.

Mr. KITTREDGE. I ask unanimous consent for the present consideration of the bill just reported by the Senator from Arkansas.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CALUMET RIVER BRIDGES.

Mr. BERRY. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 15003) to authorize the construction of a bridge by the New York, Chicago and St. Louis Railroad Company and the Chicago and Erie Railroad Company across the Calumet River at or near the city of Hammond, Ind., at a point about 1,200 feet east of the Indiana and Illinois State line, and about 100 feet east of the location of the present bridge of the New York, Chicago and St. Louis Railroad Company across said river; also to authorize the construction of a bridge by the Chicago and State Line Railroad Company across said river at the point where said company's railroad crosses said river in Hyde Park Township, Chicago, Ill., being at the location of the present bridge of said company across said river in said township, to report it favorably without amendment. I call the attention of the Senator from Illinois [Mr. MASON] to the report.

Mr. MASON. I ask unanimous consent for the immediate consideration of the bill.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHARLES E. SAPP.

Mr. BURROWS. I am directed by the Committee on Finance, to whom was referred the bill (H. R. 10775) for the relief of Charles E. Sapp, to report it without amendment, and I ask for its present consideration.

The PRESIDENT pro tempore. It will be read to the Senate.

Mr. COCKRELL. For information.

The PRESIDENT pro tempore. For information.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay Charles E. Sapp, late collector of internal revenue for the fifth district of Kentucky, $200 to reimburse him for special-tax stamps for "worms manufactured," charged to him, which were never received by him.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WASHINGTON MONUMENT ASSOCIATION OF ALEXANDRIA, VA.

Mr. DANIEL. I am instructed by the Committee on Finance, to whom was referred the bill (S. 4546) to provide certain souvenir medals for the benefit of the Washington Monument Association of Alexandria, Va., to report it favorably, without amendment, and I ask unanimous consent of the Senate to put the bill upon its passage.

The Secretary read the bill; and by unanimous consent the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DISPOSITION OF USELESS PAPERS.

Mr. COCKRELL, from the Joint Select Committee of the Senate and House on Useless Papers in Executive Departments, submitted the following report, which was agreed to and ordered to be printed, and to be printed in the RECORD:

The joint select committee of the Senate and House of Representatives appointed on the part of the Senate and on the part of the House of Representatives, to which were referred the reports of the heads of departments, bureaus, etc., in respect to the accumulations therein of old and useless files of papers which are not needed or useful in the transaction of the current business therein, respectively, and have no permanent value or historical interest, with accompanying statements of the condition and character of such papers, respectfully report to the Senate and House of Representatives, pursuant to an act entitled "An act to authorize and provide for the disposition of useless papers in the Executive Departments," approved February 16, 1898, as follows:

Your joint committee have met and carefully and fully examined the said reports so referred to your committee and the statements of the condition and character of such files and papers therein described, and we find and report that the files and papers described in the report of the Secretary of the Treasury in Senate Document No. 348, Fifty-seventh Congress, first session, dated May 7, 1902, and in the House Documents Nos. 582 and 629, Fifty-seventh Congress, first session, being reports of the Secretary of War dated April 26 and May 26, respectively, are not needed in the transaction of the current business of the departments and bureaus and have no permanent value or historical interest, and should be sold as waste paper or otherwise disposed of, upon the best terms obtainable, as provided by law.

Respectfully submitted to the Senate and House of Representatives.

F. M. COCKRELL,
BOIES PENROSE,
Members on the part of the Senate.

E. S. MINOR,
C. F. COCHRAN,
Members on the part of the House.

THEODORE R. TIMBY.

Mr. PRITCHARD, from the Committee on Patents, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the bill (S. 6287) for the relief of Theodore R. Timby, now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887. And the said court shall proceed with the same in accordance with the provisions of such act, and report to the Senate in accordance therewith.

BILLS INTRODUCED.

Mr. HEITFELD introduced a bill (S. 6302) granting a pension to Mattie R. Sutton; which was read twice by its title, and referred to the Committee on Pensions.

Mr. McCUMBER introduced a bill (S. 6303) to prevent misbranding and adulteration of foods and drugs, to regulate interstate commerce therein, and for other purposes; which was read twice by its title, and referred to the Committee on Manufactures.

Mr. DOLLIVER introduced a bill (S. 6304) granting a pension to Rebecca Morton; which was read twice by its title, and referred to the Committee on Pensions.

Mr. PRITCHARD introduced a bill (S. 6305) granting an increase of pension to James B. Taylor; which was read twice by its title, and referred to the Committee on Pensions.

Mr. DILLINGHAM introduced a bill (S. 6306) for the relief of Frances A. Bliss; which was read twice by its title, and referred to the Committee on Claims.

Mr. FRYE introduced a bill (S. 6307) to incorporate the American National Institute at Paris, France; which was read twice by its title, and referred to the Committee on Foreign Relations.

Mr. HANSBROUGH introduced a bill (S. 6308) granting a pension to John Stokes; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 6309) relating to proofs in homestead and other claims to public lands, and punishing false swearing therein, and for other purposes; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Public Lands.

UNIVERSITY OF THE UNITED STATES.

On motion of Mr. DEBOE, it was

Ordered, That there be printed 6,600 copies of Senate Report No. 945, first session Fifty-seventh Congress, being the report of the Senate committee on the bill to establish the University of the United States, of which 4,000 copies shall be for the use of the Senate and 2,000 copies for the use of the Senate Committee to Establish the University of the United States.

REGULATION OF IMMIGRATION OF ALIENS.

Mr. PENROSE submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That there be printed for the use of the Committee on Immigration 10,000 copies of Senate Report No. 2119 and testimony on the bill to regulate the immigration of aliens; and of House of Representatives bill which said report accompanies.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. B. F. BARNES, one of his secretaries, announced that the President had on the 27th instant approved and signed the following acts:

An act (S. 640) to extend the provisions, limitations, and benefits of an act entitled "An act granting pensions to the survivors of the Indian wars of 1832 to 1842, inclusive, known as the Black Hawk war, Creek war, Cherokee disturbances, and the Seminole war," approved July 27, 1892; and

An act (S. 4284) to amend an act entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," approved January 14, 1889.

The message also announced that the President of the United States had on this day approved and signed the act (S. 6270) to amend an act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 13, 1902.

PANAMA CANAL COMPANY.

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution coming over from a previous day, which will be read.

The Secretary read the resolution submitted yesterday by Mr. MORGAN, as follows:

Resolved by the Senate, That under the authority and powers conferred upon the Committee on Interoceanic Canals it is referred to said committee to investigate and report whether any claims exist in favor of citizens of the United States who are bondholders, shareholders, or creditors of the New Panama Canal Company, or the former Panama Canal Company, and to this end the chairman of said committee is authorized, in addition to the other powers conferred upon the committee, to publish a request that the holders of such bonds, stocks, or demands will present statements of their claims to the committee.

And it is also referred to said committee to ascertain and report to the Senate whether any unlawful or corrupt efforts, practices, or combinations exist on the part of any persons or corporations to obtain any part of the sum that may be applied to the purchase of the property belonging to the New Panama Canal Company by the United States under the authority of any act of Congress.

Mr. MORGAN. I ask leave to amend the resolution by adding, on the second page, in line 2, after the words "Panama Canal Company," the words "or to Costa Rica or Nicaragua."

Mr. TELLER. Let it be read as modified,

The SECRETARY. On page 2, line 2, after the word "Company," insert the words "or to Costa Rica or Nicaragua;" so as to make the paragraph read:

And it is also referred to said committee to ascertain and report to the Senate whether any unlawful or corrupt efforts, practices, or combinations exist on the part of any persons or corporations to obtain any part of the sum that may be applied to the purchase of the property belonging to the New Panama Canal Company or to Costa Rica or Nicaragua by the United States under the authority of any act of Congress.

Mr. TELLER. Mr. President, the resolution seems to consist of two things, and it appears to me that it should be properly divided. I am very content to vote for the last part of it, for an investigation; but I do not myself quite see the propriety of calling upon anybody to present a claim against the United States, or to present a claim of that character. I think I should prefer to let the people who have these obligations, if there are any, present them in their own way. I should be glad to vote for the latter part of the resolution, as to the investigation of corrupt methods, etc., and I ask that it may be divided.

Mr. MORGAN. It is divided, not by numbers, but there are two branches of the resolution.

Mr. TELLER. What I mean is that I want to have it divided, so that I can vote for one branch and against the other, if I choose.

Mr. MORGAN. The first branch of the resolution seems to be necessary for the reason that claims exist in the United States of which I have been notified as chairman of the Committee on Interoceanic Canals through a correspondent of the senior Senator from California [Mr. PERKINS]. Some gentleman wrote to him from Sacramento informing him that he was in possession of 100,000 francs, or thereabouts, of the bonds and obligations of the Panama Canal Company. The Senator sent the letter to me as chairman of the committee, and I laid it before the committee and mentioned it in the report.

Now, there are, I have no doubt, many other persons who have bonds in the United States who have no knowledge at all of what is going on here, and who will have no knowledge unless some step is taken to inform them. The bonds are against the old Panama Canal Company, and proceedings have been had in France, which I will undertake to say have been very summary, if they are at all legal, for the purpose of placing the control of the bonds in the hands of a liquidator, or of two liquidators, one for the bondholders and the other for the stockholders.

American citizens holding these bonds may have peculiar rights in regard to them when we purchase the property on which these bonds were an equitable lien. They may be able to say, and I think very likely they will say, that they have had no notice whatever of the French proceedings, and that the French Government, or the French courts, could not assume jurisdiction over them, being citizens of the United States and holding these bonds here, by merely appointing a guardian ad hoc to take charge of their interests without any notice to them at all.

Moreover, Mr. President, the President of the United States

will want to know of the existence of these debts, where they are and who owns them, and all about it, because it will devolve upon him to ascertain whether the $40,000,000, when paid, is to go into the pockets of a few men or whether it is to go into the hands of the proper persons, or whether he has any responsibility of that sort.

Suppose he comes to the conclusion that it is his duty to have something to say as to the direction this money shall take and to whom it shall be applied? Of course he must have the information. The President is not empowered by the act which we have passed here to make an investigation of that kind. There are no agencies I know of that he could resort to for that purpose. My object in bringing this forward was merely to get the information that was necessary to enable him to act intelligently and advisedly in respect of this business. I do not wish, after we have concluded this matter, if we shall conclude it, that any of our people can say that they have been overlooked or neglected.

Mr. MITCHELL. Mr. President, there is so much disorder in the Chamber that we can not hear a word the Senator is saying.

Mr. MORGAN. I am trying to talk as loud as I can.

Mr. TELLER. It is not your fault.

Mr. MORGAN. I hope not. I say I hope when we have gone through with whatever the President is to do under act No. 3110 of the present session, nobody will feel that he has been overlooked or neglected or slighted in the consideration of his interests.

The first branch of the resolution, therefore, gives to the committee the privilege to make an advertisement, calling upon bondholders to present a list of their claims, not with a view of barring them out, but with a view to getting such information in regard to them as the President evidently will desire and has not the means of gaining under any law that exists now. That is the first branch of the resolution.

I have amended the second branch of the resolution so as to make it relate to the moneys that may be applied under this act to the Panama Canal Company and to Nicaragua and Costa Rica.

Under the statement made in the report of the Isthmian Canal Commission we are dealing with a set of men who claim to own the property of the Panama Canal Company and who are very severely discredited in that report. They are represented in that report as men who have in a dishonorable way obtained advantages over the old Panama Canal Company, under contracts and otherwise, who have been prosecuted in the French courts, and some of them convicted, and whose offenses were condoned upon their agreement that they would become stockholders in the New Panama Canal Company. The bill which has been passed authorizes and requires the President to obtain the property of the New Panama Canal Company. In doing that, of course, we have got to deal with these men.

I can not assume, Mr. President, under these circumstances, that there is no occasion for watchfulness, and the country does not so assume. On the contrary, there are suggestions made in the newspapers and elsewhere that combinations exist for the purpose of getting this money into the hands of a few men, so as to deprive the bondholders and stockholders of their just proportion.

It is also suggested that recently large purchases of these bonds and stocks have been made in some of the large cities of the Union with a view to speculation. Well, is it right or not that the Senate of the United States should understand the whole merits of this case when it comes back to us?

As stated by the Senator from Wisconsin the other day in debate here, not a dollar of this $40,000,000 can be paid until the Senate of the United States passes upon the treaty, acquiring whatever title we may obtain from Colombia; that the money can not be paid to the Panama Canal Company until the transaction is wound up and closed by the ratification of the treaty with Colombia by the Senate of the United States. Such I assume to be the clear situation. But, then, all of these transactions for which we have provided to acquire a title from the New Panama Canal Company, and also from the Republic of Colombia, must come back to this body in the shape of a treaty, which must be ratified, because the title is required to be obtained by treaty, which, under the Constitution, must come here.

When this treaty comes back, Mr. President, I very much hope that the President of the United States will be able to say that he is entirely satisfied with every feature of this transaction. I very much hope that it will turn out to be a clean transaction from beginning to end. But suppose it does not. Suppose that this country is excited and agitated by intervenors and mischief-makers, if you please, disreputable scandalizers and slanderers in respect of these dealings, what is the duty of this committee toward the Senate? It is, if the Senate will permit them, to hold their tribunal open and ready for any man who may come here for the purpose of bringing an accusation and bringing witnesses to prove it, so that it can never be said that there has been any concealment or any chance of concealment in regard to these dealings.

If this committee is not authorized, or if some other tribunal is not authorized, to make investigations like this as the transaction progresses, when we get here next winter, if the President is fortunate enough to close this matter by that time, an investigation will then be instituted and precious time will be wasted to go back and look up what this committee can at least obtain in advance, if there is any man in the United States or elsewhere who has objections to make or cause to urge against this transaction.

I do not want to embark in this labor; I do not want to undertake it; but I want to facilitate the building of this canal. I want to provide every means that can be provided for commending whatever the action of the President of the United States may be to the confidence and judgment of the American people, and that can not be if there are men who will be found citing every scandal, suspicion, and it may be false report, which there is no tribunal to investigate.

That is my object in introducing the resolution. I want it to apply as well to Panama as to Nicaragua and Costa Rica, so that when we get through with what the Executive has to do with this matter in the execution of this statute we can say to the world, "Here is a clean sheet; there is nothing wrong about the transaction." I have no more interest in the matter, except to just make that explanation. If the Senate does not want to put that authority into the hands of the committee, well and good.

Mr. SPOONER. Mr. President, the Senator from Alabama [Mr. MORGAN] is altogether correct when he says that under the bill which has been passed it is impossible that the President of the United States shall pay over any money for the property of the New Panama Canal Company until an arrangement with Colombia shall have been made satisfactory to the United States. Of course it would be utterly childish and foolish to buy the property of the New Panama Canal Company for $40,000,000, which could not be utilized without a concession from Colombia until we had also made certain of the concessions from Colombia.

Mr. MORGAN. By treaty.

Mr. SPOONER. Of course, by treaty. In the first place I say a word about that. I do not know how an agreement of this sort, or whatever you may call it, can be made between two independent governments, which is not a treaty unless it is a legislative compact.

I do not care to discuss that, because there is no foundation for it in this situation, but I am utterly at a loss—while I never could challenge the motives of the Senator from Alabama in anything he does here, and never have—I am utterly at a loss to understand the theory upon which this resolution proceeds or to quite comprehend the theory which pervades the Senator's explanation. I do not understand that under the bill which has been passed it is the business of the United States to help the court in France to wind up the affairs of the old Panama Canal Company or intervene in any way in the proceedings of that court. I do not understand that it is the business of the United States at all, as the Senator seems to understand it, if the President finds that the United States can acquire a good title to the property from the New Panama Canal Company and from the court, to further see to it as a condition precedent under the bill, if it shall become a law, that the money paid into the court shall be distributed properly.

It is left to the President to be satisfied that this Government can and will acquire a satisfactory title to the property. That must be by agreement with the New Panama Canal Company and the liquidator, who acts under the authority of the court. Every dollar of money, Mr. President, which under this arrangement goes to the liquidator, whether it be the twenty-four and a half million dollars now arranged by arbitration or otherwise, goes into the registry of the court, to be distributed by the court, which has jurisdiction of the estate, where the claims are to be proved and where the bonds are to be presented, just as in all other cases of the same kind. If the President can not obtain, free and clear of all lien through the court and through the New Panama Canal Company, this title, that is the end of it, as I understand it. If he can obtain it, and the money is paid, then the bondholders and other creditors present their claims to that court. They contest in that court, not here, their priorities, and the question of citizenship of creditors has nothing whatever to do with it.

If an American buys a bond secured by a mortgage in France, he buys it subject to the law governing foreclosures in France and not in the United States; and, to my mind, this resolution would simply lead to a bedevilment of this canal matter. It would put obstacles in the way of the accomplishment of what Congress intends shall be accomplished, to provide that the United States shall step forward, in violation of all rules, as I understand it, to look after the interests of individual bondholders and individual creditors in the fund paid to the French liquidator. They are in the court which has jurisdiction of the debtor and jurisdiction of the property, which will establish

the priority, marshal the assets, and distribute the fund. If they are not satisfied with the decree, interlocutory or final of the court, they have appeal; they can be heard by their counsel there; and it is ordinarily safe to assume that the court of a great nation like France, proceeding under a special law passed by the legislative body of France to govern the settlement of this estate, will deal fairly with it. I can myself see no reason for the assumption by the Senate of a jurisdiction here to become the agent—that is not the function of the United States—of creditors, if there be any, of the old Panama Canal Company in this country, to see to it that in legal proceedings over there they are treated as similar bondholders or similar creditors resident in France are treated.

So I think, Mr. President, it would be without precedent, entirely mischievous and obstructive, in carrying forward this plan upon which the two Houses of Congress have united, to undertake the function proposed by the first part of this resolution, calling upon the creditors and bondholders of the old Panama Canal Company in the United States to send in their claims to the chairman of the Senate committee. For what? Is it a committee to be represented in the court of France? Is the committee to assume the function of seeing to it that in the distribution of the assets by the court of France, American creditors are not treated differently than French creditors? It must not be forgotten that not a dollar of this money which will go to the old Panama Canal Company or its liquidator is the subject of speculation, is the subject of spoliation. It goes directly from the hands of this Government to the court under the arrangement now made.

Mr. President, as to the second branch of the resolution, I do not understand it. I do not understand how any unlawful combination can exist in the United States for diverting from Costa Rica or Nicaragua or Colombia any money which the United States has to pay under the provisions of the bill to either of those governments. I put a provision in the amended bill that the President shall arrange to secure satisfactory title. That is tentative. It may be represented by conveyances deposited in escrow to await acceptance by the United States in the usual way of the concession of Colombia, but certainly the United States, in obtaining a concession from Colombia, deals only with Colombia. Every dollar of the money which, by the ratified treaty, the United States agrees to pay to Colombia, will be paid by the United States to Colombia, and certainly Colombia can be trusted to look after the interests and the funds in the treasury of Colombia.

The same thing is true as to Costa Rica and Nicaragua under the terms of the treaty which the Senator read here the other day. If it turns out to be—and with a single exception it is a good treaty—the treaty which is ratified as the condition precedent to the adoption of the Nicaragua route, that $6,000,000—I believe that is the amount that is to be paid to Nicaragua, is it not?——

Mr. MORGAN. Yes.

Mr. SPOONER. Will be paid directly by the United States to Nicaragua. How can any agreement, corrupt or unlawful combination exist that could intercept that money in its payment by the United States to Costa Rica or Nicaragua? That I can not understand.

If any charge were made affecting the integrity of the legislation, anything involving the honor of either House of Congress, I would be the last man in the world to raise my voice against an investigation of the most searching kind; but this is an advertisement, as the Senator explains it, really for objections to the Panama proceedings in France by American creditors. I know nothing about the ownership of any bonds or stocks of the Old Panama Canal Company in the United States, except what the Senator has spoken of. I apprehend that everybody in the United States knows now, through the newspapers of the country, that Congress contemplates that, if a satisfactory title can be obtained, $24,000,000 or more of money will be paid to the liquidator for distribution by the court to the creditors. It is hardly conceivable that any bondholder will fail to send in his bond, or that any stockholder will fail to be represented. People generally are looking after their interests. But, in any event, I can not bring myself to the notion that the Senate of the United States ought to commit itself to the idea that, even if we can get free and clear of all liens an absolute title to the property, we are still, as a condition precedent, to see to it as a Government that the proceeds going to the liquidator are properly distributed and to otherwise constitute ourselves a sort of foreign guardian of the court in France. I may be wrong about it, but that is the way it impresses me.

Mr. MORGAN. Mr. President, I have read over with a great deal of care very frequently the alleged judicial proceedings in the court of first instance, department of the Seine, in France, in which the foundation was laid for the title which is said to exist and which is about to be transferred from the New Panama Canal Company to the Government of the United States if the title is found to be good. To my judgment, they resemble nothing so much as a drumhead court-martial. The proceedings were entirely summary; they were without notice to the actual parties concerned.

To illustrate, when the court took jurisdiction of this subject-matter under an act of the French Parliament it required notice to be served upon a bondholder or two bondholders residing in Paris, whose names are given in the record. That was taken as service to all the bondholders in the world; and within a short time after that notice was given a decree was rendered putting the bonds in the hands of a receiver and putting all of the property of the company in the hands of a receiver, with a short right of appeal, which has long since expired, and the property, nominally or technically, has passed, through what was called a "judicial sale," into the hands of the New Panama Canal Company, as is alleged, free of the incumbrance of these bonds, the incumbrance of the equitable mortgages upon them by and under the statute being transferred from the property to the proceeds.

Mr. FAIRBANKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Indiana?

Mr. MORGAN. I do.

Mr. FAIRBANKS. How many years ago was the notice given to which the Senator has referred?

Mr. MORGAN. I do not remember precisely, but I think about three years ago.

Mr. FAIRBANKS. Several years ago, at least?

Mr. MORGAN. Yes; and the proceeding was closed on that notice within three or four days after the notice was given, as I remember. It was a very short time.

The bill we have passed here contains a provision that always occurred to my mind as being a little singular, and I shall be very glad to have an explanation of it from the Senator from Wisconsin, if he chooses to give it, as he is the author of it.

SEC. 3. That when the President shall have arranged to secure a satisfactory title to the property of the New Panama Canal Company, as provided in section 1 hereof, and shall have obtained by treaty control of the necessary territory from the Republic of Colombia, etc.—

He shall proceed to pay out the $40,000,000.

Mr. SPOONER. I shall be very glad to explain that section.

Mr. MORGAN. I will first state the point.

Evidently, Mr. President, the record which was presented here as evidence of the title conclusively established in favor of the New Panama Canal Company by adjudication of the court in France, is not to be accepted by the President of the United States as being a final and conclusive disposal of the question of title to that property; but the President of the United States is required to arrange to secure a satisfactory title. That implies that the whole field of negotiation relating to this title is open to the President—the legal field, the equitable field, and the moral field are all open to him—and I shall be very much disappointed in his character if he should fail to look at the legal, equitable, and moral field of inquiry committed to him, and should hold himself bound, as the Senator from Wisconsin avows he is to be, to the rigid letter of the French decree, which cuts off American women and children who hold these bonds and who have had no notice and no opportunity to be heard.

The President of the United States, in acquiring or arranging to acquire this title, will scarcely neglect this duty. He has a right to say to the people with whom he deals, "There are certain persons holding bonds in the United States who, I have been informed, have had no actual notice of these French proceedings at all. They were summary, and were rapidly conducted to a conclusion for the convenience of the parties residing in France. These people have had no notice or intimation of these proceedings at all, and the Congress of the United States has authorized and required me to arrange with you, not merely to accept, but to arrange for the acquirement of this title."

In arranging for that has not the President of the United States at least the equitable and moral right to say that some provision must be made to take care of these American people who had no representative there, who were in widowhood or in infancy, and had no one to stand by them? Are the New Panama Canal Company and its friends so exorbitant and fierce in their demands that they intend to cut off all the people of the United States who hold bonds, it makes no difference what their equities may be, in order to get this money into the possssion of the liquidator and these corrupt men who comprise the body of that New Panama Canal Company, according to the report of the Isthmian Canal Commission? That is the question that has got to be answered here, and this country is not going to be at rest until that is answered.

I propose to advertise, through the instruction of this Senate, so that those people who have got these bonds and who never had notice or intimation of the French proceeding shall have an

opportunity of presenting their cases to the President of the United States and to say to him in arranging to secure a satisfactory title to the property of the New Panama Canal Company, "We ask you to consider our case, and not to permit us to be cut off by the decree of the French court, of which we had no notice whatever." That is the situation. Perhaps I am mistaken, Mr. President; perhaps I am bound, and the people of the United States are bound, to submit to the strict letter of the French law in arranging to get a title to this property.

The Senator from Wisconsin asked the question whether citizens of the United States were not bound by the French law when they held bonds carrying a mortgage or an equity against French property. I admit, as a general proposition that that is so. The Senator in framing his bill might probably have stood on that ground, but he did not choose to do it. Instead of accepting that as a final and conclusive decree, and putting that before the Senate for its action, that we should be bound by it, that all the people of the United States should be bound by it, and that we should have nothing to do or say about the application of the money—instead of doing that, he puts in a provision here that the President of the United States shall make an arrangement much more satisfactory. In making that arrangement the President of the United States ought to have some influence and some power to make an agreement. These people are not likely to receive information, unless provision is made by some authentic body of the United States Government for having these claims presented and notified to the President.

If this resolution is not adopted, I shall address a note to the President, asking if he will not be kind enough to have notice sent to the American people by his Attorney-General that this proceeding is going on; that he is authorized to make an arrangement, and that he is disposed to consult with the holders of these bonds to see that they are not robbed out of their money by a set of men whom the Isthmian Canal Commission have shown here are not only corrupt, but have been convicted of corruption, and escaped their conviction by subscribing money to this New Panama Canal Company.

Mr. President, I am trying to give aid to the President of the United States in the proper execution of the bill which has been passed—that is all I am trying to do—and to obtain whatever shelter he is disposed to give or the Congress of the United States is disposed to give to our own people, who have been cut off from their rights, according to the theory of the Senator from Wisconsin, by this summary proceeding in Paris, of which nobody in the world had any notice but one or two selected bondholders in that city. They got into the courts and fixed up an agreement by which $600,000,000 of interest-bearing bonds were at once put into the hands of the liquidator, and the property of the old company was put into the hands of the same man. Everything was turned over to him, and he became the factotum; he was the corporation; he was the bondholder; he was the stockholder; and in that character of liquidator he has been making contracts backward and forward, passing these vast estates from one hand to another, and, finally, he has got it where the New Panama Canal Company have not any more legal right to it than I have got.

There is the situation, and I thought it was my duty, Mr. President, to try to devise some means by which this thing could be done.

As to the ownership of the bonds and also as to the possible interferences that may have taken place, I want to know before I get through with this—and I will know, if I can find out either privately or publicly—whether or not the lobby that has been hanging around this Congress so thick that you could stir them with a stick, almost, have been receiving or are to receive a part of this $40,000,000.

I want some responsible man who is going to receive this money to get on the stand as a witness and swear, under such circumstances as that his oath would subject him to an indictment for perjury if he swears falsely, in order that the American people may know how much of this money he is going to get when we pay the $40,000,000 to this company. I want to know, and I will try to know before we get through with this matter, in some way or other.

I want to ascertain the facts in a legitimate and proper way. If there is any transaction of that kind in regard to Nicaragua and Costa Rica, let it come out. Let us know whether we are dealing with men who accept bribes; for instance, whether we are dealing with the Panama Canal Company or with presidents of Nicaragua or Costa Rica or Colombia, under some arrangement to put a hundred thousand dollars or two or three hundred thousand dollars of this money into his own pocket. Things of that sort have occured in diplomacy since the first treaty was ever made. They were much more frequent in old times than they are now. They have not entirely passed out. Largesses and stipends and bribes are paid to-day to men who conduct great negotiations; and I want, when we come to the bottom of this thing, to know that the United States has not been scandalized in any respect or by anybody.

I want to open the door and to let a man who says he has an accusation against anybody connected with this affair come forward and bring his witnesses and put his testimony on record, under oath, so as to be liable to indictment for perjury if he makes a false statement.

Let us get at it in that way and not have the air filled with scandals about this thing and clamors of a disturbing sort. It is right that we should do it. Having offered the resolution, I should like very much indeed to escape the responsibility of its execution; but is for the Senate to say whether it wants it or whether it does not.

Mr. SPOONER. Mr. President, just a word. When I drew the amendment I drew it so as to provide that the President should obtain title.

Mr. MORGAN. I know that. I was surprised at the change. I did not know why you made it.

Mr. SPOONER. I was not surprised at the change. I was surprised that I drew it that way in the first place, because that involved obtaining title, which naturally would involve conveyance and payment, and that would be an impossible condition precedent, because that could not, with any possible sense, occur until we had also obtained the requisite concession from Colombia.

So, contemplating an escrow, contemplating an arrangement which would bind the title to be conveyed to the United States when the second precedent condition, to wit, the concession from Colombia, had been obtained, I used the language which I inserted in the bill. I used it in that general way, in order to leave some elasticity in it, not caring anything about the detail of it, provided only that the President had arranged in some way to take for the United States a title to the property of the new Panama Canal Company when through treaty we had acquired a satisfactory concession from Colombia.

It never occurred to me that that threw open the whole subject in France to retrial; that that turned the President into a court of equity to see to it, as a precedent condition to the acquisition of this property, that every American creditor, whoever he or she might be, was, in the distribution of the fund, treated as we have a right to assume and are bound to assume the courts of another country will treat them—as equals.

Mr. MORGAN. If the Senator will allow me, I am bound to deny that the French court has treated American people with any consideration at all in this decision.

Mr. SPOONER. The Senator from Alabama seems to proceed upon the theory that when a corporation, having a mortgage indebtedness outstanding, is placed in the hands of a receiver, its property sequestrated, its assets taken in *custodia legis*, in order to insure the validity of that proceeding every creditor must be notified and have an opportunity *in limine* to be heard. That is not the law in the United States. It is not the law in England. It is not the law, I undertake to say, in any civilized country.

Wherever a receiver is appointed over a corporation which has bonds outstanding, the trustee of the bondholders, the party to whom the property is conveyed in trust for the benefit of the bondholders, is the party who represents the bondholders in the courts, and notice to the trustee, opportunity to the trustee to be heard, is notice to the *cestui que trust*—the bondholders. Otherwise no such administration would occur at all if, with a hundred or two hundred millions of bonds, it was necessary that every bondholder should be hunted up to the uttermost parts of the earth and given personal notice and opportunity to come in and, as an individual, litigate.

Our Supreme Court has decided that the trustee represents the bondholders. He is the party to the suit, and when he is brought into court or when he comes into court the bondholders are in court. He is there under a solemn trust which he entered into when he accepted the conveyance and agreed to become trustee, and is only trustee for the bondholders. So every American bondholder is represented in any court in France through the trustee of the various mortgages.

Mr. MORGAN. If the Senator will allow me, the objection is that the trustee was appointed without any notice to them. He is not their trustee at all.

Mr. SPOONER. When a railway company or a canal company executes a mortgage and conveys the property, before a single bond is issued, of course, to a trustee upon the terms indicated in the instrument, every man and every woman who buys a bond afterwards buys it with notice on the face of the bond itself, as well as being bound to know it, that the trustee represents them; and that is the practice.

Mr. BACON. Will the Senator from Wisconsin permit me to ask him a question rather in the nature of a suggestion?

Mr. SPOONER. Certainly.

Mr. BACON. Is it not true that all of these questions at last

must be determined by the court having jurisdiction and charge of the distribution of the fund?

Mr. SPOONER. That is the point; I am coming to that.

The Senator says that this liquidator was made the receiver of the property, and that the bonds were turned over to him and the stock was turned over to him. I never heard before—although I have had some experience—that where a receiver is appointed for a corporation which has become bankrupt and which had bonds outstanding, there became vested in him the bonds. He is an officer of the court.

Mr. MORGAN. That is exactly what was done in this case.

Mr. SPOONER. That is exactly, as I understand it, what was not done in this case.

Mr. MORGAN. There was a liquidator appointed for the bondholders. What for?

Mr. SPOONER. Certainly.

Mr. MORGAN. A receiver for the bondholders.

Mr. SPOONER. Yes. Did that vest him with the bonds?

Mr. MORGAN. It vested the title in him as a matter of course.

Mr. SPOONER. Not at all.

Mr. MORGAN. I do not mean to the equities of the bonds, but it vested him with the power to control them.

Mr. SPOONER. No; that simply put in the hands of the receiver the property upon which the liens existed.

Mr. MORGAN. There were two receivers.

Mr. SPOONER. It does not make any difference if there were forty receivers.

Mr. MORGAN. One liquidator was appointed to take charge of the property of the corporation and another liquidator to take charge of the bonds and represent the bondholders.

Mr. SPOONER. Two receivers were appointed—or was there one?

Mr. MORGAN. Two. There were three at first, and then it was cut down to two.

Mr. SPOONER. Yes; but their function is precisely the same.

Mr. MORGAN. No; their functions are entirely different.

Mr. SPOONER. Their functions are entirely the same, as I understand it. They were receivers of the property. The court chose one representing the bondholders and one representing the stockholders. But they are receivers of the property, and to insure management of the property which would deal fairly with all classes of creditors and with the stockholders they chose receivers satisfactory to each class. But in the last analysis the receivers were the same. They were officers of the court, as they are in this country, and receivers of the property.

Now, Mr. President, notices, I have no doubt, have been given; they are not given when the suit is commenced; they are not given in such cases as a condition precedent to jurisdiction or administration, but as one of the details of administration. Bondholders at the proper time are given notice to send in their bonds, to file them with the clerk of the court, in our country, perhaps to file them with the liquidator over there, and as the Senator from Georgia says the whole matter is in the hands of the court, and it will be decreed that so much money is due to each bondholder, and no one bondholder can receive more than his proportion nor can he receive more than is paid to every other bondholder with the same equality of lien and with the same preference.

A long time is given to send in the bonds, and the fund which is not claimed applicable to each bond is left in the registry of the court. I know one case where eight years elapsed before the fund was, by order of the court, distributed finally without regard to bonds not presented.

There is no trouble about this matter. Does the Senator suppose for one moment that I was willing to draw a bill which bound the Government down to this particular transfer, to the particular proceedings which have thus far been had?

Mr. MORGAN. I judge not from the language of the bill.

Mr. SPOONER. It would have been an extremely childish performance. I stated on the floor that there were several methods, I thought, by which this title could be secured, and I intended to leave it open to the courts in France, perhaps to the legislative body in France, to devise means, if they have not already been devised, and to carry them into execution, under which this title could be given free and clear of lien to the United States if additional proceedings are found necessary.

I am not at all certain that as the matter stands to-day the title would be satisfactory to me. I am satisfied from what I have seen of the proceedings that with additional proceedings, easily to be had, both on the part of the canal company and the court, a good title can be secured; and if that property comes to the United States free and clear of lien the proceeds of it are to be paid into the court, which is taking care of the interests of the bondholders and the creditors, and notice will undoubtedly be given. Every person who holds a bond will either send in his bond or her bond and receive the dividend on it or that sum will be left in the registry of the court, as is done in all civilized countries, for a considerable period, pledged to the redemption of that bond *pro tanto* when it is sent in.

Mr. MORGAN. How long is that considerable period?

Mr. SPOONER. I know a case in my own experience where it was left twelve years.

I myself have faith in the judicial proceedings in France, so far as I have looked them over. I am not standing in the United States Senate to cast general impeachment upon the integrity of the judicial proceedings of another and a friendly country. It does not follow, because the procedure in France is not entirely in accord with the procedure in the United States, that it is therefore unjust. Every country establishes and regulates its own judicial administration, and every man and every woman who buys property in France, whether it be real property or personal property, such as a bond, buys it knowing that in the end if resort to judicial proceeding shall be necessary that proceeding must be had in France and according to the laws of France.

I do not want this question, which is important to the people of the United States, bedeviled—if I may use that word—by collateral and utterly irrelevant issues. If the President of the United States deems it to be his duty—that may be—to cause some notice to be taken of interests in the United States, that is for him to say. If he wants the Attorney-General to notify creditors in the United States, that is for him to say. But for the Senate of the United States, through a committee, to assume that creditors in the United States, if they be found, can attack this decree, because, although the trustee had notice they have not had personal notice, and that in this way can be found ground for indefinite obstruction in carrying out the will of Congress, I am not prepared to assent.

Mr. FAIRBANKS. Will the Senator from Wisconsin allow me?

Mr. SPOONER. I yield to the Senator from Indiana.

Mr. FAIRBANKS. I wish to recall to the Senator's mind what he discovered upon an examination of these decrees, and that is that the French court found that all of these parties were represented before the court at the time the decrees were passed.

Mr. SPOONER. Yes. This is true. There are interlocutory proceedings always, but in the end a master is appointed always to take account of the indebtedness. Before him the bonds are to be proven.

Mr. MORGAN. There never was any master in this case.

Mr. SPOONER. Perhaps it has not got to that. That does not affect the title; that does not affect the power of the court to sell the property clear of lien. That is a matter of detail in the distribution of the proceeds of the sale by the court, and I assume that what is considered in other civilized countries a fair and just method for attaining justice will be adopted in France. I am quite certain of one thing, that the act of the French Parliament is as fair an act as any equity rules in this country.

Mr. MORGAN, I desire to call the attention of the Senator from Wisconsin, if he will allow me for a moment, to one fact. This law provides——

Mr. SPOONER. It is still a bill.

Mr. MORGAN. That all this matter shall come before the Senate on a treaty.

Mr. SPOONER. What matter?

Mr. MORGAN. Of title to the property.

Mr. SPOONER, No; it does not.

Mr. MORGAN. I so understood it.

Mr. SPOONER. I do not so understand it.

Mr. MORGAN. There is something to come before the Senate. What is it?

Mr, SPOONER. A treaty.

Mr. MORGAN. What treaty?

Mr. SPOONER. As to whether the concession from Colombia or the concession from Costa Rica and Nicaragua, which is to last for all time, is satisfactory to the Senate.

Mr. MORGAN. The treaty from Colombia could not come in any legitimate form, I submit to the Senator, unless the concessions to the Panama Canal Company are gotten rid of in some way.

Mr. SPOONER. What concessions?

Mr. MORGAN. The concessions that Colombia made to the Panamá Canal Company, which expire in 1912. They have to be got rid of. Now, when we come to consider that treaty—and this is the point I wish to suggest to the mind of the Senator—the Senate will necessarily have to review the whole situation. I wanted to provide, if I could, so that the Senate of the United States would have a fair opportunity to know exactly what had taken place and to know whether any bondholders and stockholders in the United States, who are women and children, infants at the time, had an opportunity to be heard upon it.

I want to clear that all off, with a view to getting the Senate to a position where we can make a final decision. I am not trying to delay anything. God knows I have not been delaying this matter for twenty years. I am trying to bring it about so that the

Senate of the United States will have a clear view of the whole situation and be entirely satisfied—and I hope the Senate will be entirely satisfied—that all these rights have been properly taken care of.

Mr. SPOONER. We have first to consider this. First, the President has to notify Congress that under our authority he has become satisfied that the New Panama Canal Company can give the United States a good title and has arranged to secure it. Next, we want two things: First, a treaty with Colombia which consents to the transfer of the property to the United States, and in addition gives us forever the necessary concession to enable us to construct and operate and control the canal. If we do not get either of those things, then that is the end of that part of it.

Mr. MORGAN. If we do not get them all.

Mr. SPOONER. If we do not get them all, or if we get all but one. If either is lacking—that is what I meant—that is the end of the Panama part of the bill——

Mr. MORGAN. So I understand.

Mr. SPOONER. And we are remitted to the Nicaragua route.

Mr. MITCHELL. Mr. President, I was, as the Senate knows, an earnest advocate, but as the sequel shows an inefficient one, of the adoption by the Senate of the Nicaragua route for the proposed canal. The Senate thought otherwise, and agreed to a bill which authorizes and commands the President of the United States to construct a canal on the Panama route, provided he can obtain a satisfactory title to the property which the New Panama Canal Company proposes to sell to the United States for $40,000,000. That amendment to the House bill has been agreed to by the House, and the bill, if it has not already been signed by the President—and I am not advised as to that—is now before the President for his signature.

While I still think, Mr. President, that the Congress has made a mistake, the thing is done. It is an accomplished fact, so far as Congress is concerned, and the whole matter is now in the hands of the Executive. I still hope, Mr. President, and believe that the result in the end will be the construction of the canal on the Nicaragua route. I can not bring myself to believe that the Panama Canal Company can ever make it appear to the satisfaction of the President of the United States that they can give such a title as the President under the language of the law will be disposed to accept. But whether that may be so or not, I am so earnestly anxious for the construction of a canal at some place across the Isthmus that I would hesitate long before I would do anything which might be construed into an obstruction, which might result in delay in the determination of the question whether or not a satisfactory title can be made to the property which the New Panama Canal Company proposes to sell.

I fear this resolution, whether it would have that effect or not, if adopted would be construed by many, by many of my constituents, by many people, as tending to delay in reaching a conclusion upon this matter. Therefore I can not see my way clear to support the resolution.

Mr. MORGAN. Will the Senator from Oregon indulge me for a moment?

Mr. MITCHELL. Certainly.

Mr. MORGAN. I distinctly announced that my purpose is to facilitate action, not to delay.

Mr. MITCHELL. I understand that. I heard what the distinguished chairman of the committee said, and I understand his motive to be right, that it is for the purpose of aiding the President in arriving at a conclusion as to whether or not a satisfactory title can be obtained.

But I think what has been said here by the distinguished chairman of the committee, by which this matter is brought to the attention of the President, will have the same effect that an investigation and a report would have. The attention of the Executive is called to the different prongs of this subject necessary and proper to be considered before a finality is reached, and I have so much faith in the President of the United States that I believe he will not stop with the question simply whether a bare legal title can be made to the property, but that he will look into all sides of the question, that he will look into the question of the probability or possibility of innumerable claims being brought against the United States by bondholders and shareholders of both the old and the new Panama Canal companies.

I believe the President of the United States would hesitate to say that a title to this property was satisfactory within the meaning of the bill provided he at the same time was of the opinion that the United States would be pestered by these claims in the future. The whole question is with him. He is the umpire. I have faith in him. I believe he will proceed without any unnecessary delay in determining the question as to whether or not a satisfactory title to this property can be obtained. For this reason only I am disinclined to do anything that would look like an obstruction, or that any considerable number of people might think would be an obstruction, in regard to the early settlement of this great question.

Therefore, Mr. President, while I exceedingly dislike to part company at this point with the distinguished chairman of the committee, who has rendered such invaluable services in the investigation of all questions relating to the construction of an isthmian canal, I feel by my sense of duty at this moment compelled to vote against the resolution.

Mr. HANNA. Mr. President, I had supposed that the discussion upon the canal question had been finished when, by the action of both Houses, a concurrent agreement had been arrived at, and I wish to say in regard to that, arrived at in the best of spirit. The people of the United States have accepted that verdict, and are satisfied. The discussion of this question, long drawn out, gave opportunity for anybody who had absorbed any of this poison that was in the air or that had come to the public through the channels of the newspapers to mention the fact and call the attention of the country and of the Senate that undue influences were being used, that a lobby was here, for what? In the interests of the New Panama Canal Company to affect the votes of members of this body against their conviction and judgment? If such a lobby, as stated by the Senator from Alabama, for such purposes, was here, and if the result of the vote upon the bill, by insinuation, could be charged to such influences, somebody must have been corrupted in this body.

Mr. President, I must confess that I am more than surprised that such an insinuation should come from the chairman of my committee. As a member of that committee, if there has been such a lobby or such influences here, I have not known it. Nobody has approached me. If the Senator has any charges to make implicating the integrity of any member of this body who voted upon the measure, let them be made and let us have an investigation. But I want something more than newspaper stories and an intimation that it is in the air to convince me of any such influences being present or potent.

Mr. President, as a member of the committee I must protest against the spirit and letter of this resolution. I do not feel myself called upon to act on a jury, or that a drag net be thrown out to see who can be brought into it to give evidence that influences have been used in bringing about the result which will throw, if possible, even more of a cloud than has already been insinuated upon the title of this property and upon the integrity of the men who have supported the measure.

As a member of the committee I should deem it to be unworthy of my position as a United States Senator to be called upon, in the absence of any definite charge or reasonable insinuation, to sit in judgment upon what may be called a corrupt lobby. I have nothing to do with the members of the Panama Canal Company, new or old. I have other means of obtaining information which has guided my judgment toward the position I have arrived at.

I think it would be well to accept the joint verdict of the two Houses and leave this matter where it belongs—in the hands of the President and his advisers. He need not find a suggestion from this body, and above all, I do not think he needs the insinuation that in addition to all else which has been brought forward to cloud the title of this property, calumny and corruption have crept into the mind and guided the act of any member of this body who has voted upon the measure. I do not want to be a party upon a committee to send any such message to the President of the United States nor by my act to admit that there is any ground for it, or any necessity that he should be so advised.

I hope the resolution will be defeated.

Mr. MORGAN. Mr. President, the Senator from Ohio need not have put himself to the trouble of implicating this body. These are men of honor here. They have not been impeached or the slightest impeachment made by me on this subject. Nobody has said, so far as I have ever heard, that any member of the Senate or any member of the House has ever been corrupted. But many men have said, and we know it is true, that the Panama Canal Company, and perhaps other concerns interested in this matter, have had men around the Chamber for the purpose of inquiring and trying to influence votes by argument and otherwise. Of course, they have been paid for their work.

My proposition was to have a tribunal here open to the people of the United States, so that if a man had an accusation of this kind to make against anybody, against any company or government, he could come before this tribunal and bring his witnesses and they could be sworn, and if they commit perjury they could be put in the penitentiary for it, and that by this means we would suppress the slander and calumny which have too often filled the air and which do now. We could furnish a fair opportunity to the world to come here and prove anything they had to say. It would be a conservative and a good arrangement.

We have had all the time this committee, with these very powers, except the specific power that will result from the late legislation, and many a scheme that otherwise would have developed has been prevented by the mere fact that a committee

was here that had the right to call witnesses before them to examine into and explode falsehoods that might be told.

There is no danger, Mr. President, of the Senate or the House either suffering by clearing the atmosphere of calumnies that are brought by other people and circulated through newspapers. The Senator need not put himself at all to the trouble of defending the Senate or the House or any member of either body, for I have made no such accusation, as the Senator knows. Why he has taken the trouble to bring up this matter and put it in the form of an accusation made by me I can not understand, unless he has got something that he wants to cover up. I have made no such allegation at all. My purpose is and has been, as I announced to the Senator from Oregon and the Senator from Wisconsin and to the Senate, to facilitate the final disposition of this matter.

Now, we have a bill here in the process of being made into a law, which requires the Senate to sit in judgment upon this whole transaction when the President gets through with his part of the work. If, during the time this matter is proceeding, valuable information can come to the possession of the Senate through its committee that will facilitate the action of the Senate upon the treaty, if during that time scandals and accusations are made that can be exploded by testimony before the committee, it can be done and the whole field can be cleared of these difficulties and incumbrances, so that when the Senate comes to act upon the treaty finally it will have nothing to do but to consider ascertained and well-known facts. That is all of it, and in any other view of the subject we may be thrown into a cloud of doubt, and suspicion may be raised and brought forward at the last moment for the purpose of getting still further delay upon this movement.

Mr. President, delay is the only thing that I have ever feared about this matter. There are persons in the United States, numbers of them, I think, very large unified interests, that are in favor of delay and have always sought for it. No later than yesterday I received an account taken from a Costa Rican paper of a transaction which has just occurrred, which shows that there is still a large interest concerned in delay. I read a translation from La Prensa Libre, a daily newspaper published at San José, Costa Rica, dated June 16, 1902, under the head of "United States."

SLAVERY OF MARITIME TRAFFIC.

NEW YORK, 13.—The Pacific Mail Steamship Company has just concluded an agreement with the railroad company of the Isthmus of Panama by which the latter agrees to deliver to the Pacific Mail, exclusively, all the cargo coming from North America that is destined for ports north of the Isthmus on the western littoral of Central America.

Now, here is as late as that date an arrangement made which shows a combination of the great railroads of this country for delay and for postponement. They are opposed to the legislation which has been had.

Mr. FAIRBANKS. May I interrupt the Senator just a moment?

Mr. MORGAN. Certainly.

Mr. FAIRBANKS. When he was recently upon the floor I asked him how many years ago the decree was passed conveying the title of the property of the old canal company to the new canal company. I understood the honorable Senator to say some three years ago.

Mr. MORGAN. So I thought.

Mr. FAIRBANKS. I wish to call his attention to the record, showing that it was in 1894, or some eight years ago.

Mr. MORGAN. Well, I am willing to admit it.

Mr. MITCHELL. It was in 1894.

Mr. MORGAN. I had forgotten the date.

Mr. FAIRBANKS. Will the Senator allow me to read a few extracts from the record, in order that we may see exactly what was done? As the Senator knows, there was a special act passed by the French Parliament July 1, 1893, to aid in the reorganization of the canal company.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The Senator from Indiana will please suspend. The hour of 2 o'clock having arrived, the Calendar under Rule VIII is in order.

Mr. LODGE. Will the Senator from Alabama allow me to make a request?

Mr. MORGAN. I am through. I am out of the way.

AGREEMENT WITH KANSAS OR KAW INDIANS OF OKLAHOMA.

Mr. QUARLES. Pursuant to the unanimous consent of yesterday, I ask that House bill 12597 be laid before the Senate.

The PRESIDING OFFICER. The Chair lays the bill before the Senate.

The SECRETARY. A bill (H. R. 12597) to accept, ratify, and confirm a proposed agreement submitted by the Kansas or Kaw Indians of Oklahoma, and for other purposes.

Mr. LODGE. Will the Senator from Wisconsin allow me to make a request, as I am obliged to go into conference?

Mr. BURTON. What is the order?

The PRESIDING OFFICER. The order of business is the consideration of the Kaw treaty, unanimous consent having been given yesterday.

Mr. MONEY. Mr. President, I rise for information. I introduced two days ago a resolution, which was laid over at the request of the Senator from Wisconsin [Mr. SPOONER]. It is a resolution calling for information. I ask if it would be in order to call it up now?

Mr. ALDRICH. Not now.

The PRESIDING OFFICER. The Chair thinks not, for the reason that unanimous consent was given yesterday for the consideration of the bill the Senator from Wisconsin [Mr. QUARLES] has in charge.

Mr. MONEY. I ask the Senator from Wisconsin if he will not yield a moment, that that resolution for information may be considered?

Mr. QUARLES. Allow me to say to the Senator that this is a very short measure. As far as I know, there is not any objection to it, there are no amendments, and, if the Senator will bear with us, it will be out of the way in a very few moments.

Mr. MONEY. I was not aware of the length of time the Senator proposed to consume in discussing or considering this bill. Of course he has the floor.

Mr. QUARLES. I do not presume there will be the least discussion upon it.

TAX ON TOBACCO.

The PRESIDING OFFICER. The Chair lays before the Senate the amendment of the House of Representatives to a bill, the title of which will be read, and calls the attention of the Senator from Rhode Island [Mr. ALDRICH] to it.

The SECRETARY. A bill (S. 3896) to amend section 3362 of the Revised Statutes, relating to tobacco.

Mr. ALDRICH. I ask that the amendments of the House may be read.

The PRESIDING OFFICER. The amendments will be read.

The Secretary read as follows:

On page 2, after line 15, insert as a separate section:

"SEC. 2. That the last paragraph of section 3394 of the Revised Statutes, as amended by the 10th section of the act of July 24, 1897, is hereby further amended so as to read as follows:

"'No packages of manufactured tobacco, snuff, cigars, or cigarettes, prescribed by law, shall be permitted to have packed in, or attached to, or connected with, them, nor affixed to, branded, stamped, marked, written, or printed upon them, any paper, certificate, or instrument purporting to be or represent a ticket, chance, share or interest in, or dependent upon, the event of a lottery, nor any indecent or immoral picture, representation, print, or words; and any violation of the provisions of this paragraph shall subject the offender to the penalties and punishments provided by section 3456 of the Revised Statutes.'"

Amend the title so as to read:

"An act to amend sections 3362 and 3394 of the Revised Statutes of the United States, relating to tobacco."

Mr. ALDRICH. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

SPANISH TREATY CLAIMS COMMISSION.

Mr. LODGE. I should be very glad indeed if I can make a request. I desire to ask that the vote by which the Senate on March 11 disagreed to the conference report on the bill (H. R. 8586) to vest in the Spanish Treaty Claims Commission certain powers possessed by circuit and district courts of the United States be reconsidered.

The bill passed both Houses, and there was an agreement in conference. The House accepted the report, and the Senate, on the suggestion of the chairman, disagreed to it, but the Commission feel that it is very desirable the bill should pass as originally agreed to in conference. My purpose is to get the papers back and ask for an agreement.

The PRESIDING OFFICER. The Senator from Massachusetts moves that the vote by which the Senate disagreed to the conference report on the bill (H. R. 8586) to vest in the Spanish Treaty Claims Commission certain powers possessed by circuit and district courts of the United States be reconsidered, and that the House be requested to return the papers to the Senate.

The motion was agreed to.

APPEALS FROM SPANISH CLAIMS COMMISSION.

Mr. PETTUS. Mr. President, I ask the Senator from Wisconsin to yield in order that I may make a motion which will not be subject to debate at all.

Mr. QUARLES. Hereafter, Mr. President, I shall have to decline to yield, but I yield to the Senator from Alabama.

Mr. PETTUS. I move that the bill (H. R. 12764) amending the act of March 2, 1901, entitled "An act to carry into effect the stipulations of article 7 of the treaty between the United States and Spain," etc., which is a bill granting an appeal from the Spanish Claims Commission to the Supreme Court of the United States on questions of law, be made the unfinished business for

this day after the present bill has been considered and after the Senator from Kentucky [Mr. DEBOE] has addressed the Senate, subject to any conference reports or——

Mr. ALDRICH. I feel constrained to object to that.

Mr. ELKINS. Will the Senator from Wisconsin yield to me?

Mr. QUARLES. For what purpose?

Mr. ELKINS. I wish to give notice.

Mr. PETTUS. I did not understand the Senator from Rhode Island.

Mr. ALDRICH. I object to the request.

Mr. PETTUS. There was no request made; it was a motion.

Mr. ALDRICH. The motion is not in order.

The PRESIDING OFFICER. The Chair would state to the Senator from Alabama that under the rules a motion would not be in order. It would have to be in the form of unanimous-consent agreement. The Chair will suggest further to the Senator from Alabama that when the Kaw treaty bill is through the motion would be in order.

Mr. PETTUS. The Senator from West Virginia has given a notice, and I will not interfere with him.

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from West Virginia for the purpose of giving a notice?

Mr. QUARLES. Very well.

ADMISSION OF CUBA.

Mr. ELKINS. I wish to give notice that on Monday, after the routine morning business, I should like to submit some remarks on the joint resolution (S. R. 115) providing for the admission of the Republic of Cuba into the Union as a new State.

AGREEMENT WITH KANSAS OR KAW INDIANS OF OKLAHOMA.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12597) to accept, ratify, and confirm a proposed agreement submitted by the Kansas or Kaw Indians of Oklahoma, and for other purposes.

Mr. QUARLES. I ask that the formal reading of the bill be dispensed with and that it be simply read for amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The Secretary read the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

ORDERS OF GOVERNOR-GENERAL OF CUBA.

Mr. MONEY. I wish to call from the table the resolution introduced by me a few days ago calling for certain information from the Secretary of War. The resolution went over at the suggestion of the Senator from Wisconsin [Mr. SPOONER], but I have had a consultation with that Senator, and he has withdrawn his objection to the resolution. I should like to have it considered and passed at this time.

Mr. PLATT of Connecticut. I did not hear the statement of the Senator from Mississippi. Was it that the Senator from Wisconsin had withdrawn his objection?

Mr. MONEY. Yes, sir.

Mr. PLATT of Connecticut. All right.

The PRESIDENT pro tempore. The Chair lays before the Senate, at the request of the Senator from Mississippi, the resolution submitted by him; which will be read.

The Secretary read the resolution submitted by Mr. MONEY on the 25th instant, as follows:

Resolved by the Senate, That the honorable Secretary of War be, and is hereby, directed to furnish to the Senate at his earliest convenience copies of all orders, general and special, issued by the governor-general of Cuba from date of the beginning of his administration up to May 20, 1902.

The resolution was agreed to.

REPRINT OF A DOCUMENT.

Mr. MONEY. I ask for the reprinting of a document by Dr. Arthur McDonald. I hold in my hand the proof sheets of the first print. The number already printed is not sufficient to meet the very great demand which has arisen for it by scientific people all over the world. I ask to have reprinted whatever additional number of copies may be printed under the law limiting the cost of printing.

The PRESIDENT pro tempore. The limit is $500.

Mr. MONEY. I ask that whatever number of copies can be printed for that sum shall be ordered to be printed.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

AFFAIRS IN THE PHILIPPINES.

Mr. CARMACK. I wish to renew the request I made on yesterday to print certain matter in the RECORD in connection with the speech heretofore delivered by me. It is a publication in the New York Post giving the record of courts-martial in the Philippines.

The PRESIDENT pro tempore. The Senator from Tennessee asks unanimous consent to print in the RECORD the matter referred to by him. Is there objection?

Mr. MCCOMAS. As a document?

Mr. CARMACK. No; I wish to have it printed in the RECORD in connection with my speech.

Mr. MCCOMAS. Are these excerpts from the testimony taken before the Committee on the Philippines which the Senator desires to have printed in the RECORD?

Mr. CARMACK. Yes. I desire to have the matter printed in the RECORD.

Mr. MCCOMAS. I have no objection.

The PRESIDENT pro tempore. The Chair hears no objection; and the order is made.

F. Y. RAMSAY.

Mr. SIMMONS. I ask unanimous consent for the present consideration of the bill (H. R. 11273) to pay F. Y. Ramsay, heir at law and distributee of the late Joseph Ramsay, $430.42 for balance due the said Joseph Ramsay as collector of customs and superintendent of lights in the district of Plymouth, N. C.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Treasurer of the United States to pay $430.42 to F. Y. Ramsay, heir at law and distributee of the late Joseph Ramsay, being balance due to Joseph Ramsay, deceased, as collector of customs and superintendent of lights in the district of Plymouth, N. C., from March 1, 1859, to April 30, 1861.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

P. A. M'CLAIN.

Mr. BURROWS. I am directed by the Committee on Finance, to whom was referred the bill (H. R. 8209) for the relief of P. A. McClain, to report it favorably without amendment. I ask unanimous consent for its immediate consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to pay to P. A. McClain, collector of internal revenue at Philadelphia, Pa., $366, the amount deposited in the Treasury of the United States by P. A. McClain in payment for adhesive revenue stamps issued to him in the months of June and July, 1898, by the Commissioner of Internal Revenue, and not received, sold, or accounted for by him.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DUPLICATE CERTIFICATES OF DISCHARGE.

Mr. COCKRELL. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 97) to authorize the Secretary of War to furnish duplicate certificates of discharge, to report it favorably with amendments. It is a very short bill and will occupy but a few moments. I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments reported by the Committee on Military Affairs were, in line 10, before the words "of such," to strike out "duplicate" and insert "certificate;" in the same line, after the word "such," to strike out "certificate of;" and in line 11, after the words "as a," to strike out "duplicate" and insert "a certificate in lieu of a lost or destroyed discharge;" so as to make the bill read:

Be it enacted, etc., That whenever satisfactory proof shall be furnished to the War Department that any officer or enlisted man who has been or shall hereafter be honorably discharged from the military service of the United States has lost his certificate of discharge, or the same has been destroyed without his privity or procurement, the Secretary of War shall be authorized to furnish to such officer or enlisted man, or to the widow of such officer or enlisted man, a certificate of such discharge, to be indelibly marked, so that it may be known as a certificate in lieu of a lost or destroyed discharge: *Provided*, That such certificate shall not be accepted as a voucher for the payment of any claim against the United States for pay, bounty, or other allowance, or as evidence in any other case.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill to authorize the Secretary of War to furnish certificates in lieu of lost or destroyed discharges."

Mr. COCKRELL. I am instructed by the Committee on Military Affairs, to whom were referred the following bills on the same subject, to ask to be discharged from their further consideration, and that they be postponed indefinitely:

A bill (S. 3931) to amend an act of Congress entitled "An act authorizing the Secretary of War to furnish a duplicate certificate of discharge when same has been lost;" and

A bill (S. 2427) to amend section 1 of an act authorizing the Secretary of War to furnish a duplicate certificate of discharge where the same has been lost, approved March 3, 1873.

The PRESIDENT pro tempore. The bills will be postponed indefinitely, in the absence of objection.

HAWAIIAN INVESTIGATION.

Mr. MITCHELL. I ask unanimous consent that the resolution submitted by me on the 13th instant may be now taken up and considered. I will state that when this resolution was before the Senate the other day the Senator from Rhode Island [Mr. ALDRICH] made some criticism regarding it. I have framed a substitute which meets the approval of the Senator from Rhode Island, and which, I think, will meet the approval of the Senate. I send the substitute to the desk and ask that it be read.

The PRESIDENT pro tempore. The resolution submitted by the Senator from Oregon on the 13th instant will be read.

The Secretary read the resolution, as follows:

Resolved, That the Committee on Pacific Islands and Porto Rico be, and is hereby, authorized and directed to investigate, inquire into, and ascertain the general condition of the islands of Hawaii, the administration of the affairs thereof, the area, condition, quality, and value of the public lands, the leasing, selling, or disposing thereof, and to make such recommendations as may be deemed necessary; to investigate and ascertain the area, condition, quality, and value of the crown lands, the rents, issues, or other revenues or proceeds received therefrom since January 17, 1893, whether or not the former Queen of said islands now possesses any legal or equitable right, title, or interest in or to the same, or whether said Queen has any claim against the United States, legal or equitable, by reason of having parted heretofore with her title therein; the granting of franchises or other privileges; the question of immigration; the condition of labor therein, and to inquire into and report upon all other necessary matters pertaining to the executive, legislative, judicial, educational, tax, school, financial, and other systems thereof.

For the purposes aforesaid said committee, or a subcommittee thereof, appointed by the chairman, shall have power to send for persons and papers, to visit the islands, to administer oaths, to sit during the recess of Congress, and said committee shall report at the beginning of the next session of Congress the result of its investigations; the expenses of said investigation to be paid out of the contingent fund of the Senate.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MITCHELL. I now ask that the substitute for the resolution, which I have sent to the desk, may be read.

The Secretary read as follows:

Resolved, That the Committee on Pacific Islands and Porto Rico be, and is hereby, authorized and directed to investigate the general condition of the islands of Hawaii and the administration of the affairs thereof, and for the purposes aforesaid said committee, or a subcommittee thereof, appointed by the chairman, shall have power to send for persons and papers, to visit the islands, to administer oaths, to sit during the recess of Congress, and said committee shall report at the beginning of the next session of Congress the result of its investigations; the expenses of said investigation to be paid out of the contingent fund of the Senate.

The PRESIDENT pro tempore. Was the original resolution reported from the Committee to Audit and Control the Contingent Expenses of the Senate?

Mr. COCKRELL. Yes; it was reported by the Senator from Nevada [Mr. JONES].

The PRESIDENT pro tempore. The question is on the amendment in the nature of a substitute for the resolution presented by the Senator from Oregon.

The amendment was agreed to.

The resolution as amended was agreed to.

EXAMINATION OF DRUGS.

Mr. HANSBROUGH. I am directed by the Committee on Finance, to whom was referred the bill (S. 6298) to amend section 2743 of the Revised Statutes of the United States concerning the examination of drugs, to report it favorably without amendment. It is a very short bill, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to so amend section 2743 of the Revised Statutes that the special examiner of drugs, medicines, chemicals, chemical preparations, dyes, dyestuffs, paints, oils, varnishes, and other similar articles, at Philadelphia, Pa., shall receive a salary of $1,800 per annum, and shall be paid each year quarterly.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WILLIAM S. HOSACK.

Mr. PENROSE. I ask the Senator from Kentucky to yield to me to secure the passage of a bill of only a few lines.

Mr. DEBOE. I do not wish to detain the Senate by yielding to Senators.

Mr. PENROSE. I think I shall be the last Senator to ask the favor.

Mr. DEBOE. I will yield to the Senator from Pennsylvania, but I must refuse after that.

Mr. PENROSE. I thank the Senator. I desire to call up the bill (H. R. 2487) granting an increase of pension to William S. Hosack.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of William S. Hosack, late of Company G, Seventy-eighth Regiment Pennsylvania Volunteer Infantry, and to pay him a pension of $20 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ELECTION OF UNITED STATES SENATORS.

Mr. DEBOE. Mr. President, I ask that the amendment which I offered a few days ago to House joint resolution No. 41, proposing an amendment to the Constitution of the United States to elect Senators by popular vote, be laid before the Senate.

The PRESIDENT pro tempore. The Chair lays before the Senate the amendment indicated by the Senator from Kentucky, which will be read:

The Secretary read as follows:

Amendment intended to be proposed by Mr. DEBOE to the joint resolution (H. J. Res. 41) proposing an amendment to the Constitution providing for the election of Senators of the United States, viz: Insert the following:

"The qualifications of citizens entitled to vote for United States Senators and Representatives in Congress shall be uniform in all the States, and Congress shall have power to enforce this article by appropriate legislation, and to provide for the registration of citizens entitled to vote, the conduct of such elections, and the certification of the result."

Mr. PETTUS. I desire to know if it is proposed to take any action on the amendment which has just been read?

Mr. DEBOE. It is not my purpose to ask the Senate to take any action on the matter at present.

The PRESIDENT pro tempore. The Senator from Kentucky simply desires to address the Senate.

Mr. DEBOE. Mr. President, some days ago, when this proposition was before the Senate for discussion, my distinguished friend the Senator from Kentucky [Mr. BLACKBURN] took occasion to refer to the recent gubernatorial contest in and the election laws of the State of Kentucky. No one regrets, Mr. President, the past political affairs of my State more than I do. There is not a better people in any State in this Union than live in the Bluegrass State. They are a chivalrous, patriotic, and liberty-loving people. It is not my purpose this evening to indulge in any unpleasant things, although I realize that few States in this Union have gone through such political upheavals as we have in the State of Kentucky. I would much prefer to say something kind about each and every citizen of that State than to say anything against anyone that would reflect upon him in any sense whatever. And it is not my purpose this evening in discussing the proposition to reflect upon anyone. But when a duty is thrust upon me I can not well afford to run away from it.

I have not invited this proposition to the Senate of the United States. I was here when the political excitement was at its highest in the State, and I refused, after consulting with some of the ablest and the wisest Senators on both sides of the Chamber, after many unkind insinuations had been made, both by individuals and through the press, to say anything upon the subject. But I have passed through all of that and care but little about it.

My friend claims that the election law which was in force in 1899 in that State, known as the Goebel law, was a fair and just measure. I do not claim that for the law. I think it was a vicious and corrupt measure. In brief, the law provided that the legislature should elect three State commissioners, known as the State board of election commissioners, with the power to act as a canvassing board and to certify the result as to who was elected on the face of the returns. The board also had the power of a contest board. It was a self-perpetuating machine. It had the power to fill vacancies, when they occurred, by the remaining member or members of the board.

The State board appointed a county board of election commissioners, consisting of three persons, and they could all be of the same political party, as those of the State board could be. This county board had the power to act as a canvassing board, and also in certain cases to act as a contest board.

The county boards appointed the county election officers in each and every one of the counties in the State, and while the law provided that they should be equally divided between the two leading parties, yet if this board saw fit to appoint unworthy, treacherous, or incompetent persons there was no way to prevent it. Under the law the actions of the board, notwithstanding the statement of my distinguished friend, were made final and conclusive; that is, of the State board and of the county boards.

Mr. President, instead of being a law to prevent fraud, as its friends claim for it, it was a law to create frauds in elections, and there were more frauds practiced under the operation of that law when it was in existence in the State of Kentucky than were ever committed in that State since it came into the Union.

It simply took from the people the right of self-government. It struck down the very fundamental principles of democratic and republican forms of government. It was a menace to our free institutions. It put within the hands and the power of one party the control of the affairs of that State, regardless of the will of the majority.

Now, Mr. President, when the effort was made to enact that law there was a bitter protest against it throughout the State, not only in the Republican party, but in the Democratic party. Hundreds and thousands of the best men in that party protested bitterly against the enactment of that measure, and it was only passed by the severe use of the party lash.

If it was fair, as my friends claim it was, I want to ask this question: Would they have been willing to have intrusted that law into the hands of the Republicans of that State or into the hands of the Republicans of New York, Indiana, Ohio, Mississippi, Tennessee, or any other State of this Union, and to have given the Democrats no more chance to protect their rights than that law gave the Republicans of Kentucky to protect theirs? I think the answer would be unanimously "No."

Now, Mr. President, I have a statement here as to the nature of the frauds in the First Congressional district, which is largely Democratic, and also a comparison between the votes of the First and the Eleventh Congressional districts in the years 1895 and 1896, which I desire to submit for printing without being read.

The PRESIDENT pro tempore. The Chair hears no objection; the matter will be printed in the RECORD.

The matter referred to is as follows:

To show the utter absurdity of the charge that frauds in the Eleventh district in 1896 justified the passage of the Goebel bill we append a table showing the Democratic and Republican vote in the First and Eleventh districts in 1896 and compare that vote with the one of 1895. The same county judges who appointed the election officers in 1895 appointed them in 1896. The largest per cent of Republican gains in the Eleventh was 60 per cent in Bell, and the next largest was 40 per cent in Russell, while the Democrats were given gains of 70 per cent in Clinton, 66 per cent in Pulaski, 60 per cent in Letcher, 53 per cent in Whitley, 52 per cent in Laurel, etc. The average Republican gain was 27 per cent, and that of the Democrats 38 per cent. In the First district the Democratic gains were 166 per cent in Carlisle, 151 per cent in Hickman, 137 per cent in Marshall, 131 per cent in Ballard, 107 per cent in Graves, 102 per cent in McCracken, etc., while the Republican gains were 143 per cent in Fulton, 115 per cent in Hickman, 62 per cent in Ballard, etc. The average Democratic gains for the district was 96 per cent, and the average Republican gains was 35 per cent. In the Eleventh district Republican election officers gave the Democrats 11 per cent greater gains than were given to the Republicans; but in the First district Democratic election officers gave the Democrats 61 per cent greater gains than were given to the Republicans. No comments are necessary.

Mr. DEBOE. Mr. President, some of the ablest Democrats in that State denounced the measure in the strongest terms. Some of the Senator's own friends denounced it as unfair and unjust, and I call them to testify as to whether what I have said is true or is not. While it was pending in the Senate of Kentucky one of the leaders in the Democratic party in that body, Senator Bronston, said of the bill:

"Upon the repeated demand of the Democrats of my district twice publicly refused, I resigned the office of Commonwealth's attorney, allowed my successor to earn and draw $11,000 salary, which otherwise would have been mine; gave up my lucrative law practice and came to this Senate to serve my party and friends in an effort to elect Jo Blackburn to the United States Senate.

"The present law passed by a Democratic general assembly—

That is the old law—

"and its essential recognition of the rights and power of the people to rule and govern themselves locally, sanctified by an experience of a century, authorizes the people in each of the 119 counties of the Commonwealth to elect by popular vote a county judge, who with restrictions and under heavy penalties, and subject to revision by the courts, appoints the officers of election. Under the proposed law this is repealed, and three State commissioners to be elected by this general assembly shall appoint three commissioners from each county, with right of removal and change at any time and without cause. This county board of commissioners shall in lieu of the county judge appoint all officers of election, whom they may remove and change at any time, and without cause, subject to no revision and liable to no penalties. The present law provides that the county judge, county clerk, and sheriff, if not candidates, shall canvass the returns, with limited powers as now defined by the courts, and subject to heavy penalties, even to dismissal from office, for violating the law or failing to discharge their duty, and whose certified result is subject to revision by the courts of the county and appellate court. Under the proposed law the county boards of commissioners examine returns by election officers, certify results without any penalty named in the law or any power of revision by the courts. The present law provides for boards of contest before sworn officers of the law, guarded by prescribed forms and subject to right of appeal to the courts of the land. The proposed law gives the sole power of determining contests to these irresponsible and partisan boards, without any expressed form, restrictions, or penalties."

No majority would ever submit without bloodshed to such despotism, and by the provisions of this bill you invite resort to force and greater frauds.

Law-abiding and peace-loving citizens may have submitted to many frauds practiced by each party in elections, committed under pretense of fairness and equality by men occupying official positions; yet if you confront them with a machine, the avowed purpose of which is to carry the election for its favored candidate, how can you expect tame submission? Popular indignation would desert the party, and resist the power of such a triumvirate, by acting and voting with political opponents.

Mr. President, everything that Senator Bronston said in regard to that law is true. The prophecies that he made have come true.

But I desire to call the attention of the Senate to what another distinguished Democrat said of that measure while it was pending before the legislature. I say he is a distinguished Democrat because he has been the leader for many years of the Democrats of the South. He is now being suggested as the Democratic nominee for President of the United States in 1904. Whether my friends Grover Cleveland and Mr. Bryan will honor him with that great position I can not say. I refer to the Hon. Henry Watterson, editor of the Louisville Courier-Journal. The following editorial appeared in the Courier-Journal of February 25, 1898, and needs no comment:

"The people may well stand aghast before the revolutionary election bill which has, like some dread monster, suddenly emerged from the fastnesses of passion and error through which the legislature has been threading its tortuous way. It is safe to say that the annals of free government will be sought in vain for anything approaching it in shameless effrontery and unconcealed deformity. The records of reconstruction furnish nothing to compare with it. The Brownlow despotism in Tennessee was considered tolerably reckless and tolerably thorough in its day, but the Brownlow despotism at its worst ventured upon nothing so boldly, wholly bad as this.

"In all the force bills meditated by the radicals in Congress during the dark days of reconstruction there were discernible some pretense and pretext, some lingering memory of Republican instincts and traditions. Even in the plebiscites of Louis Napoleon there was the outer display of a just electoral process and purpose. This force bill gives the voters of Kentucky not a ray of hope. It makes no claim or show of fairness. It places exclusively in the hands of three irresponsible persons to be named by the authors of the measure itself the entire electoral machinery of the State. That is the whole of it. In one word and at one fell swoop Kentucky is to become the subject of a triumvirate which is to decide who shall hold office and who shall not. Nominally, the people are to be permitted still to go through the form of elections. They are to be permitted still to vote. The ballot box is not actually abolished, but the triumvirate is, in each and every case, to cast up the returns and determine the result.

"Naturally, the question recurs, Why three commissioners when one would serve the purpose quite as well? Thrift being the order of the day, why not an act naming a single commissioner to cast a single vote for the entire State, as is sometimes done in local board meetings? Why waste the hard-earned money of the tax payer on a triumvirate, when a dictator would come so much cheaper?

"But the Goebel bill will never be enacted into law. The Democrats of Kentucky have not sunk so low as that. There is a limit even to the fury of factional passion. There are bounds set upon the prosperous rapacity of sectional leadership. The people can not have gone completely and incurably mad. There is yet some grace left in the manhood of Kentucky to rise in its might, and to say to this wicked attempt to steal its birthright of freedom in open day and before its very eyes, "I forbid!"

"The time is short, but everywhere throughout Kentucky there should be public meetings held to protest, and to send delegations to Frankfort to protest against this monstrous usurpation of power by a few unscrupulous and designing men. If this be not done, and done quickly and decisively, then are free elections and free government at an end in Kentucky, and the State given over into the keeping of a clique of self-appointed party managers, not to be recovered by the people short of a political revolution. With the machinery of this Goebel bill in his hands, Mr. Goebel becomes as completely master of the situation in Kentucky as Diaz in Mexico, or Menelek in Abyssinia."

In another editorial in the Courier-Journal of March 1, 1898, he said:

"We republish this morning from the issue of the Courier-Journal for Friday, February 11, the Goebel election bill in full. The statement that the Courier-Journal has not published it is as false as the statements relating to us usually are. The pretense that

we are afraid to publish it is answered by the act itself. It is a simple machine for turning over all the elections in Kentucky to a centralized despotism at Frankfort, consisting of three commissioners, to be elected by this legislature, and having absolute power to determine who shall hold office and who shall not during their four years' term of incumbency. This is not only usurpation of power, it is revolution in its broadest sense. It is not merely a force bill, it is a radical despotism. It disfranchises every voter in the State whom the triumvirate at Frankfort, or their satraps in the counties, see fit or find it needful to disfranchise. At one fell swoop it abolishes free elections in Kentucky. If any man doubt this, there is the bill before his eyes. If he dispute it, he proclaims himself equally a conspirator and falsifier. Nothing worse than this—more shameless, barefaced, and absolute has ever been suggested in all the annals of reconstruction, radicalism, or misrule in any age or any country. If the people of Kentucky submit to it, then they are a race of slaves, and will merit all the woes and ruin it brings them, including the heralding of their name as slaves and the proud name of the old Commonwealth as a byword to the ends of the earth."

Mr. President, every word that was said of that measure in the editorial is true, and the prophecies and the suggestions made by Mr. Watterson have also come true.

Notwithstanding my Democratic friends claim that the law was just and fair, after the election in 1899, Mr. Beckham was forced by his own party friends to call an extra session of the legislature, either to repeal or modify the law, and the legislature did modify the law to some extent. It was under this law (Goebel law) that the election of 1899 in Kentucky was held. The Republicans nominated Gen. W. S. Taylor and the Democrats Senator William Goebel for governor.

The campaign wa sone of unpleasantness, one of great strife. There was bitter feeling in the Democratic party against their nominee. It is not my purpose to go into a detailed account of the causes of this feeling against him, but it is true, known of all men in that State, that he had his bitter enemies and they were within the Democratic party. Some of them were made by an unfortunate occurrence between Mr. Goebel and a citizen of that State. The methods pursued by him and his friends to secure the nomination created the greatest excitement that was ever witnessed in the State over the nomination of any candidate. It was claimed that he received his nomination by foul means, by the aid and assistance of the mayor of Louisville and the sheriff and the police. He had large bodies of policemen in the convention to aid him. That accusation was made all over the State. It split the Democratic party in twain, and the independent element nominated ex-Governor John Young Brown, who received over 12,000 votes at the polls. Among his supporters were some of the best and ablest men of that State. They were the friends of Mr. Bryan, and they were Democrats tried and true.

The feeling between these two elements of the Democratic party, as I have said, was most intense, and the methods pursued in the conduction of the election by the friends of Mr. Goebel were of a corrupt nature. They resorted to all of the means to commit frauds that are known to elections in this country. When they saw fit to take advantage by removing election officers, they did it. In many places they refused to give the Republicans representation in the election officers, and they were absolutely at the mercy of their enemies in that contest. I have not time to go into all of those details, and I am not going into them. But in Covington, Mr. Goebel's home, his friends put Republican election officers out of the polls by armed force, as they did all over the State.

But my distinguished colleague, in discussing the Goebel bill the other day, criticised the distinguished Senator from New York [Mr. DEPEW] because he had not read the CONGRESSIONAL RECORD in the Moss-Rhea contest in the other House. I read from the CONGRESSIONAL RECORD of April 11, page 4239. My colleague, after he had discussed the question to some extent, used this language:

"Before I pass from it I would inform the Senator what he has probably neither read nor heard. If he will take up the CONGRESSIONAL RECORD he will find that within the last fortnight a contested-election case was brought in the other House of Congress. It was elaborately argued by three Republican members of the House Committee on Elections, three men who ought to be among the best equipped and ablest in that body because of their assignment to service on that committee, three men who I think are among the ablest and best equipped of the House membership to discuss such a question.

"It was argued at length, and not one of the Republicans taking part in the discussion of that election contest, as shown by the CONGRESSIONAL RECORD, though the Goebel law was the very foundation of the contention, ever charged, ever said, or ever intimated that that was not a fair election law, but upon the contrary they admitted that it was.

"I am not traveling out of the record. I am not referring to matters that have taken place in the other House. I am speaking of the CONGRESSIONAL RECORD as it is printed and laid upon the desk of every Senator for his own information and instruction. Not a man who took part on the Republican side in the debate of the Rhea-Moss contest in the House ever dared to charge or to intimate that the Goebel election law was lacking in justice or wanting in fairness. How could they when the supreme court of the State had upheld it and the Supreme Court of the United States had upheld the opinion of Kentucky's court?"

I do not doubt for one moment but what my distinguished friend believed that he was quoting correctly from the members who discussed that election. Mr. POWERS, of Maine, was one of the members of the committee who discussed the Rhea-Moss contest. This is from the CONGRESSIONAL RECORD of March 24, 1902. He said:

"The law permitted them to select the Republicans that they saw fit to choose. The law under which this election was held, and which had been repealed, but which remained in force until this election was held, did not permit the Republicans or any minority party to present the name of a man who was to represent them on that board, and if you will let the opposing party in almost any State select as the Democratic members of a board those whom I choose to call Democrats and to have them act as they did in all the precincts—men in many cases unfit, and who knew nothing about the laws of election—I think it will have no great trouble to get votes not counted or thrown out as they were in this case."

Nowhere in that speech does he intimate that the Goebel law was fair or just, but he characterizes it as I have read from him. In one sentence he referred to the Kentucky election law; but that was the law that regulated and controlled the qualification of voters, and not the methods by which elections were conducted. The Goebel law was an amendment to the old law. Not a solitary word can be found there where he admitted that that law was fair or just. But there was another Republican who discussed it. Mr. BOREING, from Kentucky, said:

"Under the operation of the Goebel election law the election machinery of the State is an adjunct to the political organization. The central board, composed of three State commissioners, are a partisan political body elected by the legislature, which itself is elected under the most unjust apportionment law that ever disgraced the statute books of any one of the forty-five great Commonwealths of the Federal Union, an apportionment that disfranchises one-half the Republican voters of Kentucky. According to the showing of the Democratic board in Kentucky Mr. Beckham carried the election for governor by 3,500 majority; but out of 100 members of the State legislature the Republicans have 26 and the Democrats 74. How do you figure this? It is by making the Republican districts twice, and in some instances three times, as large as Democratic districts.

"Now, Mr. Speaker, from this partisan State board emanates all power in Kentucky to hold elections, make returns thereof, to canvass and tabulate the votes, and try and dispose of contested-election cases, except the legislature itself is the board of trial of contested cases for governor and lieutenant-governor. The power goes out from the State commissioners through the county commissioners, to the officers in the precincts, who are clothed with the authority and charged with the duty of holding elections. These creatures of the parent board hold the elections and report back, through the county commissioners, to their masters.

"The State commissioners have the right at any time to remove the county commissioners and appoint others in their stead."

Mr. President, there is not a line nor a word in that speech of Mr. Boreing's, who discussed the Rhea-Moss contest, intimating that the Goebel law was fair and just, but he characterizes it in that language as being unfair and unjust.

There was one other member who discussed that measure and who was on the committee, Mr. GAINES of West Virginia. He said:

"It is not to be forgotten in this case that the contestant proceeded in the election in Kentucky under great and grave disadvantages. The committee in this case had hoped, in view of the fact that there were enough ballots here to settle this controversy by a mere count, to be relieved of the necessity of going into the question of the Goebel election law—that fraud at the very source of elections in the State of Kentucky—as well as to be relieved of the necessity of going into the question of fraud at the election under that law. But since so much has been made of it, let me for a moment call the attention of the House to the Goebel election law.

"That law provides, in the first place, that a partisan body shall be elected by the legislature, consisting of two Democrats and one Republican—not a Republican of Republican selection—

He was mistaken. They were all Democrats—

"but of Democratic selection. It provides that these three shall,

in every county in the State, appoint an election board, of which the Democratic party has contol—giving that party control in every county in the State. And that election board does what? It appoints election officers, and the law requires that the Republicans shall have representation among the election officers, but it does not require that they shall have representation of their own choice."

Mr. President, these are the three Republican members who discussed that measure. I will be very glad if the Senator can show me one line or one word where either one of them claimed or charged that that law was fair or just. Each and every one of them denounced the law as being unfair and unjust.

I said a while ago that the political contest over the gubernatorial race was very bitter, and it was. My distinguished friend complained very much about the militia being called out in the city of Louisville. It is true that they were called out on the day of election. He was speaking of the grounds of contest and of the question of tissue or thin ballots, and he then said:

"The vote of the city of Louisville was protested, but on another ground altogether, and that was because a Republican governor of the State of Kentucky, Mr. William O. Bradley, left his office in Frankfort, trampled the provisions of the constitution beneath his feet, shipped a lot of Gatling guns and collected soldiers in the city of Louisville, and issued a proclamation declaring that on the day of election he himself, in violation of the plainest mandate of the constitution, would take command of his military and take charge of the polls of the city of Louisville."

Governor Bradley was invited to the city of Louisville on Saturday before the election to make some speeches. He came and made those speeches. He remained over until Monday and was requested by some of his friends to speak at the Auditorium on Monday night before the election. The excitement in the city was intense. The people of that city had witnessed in the past several very serious riots.

I wish to state now that for more than twenty years it had been the custom in the city of Louisville to put some of the militia in the armory on the day of election, as the testimony of Democrats and Republicans in the record shows, and it is not denied by a single individual.

At the suggestion and the earnest request of hundreds of citizens of that city the governor placed some of the militia in the armory for the purpose of protecting the people in their rights, as the laws of the State gave him the right to do, and he did not put them there until he was thoroughly convinced that it was his duty to do so, as the evidence in the record in that contested case shows.

Now, what does the law provide? The Senator said the law provided that the governor shall direct the officer in charge of militia to report to certain civil officers—to the county judge, or the sheriff, or the coroner if the sheriff is not in the county. He was mistaken in quoting the law. The right to call out the militia in the State of Kentucky is found in section 2672 of the Kentucky statutes of 1899, which were in force when this election was held:

"SEC. 2672. GOVERNOR MAY ORDER MILITIA INTO SERVICE.—It *shall* be the duty of the governor, whenever he may deem it necessary for the safety or welfare of the Commonwealth, or when any actual or threatened invasion, insurrection, domestic violence, or other danger to the public interest make it necessary to employ force in aid of the civil power of the government for the enforcement of the law, or to preserve the peace and security of the rights and lives or property of the citizens, to order into active service so much of the State guard or military force of the Commonwealth as he may deem necessary. The State guard can only be ordered into service by the governor."

There the governor had the right to call out the militia. In section 2674 we find the officer to whom it is the duty of the commanding officer of the militia to report:

When in active service the governor may—

Not "shall"—

direct the commanding officer of the military force to report to any one of the following-named officers of the district in which the said force is employed: Mayor of a city, sheriff, jailer, or marshal.

It was in the discretion of the governor as to whether he would direct the commanding officer of the militia to report to any civil officer. He had a right to take into consideration the situation. He had filed before him many affidavits showing that it would be unwise and unsafe to have the commanding officer of the militia report to the mayor, the sheriff, or the jailer. The people of the city of Louisville witnessed and realized the part which they took in the primaries of that city prior to the election as well as the part they took in the convention which nominated the Democratic candidates.

The feeling between the two wings of the Democratic party was one of the greatest excitement.

The Senator says that the governor issued a proclamation that he would take charge of the polls on the day of election. I will read the only proclamation that I ever saw or heard of coming from the governor, and it was in a letter addressed to Mr. Willson.

On page 27, of the transcript of the record, Volume II of that contested case, we find the letter of the governor to Hon. A. E. Willson, of Louisville, on Monday evening:

"Hon. A. E. WILLSON.

"MY DEAR SIR: In view of the intense public excitement now prevailing in this city, and the fact that numerous affidavits of good citizens have been filed with me showing that there is great danger of riot and bloodshed and that citizens will be prevented by force and fraud from exercising their right in this city to-morrow, and in view of the further fact that I have been and will be called upon to act as chief police-officer of the Commonwealth, I have concluded that it would be improper for me to deliver an address this evening.

"I will thank you to assure those who may kindly honor me by their presence that I will remain in the city and see that every voter, irrespective of political opinion, is protected in his right to vote and have his vote counted, and the public peace maintained at all hazards.

"I do not intend to surround the polls with bayonets or intimidate voters. I do intend that they shall not be intimidated and will act promptly wherever necessity arises.

"Yours,

"W. O. BRADLEY."

That is the only communication that I ever saw published in regard to that matter. Right on the eve of the election, just before the governor called out the militia, the Democratic election commissioners of the city of Louisville, county of Jefferson, agreed with the Republican member not to make any changes except those that were absolutely necessary to fill vacancies where they occurred. They agreed with the Republican member, ex-United States Judge John W. Barr, a man of the highest character, a lawyer of eminence, loved and respected by all people of that State irrespective of party, who had served for twenty years upon the Federal bench, not to make any change in the election officers. After having made that agreement, the two Democratic members corruptly and arbitrarily removed 87 Republican officers and put in their places enemies of the Republicans, in many instances Democrats, men without character and without standing, and they were known to be such when they were put there. They were put upon the board for the purpose of doing the bidding of the corrupt machine that was threatening to overthrow the rights of the people. This created a new excitement in the city and there came very near being a riot. The citizens rose up in their might in that city.

Why did they do it? Because they realized that their rights were being stricken down, because they realized that the highest privileges that a citizen enjoys were being taken from them. They were not Republicans altogether, but the majority of them in the city of Louisville who protested against this were Democrats, not Gold Democrats altogether, but most of them were Bryan Democrats. They demanded that the governor should protect them in their rights and prevent a riot in the city on the day of election. Hence the governor put part of the militia in the armory on the morning of the election, and gave orders that when they went to meals or to vote that they must change their uniforms.

But the Democrats had charge of the election and had stated time and again that the Republicans and Brown Democrats should not have representation by inspectors at the polls to see the count. When they presented themselves with the proper credentials to go into the polls and witness the count, the Goeblite election officers refused them admission. Then it was that injunctions were gotten out and mandamuses issued, compelling and directing the election officers to admit these inspectors. Judge Toney, who is an able and intelligent judge, and is a Democrat, and swore that he voted for Mr. Goebel, issued that order. I will read his letter to the governor, calling upon him to enforce the order which the civil authorities contemptuously ignored. I read from volume 4, page 248 of transcript record:

"LOUISVILLE, KY., *November 7, 1899.*

"Governor W. O. BRADLEY, *City.*

"SIR: Two mandatory injunctions were to-day issued by me as one of the judges of the Jefferson circuit court, requiring election officers at the election precincts to allow the inspectors for the Brown and Republican tickets entrance to the voting precincts to witness and inspect the counts. It has been represented to me that these injunctions are being contemptuously ignored and violated. I have to-day issued the decree or judgment of law. I am not a ministerial officer and can not enforce it. I call your attention to this fact as the chief executive of the State that you may take such action to see that the laws are executed as you may deem proper under the circumstances.

"STERLING B. TONEY,

"*Judge, Jefferson Circuit Court, Law and Equity Division.*"

Under that direction the governor ordered a part of the militia under the command of the colonel, three hours after the polls had closed, about 7 o'clock in the evening, to go and see that these officers were admitted. They went to several precincts and the vote was all counted except in two, and they had admitted the inspectors when the soldiers arrived there and the vote was being counted. The militia then returned to the armory and were not on the streets at any other time during the day. The Gatling guns were not out of the armory at all.

This is a true statement why the militia was in the city of Louisville. I say that it has been the custom for twenty years to put some of the militia in the armory on the day of election, even when Republicans were elected, and also when Democrats were elected. I read from the same volume, on page 240, what Gen. John B. Castleman said in a communication to the governor in regard to the use of the militia in the city of Louisville.

"HEADQUARTERS LOUISVILLE LEGION,
"FIRST REGIMENT, K. S. G.,
"*Louisville, Ky., December 1, 1897.*

"Hon. W. O. BRADLEY, *Governor, Frankfort, Ky.*

"DEAR SIR: Complying with the authority given in your favor of the 22d of October last, I beg to hand you herewith statement for account of active service and rations for detail of the Louisville Legion serving prior to, on the day of, and subsequent to the last day of election. I send this by hand of quartermaster, Lieut. Roy McDonald, in order that he may secure immediate settlement. I beg to say to your excellency that on this as on other occasions your prudence has no doubt prevented violence in this city. Lieutenant McDonald can explain to you in particular detail, if you desire.

"I have the honor to be, dear sir,
"Very respectfully, your obedient servant,
JOHN B. CASTLEMAN,
"*Colonel, Commanding.*"

He is a Democrat, and was a Goebel Democrat. After the election was over the Democrats realized that they were defeated on the face of the returns; that Governor Taylor had received a majority, after having been robbed of thousands of votes—2,383 votes. On that the State board issued him a certificate. My distinguished friend said that that board decided, when they made their report, that if they had had judicial power they would have seated the Democrats. I will read exactly what the Senator said:

"That returning board, as you call it, consisted of three State commissioners, and two of the three said that Taylor had a majority on the face of the returns, but that the proofs submitted to the returning board was irresistible that tissue ballots were used. Probably the Senator from New York, if he is a lifelong Republican, has heard before about tissue ballots. The whole three of the returning board declared that there were more than 3,000 false tissue ballots used, and the proof was irresistible to two of the three returning board officers.

"Two of the three State commissioners, for that is their description, decided that their duties were simply ministerial. They printed and published their report to the world, in which they said that Taylor did not have a majority of the votes cast according to law; that Taylor had a majority of votes if you would include all the tissue ballots which came from certain mountain counties in the State, and that those ballots should not be counted because they were not lawful, but that, as they understood it, their duties were simply ministerial, and they had no judicial function and no right to pass upon the validity of a ballot.

"So with one dissenting the two controlling votes in that board of State commissioners issued certificates of election to Taylor and every other Republican candidate on the Republican State ticket. All three of these State commissioners were lifelong Democrats and men of the highest character and position, socially and politically, in my State. They all three agreed that Taylor was not fairly elected, but by a vote of two out of three they gave the certificates of election to every candidate on the Republican ticket, and coupled with it a statement over their signatures to the world that if they had been clothed with power to pass upon the validity of a ballot, Taylor and the whole Republican ticket had been defeated."

I hold in my hand a true copy of the report of that board. There is not a line and not a word in it about any number of tissue ballots in any county in that State. I will read what the board said in regard to that matter. After discussing their powers and authority, they say:

"May this board inquire in the matter suggested by learned counsel as to whether or not the election in the city of Louisville was free and equal on account, as it is argued, of an unlawful interfence of the military? May we institute an investigation and determine whether or not the election in any or all of the counties was or was not held by secret ballot as required by law, and whether or not it was on that account or for any reason illegally conducted, and therefore void."

That is all they say about tissue ballots or the number of ballots. It is true that one of the board refused to sign the certificate of the Republican candidates. He was a layman, a business man. I believe he was engaged in the distilling business. He was a warm friend of the Democratic candidate and was completely under his control. The other two, Judge Pryor and Judge Ellis, were eminent lawyers, men of standing, one of whom had served quite a while as chief justice of the court of appeals.

Mr. BLACKBURN. Will the Senator allow me a question just there?

The PRESIDING OFFICER (Mr. PETTUS in the chair). Does the Senator from Kentucky yield to his colleague?

Mr. DEBOE. I yield.

Mr. BLACKBURN. I want to ask the Senator if he has any objection to putting the whole statement of that board into his remarks?

Mr. DEBOE. Not a bit.

Mr. BLACKBURN. I will be obliged to the Senator if he will do so.

Mr. DEBOE. I have no objection whatever to putting in the whole paper, and will do so.

In this report the board criticised the governor for calling out the militia; they also criticised the judges for issuing injunctions; but they did not render any opinion as to what they would absolutely do if the matter was before them in such a shape that they could pass upon it properly and legally.

Mr. BLACKBURN. I am entirely content to rest the case on the report of the board.

Mr. DEBOE. I will let it all go in.

Mr. BLACKBURN. All right.

[The paper referred to will be found in the appendix to Mr. DEBOE'S speech.]

Mr. DEBOE. The evidence submitted to this board, which the counsel for the Democrats desired the board to take into consideration, to act upon, and to throw out certain counties on account of what they claimed to be irregularities, was ex parte evidence, which consisted of affidavits and newspaper clippings from some of the most inflammatory articles published during that campaign in the Democratic papers, and they were sent up as a part of the returns, contrary to every principle of the law of Kentucky in that particular. This board scorned the idea and refused to take into consideration affidavits and newspaper clippings as evidence upon which they could not justly and properly act. Here is what they said about it:

"But the question as to whether or not the powers and jurisdiction of this board, as at present organized, are purely ministerial, or both ministerial and judicial, is not of supreme importance in this proceeding when we come to consider the papers and documents offered as testimony and upon which we are requested to act. These papers are clearly incompetent testimony for any purpose, and it would be so held, we apprehend, not only in all courts, but it would be so held by us if we were now sitting as a board of contest. If this board was clothed with unlimited judicial powers it would not consider the ex parte statements and extra-official certificates here submitted. It could not do so without violating the most familiar rules of evidence. Every citizen is entitled to his day in court."

That is the decision of that board in regard to that evidence. They never claimed anywhere in that report that the Democrats had been elected. Now, my friend says that the courts, from the circuit court and the court of appeals to the Supreme Court of the United States, upheld the decision of the legislature in unseating the Republicans.

But, before I come to that, I desire to call the attention of the Senator to the proceedings had in the legislature. The law of Kentucky directs and the constitution provides that in a contest for governor and lieutenant-governor the senate and the house shall select a certain number of their members to act as a board of contest. Mr. Goebel was chairman of the committee on rules to frame the procedure of the trial of his own contest.

The legislature was nearly equally divided in sentiment between the two candidates. There were quite a number of Democrats who affiliated with the Republicans in that legislature; which made the two parties nearly equally divided. There was about ten majority, I think, in the legislature composed of 138 members. The senate selected three of its members and the house selected eight of its members. Notwithstanding they were so equally divided, by some trick, maneuver, or scheme the Goebelites, who had absolute control of the whole machinery of the legislature, selected three Democrats from the senate and seven Goebel Democrats from the house to take evidence and report to the legislature as to the election of governor, and on that board of contest there was one Republican and ten Democrats. If that was all, the suspicion of fraud might not be so great; but in the case of the lieutenant-governor the same process of selecting members for a board of contest was gone through with, and on that board were two Republicans and nine Democrats.

Mr. SPOONER. How many Republicans were there in the legislature?

Mr. DEBOE. About 53, and there were quite a number of independent Democrats, which made about 63 to 75 Democrats. That is about the way the legislature stood. The two boards consisted of 19 Democrats and 3 Republicans.

Mr. President, I say that such things as that do not happen by mere chance. It takes some slight turn of the hand to reach such grand results. This board, thus composed almost entirely of Democrats, arbitrarily refused to permit Republicans to investigate certain counties where it was known that great frauds had been committed.

The Democrats charged as a ground of contest that in about 40 Republican counties there had been used tissue or thin ballots; that the leaders of the Republican party had conspired with the Louisville and Nashville Railroad Company and other corporations to bribe and corrupt voters; that they conspired with the United States marshal to intimidate voters and keep them from voting for the contestant, and also that the circuit judge of the United States court had intimidated voters and kept them from voting for the Democratic nominee, because he gave the grand jury instructions that if any person violated certain provisions of the United States statutes they should be held amenable to the law.

There was not any evidence to prove that any of these charges were true. The evidence was conflicting as to whether thin or tissue ballots were used. But the evidence shows that Points, Fulton, and Yonts, commissioners, threw out the Republican counties of Martin, Magoffin, and Johnson on the grounds of thin ballots, with a majority of 1,687, and that the ballots in Graves, Breathitt, Powell, and Wolfe were as thin, or thinner, than in the Republican counties, and the Democratic majority was 3,111. They threw Louisville out, as they claimed, on account of militia, and more than 40,000 were thrown out.

They set up that as one ground, but I presume that that would not have kept anyone from the election or from voting for the contestant, unless it was someone who wanted to violate the law.

They also complained of the issuance of injunctions compelling the election officers to discharge the duties which they had taken an oath to discharge and which the law imposed upon them. To illustrate some of those cases, I will state one or two of them. In the county of Nelson, the home of the Democratic candidate for lieutenant-governor, Mr. Beckham, who is now the acting governor of the State, the Democrats had absolute control of the election and the preparation of the ballots.

The ballots were prepared, so far as I know, correctly; the names of the candidates were correctly spelled, and the voters voted for them correctly; but when the election officers prepared the tally sheets upon which they tabulated the votes they changed the name of the Republican candidate for governor from W. S. Taylor to W. P. Taylor; and in every precinct in that county, with the exception of one, they made an effort to throw out the Republican votes for Taylor on account of that technicality, which the court of appeals has decided time and again it is the duty of the officers of election to correct. They forced the Republicans to bring suit, to go into the courts, and force a count of 1,198 Republican votes. I say the Democrats complained of that. If that is a fraud, Mr. President, then I hold that the courts of this land are frauds.

In the city of Louisville there was an injunction issued along the same line. In that case the election officers refused to count the votes in one precinct. The Republicans appealed to the court and got a mandamus issued compelling the counting of the vote, which gave Taylor 15 majority. If the whole vote had been thrown out, it would not have changed the result of the election in the least. The Republican majority in the city of Louisville was 3,432. I say that it was cases like these of which they complained. They also complained of the people gathering in many of the counties to see the count. It is true that in some of the counties there were great gatherings, and hundreds of people assembled because they realized and believed that they were going to be robbed of one of the highest privileges that an American citizen can enjoy—the right of suffrage.

The Senator says that the courts have upheld the action of the legislature. I will refer to that later. The Republican attorneys were informed by counsels for contestant that two of them would be killed if they argued the case, and this information came from Goebel's attorneys.

I realize the great tragedy which took place there, and there is not a Kentuckian who deplores that outrage against Mr. Goebel more than I do, and every true Republican in that State denounces that outrage. But admit that Governor Taylor was wrong in adjourning the legislature; admit that he had no authority to adjourn it; still that does not relieve the Democratic party of the great wrong and great frauds which it had committed upon the people of that State—not only upon the officers who were elected, but upon the citizens who had the right to select whom they pleased to rule and control their affairs.

The courts never went into the merits of this case. They simply refused to take jurisdiction of the question. The circuit court refused; the court of appeals of the State of Kentucky refused; the Supreme Court of the United States refused to take jurisdiction of the gubernatorial contest. The question was brought from the court of appeals to the Supreme Court of the United States on a writ of error, and was heard upon that, and not upon the facts and the evidence in the case.

Mr. President, if that case had been heard, and all the facts and the evidence and the law had been presented before any just court on this globe, it would have decided that the Republican candidates were overwhelmingly elected, not by 2,000 but by more than 30,000 majority, as the record will show—as is charged in the record and sustained by the evidence, and not denied by the Democrats.

They came into court upon demurrer, and the whole proceeding was heard upon demurrer. Out of about seventeen judges who sat upon that case, there were six who did attempt to give an opinion as to the conduct of the Democrats in that election, and I shall read the opinions of some of them; and they realized that the Republicans were elected.

Justice Harlan dissented from the opinion of the majority of the Supreme Court in toto, and Justice Brown and Justice Brewer dissented in part from the opinion of the court. In commenting on that case Mr. Justice Harlan said:

"Under the evidence in the case no result favorable to Goebel could have been reached on any ground upon which the board of contest or the legislature had jurisdiction to act. The constitution of Kentucky, as we have seen, declares that 'the person having the highest number of votes shall be governor.' And the statute provides that the person returned having received the highest number of legal votes given 'shall be adjudged to be the person elected and entitled to the office.' With the constitution and the statutes of the State before him when preparing his notice to Taylor of contest, Goebel, it is true, did claim in very general terms that he was legally and rightfully elected; but he took care not to say—there is reason to believe that he purposely avoided saying—that he had received the highest number of legal votes cast for governor. The evidence renders it clear that the declaration that he had received the highest number of legal votes cast was in total disregard of the facts—a declaration as extravagant as one adjudging that white was black or that black was white."

Mr. SPOONER. Who says that?

Mr. DEBOE. Mr. Justice Harlan, in his dissenting opinion.

"But such a declaration made by the body to which the board of contest reported should not surprise anyone when it is remembered that it came from those who did not have before them any of the proofs taken in the case and were willing to act without proof. Those who composed that body seemed to have shut their eyes against the proof for fear that it would compel them to respect the popular will as expressed at the polls. Indignant, as naturally they were and should have been, at the assassination of their leader, they proceeded, in defiance of all the forms of law and in contempt of the principles upon which free governments rest, to avenge that terrible crime by committing another crime, namely, the destruction, by arbitrary methods, of the right of the people to choose their chief magistrate. The former crime, if the offender be discovered, can be punished as directed by law. The latter should not be rewarded by a declaration of the inability of the judiciary to protect public and private rights, and thereby the rights of voters, against the willful, arbitrary action of a legislative tribunal which, we must assume from the record, deliberately acted upon a contested election case involving the rights of the people and of their chosen representative in the office of governor without looking into the evidence upon which alone any lawful determination of the case could be made. The assassination of an individual demands the severest punishment which it is competent for human laws in a free land to prescribe; but the overturning of the public will, as expressed at the ballot box, without evidence or against evidence, in order to accomplish partisan ends, is a crime against free government, and deserves the execration of all lovers of liberty."

He now refers to what Judge Burnam says, who was a Republican on the court of appeals, and who decided that the court had no jurisdiction over the case, and decided in favor of the Democrats. In rendering his decision Mr. Justice Harlan says:

"Judge Burnam, speaking for himself and Judge Guffy in the court of appeals of Kentucky, although compelled, in his view of the law, to hold the action of the legislature to be conclusive, said: 'It is hard to imagine a more flagrant and partisan disregard of the modes of procedure which should govern a judicial tribunal in the determination of a great and important issue than is made manifest by the facts alleged and relied on by the contestees, and admitted by the demurrer filed in the action to be

true, and I am firmly convinced, both from these admitted facts and from knowledge of the current history of these transactions, that the general assembly, in the heat of anger, engendered by the intense partisan excitement which was at the time prevailing, have done two faithful, conscientious, and able public servants an irreparable injury in depriving them of the offices to which they were elected by the people of this Commonwealth, and a still greater wrong has been done a large majority of the electors of this Commonwealth, who voted under difficult circumstances to elect these gentlemen to act as their servants in the discharge of the duties of these great offices.'"

Mr. BLACKBURN. Will it interrupt the Senator if I should ask just there if that is the opinion of Judge Guffy, of the State supreme court?

Mr. DEBOE. No, of Judge Burnam; but Judge Guffy concurred in the opinion.

Mr. BLACKBURN. And there expresses the conviction that the action of the legislature was conclusive?

Mr. DEBOE. Yes, sir.

Mr. BLACKBURN. And Judge Guffy is a Republican?

Mr. DEBOE. Yes; and so is Judge Burnam. They both decided that the action of the legislature was final and conclusive.

Mr. BLACKBURN. And they are both still Republican members of that court?

Mr. DEBOE. That is correct. Many Republicans in that contest doubted whether the court had jurisdiction over the matter; eminent lawyers disagreed on that point, as we see that they disagree on the supreme bench of the United States. Judge DuRell, who was also a Republican member of that court, held that the court under the circumstances had jurisdiction over the question, and he rendered a separate and distinct opinion from the one rendered by Judge Burnam and Judge Guffy. As I have said, six judges who have sat upon that case who attempted to express an opinion upon the facts and the evidence in the case, stated that the Republican candidates were elected and not the Democratic candidates.

As to the Goebel law, the supreme court never passed upon that law at all; but the latest decision of the appellate court of Kentucky is that the Goebel law is invalid and is unconstitutional. That is the latest decision; and the latest decision of the court of appeals of Kentucky is that the Republicans were elected; and by reason of that decision Judge Pratt is now the attorney-general of the State and is holding that office. Pryor and Ellis resigned after certificate was issued to Taylor, and left the unpleasant and corrupt work to be performed by Points, Goebel's tool, who appointed John A. Fulton and Yonts to aid in the work.

Mr. BLACKBURN. Will it interrupt the Senator if I ask one more question?

Mr. DEBOE. Not at all.

Mr. BLACKBURN. What is the political complexion of the court of appeals of Kentucky?

Mr. DEBOE. It is Republican by one majority. The same judges, with the exception of one, who were sitting on that bench when they rendered that decision, agreed with the Democratic judges that they had no jurisdiction of the matter. If they acted corruptly in the last decision, they had just as good an opportunity to act corruptly in the first. The opportunity was ten times as great to have acted corruptly in the first case as in the last.

Mr. FAIRBANKS. I wish, with the Senator's permission, to ask him a question.

Mr. DEBOE. I yield to the Senator with pleasure.

Mr. FAIRBANKS. I wish to ask if the Republican judges of the court of appeals in the first case concurred with the Democrats in holding that it had no jurisdiction in the case?

Mr. DEBOE. That is true.

Mr. FAIRBANKS. The court did not in that case undertake to pass upon the merits of the controversy?

Mr. DEBOE. It did not. None of the courts have ever attempted to pass upon the merits of the case; that is, the governor case.

Mr. FAIRBANKS. Has any court, either State or Federal, judicially determined that the Republican contention was not well founded?

Mr. DEBOE. I did not catch the question.

Mr. FAIRBANKS. Has any court, either State or Federal, undertaken to pass upon the merits of the controversy?

Mr. DEBOE. It has not.

Mr. McCOMAS. If it does not interrupt the Senator——

Mr. DEBOE. It will not interrupt me.

Mr. McCOMAS. I should like to ask him a question. If I understand your statement, Pratt, as attorney-general, was declared elected, on the same ticket with the Republican candidate for governor.

Mr. DEBOE. Yes, sir; he ran on the ticket with Taylor and the rest of the Republicans.

Mr. McCOMAS. Was his majority far in excess of their majority, or about the same?

Mr. DEBOE. He did not have so great a majority as Taylor.

Mr. McCOMAS. Do I understand you to mean that this finding of the election of Pratt involved in the mind of those who so found that the governor was elected?

Mr. DEBOE. I was speaking of the other cases and not of the Pratt case when I gave the answer to the Senator from Indiana.

Mr. FAIRBANKS. The Senator understood me as inquiring with respect to the title of Taylor to his seat as governor.

Mr. DEBOE. The court of appeals of the State of Kentucky has decided within the last few months that the Goebel law is unconstitutional. Judge Pratt tried his case before the circuit court. He had never brought his case before the court of appeals. He tried it before the circuit court, and it was decided against him; but he did not appeal it. The others appealed and asked that it be dismissed, and the court of appeals refused to dismiss it on the motion of the contestees; but, as I say, Judge Pratt brought his case since then from the circuit court to the court of appeals, and that court decided that the Republicans were elected and that the Goebel law was unconstitutional. That is the latest decision of the courts of Kentucky.

Our Democratic friends claim that there was a conspiracy on the part of the Republicans with the L. and N. Railroad to corrupt the voters. The fact is there was no conspiracy, but that the L. and N. Railroad officials were opposed to the election of Mr. Goebel. I am not here to defend corporations in any wrongdoing any more than I am an individual, but my distinguished colleague knows why that road opposed Mr. Goebel. He had fought that road and wrongfully. I served in the State senate with him and know this is true; and he had incurred the displeasure of that road. I say that road did not act corruptly with the Republicans, and there is not one scintilla of evidence to show that there was any conspiracy.

There is not a particle of evidence to show that a single solitary voter in the city of Louisville was intimidated by reason of the militia being in that city; but Democrats testified that they believed that there was a much larger vote polled by reason of the militia being in the city of Louisville than there would otherwise have been. They were Bryan Democrats, by scores, and men of the highest character.

It had been the policy of our Democratic friends to depend largely upon the L. and N. in certain political campaigns to assist them, and if they did not assist, then they were threatened with the legislature. Mr. Watterson realized that the Democrats expected to take that election, right or wrong, whether they got the majority or not, and after the nominations had been made he sat down and wrote to his friend in New York, Augustus Belmont, a letter. I shall not read it all. He was urging him not to let the officials who had control of the road in Kentucky oppose the election of Mr. Goebel. He addressed him as his friend. He says:

"The Democratic State ticket just nominated will certainly be elected. Under the operation of the Goebel law the result is not left to chance."

He goes on and comments upon the road and upon the situation generally, and finally winds up as follows:

"But Mr. Smith"—

That is the president of the road—

"But Mr. Smith is no more proof against mistakes than other people, and being a man of unyielding temper he is likely to be carried to extremes. In this business he has certainly allowed his temper to carry him far beyond the lines of worldly wisdom and a prudent forecast, and if a halt be not called upon the proceedings its evil consequences are as sure as the coming of the next session of the Kentucky legislature.

"Sincerely, your friend,

"HENRY WATTERSON."

I say it was such threats as that that they were continually making if the road did not comply with the request of the Democratic organization in Kentucky.

Mr. President, this is all I have to say for the present, unless the occasion demands more from me. There is just one other question I wish to consider. My colleague said there were 20,000 registered voters who did not vote in that election.

Mr. BLACKBURN. Ten thousand.

Mr. DEBOE. The statement in the RECORD is 20,000.

Mr. BLACKBURN. I will say that at the time I corrected the RECORD.

Mr. DEBOE. You corrected it?

Mr. BLACKBURN. I corrected it at the time. It was a clerical mistake.

Mr. DEBOE. I noticed the speech you made, but I did not notice the correction.

Mr. BLACKBURN. I corrected it the next day.

Mr. DEBOE. There were about 8,000. That was too many. But the reason why they did not vote was on account of the

methods pursued in the conduct of the election under the control of the Democrats, and a majority of those who did not vote were Republicans, as the evidence shows in the record as produced by the Republicans when that question was being investigated. Democrats testified to that fact and Republicans testified to it; and they were Brown Democrats.

I do not care what anybody may say, whenever we take the facts in this case and the law and the evidence, we are bound and compelled to reach the conclusion that the Republican candidates were overwhelmingly elected in the election of 1899 in the State of Kentucky.

APPENDIX.

Report of election commissioners Pryor and Ellis, awarding certificates for governor and all the other State officers on the Republican ticket November 6, 1899.

THE MAJORITY REPORT.

(A true copy.)

Occupying a place we did not seek, we would gladly escape the discharge of the delicate and responsible duties which at the present moment confront us, but having voluntarily assumed the responsibilities of so important a trust, our duty is plain. We are not at liberty to depart from elementary principles or to allow partisan zeal to force us to any conclusion which is not approved by our judgment and sanctioned by the law.

In reaching a conclusion in this case we are compelled to construe for the first time the statute under which we act. It has not received judicial construction or interpretation at the hands of any court. Our powers and duties under this law have not been defined by any circuit court or by the court of appeals. This, of itself, adds to our embarrassment, and, if possible, to the magnitude of the disagreeable task before us. To ascertain correctly the scope of our power and authority in the premises we must of necessity appeal to primary principles of law and to such decisions of courts of last resort as may shed any light on the subject in hand. But, finally, the board is left to thread its way along in construing the statute under which it proceeds and in determining the scope of the powers therein conferred.

THE MAIN QUESTION.

The capital question on the threshold is, What are the powers and jurisdiction of the State board of election commissioners, sitting as a canvassing board, which is the capacity in which it now acts? Are our powers purely ministerial, or are they both ministerial and judicial? May this board, under the law, acting as a mere board of canvassers, go to the bottom of any and all irregularities, misconduct, and frauds, if any, which may have been committed in the recent election, and on the whole case determine whether or not what now appears on the face of the returns is true or false? May this board inquire in this matter suggested by learned counsel as to whether or not the election in the city of Louisville was free and equal on account, as it is argued, of an unlawful interference of the military? May we institute an investigation and determine whether or not the election in any or all of the counties was or was not held by secret ballot as required by law, and whether or not it was on that account or for any reason illegally conducted and therefore void? Does the power reside in this State board to consider whether or not United States marshals were present at various polling places throughout the State with a view of intimidating the voters? These are, as we understand it, the questions underlying the whole subject.

There is, however, one other material question involved in this proceeding. It is this: If we find under the law that this board, sitting as a canvassing board, is clothed with judicial powers, as one of the counsel in argument stated it, "extra ministerial powers," the question at once is, Are the papers and documents tendered for our consideration competent evidence for any purpose, or are they merely ex parte statements, which, under the rules of evidence, are inadmissible to establish any facts?

Stated in another form, do these papers which counsel urge upon our consideration make a prima facie case, conclude any question, or authorize this board to overthrow what appears on the face of the election returns? Are the papers purporting to be amended certificates from Knox, Johnson, Magoffin, and Pike counties, and the voluminous record from the city of Louisville and other papers of like character, such official documents as impart absolute verity, and, therefore, competent evidence, or are they extra official, ex parte, and incompetent as evidence in any court, or before any tribunal where the rules of evidence obtain? Counsel for the Democratic candidates, holding to the views that this board is a judicial body, insist we should consider these papers, and we have the subject pressed upon us with great zeal and ability.

THE LAW IS PLAIN.

It is due to them and the public to state our views briefly on the subject In considering the question submitted we must be guided by the rules of law We can not depart from the beaten path, for it is the safe path. We consider first, the question as to whether or not the powers conferred on us as a canvassing board authorize us to exercise judicial power. An appeal to the provisions of the statute ought to furnish a ready answer to this question. Whatever, powers and jurisdiction it has not conferred we may not lawfully assume to exercise. We did not make the law, fix our authority, or mark the limit of our jurisdiction. If the law omits to clothe this board sitting as a canvassing board with jurisdiction and power to look into and revise election returns as certified by the proper authorities from the various counties of the State, we can not write into the law such authority. We have no right to add to or subtract from the plain terms of the statute. Looking to the provisions of this law, we find section 1 creates the State board of election commissioners, prescribes the qualification of its members, the mode of their election, the term of their office, and fixes their compensation.

Section 10 provides:

"Said State board of election commissioners, and in the absence of either, the other two shall be the board for the examining and canvassing the returns of election for any of the offices named in the last section of this act. It shall be the duty of said board when the returns are all in, or on the fourth Monday after the election, whether they are all in or not, to make out in the office of the secretary of state, from the returns made, duplicate certificates, in writing, over their signature, of the election of THOSE HAVING RECEIVED THE HIGHEST NUMBER OF VOTES, one certificate to be retained in the office and the other sent to the person elected. If all the returns are not made the right to CONTEST AN ELECTION SHALL NOT BE IMPAIRED, etc."

The section supra clearly defines the duty and fixes the power of this board sitting as a board of canvassers. But the section quoted is not the limit and does not define all the power and authority conferred on the State board of election commissioners. Section 12 of the act provides: Said board of election commissioners, or any two of them, shall be a board for determining the contested election of any officer other than governor or lieutenant-governor, elected by the vote of the whole State, or a judge or clerk of the court of appeals, circuit judge, or commonwealth's attorney. Each member of the board before entering upon his duties as such shall be sworn by some judge or judges to try the contested election and give true judgment thereon according to the evidence, etc. Further provisions of the section are that this board when sitting as a board of contest has power to send for persons, papers, and records, issue attachments, to swear witnesses by its chairman and secretary and issue commissions for taking proof.

CONTEST BOARD'S POWERS DIFFERENT.

It is evident from this section of the law that the State board of election commissioners, when sitting as a board of contest, is clothed with powers and jurisdiction which it does not possess and can not assume to exercise when sitting as at present, in a mere ministerial capacity. As a board of contest it possesses the powers and functions of a court. It can swear witnesses and hear proof, examine records, and do anything and everything necessarily proper in order to arrive at a true and correct judgment. It may set aside the original returns, overthrow a prima facie case, and when authorized by the law and the evidence cast out precincts or whole counties and award the certificates to a candidate other than the one having a majority upon the face of the returns. But these are powers which the board can only exercise when sitting as a board of contest. We must assume that the legislature, by enactment of section 12, which provides for a board of contest, intended, not only to limit the powers of this body when sitting as a board of commissioners, but to confer all the judicial power and authority which the board could lawfully exercise alone upon the board of contest. To hold otherwise would be to destroy the entire force of the section creating a board of contest and conferring on it responsible duties and large jurisdiction. This law has carefully guarded the right of all candidates. While they might not contest their rights to an office before the canvassing board they unquestionably have such right before the board of contest.

THE CANDIDATES' REMEDY.

The remedy is plain and speedy; every candidate who is defeated on the face of the returns may, before the tribunal provided by law, test the question of his right to the office with his adversary, and nothing the canvassing board may do or can do will in any degree or in any manner whatever affect his right. Such is our construction of the present law, and we are fortified in the correctness of this construction not only by the interpretation which the court of appeals of this State has placed upon kindred statutes, but by all the laws of the land, so far as we have been able to examine it.

Counsel for the candidate seeking to overthrow the prima facie evidence as it appears on the face of the returns before us have endeavored to show that the present statute confers additional powers upon this body, sitting as a board of canvassers, to the powers conferred on canvassing boards under previous statutes. A careful examination and comparison of the present with previous statutes, in so far as they relate to the jurisdiction of canvassing boards, will leave no room to doubt that the distinction sought to be made does not in fact exist. This board, under the present law, as a canvassing board, possesses no other or greater powers than those conferred on the governor, attorney-general, and secretary of state under the provisions of the previous statutes.

AUTHORITY FOR THE DECISION.

To emphasize the correctness of this conclusion we have compiled as best we could previous statutes on this subject, and we incorporate them into this opinion that the vexed question as to the power of this board, sitting as a canvassing board, may be put at rest at once and for all. The sections of the revised statutes creating canvassing boards and prescribing their power appearing in Stanton's revised statutes, article v, page 436, are as follows:

"COMPARING POLLS.—SECTION 1. The presiding judge of the county court, the clerk therefor, and the sheriff, or other officer acting for him at the election, shall constitute a board for examining the poll books of each county and giving certificates of election. Any two of them may constitute a board, but if either is a candidate he shall have no voice in the decision of his own case. If from any cause two of the before-named persons can not, in whole or in part, act in comparing the polls, their places shall be supplied by the two justices of the peace who may reside nearest to the court-house.

"SEC. 2. Within two days next after an election the sheriff shall deposit with the clerk of the county court the poll-books of the different precincts. On the next day the board shall meet in the clerk's office, between 10 and 12 o'clock in the morning, compare the polls, ascertain the correctness of the summing up of the votes, and give triplicate or more written certificates of election, over their signatures, of those who have received the highest number of votes for any office exclusively within the gift of the voters of the county—one copy of the certificates to be retained in the clerk's office, another delivered to each of the persons elected, and the other forwarded by the county clerk to the secretary of state for Frankfort. For offices not within such gift, they shall give duplicate or more written certificates, over their signatures, of the number of votes given in the county, to each person voted for, particularizing therein the precincts at which the votes were given—one copy to be retained in the clerk's office and the other delivered to the sheriff.

"SEC. 4. The certificate of election of a county officer shall be in substance in the following form:

"'Commonwealth of Kentucky, sct. We, A, B, and C, duly authorized to compare the poll books of the county of —— —— do certify, at an election held in said county on the —— day of ——, E F was duly elected to fill the office of —— ——.'

"SEC. 5. After an election for governor, lieutenant-governor, or other officer elective by the vote of the whole State, or for a judge of the court of appeals, clerk of that court, circuit judge, commonwealth's attorney, Representative in Congress, or electors of President and Vice-President, it shall be the duty of the board of examiners of poll books for each county immediately after the examination of the poll books to make out three or more certificates in writing, over their signatures, of the number of votes given in the county for each of the candidates for any of said offices. One of the certificates shall be retained in the clerk's office, another the clerk shall send by the next mail, under cover, to the secretary of state at Frankfort, and the other he shall transmit to the secretary by any private conveyance the clerk may select, free of cost.

"SEC. 6. The governor, attorney-general, and secretary of state, and, in the absence of either, the auditor, or any two of them, shall be a board for examining the returns of election for any of the officers named in the last section."

STATUTES OF 1873.

The general statutes which were adopted in 1873 contain the following provisions with respect to the duties and powers of canvassing boards. Those sections in so far as they are relevant and pertinent, are as follows:

"COMPARING POLLS.—SECTION 1. The judge of the county court, the clerk thereof, and the sheriff, or other person acting for him at an election, shall constitute a board for examining the poll books of each county and giving certificates of election. Any two of them may constitute a board; but if either is a candidate, he shall have no voice in the decision of his own case. If from any cause two of the before-named persons can not act, in whole or

in part, in comparing the polls, their places shall be supplied by the two justices of he peace who may reside nearest the court-house.

"SEC. 2. Within two days after an election, the sheriff shall deposit with the clerk of the county court the poll books of the different precincts. On the next day the board shall meet in the clerk's office between 10 and 12 o'clock in the morning, compare the polls, ascertain the correctness of the summing up of the votes, and give triplicate or more written certificates of election, over their signatures, of those who have received the highest number of votes for any office exclusively within the gift of the voters of the county—one of the certificates to be retained in the clerk's office, another delivered to each of the persons elected, and the other forwarded by the county clerk to the secretary of state at the seat of government. For offices not within such gift they shall give duplicate or more written certificates over their signatures of the number of votes given in the county to each person voted for, particularizing therein the precinct at which the votes were given—one copy to be retained in the clerk's office, and the other delivered to the sheriff. The poll books shall, thereafter, remain in the clerk's office as part of its records. So, also, shall the certificates of any precinct judges which may have been used in the absence of the poll book of that precinct.

"SEC. 4. The certificate of election of a county officer shall be, in substance, in the following form:

"'Commonwealth of Kentucky, sct: We, A, B, and C, duly authorized to compare the poll books for the county of ——, do certify that, at an election held in said county on the —— day of ——, E F was duly elected to fill the office of ——.'

"SEC. 5. After an election for governor, lieutenant-governor, or other officers elective by the votes of the whole State, or for a judge of the court of appeals, clerk of that court, circuit judge, Commonwealth's attorney, Representative in Congress, or electors of President and Vice-President, it shall be the duty of the board of examiners of poll books for each county, immediately after the examination of the poll books, to make out three or more certificates in writing, over their signatures, of the number of votes given in the county for each of the candidates for any of said offices. One of the certificates shall be retained in the clerk's office, another the clerk shall send by the next mail, under cover to the secretary of state at the seat of government, and the other he shall transmit to the secretary by any private conveyance the clerk may select, free of cost.

"SEC. 6. The governor, attorney-general, and secretary of state, in the absence of either, the auditor, or any two of them, shall be a board for examining the returns of election for any of the offices named in the last section."

Upon the adoption of the present Constitution, in 1891, it became necessary to recast the statutes of the State, and in so far as the provisions of the present statute are applicable and in so far as they are pertinent to this investigation they are as follows:

"CANVASSING RETURNS.—Section 1507. Board for examining returns for county. (Identical with section 1, Article V, Gen. Stats., except that "canvassing the returns" is used instead of "in comparing the polls.")

"SEC. 10. The certificate of election of a county officer shall be in substance in the following form:

"'Commonwealth of Kentucky. Section ——. We, A, B, and C, duly authorized to canvass the returns for the county of ——, do certify that at an election held in said county on the —— day of ——, E F was duly elected to fill the office of ——.'

"SEC. 12. The governor, the auditor, or any two of them, shall be a board for examining the returns of election for any of the officers named in the last section.

"It shall be the duty of said board, when the returns are all in, or on the fourth Monday after the election, whether they are in or not, to make out in the secretary's office from the returns made duplicate certificates, in writing, over their signatures, of the election of those having the highest number of votes, one certificate to be retained in the office and the other sent by mail to the person elected. If all returns are not made, the right to contest an election shall not be impaired.

"STATE BOARD OF ELECTION COMMISSIONERS, section 1, 596 A.—Sec. 5.—County board to canvass returns and give certificates of election, poll-books.—Said county board of election commissioners shall constitute a board for examining and canvassing the election returns of each county and awarding and issuing certificates of election. Any two of the members of said board may constitute the board; if either be a candidate, he shall have no voice in the decision of his own case. If from any cause two of the members of the board can not act, in whole or in part, in examining and canvassing the returns, their places shall be supplied as in case of vacancies in such board. Within two days next after an election the sheriff shall deposit with the clerk of the county court the returns from the different precincts. On the next day the said county board of election commissioners shall meet in the clerk's office, between 10 and 12 o'clock in the morning, open and canvass the returns of such election, and certify over their signatures those who have received the highest number of votes for any office exclusively within the gift of the voters of the county, one copy of the certificate to be retained in the clerk's office, another delivered to each of the persons elected, and the other forwarded by the county clerk to the secretary of state at the seat of government."

Section 7, giving form of oath, is identical with section 10 on page preceding this.

"SEC. 9. After an election for governor, lieutenant-governor, or other office elective by the vote of the whole State or more than one county, or for a judge of the court of appeals, clerk of that court, circuit judge, Commonwealth's attorney, Representatives in the Congress, or electors of President or Vice-President, or for or upon questions or constitutional amendments submitted to a vote of the people, it shall be the duty of the board of canvassers of returns for each county, immediately after the examination of such returns, to make out two or more certificates in writing over their signatures of the number of votes given in the county for each of the candidates for any of said offices and the number of votes for or against such questions of constitutional amendments. One of the certificates shall be retained in the clerk's office, another the clerk shall send by mail next, under cover to the secretary of state at the seat of government.

"SEC. 10. Said State board of election commissioners, and in the absence of either, the other two, shall be a board for examining and canvassing the returns of election for any of the offices named in the last section of this act.

"First. It shall be the duty of said board, when the returns are all in, or on the fourth Monday after the election, whether they are in or not, to make out in the office of the secretary of state from the returns made, duplicate certificates in writing over their signatures of the election of those having the highest number of votes, one certificate to be retained in the office and the other sent by mail to the person elected. If all the returns are not made, the right to contest an election shall not be impaired.

"Twelfth. Said state board of election commissioners, or any two of them, shall be a board for determining the contested elections of any officer other than governor or lieutenant-governor elected by the votes of the whole State, or of a judge, or clerk of the court of appeals, circuit judge, or Commonwealth's attorney.

"First. Each member of the board, before entering on his duties as such, shall be sworn by some judge or justice to try the contested election, and give true judgment thereon according to the evidence in the case.

"Second. A majority of the board shall be necessary to a decision, which shall be in writing and signed in duplicate by the members concurring therein, one copy to be retained in the office of the secretary of state and the other delivered to the successful party or sent to him by mail.

"Third. The board shall have power to send for persons, papers, and records to issue attachments therefor, signed by its chairman, swear witnesses by its chairman or secretary, and issue commissions for taking proof."

PURELY INCOMPETENT TESTIMONY.

But the question as to whether or not the powers and jurisdiction of this board, as at present organized, are purely ministerial or both ministerial and judicial, is not of supreme importance in this proceeding when we come to consider the papers and documents offered as testimony and upon which we are requested to act. These papers are clearly incompetent testimony for any purpose, and it would be so held, we apprehend, not only in all courts, but it would be so held by us if we were now sitting as a board of contest. If this board was clothed with unlimited judicial powers it would not consider the ex parte statements and extra-official certificates here submitted. It could not do so without violating the most familiar rules of evidence. Every citizen is entitled to his day in court. He can not be deprived of life, liberty, or property except by due process of law. It is not due process of law if he is not given an opportunity to meet his adversary and to cross-examine the witnesses offered against him and to produce testimony in his own behalf. It would be monstrous to say that a person appearing on the face of the returns to have been elected to an office of high or low degree could be deprived of that office on mere ex parte affidavits, which he had never an opportunity to inspect, and before he had been given any opportunity to offer evidence in his own behalf.

Such is not, never was, and never will be the law in any civilized state in the world. What we have said with respect to the ex parte affidavits submitted to us as evidence applies with equal force to the alleged amended returns from certain counties, which in every instance only purport to have been signed by a majority of the county boards and which do not certify any fact authorized by the law to be certified to this board.

It is and always has been the law in this State that an officer who is charged with the duty of making a certificate or formulating an official return can not inject into that certificate or return any fact which it is not by law made his duty to certify or recite. In every case where the like of this has happened all courts have uniformly disregarded such irrelevant and extra-official statements. An officer can not make evidence by certifying that which the law does not charge him with the duty of certifying. If such a practice was tolerated the whole system of administering justice would be destroyed and every man would at once become a law unto himself. Certainly no lawyer or intelligent citizen, whether lawyer or not, can have any serious doubt as to the accuracy of the view we now express. The question was decided by the court of appeals of Kentucky in the following cases: Walker *vs.* McKnight (15 Ben Monroe, 477), —— *vs.* Miller (4 Bibb, 311), Bowlen *vs.* Powell (7 Monroe, Monroe, 43), and Mullin *vs.* —— (12 Bush).

MILITARY INTERFERENCE.

What we have already said certainly indicates the conclusion at which we have arrived as to the law governing our actions, possibly we should add nothing more, and if we were a mere court passing upon a question before us the whole subject would close with what has already been said. But we are not a court; we have expressly decided that in this opinion. Having arrived at that conclusion, certainly those who agree with us in what we are about to say, and those who disagree with us, will not, in view of the fact that the questions we now discuss were earnestly pressed upon us for our decision, even suggest that we have stepped outside of the record to decide a question not before us.

It is contended by counsel for the Democratic candidates that the military force of the State was wrongfully and illegally called out on the day of the recent election with a view of intimidating the citizens and voters of the city of Louisville. Counsel cite not only decisions of American, but of English courts and text writers of unquestionable ability to sustain their contention that because of military interference in the city of Louisville the election held on the 7th day of November should be declared null and void.

For the reasons already stated, our answer to counsel is that we can not, as a mere canvassing board, consider the grave and constitutional question which they seek to enforce upon our consideration; but, in justice to counsel and to ourselves, we deem it relevant and pertinent to at least indicate our view on the subject.

It is a fact, about which we express no opinion, that the militia of this Commonwealth were called out by the chief executive of the State on election day, and, if the governor of the Commonwealth was in fact present in the city of Louisville personally in command of the State troops as argued, that presents a condition which does not meet the approval of this board, and which, in our opinion, the law unqualifiedly condemns.

In times of peace the military arm of the Government has no status in any State except to exist, receive its pay, and submit to the orders and commands of the civil authorities. It will not do in this country—certainly not in Kentucky—for any body occupying official station, or seeking political preferment, to call to his aid or assistance the militia of the States. Such conduct is not merely reprehensible in the first place, but it can not be tolerated for a moment by the Anglo-Saxon blood, which is represented in the citizenship of this Commonwealth.

COOLEY ON MILITARY FORCE.

No law writer of any respectability, and no court has ever agreed that a thing like this could be done in time of peace with impunity. With a just sense of the danger of military interference, where a trust is to be exercised, the highest aim is the most delicate in the whole machinery of government, it has not been thought unwise to prohibit the militia being called on election day, even though for no other purpose than for enrolling and organizing them. The ordinary peace force of the State and its presence suggests order, individual safety and public security, but when the military appear upon the stage, even though composed of citizen militia, the circumstances must be assumed to be extraordinary and there is always an appearance of threatened and dangerous compulsion which might easily interfere seriously with that calm and unimpassioned discharge of the elector's duty which the law so justly favors.

The soldier in organized rank can know no law but such as is given him by his commanding officer, and when he appears at the polls there is necessarily a suggestion of the presence of an enemy against whom he may be compelled to exercise the most extreme and destructive forces. That enemy must generally be the party out of power, while the authorities that command the force directed against them will be the executive authority of the State for the time being, wielded by their opponent.

It is consequently, of the highest importance that the presence of the military force at the polls be not suffered except in serious emergencies, when disorders exist or are threatened for the suppression or prevention of which the ordinary peace force is insufficient. And any statute which would provide for or permit such presence as a usual occurrence or, except in the last resort, though it might not be void, would nevertheless be a serious

invasion of constitutional right, and should not be submitted to in a free government without vigorous remonstrance. (Cooley's Constitutional Limitations, 6th edition, pages 773 and 774.)

This is "American law," recognized without qualification in every State of the Union and to which the board accords its willing and unqualified approval. So firmly are the principles announced by Judge Cooley anchored in our system that the Federal Congress by statute has provided that armed troops can not lawfully be present at the place of an election, except to repel the enemies of the United States or keep the peace. The doctrine announced by Judge Cooley is recognized and practiced in England. It has been the usage from the time of Edward I to remove all bodies of troops stationed near any polling places while the election was in progress, and by the statute of George II, c. 30, it was made the duty of the secretary of war to remove any body of troops not on regular garrison at least two miles from the town where an election was to be held, and keep them away at least one day after the polls were closed. Interpreting this statute, an English court said: "There having been disturbances and rioting during the election, the officers called in a body of troops to assist in preserving order." The election was set aside, but it does not appear from the proceedings whether it was on account of the employment of the soldiers or because of the riot.

The magistrates who called in the militia were called before the House of Commons and reprimanded on their knees by the Speaker, and the House passed the following resolution:

"That it appears to this House that a body of armed soldiers, headed by officers, did, on Friday, the eighth day of March last, come in a military manner, and take possession of the churchyard of St. Paul, Covent Garden, near the place where the polls for the election of citizens to serve in this present Parliament for the city of Westminster was taken before the said election was ended; that the presence of a regular body of armed soldiers at an election for members to serve in Parliament is a high infringement of the liberties of the subject, a manifest violation of the freedom of electons, and an open defiance of the laws and constitution of this Kingdom." (Roe on "Elections," 311.)

THE LAWS OF EVERY STATE.

The doctrine announced above is the law of every State in this Republic, and in a proper case with the facts properly shown before a tribunal having jurisdiction to deal with the subject the conclusion to which such tribunal would come is not, in our opinion, clothed by the slightest shadow of doubt.

But, for reasons already discussed, this board may not sit in judgment on that question, nor does it intend by what it has said to commit itself to any hard-and-fast line of action in the future. We have taken the liberty in this connection to express on this, along with the other questions argued, an opinion in this proceeding which has taken the widest range in the argument on both sides.

THE ACTS OF JUDGE TONEY.

Once more counsel for the Democratic candidates urges upon this board that it ought to reject the vote of the city of Louisville on account of the official acts of a circuit judge who, as counsel contend, with writs of mandamus and mandatory injunctions, not only forced, as it is claimed, the officers of election to admit persons to the polling places who legally had no right to be there, but who, by mandatory process, required election officers to certify returns which it is suggested to us were not in fact true.

All of this, for the reasons stated, is apart from the jurisdiction of this board as at present constituted. It is enough, however, in this connection, to say that this is not a government by injunction, and when the question is properly presented before a tribunal having jurisdiction to deal with the subject, we predict with confidence that the judgment of such tribunal will be swift and certain, and that it will be distinctly held that such performances on the part of any judge in this State, whether of high or low degree, are usurpations which can not and will not be sanctioned by law.

If the people of Kentucky are noted for anything, it is for fair dealing. Any attempt at intimidation, coercion, or overawing is resented by every citizen of the State, and no officer can with impunity exercise the functions of his place for the purpose of controlling the lawful actions of the citizens, or to put him in fear, except as he has committed some public offense.

THE CERTIFICATE IS TAYLOR'S.

We regret we have regarded it necessary in view of questions before us to extend this opinion to such length. It results from what has already been said that the certificates on the face of the returns before us should be issued to William S. Taylor, the Republican candidate for governor, and to the other candidates on the Republican State ticket with him, and it is so ordered.

Mr. KEAN. I should like to ask unanimous consent to call up a little pension bill.

Mr. BLACKBURN. I should like to have the floor——

Mr. KEAN. I yield to the Senator from Kentucky.

Mr. BLACKBURN. Unless the traditions of the Senate are to be disregarded.

Mr. KEAN. I yield to the Senator from Kentucky.

Mr. BLACKBURN. Mr. President, if the Senator from Kentucky [Mr. DEBOE] is satisfied with his speech, so am I, and surely he has no right to claim that it was made on the spur of the moment, because it is evidently, from beginning to end, an answer to something that I said in the Senate when engaged in a colloquy with the junior Senator from New York [Mr. DEPEW], and if my memory serves me as to dates, that must have been two months or more ago.

So the Senator's utterance to-day is not an impromptu one. It has been deliberated upon and carefully prepared, I assume, and I have no objection to it. On the contrary, I congratulate him upon the good temper in which it was couched and delivered.

I am sorry that the Senator in the course of his address did not illustrate a little more his nonpartisan fairness and tell us something about what his party did through these troublous and ever to be regretted times in that period of Kentucky's history. He has told you everything bad that the Democratic party ever did out there. He has told you everything bad that anybody ever intimated that the Democratic party ever did, and he has told you a good deal that I never before heard anybody charge against the Democratic party.

But his time was limited, I reckon. He has spoken only an hour and a half, and he did not have time or take occasion to tell you about somebody suspending the writ of habeas corpus in Kentucky just at that junction, denying to the officials of the courts permission to serve the processes of the courts, not in the remote mountain counties of my State, but on the capitol square in the city of Frankfort, which was barricaded with armed men and converted into a military camp.

He did not tell you that when the sheriff undertook to execute process of the circuit court of Franklin County, the capital county of my State, and to execute it on the capitol square itself, under the dome of the State capitol, he was notified that the civil writs of courts did not run any longer; that martial law was supreme, and that he was a prisoner.

I am sorry that the Senator did not find time to tell you who it was that with bayonets and guns in their hands, under the command of the military State officials, chased the legislature of that sovereign Commonwealth out of that State capitol building, ran a foot race with it in its effort to get to the court-house where it might hold a session, barred it from entrance to the court-house with bayonets, under the command of the adjutant-general of the State—Mr. Taylor's adjutant-general—Dan Collier, and then when that legislature, a law-making body on wheels, undertook to meet in the opera house Dan Collier and the uniformed military of the State, whom Taylor had there, beat them to the opera house and with crossed bayonets in front of its doors refused to allow the legislature to gather there.

I wish he might have gone on and told you further that that same Republican adjutant-general, who had suspended the writ of habeas corpus, who had proclaimed martial law, who had chased the legislature at the point of the bayonet out of the State capitol and away from the court-house and away from the opera house, and all in God's broad sunshine of the day, then hied himself across the street to the principal hotel, where he heard, as he said, that the legislature was thinking of holding a session, and harangued the crowd and notified the proprietor, Mr. Whitesell, that if the legislature of Kentucky, the reservoir of the sovereignty of 1,800,000 free people, was allowed to hold a session in that public hotel he would batter it to the ground with the Gatling guns that Bradley sent to Louisville to intimidate the voters of that city with.

Nobody denies all these things. My colleague will not deny them. But I do not care to dwell upon the incidents of that, the darkest page in all my State's history. It may not be that cause preceded effect; it may be that it was simply and purely a political incident; but without expressing an opinion upon that subject the fact will not be gainsaid that this darkest, bloodiest, most disreputable of all the periods of that old Commonwealth's history, which covers more than a hundred years, took place under the only Republican administration with which that State has ever been cursed since it came into this Union in June, 1792.

Now, as to the vote, I am not going to repeat myself or say over what I said on the former occasion to which I have alluded. The board of State election commissioners consisted of three men. The Senator has stated this fact correctly. They were all Democrats. They were men of the highest character, two of them lawyers of high and recognized ability and standing. They were all Democrats. There was not a Republican on it. There ought to have been, but there was not.

That was the board—three Democrats. One of them was a member of the House here from Kentucky for years—Ellis, from the Second district. That board by a majority vote, on a contest between the contending parties for the State offices, issued the certificates from top to bottom to the Republican ticket. Now, the Senator complains that the Republicans had no representative on that election board.

Mr. DEBOE. Will the Senator yield to me for a moment?

Mr. BLACKBURN. Certainly.

Mr. DEBOE. Did all three of them sign the certificates?

Mr. BLACKBURN. No; I will state it.

Mr. DEBOE. Which one refused?

Mr. BLACKBURN. Mr. Points refused. Judge Pryor and Mr. Ellis did sign.

Mr. DEBOE. Will the Senator permit me to ask him another question?

Mr. BLACKBURN. Certainly.

Mr. DEBOE. After Judge Ellis and Judge Pryor signed this report, did they not resign, and did not Mr. Points, the remaining member, appoint Mr. Fulton and Mr. Yonts?

Mr. BLACKBURN. Certainly.

Mr. DEBOE. Then the whole election was absolutely in the hands of Mr. Points, who refused to sign the certificates of the Republicans.

Mr. BLACKBURN. No; the whole election was not in his hands at all. He did not have any more influence than the Senator had here, because the other two outvoted him and issued certificates to the Republican claimants for every State office on the ticket. I admit that the Republicans had no representation upon that board of election commissioners, but it does not seem

to me that they suffered much, because that board, composed of three avowed Democrats, issued to the Republican candidates the certificate of election for every State office from governor down.

Mr. DEBOE. Will the Senator permit me?

Mr. BLACKBURN. Certainly.

Mr. DEBOE. After the board was composed of Mr. Points, and Mr. Fulton, and Mr. Yonts, they heard the contests for the minor offices?

Mr. BLACKBURN. That was after the issuance of the certificates.

Mr. DEBOE. Yes.

Mr. BLACKBURN. Yes.

Mr. DEBOE. They heard the contests?

Mr. BLACKBURN. Yes.

Mr. DEBOE. This board threw out the city of Louisville and the various counties that were thrown out on account of tissue ballots?

Mr. BLACKBURN. Yes, sir.

Mr. FAIRBANKS. Will the Senator state whether the board was Democratic or Republican?

Mr. DEBOE. Democratic entirely, there being not a Republican on it.

Mr. BLACKBURN. It was Democratic. That was, as to two of the three members, a new board, because after issuing certificates to the Republican candidates, two of the three Democrats on the original State board of election commissioners resigned, and the two appointed in their places were Democrats, which left it still a Democratic board. That is the exact statement.

Now, I do no care to go any further. As to the law——

Mr. FAIRBANKS. Will the Senator please state why the two resigned, if he can inform us?

Mr. BLACKBURN. I had contented myself with the request of the Senator to have published as a part of his speech the statement published by the State election commissioners who did resign.

He read part of it and cheerfully acceded to my request to have the whole of it published in his remarks, because they tell you there that on the face of the returns the Republican candidates on the State ticket were elected, but they tell you further that they were simply discharging a ministerial duty, which was to foot up the tally sheets and issue certificates; that their duties were purely ministerial; that they had no right, as they conceived, to inquire into the validity of any ballot that might be impeached; that theirs was purely a clerical service, and in the discharge of such duty they had no difficulty in ascertaining that Taylor and the other Republican candidates had a majority of the votes returned. Upon that they issued the certificates of election to the Republican candidates.

But read in to-morrow morning's RECORD, if the Senator's speech shall appear in to-morrow morning's RECORD, the statement given out to the public by these gentlemen, who afterwards resigned, and you can not reach any conclusion on earth except that they issued those certificates to the Republican claimants not because they believed they had gotten a majority of the legal votes cast at that election (because they did not believe it), but because they had no power to go behind the returns. That is set out as plainly as two good lawyers like the ex-chief justice of my State, Judge Pryor, and Judge Ellis were able to put it.

That is the reason why they resigned. It was because their oaths, as they construed the law, required them to issue certificates on the State ticket to a lot of men who had never been elected, and they knew that the people were restless under it and would be dissatisfied with it. That was their explanation, and none other. I do not care to go into all these things.

Mr. FAIRBANKS. Will my brilliant and good friend allow me to ask him a question at this point, in order to get at the truth?

Mr. BLACKBURN. With great pleasure.

Mr. FAIRBANKS. This is a very important question. It seems to me, from listening to the Senator's very able speech a few weeks ago and his colleague's speech to-day, that there is a divergence of views between them with respect to a very important feature of the case.

I understood the junior Senator from Kentucky to say, in the course of his remarks, that the Democratic contention had been approved and justified by the court of appeals of Kentucky, and also by the Supreme Court of the United States. I interrupted the senior Senator from Kentucky this afternoon and asked him whether the merits of this controversy, lamentable as it is, had been passed upon by either State or Federal court.

I am referring now to what is generally known as the Taylor case. He said they had not been. I then turned to the RECORD and find this utterance of my distinguished friend, now on the floor——

Mr. BLACKBURN. What is the date, if the Senator pleases?

Mr. FAIRBANKS. April 11 last.

Mr. BLACKBURN. That is right. It was over two months ago.

Mr. FAIRBANKS. I will read it.

> In the meantime the legislature met, and as it had the unquestioned right—a right which no man ever has dared to dispute, even in the realm of newspaperdom—that legislature by joint ballot, supported by a majority of all the membership of it, declared, as did the whole number of three State commissioners, that Taylor and his Republican associates upon the ticket had never been elected. That legislature declared that Goebel was the legally elected governor of the Commonwealth.
>
> That contest was prosecuted through the State of Kentucky to and including its supreme court, which we denominate the court of appeals. The contention of the Democrats was sustained. Nor did it stop there. That contest was brought beneath the Dome of this Capitol and passed upon by the Supreme Court of the United States, and the action taken by the local courts of Kentucky was sustained and vindicated.

Mr. BLACKBURN. Precisely.

Mr. FAIRBANKS (reading):

> These are the facts, and no man who knows aught of them will dispute a single, solitary statement.
>
> What is it that the Senator from New York is complaining about? The Goebel law, he said. Why, the Goebel law has been sustained by the supreme court of Kentucky, and that has been sustained and vindicated in the opinion of the Supreme Court of the United States. Is it possible that the supreme courts of the Commonwealths of this Union and the Supreme Court of the United States itself must reverse their findings, change their opinions, review their own decisions, and come to learn law at the hands of a worthily distinguished and conspicuous corporation railroad attorney?
>
> I stand upon the opinion of the supreme court of my State and upon the opinion of the Supreme Court of the United States, and I think I may safely stand there with a hope of not having the underpinning knocked from beneath me by the opinions of the junior Senator from New York.

Mr. BLACKBURN. That is it.

Mr. FAIRBANKS. I had that in mind, but not accurately, when I interrogated the senior Senator from Kentucky. I understood him to say that the decision of the court of appeals of Kentucky and of the Supreme Court of the United States did not turn upon the merits of the controversy, but upon a question of jurisdiction.

Mr. BLACKBURN. No; it was not at all upon a question of jurisdiction, if the Senator please. I repeat every word that the Senator from Indiana has just read from the CONGRESSIONAL RECORD from my remarks made some two or three months ago. The courts of Kentucky held—and when I say the "courts of Kentucky" I mean from the nisi prius court up through the supreme court—that the legislature was clothed with the power to determine all contested election cases, not for State offices, but for the two offices of governor and lieutenant-governor.

The legislature is made the arbiter and the court before whom that case must be tried, and its judgment is final, The legislature did so through the report of its joint committee. It had separate committees upon the contest for governor and upon the contest for lieutenant-governor. My colleague complained of the lack of proper Republican representation numerically upon those committees, and intimated, if he did not charge, that there must have been some species of chicanery in the formation of those committees.

To that I have nothing to say, except that those committees were selected by lot in the two houses of the legislature in open session, just as men draw for seats over here in the House of Representatives.

Those two committees were raised and those joint committees did report, and the legislature, not only in joint assembly, but severally did declare by a majority vote, a quorum of each house being present, that not Taylor but Goebel had been elected governor of Kentucky, and that Beckham had been elected lieutenant-governor.

Mr. FAIRBANKS. What was the political complexion of the legislature at that time?

Mr. BLACKBURN. Oh, it was very largely Democratic. I notice the Senator from Kentucky said it was nearly evenly divided—that is, he had an indefinite way of making the calculation so that it counts neither for proof or disproof, because he claimed all the Republicans in both branches as of right by heredity. Then he claimed, I do not know whether by inheritance or purchase, all of the bolting Democrats there, known as Gold Democrats. He said there were a large number of them, which left the Democrats in a majority of about ten or a dozen. That is a difficult calculation to make.

Mr. DEBOE. Will the Senator allow me?

Mr. BLACKBURN. With pleasure.

Mr. DEBOE. Does the Senator ask me a question?

Mr. BLACKBURN. No; I thought the Senator wanted to ask one.

Mr. DEBOE. I understood the Senator to say that this board reported to the legislative committees.

Mr. BLACKBURN. No; I said the legislative committees reported.

Mr. DEBOE. They reported to the legislature?

Mr. BLACKBURN. Yes.

Mr. DEBOE. That the Democrats were elected?

Mr. BLACKBURN. Yes.

Mr. DEBOE. Did they state any reason for the decision which they reached?

Mr. BLACKBURN. I have not their report before me. If the Senator has it, I will very gladly incorporate it in my remarks.

Mr. DEBOE. I have it here.

Mr. BLACKBURN. Or the Senator may put it in his. I know those two joint committees reported in favor of the election of Goebel and Beckham, and I know the legislature ratified their finding by declaring Goebel elected governor and Beckham elected lieutenant-governor. Now, that was the question that was carried into the court, and clear through to the supreme court of the State of Kentucky it was held that the legislature was the exclusive tribunal clothed with power to determine this contest.

Mr. FAIRBANKS. It went to the Supreme Court.

Mr. SPOONER. That is what the Senator said.

Mr. BLACKBURN. Precisely; that is what it did.

Mr. SPOONER. And the court held it had no jurisdiction.

Mr. BLACKBURN. Precisely; but the action taken by the legislature was upheld as the law of the land by the supreme court of my State, and when brought before the Supreme Court of the United States by writ of error, it was affirmed there.

Mr. FAIRBANKS. But they did not pass upon the question as to whether the action of the legislature was in contravention of the rights of the Republican candidate or otherwise.

Mr. BLACKBURN. Why was not that question raised?

Mr. SPOONER. It could not be raised, could it?

Mr. BLACKBURN. Then all I have to say is this, and I venture that it will go without contradiction: There was not a step taken by the Democratic party in Kentucky during all of this contention that was not supported, upheld, and validated by the courts, both State and Federal. I might say further that——

Mr. DEBOE. Will the Senator yield to me?

Mr. BLACKBURN. In one moment. I might say further that no matter how much trouble was brought there, no matter how many laws were infracted and broken, no matter how many shots were fired and mobs were raised, no matter how much blood was spilled, there never was a word uttered, so far as the record goes, an act performed, a shot fired, or a murder committed by a member of the Democratic party.

From the beginning to the end of that lamentable affair no man has ever claimed, and no man who stands upon the record and regards the truth will dare to say, that there ever was a shot fired by anybody upon the Democratic side. No blood is chargeable to their account. No suspension of the writ of habeas corpus or the civil processes of the courts was ever charged to them. It was not by Democrats that the State house was turned into a military camp, and the supreme court of my State driven out of its chambers, and the records of that court left in the charge of a shoulder-strapped sergeant of a military company using the capitol for a military camp.

Mr. DEBOE. Will the Senator yield?

Mr. BLACKBURN. Yes; with pleasure.

Mr. DEBOE. That was the court, then, composed of all Democrats?

Mr. BLACKBURN. A majority.

Mr. DEBOE. At that time?

Mr. BLACKBURN. Yes.

Mr. DEBOE. Where do you get any evidence to show that the supreme court or the court of appeals was ever driven out or prevented from exercising the rights it had under the law?

Mr. BLACKBURN. I make a witness of my colleague. I prove it by him.

Mr. DEBOE. I say it was not so.

Mr. BLACKBURN. I say it was, and I say my colleague will not deny it.

Mr. DEBOE. The record will show.

Mr. BLACKBURN. It is true the military under the adjutant-general—General Collier—did not drive out the supreme court at the point of the bayonet and lift them out of their room, but he put that statehouse and statehouse yard under guard. I was there and saw it, and so did the Senator, because he did not leave there until the very afternoon before Goebel was murdered and shot down in cold blood. That happened on Tuesday morning, and the Senator left there on Monday night after dark.

Mr. DEBOE. The militia were not called out then.

Mr. BLACKBURN. No.

Mr. DEBOE. That is what I said.

Mr. BLACKBURN. The mob had control, though, as the Senator knows, and pitched their tents in the statehouse yard.

Mr. DEBOE. Do you mean the Democratic mob?

Mr. BLACKBURN. I mean the mob that your people brought from the mountains, 1,400 strong, Thursday morning before Goebel was murdered, on special trains furnished by the Louisville and Nashville Railroad people, without charge besides. Of the supreme court of that State, known as the court of appeals, at that time not one of its judges went into the statehouse yard because they could not get in except through a file of bayonets provided they had permission from General Collier, the Republican adjutant-general.

Mr. SPOONER. The Senator did not mean that the sergeant wore shoulder straps?

Mr. BLACKBURN. No; chevrons. I did not mean shoulder straps. He was a subordinate military officer, not ranking probably above a corporal.

Now, if all of these things of which the Senator complains were true, if Taylor was elected Governor of Kentucky, if he had a majority of the votes of that 2,000,000 people, he surely must have some friends left out there now. Why does not the Senator advise him and another one of his associates to quit hiding out as fugitives from justice and finding shelter under the ægis of the governor of the State of my friend from Indiana, under indictment as accessories before the fact to the foulest, most dastardly, cowardly, and cruel murder that ever disgraced the records of any party or any country?

Is he afraid that he can not get a fair trial? Is it possible that a man who in the last gubernatorial election had a majority of the votes in the whole State at his back for the high office of governor can not get a fair trial at the hands of 12 men in the State of Kentucky?

Suppose he did not get a fair trial. Does he not know—if he does not the Senator can inform him—the supreme court, the court of last resort in the State to-day, is Republican in its texture and its make-up; and if you have any doubt about its being a Republican court you can find some convincing arguments to that effect if you will notice that in every case where an appeal has been taken, where a man has been charged by indictment on the oaths of a grand jury with being implicated in Goebel's assassination and has been convicted, and an appeal is taken to that supreme court of Kentucky since that Republican majority has been on that bench, in every solitary instance the case has been reversed.

It looks like a majority of that court are pretty solid Republican. So if Taylor and Finley and the balance of the fugitives from justice who are becoming citizens of Indiana, our neighbor State, will go back and answer to those indictments under which they are resting to-day they have the assurance in advance that they have a partisan Republican supreme court to appeal to in the final resort, that never has been yet appealed to by a suspected assassin in vain.

Now, I do not know that I care to say anything more, Mr. President, except one thing. When the Senator started out I put this almost blank sheet, as you will see, in front of me to take notes of what I thought would be necessary to reply to. But I found none to make except one—I did make one note—and I want to use it now, not for my protection or benefit, but for the benefit of my colleague.

He stated that a majority of the citizens of Louisville who asked for troops there on the day of election were not Republicans, were not Gold Democrats, but were Bryan Democrats. I am sure that that was a hasty utterance and that my colleague did not intend to say that. I simply call his intention to it in order that he may not allow it to appear that way in the RECORD, because I would not have him appear to such disadvantage before his people.

Mr. DEBOE. Will the Senator yield?

Mr. BLACKBURN. With pleasure.

Mr. DEBOE. I did not mean to say all.

Mr. BLACKBURN. No, you said a majority.

Mr. DEBOE. I think that is about correct.

Mr. BLACKBURN. That a majority of those asking for troops were Bryan Democrats?

Mr. DEBOE. I think so.

Mr. BLACKBURN. I have done my part toward saving my colleague from the disadvantage at which he will appear before Kentucky's people. If he will not accept my friendly service it is not my fault.

Mr. DEBOE. There were a thousand men, Bryan's friends, in the city of Louisville who were very strongly against Mr. Goebel, as the Senator knows.

Mr. BLACKBURN. No, I do not know that. I know this: He said there was no evidence of the presence of troops parading in the streets of Louisville on the day of the election with Gatling guns to prevent anybody from voting. I stated six weeks or about two months ago that the only evidence we had of that was that the registration taken a few days before the election, as the law required, showed that in round numbers there were 10,000 more men who took the trouble to register at that time to vote in Louisville than did vote when the day of election came and the military paraphernalia was employed.

I have nothing more to say, Mr. President.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. C. R. MCKENNEY, its enrolling clerk, announced that the Speaker of

the House had signed the following enrolled bills and joint resolution; and they were thereupon signed by the President pro tempore:

A bill (S. 1225) granting an increase of pension to Clara W. McNair;

A bill (S. 3320) granting an increase of pension to Adelaide G. Hatch;

A bill (S. 3360) for the promotion of First Lieut. Joseph M. Simms, Revenue-Cutter Service;

A bill (S. 4611) to authorize the West Elizabeth and Dravosburg Bridge Company to construct and maintain a bridge across the Monongahela River, in the State of Pennsylvania;

A bill (S. 5383) providing that the circuit court of appeals of the fifth judicial circuit of the United States shall hold at least one term of said court annually in the city of Atlanta, in the State of Georgia, on the first Monday in October in each year;

A bill (S. 5506) granting an increase of pension to Clayton P. Van Houten;

A bill (S. 5856) granting an increase of pension to Elizabeth A. Turner; and

A joint resolution (H. J. Res. 6) in relation to monument to prison-ship martyrs at Fort Greene, Brooklyn, N. Y.

ORDER OF BUSINESS.

Mr. HALE. It is almost 5 o'clock.

Mr. DEBOE. Will the Senator from Maine allow me just a moment?

Mr. HALE. Let me make a statement; then I will yield to the Senator.

It is evident that neither the report of the conferees upon the naval bill or the deficiency bill, the only two remaining appropriation bills, will reach this Chamber for several hours. I do not think under the circumstances it is worth the while to wait longer. I have been asking Senators not to move to adjourn until I could discover the situation in the House. I rose for the purpose of moving an executive session, and before that session I will move that when the Senate adjourns it adjourn to meet at 11 o'clock Monday morning. That will give us a long day's session and an opportunity for dealing with these reports and with the other report if it comes in from the conferees on the Philippine government bill. If the reports come in there is a very good prospect that we may adjourn either during the day Monday or early the next day. I think the appropriation bills will not delay final adjournment, but I think we gain nothing by waiting any longer to-night.

I yield for the present to the Senator from Kentucky.

ELECTION OF UNITED STATES SENATORS.

The Senate resumed the consideration of the amendment intended to be proposed by Mr. DEBOE to the joint resolution (H. J. Res. 41) proposing an amendment to the Constitution providing for the election of Senators of the United States.

Mr. DEBOE. Mr. President, just a word or two in reply to what my friend said.

Before I notice that, there is one question which I desire to speak of, that is the question of tissue ballots. The evidence was conflicting as to whether there were tissue ballots used or not, but the record shows that there were more Democratic tissue ballots than there were Republican ballots.

The Democratic board threw out the counties of Magoffin, Martin, and Jackson on charge of thin ballots, and Jefferson on interference of militia. The evidence showed that in Graves, Wolfe, Powell, and Breathitt counties there were thinner ballots used, with a Democratic majority of 3,111, than there were in the Republican counties of Magoffin, Martin, and Johnson, with a Republican majority of 1,187.

Now, Mr. President, it is true that Governor Taylor declared martial law and adjourned the legislature after the assassination of Mr. Goebel, and I say that the assassination of Mr. Goebel was a great crime on that State. The reason he did that was on account of the lawless condition surrounding the legislature and the city of Frankfort. It was absolutely in a state of insurrection. That whole affair had been brought about by the wrongful acts of the Democratic party during the two or three years prior thereto and at that time. That was the reason why. They had threatened to kill, as I said a while ago, two Republican attorneys if they attempted to argue that case. I will read from the record what that statement was, and then I shall close.

Mr. PETTUS. Mr. President, will the Senator allow me to ask him a question?

Mr. DEBOE. Yes, sir.

Mr. PETTUS. I desire to know whether the constitution of Kentucky authorizes the governor to declare martial law?

Mr. DEBOE. I think it does. A great many of the ablest lawyers in Kentucky think it does. Democratic lawyers of great ability have so expressed themselves.

I am reading from the transcript of the record, volume 1, page 31:

"Defendants further say that the said committees finally concluded the hearing of evidence on January 29, and ordered that the argument should begin on the next day, to wit, January 30, allowing each side ten hours to argue the contest, and ordering that the argument on the first day should not in all exceed six hours. On the next day, to wit, on January 30, being the day on which the argument was to begin, and just before the time arrived for the beginning of said argument, the said contestant, William Goebel, was assassinated, that is to say, he on that day received the wound from which he afterwards died.

"The said wounding of the said Goebel instantly caused great and extraordinary excitement in the city of Frankfort, and feeling and passion in the people and members of the general assembly ran very high, so that for a time there was serious danger of mob violence, and threats were made against and communicated to the attorneys for the contestees to the effect that two of them would be killed if they attempted to argue said contests.

"The communications of these threats were not made by irresponsible persons or anonymous communications, but some of the counsel for the contestants stated to the counsel for the contestees that they felt it due to themselves, as men and as lawyers, to notify the counsel for the contestees that in their judgment two of the said counsel for contestees (naming them) would be killed if they appeared before the said committee to argue the said contests."

Now, Mr. President, the civil authorities were unable to protect the lives of men in the discharge of important duties. As I have said, a state of insurrection existed in the city of Frankfort as great as it did during the civil war. The reason why Taylor and Finley do not return to Kentucky is on account of the corrupt methods used by the courts. Justice has flown away and corrupt politics absolutely dominate the courts. That is the reason why they do not come back there. They would stand no more chance to get justice in those courts than a white man would among a lot of wild Indians.

I ask the Senator why $100,000 reward was offered to find the assassin. Every citizen of that State wanted the assassin found. But, Mr. President, the reason they appropriated $100,000 was not to secure and to punish the assassin, but it was for the purpose of using that matter to advance the interests of the Democratic party, as it has been used ever since as a political scheme to reflect upon honest men. Witness after witness has confessed that they swore falsehoods; that they had been bribed by a certain gentleman who was sent there for a special purpose to aid in the prosecution of these cases.

Mr. BLACKBURN. Will the Senator allow me a moment?

Mr. DEBOE. Yes, sir.

Mr. BLACKBURN. I want to ask the Senator whether he thinks it was necessary to use that appropriation of $100,000 or any other appropriation or argument to advance the interests of the Democratic party in Kentucky. Does he not know that when the shot rang out which cost Goebel his life, it sealed the doom of the Republican party in Kentucky for at least one generation to come, as witnessed by the early retirement of our genial friend from his place in this Senate, which we all regret and deplore?

Mr. DEBOE. That is the statement, of course, of my distinguished colleague. The Republican party was not responsible for the death of Mr. Goebel.

Mr. President, the people of Kentucky and, I think, of almost all the United States are pretty familiar with the conduct of the courts in the various trials which have been held there. I will say to the Senator that if he will not select Goebelite jurors, but will select honest, impartial men, those men are willing any day to return and have a fair trial, if they will have a judge that is not dominated absolutely by his political prejudices to preside over the trial.

The judge who presided over those cases arbitrarily ruled in the interest of the prosecution and against the rights of the defendants, and the court of appeals of the Commonwealth has reversed his ruling time and again. I say that the reason why those men are not back there is because they can not get justice. They would come any day if they could have a fair trial.

Mr. BLACKBURN. Mr. President, I only want to say in this connection the Senator does not know Judge Cantrill, the nisi prius judge in that capital jurisdiction in Kentucky, as well nor as intimately as I have known him. I venture the assertion, and it can be established by the testimony of every good citizen of Kentucky who knows him, without regard to politics, that there is no more learned judge, no truer, higher gentleman, no better man either in my State or any other, than that nisi prius judge before whom these trials were had.

But suppose it were true, as the Senator from Kentucky charges, that Taylor and his accomplices could not get a fair trial in the

circuit court or trial courts in my State, I repeat that as the court of last resort they could go to the court of appeals or the supreme court of Kentucky, which has a majority of Republican judges on it to-day, and which, since it was so constituted, has never failed to set aside every verdict that ever convicted any man charged with the killing of Goebel. No appeal has ever been taken from the trial court where conviction was had of one of these alleged assassins that has not been reversed by the supreme court of the State since that court has been Republican, as it is to-day.

I wish very much that I had the power. I would gladly agree here and now that Taylor and Finley and the balance of these fugitives from justice should be tried under a change of venue, if it were permissible or legal, not before a Kentucky court nor a Kentucky jury, but before an Indiana judge and an Indiana jury or a Massachusetts judge and a Massachusetts jury.

Mr. DEBOE. We will agree to that.

Mr. BLACKBURN. Wherever they were tried I would be content with the verdict, and so would the people of Kentucky.

Mr. DEBOE. Will the Senator yield a minute?

Mr. BLACKBURN. Certainly.

Mr. DEBOE. I will agree for those gentlemen that that be done and that the cases shall be transferred before some honorable judge.

Mr. BLACKBURN. I thought my colleague among his various learned professions embraced that of a lawyer. I knew he was a doctor, and I thought he was a lawyer also. I thought he knew that it was not in the power of mortal man to change the venue and carry a criminal case out of one Commonwealth into another.

Mr. DEBOE. I understand that. I meant, of course, in the same State.

Mr. BLACKBURN. I would be perfectly willing to have it tried in any State in New England, and I would not care whether the jurors were Republicans or Democrats, just so they were honest men, and I would be assured of the result.

HOUR OF MEETING.

Mr. HALE. I move that when the Senate adjourn to-day it be to meet at 11 o'clock on Monday next.

The motion was agreed to.

CONTROL OF DOGS IN THE DISTRICT.

Mr. GALLINGER. I am directed by the Committee on the District of Columbia, to whom was referred the amendment of the House of Representatives to the bill (S. 4792) relative to the control of dogs in the District of Columbia, to report it with a recommendation that the Senate concur in the amendment of the House of Representatives.

The PRESIDENT pro tempore. The Senator from New Hampshire reports from the Committee on the District of Columbia the amendment of the House of Representatives to the bill named by him, and asks for its present consideration. Is there objection?

There being no objection, the Senate proceeded to consider the amendment of the House of Representatives, which was to strike out all after the enacting clause and insert:

That sections 3, 4, and 9 of the act of Congress approved June 19, 1878, entitled "An act to create a revenue in the District of Columbia by levying a tax upon all dogs therein, to make such dogs personal property, and for other purposes," be, and the same are hereby, amended so as to read as follows:

"SEC. 3. That the pound master of the District of Columbia shall, during the entire year, seize all dogs found running at large without the tax tag issued by the collector aforesaid attached, and all female dogs in heat found running at large, and shall impound the same; and if within forty-eight hours the same are not redeemed by the owners thereof by the payment of $2 they shall be sold or destroyed, as the pound master may deem advisable; and any sale made by virtue hereof shall be deemed valid to all intents and purposes in all courts of the District of Columbia.

"SEC. 4. That any dog wearing the tax tag hereinbefore provided for, except female dogs in heat, shall be permitted to run at large within the District of Columbia, and any dog wearing the tax tag hereinbefore provided for shall be regarded as personal property in all the courts of said District, and any person injuring or destroying the same shall be liable to a civil action for damages, which, upon proof of said injuring or killing, may be awarded in a sum equal to the value usually put upon such property by persons buying and selling the same, subject to such modifications as the particular circumstances of the case may make proper.

"SEC. 9. That if any owner or possessor of a fierce or dangerous dog shall permit the same to go at large in the District of Columbia, knowing said dog to be fierce or dangerous, to the danger or annoyance of the inhabitants, he shall, upon conviction thereof, be punished by a fine not exceeding $20; and if such animal shall attack or bite any person, the owner or possessor thereof shall, on conviction, be punished by a fine not exceeding $50, and in addition to such punishment the court shall adjudge and order that such animal be forthwith delivered to the pound master, and said pound master is hereby authorized and directed to kill such animal so delivered to him.

"If any owner or possessor of a female dog shall permit her to go at large in the District of Columbia while in heat he shall, upon conviction thereof, be punished by a fine not exceeding $20."

Mr. GALLINGER. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. HALE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 5 o'clock and 15 minutes p. m.) the Senate adjourned until Monday, June 30, 1902, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 28, 1902.

COLLECTOR OF CUSTOMS.

Walter L. Robb, of Oregon, to be collector of customs for the district of Oregon, in the State of Oregon, to succeed John Fox, whose term of office has expired by limitation.

SURVEYOR-GENERAL.

Ernest G. Eagleson, of Boise, Idaho, to be surveyor-general of Idaho, vice Joseph Perrault, term expired.

POSTMASTERS.

Horace H. Dubendorff, to be postmaster at Alamosa, in the county of Conejos and State of Colorado, in place of Horace H. Dubendorff. Incumbent's commission expired March 22, 1902.

Samuel M. Johnson, to be postmaster at Carson, in the county of Pottawattamie and State of Iowa. Office becomes Presidential July 1, 1902.

Oliver H. P. Green, to be postmaster at Orion, in the county of Oakland and State of Michigan. Office becomes Presidential July 1, 1902.

Charles H. Whitaker, to be postmaster at North Conway, in the county of Carroll and State of New Hampshire. Office becomes Presidential July 1, 1902.

Kenneth E. Struble, to be postmaster at Shepherd, in the county of Isabella and State of Michigan. Office becomes Presidential July 1, 1902.

Carrie Newton, to be postmaster at Benwood, in the county of Marshall and State of West Virginia. Office became Presidential April 1, 1902.

Anna L. Poole, to be postmaster at Carthage, in the county of Panola and State of Texas. Office became Presidential January 1, 1902.

Loren Z. Burdick, to be postmaster at Seabreeze, in the county of Volusia and State of Florida, in place of Mary N. Herrick, removed.

Frank E. Posey, to be postmaster at Baton Rouge, in the parish of East Baton Rouge and State of Louisiana, in place of James B. Burnett, deceased.

Homer N. Boyle, to be postmaster at McGregor, in the county of Clayton and State of Iowa, in place of Alonzo C. Boyle, resigned.

Eliza B. Lockwood, to be postmaster at Bedford, in the county of Cuyahoga and State of Ohio, in place of Malcolm J. Lockwood, deceased.

Jonathan McGrath, to be postmaster at Woodward, in the county of Woodward and Territory of Oklahoma, in place of Edward B. Roll, removed.

Charles K. Bailey, to be postmaster at Bethel, in the county of Fairfield and State of Connecticut, in place of Charles K. Bailey. Incumbent's commission expires July 1, 1902.

George A. Lemmon, to be postmaster at Thomaston, in the county of Litchfield and State of Connecticut, in place of George A. Lemmon. Incumbent's commission expired June 22, 1902.

William W. Ward, to be postmaster at Dayton, in the county of Columbia and State of Washington, in place of William W. Ward. Incumbent's commission expired June 22, 1902.

Edward G. Armstrong, to be postmaster at Bartlett, in the county of Williamson and State of Texas, in place of Edward G. Armstrong. Incumbent's commission expired March 31, 1902.

Burtis W. Johnson, to be postmaster at Corvallis, in the county of Benton and State of Oregon, in place of Burtis W. Johnson. Incumbent's commission expired January 10, 1902.

John G. Gorth, to be postmaster at Oconomowoc, in the county of Waukesha and State of Wisconsin, in place of William A. Jones. Incumbent's commission expired May 4, 1902.

Leonard A. Millspaugh, to be postmaster at Winfield, in the county of Cowley and State of Kansas, in place of Edwin P. Greer. Incumbent's commission expires July 1, 1902.

Joshua Stevens, to be postmaster at Macon, in the county of Noxubee and State of Mississippi, in place of Joshua Stevens. Incumbent's commission expired June 3, 1902.

Lot Livermore, to be postmaster at Pendleton, in the county of Umatilla and State of Oregon, in place of Charles E. Fell. Incumbent's commission expired January 10, 1902.

Edgar J. Graff, to be postmaster at Blairsville, in the county of Indiana and State of Pennsylvania, in place of Edgar J. Graff. Incumbent's commission expires July 7, 1902.

Charles A. Parker, to be postmaster at West Rutland, in the county of Rutland and State of Vermont, in place of Charles A. Parker. Incumbent's commission expires June 28, 1902.

Peter Danielson, to be postmaster at Medford, in the county of Taylor and State of Wisconsin, in place of Frank M. Perkins. Incumbent's commission expired May 10, 1902.

Frank E. Fritcher, to be postmaster at Nashua, in the county of Chickasaw and State of Iowa, in place of Frank E. Fritcher. Incumbent's commission expires July 7, 1902.

Joseph H. Turner, to be postmaster at South Bend, in the county of Pacific and State of Washington, in place of D. Jay Olds. Incumbent's commission expires July 7, 1902.

Alfred A. True, to be postmaster at Highland, in the county of San Bernardino and State of California. Office becomes Presidential July 1, 1902.

Reuel W. Norton, to be postmaster at Kennebunk Port, in the county of York and State of Maine. Office becomes Presidential July 1, 1902.

James M. King, to be postmaster at White Bear Lake, in the county of Ramsey and State of Minnesota. Office becomes Presidential July 1, 1902.

George B. Craft, to be postmaster at Bellefourche, in the county of Butte and State of South Dakota. Office becomes Presidential July 1, 1902.

Jesse W. Lawton, to be postmaster at Arapaho, in the county of Custer and Territory of Oklahoma. Office becomes Presidential July 1, 1902.

Chalmer R. Higdon, to be postmaster at Billings, in the county of Noble and Territory of Oklahoma. Office becomes Presidential July 1, 1902.

James H. Fluhart, to be postmaster at Continental, in the county of Putnam and State of Ohio. Office became Presidential April 1, 1902.

Harry W. Hawkins, to be postmaster at Sycamore, in the county of Wyandot and State of Ohio. Office became Presidential January 1, 1902.

Charles T. La Cost, to be postmaster at Bryan, in the county of Williams and State of Ohio, in place of Charles T. La Cost. Incumbent's commission expired March 22, 1902.

Edmund L. Vale, to be postmaster at Columbus Grove, in the county of Putnam and State of Ohio, in place of Edmund L. Vale. Incumbent's commission expired May 2, 1902.

Charles J. Thompson, to be postmaster at Defiance, in the county of Defiance and State of Ohio, in place of Charles J. Thompson. Incumbent's commission expired May 10, 1902.

John Vogt, to be postmaster at Deshler, in the county of Henry and State of Ohio, in place of John Vogt. Incumbent's commission expired March 16, 1902.

Alonzo L. Jones, to be postmaster at Greenville, in the county of Darke and State of Ohio, in place of Alonzo L. Jones. Incumbent's commission expired May 24, 1902.

Henry S. Enck, to be postmaster at Leipsic, in the county of Putnam and State of Ohio, in place of Henry S. Enck. Incumbent's commission expired May 2, 1902.

James B. Fisher, to be postmaster at Marion, in the county of Marion and State of Ohio, in place of James B. Fisher. Incumbent's commission expired May 24, 1902.

Robert F. Dent, to be postmaster at New Comerstown, in the county of Tuscarawas and State of Ohio, in place of Robert F. Dent. Incumbent's commission expired May 24, 1902.

Robert V. Jones, to be postmaster at Sidney, in the county of Shelby and State of Ohio, in place of Robert V. Jones. Incumbent's commission expired May 24, 1902.

William H. Frater, to be postmaster at Upper Sandusky, in the county of Wyandot and State of Ohio, in place of William H. Frater. Incumbent's commission expired May 10, 1902.

Wilbert C. Davis, to be postmaster at Wapakoneta, in the county of Auglaize and State of Ohio, in place of Wilbert C. Davis. Incumbent's commission expired March 9, 1902.

William W. Scott, to be postmaster at Canal Dover, in the county of Tuscarawas and State of Ohio, in place of William W. Scott. Incumbent's commission expired May 10, 1902.

J. Knox Corbett, to be postmaster at Tucson, in the county of Pima and Territory of Arizona, in place of George W. Cheney. Incumbent's commission expired June 13, 1902.

Mark L. Harper, to be postmaster at Eureka, in the county of Woodford and State of Illinois, in place of Homer E. Darst. Incumbent's commission expired May 24, 1902.

Sylvanus S. Thompson, to be postmaster at Marseilles, in the county of Lasalle and State of Illinois, in place of Sylvanus S. Thompson. Incumbent's commission expires July 1, 1902.

Moses C. McMurry, to be postmaster at Saybrook, in the county of McLain and State of Illinois, in place of Moses C. McMurry. Incumbent's commission expired May 31, 1902.

Leroy H. Camp, to be postmaster at Laporte City, in the county of Black Hawk and State of Iowa, in place of Leroy H. Camp. Incumbent's commission expired June 24, 1902.

John Q. Saint, to be postmaster at Marshalltown, in the county of Marshall and State of Iowa, in place of John Q. Saint. Incumbent's commission expired June 10, 1902.

Gordon R. Badgerow, to be postmaster at Sioux City, in the county of Woodbury and State of Iowa, in place of Edward P. Heizer. Incumbent's commission expired January 10, 1902.

Fred W. Willard, to be postmaster at Leavenworth, in the county of Leavenworth and State of Kansas, in place of Daniel R. Anthony, jr. Incumbent's commission expired June 22, 1902.

Marion A. Humphreys, to be postmaster at Salisbury, in the county of Wicomico and State of Maryland, in place of Elijah S. Adkins. Incumbent's commission expired June 13, 1902.

John A. Thayer, to be postmaster at Attleboro, in the county of Bristol and State of Massachusetts, in place of John A. Thayer. Incumbent's commission expires July 7, 1902.

Byron Truell, to be postmaster at Lawrence, in the county of Essex and State of Massachusetts, in place of Sidney H. Brigham. Incumbent's commission expires July 7, 1902.

Elbridge Nash, to be postmaster at South Weymouth, in the county of Norfolk and State of Massachusetts, in place of Elbridge Nash. Incumbent's commission expired June 2, 1902.

Louis C. Hyde, to be postmaster at Springfield, in the county of Hampden and State of Massachusetts, in place of Louis C. Hyde. Incumbent's commission expired June 22, 1902.

Winthrop A. Hayes, to be postmaster at Rochester, in the county of Oakland and State of Michigan, in place of Winthrop A. Hayes. Incumbent's commission expires July 7, 1902.

T. W. Cole, to be postmaster at Nelson, in the county of Nuckolls and State of Nebraska, in place of Marcellus S. Storer. Incumbent's commission expires July 7, 1902.

William Budge, to be postmaster at Grand Forks, in the county of Grand Forks and State of North Dakota, in place of William Budge. Incumbent's commission expired June 15, 1902.

David Larin, to be postmaster at Mayville, in the county of Traill and State of North Dakota, in place of David Larin. Incumbent's commission expires July 7, 1902.

Edward Hirsch, to be postmaster at Salem, in the county of Marion and State of Oregon, in place of Edward Hirsch. Incumbent's commission expired June 16, 1902.

Wilburn M. McCoy, to be postmaster at Guthrie, in the county of Logan and Territory of Oklahoma, in place of Wilburn M. McCoy. Incumbent's commission expires July 1, 1902.

John L. Clark, to be postmaster at Kenton, in the county of Hardin and State of Ohio, in place of John L. Clark. Incumbent's commission expired June 15, 1902.

William M. Powell, to be postmaster at Hazleton, in the county of Luzerne and State of Pennsylvania, in place of William M. Powell. Incumbent's commission expires July 8, 1902.

Catharine A. Endsley, to be postmaster at Somerset, in the county of Somerset and State of Pennsylvania, in place of Catharine A. Endsley. Incumbent's commission expired April 21, 1902.

Frank S. Myers, to be postmaster at Redfield, in the county of Spink and State of South Dakota, in place of Frank S. Myers. Incumbent's commission expired May 4, 1902.

James H. Neil, jr., to be postmaster at Shelbyville, in the county of Bedford and State of Tennessee, in place of James H. Neil, jr. Incumbent's commission expired May 10, 1902.

Edward H. Blanton, to be postmaster at Paris, in the county of Henry and State of Tennessee, in place of Daniel M. Nobles. Incumbent's commission expires July 7, 1902.

William H. Harvey, to be postmaster at Belton, in the county of Bell and State of Texas, in place of William H. Harvey. Incumbent's commission expired January 10, 1902.

Robert T. Bartley, to be postmaster at Ladonia, in the county of Fannin and State of Texas, in place of Robert T. Bartley. Incumbent's commission expires July 4, 1902.

Carlos C. Bancroft, to be postmaster at Montpelier, in the county of Washington and State of Vermont, in place of Lorenzo W. Shedd. Incumbent's commission expires June 28, 1902.

Franklin B. Blue, to be postmaster at Grafton, in the county of Taylor and State of West Virginia, in place of James W. Holt. Incumbent's commission expired January 19, 1902.

John W. Matlick, to be postmaster at Keyser, in the county of Mineral and State of West Virginia, in place of John W. Matlick. Incumbent's commission expired June 13, 1902.

Henry Dryhurst, to be postmaster at Meriden, in the county of New Haven and State of Connecticut, in place of Henry Dryhurst. Incumbent's commission expires July 6, 1902.

R. M. Hamer, to be postmaster at Emporia, in the county of Lyon and State of Kansas, in place of William F. Ewing. Incumbent's commission expired January 10, 1902.

L. H. Boyd, to be postmaster at Russell, in the county of Russell and State of Kansas, in place of Charles E. Hall. Incumbent's commission expired March 4, 1902.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 28, 1902.

APPOINTMENTS IN THE ARMY.

Capt. Joseph C. Byron, quartermaster, to be captain of infantry, with rank from March 2, 1899.

Capt. Chauncey B. Baker, Infantry Arm (detailed as quartermaster), to be quartermaster with the rank of captain, March 2, 1899.

John P. Kelly, of Florida, contract surgeon, United States Army, to be assistant surgeon, United States Volunteers, with the rank of captain, June 26, 1902.

MARSHALS.

Walter F. Matthews, of Oregon, to be United States marshal for the district of Oregon.

Frank S. Elgin, of Tennessee, to be United States marshal for the western district of Tennessee.

COLLECTORS OF CUSTOMS.

William Mahone, of Virginia, to be collector of customs for the district of Petersburg, in the State of Virginia.

Walter L. Robb, of Oregon, to be collector of customs for the district of Oregon.

Isaac L. Patterson, of Oregon, to be collector of customs for the district of Willamette, in the State of Oregon.

Robert Smalls, of South Carolina, to be collector of customs for the district of Beaufort, in the State of South Carolina.

INDIAN AGENT.

William H. Smead, of Montana, to be agent for the Indians of the Flathead Agency, in Montana.

INDIAN INSPECTOR.

William H. Code, of Mesa, Ariz., to be an Indian inspector (irrigation engineer).

RECEIVERS OF PUBLIC MONEYS.

Frank Bacon, of Nebraska, to be receiver of public moneys at North Platte, Nebr., to take effect August 8, 1902.

Eugene B. Hyde, of Spokane, Wash., to be receiver of public moneys at Spokane, Wash.

REGISTERS OF THE LAND OFFICE.

Henry V. Hinman, of Roslyn, Wash., to be register of the land office at North Yakima, Wash.

George E. French, of Nebraska, to be register of the land office at North Platte, Nebr., to take effect August 8, 1902.

POSTMASTERS.

James E. Karns, to be postmaster at Springdale, in the county of Allegheny and State of Pennsylvania.

A. M. Smith, to be postmaster at Brunswick, in the county of Glynn and State of Georgia.

Allen P. Dickey, to be postmaster at Waynesburg, in the county of Greene and State of Pennsylvania.

Lucian T. Claybaugh, to be postmaster at Donora, in the county of Washington and State of Pennsylvania.

Andrew S. Warner, to be postmaster at Tarentum, in the county of Allegheny and State of Pennsylvania.

George B. Crooker, to be postmaster at Anthony, in the county of Harper and State of Kansas.

Charles M. Junkin, to be postmaster at Fairfield, in the county of Jefferson and State of Iowa.

Bennett M. Grove, to be postmaster at Liberty, in the county of Union and State of Indiana.

Frank J. Davis, to be postmaster at Larned, in the county of Pawnee and State of Kansas.

George W. Watson, to be postmaster at Kinsley, in the county of Edwards and State of Kansas.

James A. Arment, to be postmaster at Dodge City, in the county of Ford and State of Kansas.

Rufus F. Bond, to be postmaster at Sterling, in the county of Rice and State of Kansas.

Benjamin A. Allison, to be postmaster at McPherson, in the county of McPherson and State of Kansas.

Martin L. Grimes, to be postmaster at Lyons, in the county of Rice and State of Kansas.

George H. Pond, to be postmaster at Ann Arbor, in the county of Washtenaw and State of Michigan.

Isaac N. Strawn, to be postmaster at Hopkins, in the county of Nodaway and State of Missouri.

Mark L. Doughty, to be postmaster at Farmington, in the county of St. Francois and State of Missouri.

William E. Osmun, to be postmaster at Montague, in the county of Muskegon and State of Michigan.

Frank B. Lamson, to be postmaster at Buffalo, in the county of Wright and State of Minnesota.

Frederick G. Ellison, to be postmaster at Springfield, in the county of Windsor and State of Vermont.

HOUSE OF REPRESENTATIVES.

SATURDAY, *June 28, 1902.*

The House met at 12 o'clock noon.

Prayer by the Chaplain, Rev. HENRY N. COUDEN, D. D.

The Journal of yesterday's proceedings was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed bills of the following titles, in which the concurrence of the House was requested:

S. 268. An act authorizing the Secretary of the Treasury to fix the salaries of the deputy collectors of customs at the subports of Tacoma and Seattle, in the State of Washington, and repealing all laws inconsistent therewith;

S. 3850. An act in regard to a monumental column to commemorate the battle of Princeton, and appropriating $30,000 therefor;

S. 5732. An act establishing a regular term of United States district court in Lewisburg, W. Va.;

S. 5914. An act establishing a regular term of United States district court in Addison, W. Va.;

S. 5956. An act to provide for the allotment of the lands of the Cherokee Nation, for the disposition of town sites therein, and for other purposes; and

S. 6091. An act extending the time for making final proof in desert-land entries in Yakima County, State of Washington.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 8644. An act granting a pension to John W. Thomas;

H. R. 9501. An act to provide for the sale of the unsold portion of the Umatilla Indian Reservation;

H. R. 10824. An act granting an increase of pension to George E. Bump;

H. R. 11656. An act to incorporate the Society of the Army of Santiago de Cuba; and

H. R. 12026. An act granting an increase of pension to Baley W. Small.

The message also announced that the Senate had passed with amendment bills of the following titles; in which the concurrence of the House was requested:

H. R. 12805. An act requiring the Anacostia and Potomac River Railroad Company to extend its Eleventh street line, and for other purposes;

H. R. 12549. An act granting an increase of pension to Ransom Simmons;

H. R. 12086. An act to extend the time for the construction of the East Washington Heights Traction Railroad Company;

H. R. 11400. An act to amend an act entitled "An act in relation to taxes and tax sales in the District of Columbia," approved February 28, 1898;

H. R. 7013. An act granting an increase of pension to Jason E. Freeman;

H. R. 5809. An act for the further distribution of the reports of the Supreme Court; and

H. R. 619. An act providing for the recognition of the military service of the officers and enlisted men of the First Regiment Ohio Volunteer Light Artillery.

A further message from the Senate had announced that the Senate had passed without amendment bills of the following titles:

H. R. 10775. An act for the relief of Charles E. Sapp;

H. R. 14082. An act to provide for the construction of a bridge by the Duluth, Pierre and Black Hills Railroad Company across the Missouri River at Pierre, S. Dak.;

H. R. 15003. An act to authorize the construction of a bridge by the New York, Chicago and St. Louis Railroad Company and the Chicago and Erie Railroad Company across the Calumet River at or near the city of Hammond, Ind., at a point about 1,200 feet east of the Indiana and Illinois State line and about 100 feet east of the location of the present bridge of the New York, Chicago and St. Louis Railroad Company across said river; also to authorize the construction of a bridge by the Chicago and State Line Railroad Company across said river at the point where said company's railroad crosses said river in Hyde Park Township, Chicago, Ill., being at the location of the present bridge of said company across said river in said township.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 15108) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1903, and for prior years, and for other purposes.

NATIONAL ENCAMPMENT, GRAND ARMY OF THE REPUBLIC.

Mr. BABCOCK. Mr. Speaker, I call up House joint resolution 198, giving authority to the Commissioners of the District of

Columbia to make special regulations for the occasion of the thirty-sixth national encampment of the Grand Army of the Republic, to be held in the District of Columbia in the month of October, 1902, and for other purposes, incident to said encampment, and ask unanimous consent for its present consideration.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent for the present consideration of House joint resolution 198. This resolution was read yesterday, so that if there is no objection the reading of it in full will be waived.

There was no objection.

The resolution is as follows:

Resolved, etc., That the Commissioners of the District of Columbia are hereby authorized and directed to make such special regulations for the occasion of the encampment of the Grand Army of the Republic, which will take place in the District of Columbia during the month of October, 1902, as they shall deem advisable for the preservation of public order and the protection of life and property, to be in force one week prior to said encampment, during said encampment, and one week subsequent thereto. Such special regulations shall be published in one or more of the daily newspapers of the District of Columbia, and no penalty prescribed for the violation of such regulations shall be enforced until five days after such publication; and said Commissioners are authorized and directed to establish a special schedule of fares applicable to public conveyances in said District during the period aforesaid.

Any person violating any of the aforesaid regulations or the aforesaid schedule of fares shall, upon conviction thereof in the police court of the said District, be liable for such offense to a fine not to exceed $100, and in default of payment of such fine to imprisonment in the workhouse (or jail) of said District for not longer than sixty days. This resolution shall take effect immediately upon its approval, and the sum of $11,000, or as much thereof as may be necessary, payable from any money in the Treasury not otherwise appropriated and from the revenues of the District of Columbia, in equal parts, is hereby appropriated to enable the Commissioners of the District of Columbia to carry out the provisions of this section 1 of this joint resolution, $1,000 of which shall be available for the construction, maintenance, and operation of public-comfort stations and information booths, under the direction of said Commissioners.

SEC. 2. That the Commissioners of the District of Columbia are hereby authorized to permit the committee on illumination of the citizens' executive committee for the entertainment of the Thirty-sixth National Encampment of the Grand Army of the Republic to stretch suitable conductors, with sufficient supports wherever necessary, for the purpose of effecting the said illumination within the District of Columbia: *Provided*, That the said conductors shall not be used for the conveying of electrical currents after October 15, 1902, and shall, with their supports, be fully and entirely removed from the streets and avenues of the said city of Washington on or before October 20, 1902: *Provided further*, That the stretching and removing of the said wires shall be under the supervision of the Commissioners of the District of Columbia, who shall see that the provisions of this resolution are enforced, that all needful precautions are taken for the protection of the public, and that the pavement of any street, avenue, or alley disturbed is replaced in as good condition as before entering upon the work herein authorized: *Provided further*, That no expense or damage on account of or due to the stretching, operation, or removing of the said temporary overhead conductors shall be incurred by the United States or the District of Columbia: *Provided further*, That if it shall be necessary to erect wires for illumination purposes over any park or reservation in the District of Columbia that the work of erection and removal of said wires shall be under the supervision of the official in charge of said park or reservation.

SEC. 3. That the Secretary of War and the Secretary of the Navy be, and they are hereby, authorized to loan to Cuno H. Rudolph, chairman of the subcommittee in charge of street decorations, or his successor in said office, for the purpose of decorating the streets of the city of Washington, D. C., on the occasion of the encampment of the Grand Army of the Republic in the month of October, 1902, such of the United States ensigns, flags (except battle flags), signal numbers, etc., belonging to the Government of the United States, as in their judgment may be spared and are not in use by the Government at the time of the encampment. The loan of the said ensigns, flags, signal numbers, etc., to said chairman shall not take place prior to the 29th day of September and shall be returned by him by the 15th day of October, 1902.

SEC. 4. That for the protection and return of said ensigns, flags, signal numbers, etc., the said Cuno H. Rudolph, or his successor in office, shall execute and deliver to the President of the United States, or to such officer as he may designate, a satisfactory bond in the penalty of $50,000, to secure just payment for any loss or damage to said ensigns, flags, and signal numbers not necessarily incident to the use specified.

SEC. 5. That the Secretary of War is hereby authorized to grant permits to the citizens' executive committee for the entertainment of the Grand Army of the Republic for the use of any reservation or other public spaces in the city of Washington on the occasion of the thirty-sixth national encampment in the month of October, 1902, which, in his opinion, will inflict no serious or permanent injuries upon such reservations or public spaces, or statuary therein; and the Commissioners of the District of Columbia may designate for such and other purposes on the occasion aforesaid such streets, avenues, and sidewalks in said city of Washington as they may deem proper and necessary: *Provided, however*, That all stands or platforms that may be erected on the public spaces aforesaid shall be under the supervision of the said citizens' executive committee and in accordance with plans and designs to be approved by the Architect of the Capitol, the commissioner of public buildings and grounds, and the building inspector of the District of Columbia.

SEC. 6. That the Secretary of War is hereby authorized to loan to Dr. D. Percy Hickling, chairman of the medical department of the thirty-sixth national encampment of the Grand Army of the Republic, or his successor in said office, for the purpose of caring for the sick, injured, and infirm on the occasion of the encampment of the Grand Army of the Republic in the month of October, 1902, such hospital tents and camp appliances and other necessaries, hospital furniture, and utensils of all descriptions, ambulances, horses, drivers, stretchers, and Red Cross flags and poles belonging to the Government of the United States as in his judgment may be spared and are not in use by the Government at the time of the encampment: *Provided*, That the said Dr. D. Percy Hickling, or his successor in said office, shall indemnify the War Department for any loss to such hospital tents and appliances as aforesaid not necessarily incident to such use.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. MOON. Mr. Speaker, reserving the right to object, I ask permission to be heard for five minutes.

The SPEAKER. The gentleman from Tennessee, reserving the right to object, asks permission to be heard for five minutes. Is there objection?

There was no objection.

Mr. MOON. Mr. Speaker, on the 14th of March last, the Committee on Territories reported to this House a bill to create the Territory of Jefferson and establish a temporary government therefor, and for other purposes. It was a unanimous report of the Committee on Territories. The conditions in the Territory demand immediate action. By authority of that committee I was directed to obtain a hearing on this bill in this House. The bill went to the Union Calendar, as a matter of course, under the rules. It became necessary, therefore, that the Speaker be approached on the question. During all of that time the Speaker has insisted that probably some time would be given a little later for the consideration of this bill.

It was not deemed advisable to press this question upon him while more important legislation was pending; but after every bill upon the Calendar had been disposed of, of greater importance than this one, which involves the rights of 400,000 people in the Territory—where there is enthroned neither law nor order, where there are no schools for the children, no asylums for the insane, no local courts for the protection of citizenship, no organized government—the Committee on Territories thought that this bill ought to be heard. Yet the Committee on Rules and the Speaker have refused to fix a day, either at this session or at the next session, for the consideration of this bill; and he has really refused to hear a motion in this House to have a day fixed. The question arises, then, Why is it that the Speaker of this House and the Committee on Rules are unwilling to give a hearing to 400,000 American citizens deprived of law and order within the very heart of this Republic?

Mr. RICHARDSON of Tennessee. Mr. Speaker, if my colleague will allow me, without divulging any secrets of that committee I can assure him that two members of it have not refused.

Mr. MOON. The minority members, I presume.

Mr. RICHARDSON of Tennessee. Here is one of them.

Mr. MOON. The only reason assigned by the Speaker to the chairman of this committee and others for refusing to hear this bill is, as I understand it, that the Speaker had protests from the Territory against its consideration. I submit that the Speaker of this House ought not to listen to the protests of a few of the people of the Territory in view of the facts now upon record here and the unanimous report of this committee. In the speech of the gentleman from Indiana, in an appendix thereto, appears the indorsement of every paper in the Territory in favor of this bill. I have in my possession the records of the town meetings of nearly all the towns of the Territory asking for it.

The Republican and Democratic clubs have asked for it. I feel justified in saying upon this floor that 90 per cent of the people of that Territory favor this bill. If that were not true, is not this committee entitled to some respect at the hands of the Speaker in considering this question? Will the Speaker assume to say that he should suppress a hearing upon this question against the unanimous report of this committee, in view of the facts in this record? I submit that it is not just to the committee, not just to the people of the Territory. It is not just to this House for the Speaker to exercise arbitrarily the power that is thus placed in his hands to suppress legislation which affects the rights, the liberty, and property of 400,000 American citizens. Then I feel that I am justified, sir, representing that committee or representing myself alone as a member upon this floor, having no personal interest in this, to object in this House to unanimous consent for the consideration of any measure of less importance until a hearing is had or time is fixed for a hearing on a matter of this character.

I have not undertaken to press this matter before the House while other matters of greater importance were pending; but now as it stands it is the most important bill upon this Calendar. Under the rules it can not be taken up except by the consent of the Speaker. In view of the fact that there is no opposition in the Territory except from the Federal officeholders, who would reap more profit under the present conditions than under changed ones, and in view of the fact that there is no other opposition, as I said, than this——

The SPEAKER. The time of the gentleman has expired.

Mr. MOON. May I ask for just a moment more?

The SPEAKER. The question is on consideration of the resolution just reported.

Mr. MOON. I will ask the House for one moment more, to state——

The SPEAKER. The time of the gentleman has expired.

Mr. RICHARDSON of Alabama. I ask that the gentleman have one minute more.

Mr. RICHARDSON of Tennessee. Mr. Speaker, unanimous consent is asked that the gentleman have a minute more.

The SPEAKER. The gentleman asks unanimous consent that his colleague be allowed one minute more. Is there objection?

There was no objection.

Mr. MOON. The additional objection, then, comes from the railroads, who pay no taxes under present conditions and would have to pay taxes under the bill, and the Federal officeholders. I would not assume to say that the Speaker was influenced by anything but improper motives; but these facts are now before the House——

Mr. GROSVENOR. I call the gentleman to order. I presume he wants to correct his language. I am sure he did not intend to use the language he did use.

Mr. MOON. What is the language the gentleman refers to?

Mr. GROSVENOR. You said you would not assume that the Speaker was actuated by anything but improper motives.

Mr. MOON. But proper motives, I meant to say.

Mr. GROSVENOR. That is what I supposed.

Mr. MOON. Mr. Speaker, as I said, I ought to object to the consideration of any other measures under these circumstances; but it is at the close of the session, when many gentlemen on both sides have important measures, and I feel that perhaps it would be an injustice to them, in view of the legislation they desire, to press this question of objection now. But I desire to give notice to this House that at the meeting of the next session no legislation shall be enacted by unanimous consent until a hearing is had upon this measure.

The SPEAKER. Is there further objection?

There was no objection.

The amendments were agreed to.

The resolution as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. BABCOCK, a motion to reconsider the last vote was laid on the the table.

CONSIDERATION OF CONFERENCE REPORTS.

Mr. CANNON. Mr. Speaker, before we proceed with the special order, I desire to make a statement, by way of a notice. Immediately on the conclusion of this case the House will be asked to consider the conference report on the District of Columbia appropriation bill.

Mr. FOSS. I desire to give a similar notice. Following that, I will ask the House to consider the conference report on the naval appropriation bill.

CONTESTED-ELECTION CASE—HORTON AGAINST BUTLER, TWELFTH DISTRICT OF MISSOURI.

And then, under the special order, the House resumed consideration of the contested-election case of William M. Horton *v.* James J. Butler, from the Twelfth Congressional district of the State of Missouri.

The SPEAKER. The gentleman from Missouri [Mr. BARTHOLDT] is recognized to conclude the remarks which he began yesterday.

Mr. BARTHOLDT. Slightly changing the language of the minority report, this, Mr. Speaker, is the time "to discuss and consider what rights" the Republican party "has left in St. Louis, if any." Yes; and not only the Republican party, but the people, the taxpayers, and our decent citizens generally. Our fight is their fight. Our defeat is their defeat, and our success will be the triumph of the people's rights over a political oligarchy the like of which can not be duplicated anywhere on American soil.

There was a time when the people of the great metropolis of the Mississippi Valley enjoyed the blessings of home rule the same as the people of other large cities do. But that was long ago; it was in the days of Republican supremacy. One by one these privileges of self-government were taken from us by the dominant party until to-day we are stripped of the last vestige of them. The rights of a tax-paying municipal sovereignty are now exercised by so-called State boards appointed by the governor and responsible to no one but the governor.

Our elections have become a farce because the official head of the Democratic party, who is incidentally governor of the State, controls them by the wink of an eye. The police department, too, is a State machine, and the only privilege the taxpayers enjoy in connection with it is to foot the bills, which the municipal assembly dare not even scrutinize. It may seem incredible, but it is a fact that the police board drafts its own appropriation bill and the municipal assembly is, by State law, compelled to swallow it horse, foot, and dragoon. If the city legislators undertook to change it by crossing a "t" or dotting an "i," they would at once become liable to fine and imprisonment.

It is a necessary part of the scheme to bind and gag St. Louis. The local legislative bodies might be Republican, you see, and it was essential to make the police entirely independent of them. Every member of the force must be a Democrat, and to-day the police department of St. Louis, as a Democratic machine, puts Tammany Hall far into the shade. The taxpayers are left entirely out of the account except when called upon to pay.

And yet my colleagues from Missouri on the other side talk about the consent of the governed in the distant Philippines. Ever since they made up their minds to run away from the responsibilities of a war which they helped to bring about they insist that the black men and the brown men in those distant islands should not be governed by us except with their consent. But at home, in Missouri, they look upon the system of governing white men without their consent as a wise and just Democratic prerogative! In the Philippines they want equal justice for all; in Missouri they put 140,000 people in one Congressional district and 300,000 in the other. Hypocrisy, thy name is Missouri Bourbonism! [Applause.]

They charge us with traducing the State, Mr. Speaker, when we call attention to these partisan infamies. I indignantly repel the insinuation. I yield to no one in devoted love for my adopted State—grand old Missouri. In my eyes her flowers are more fragrant, her apples sweeter, her hillsides and valleys more beautiful, than those of any other State or country. She is richer in natural resources than most States of the Union; her scenery is more varied, her soil is more productive, and her products excel all others. Even the sun kisses her with more affectionate fervor, because in her beats the heart of the continent. Fortunately, Mr. Speaker, these things can not be changed by law. If they could, the Democratic legislature long ago would have proceeded to paint the landscapes gray and the dewdrops black. They would have muddied her springs and turned her milk sour. [Laughter.] As it is, their blighting influence stops short of nature's glorious gifts and extends only to things political.

Traducing the State! Great Scott! Who is injuring the fair name of a city, the scoundrel who breaks the law or the judge who sends him to prison? Who does you more harm, the man who assaults you or the doctor who applies the remedy? No, gentlemen; you can not break the force of our charges by shielding behind the sovereign State of Missouri. You know full well that our only purpose is to benefit her, to raise her to the level of adjoining Republican States, and to make her people contented and happy by substituting a government by the people for a government by the lobby. We want to make Missouri's political institutions correspond with those of the Union, and the enlightened Commonwealths of the West and North, and add to the grandeur of her nature the handiwork of just and liberal laws, and the blessings of an honest and progressive State administration. We want to lift from the shoulders of the legislature the incubus of the lobby, and wipe from the statute books those iniquitous laws which are injuring our reputation abroad and our liberties as American citizens at home, and which are responsible for this contest and this discussion.

And we are coming, Father Abraham, 400,000 strong! The hour of redemption has struck. There are now only four States in the Union which cast more Republican votes than Missouri. A hundred varieties of fraud and crime, with their Nesbits, pretorian guards, crooks, Indians, and repeaters, may temporarily impede and stop our onward march, but the destiny will be fulfilled, "Ceterum censeo, Carthaginem esse delendam." The citadel will fall, the nightmare of Nesbitism will vanish, and soon the sun's beneficent rays will gild the letters of new enactments restoring to the people and to both parties equal rights and privileges. [Applause.]

There is, in my judgment, no more important question before the American people to-day than these Democratic attempts to tamper with the franchise. It is not a local, but a national question, and Missouri is not the only State where laws were made to wrongfully correct and overthrow the will of the people. Ever since the conquering ideas of Republicanism triumphantly crossed Mason and Dixon's line and penetrated to the very heart of the Southern Democracy, that party has been at work in States controlled by it, propping its waning power by statutes restricting the franchise or preventing an honest expression of the popular will.

Yet elections are the foundation of the nation's political life. To corruptly interfere with them is necessarily destructive of popular institutions. Let us meet the danger like men, and with a firm determination to vindicate Abraham Lincoln's golden words "that government of the people, by the people, and for the people shall not perish from the earth."

I thank the House for their attention. [Loud applause on the Republican side.]

Mr. TAYLER of Ohio. Mr. Speaker, I hope gentlemen on the other side will consume their remaining time before I conclude my argument.

Mr. BOWIE. I yield twelve minutes to the gentleman from Missouri [Mr. BENTON].

Mr. BENTON. Mr. Speaker, the gentleman from Iowa [Mr. SMITH] sought to make the impression in opening this debate that

the late standard-bearer of the national Democracy winked at, if he did not encourage, fraud in elections. In the interest of common fairness I am glad the gentleman did not press the suggestion. William J. Bryan was twice our chosen leader, and, whether fairly or unfairly, honestly or dishonestly, was defeated, but never lost his dignity nor his integrity. For twelve years he stood in the open, battling with marvelous ability for the settlement of great public questions on the high plane of right. He has been exposed to the pitiless storm of political abuse, and has come through it all without the smell of fire on his garments. He is loved by party adherents and respected by opponents. He is first in the hearts of more people than any living American. In a word, he is a stainless, Christian gentleman.

The gentleman from Ohio [Mr. GROSVENOR] wanted to know if Missouri Republicans did not poll 48 per cent of the vote in 1900 and if a Democratic legislature did not apportion the State so as to give them only one Congressman. No and yes. The Republicans polled 46 per cent of the vote, Democrats 52 per cent, and other parties 2 per cent. We followed the pace set by Republican legislatures of Ohio, Illinois, Pennsylvania, and all Republican States, and made Democratic districts where we could. The gentleman can not make a show of virtue there. In Republican States Democratic counties and wards are grouped so as to make immense majorities and give you more Congressmen.

But let me tell these gentlemen who feign indignation a little story of redistricting. Under the law, in St. Louis the apportionment of the city into senatorial and representative districts is placed in charge of the circuit judges. The Pecksniffian plea for political fairness of my colleague [Mr. BARTHOLDT] is here fully exposed. These honorable Republican circuit judges treated us to a sample of Republican fairness. The Republican plurality in St. Louis in 1900 was 666 in a total vote of 124,554; yet these immaculate (?) Republican judges gave the Democrats one senator of six and three representatives of sixteen.

I append the tables:

Senatorial districts.

TWENTY-NINTH DISTRICT.

Ward and precinct.	Democratic.	Republican.
Ward 9	1,380	2,475
Ward 10	1,987	3,057
Ward 11	1,925	2,482
Ward 12, precincts 10, 11, 13	511	752
Ward 24, precincts 4 to 13, inclusive	1,599	1,984
Total	7,402	10,750

THIRTIETH DISTRICT.

Ward 6, precincts 1, 2, 4, 5, 6, 7, 9, 10, 11, 13	1,781	1,543
Ward 7	1,890	2,351
Ward 8	1,689	2,242
Ward 12, precincts 1 to 9, inclusive	1,303	2,074
Ward 13	1,933	2,521
Total	8,596	10,731

THIRTY-FIRST DISTRICT.

Ward 3	2,359	1,385
Ward 4	1,646	1,383
Ward 5	2,389	1,469
Ward 6, precincts 3, 8, 12	845	326
Ward 14, precincts 1 to 8, inclusive	2,220	800
Ward 15	1,599	1,862
Ward 16, precincts 3 to 13, inclusive	2,686	885
Total	13,744	8,110

THIRTY-SECOND DISTRICT.

Ward 12, precinct 12	114	318
Ward 14, precincts 9, 10, 11	537	393
Ward 22	1,989	2,204
Ward 23	2,551	1,613
Ward 24, precincts 1, 2, 3	718	845
Ward 25	2,093	2,502
Ward 28, precincts 1 to 11, inclusive	2,343	3,293
Total	10,345	11,168

THIRTY-THIRD DISTRICT.

Ward 2, precincts 1 to 11, inclusive	1,602	2,154
Ward 16, precincts 1, 2	281	504
Ward 17	1,644	2,373
Ward 18	1,289	2,713
Ward 20	2,224	1,941
Ward 21	2,313	1,755
Total	9,353	11,440

Senatorial districts—Continued.

THIRTY-FOURTH DISTRICT.

Ward and precinct.	Democratic.	Republican.
Ward 1	2,129	2,940
Ward 2, precincts 12, 13	259	482
Ward 19	1,458	2,579
Ward 26	2,590	2,489
Ward 27	2,203	2,092
Ward 28, precinct 12	333	156
Total	8,972	10,738

Representative districts.

FIRST DISTRICT—3 MEMBERS.

Ward and precinct.	Democratic.	Republican.
Ward 9	1,380	2,475
Ward 10	1,987	3,057
Ward 11	1,925	2,482
Ward 12, precincts 10 and 13	392	575
Ward 23, precinct 12	186	129
Ward 24	2,317	2,829
Ward 25, precincts 1 and 2	386	395
Ward 28, precinct 1	212	224
Total	8,785	12,166

SECOND DISTRICT—3 MEMBERS.

Ward 6, precincts 1, 4, 5, 6, 7, 9, 10, 11	1,411	1,267
Ward 7	1,890	2,351
Ward 8	1,689	2,242
Ward 12, precincts 1, 2, 3, 4, 5, 6, 7, 8, 9, 11, 12	1,536	2,569
Ward 13	1,933	2,521
Ward 23, precincts 1 to 11, inclusive	2,129	1,356
Total	10,588	12,306

THIRD DISTRICT—3 MEMBERS.

Ward 3	2,359	1,385
Ward 4	1,646	1,383
Ward 5	2,389	1,469
Ward 6, precincts 2, 3, 8, 12, 13	1,215	602
Ward 14	2,757	1,193
Ward 15	1,599	1,862
Ward 16	2,967	1,389
Ward 22, precincts 1, 2, 3	347	463
Total	15,279	9,746

FOURTH DISTRICT—3 MEMBERS.

Ward 2	1,861	2,636
Ward 17	1,644	2,373
Ward 18	1,289	2,713
Ward 19, precincts 1, 2, 3, 5, 7, 8, 9, 10	856	1,624
Ward 20	2,224	1,941
Ward 21, precincts 7, 8, 9, 10, 11	1,229	654
Ward 26, precincts 1, 2, 3, 4, 5, 6	1,364	1,041
Total	10,467	12,982

FIFTH DISTRICT—2 MEMBERS.

Ward 1	2,129	2,940
Ward 19, precincts 4, 6, 11, 12	602	955
Ward 26, precincts 7, 8, 9, 10, 11, 12, 13	1,226	1,448
Ward 27	2,203	2,092
Total	6,160	7,435

SIXTH DISTRICT—2 MEMBERS.

Ward 21, precincts 1 to 6, inclusive	1,084	1,101
Ward 22, precincts 4 to 13, inclusive	1,642	1,741
Ward 23, precincts 13	236	128
Ward 25, precincts 3 to 13, inclusive	1,707	2,107
Ward 28, precincts 2 to 12, inclusive	2,464	3,225
Total	7,133	8,302

The gentleman from Iowa [Mr. SMITH] states that "St. Louis is usually Republican," and the gentleman from Missouri [Mr. BARTHOLDT] states that "St. Louis is a Republican city by a large majority," and that it has been made Democratic by wholesale fraud of the voters by Democratic officials. I deny the statements. Let us go back twenty years and note the vote of St. Louis as between the leading parties:

In 1882 the Democratic vote was 16,900; Republican vote, 11,300. In 1884 the Democratic vote was 22,000; Republican vote, 21,000. And that year the Republican and Greenback parties made a joint electoral ticket in the State.

In 1886, when Republicans and Greenbackers had separated,

the vote was: Democratic, 19,000; Republican, 15,000; Greenback, 3,000. In 1888: Democratic, 27,000; Republican, 32,000; Populist, 3,500. This was brought about by the unpopularity of the Democratic Presidential candidate, caused largely by vetoes of pension bills.

In 1890 the Democratic vote was 25,000; Republican vote, 21,000.

In 1892 the Democratic vote was 34,700; Republican vote, 35,500; Populist vote, 940.

In 1896 the Democratic vote was 50,000; Republican vote, 66,000.

In 1900 the Democratic vote was 59,931; Republican vote, 60,597; vote of other parties, 4,046.

For more than twenty years since 1870 St. Louis has been controlled by Democratic administrations. The Democrats elected Britton, Brown, Overstolz, Francis, Noonan, and Wells as mayors. The Republicans had Ewing, Walbridge, and Zeigenhein. St. Louis has never been a Republican city. Let us go back to the vote of 1896. The Democratic vote increased nearly one-third in four years, while the Republican vote increased almost 100 per cent. Republicans claim that this large increase came from Gold Democrats voting their ticket. It is true that a large number of Gold Democrats voted the Republican ticket. It is also true that a very considerable number of votes was cast for the Democratic ticket by Silver Republicans. The Democratic vote of the city was fully as large as we expected, but the Republican vote was 12,000 to 15,000 larger than we believed it should be for the population.

Indeed, with all the wonderful growth in population in St. Louis during the four years next after the election of 1896, the increase of the total vote of the city was but a fraction over 6,000. The city was in control of Republicans in 1896. Democrats, Silver Republicans, Populists, and Prohibitionists complained that the election was unfair and dishonest. The combined anti-Republican vote of the State of Missouri in 1892 was 311,000. The Republican vote in 1892 was 227,000. In 1896 the anti-Republican vote of the State was combined and was increased by 52,000, while the Republican vote during the same period was increased 77,000, of which increase 31,000 came from the city of St Louis. Mark you, the combined vote of St. Louis in 1892 was an anti-Republican majority; yet in 1896, in the face of the fact that our vote had increased nearly 15,000 in St. Louis, the Republicans counted a majority of 16,000 in the city. The conviction in the minds of the people of the State that this increase in the Republican vote was fraudulent determined the legislature to enact a law to protect the suffrage in St. Louis. Hence the Nesbit law.

What are the provisions of this law? Three election commissioners, two Democrats and one Republican, are named by the governor. The late Republican commissioner was W. A. Hobbs. Does my colleague [Mr. BARTHOLDT] dare attack his record? He was a staunch Republican, but a gentleman withal. (During the six years in which you controlled the State, Democrats were allowed no members on any election or registering boards.) The commissioners are compelled to name two judges and one clerk from each of the great parties in each precinct.

The Republican commissioner is permitted to name the Republican judges and clerks. The judges and clerks are appointed sixty days before the general election. The judges and clerks are the board of registry. After registration the two clerks—Democrat and Republican—go together over the precinct to canvass and verify the list of registered voters. They ascertain if the voter really lives where he is registered as living. They report to the judges and they in turn to the commissioners, who sit as a board of review. Each party may challenge he who offers to register. Men whose registration is questioned are notified and permitted to prove their right to vote, and if finally stricken off have their extraordinary remedy by appealing to the courts. At elections no bulldozers are allowed at the polls to overawe voters.

Each party is allowed a challenger at the polls and a watcher of the count. The poll books and ballots are returned after election to the commissioners. The voter is permitted to go into a booth and make his ticket unmolested. If for any reason he can not prepare his ballot, he is permitted to choose a judge of election to assist him in preparing his ballot, and the judges are required to keep secret his ballot. Each ballot must have the name or initial of the distributing judges on it and each ballot must be numbered to correspond with the name and number of the poll books. (Oh, you want again the old régime under which you disfranchised Democrats and robbed the people by means of spurious bond issues and frightful taxation.) The Republican election commissioner of St. Louis under the law is permitted to name Republican judges and clerks of election; presumably he does this after consultation with his party committee.

The law is not at fault if these Republican judges and clerks are dishonest. Fraud has been charged after every city election in St. Louis for years by both parties. The Democratic legislature has put every safeguard possible around the ballot box. Our majority in Missouri has never depended in any sense on the vote of St. Louis. The largest State majority we ever had was in the face of an adverse majority of 16,000 votes in St. Louis. The Democracy of Missouri is for honest government. It will not be intimidated by threats, misled by glaring falsehoods, nor cajoled by the whining cry of the minority, who seek power that they may loot the State, as they once did, and as they have recently done in the city of St. Louis. Our law lets you name your judges and clerks, but if they are venal and sell themselves the law can not help it.

The gentleman from Iowa [Mr. SMITH] is misinformed. If he had been as anxious to learn the truth of history as he was to find a reason for turning out of this House a Democratic Representative, he would have learned that his statement that "the mayor of St. Louis is usually Republican" was not true. He would have learned that his statement that "the law does not give to the Republicans the choice of their representation on the election boards" was also untrue. If he had been desirous of making a plain, unvarnished statement of facts, he would not have said there was "a change of 6,000 votes in favor of Democracy (referring to the Twelfth district) when all over that Western country they were losing as compared with the vote of 1898 in Congressional matters."

Every single Congressional district in Missouri gained largely in its vote from 1898 to 1900. There is no excuse for the misstatement of the facts by my colleague [Mr. BARTHOLDT]. He states that there was in the Twelfth district an "increase of 12,346 in two years, while in the adjoining district (his) the increase was but 9,000." The election record of Missouri is open. If he had only read, he would have found that the increase of the vote in the Tenth district from 1898 to 1900 was 10,432, but little behind the increase in the vote of the Twelfth district.

The Representative from the Tenth district comes into this forum and pleads for a fair ballot and clean government. This he does while we are not two years away from the slough of crime indulged in by the Zeigenhein Republican city administration. Ballot stuffing, bribery by and of city officials, franchises bought and sold on the official market, with some of your late officials convicted, others fugitives from justice, and many under indictment. Thanks to the law as administered by a Democratic judge, the courage and ability of a Democratic prosecutor, and the honor and integrity of the citizens of St. Louis, these rascals are being called to account, and we have high hopes that the start that has been given to honest government by the present administration of St. Louis will bear the fruit so much desired by honest men of all parties.

The gentleman [Mr. BARTHOLDT] says the spring election of 1901 was a duplicate of the election in the fall of 1900. If that is true, he can not complain. The man elected mayor is credited with voting your ticket and contributing money to the Republican campaign fund in 1896. The men who controlled the Democratic convention and named the city ticket were not the men who stood for Democratic men and measures in the two previous elections. They were confederated with you. Many thousands of Democrats refused to support that ticket, yet there were enough Republicans who did to give it 8,000 majority. The Democratic battle cry of that campaign in St. Louis was clean, honest city government. That fight was to clean out and drive from office the worst gang of pilferers that ever infested that city. The false and fraudulent demand for a change to Republican methods will not be heeded by the people of Missouri, whether it is fulminated by a venomous press or dignified by being pressed in this forum.

I have given you the general provisions of the so-called Nesbit law. My colleague [Mr. BARTHOLDT] rails at the Nesbit law. That law was sustained by the highest court in Missouri. Oh, but you say that is a partisan court. Yet, on appeal to the Supreme Court of the United States, that last tribunal in our Government sustained the law. The law is just and fair. Now comes the gentleman, backed up with the resolutions adopted by the late Republican State convention, to demand that the good people of Missouri shall turn over the State government to the same old band of freebooters who for six years after the "war between the States" plundered the citizens of that great Commonwealth. You sold our securities for a song and left us burdened with debt. You saddled nearly $40,000,000 of county, township, and city debts on the people, which were nearly all fraudulent.

But, Mr. Speaker, Missouri long ago shook off the awful incubus of Republican State government. She did not lay down in the ashes and mourn away her life, but vigorously met the grave responsibilities confronting her. Under Democratic government Missouri has unburdened herself of more than $20,000,000 of State debt, besides interest. She has paid more than $25,000,000 of county, township, and city debts. She has given to the support of her great State University more than $3,000,000. She has built up great normal schools and splendid asylums and

maintained them at a cost of $4,500,000. She has built 8,500 schoolhouses and augmented the State and county school funds tenfold. She has doubled her population, quadrupled her wealth, and cut down her people's taxes by half. This wonderful progress has been made despite the fact that a mendacious press has abused and vilified her people and officials for thirty years. For feats of mendacity the Missouri Republican press and Republican orators are easily entitled to the blue ribbon. Our Missouri doors are open to good men from everywhere. We welcome the home builder, the wealth producer, but we will not intrust our government to the Missouri Republicans. Democratic Missouri greets the country.

Mr. BOWIE. Mr. Speaker, I yield the balance of the time on this side to the gentleman from Missouri [Mr. BUTLER], the contestee in the case.

The SPEAKER. The gentleman is recognized for fifty-six minutes.

Mr. BUTLER of Missouri. Mr. Speaker, up to this moment I have refrained from voicing my opinions or sentiments upon any measure which has been before this House, believing, as I do, that sentiment has restricted boundaries, and that opinions, especially of a new and verdant member, are very often more forceful unexpressed.

I take the floor to-day, however, in defense of my title to a seat in this House; in defense of the voiced opinions of 22,000 freemen, whites and blacks, Democrats and Republicans, who cast their votes for me and sent me here as their Representative upon the floor of this House.

I trust, therefore, gentlemen, you will accord to me the attention to which I feel I am entitled.

It is not my purpose in these remarks to mince words. It is not my intention to clothe with language of conciliation the actions of some of the parties to this foul and sinful conspiracy to rob me of my personal rights and to deprive 200,000 of our people of their rightful title to a voice in the government of this the only true government of the people. [Applause.]

It is not my desire or intention to accuse or blame the majority of your committee for their report in this case, feeling as I do that partisan spirit and party fealty sometimes sway the judgment of the strongest men, which your committee has been manly enough to honestly admit; but I feel that the mass of testimony, of false charges, of skillfully woven fabrications, and hypothetical conclusions, all drawn from an absolutely illegal, unreliable, and unsubstantiated census in this case bewildered even your committee, and drew from them a report which, from party standpoint, at least, they permitted themselves to believe was warranted.

I am fain to believe, however, that from the standpoint of men learned in the law, as they are, applying the well-known principles of law to the case, that they in their hearts and consciences fully realize and believe that they have erred.

On the very first page of your committee's report appears a tabulated statement of the vote of the Twelfth Congressional district for the years 1898 and 1900, which, while I believe not intended for the purpose, is nevertheless calculated to deceive and mislead. The same argument has been used upon this floor by one of my colleagues from St. Louis, but with a full knowledge, I am sure, of its absolute dishonesty and deception.

The statement, in brief, I quote as follows:

The official returns gave the contestee a plurality of 3,553, as shown by the following vote, parallel with which, for the purpose of comparison, is placed the vote of the Congressional election of 1898.

Then follow the parallel columns of figures, giving the total vote of 1900 as 40,655, and that of 1898 as 28,299. As the theory of the contestant and the majority of your committee in this case is that I was elected through an enormous false registration, this ittle statement of the returns of two elections is given you upon the very first folio of this report, by way of comparison, it is said, to fix your minds in the very beginning on the enormous discrepancy between the vote of the two years.

They do not tell you that the year 1898 was an "off year," as it is called in political parlance; a year, in other words, when a President is not voted for. They do not tell you that in such years the vote of almost every district in the land is reduced, and in many cases by almost one-half.

The committee has not told you, and neither has my colleague, Dr. BARTHOLDT, who has tried to impress so forcibly upon your minds the figures of 1898 as compared with 1900, that in 1894 the total vote for all candidates for Congress in the Twelfth district, Democrat, Republican, Prohibition, Socialist, and Independent, was only 18,912, while in 1896 the Republican candidate alone received 21,483 votes, or 2,571 votes more than all candidates in 1894 and 14,014 more votes than the Republican candidate of 1898, and still there was but two years intervening.

The wise Doctor has not informed you that in 1898 the total vote cast in this district was 10,000 less than in 1896, two years earlier, and that the Republican candidate alone received 6,183 votes less. Why has not the wise Doctor made comparisons of the total vote of all the St. Louis districts as between 1898 and 1900? If he had it would show that the Twelfth district had increased in vote 12,400; the Eleventh district, Mr. JOY'S district, 14,134, and the Tenth district, which is the Doctor's district, 10,432. Why have you withheld all the facts, my dear colleague?

Why has not your committee published the vote of 1896, a Presidential year, and four years earlier than the last election, by way of comparison, as they say? Why is it that in no part of their report have they published the returns of the year 1896? The returns of 1896, as compared with those of 1900, show the absolute inconsistency of the contestant's contentions. They show that in 1896 there were cast at the Congressional election, in November, 39,124 votes, while in 1900, which was four years later, there were cast 41,528 votes, showing an increase in four years of only 2,404 votes in a district carved from the very center of the city of St. Louis.

The increase in the Tenth Congressional district of St. Louis, which is Mr. BARTHOLDT'S district, for the same four years was 3,029; and in the Eleventh Congressional district, which is Mr. JOY'S district, it was 1,757.

I am sure, gentlemen, you will all agree that the increase was not abnormal, and as the Twelfth Congressional district was represented in 1896 by a good, stanch, and honest Republican, I am satisfied that you will not put a stigma upon his memory by branding his reported vote as fraudulent, and his election as a steal. [Applause on the Democratic side.]

But, my friends, there was no fraud at that election, and none was hinted at; there was no fraud at the elections in either the Tenth or the Eleventh districts of Missouri in either 1896 or 1900, and none was hinted at; and neither was there fraud at the election in the Twelfth Congressional district [applause], as an honest comparison of the returns will show to the mind of any unprejudiced man who will lay aside, for the time at least, his party fealty and judge with justice between man and man.

The principal ground of contest in this case, in fact the only ground of contest, is that there was an enormous false registration in my interest. The fallacy of that contention has been shown most clearly, I think, by the report of the minority members of your committee, which is before you, and by their able arguments upon the floor in this case.

Let me show you, further, the sophistry of this contention by the registration figures of the district.

You are well aware that no charge of fraud has been made here against either of my Republican colleagues from St. Louis upon this floor; yet I will assure you that if any fraud at all existed in the late Congressional elections at St. Louis, that that fraud was as great or greater in the districts represented by my Republican colleagues.

I wish to read to you here section 7227 of the Missouri election law, under which the last election for Congress was held:

SEC. 7227. *City to be divided into election districts.*—It is hereby made the duty of such board of election commissioners for such cities, within six months after taking effect of this article, to divide such cities into election precincts regarding ward lines, and composed of compact and contiguous territory, which shall contain, as nearly as practicable, 400 actual voters; and in making such division and establishing such precincts such commissioners shall take as a basis the poll books of the number of votes cast at the last preceding Presidential election. At least six months before each subsequent Presidential election the election commissioners may revise and rearrange the precincts and increase or decrease their number on the basis of the votes cast at the previous Presidential election for President, making such precincts to contain, as near as practicable, 400 voters, measured by the vote of such election. The precincts in each ward shall be numbered consecutively. (New section.)

You will see from this section that the board of election commissioners were instructed to divide the city as nearly as possible into election precincts having 400 voters, without, however, altering the ward lines. The basis of vote upon which the division was made was the Presidential vote of 1896, as required by this section of the statute. You will not claim, I am sure, that the registration of 1896 was stuffed or fraudulent, for the Republican clear majority in the Twelfth Congressional district at that time was 3,842. In the Eleventh Congressional district the Republican majority was 3,552, while in that portion of the Tenth Congressional district lying within the city of St. Louis the clear Republican majority was 6,870. These are the actual figures, my friends, and it was upon the basis of the vote at that election that the new precincts of the city of St. Louis were made up to average as near as possible 400 votes to a precinct.

Now, let us see what the actual registration after the formation of the precincts shows. I have here the complete vote of all the wards of the three Congressional districts within the city of St. Louis, together with the highest precinct registration, the lowest precinct registration, and the average precinct registration in each ward of such districts, all of which have been taken from certified figures from the election commissioners' office of the city of St. Louis. I will not take up the time of the House by reading the data to which I have just referred, but I will read to you the district showing as deduced from those figures in each of the three districts of our city.

In the Tenth Congressional district, which is the district represented by my Republican colleague, Dr. BARTHOLDT, the total vote of that part of the district lying within the city of St. Louis was 27,052. The total registration for the same district was 28,904, showing those not voting to number only 1,853. The highest registration of any precinct in the district was 588, and the lowest registration was 202, while the average registration for the 68 precincts within the district was 425.

In the Eleventh Congressional district, which lies wholly within the city of St. Louis, and which is represented on this floor by my esteemed friend and colleague, Mr. JOY, the figures show the total vote of the district to be 54,919, the total registration 58,517, and the number of those not voting 3,598; the highest precinct registration in the district 961 and the lowest 189; the average registration for the 149 precincts of the district was 418.

In the Twelfth Congressional district, which also lies wholly within the city of St. Louis, and which up to the present moment at least I have the honor of representing, the total vote was 41,532; the total registration was 47,752, while those not voting amounted to 6,220. The highest precinct registration of the district was 754, the lowest was 169, and the average precinct registration was 408, a much smaller average than either of the other two districts.

Now, Mr. Speaker and gentlemen of this House, I want it distinctly understood that I have not cited these figures to cast any cloud upon the title of my Republican colleagues to their seats in this House, for I believe and know they were fairly and honestly elected, as I feel and know that I was. [Loud applause on the Democratic side.] I have cited them, however, to show the ridiculous nature of the contentions in this case.

There is no contest in the Eleventh district; there is no charge of fraud; there is no charge of padded registration, yet the average registration in each precinct is 418, or 18 greater than is called for by the provisions of the statute.

There is no contest in the Tenth district, there is no charge of fraud or padded registration, yet the average precinct registration is 425, or 25 greater than is called for by the provisions of the statute.

But there is a contest in the Twelfth district, and there are charges of padded registration, while the average precinct registration of the district was only 408, or but 8 greater than is called for by the provisions of the statute.

While on the question of figures permit me to submit to you a few more upon the basis of the actual vote for Congress in the three districts of St. Louis at the last two presidential elections. In 1896 the total vote in the Tenth district within the city of St. Louis was 24,023. The total vote of 1900 was 27,052, showing an increase in four years of 3,029 and an average increase per precinct of 45.

In the Eleventh Congressional district the total vote of 1896 was 53,162; in 1900 it was 54,919, showing an increase of 1,757, or an increase per precinct of 12.

In the Twelfth Congressional district in 1896 the total vote was 39,124; in 1900 it was 41,528, showing an increase of 2,404, or of 21 per precinct.

I ask you, gentlemen, to draw the conclusion from these figures which they honestly deserve.

It is true that the contestant, through his attorney in this case, concedes the fact that the registration and the actual vote in the Twelfth Congressional district appear to be normal, but charges that I, through agents or others, induced a sufficient number of honest voters not to register to compensate for the fraudulent ones which I caused to register. Permit me to quote the remarks of the learned attorney for the contestant upon this subject:
